(1) ALEXIS NICHOLAIVITCH (b. 1769; d. St. Petersburg, Nov. 2, 1827), an officer in the cavalry guards, was a well-known dilettante, and the composer of several operas on Russian subjects, the music being more or less imitated from Mozart.

(2) SERGIUS NICHOLAIVITCH (b. 1770), brother of Alexis (1), was also a composer of operas. He is supposed to have supplied music to 'The Forced Marriage' (text by Pestchiev). It is probable that he had a hand in the long list of works attributed to his brother.

(3) NICHOLAS ALEXEVITCH (b. St. Petersburg, May 10, 1800; d. Dec. 22, 1875), the son of Alexis (1), followed his father's profession and rose to the rank of lieutenant-general. Although obviously gifted for music he declined to study seriously in his boyhood, and was content with such knowledge as he could pick up from his father. In spite of their technical weakness, Titov's songs soon began to be exceedingly popular in his own country, and, being the first in the field, he acquired the title of 'the father of Russian song.' Later in life he became acquainted with Glinka and Dargomizsky, and profited by their advice and more

thorough theoretical training. Titov wrote about sixty songs, besides a good deal of light pianoforte music and several popular marches. He had a command of fluent melody of an old-fashioned kind, and many of his songs are agreeably tinged with local colour. His warmth of feeling often degenerates into sentimentality, but a few examples of his ballads—or 'romances' as the Russians call them—have enjoyed a long popularity. Of these the best known are 'Prayer,' 'The Branch' and 'The Postillion's Song.'

TO ANACREON IN HEAVEN, see STAR-SPANGLED BANNER.

TOCCATA (Ital.), from *toccare*, to touch, is the name of a kind of instrumental composition originating in the beginning of the 17th century. As the term sonata is derived from the verb *suonare*, to sound, and may thus be described as a sound-piece, or *Tonstück*, so the similarly-formed term toccata represents a touch-piece, or a composition intended to exhibit the touch and execution of the performer. In this respect it is almost synonymous with the prelude and fantasia; but it has its special characteristics, which are so varied as to make them difficult to define clearly. The most obvious are a very flowing movement in notes of equal length and of a homophonous character, there being often indeed in the earlier examples but one part throughout, though occasionally full chords were employed. There is no decided subject which is made such by repetition, and the whole has the air of a showy improvisation. Giovanni Gabrieli (1557-1613) and Claudio Merulo (1533-1604) were the first writers of any importance who wrote in this style, the toccatas of the latter being scarcely as brilliant as those of the former, though more elaborate. Frescobaldi, Luigi Rossi and Scherer developed the idea and sometimes altered the character of the movement, using chords freely and even contrapuntal passages. It was Bach, however, who raised the toccata far beyond all previous and later writers. His toccatas for harpsichord are in many cases a chain of short movements of markedly different tempi and styles. (See B.-G. vol. iii. pp. 311 and 322, vol. xxxvi. pp. 26, 36, 47, 54, 63.) Bach's organ toccatas are very grand, one of the finest being that in F (B.-G. vol. xv. p. 154), the semiquaver figure of which is treated at great length alternately by the two hands in thirds and sixths over a pedal bass, and then by the pedals alone. Another in C (B.-G. vol. xv. p. 253) is equally brilliant. Bach sometimes begins and ends with rapid cadenza-like passages in very short notes divided between the two hands, as in the well-known toccata in D minor, with its fugue (B.-G. vol. xv. p. 276).

¹ The toccata in A, printed in the same edition, vol. xiii. p. 250, is now known to be by Purcell. It is contained in vol. vi. of the Purcell Society's edition, p. 42. See also *The Toccatas of Bach* by J. A. Fuller Maitland, *Mus. Ass. Proc.*, 1912-13.

Probably from the fact of its faint individuality the toccata has in later times had but a flickering vitality, though composers of organ music have made considerable use of the name and general style. A collection of six toccatas for piano published by E. Pauer has resuscitated as prominent specimens one by F. Pollini (not the famous one of his 32) in G, and others by Czerny, Onslow, Clementi, etc. That by Pollini is of the form and character of a bourrée, and the others would be better named études in double notes, having all definite subjects and construction. The same may be said of Schumann's toccata in C (op. 7), which is a capital study for practice, and is in sonata form. Contemporary musicians have given us two or three specimens of real toccatas worth mention, prominent among them being that in G minor by Rheinberger, which is a free fugue of great boldness and power. The same composer has used the diminutive term *Toccata* for one of a set of short pieces; and another instance of the use of this term is the toccatina in E \flat by Henselt, a short but very showy and difficult piece. Dupont has published a little PF. piece entitled *Toccata*. Toccatas by Stanford and Walter Macfarren provide English examples. In these later examples the unchanging movement of rapid notes, in the manner of the *moto perpetuo*, has become almost an essential characteristic of the form. (See TOUCH; TUCKET.)

F. C., with addns.

TODI, LUIZA ROSA D' AGUIAR (b. Setubal, Jan. 9, 1753; d. Lisbon, Oct. 1, 1833), known as Madame Todi (from her husband, Francesco Severio Todi), was a famous mezzo-soprano singer.

After appearing on the Lisbon stage in comedy in 1768, she received her musical education from David Perez, at Lisbon. She made her début in London in 1777, in Paisiello's 'Due contesse,' but was not successful.¹ At Madrid, in the same year, her performance of Paisiello's 'Olimpiade' won warm admiration, but her European fame dates from 1778, when her singing at Paris and Versailles created a lasting sensation. She returned for one year to Lisbon, but in 1781 was at Paris again. In 1782 she engaged herself for several years to the Berlin Opera, at a yearly salary of 2000 thalers. But the Prussian public thought her affected and over-French in manner, and at the end of a year she gave up her engagement and returned to Paris, where she always found an enthusiastic welcome. Madame Mara was also in Paris, and the two queens of song appeared together at the Concert Spirituel. The public was divided into 'Maratistes' and 'Todistes' and party spirit

ran high. The contest was not conducted without wit: 'Laquelle étoit la meilleure? C'est Mara. C'est bien Todi (bientôt dit).'²

Todi returned to Berlin in 1783, where she sang the part of Cleofide in 'Lucio Papirio.' The King wished her to remain, but she had already signed an engagement for St. Petersburg. There her performance of Sarti's 'Armida' was an immense success. She was overwhelmed with presents and favours by the Empress Catherine, between whom and the *prima donna* there sprang up a strange intimacy. Todi acquired over Catherine an almost unbounded influence, which she abused by her injustice to Sarti, master of the Imperial Chapel, whom she disliked. Seeing that she was undermining his position at court, Sarti revenged himself by bringing Marchesi to St. Petersburg, whose wonderful vocal powers diverted some part of the public admiration from Todi. Todi retorted by procuring Sarti's dismissal.

Meanwhile the King of Prussia was tempting her back to Berlin, and she, in 1786, accepted his offers and was far more warmly received than upon her first visit. With the exception of six months in Russia, she remained at Berlin till 1789, achieving her greatest triumphs in Reichardt's 'Andromeda' and Neumann's 'Medea.' In Mar. 1789 she reappeared in Paris, and among other things sang a scena composed for her by Cherubini, 'Sarete alfin contenti,' eliciting much enthusiasm. After a year's visit to Hanover she proceeded to Italy, and sang with great success. In 1793 she returned to Lisbon. Her farewell performance, however, took place at Naples in 1796.

At the time of the French occupation she was in Oporto, and was caught in the crowd which tried to escape across the river, losing the greater part of her possessions and being nearly drowned in her flight. The French general, however, knew her name and helped her. The rest of her life was spent at Lisbon.

There is a pretty and scarce portrait of her in character, singing, called 'L' Euterpe del secolo XVIII' (1791). She was twice married, and left to her husband and her eight children, who survived her, a sum of 400,000 francs, besides jewels and trinkets worth a fortune. (See VASCONCELLOS, and a separate biography of Todi by him, published in 1873.)

F. A. M., addns. J. B. T.

TOD JESU, DER, i.e. the Death of Jesus, a 'Passions-Cantate,' words by Ramler, music by K. H. Graun. It was first performed in the Cathedral of Berlin, on Wednesday before Easter, Mar. 26, 1755, and took such hold as to become an essential part of the Passion week.

¹ Their rivalry gave rise to the following stanza:

'Todi, par sa voix touchante,
De doux pleurs mouille mes yeux;
Mara, plus vive, plus brillante,
M'étonne, me transporte aux cieus.
L'une ravit et l'autre enchante,
Mais celle qui plait le mieux.
Est toujours celle qui chante.'

² Lord Mount-Edgcumbe speaks of her as having 'fallen to please here,' and Burney, later in her career, writes of her, 'She must have improved very much since she was in England, or we treated her very unworthily, for, though her voice was thought to be feeble and seldom in tune while she was here, she has since been extremely admired in France, Spain, Russia and Germany as a most touching and exquisite performer' (*Hist.* iv. p. 569).

at Berlin. It was first given in England at St. Gabriel's, Pimlico, in Lent 1877, and at the R.A.M., Apr. 1 of the same year. There are three editions of the full score—1760, 1766, 1810; and PF. arrangements without number, beginning with one by J. Adam Hiller, 1783, and ending with one in Novello's 8vo series. G.

TOEPFER, JOHANN GOTTLÖB (b. Nieder-rossla, Thuringia, Dec. 4, 1791; d. Weimar, June 8, 1870), was at first taught by the cantor of the place, and afterwards sent to Weimar to study under Destouches, Riemann and A. E. Müller. In 1830 he was appointed town organist of Weimar, a post which he held until his death. He wrote many works on the organ: *Die Orgelbaukunst* (1833); *Die Scheiblersche Stimmethode* (1842); *Die Orgel, Zweck und Beschaffenheit ihrer Theile* (1843); *Organistenschule* (1845); *Lehrbuch der Orgelbaukunst* (1856), with two appendices by Max Allihn (1888). Toepfer was also a composer of organ pieces, a cantata, 'Die Orgelweihe,' a sonata for flute and piano, a trio for piano and strings; he edited an 'Allgemeines Choralbuch' (Riemann). M.

TOËSCHI (TOËSCA DELLA CASTELLA-MONTE), CARLO GIUSEPPE (b. Italy, 1722 or 1724; d. Munich, Apr. 12, 1788), became violinist in the Mannheim Orchestra, 1752, and Konzertmeister in 1759. He was a pupil of Joh. Stamitz, and a prolific composer in all branches of orchestral and chamber music (Q.-L.; Riemann).

TOFTS, MRS. CATHERINE (d. Venice, 1756), 'little inferior, either for her voice or her manner, to the best Italian women,'¹ was the first of English birth who sang Italian Opera in England. A subscription concert was instituted in Nov. 1703 at the Theatre in Lincoln's Inn Fields, where Mrs. Tofts sang several songs, both Italian and English.² In the following year she continued to sing at the 'Subscription Musio.' On Jan. 29, Margherita de l'Épine sang for the first time, at Drury Lane. On the second appearance of this, Tofts's future rival, a disturbance occurred at the theatre, while she was singing, which 'was suspected' to have been created by her emissaries, a suggestion which she denied in the *Daily Courant*, Feb. 8, 1704. In the same year she sang and played the part of Pallas in Weldon's 'Judgment of Paris.'

In 1705 came the first attempt to plant Italian, or pseudo-Italian, Opera in England; and to the success of this endeavour Mrs. Tofts and her rival were the chief contributors, the former playing successively the chief parts in 'Arsinoë,' 'Camilla,' 'Rosamond,' 'Thomyris,' and 'Love's Triumph.'

'Mrs. Tofts, who took her first grounds of musick here in her own country, before the Italian taste had so highly prevailed, was then not an adept in it; yet

whatever defect the fashionably skilful might find in her manner, she had, in the general sense of her spectators, charms that few of the most learned singers ever arrive at. The beauty of her fine proportioned figure, and the exquisitely sweet, silver tone of her voice, with that peculiar rapid swiftness of her throat, were perfections not to be imitated by art or labour.'⁴

At a very early stage of her short but brilliant career, she drew a salary of £500,⁵ higher than that which was paid to any other member of the company—a sure test of the estimation in which she was held by the management and the public; at the same time, Valentini and de l'Épine only drew £400 apiece, and the Baroness £200. At another time, this salary was commuted⁶ into a share in the profits of the theatre. Again, we find her⁷ offering to sing for 20 guineas a night, or 'in consideration the year is so far advanced' for 400 guineas till the 1st of July, provided she was allowed to sing in another play, to be produced elsewhere, if not on an opera night. These were high terms in 1708. She sang also at the concerts at court. Meanwhile, she was no stranger to the quarrels and disputes which seem to have prevailed at the Opera then as in later times. There was a warm correspondence⁸ about a bill of 80 guineas for Camilla's dress, which Rich declined to pay; but Camilla refused to appear in 'Thomyris' till it was paid; and Rich then compromised the matter. She further demanded⁹ an allowance for 'locks for hair, jewels, ribbons, muslin for vails, gloves, shoes, washing of vails, etc.,' for which she modestly affirmed that '£100 was not sufficient for the season.'

Were it not that similar complaints and demands were common from other singers, there would seem to be here some foundation for the charge brought against Mrs. Tofts in the epigram, attributed to Pope:

'So bright is thy beauty, so charming thy song,
As had drawn both the beasts and their Orpheus along;
But such is thy avarice, and such is thy pride,
That the beasts must have starved, and the poet
have died!'

She must, however, have had a great passion for money, and a great disregard of the means of raising it, if Lady Wentworth's contemporary account may be trusted. 'Mrs. Taufs,' says that delightful writer and most eccentric speller,

'was on Sunday last at the Duke of Somerset's, where there were about thirty gentlemen, and every kiss was one guinea; some took three, others four, others five at that rate, but none less than one.'¹⁰

This unfortunate singer lost her reason early in 1709. In a most ungenerous vein Steele alludes to her affliction,¹¹ and attributes it to the habit she had acquired of regarding herself as really a queen, as she appeared on the stage, a habit from which she could not free herself.

¹ Hawkins.

² Burney.

³ *Ibid.*

Burney supposes that this was an exaggeration, by means of which the writer intended only to

'throw a ridicule on opera quarrels in general, and on her particular disputes at that time with the Margarita or other female singers.'

Hawkins says that she was cured, temporarily at least, and

'in the meridian of her beauty, and possessed of a large sum of money, which she had acquired by singing, quitted the stage (1709), and was married to Mr. Joseph Smith, afterwards English consul at Venice. Here she lived in great state and magnificence, with her husband, for a time; but her disorder returning' [which, if true, upsets Burney's theory], 'she dwelt sequestered from the world in a remote part of the house, and had a large garden to range in, in which she would frequently walk, singing and giving way to that innocent frenzy which had seized her in the earlier part of her life.'

She died at Venice, and is buried in the old cemetery in the fort of San Nicolo, Lido.

Her voice did not exceed in compass¹ that of an ordinary soprano, and her execution, as shown by the *printed* airs which she sang, 'chiefly consisted in such passages as are comprised in the shake, as indeed did that of most other singers at this time.' It may be observed, however, that all singers 'at this time' added a good deal to that which was 'set down for them' to execute; and probably she did so too.

It is somewhat strange that, of a singer so much admired as Mrs. Tofts undoubtedly was, no portrait should be known to exist, either painted or engraved.

J. M.

TOLBECQUE, a family of Belgian musicians, who settled in France after the Restoration. The original members were four brothers: (1) ISIDORE JOSEPH (b. Hanzinne, Apr. 17, 1794; d. Vichy, May 10, 1871), was a good conductor of dance music. (2) JEAN BAPTISTE JOSEPH (b. Hanzinne, 1797; d. Paris, Oct. 23, 1869), violinist, composer and excellent conductor, directed the music of the court balls during Louis Philippe's reign, and also those at Tivoli, when those public gardens were the height of the fashion. He composed a quantity of dance music—quadrilles, vases and galops—above the average in merit; an *opéra-comique* in one act, 'Charles V et Duguesclin' (Odéon, 1827), with Gilbert and Guiraud; and with Deldevez, 'Vert-Vert' (Opéra, 1851), a three-act ballet, his most important work. He was a member of the Société des Concerts du Conservatoire from its foundation in 1859. (3) AUGUSTE JOSEPH (b. Hanzinne, Feb. 28, 1801; d. Paris, May 27, 1869), was a pupil of Rudolph Kreutzer: he took the first violin prize at the Conservatoire in 1821, made some mark as a virtuoso, was an original member of the Société des Concerts, and one of the best violinists at the Opéra, and for several seasons was well known in London, where he played first violin at Her Majesty's Theatre. (4) CHARLES

¹ Burney.

JOSEPH (b. Paris, May 27, 1806; d. there, Dec. 29, 1835), was also a pupil of R. Kreutzer, and an original member of the Société des Concerts. He took a prize at the Conservatoire in 1824, and became conductor at the Variétés in 1830. In this capacity he composed songs and pieces for interpolation in the plays, several of which attained some amount of popularity.

Later members of the family were (5) AUGUSTE (b. Paris, Mar. 30, 1830; d. Niort, Mar. 8, 1919), son of Auguste Joseph (3), a distinguished violoncellist, took the first violoncello prize at the Conservatoire in 1849, and published some fifteen works of various kinds for his instrument, including 'La Gymnastique du violoncelle' (op. 14), an excellent collection of exercises and mechanical studies. He was also a clever restorer of old instruments, and formed a collection, which he sold to the Brussels Conservatoire in 1879. He was professor of the violoncello at the Marseilles Conservatoire from 1865-79, after which he went to Paris, where he became a member of the Société de Concerts du Conservatoire. In 1890 his interesting contribution to the literature of the violin, entitled *Quelques considérations sur la lutherie*, was published by Gand and Bernadel in Paris, and on Dec. 22, 1894, his *opéra-comique* in one act, 'Après la valse,' was produced at Niort. His *Souvenirs d'un musicien en Provence* was published at Niort, in 1896.

E. H.-A.

In 1903, at Niort, he published his great work, *L'Art du luthier*. He was decorated with the Légion d'Honneur in 1909. He had made a fresh collection of instruments, also of old instrumental music, which was dispersed in 1922. A catalogue, without the name of the publisher, was printed by F. Aubéry, Valréas.

M. P.

His son (6) JEAN (b. Niort, Oct. 7, 1857; d. 1890), took the first violoncello prize at the Paris Conservatoire in 1873, and studied the organ with César Franck.

G. C.

TOLLET, THOMAS, one of the Dublin city musicians in 1668-88. He went to London in 1689 and set a song in D'Urfey's *Marriage-Hater Matched* in 1692. In 1692, in conjunction with John Lenton, he published 'A Consort of Musick in three parts,' and was author of *Directions to play on the French Flageolet*. He was also a composer of act tunes for the theatre. 'Tollet's Ground,' printed in the Appendix to Hawkins's *History*, is by one George Tollet.

W. H. H.; addns. W. H. G. F. and W. B. S.

TOLLING. Sounding a bell a number of times in slow succession, sometimes with an interval between every two or three blows of the clapper ('tellers') to announce a death or a funeral.

W. W. S.

TOLLIUS, JAN (b. Amersfort, Holland, c. 1550; d. circa 1603), was maestro di cappella

at Assisi in 1587, went to Rome in that year, and lived at Padua in 1591 under the patronage of the bishop. Thence he went to Denmark, where he was engaged as singer in the court chapel from Oct. 10, 1601, to Jan. 18, 1603, in which year he probably died. He composed several books of motets and madrigals (*Q.-L.; Riemann*).

TOMASCHEK, VÁCL. JAR. (JOHANN WENZEL), b. Skutsch, Bohemia, Apr. 17, 1774; d. Apr. 3, 1850), distinguished organist, composer and teacher, was the youngest of a large family.

His father, a well-to-do linen-weaver, having been suddenly reduced to poverty, two of his brothers, a priest and a public official, had him educated. He early showed talent for music, and was placed at Chrudin with Wolf, a well-known teacher, who taught him singing and the violin. He next wished to learn the piano and organ, and his brother the priest sent him a spinet, on which he practised day and night. The Minorite fathers of Iglau offered him a choristership, with instruction in theory. On the breaking of his voice in 1790 he went to Prague to study philosophy and law, supporting himself the while by giving lessons. All his spare time, even the hours of rest, was spent in studying the works of Marpurg, Kirnberger, Mattheson, Türk and Vogler, and he thus laid a solid foundation of scientific knowledge. Neither did he neglect practical music, but made himself familiar with the works of Mozart and Pleyel, and became acquainted with Winter, Kozeluh and, above all, Beethoven, who exercised a lifelong influence over him. In his autobiography, published in a periodical called *Libussa* (1845, etc.), Tomaschek writes:

'It was in 1798, when I was studying law, that Beethoven, that giant among players, came to Prague. At a crowded concert in the Convict-hall he played his concerto in C (op. 15), the Adagio and Rondo grazioso from the sonata in A (op. 2), and extemporised on a theme from Mozart's "Clemenza di Tito," "Ah tu fosti il primo oggetto." His grand style of playing, and especially his bold improvisation, had an extraordinary effect upon me. I felt so shaken that for several days I could not bring myself to touch the piano; indeed it was only my inextinguishable love for the art, that, after much reasoning with myself, drove me back to the instrument with even increased industry.'

Before long, however, the critical faculty returned. After hearing Beethoven twice more he says:

'This time I was able to listen with greater calmness of mind, and though I admired as much as ever the power and brilliancy of his playing, I could not help noticing the frequent jumps from subject to subject which destroyed the continuity and gradual development of his ideas. Defects of this kind often marred those most magnificent creations of his superabundant fancy.'

Three years later Tomaschek declared Beethoven to have still further perfected his playing. He himself about this time published some 'Ungarische Tänze' (without ever

having heard a Hungarian air) and Hölty's 'Elegie auf eine Rose,' an early specimen of programme music. Twelve waltzes had a great success at the Prague Carnival of 1797: but these he burnt. He was known as a pianist, and esteemed as a teacher by the principal nobility, but hesitated between the profession of music and an official career. Meantime Count Bucquoi von Longueval offered him the post of composer in his household, with such a salary as to place him at ease in money matters; and this he accepted. Prague continued to be his home, but he made occasional journeys, especially to Vienna. In Nov. 1814 he paid Beethoven a visit, of which he has left an account (*Libussa*, 1846) in the form of a conversation.

Tomaschek's house became the centre of musical life in Prague, and the list of his pupils includes Dreyschock, Kittl, Kuhe, Schulhoff, Bocklet, Dessauer, Worzischek and Würfel. In 1823 he married Wilhelmine Ebert, remaining in Count Bucquoi's service, though with a house of his own, where he was much visited by strangers, especially by English. He was hospitable and pleasant except on the subject of music, on which he was given to laying down the law. In person he was tall, and of a military carriage. The superficial was his abhorrence. Even in his smaller works there was a technical completeness, which procured him the title of the 'Schiller of music.' His church music includes three masses (two published) and two Requiems (still in MS.), but his predilection was for dramatic music, to which he was led by its connexion with the Ballad and the Lied. He set several of Goethe's and Schiller's poems, and also old Czech songs from the Königinhof MS.¹

Tomaschek played his setting of Goethe's poems before the poet himself at Eger, and was very kindly received. His opera 'Seraphine' (1811) was well received at the National Theatre in Prague, in spite of a poor libretto; but notwithstanding this success he declined to permit the appearance of two other operas, 'Alvara' and 'Sakuntala.' He left *scenas* from Goethe's 'Faust,' and from 'Wallenstein,' 'Maria Stuart,' and the 'Braut von Messina,' as well as other vocal compositions, which were presented with his other remains to the Bohemian National Museum in Prague, by his nephew Freiherr von Tomaschek.

Besides a symphony, a piano concerto, string quartets, a trio, some piano sonatas, opp. 11, 14, 15, 21 and 48, and a quantity of smaller works, chiefly Lieder, Tomaschek published 110 with opus numbers, including the interesting 'Eklogues' (opp. 35, 39, 47, 51, 53, 66 and 83) and two sets of 'Ditirambi,' opp. 52 and 65, which would still repay the attention of pianists.

¹ The authenticity of which has been disproved by Sembora, the great authority on Czech literature.

His works exercised a material influence on such an artist as Robert Schumann.

Tomaschek was buried in the churchyard of Koschir, near Prague. F. G.

TOMASI, BRASIO (*b.* Comachio, near Rome), was organist of Comachio in 1611 and 1615. In 1635 he calls himself arch-presbyter and vicar at Massa Fiscaglia (Ferrara). He composed 2 books of 'Sacri fiori', 1-8 v., 1 book of motets and 2 books of madrigals (*Q.-L.*).

TOMASINI, (1) LUIGI (ALOYSIUS) (*b.* Pesaro, 1741; *d.* Apr. 25, 1808), eminent violinist and distinguished member of Prince Esterhazy's band under Haydn. In 1757 he became a member of Prince Paul Anton's household at his palace of Eisenstadt in Hungary, and on Haydn becoming second Kapellmeister in 1761 was at once promoted by him to be first violin. He was afterwards leader and director of the chamber music, with a largely increased salary. Prince Nicholas (successor to Paul Anton) left him a pension in 1790, but Tomasini remained in the service till his death. He was on the most intimate terms with Haydn, who wrote all his quartets with a view to Tomasini's playing, and remarked to him, 'Nobody plays my quartets so much to my satisfaction as you do.' He only once appeared in public in Vienna, at a concert of the Tonkünstler-Societät (1775), of which he had been a member from its foundation in 1771. In all probability Haydn gave him instruction in composition. He published violin-concertos, quartets, duos, concertants (dedicated to Haydn), etc. For the Prince he wrote '24 Divertimenti per il paridon (barytone), violino, e violoncello,' now in the archives of the Gesellschaft der Musikfreunde in Vienna. A few of Haydn's violin-concertos were written expressly for Tomasini ('fatto per il Luigi'). Besides two daughters, who sang in the church and opera at Eisenstadt, Tomasini had two talented sons.

(1) LUIGI (*b.* Esterház, 1779), an excellent violinist, was received into the chapel in 1796, dismissed several times for incorrigible levity, but as often readmitted at Haydn's request. The latter speaks of his 'rare genius,' and so did Hummel. He played in Vienna in 1796 and 1801 at the Tonkünstler-Societät, and in 1806 at the Augarten Concerts. In 1808 he had to fly, for having married, without the Prince's leave, Sophie Groll, a singer in the chapel, but he secured an appointment as Konzertmeister to the Duke of Mecklenburg-Strelitz. In 1812 he and his wife gave a concert in Berlin, when Luigi played Beethoven's concerto, and his wife, a pupil of Righini, was much applauded. In 1814 he gave a concert in the court theatre in Vienna, after which he wholly disappears.

(2) ANTON (*b.* Eisenstadt, 1775; *d.* there, June 12, 1824), played in the chapel as an

amateur from 1791-96, when he became a regular member. His instrument was the viola. He married the daughter of a Polish General in 1803, in which year he also became a member of the Tonkünstler-Societät. He resembled his brother both in talent and disposition, and, like him, was several times dismissed, and taken on again with increased salary. In 1820 he became leader of the band.

C. F. P.

TOMKINS. The name of a family of musicians living in the 16th and 17th centuries.

(1) JOHN (*fl.* circa 1590), mentioned in Noake's *Monastery*, p. 476, as organist of Worcester Cathedral in 1590. Atkins (*The Early Occupants of the office of Organist . . . of the Cathedral of . . . Worcester*) failed to trace him. He does not seem to have been nearly related to the family discussed below.

(2) THOMAS (*b.* circa 1545; *d.* circa 1626-1627), organist and precentor. His chief claim to notice rests on the fact that he was the father of a notable family of musicians. As the pedigrees recorded at the College of Arms show, he was descended from a family seated for several generations at Lostwithiel, in Cornwall. He left Cornwall for St. David's, and became 'Master of the Choristers and Organ-player' at the cathedral. He married twice. By his first wife, Margaret Poher or Pore, he had, besides one who died in infancy, two sons; both of these, not an unusual circumstance at that period, received the name of Thomas (3) and (4) (see below). By his second wife, Ann Hargest, daughter or sister of Richard Hargest, of Penarthur Farm, near St. David's, he had five more sons: John (5), Nicholas (7), Giles (8), Robert (9), Peregrine (10). Later he took holy orders and became Minor Canon of Gloucester and vicar of St. Mary de Lode in the same town. In 1625 he succeeded Richard Marwood as precentor of the cathedral and died shortly after that date. There is no evidence that he had special musical gifts; and there can be no doubt that the madrigal 'The Fauns and Satyrs,' contributed in 1601 to 'The Triumphes of Oriana,' was the work of his famous son (4), who for some years before that date had been organist of Worcester Cathedral.

(3) THOMAS (*b.* circa 1570; *d.* 1596), lay-clerk. Eldest son of Thomas (2). While still a boy he was appointed to 'enjoy all the profits and commodities of a Vicar's stall' on the recommendation of the Archbishop's Commissioners 'to the end that his poor Father, at whose finding he is, may thereby the rather be relieved.' He was subsequently expelled for misbehaviour, went to sea, and lost his life in Grenville's famous action in the *Revenge* in 1596.

(4) THOMAS (*b.* St. David's, 1573; *d.* Martin Hussingtree, June 1656), composer and organist. The second son of Thomas Tomkins (2)

and Margaret, his first wife. He was born at St. David's, a fact that tallies with his statement in the dedication of his book of 'Songs' in 1622 to Lord Pembroke, that he was born in the 'country' from which his patron took the title of his earldom. He was a pupil of Byrd, as we learn from the dedication of No. 14 of his 'Songs.' He became organist of Worcester Cathedral about the year 1596. He married Alice, daughter of — Hassard and widow of Nathaniel PATTRICK (*q.v.*). In 1607 he took the B.Mus. degree at Oxford. In 1621 he was appointed one of the organists of the Chapel Royal, and he received 40s. for music composed for Charles I.'s coronation in 1625. In 1628 he was appointed to succeed Alphonso FERRABOSCO (*q.v.*) as composer in ordinary to Charles I., but the appointment was revoked by the King, it having been promised to Ferrabosco's son. Tomkins retained his position as organist of Worcester until 1646, when the services in the cathedral were suspended after the second siege of Worcester.

Tomkins's latter days were spent in all probability at the Manor House, Martin Hussingtree, owned by the wife of his son Nathaniel. He continued to compose to the end of his life, for one of his virginal pieces is dated 1654. He was buried at Martin Hussingtree; the entry in the register reads:

'Mr. Thomas Tomkins, organist of ye King's Chappell and of the Cathedral church of Worcester, was buried ye ixth day of June 1666.'

Although Tomkins lived till the middle of the 17th century, he adhered for the most part to the polyphonic style, and he must be regarded as belonging to the great group of English composers who flourished at the close of the 16th century; and it is a fact that much of his work was written before the close of the first two decades of the 17th century. He was some ten years older than Orlando Gibbons, and much the same age as Weelkes and Wilbye. The greater part of his work was printed, his secular music in his 'Songs of 3. 4. 5. and 6. parts' (1622), and the sacred music in *Musica Deo sacra* (1668). The former of these publications has been reprinted together with a full account of the Tomkins family in *Engl. Madr. Sch.* vol. xviii. *Musica Deo sacra* has been completely scored by Rev. A. Ramsbotham; for the services see *Tudor Church Music*, vol. vii.

Though he used the term 'Songs,' the compositions in the 1622 publication are mostly madrigals and ballets, and some are set to Scripture words. As a madrigal writer Tomkins ranks very high. He had a fine technique and showed remarkable power of expression. This is well exemplified in 'When David heard that Absalom was slain.' And he also rises to great heights in 'Weep no more, thou sorry

boy,' 'When I observe,' with its lovely ending, 'Oft did I marle,' and 'Music divine.' In this last are some splendid sequences of quavers, of rather unusual character, at the word 'harmony.' The ballets in the set are worthy to be classed with those of Morley and Weelkes, though they are of a somewhat different character; among the best are 'See the shepherds' queen' and 'Fusca, in thy starry eyes.' *Musica Deo sacra* was not published until several years after the composer's death. It contains five services. Tomkins, like Weelkes, did something to develop the form of the SERVICE (*q.v.*), and was not content with the conventional 'short' service, note against note. Besides a 'short' service and a 'great' service, he wrote 'verse' services, and used the organ independently of the voices. There are 95 anthems in *Musica Deo sacra*; many of the later works among them are of the nature of verse anthems. A notable anthem is the twelve-part 'O praise the Lord, all ye heathen.'

Tomkins records two interesting details in some notes in the 'Pars organica' of *Musica Deo sacra*. He states that the sound produced by a 36-inch pipe represents F to him. In modern days it is nearer to G sharp. He also states that the beat of a 24-inch pendulum, or the beat of the human heart, is the normal speed of a minim beat (4 minims in a bar). These two important notes have survived only in the Tenbury copy of *Musica Deo sacra*. Tomkins wrote a good deal of instrumental music both for the virginal and for viols. One virginal-book in the library of the Conservatoire de Musique in Paris is in Tomkins's hand; besides a large number of his own works, it contains pieces by Byrd, Bull and Gibbons.

The following church music by Thomas Tomkins was not printed in *Musica Deo sacra*, but survives in MS.

Sweet Saviour. Tenb. 791 fo. 188.

(5) JOHN (*b. circa* 1586, *d.* London, Sept. 27, 1638), eldest son of Thomas Tomkins (2) by his second marriage. He was a scholar of King's College, Cambridge, and in 1606 was appointed organist of the College. He took the B.Mus. degree in 1608. In 1619 he left King's and became organist of St. Paul's Cathedral. In 1625 he was appointed a gentleman extraordinary of the Chapel Royal 'for the next place of an organist there.' He married Margaret, daughter of Dr. Sylvanus Griffiths, Dean of Hereford. Two of his three sons were choristers and king's scholars at Worcester Cathedral.

The youngest, Thomas, became Fellow of All Souls', Chancellor and Prebendary of Exeter. He was buried in St. Paul's Cathedral, but his epitaph was destroyed in the fire of London. Some anthems by him are in the R.C.M. MSS. 1043-51 and Tenb. 791; and a set of variations on 'John come kiss me now' is in B.M. Add. MSS. 29,996. He wrote a short dedicatory poem which is printed in his brother's 'Songs of 3. 4. 5. and 6. parts,' and No. 26 of these songs was inscribed to him. John had a son (6) ROBERT, who was one of the king's musicians in 1641 and in 1662.

(7) NICHOLAS, 5th son of Thomas (2), did not follow music as a profession, though he is said by Anthony Wood to have been musical. He was one of the gentlemen of the Privy Chamber to Charles I. in 1634. His brother Thomas (4) inscribed the 4th of his 'Songs' to him.

(8) GILES (*d.* Salisbury 1668), 6th son of Thomas (2), like his brother John (5), became organist of King's College, Cambridge, where he succeeded Matthew Barton in 1624. On the death of John HOLMES (*q.v.*), organist of Salisbury Cathedral, in 1629, he was put forward in rivalry to Holmes's son as a claimant to a prebend in the cathedral and was supported by the King. After a long dispute the claim seems to have been settled in favour of Holmes; but Tomkins became master of the choristers and organist. In 1630 he received the additional appointment of 'Musician for the Virginalls' to Charles I. in succession to Richard DERING (*q.v.*). He was buried at Salisbury on April 4, 1668. Little of his church music has survived. No. 12 of his brother's 'Songs' was inscribed to him.

(9) ROBERT, 7th son of Thomas (2), was one of the musicians in the household of Charles I. in 1633 and held office till 1641 or later. Anthems by him are in Tenb. MS. 791 and in the B.M. His brother inscribed No. 11 of his 'Songs' to him.

(10) PEREGRINE, 8th and youngest son of Thomas (2), was described as 'of London and Dronfield, co. Derby.' He married Jane, daughter of Sir Henry Hastings, and had three sons. He took up arms for the King against Parliament. He was mentioned in his mother's will in 1627; and in 1623 he was a witness to the will of John Patten, father-in-law of Orlando Gibbons. No. 10 of his brother's 'Songs' was inscribed to him.

(11) NATHANIEL (*b.* Worcester 1599, *d.* Martin Hussingtree, Oct. 20, 1681), only son of Thomas (4), organist of Worcester Cathedral. He took the degree of B.D. at Balliol in 1629, and in the same year became a Canon of Worcester. His wife inherited the Manor of Martin Hussingtree, and the latter part of his life was spent there.

(12) GILES (*b.* Salisbury 1633, *d.* Martin Hussingtree, July 24, 1725), son of Giles Tom-

kins, organist of Salisbury Cathedral. He was appointed organist of Worcester Cathedral in 1661, when the services were resumed after the Restoration. Very shortly afterwards he was dismissed by the Dean for contumaciously absenting himself. He subsequently took holy orders and was rector of Martin Hussingtree for over 50 years. He had six children.

BIBL.—SIR IVOR ATKINS, *The Early Occupants of the Office of Organist and Master of the Choristers of the Cathedral Church of Christ and the Blessed Virgin Mary, Worcester*. Printed for the Worcester Historical Society, 1918. E. H. FELLOWS. Preface of vol. xviii. of *Engl. Mad. Sch.* Both these books contain many further details concerning the Tomkins family. E. H. F.

TOMMASINI, VINCENZO (*b.* Rome, Sept. 17, 1880), composer, studied the violin under Ettore Pinelli and composition under Stanislas Falchi at the Liceo di Santa Cecilia, the Accademia di Santa Cecilia admitting him as an associate later on. His early works, which are conventional and no longer representative, include an overture to Calderon's 'Life is a Dream,' dating from 1904, and the opera, 'Medea,' produced at Trieste in 1906.

Several years' travel made Tommasini conversant with modern methods which his early academic training had withheld from him, and he altered his style radically. The first work to reveal his new outlook was a string quartet in F (1910). This was succeeded by the 'Erotic Poem' for orchestra, and by the comic opera in one act, 'Uguale Fortuna,' both composed in 1911. The new opera was awarded the first prize at a national competition instituted by the city of Rome, and it was staged for the first time in 1913 at the Teatro Costanzi.

In 1912 took place the first performance of an orchestral prelude to Baudelaire's 'Hymne à la beauté,' and in 1914 that of a suite for orchestra in four movements; but Tommasini's most successful orchestral work so far is the 'Chiari di Luna,' consisting of two movements entitled 'Chiese e rovine' and 'Serenate.' It was presented for the first time by Toscanini in 1916. The same year saw the composition of a sonata for violin and piano.

It was in 1917 that Vincenzo Tommasini finished the work which has made his name known all over the world. This was the ballet, 'The Good-humoured Ladies,' based on a comedy of Goldoni, and accompanied by a series of sonatas by Domenico Scarlatti, orchestrated with impeccable taste by Tommasini, if somewhat grievously cut and unsatisfactorily strung together. The ballet was produced in Rome in Apr. 1917, and it remains one of the most delightful entertainments in the repertory of Serge Diaghilev's Russian Ballet Company.

In 1918 Tommasini issued four choral settings of poems by Dante, Petrarch and Matteo Frescobaldi, in which he attempted, with no very happy result, an imitation of the Italian madrigal of the 16th century. The next two works of large dimensions are both orchestral, 'Il Beato Regno' (1921) draws its material

from liturgical music, while the other, 'Paesaggi toscani' (1923), is based on Tuscan folk-songs.

TONADA, see SONG, subsection SPAIN (3).

TONADILLA, see MISSON, Luis.

TONAL FUGUE, see FUGUE.

TONALITY is that element of key-feeling which was gradually evolved out of the increasingly harmonic organisation of modal polyphony. In the end it completely supplanted the less universal values which had depended on the particular character of a particular mode. Throughout the whole development of classical forms key-definition has occupied a paramount place, and without it neither the harmonies nor the architecture of the music of the last three centuries can be made intelligible. Tonality in general rests mainly on a balance of tonic harmonies rendered stable and convincing by the use of a context of such related or leading chords as appear to find their ultimate solution in the desired key. Of these leading chords those of the dominant of the key in question are the most important, and a satisfying definition is almost impossible without harmonic inferences which are ultimately derived from the relation between the chosen key and its dominant. Subdominant harmonies also have harmonic inferences which can be used to consolidate a tonality, though these are not so powerful as those of the dominant. The simplest definitions of a tonality are to be found in the various cadences which were organised to this end. Examples will be found in the articles on CADENCE and HARMONY.

Those extended forms of the sonata order on which classical instrumental music has been mainly built, have acknowledged an unqualified allegiance to rigid tonalities. And this is almost equally true of every musical form which has an intrinsic architectural coherence. Keys and their relations are in this sense the postulates on which melodic, harmonic and formal arguments were alike founded, and it was by an unflinching sensitiveness to these values that composers were able to display a wealth of imaginative fancy and yet preserve a formal balance and coherence that made an extended movement an artistically proportioned whole (see FORM; SONATA).

It must be admitted, however, that three centuries of development have not left these fundamental conceptions of tonality altogether unqualified. Dramatic music in particular has always claimed a certain freedom to obey ideas external to music proper, and has therefore subjected many formal considerations to demands of an alien kind. Moreover, increasing familiarity with idioms thus externally suggested has made it possible to transfer even to the most absolute music a noticeable licence in the treatment of keys and their definitions.

Opera and programme music alike have shown this power of indirect infection. It must further be remembered that the more sensitive the mind of the composer may be to the inferences of tonality, the more novel and subtle are likely to be the relations which he will comprehend within it. There can be no doubt that many of the idioms which the 19th century has accepted as having a clear basis in tonality would have appeared to the musicians of an earlier day too vague and fantastic to be intelligible on any traditional principles. And to this must be added the fact that the very strength of the tonal organisation which three centuries of masterpieces has inculcated, has served to give a certain attraction to devices of expression not so rigidly proportioned.

There has recently been a decided renaissance of such values as belonged to more modal systems, and whether these are practised as a form of conscious archaism, or are less directly culled from the half-forgotten idioms of folk-music, they are equally subversive of key-definition in the stricter classical sense. Nor have contemporary composers scrupled to derive novel idioms from various arbitrarily chosen formulae, many of which are deliberate negations of the traditional associations of tonality. Some of the consequences of these phenomena have been outlined in the article on HARMONY.

The word *atonality* has recently been coined to describe these non-tonal idioms. It is not of much use for purposes of exact description, because it logically includes modal, neo-modal, and all kinds of arbitrary melodic or harmonic dialects, even to the degree of complete chromaticism. These various features have been dealt with under their respective headings, and in the article on HARMONY.

Polytonality is a synonym for *Multiple Tonality*, and refers to certain features of contemporary experiment in which more than one tonality is involved in a single harmonic structure. This also is discussed in the article on HARMONY.

G. D.

TONE. In scientific treatises this term is used to denote a musical note which is free from harmonics. A musical note in general consists of a fundamental and a series of harmonic overtones. Each of these constituents is a Tone.

The word tone is also commonly used with the same meaning as quality. (See ACOUSTICS, subsection QUALITY.)

J. W. G.

TONELLI, ANTONIO (b. Carpi, Italy, Aug. 19, 1886; d. there, Dec. 25, 1975), one of the most active pioneers of the violoncello as a solo instrument. His father, Giuseppe Michele Santo de Pietri, called (*detto*) Tonelli, was a lieutenant in the Carpignan cavalry, and an amateur musician of repute. Tonelli's mother,

née Caterina Pisa, or Pisi, excelled in music, and was his first instructor. She was succeeded by D. Nicolo Pace, choirmaster of the cathedral of Carpi. In due course Tonelli proceeded to Bologna, where he learnt to play the organ, the viola d' amore, the violoncello, and, as a recreation, devoted himself to the art of fencing. Later Tonelli went to the Collegio de' Nobili in Parma, where his musical attainments gained him much honour, and attracted the attention of Antonio Francesco, Duke of Parma, who became his patron. Tonelli's biographers differ widely in their accounts of the length of his stay in Parma, and his supposed three years' sojourn in Denmark. One authority denies that Tonelli ever visited the latter country at all, while another declares that he made a resolve to roam the world without money or provisions. 'Money,' he told his friends, 'is the greatest enemy of man, and in a city where there is an organ Tonelli will not want bread.' Dressed entirely in black—as was ever his wont—and carrying a small cane in his hand, Cabassi tells us that Tonelli left Parma suddenly, and started on his pilgrimage to Denmark, where he received an appointment at the royal court. He remained there exactly three years, after which he returned in precisely the same condition as he left. On one occasion he appeared in Genoa without any means of subsistence, whereupon he sat down in a corner of the *piazza grande*, and began to play on his violoncello so divinely that he soon attracted a crowd around him, who supplied him with more than a sufficiency for his return journey to Carpi. The year 1724 saw him in Carpi busily engaged in composition, and in that year he wrote an oratorio in honour of the birth of a son and heir to the house of Este. In 1726 Benedict XII. canonised Louis Gonzago at Guittalla, and Tonelli was invited to play the violoncello at the solemn after-festival ordered by the ducal court to celebrate the occasion. Tonelli willingly assented to the request, and during a performance in the principal church is said to have distinguished himself in an artistic rivalry with the eminent violinist d'Ambrville. The latter tried to excel Tonelli in a difficult passage, whereat Tonelli repeated the phrase in a more elaborate and beautiful form, after which the contest for supremacy between violin and violoncello grew in ardour until the whole assemblage burst into involuntary applause. On Mar. 27, 1730, Tonelli was appointed maestro di cappella to the cathedral of Carpi on the resignation of D. Gio. Batt. Zarani. Here he composed some of the interludes of his musical drama, 'Lucio Vero,' which was produced at Alassio during the Carnival of 1741. But the ties of a settled occupation were repellent to the dictates of Tonelli's restless spirit, and he soon ceded his post to his stepbrother Giuseppe, of whom he

was very fond, and disappeared, no one knew where, with his violoncello under his arm. He wandered about Italy for some time, and at length accepted a post in the Cappella di Alassio, near Albenga. There he remained until 1745, when he again returned to Carpi and opened a free school of singing for poor children, on a special method of teaching, entirely his own. One of his pupils, Rosa Parteggotti, a child barely 6 years of age, created a great sensation, by appearing in public in 1753, singing and accompanying herself on the spinet with extraordinary dexterity. In the same year that she appeared Tonelli closed his academy, left Carpi, and returned to Alassio, where he remained for three years. It is possible that his gifted little pupil may have accompanied him, as he seems to have conceived a great affection for her. When she reached the age of 15, Rosa accepted the direction of the choir of the nuns of the Convent of St. Clare at Carpi, and at the same time resolved to join the sisterhood. Tonelli grew distracted with grief. He was then 76, but entreated Rosa to marry him, and when he found it impossible to shake her resolution he threatened to commit suicide. He lived long enough, however, to write a clever *canzoniere* against nuns, and died from the effects of a chill at the age of 78.

As a composer Tonelli was thorough; he shone on the concert platform as a violoncellist and in church as an organist, besides which he was a gifted poet. Published compositions: 'Il trionfo dell' umiltà di S. Filippo Neri,' 'Oratorio a tre voci' (Paolo Ferrari, Carpi, 1724 ?); 'Cantate per musica' (Paolo Ferrari, Carpi, 1724); 'Intermezzi musicali di Canoppo e Lisetta' (Paolo Ferrari, 'Lucio Vero'; on the fourth page there is the following: *La Musica è del Sig. Antonio Tonelli, virtuoso delle altezze serenissime Duca e Duchessa di Modena. Vari sonetti stampati ed intermezzi tra quali le Quattro Stagioni, ed un sonnetto in fine dell' oratorio intitolato: Il Trionfo dell' Umiltà* (Paolo Ferrari). A number of his MSS. are preserved in the cathedral at Carpi, and his *Tratto di musica* with some other MS. belonged (according to Count Valdrighi) to Tonelli's biographer Cabassi in 1880.

BREL.—VALDRIGHI, *Il violoncellista Tonelli* (Musurgiana, No. 4), reprinted from the *Atti e memorie delle R. R. Deputazioni di Storia Patria per la Provincia dell' Emilia*. Nuova Serie, vol. 5, part 11, Modena.

E. H.-A.

TONES, THE GREGORIAN. See GREGORIAN TONES and PSALMODY. Under the latter heading the tones with their several endings are given in full.

TONIC, the name given in harmonic music to the KEYNOTE, i.e. the note from which the key is named. The functions of the tonic are in all respects identical with those of the final of the ancient modes. The tonic harmony is the

common chord or triad, major or minor as the case may be, which is built upon the keynote as its bass. (See TONALITY.)

TONIC SOL-FA is the name of a method of teaching sight singing from a special form of notation which has had the most far-reaching effect in promoting popular choral singing throughout the British Isles. (See CURWEN, John; COMPETITION FESTIVALS; TONIC SOL-FA COLLEGE.)

Its leading principle is that of 'key relationship' (expressed in the word 'Tonic'), and it enforces this by the use of the ancient sound-names *do, re, mi*, etc., as visible, as well as oral, symbols. These names are first put before a class of beginners in the form of a printed picture of the scale, called a 'Modulator.' For simplicity's sake they are spelt English-wise, and *si* is called *te* to avoid having two names with the same initial letter. In the first lessons the teacher practises the class in the singing of the sounds as he points to the name of each, first taking the *do, me, soh*, of the common chord, making his pupils feel the special character of each sound, its distinguishing melodic effect, and afterwards training them to recognise the intermediate sounds in the same way. It is on this 'feeling' of the different character of each sound, the difference due to its place in

the scale, that the greatest stress is laid. When the pupil has caught the perception of these differences, and has learnt to associate the difference of the feeling with the difference of the name, he has grasped, in its essential principle, the secret of singing at sight.—The central column only of the modulator is used at first. The lateral columns are for teaching and explaining change of key. The *fe, se*, etc., represent the occasionally used 'chromatic' sounds, i.e. 'flats' and 'sharps' not involving modulation into a new key. The names of the sounds are so placed on the modulator as to show, accurately, the true positions of the sounds in the natural (untempered) scale. When the class can, with some readiness, sing the sounds as the teacher points to them on the modulator, they are introduced to exercises printed in a notation formed out of the initials of the scale-names; *d* standing for *doh*, *r* for *ray*, etc. The duration of each sound is indicated by the linear space it occupies, each line of print being

d'	f'
t	— m' — l
l	= r' — s
s	— DOH' — f
f	ta TE — m
m	la LAH = r
r	— SOH — d
d	ba fa to t,
t	— FAH — l,
l	ma ME — l,
l	de RAY — s,
s'	— DOH — f,
f'	t, — m,
m	— l, = r,
r	— s, — d,
d	— f,
ta	m — l,

spaced out into divisions by bars and dots. A 'rest' is shown by a blank space, the prolongation of a sound by a line (—) occupying the space. Sounds in upper and lower octaves are distinguished by small figures; thus, *d'*, *r'*, etc. signify an upper octave; *d*, *r*, etc., a lower. An example of a vocal score is given on the following page.

The method is, it will be seen, identical in principle with the old system known by the name of the 'Movable Do,' and the notation is only so far new in that symbols are written down which have been used, orally, for some eight centuries. The syllables attributed to Guido (see HEXACHORD; SOLMISATION), were a notation, not of absolute pitch, but of tonic relation; his *ut, re, mi*, etc., meaning sometimes

and so on, according as the tonic changed its pitch; and this ancient use of the syllables to represent, not fixed sounds, but the sounds of the scale, has been always of the greatest service in helping the singer, by association of name with melodic effect, to imagine the sound. The modern innovation of a 'fixed Do' is one of the many symptoms (and effects) of the domination of instruments over voices in the world of modern music.¹

The Tonic Sol-fa method is really a reversion to a principle many centuries old. Its novelty of aspect, when Curwen² first promulgated it, resulted from its making this principle more prominent, by giving it visual, as well as oral, expression; that is, by using the old sound-names as written symbols. Those who follow the old Italian and old English practice of the 'Movable Do' are, in effect, Tonic Sol-fa-ists. The question of notation is a distinct one, and turns on considerations of practical convenience. The argument for adhering to the old tonic use of the syllables rests broadly on the ground that the same thing should be called by the same name; that, for example, if

is to be called *do, do, re* | *si, do, re*, it is not reasonable that

the essential effect of which on the ear is the

¹ Sir John Herschel said in 1868 (*Quarterly Journal of Science*, art. 'Musical Scales'): 'I adhere throughout to the good old system of representing by Do, Re, Mi, Fa, etc., the scale of natural notes in any key whatever, taking Do for the keynote, whatever that may be, in opposition to the practice lately introduced (and soon, I hope, to be exploded), of taking Do to represent one fixed tone C,—the greatest retrograde step, in my opinion, ever taken in teaching music, or any other branch of knowledge.' The 'fixed Do' is the system preferred in France and Belgium, but has been definitely rejected in England.

² Curwen's system grew out of his adoption of a plan of Sol-fa-ing from a modulator with a letter notation, which was being used with success for teaching children some years before by a benevolent lady living at Norwich. He always spoke of this lady, Miss Elizabeth Glover (d. 1867), as the originator of the method.

same—for the tune is the same, and the tune is all that the ear feels and remembers—should be called by another set of names, *si, si, do* | *la, si, do*. And, conversely, it is not reasonable that if, for example, in the passage

the last two sounds are called *do, la*,—the same sounds should be also called *do, la*, in the passage

where they sound wholly different; the identity of pitch being as nothing compared with the change of melodic effect—a change, in this case, from the plaintive to the joyous. It is on this perception of the 'mental effect' of the sounds of the scale that the Tonic Sol-fa teacher relies as the means of making the learner remember and reproduce the sounds. And it is this that constituted the novelty of the system as an instrument of teaching. To make the beginner feel these effects for himself is the teacher's

first object. As a help to such perception a set of descriptive names is used in the earliest lessons. The pupil is told he may think of the *do* as the 'strong' tone, of the *me* as the 'steady' or 'calm' tone, of the *lah* as the 'sad' tone, and so on; these epithets giving, in a rough way of course, some indication of the 'mental effect.' When in this way the pupil has learnt to associate the names with the several sounds, he refers the letters on the printed page to a mental picture of the modulator, and though the music does not 'move up and down,' as in the Staff notation, the syllable-initials suggest to him the names; he sees these names, mentally, in their places on the scale, and with the remembrance of the name comes the remembrance of the sound.

This constant insistence on the scale and nothing but the scale carries the singer with ease over the critical difficulties of modulation. He has been taught to follow with his voice the teacher's pointer as it moves up and down the modulator. When it touches *soh* he sings *soh*. It moves to the *doh* on the same level to the right, and he sings the same sound to this new

name. As he follows the pointer up and down the new scale he is soon taught to understand that a new sound is wanted to be the *te* of the new *doh*, and thus learns, by the 'feeling' of the sounds, not by any mere machinery of symbols, what modulation is. When he has been made familiar with the change from scale to scale on the modulator, he finds in the printed music a sign to indicate every change of key. Thus the changes between tonic and dominant in the following chant are shown as follows (taking the soprano part only):

ROBINSON

principle out of view: that the notes of the staff give only a fictitious view of interval. To the eye, for instance, a major third (a) looks the same as a minor third (b); which of the two is

meant can only be determined by a process of reasoning on the 'signature.' A like process is needed before the reader can settle which sound of the scale any note represents. In the above

the 'm' meaning that the singer is to sing the sound which is the *me* of the scale in which he began, but to call it *lah* while singing it, and sing onwards accordingly. When the key changes again to the original tonic he is informed of it by the 's', which means that he is to sing again the sound he has just sung as *doh*, but to think of it and sing it as *soh*. These indications of change of key give the singer direct notice of what, in the Staff notation, he is left to find out inferentially from the occurrence of a sharp or flat in one of the parts, or by comparing his own part with the others. To make these inferences with any certainty requires a considerable knowledge of music, and if they are not made with certainty the 'reading' must be mere guess-work. Remembering that in music of ordinary difficulty—say in Handel's choruses—the key changes on an average every eight or ten bars, one can easily see what an advantage the Tonic Sol-fa-ist has in thus being at every moment sure of the key he is singing in. The method thus sweeps out of the beginner's way various complications which puzzle him in the Staff notation—'signatures,' 'sharps and flats,' varieties of clef. To transpose, for instance, the above chant into the key of F, all that is needed is to write 'Key F' in place of 'Key Eb.' Thus the singer finds all keys equally easy. 'Accidentals' are wholly unknown to him, except in the comparatively rare case of the accidental properly so called, that is a 'chromatic' sound, one not signifying change of key.¹

These advantages can, it is true, be in part secured by a discreet use of the 'tonic' principle—a 'movable *doh*'—with the Staff notation. But the advocates of the letter notation urge that the old notation hampers both teacher and learner with difficulties which keep the

chant, for example, before the singer can sing the opening phrase he must know that the first sound is the *soh* of the key. The staff notation shows him a mark on a particular line, but it is only after he has made certain inferences from the three 'flats' on the left that he can tell where the sound is in the scale. How much better, the Sol-fa-ists say, to let him know this at once, by simply printing the sound as *soh*. Why impede the singer by troubling him with a set of signs which add nothing to his knowledge of the facts of music, and which are only wanted when it is desired to indicate absolute pitch, a thing which the sight-reader is not directly concerned with?

An exposition of the details of the method would be here out of place, but one or two points of special interest may be noticed.² One is the treatment of the minor scale—a crux of all Sol-fa systems, if not of musical theory generally. Tonic Sol-fa-ists are taught to regard a minor scale as a variant of the *relative* major, not of the tonic major, and to sol-fa the sounds accordingly. The learner is made to feel that the special 'minor' character results from the dominance of the *lah*, which he already knows as the plaintive sound of the scale. The 'sharpened sixth' (reckoning from the *lah*), when it occurs is called *ba* (the only wholly new sound-name used (see the modulator, above), and the 'leading' tone is called *se* by analogy with *te* (Italian *si*) of the major mode. Thus the air is written and sung as shown on the opposite page.

Experience appears to show that, for sight-reading purposes, this is the simplest way of treating the minor mode. Some musicians object to it on the ground that, as in a minor scale the lowest (and highest) sound is essentially a tonic, in the sense that it plays a part analogous to that of the *doh* in a major scale,

¹ In the soprano part, for instance, of the 'Meeslah' choruses there are but three real 'accidentals.' Nevertheless, a great quantity of modern and highly chromatic music has now (1927) been published in Tonic Sol-fa Notation and is read with extraordinary assurance by its singers.

² The best summary account of this system for the musician is given in 'Tonic Sol Fa,' one of the *Music Primers* edited by Sir John Stainer (Novello).

If God be for us, who can be a -
- - gainst us? who can be a -
- - gainst us? who can be a - gainst us?

calling it *la* seems an inconsistency. But this seems a shadowy objection. The only important question is, what sign, for oral and ocular use, will best help the singer to recognise, by association with mental effect, one sound as distinguished from another? Experience shows that the Tonic Sol-fa plan does this effectually. The method is also theoretically sound. It proceeds on the principle that similarity of name should accord with similarity of musical effect. Now as a fact the scale of A minor is far more closely allied to the scale of C major than it is to the scale of A major. The identity of 'signature' itself shows that the substantial identity of the two first-named scales has always been recognised. But a proof more effective than any inference from signs and names is that given by the practice of composers in the matter of modulation. The scales most nearly related must evidently be those between which modulation is most frequent; and changes between tonic major and *relative* minor (type, C major to and from A minor) are many times more frequent than the changes between tonic major and *tonic* minor (type, C major to and from C minor). If therefore the Tonic Sol-fa-ist, in passing from C major to A minor, changed his *doh*, he would be adopting a new set of names for what is, as near as may be, the same set of sounds.

The examples above given show the notation as applied to simple passages; the following will show how peculiar or difficult modulations may be rendered in it:

They stand be - fore God's throne, and serve him day and
night. And the Lamb shall lead them to fountains of living waters.
Af - fright - ed fled hell's spi - rits black in throngs.
Down they sink in the deep a - byss to end - less night.

In the teaching of harmony the Tonic Sol-fa method puts forward no new theory, but it uses a chord-nomenclature which makes the expres-

the various positions of the same chord being distinguished by small letters appended to the capital, thus—

Da or D Db Dc S 7S 7Sb 7Sc

Harmony being wholly a matter of relative, not absolute pitch, a notation based on key-relationship has obvious advantages as a means of indicating chord-movements. The learner has from the first been used to think and speak of every sound by its place in a scale, and the familiar symbols *m*, *f*, etc., convey to him at once all that is expressed by the generalising terms 'mediant,' 'subdominant,' etc. Another point in the method, as applied to harmony teaching, is the prominence given to training the ear, as well as the eye, to recognise chords. Pupils are taught, in class, to observe for themselves how the various consonances and dis-

sonances sound; and they are practised at naming chords when sung to them.

Writing down a tune sung by a teacher has

now become a familiar school exercise for English children, a thing once thought only possible to, advanced musicians; and it has become common to see a choir two or three thousand strong singing in public, at first sight, an anthem or part-song fresh from the printer's hands. In the great spread of musical knowledge among the people this method has played a foremost part, and the teaching of the elements is far from being all that is done. Some of the best choral singing now to be heard in England is that of Tonic Sol-fa choirs. The music so printed amounts to a vast library of choral masterpieces.

Of the 'Galin-Chévé' method of teaching sight-reading, which is based, broadly speaking, on the same principle as the Tonic Sol-fa method, a notice is given under CHEVÉ.

B. B. L.

TONIC SOL-FA COLLEGE, THE, was founded by John CURWEN (*q.v.*), in 1863, in order to give stability and permanence to the Tonic Sol-fa system of teaching, and was definitely established in its present form in 1875 by incorporation. The College is chiefly an examining body, but it also carries on the teaching of music (mainly directed to the training of teachers) by means of lectures and correspondence classes. The buildings, lecture-rooms, etc., are at Forest Gate, E.

The examinations are based on a system of graded certificates and diplomas, arranged so as to test the progress of pupils from the earliest stage. From the elementary certificate upwards, the power to sing at sight and to name or write down notes by ear is demanded. The diplomas of associateship, licentiateship and fellowship are granted upon a paper examination combined with vocal and ear tests, on the rendering of which the local examiners have to report to the College. On the occasion of the Jubilee of incorporation (1925) it was announced that the total number of certificates issued was 1,051,625, of which number 979,694 were for Tonic Sol-fa, 45,058 for staff notation and 26,873 for both notations. Correspondence classes are also held in the following subjects: harmony, counterpoint, musical composition, orchestration, musical form, musical and verbal expression, acoustics, theory of teaching, staff notation, and also in English grammar and composition. The College further organises a summer term of study, lasting for four weeks in vacation time, which is attended by teachers and students from Great Britain, the Colonies, etc. The tuition fees and travelling expenses of the majority of these are defrayed by means of scholarships, some of which are endowed. A great point is made of the art of presenting facts to the learner, and of cultivating the intelligence as well as the ear and voice. The students give model lessons, which their teachers criticise. Since 1876 the College has held annually a summer holiday course. The presidents of the

College have been John CURWEN (1863-80), his son John Spencer CURWEN (1880-1911), Sir Walter PARRATT (1911-24), Sir Henry HADGW (1924-) (*q.v.*). The Jubilee celebration held in the hall of the R.C.M. on June 27, 1925, included, with practical demonstrations, evidence from leaders in musical education of all grades of the value of the work achieved (see *The School Music Review*, July 15, 1925).

B. B. L.; addns. from the Secretary.

TONOMETER, see SCHEIBLER; TUNING FORK.

TONSOR, MICHAEL (*b.* Dünkelsbühl, near Jugolstadt, cantor at the church of Our Lady, at Dünkelsbühl, in 1566, and from c. 1570-90 organist at St. George's, Öttingen. Duke William V. of Bavaria supported him in the publication of his works, consisting of a large number of motets, a Missa Solennis and other church compositions. Some have appeared in modern editions (*Q.-L.*; *Riemann*).

TORELLI, GIUSEPPE (*b.* Verona, c. mid-17th cent.; *d.* Anspach; c. 1708), violinist and composer, lived in Bologna from 1686 as leader of a church orchestra, but in 1701 accepted the post of leader of the band of the Markgraf of Brandenburg-Anspach at Anspach in Germany, where he died.

To him has been ascribed the invention of the 'concerto' but that is not tenable. His most important work, however, the *Concerti Grossi*, op. 8, was published at Bologna, 1709, three years earlier than Corelli's *Concerti Grossi*. They are written for two obbligato violins and stringed orchestra, and clearly present the main features of the concerto-form, as used by Corelli, Handel and others. According to Eitner, eight works of his were published—all in concerted style, for 2, 3, or 4 stringed instruments, and *Q.-L.* refers to many in MS.

TORNADA, see SONG, subsection SPAIN (2).

TORQUATO TASSO, lyric drama in 4 acts; libretto by Ferretti; music by Donizetti. Produced Teatro Valle, Rome, autumn of 1833; at Her Majesty's Theatre, Mar. 3, 1840.

G.

TORRANCE, REV. GEORGE WILLIAM, M.A., Mus.D. Dublin (*b.* Rathmines, Dublin, 1835; *d.* Aug. 20, 1907). Educated as a chorister in Christ Church Cathedral, he afterwards became successively organist of Blackrock, Dublin, and of the city churches of St. Andrew and St. Anne. Among his earlier compositions was a *Te Deum* and *Jubilate*, sung in Christ Church Cathedral. At 19 he composed his first oratorio, 'Abraham,' which was performed in 1855 at the Ancient Concert Rooms, Dublin, by all the leading musicians of the city, Sir Robert Stewart presiding at the organ and the composer conducting. 'Abraham' was performed four times in two years. It was rightly deemed a wonderful work for a mere lad to produce; the airs were written after the manner of Beethoven, the choruses followed that of

Handel: of plagiarism there was none, and if the work was lacking in experience, it was yet a bold and successful effort for a boy in his teens. In 1856 Torrance visited Leipzig, and during his studies in that city became acquainted with Moscheles and other eminent musicians. Upon his return he produced an opera, 'William of Normandy,' and several minor works, some of which have since been published. In 1859 Torrance entered the University of Dublin, with a view to studying for the ministry of the Church of Ireland; here he graduated in Arts in 1864, and produced the same year a second oratorio, 'The Captivity,' to Goldsmith's words. He took the degree of M.A. at the University in 1867, was ordained deacon in 1865, and priest in 1866. In 1867 he returned to Dublin, being appointed curate of St. Bride's.

In 1869 he emigrated to Melbourne, Victoria, where he held the curacy of Christ Church, S. Yarra, Melbourne. Subsequently he held the incumbencies of All Saints, Geelong; Holy Trinity, Balaclava; and St. John's, Melbourne. In 1879 he obtained the degrees of Mus.B. and Mus.D. from Dublin University, on the recommendation of Sir Robert Stewart, professor of music in the University, the 'Acts' publicly performed for the degree being, for Mus.B. a *Te Deum* and *Jubilate* (composed 1878), for Mus.D. a selection from his oratorio 'The Captivity.' He received an honorary degree of Mus.D. *ad eundem* from the Melbourne University, the first degree conferred in Music by that University.

In 1882 Dr. Torrance produced a third oratorio, 'The Revelation'; this was performed with great success in Melbourne, the composer conducting. It was published by Novello. He was elected president of the Fine Arts section of the 'Social Science Congress' held in Melbourne in 1880, when he delivered the opening address on Music, since published. In 1883 he was appointed by the Governor of Victoria to be one of the Examiners for the 'Clarke Scholarship' in the Royal College of Music.

He returned to Ireland in 1897, and after being appointed Chaplain to the Bishop of Ossory, he was raised to the dignity of Prebendary of Killamery, and Canon of St. Canice's Cathedral, Kilkenny, in 1900—being also made Registrar of the united dioceses of Ossory, Ferns and Leighlin, and Librarian of St. Canice's Library. In his last years Canon Torrance composed much sacred and secular music, and his madrigal 'Dry be that tear' obtained the Molyneux Prize and the Society's medal, offered by the Madrigal Society of London in 1903. Many of his hymn tunes obtained wide popularity; and a Chant Book for the Church of Ireland was completed before his death, which took place two days after that of his wife.

R. P. S.; addns. W. H. G. F.

TORRI, PIETRO (b. Peschiera, Lago d' Iseo, c. 1655; d. Munich, July 6, 1737), a pupil of Ag. Steffani, was chamber-organist at Munich, 1689; Kapellmeister at Hanover, Carneval, 1696; director of chamber music at Munich, 1703; Kapellmeister or Hof-Kapell-director, 1715. With Abaco he followed the elector Max Emanuel, exiled to Brussels, and was appointed first Kapellmeister in 1732. He wrote a number of operas, in which he made characteristic use of obbligato solo instruments. His chamber duets are greatly praised. He also wrote an oratorio and a concerto per camera (*Q.-L.*; *Riemann*). E. v. d. s.

TORRIAN, JEHAN, of Venice, lived at the end of the 15th century, and built in 1504 the organ of Notre Dame des Tables, Montpellier. A copy of the curious contract may be seen in Roret's *Manuel des facteurs d'orgues* (Paris, 1849).

v. de P.

TOSCA, 'Melodramma' in 3 acts, text by L. Illica and G. Giacosa (founded on Sardou's play); music by G. Puccini. Produced Costanzi Theatre, Rome, Jan. 14, 1900; Covent Garden, July 12, 1900; Buenos Aires, June 16, 1900; New York, Metropolitan Opera House, Feb. 4, 1901; in English, Moody-Manners Co., Court Theatre, Liverpool, Oct. 29, 1909.

TOSCANINI, ARTURO (b. Parma, Mar. 25, 1867), the most celebrated Italian conductor of his time. Toscanini began his musical studies at the Conservatoire of his native city, with the violoncello as his principal subject. Apparently his extraordinary gifts were not noted by his instructors. But no sooner had he begun his career as an orchestral player than his exceptional memory marked him out as a musician of unusual calibre, for he could play his part by heart after a few rehearsals, and he often did it. A conductor once noticing the closed copy on his desk challenged him to play without music. Toscanini accepted the challenge and soon convinced the conductor that a single reading was all he needed to know the score by heart. This great gift stood him in good stead when he was suddenly called upon to conduct the orchestra for the first time in very odd circumstances. South America is one of the countries where theatres often rely on Italians for their orchestras, and Toscanini was playing as a violoncellist in the spring season of 1886 at Rio Janeiro when the audience, owing to a series of incidents and misunderstandings, rose *en masse* against the conductor, and a noisy demonstration made it impossible for the performance to begin. The impresario, who happened to be also a keen musician, attempted to take his place, but again a storm of hisses broke out and it looked as if the performance would have to be suspended when Toscanini's colleagues, knowing his qualities, forced the shy, youthful violoncellist on to the conductor's desk. The appearance of

so young a man in so responsible a position quieted the demonstration. The performance was allowed to proceed and ended in unbounded enthusiasm. The inexperienced conductor knew the score of the opera ('Aida') by heart; he carried in his mind a clear conception of what the rendering should be; he possessed, moreover, the personal magnetism which bound to his will at once players and singers. The verdict of that first audience has since been confirmed by the public wherever Toscanini has appeared. In 1898 as chief conductor of the Metropolitan Opera House in New York he began a series of conspicuously fine performances there which lasted till his resignation of the post in 1915.

In the long and successful career which thus opened for him he has performed many remarkable feats, and his influence has been of great benefit also to Italian theatres and music. When Franchetti's 'Cristoforo Colombo' was being rehearsed for the first production at Genoa, the conductor, Mancinelli, fell ill at the last moment. Toscanini was sent for and conducted with great success after studying the new score for only twenty-four hours. He was the first to make known to his countrymen Wagner's 'Götterdämmerung,' Verdi's *Te Deum* and *Stabat Mater*, and numberless Italian operas including Puccini's 'Bohème' and 'Turandot' and Boito's 'Nerone,' the score of which, left unfinished at the composer's death, was revised by Toscanini. His advice was followed in the radical alterations made at La Scala, and when the famous Milanese theatre was reopened in 1922 he was appointed its director.

It may be said of Toscanini that his tastes know no limitations. His interpretations of German music are as finished and distinguished as his readings of Verdi or Debussy. He is said to be something of a martinet, and he certainly does not suffer compromise in anything connected with artistic matters or even in minor questions of details. Having made up his mind that encores were an intolerable nuisance he never again gave way, in spite of the hostility his refusal evoked from the public that had been taught by long tradition to expect them as a matter of course. He demands implicit obedience from singers and players, and thus, quite apart from extraordinary beauty and mastery of the orchestral playing, performances under his direction possess an authority and character impossible where unity of control is lacking. F. B.

TOSI, GIUSEPPE FELICE (b. Bologna, c. 1630), organist of S. Petronio, Bologna, 1683; afterwards maestro di cappella at S. Giovanni, Monte, and member of the Accademia dei Filarmonici, of which he was president in 1679. He was maestro di cappella at the cathedral in Morte di Ferrara. He composed a number of

operas, salmi concertati and cantate da camera (Q.-L.).

TOSI, PIER FRANCESCO (b. circa 1650; d. after 1730), the son of a musician of Bologna, must have been born about 1650, since we learn from the translator of his book that he died soon after the beginning of George II.'s reign above 80 years old.¹ In the early part of his life he travelled a great deal, but in 1693 we find him in London, giving regular concerts,² and from that time forward he resided there almost entirely till his death, in great consideration as a singing-master and a composer. A volume in the Harleian Collection of the British Museum (No. 1272) contains seven songs or cantatas for voice and harpsichord, with his name to them. Galliard praises his music for its exquisite taste, and especially mentions the pathos and expression of the recitatives. When more than 70 Tosi published the work by which his name is still known, under the modest title of *Opinioni de' cantori antichi e moderni, o sieno osservazioni sopra il canto figurato . . .* (Bologna, 1723), which was translated after his death into English by GALLIARD—*Observations on the Florid Song, or Sentiments of the Ancient and Modern Singers*, London, 1742—second edition, 1743; and into German by AGRICOLA—*Anleitung zur Singkunst*, Berlin, 1747. It is a practical treatise on singing, in which the aged teacher embodies his own experience and that of his contemporaries, at a time when the art was probably more thoroughly taught than it has ever been since. G. M.

TOSTI, FRANCESCO PAOLO (b. Ortona sul mare, Abruzzi, Ap. 9, 1846; d. Rome, Dec. 2, 1916), an Italian composer.

In 1858 his parents sent him to the Royal College of St. Pietro a Majella at Naples, where he studied the violin under Pinto, and composition under Conti and the venerable Mercadante. The young pupil made wonderful progress, and was by Mercadante appointed *maestrino* or pupil teacher, with the not too liberal salary of 60 francs a month. He remained in Naples until the end of 1869, when, feeling that his health had been much impaired by overwork, he went back to Ortona with the hope of regaining strength. However, as soon as he got home he was taken seriously ill with bronchitis, and only after seven months recovered sufficiently to go to Rome and resume work. During his illness he wrote 'Non m'ama più' and 'Lamento d'amore'; but it was with difficulty that the young composer could induce a publisher to print these songs, which subsequently became popular, and it was not till a considerable time after they sold well that he disposed of the copyright for the insignificant sum of £20 each. Sgambati, the leader of the new musical school in Rome,

¹ Galliard's Prefatory Discourse, p. viii.

² Hawkins, *History*, v. 5.

was among the first to recognise Tosti's talent, and in order to give his friend a fair start in the fashionable and artistic world, he assisted him to give a concert at the Sala Dante, where he achieved a great success, singing several of his own compositions, and a ballad purposely written for him by Sgambati, 'Eravi un vecchio.' The Queen of Italy, then Princess Margherita of Savoy, was present and showed her appreciation by immediately appointing him as her teacher of singing. Shortly afterwards he was entrusted with the care of the Musical Archives of the Italian court.

It was in 1875 that Tosti first visited London, where he was well received in the best circles, both as an artist and as a man. He paid yearly visits to the English capital, and in 1880 was called in as teacher of singing to the Royal Family of England. About that time he settled in London; he received the honour of knighthood in 1908.

He wrote Italian, French and English songs. He had an elegant, simple and facile inspiration, a style of his own, a genuine Italian flow of melody, and great skill in finding the most appropriate and never-failing effects for drawing-room songs.

His songs reflect the advance in public taste as well as the progress of his own artistic development. They are very numerous, and his Vocal Albums, and fifteen duets, 'Canti popolari abruzzesi,' enjoyed a great success for many years. Among his early favourites in London were 'Forever,' 'Good-bye,' 'Mother,' 'At Vespers,' 'Amore,' 'Aprile,' 'Vorrei morire,' and 'That Day'; but none are up to the artistic level of his later lyrics, such as 'Mattinata,' 'Serenata' and many others.

G. M.

TOUCH (Ger. *Anschlag*), term used of keyboard instruments and also of their performers.

(1) Of the instruments it denotes the weight required to bring the key into effective action, and also the distance traversed by the key in depression. This applies equally to the pianoforte and the organ. An instrument is spoken of as possessing a light or a heavy, a deep or shallow touch. Neither weight nor measurement has been precisely standardised. (See the description of actions under **PIANOFORTE**; and **ORGAN-PLAYING**, subsection **TECHNIQUE**.)

(2) As regards performers it is applicable primarily to pianists, since the manner of pressing or striking the keys of their instrument directly affects the tone, which is not the case with organists. The production of pianoforte tone by means of touch is one of the most subtle problems of the pianist and the teacher (see **PIANOFORTE-PLAYING**). The control of duration (the holding or releasing of a note) gives a secondary meaning to the term applicable alike to both pianists and organists. (See **LEGATO**, **STACCATO** and **PHRASING**.)

TOUCH. By old writers the word is used as equivalent to sound, in which sense it occurs in Massinger's 'Guardian' (Act ii. Sc. 4), where Severino says 'I'll touch my horn'—(blows his horn). An earlier example will be found in the Romance of Sir Gawayne and the Green Knight (c. 1320), line 120, p. 4 of the edition of 1864. The word appears also to have been used in English music during two centuries for a toccata. 'A touche by Mr. Byrd' is found in the MS. of a virginal piece in the British Museum; and 'Mr. Kelway's touches,' as a heading to several passages of a florid character, appears in a MS., probably in the handwriting of Dr. B. Cooke, in the R.C.M. W. B. S.

TOUCH, see **CHANGE-RINGING**.

TOUCHEMOULIN (**TOUCHMOLIN**), JOSEPH (b. Châlons, c. 1727; d. Ratisbon, Oct. 25, 1801), an excellent violinist at the courts of Bonn and Cologne, played with success at the Concert Spirituel, Paris, in 1754. He made further studies under Tartini, and was appointed at the court of Ratisbon after 1761. He composed church music as well as operas, symphonies and sonatas (Q.-L.).

TOUR DE GOSIER, an *agrément* of the French school which resembles a very rapid *gruppetto*. (See **ORNAMENTS**, **VOCAL**.) E. B.⁴

TOURDION (**TORDION**), 'a turning or winding about; also a trick or prank; also, the dance termed a Round.' (Cotgrave.) The early French dances were divided into two classes, 'Danses basses' or 'Danses nobles,' and 'Danses par haut.' The former of these included all regular dances, the latter were mere improvised romps or 'baladinages.' The regular Basse Dance consisted of two parts, the first was twice repeated, and the last, or 'Tour-dion,' was probably something like our modern round dances. The Tourdion was therefore the French equivalent for the German *Nach-tanz*, *Proportio* or *Hoppeltanz*, and the Italian *SALTARELLO* (q.v.). Tabourot says that the Tourdion was nearly the same as the **GALLIARD** (q.v.), but the former was more rapid and smooth than the latter. Hence he defines it as a 'Gaillarde par terre,' i.e. a galliard deprived of its characteristic jumps and springs. Both dances were in 3-time. The following is the tune of the Tourdion given in the *Orchésographie*:

Further particulars as to these dances may be found in the *Provinciales* of Antonio de Arena (1537). (See **TRIHORIS**.) W. B. S.

TOURJEE, EBEN, Mus.D. (b. Warwick, Rhode Island, June 1, 1834; d. Boston, Apr. 12,

1891), father of the Conservatory or class system of musical instruction in America. His family being in humble circumstances it became necessary to put him to work at the early age of 8; but his thirst for knowledge was so great, that he soon became a laborious student at the East Greenwich seminary. At the age of 15 he became clerk in a music store in Providence, and thus had opportunities for study which he did not fail to improve. At the age of 17 he opened a music store in Fall River, where he also taught music in the public schools and formed classes in piano, voice and organ. This was in 1851, and was really the beginning of the class system, which has since been so largely developed. He afterwards removed to Newport, and continued his work as organist and choirmaster of Old Trinity Church there, and as director of the local choral society. In 1859 he founded a Musical Institute at East Greenwich, where he had an opportunity of carrying out his ideas regarding class-teaching under more favourable auspices than before.

In 1863 he visited Europe, in order to gain information regarding the methods employed in France, Germany and Italy in conservatory teaching. He took this opportunity of studying with many eminent masters, amongst others August Haupt, of Berlin. On his return to America he removed to Providence, and established the 'Providence Conservatory of Music,' which had great success. In 1867 he extended his work by founding 'The New England Conservatory of Music,' in Boston (*q.v.*) and continued for a time to keep both schools in operation. He drew round him the most eminent teachers in Boston, and placed a good musical education within the reach of the poorest students. In 1869 his executive and organising abilities were made use of by the projectors of the great 'Peace Jubilee,' and there is no doubt that the success of that enterprise was largely due to his efforts. During the same year the degree of Doctor of Music was conferred upon him by Wesleyan University. From the foundation of Boston University he was Dean of the College of Music attached thereto. But his greatest work was the establishment of the great Conservatory just mentioned, from which have graduated thousands of pupils, filling honourable positions as teachers, pianists, organists and vocalists, and proving themselves able musicians.

G.

TOURNEMIRE, CHARLES ARNOULD (*b.* Bordeaux, Jan. 22, 1870), studied at the Paris Conservatoire, where he gained first organ prize in 1891; he afterwards studied with Vincent d'Indy. He succeeded César Franck as organist of Sainte-Clotilde (1898) soon after completing his education. He is professor of a chamber-music class at the Conservatoire. He has written chamber music, a symphony, songs and pieces for piano and organ. 'Le Sang de

la Sirène,' for chorus, soli and orchestra, gained the Prix de la Ville de Paris, and was performed at the Théâtre Municipal de la Gaîté on Nov. 17, 1904. The work was also given at Toulouse, Leyden and The Hague. A lyric tragedy in seven scenes, 'Nittetia,' has not yet been performed. Tournemire has given many organ recitals—in Berlin, Amsterdam, The Hague, Marseilles, Turin, Liège, etc.

His principal works are:

Organ.—Opp. 2, 3, 10, 16, 19, interlude, scherzetto, adagio, toccata; op. 24, 'Ite Missa est'; 'Pièces symphoniques,' various pieces, versets, Noëls, entrées, offertoires, etc.; triple Choral (op. 41).

Songs.—A collection containing 'Sept Mélodies,' 'Solitude' (1923).

Chamber Music.—FF. quartet, FF. trio, etc.; 'Sagesse,' violin and FF., etc.

Dramatic Works.—'Les Dieux sont morts' (Paris, 1923), lyric drama in 2 acts; words by E. Berteaux; first performed, Opéra, Mar. 19, 1924.

G. F.; addms. M. L. P.

TOURS, BERTHOLD (*b.* Rotterdam, Dec. 17, 1838; *d.* London, Mar. 11, 1897). His early instruction was derived from his father, Barthélemy Tours (1797–1864), who was organist of the St. Laurence church, and from Verhulst. He afterwards studied at the Conservatoires of Brussels and Leipzig and then accompanied Prince George Galitzin to Russia, and remained there for two years. From 1861 he resided in London, writing, teaching and playing the violin in the band of the Royal Italian Opera, and other good orchestras. He was appointed organist of the Swiss Church, Holborn, 1862, and in 1878 he became musical adviser and editor to Novello, and in that capacity arranged several important works from the orchestral scores, such as Beethoven's Mass in C, four of Schubert's Masses, 'Elijah,' Gounod's 'Redemption,' etc. etc., besides writing the 'Primer of the Violin' in the series of that firm. His compositions are numerous. He wrote for the piano and other instruments, and a large number of songs, some of which were very popular. But his best work is to be found in his hymn tunes, anthems and services for the Anglican Church.

G.

TOURTE, FRANÇOIS (*b.* Paris, 1747; *d.* there, Apr. 1835), the most famous of violin bow-makers. His father and elder brother were bow-makers also; and the reputation which attaches to the family name is not due to François alone. To François Tourte's father is generally attributed the substitution of the screw for the crémaillère. Xavier Tourte, the elder brother, known in France as 'Tourte l'aîné,' was also an excellent workman: tradition says that the brothers started business in partnership, François making the sticks, and Xavier the nuts and fittings. They quarrelled and dissolved partnership, and each then set up for himself, Xavier reproducing as well as he could the improvements in the stick which had been introduced by François. The latter has been called the Stradivari of the bow: and there is some truth in this; for as Stradivari finally settled the model and fittings of the

violin, so Tourte finally settled the model and fittings of the bow. But he had more to do for the bow than Stradivari for the fiddle. The Cremona makers before Stradivari had nearly perfected the model of the violin: it only remained for him to give it certain finishing touches. But Tourte, properly speaking, had no predecessors. He found bow-making in a state of chaos, and he reduced it to a science; and he may be said to have invented the modern bow. Perhaps the best idea of the bows which were in use in Tourte's youth may be gained from the illustrations given under Bow. Before his time all the modern forms of staccato must have been impossible, and the nuances of piano and forte extremely limited; a rawness, especially on the treble strings, and a monotony which to our ears would be intolerable, must have deformed the performances of the best of violinists. The violin, under Tourte's bow, became a different instrument: and subsequent bow-makers have exclusively copied him, the value of their productions depending on the success with which they have applied his principles.

An examination of Tourte's bows proves that his first care was to select wood of fine but strong texture, and perfectly straight grain, and his second to give it a permanent and regular bend. This was effected by subjecting it in a state of flexion to a moderate heat for a considerable time. Tourte's first experiments are said to have been made on the staves of old sugar hogsheads from Brazil: probably the bent slabs of Brazil wood employed for this purpose had acquired a certain additional elasticity from the combined effect of exposure to tropical heat and the absorption of the saccharine juices: and in connexion with the latter it has been suggested that the dark colour of the Tourte sticks is not wholly attributable to age, but partly to some preparation applied to them in the process of heating. The writer cannot agree with this suggestion, especially as some of Tourte's finest bows are extremely pale in colour. Be this as it may, it is certain that the greater elasticity which he secured in the stick by the choice and preparation of the wood enabled him to carry out to the fullest extent the method of bending the stick of the bow the reverse way, that is, inwards, and thus to realise what had long been the desideratum of violinists, a bow which should be strong and elastic without being heavy. By thus increasing and economising the resistance of the stick he liberated the player's thumb and fingers from much useless weight. On the subject of the wood employed by Tourte, Fétis in his chapter on bows at the end of his *Antonio Stradivari* (English translation by John Bishop, 1864) says that Tourte's indefatigable investigations led him to experiment in all kinds of wood which seemed likely to bring about the realisa-

tion of his ideal. He soon discovered that Pernambuco wood alone combined the requisite lightness and stiffness. Unfortunately the maritime wars between France and England were a serious obstacle to the importation of Pernambuco wood during the period—from 1775–80—during which Tourte's most important discoveries were made. The price of this wood, used mostly for dyeing purposes, rose to nearly five shillings a pound, and in addition to this pecuniary consideration, there was great difficulty in finding a straight billet, for the wood is of a knotty and crooked growth. Sometimes in eight or ten tons of Pernambuco wood scarcely one piece of wood suitable for making bow-sticks can be found. By a series, no doubt, of patient experiments, he determined the right curvature for the stick, and the rule for tapering it gradually towards the point¹ so as to have the centre of gravity in the right place, or in other words to 'balance' properly over the string in the hand of the player. He determined the true length of the stick, and the height of the point and the nut, in all which particulars the bow-makers of his time seem to have erred on the side of excess. Previously to the year 1775, nothing had been determined regarding the length, weight and condition of equilibrium of the bow. Tourte's penetration, aided by the actual experience of the virtuosi of his day, enabled him to decide the most perfect proportions of the bow to be between 29·134 and 29·528 inches in length including the button. He decreased the diameter up to the head, giving a difference of ·13 inches between the extremities, and also determined the distance of the hair from the stick by the heights of the head and rest. Lastly, he invented the method of spreading the hairs and fixing them on the face of the nut by means of a movable band of metal fitting on a slide of mother-of-pearl. The bow, as we have it, is therefore the creation of the genius of Tourte.

Tourte's improvements in the bow were effected after 1775. Tradition says that he was materially assisted in his work by the advice of Viotti, who arrived in Paris in 1782. Nothing is more likely; for only an accomplished violinist could have formulated the demands which the Tourte bow was constructed to satisfy. Viotti no doubt contributed to bring the Tourte bow into general use, and it is certain that it quickly drove the old barbarous bows completely from the field, and that in Paris there at once arose a school of bow-makers which has never been excelled.

Tourte never stamped his bows. Genuine ones are sometimes found stamped with the name, but this is the work of some other hand. His original nuts are usually of tortoise shell,

¹ Mathematically investigated, Tourte's bow, when unstrung, is found to form a logarithmic curve, the ordinates of which increase in arithmetical proportion, and the abscissas in geometrical proportion.

finely mounted in gold, but wanting the metallic slide on the stick, which was introduced by Lupot.

Tourte continued to work to within a very few years of his death, at an advanced age. His atelier was on the fourth floor of No. 10, Quai de l'École: after making bows all day he would descend in the evening, and recreate himself by angling for gudgeon in the Seine. (See Bow.)

E. J. P.; addns. E. H.-A.

TOVEY, DONALD FRANCIS (b. Eton, July 17, 1875), pianist and composer, has been Reid Professor of Music in Edinburgh University since 1914.

The son of an Eton master, the Rev. Duncan Crooks Tovey, his education, both musical and general, was up to the age of 19 in the hands of Miss Sophie Weisse, who trained him for the career of a pianist. (In after years he had advice and help from Deppe, but was never his pupil.) His encyclopædic knowledge of the music of Bach was already manifested in his teens, when he played the thirty variations from memory. His playing of the six-part 'Ricercar' from the 'Musikalisches Opfer' is perhaps his greatest achievement as a pianist. As early as the age of 8 years he began to compose works in sonata form, and soon was allowed to learn counterpoint, Walter Parratt being his teacher. He subsequently studied with James Higgs, and when he was 13 had a few lessons from Hubert Parry. In June 1894 he was elected Lewis Nettleship scholar at Balliol College, Oxford, and graduated in classical honours in 1898. In 1894 he had given a concert at Windsor, at which he was assisted by Joachim, who took the keenest interest in his artistic development, often bearing testimony to the remarkable nature of Tovey's gifts.

He definitely entered the musical profession in 1900, when he gave a series of four concerts in St. James's Hall, at which several of his own compositions were given. Two more sets of concerts were given in 1901, and in 1901-02 he gave concerts in Berlin and Vienna. A more important concert, with orchestra, in Nov. 1903 showed his powers of orchestration in his own pianoforte concerto which produced a strong impression; it was conducted by Henry J. Wood and played by the composer, and was repeated under Richter in 1906.

In the following years Tovey played much in London and elsewhere, particularly in chamber music, with such artists as Robert Hausmann and Lady Hallé. He organised several series of such concerts at the Chelsea Town Hall, took part in those of the CLASSICAL CONCERT SOCIETY (*q.v.*), and brought forward some of his own compositions as well as giving distinguished performances of the classics.

His appointment in July 1914 as Reid Professor of Music (see REID; EDINBURGH), gave a

more definite direction to his activities and called into play his depth of scholastic knowledge of music. Early in his residence at Edinburgh he created the Reid Orchestral Concerts, conducted the orchestra, and thus co-ordinated practice and theory. His lectures show the high quality of his mind, and his writings, mostly in the form of pamphlets on works to be performed at the concerts and also analytical notes to the concerts, are of a kind far above the level of first steps to knowledge usually expected from such work. His unswerving devotion to the highest manifestations of art has made him a great teacher.

The list of Tovey's major compositions below shows that his output has been considerable. His mind steeped in the classics and superior to popular demand has produced works which musicians respect, but the public is apt to ignore to its own loss. Most of the chamber music has been published by Schott.

Trio in B minor for pf. and strings.
Sonata in F for pf. and v'cl.
Quintet in C for pf. and strings.
Sonata in F for pf. and vln.
Twelve songs for a low voice.
Three anthems for unaccompanied male voices.
Trio in C minor, for pf., clarinet and horn, with a free arrangement of the wind parts for vln. and v'cl.
Divertimento in B flat for oboe and pf., embodying three 'duets' brought forward before the completion of the work.
Offertorium 'In festo sanctorum Innocentium' for unaccompanied vocal quartet.
Quartet in E minor for pf. and strings.
Aria and Variations in B flat for string quartet.
Trio in D minor for pf. and cor anglais.
Concerto in A for pf. and orch.
Sonata in B flat for pf. and clarinet.
Several short pf. pieces.
Twenty-five Rounds for equal voices.
Prelude and entr'actes for Maeterlinck's 'Aglavaine et Sélysette' for string orch.
Balliol Dances for pf. duet.
Suite for wind band, written for the Oxford Pageant of 1907.
String quartets in G and D (Chelsea Concert, 1909).
National March composed for the Sultan of Zanzibar, for military band.
Variations for pf. and v'cl. 'In Memoriam Robert Hausmann,' 1909.
Symphony in D (op. 32). (Aix-la-Chapelle, 1913.)
Sonata 'Eroica' in C. Vln. alone.
Sonata in D. V'cl. alone.
Sonata in G. 2 v'cl.
Trio in D. Pf., vln. and v'cl.
Variations on a theme by Gluck. Flute and string quartet.
Opera. 'The Bride of Dionysus.' 3 acts. Text by R. C. Trevelyan.
See *B.M.S. Ann.* 1920. M.; addns. c.

TOWER, a group of organ pipes arranged in the form of a turret or tower. T. E.

TOWER DRUMS, THE. Handel frequently borrowed a pair of kettledrums from the Master-General of the Ordnance for his own performances of his oratorios; and as they were kept in the Tower of London, they were usually called 'the Tower Drums.' They were in frequent request after his death, including the Commemoration Festival in Westminster Abbey in 1784. Dr. Burney, in his account of this Festival, says they were taken by Marlborough at the battle of Malplaquet in 1709.

A much larger pair, 39 and 35 inches in diameter, were made expressly for that Festival from the design of Asbridge, of Drury Lane orchestra, and have since obtained the name of 'Tower Drums,' from a notion that the head of one of them was made from the skin of a lion in the Tower menagerie. These drums came into the possession of T. P. Chipp,

the well-known kettledrummer, and on the sale of his instruments at his death were bought by H. Potter & Co., military musical instrument makers. They added a brass T-shaped key to each tuning-screw, and presented them (1884) to the Crystal Palace Company, who placed them in their large orchestra.

Larger drums were made for the Sacred Harmonic Society (47 and 43 inches in diameter), but no tone can be got from such overgrown instruments. v. de p.

TOWER OF THE VOIVOD, THE, opera, text after a novel of H. H. Ewers, music by Dohnányi; produced Budapest, Mar. 18, 1922.

TOYE, (1) JOHN FRANCIS (b. Winchester, Jan. 27, 1883), writer on music in several journals and a contributor to this Dictionary, became musical critic to the *Morning Post* in 1925. In 1913 he published a musical novel, *Diana and Two Symphonies*, and some songs by him have also been published. In 1925 appeared *The Well-tempered Musician*, epitomising his outlook on the art. His brother, (2) GEOFFREY (b. Feb. 17, 1889), was educated in music at the R.C.M. (exhibitioner and scholar), and gained experience as a conductor at several London theatres. He conducted the first performance of Vaughan Williams's 'London Symphony' (see VAUGHAN WILLIAMS) in 1914. He attained the rank of major in the R.F.C. during the War, commanding the photographic section. Returning to music he conducted performances of the Beecham Opera Company and concerts of the Royal Philharmonic Society (1918-19). He conducted two London seasons of the D'Oyly Carte Opera Company in the Gilbert and Sullivan repertory. He is a member of Lloyds, and has founded and conducted the Lloyds Choir. c.

TOY SYMPHONY (Fr. *La Foire des Enfants*, or *symphonie burlesque*; Ger. *Kindersinfonie*), the English name by which a certain work of Haydn's is known. A tradition which there is no reasonable cause for doubting says that the composer got seven toy instruments at a fair at Berchtesgaden, and taking them to Esterházy, summoned some of his orchestra to an important rehearsal. When they found that they were expected to play a new symphony upon these toys (the only real instruments in the score are two violins and a double bass) the most experienced musicians in the band failed to keep their time for laughing. The original parts are entitled 'Sinfonia Berchtesgadensis'; the toy instruments employed are a 'cuckoo' playing E and G, a trumpet and drum in G, a whistle, a triangle and a 'quail' in F. There are three movements, the last of which is played three times over, faster and faster each time. The symphony is in C major, and was written in 1788 (see Pohl's *Haydn*, vol. ii. p. 226, etc.).

Andreas Romberg wrote a symphony for

much the same instruments, with the addition of a pianoforte duet, a rattle and a bell. He attempts more elaborate modulations than Haydn ventures to use, but his symphony lacks the fun and freshness of the older master's work, although his slow movement, an *Adagio lamentabile*, is very humorous. Mendelssohn wrote two—the first for Christmas 1827, for the same orchestra as Haydn's, the second for Christmas 1828. Both seem to have vanished. (See MENDELSSOHN, Vol. III. pp. 383-4.) Franklin Taylor wrote one for piano and toys which was frequently played, and later examples have had a more or less ephemeral popularity. m.

TRABACI, GIOVANNI MARIA, a Neapolitan by birth, appears in 1603 as organist to the Royal Chapel at Naples, and somewhat later as magister capellae. His publications consist of several books of masses, psalms, motets and madrigals, hardly any of which, however, seem to be preserved complete; but they also include two books of organ pieces, one described in the title as containing *Ricercate, Canzone francesi, Capricci, Canti fermi, Gagliarde, Partite diverse, Toccate di durezza e ligature, Consonanze Stravaganti, opere tutte da Sonare a 4 v.*, Lib. 1, 1603; the other, *Ricercate ed altri varii Capricci con 100 versi sopra li otti finali ecclesiastici*, Napoli, 1615. From the first of these organ books *L. Torchi* in 'L' arte musicale in Italia,' vol. iii. has reprinted some short pieces, two of which serve to illustrate the somewhat crude attempts of the time in the employment of dissonances and chromatic harmony. The first piece, 'Terzo tono con tre fughe,' which is diatonic enough, hardly appears to be transcribed or at least printed correctly. The answers and the theme do not correspond.

J. R. M.

TRACKER, a thin flat strip of wood used in the mechanism of an organ for the purpose of conveying motion from one portion of the instrument to another. (See ORGAN, Vol. III. p. 756.)

TRACKER PNEUMATIC ACTION, see ORGAN.

TRACTULUS, the *Guidon* or sign used at the end of a stave to indicate the note with which the next stave begins. In English it is called a **DIRECT** (q.v.). w. s. r.

TRACTUS. The position of the tract in the Latin service has already been indicated (see GREGORIAN MUSIC). In character it differs from the other classes of plain-song of the Mass and is probably a survival of old ways which has been retained for penitential occasions though superseded elsewhere. A tract consists of a psalm or excerpt from a psalm sung between the Epistle and Gospel in chorus with no solo or alternation. In practice nearly all tracts belong to one or other of two classes, the first of which utilises a plastic melody of the

2nd mode and the second a similar melody of the 8th mode. Specimens of the latter are given here showing a comparison of the opening parts of three of the tracts of Easter Even.

The first then repeats the last two divisions, (b) and (c), to the remaining words left over from verse one. Verse two then proceeds thus :

It will be seen that the treatment is quite methodical, and each verse is set to a melody in three divisions, each of which consists of (a) an intonation, (b) a recitation and (c) a cadence. (See INFLEXION.) W. H. F.

TRAETTA, TOMMASO MICHELE FRANCESCO SAVERIO (b. Bitonto, Terra di Bari, Mar. 30, 1727; d. Venice, Apr. 6, 1779), an Italian composer of the 18th century. Formerly it was believed that his name was Trajetta, and the date of his birth May 19, 1727; but the certificate of birth published by the *Gazzetta musicale di Milano* of 1879, No. 30, settles beyond question that he was the legitimate son of Filippo Traetta and Anna Teresta Piasanti, and that his date of birth was that given above.

At 11 years of age he became pupil of Durante at the 'Conservatorio di Santa Maria di Loreto' at Naples, to which institution he belonged until the autumn of 1748, when we find him teaching singing, and occasionally writing some sacred music for several churches of Naples. Two years afterwards his first opera, 'Farnace,' produced at the San Carlo at Naples, Nov. 4, 1751, met with such success that he was forthwith commissioned to compose six more operas for the same house. Of these nothing is known, except the title of one, 'I pastori felici,' 1753; yet they were probably not less successful than 'Farnace,' since his

name spread rapidly, and he received engagements at Florence, Venice, Rome, Turin, Verona, Parma, etc. Goldoni and Metastasio did not disdain to write libretti for him; Goldoni a comic opera 'Buovo d' Antona' (Florence, 1756); and Metastasio 'L' Olimpiade' (Verona, 1758). Towards the end of 1759 Traetta accepted the appointment of maestro di cappella and teacher of singing to the Princesses, offered to him by Don Filippo, Infanta of Spain, and Duke of Parma. The first opera he composed for the ducal theatre of Parma was 'Solimano' (Carnival, 1759), followed in the spring by 'Ippolito ed Aricia.' This appears to have been a masterpiece, as both the Duke and the audience were exceedingly pleased with it, and on its reproduction six years later for the wedding of the Princess Maria Luisa with Charles III., King of Spain, a life pension was granted to the composer. In 1759 and 1760 Traetta went twice to Vienna to witness the performance of two operas purposely written for the Austrian capital; 'Ifigenia in Aulide' (1759) and 'Armida' (1760).

In 1765, after the death of the Duke, Traetta left Parma and settled in Venice, as principal of the 'Conservatorio dell' Ospedaletto.' He held the appointment for nearly three years, and resigned it on the invitation of Catherine II. of Russia, to succeed Galuppi as 'Maestro di Corte.' The severe climate of Russia, however, did not agree with the Italian maestro; in 1775 he gave up his position, and accepted an engagement in London, where, however, he was not very successful, owing chiefly to the firm hold which Sacchini had taken of the English public. He accordingly returned to Naples, but the climate of Russia and the anxieties of London had impaired both his health and his genius, and the few operas he wrote before his death show that the spring of his imagination was dried up. He died in Venice and was buried in the church of Santa Maria Assunta, where the following epitaph is engraved on his tomb :

THOMAE TRAJETTA

Though Traetta was gifted with great intelligence, and his music is full of vigour and not wanting in a certain dramatic power, yet his works are now entirely forgotten.¹ Burney, Galvani, Grossi, Florimo and Clément all praise him, and Florimo even finds in him a tendency towards the same dramatic expression and dignity in the musical treatment of the libretto

¹ His name does not occur once in the programmes of the Philharmonic Society, and only once in all the three indexes of the A.M.S.

that a few years afterwards made the name of Gluck immortal. However this may be, nobody can deny that Traetta had, as a man, a very peculiar character, an extraordinary estimation of his own talent, and an unusual readiness in making it clear to everybody: 'Traetta,' says Florimo,

'at the first performance of the operas, when presiding at the *clavicembalo*, as was customary at that time, convinced of the worth of his works, and persuaded of the special importance of some pieces—was in the habit of turning towards the audience and saying: "*Ladies and gentlemen, look sharp, and pay attention to this piece.*"'

La disfatta di Dario. Venezia, 1778.
Artenice. Do. 1778.
Siroe, Lucio Vero, Il ritornale da Londra, and Astarte are undated. (See *Quellen-Zeichen*.)
Gli eroi del Campi Elisi. Venezia, 1779. Written on the composer's death-bed, and finished by Gennaro Astaritta.
Le feste d'Imeneo, a prologue and trilogy, viz. Il trionfo d'Amore, Iriole, Saffo, and Egte, for the wedding of the Archduke Joseph of Austria
- with the Infanta Doña Isabella di Borbone, at Parma, Sept. 1761.
Il tributo campestre, 'componimento pastorale,' on the occasion of Maria Carolina of Austria, wife to Ferdinand IV. King of Sicily, passing through Mantua in 1768.
In the same year he wrote an Oratorio, 'Salomone,' for the Conservatorio dell' Ospedale in Venice; and about 1770 he wrote a 'divertimento for four orchestras' with the title 'Le quattro stagioni e i dodici mesi dell'anno' (the four seasons and the twelve months of the year).
A Stabat Mater of his for four voices and accompaniment of several instruments is known, and was republished at Naples in 1878; and the Archives of the 'Real Collegio di Napoli' contain the following:
Lezione terza for soprano.
39 Arie (some with accompaniment of violin and basso, and some with accompaniment of several instruments).
7 Duetti.
Aria, 'Terrore m'ispirava,' with pianoforte accompaniment.
Aria, 'Ah! consola il tuo dolore,' arranged for two violins, viola and basso.
A Canon, 'Sogno, ma te non miro,' for two sopranos and basso.
A Solfeggio, with pianoforte accompaniment.
A cantata for soprano and instruments, 'Del, qual mi sorprende,' is in the State Library at Berlin, and a 'Hymn to the Creator' (published) is in the British Museum.

G. M.

TRAINÉE, name of an *agrément* of the French School, also called Chute (see ORNAMENTS). E. B².

TRAINING SCHOOL FOR MUSIC, THE NATIONAL, see NATIONAL TRAINING SCHOOL FOR MUSIC; ROYAL COLLEGE OF MUSIC.

TRAIT, an ornament of the French School. It differs from the COULADE (*q.v.*) in that all the notes are articulated in the trait, in contrast with the slur in the coulade. The trait comprises, moreover, all kinds of *diminutions* (see DIMINUITION, 3) improvised by the executant. (See ORNAMENTS.) E. B².

TRAMIDAMENTE. This strange direction, with *ängstlich* below it as its German equivalent, is found at the recitative with the trumpets in the 'Agnus' of Beethoven's Mass in D, in

the old score (Schott). In Breitkopf & Härtel's edition it appears as 'timidamente,' which is good Italian, and is the translation of 'ängstlich'—with distress. G.

TRANQUILLO, an Italian term, meaning 'calmly,' 'quietly.' G.

TRANSCRIPTION, see ARRANGEMENT.

TRANSFORMATION OF THEMES, see METAMORPHOSIS.

TRANSITION is a musical term which has several different senses. It is most commonly used in a vague way as synonymous with modulation. Some writers, wishing to limit it more strictly, use it for the actual moment of passage from one key to another; and again it is sometimes used to distinguish those short subordinate flights out of one key into another, which are so often met with in modern music, from the more prominent and deliberate changes of key which form an important feature in the structure of a movement. The following example from Beethoven's sonata in B_♭, op. 106, is an illustration of the process defined by this latter meaning of the term; the transition being from F_♯ minor to G major and back:

See MODULATION.

C. H. H. P.

TRANSPOSING INSTRUMENTS. This is a name often given to those wind instruments for which, for the sake of the player's convenience in reading, the parts are written in one key while the instrument sounds in another. Players of the clarinet, cor anglais, horn and trumpet, among the ordinary orchestral instruments, are required to play from parts which indicate the physical production of certain notes, not their accurate sound. M.

TRANSPOSING KEYBOARDS. The difficulties of transposition at the keyboard seem early to have prompted the alternative of a shifting keyboard, applied in the first instance to the diatonic arrangement of the keys, which in the 16th century was still to be met with in old organs: in other words, whatever the key might be, to play apparently in C. The oldest authority on the organ extant is the blind organist of Heidelberg, Arnold Schlick, who in 1511 published the *Spiegel der Orgelmacher und Organisten*, of which only one copy is now

¹ This composition is mentioned in a letter dated Dec. 21-3, 1770, written by Catherine II. of Russia to Voltaire.

known to exist.¹ Schlick is quoted by Sebastian Virdung, who also published his book in 1511, and (2nd cap. p. 19, Berlin reprint, p. 87) has an interesting passage on transposing organs, which we will freely translate.

'When an organ in itself tuned to the right pitch can be shifted a tone higher or lower, it is a great advantage to both organist and singers. I have heard years ago of a Positive so made, but I only know of one complete organ, and that one I use daily, which together with its positive, two back manuals, pedals, and all its many and rare registers, may be shifted higher and back again as often as necessity requires. For some chapels and singers *ad Cantum Mensurabilem* such a contrivance is specially useful. Two masses or Magnificats may be in the same tone, and set in the same notation of line and space, and yet it may be desirable to sing the one a note higher than the other. Say both masses are in the Sixth Tone with Clef C; the counter bass going an octave lower²—In the other the counter bass goes a note or more lower, to B or A,³ which are too low for bass singers, and their voices heard against others would be too weak, if it were not possible to sing the part a note higher. Now in the first mass the counter bass in C can be played on an organ as set, but the other demands transposition to D, with the semitones F[♯] and C[♯], which to those who have not practised it is hard and impossible. So therefore, with an organ, as described, the organist may go on playing in C (C-sol-fa-ut) on the keyboard, although the pipes are in D (D-la-sol-re).'⁴

We may assume that in course of time the increasing skill of organists rendered mechanical transpositions unnecessary, since for the organ we hear no more about them; but for the harpsichord they were to be met with in the 16th and following centuries. Praetorius (A.D. 1619) speaks of transposing clavicymbals (harpsichords) which by shifting the keyboard could be set two notes higher or lower, and describes a 'Universal-Clavicymbal' capable of gradual transposition by semitones to the extent of a fifth. Burney in his musical tour met with two transposing harpsichords; one a German one, made under the direction of Frederick the Great, at Venice; the other (a Spanish one, also with movable keys) at Bologna, belonging to Farinelli.⁵

The transposing harpsichord mentioned by Burney as belonging to Count Torre Taxis of Venice, had also a pianoforte stop, a combination in vogue at the time it was made, 1760. A German pianoforte with movable keyboard was made for the Prince of Prussia in 1786, and about the same period Sébastien Erard constructed an 'organised' pianoforte, another favoured combination of the latter half of the 18th century, which transposed a semitone, whole tone, or minor third each way, to suit the limited voice of Marie Antoinette. Roller of Paris is also said to have made transposing pianos.

¹ Reprinted in the *M. f. M. Berlin*, 1869; edited with explanatory notes by Robert Eitner.

² To the C, second space of the bass clef, but evidently, as will be obvious, sounding the F lower.

³ In our pitch the double E and D.

⁴ This very difficult passage in the quaint original has been rendered from an elucidatory footnote by the editor, Eitner.

⁵ See A. J. Hipkins, *History of the Pianoforte*, pp. 87, 88, for a description of the late Sir Bernard Samuelson's interesting Ruckers harpsichord. Also p. 83, for Van Blankenburg's account of such transpositions.

The most prominent instances of transposing pianofortes made in England in the 19th century are the following: (1) The square piano of Edward Ryley, patented in 1801, and acting by a false keyboard, which was placed above the true one, and could be shifted to any semitone in the octave. Ryley's idea as stated in his specification went back to the original one of playing everything in the so-called natural scale of C. The patent for this complete transposer was bought by John and James Broadwood, and an instrument so made is in the possession of the present firm. (2) The Royal Albert Transposing piano, brought out by Addison & Co. soon after the marriage of Queen Victoria, a piccolo or cottage instrument, is described by Rimbault in his *History of the Pianoforte* as having the keys divided at half their length, the front and back ends being capable of moving independently of each other. (3) Broadwood's transposing Boudoir Cottage pianos, made about 1845, displayed the novel feature of the instrument itself moving while the keyboard and action were stationary. In some of their pianos made in this way, the instrument was suspended between two pivoted metal supporters which allowed the gradual movement, semitone by semitone, effected by turning a pin at the side with an ordinary tuning hammer. Subsequently the instrument was moved in a groove at the top and on two wheels at the bottom of the outer fixed case, but neither contrivance was patented, nor was long continued to be made. (4) Another attempt at transposing by the keyboard was brought forward in 1884 by Hermann Wagner of Stuttgart. He names his invention 'Transponir-Pianino.'⁶ (5) The last transposing contrivance to be mentioned is the 'Transpositeur' of Pleyel, Wolff et C^{ie} of Paris, invented by Auguste Wolff in 1873. The Transpositeur being an independent false keyboard, could be applied to any pianoforte by any maker. It was patented and sold by the Pleyel firm in Paris and London at a moderate price.

A. J. H.

TRANSPOSITION, change of key, the notation or performance of a musical composition in a different key from that in which it was written.

In order to transpose a phrase, each note must be written, sung or played a certain fixed distance higher or lower, that it may occupy the same position in the new scale that it held at first in the original one. Thus Exs. 2 and 3 are transpositions of Ex. 1, one being a major second higher, and the other a major second lower; and the notes of the original phrase being numbered, to show their position as degrees of the scale, it will be seen that this position remains unchanged in the transpositions.

⁶ *Zeitschrift für Instrumentenbau*, Band 4, No. 12 (Leipzig Jan. 12, 1884).

1. Original Key C.

2. Transposed into D.

3. Transposed into Bb.

It is, however, not necessary that a transposition should be fully written out, as above. By sufficient knowledge and practice a performer is enabled to transpose a piece of music into any required key, while still reading from the original notation. To the singer such a proceeding offers no particular difficulty, since the relation of the various notes to the key-note being understood, the absolute pitch of the latter, which is all that has to be kept in mind, does not matter. But to the instrumental performer the task is by no means an easy one, since the transposition frequently requires a totally different position of the fingers. This arises from the fact that in transposition it often happens that a natural has to be represented by a sharp or flat, and *vice versa*, as may be seen in the above examples, where the B \natural of Ex. 1, bar 2, being the 7th degree of the scale becomes C \sharp which is the 7th degree of the scale of D, in Ex. 2; and again in bar 3, where F \natural , the 4th degree, becomes E \flat in Ex. 3. The change of a flat to a sharp, though possible, is scarcely practical. It could only occur in an extreme key, and even then could always be avoided by making an enharmonic change, so that the transposed key should be more nearly related to the original; for example :

Hence it will not suffice to read each note of a phrase so many degrees higher or lower on the staff; in addition to this, the relation which every note bears to the scale must be thoroughly understood, and reproduced in the transposition by means of the necessary sharps, flats or naturals; while the pianist or organist, who has to deal with many sounds at once, must be able also instantly to recognise the various harmonies and modulations, and to construct the same in the new key.

The faculty of transposition is extremely valuable to the practical musician. To the conductor, or to any one desiring to play from orchestral score, it is essential, as the parts for the so-called 'transposing instruments'—horns, trumpets, clarinets—being written in a different key from that in which they are to sound, have to be transposed back into the key of the

piece, so as to agree with the strings and other non-transposing instruments. (See SCORE.) Orchestral players and accompanists are frequently called upon to transpose, in order to accommodate the singer, for whose voice the written pitch of the song may be too high or too low, but it is probably extremely seldom that transposition takes place on so grand a scale as when Beethoven, having to play his concerto in C major, and finding the piano half a tone too flat, transposed the whole into C \sharp major; or the scarcely less remarkable feat of Brahms, who, as a young man, playing with the violinist Remenyi, and finding the piano at C \flat too low a pitch to suit the violinist, transposed Beethoven's C minor sonata into C \sharp minor.

Transposed editions of songs are frequently published, that the same compositions may be made available for voices of different compass, but transpositions of instrumental music more rarely.

F. T.

TRANSPOSITION OF THE ECCLESIASTICAL MODES. By means of the B \flat which was available for use in the ancient scale derived from the Greeks (see GREEK MUSIC; MODES; MONOCHORD), a melody could be written in a transposed position either a fourth above or a fifth below. This liberty was employed particularly in the case of melodies of the second mode that ranged low. It was also employed in order to get chromatic effects. For example, fourth mode melodies were set a fourth higher, and could use both B \flat and B \natural as the note above their final. See, for example, the antiphon analysed at the end of the article ANTIPHON. To a limited extent other transposition was utilised. A melody could be transposed a fifth higher without change so long as the note fourth above its final did not occur. In some cases even with such a note occurring the transposition was made, and thus the effect was obtained of an F \sharp .

But all such statements as the above must be made and taken with great caution because of the uncertainty that prevails as to the theory that originally governed the composition of early plain-song and as to possible changes which the melodies may have undergone in transmission. In a case like that last mentioned, for example, the F \sharp effect may be regarded as a primitive feature which it has happily been possible to retain, in spite of the restricted possibilities of the plain-song scale, by the expedient of transposition: or it may be regarded as a curious perversion which has come about as the melody has been handed down from mouth to mouth: or it may be regarded as a bold venture of a composer who saw his way to secure an effect which pleased him though it did not fall in with the strict theory of his art.

W. H. F.

Composers of the polyphonic period made use

of the legitimate liberty of transposing which the B \flat afforded. During the transitional period—but very rarely earlier than that—a double transposition was effected, in a few exceptional cases, by means of two flats; B \flat raising the pitch a fourth, and E \flat lowering it, from thence, by a fifth—thus really depressing the original pitch by a tone. A beautiful example will be found in Wilbye's 'Flora gave me fairest flowers,' composed in 1598; yet Morley, writing in 1597, severely condemns the practice.

W. S. R.

TRASUNTINO, VITO, a Venetian harpsichord-maker, who made an enharmonic (quarter-tone) archicembalo or large harpsichord for Camillo Gonzaga, Conte di Novellara, in 1606, now preserved in the Museum of the Liceo Comunale at Bologna. It was made after the invention of Don Nicola Vicentino, an enthusiast who tried to restore Greek music according to its three genera, the diatonic, chromatic and enharmonic, and published the results of his attempt at Rome in 1555, under the title of *L' antica musica ridotta alla moderna prattica*. From engravings in this work illustrating a keyboard invented to include the three systems, Trasuntino contrived his instrument. A photograph of it is in the South Kensington Museum. It had one keyboard of four octaves C-C, with white naturals; the upper or usual sharps and flats being divided into four alternately black and white, each division being an independent key. There are short upper keys also between the natural semitones, once divided, which makes thirty-two keys in the octave; 125 in all. Trasuntino made a Tetracorda, also preserved at Bologna, with intervals marked off to tune the archicembalo by—an old pitch-measurer or quadruple monochord. When Fétis¹ noticed Trasuntino, the archicembalo was in the possession of Baini. It was not the first keyboard instrument with enharmonic intervals; Vicentino had an organ built, about 1561, by Vincenzo Colombo of Venice. There is a broadsheet describing it quoted by Fétis as obtained by him from Signor Gaspari of Bologna.

¹ Descrizione dell' arciorgano, nel quale si possono eseguire i tri generi della musica, diatonica, cromatica, ed enarmonica, in Venetia, appresso Niccolò Bevilacqua, 1661, a. di 25 ottobre.

A harpsichord dated 1559, made by a Trasuntini, is cited by Giordano Riccati ('Delle corde ovvero fibre elastiche'), and was probably by Vito's father, perhaps the Giulio Trasuntino referred to by Thomas Garzoni ('Piazza universale di tutte le professioni del mondo,' Discorso 136) as excellent in all 'istrumenti da penna'—quilled instruments, such as harpsichords, manichords, clavicembalos and others. A harpsichord² by Alexander Trasuntino, dated 1531, is in the Donaldson Museum,

¹ Biographie universelle, 1866, p. 250.

² The instrument is engraved in A. J. Hipkins's *History of the Pianoforte*, p. 76.

R.C.M. This maker may have been the grandfather of Vito Trasuntino. Of Vito, Fioravanti³ says:

'Guido [or Vito] Trasuntino was a man of much and learned experience in the art of making harpsichords, clavicembalos, organs and regals, so that his instruments were admired by every one before all others, and other instruments he improved, as might be seen in many places in Venice.'

These citations are rendered from Fétis. 'Manicordo,' as in the original, is the clavicord. It is doubtful whether 'arpicordi' and 'clavicembali' here distinguish upright and horizontal harpsichords, or harpsichords and spinets.

A. J. H.

TRAUER-WALZER, i.e. Mourning-waltz, a composition of Schubert's (op. 9, No. 2), dating from the year 1816,

which would not be noticed here but for the fact that it is often attributed to Beethoven, under whose name a 'Sehnsuchts-walzer,' best known as 'Le Désir' (first of a set of ten all with romantic titles), compounded from Schubert's waltz and Himmel's 'Favoritwalzer,' was published by Schott in 1826. Schubert's op. 9 was issued by Cappi and Diabelli, Nov. 29, 1821, so that there is no doubt to whom it belongs. The waltz was much played before publication, and got its title independently of Schubert. In fact, on one occasion, hearing it so spoken of, he said, 'Who could be such an ass to write a mourning-waltz?' (Spaun's *Memoir*, MS.) Schubert's Waltz is a perfect type of a German 'Deutsch.' (See TEUTSCH.) G.

TRAUTMANN, MARIE, see JAEHL, Alfred.

TRAVERS, JOHN (b. circa 1703; d. June 1758) began his musical education as a chorister of St. George's Chapel, Windsor, where he attracted the attention of Dr. Godolphin, Dean of St. Paul's Cathedral and Provost of Eton College, by whom he was placed with Maurice Greene as an articulated pupil. He soon afterwards made the acquaintance of Dr. Pepusch, who assisted him in his studies to his great advantage. About 1725 he was appointed organist of St. Paul's, Covent Garden, and subsequently organist of Fulham Church. On May 10, 1737, he was sworn in organist of the

³ Specchio di scientia universale, fol. 273.

Chapel Royal in the room of Jonathan Martin, deceased, upon which he relinquished his place at Fulham. He composed much church music: his well-known Service in F, a Te Deum in D, and two anthems were printed by Arnold, and another anthem by Page; others are in MS. in the books of the Chapel Royal. He published about 1750 'The Whole Book of Psalms for one, two, three, four and five voices, with a thorough bass for the harpsichord,' 2 vols. fol. But the work by which he is best known is his 'Eighteen Canzonets for two and three voices, the words chiefly by Matthew Prior,' which enjoyed a long career of popularity, and two of which—'Haste, my Nanette,' and 'I, my dear, was born to-day'—are still occasionally heard. The canzonet 'I, like a bee' enjoyed an even longer popularity. A set of 'XII voluntaries for the organ or harpsichord' was published after his death. An autograph MS. by him, containing four melodies in some of the ancient Greek modes, for four voices with instrumental accompaniments, the fruit, doubtless, of his association with Pepusch, is amongst Dr. Cooke's MS. collections now in the R.C.M. Upon the death of Dr. Pepusch he became the possessor, by bequest, of one-half of the Doctor's valuable library.

W. H. H.

TRAVERSO, see FLUTE.

TRAVIATA, LA, opera in 4 acts; libretto by Piave (founded on 'La Dame aux camélias'), music by Verdi. Produced Teatro Fenice, Venice, Mar. 6, 1853; New York, Academy of Music, Dec. 3, 1856; Théâtre Italien, Paris, Dec. 6, 1856; Her Majesty's Theatre, May 24, 1856; in English, Surrey Theatre, June 8, 1857.

G.

TREBELLI (GILBERT¹), ZELIA (*b.* Paris, 1838; *d.* Étretat, Aug. 18, 1892), an operatic singer who took the public by storm, and stepped early into the high position which she maintained until her death.

She was taught the piano at the age of 6. Guided by her German teacher, she learnt to reverence and enjoy the works of Bach and Beethoven. After ten years her wish for instruction in singing was encouraged by her parents, who only thought thereby to add one other graceful accomplishment to those which were to render their daughter useful and acceptable in society. The services of Wartel were secured, and so delighted was he with his clever pupil that he never rested until he had persuaded her parents to allow of his training her for the lyric stage. Five years of close study prepared for her début, which was made at Madrid as Mile. Trebelli, under the most favourable circumstances and with complete success, Mario playing Alnaviva to her Rosina, in 'Il barbiere.'

Trebelli's appearances in the opera-houses of Germany in 1860-61 were a series of brilliant

¹ 'Trebelli' is obviously intended as the reverse of Gilbert.

triumphs. Public and critics were alike carried away by enthusiasm when they heard her rendering of the parts of Rosina, Arsace, Orsini, Urbano, Azucena and others. No member of Merelli's Italian troupe was gifted with so brilliant a voice and so much executive power. Nor could the audiences fail to be impressed by the actress's varied powers so rarely at the command of one individual, Trebelli expressing at one time the fire of an almost manly vigour, and at another the charm of womanly tenderness and delicacy. The German criticisms which declared the voice a contralto, comparing it with Alboni's in quality and with Schechner's in power, were not supported by English opinions. As a mezzo-soprano, its brilliancy, power and flexibility were appreciatively noticed; the artist's control over voice and action enthusiastically praised. Trebelli appeared first in London at Her Majesty's Theatre, May 6, 1862, as Orsini in 'Lucrezia.' 'A more encouraging reception has seldom been awarded to a débutante.' From that time she was a recognised favourite with our opera and concert audiences. Those who were familiar with her appearances in frequent co-operation with Mile. Tietjens in the chief Italian operas, will not easily forget the performances of Oberon, where Trebelli's impersonation of the captive, Fatima, was invested with peculiar charm. More recent and more widely known was her intelligent and refined impersonation of Carmen, though it lacked the vivid animalism now preferred.

In 1884 Madame Trebelli made a tour through the United States with Mr. Abbey's troupe. Her marriage to Bettini, about 1863, was, in a few years, followed by a separation. Her last appearance in England was at Mapleson's benefit concert in the Albert Hall in June 1889, when she was already ill. Her daughter, Antoinette Trebelli, had a considerable success at first under her own name, from about 1889, and subsequently, as Antonia Dolores, won a place among the most artistic singers of the day.

L. M. M.

TREBLE (BELL). The bells of a 'ring' or 'peal' are numbered, beginning with 1 for the smallest, which is called the 'treble,' and continuing 2, 3, 4, etc., to the largest, called the 'tenor.' The smaller bells are sometimes described as 'trebles.' Other than the treble and tenor the bells are known by their numerical places in the peal.

W. W. S.

TREBLE CLEF, the sign for the treble clef,

 is a modification of the letter G. For the earlier forms of this sign see CLEF. The double G clef, , indicates that the music is to be sung an octave lower than written. (See TENOR.)

TREBLE (Ital. *canto*; Ger. *Diskant*; Fr. *dessus*), a general term applied to the highest voices in a chorus or other concerted vocal piece, and to the upper parts in concerted instrumental music; also to soprano voices generally. The treble clef is the G clef on the second line of the upper (our treble) stave; the eighth line of the great stave of eleven lines (*chiave di sol*, *chiave di violino*; *clef de sol*) (see **CLEF**).

Its etymology does not refer it to any special class of voice. It is generally held to be a corruption of triplum, a third part superadded to the altus and bassus (high and low) (see **MOTET**). At what time 'treble' may have found its way into English it is difficult to say. 'Childish treble,' as the voice of old age, appears in Shakespeare, and 'faint treble' used to be applied to what is commonly known as falsetto. H. C. D.

TREBLE OR DESCANT VIOL, see **VIOL** (3).

TREE, ANN MARIA (b. London, Aug. 1801 or 1802; d. there, Queen's Gate Terrace, Feb. 17, 1862), was taught singing by Lanza and Tom Cooke. After singing in the chorus at Drury Lane, where her elder sister (afterwards Mrs. Quin) was a popular dancer, she was engaged at Bath, where she appeared as Polly in 'The Beggar's Opera,' Nov. 13, 1818. She made her début at Covent Garden as Rosina in 'The Barber of Seville,' Sept. 10, 1819; she made a great success as Luciana, in Reynold's and Bishop's operatic adaptation of 'The Comedy of Errors,' Dec. 11, 1819. She became a popular performer in other Shakespearean parts (original or adapted)—Viola, Nov. 8, 1820; Julia, Nov. 29, 1821; Imogen, June 19, 1822; Rosalind, Dec. 10, 1824. Her principal new parts were Louison in 'Henri Quatre,' Apr. 22, 1820; Zaide in the younger Colman's 'Law of Java,' May 11, 1822; Lady Matilda in Bishop's 'Maid Marian,' adapted by Planché from Peacock's novel, Dec. 3, 1822; Clari the Maid of Milan, in Payne's operatic play, wherein she originally sang 'Home, sweet Home,' May 8, 1823 (see **BISHOP**, Sir Henry). On May 21 of the same year she played Viola to the Olivia of her younger sister Ellen, afterwards Mrs. Charles Kean, and on the same evening sang Susanna in a mutilated version of 'The Marriage of Figaro,' to the Cherubino of another sister, afterwards the wife of John Philip Chapman. On Nov. 26, 1824, she sang as Matilda in 'The Frozen Lake,' an adaptation of Auber's 'Neige,' produced two months previously. On June 15, 1825, she took a farewell benefit as Clari, and as Mary Copp in Payne and Bishop's 'Charles II.' originally played by her the year before. She married James Bradshaw, afterwards member for Canterbury, Aug. 15, 1825. Chorley described her as a singer with a cordial, expressive mezzo-soprano voice, and much real feeling. A. C.

TREGIAN, FRANCIS, see **VIRGINAL MUSIC**, p. 546.

TRE GIORNI SON CHE NINA. See **CIAMPI**.

TREIBENREIF, see **TRITONIUS, PETRUS**.

TREMBLEMENT, the name of an ornament of the French school (see **ORNAMENTS** and **SHAKE**). E. B².

TREMOLO (Ital.). The term is properly applied to the rapid reiteration of a single note or chord without regard to measured time values.

(1) **INSTRUMENTAL**.—(a) It is an important effect on all stringed instruments played with the bow which by rapid up and down movement achieves the true tremolo most readily.

In string music it is noted thus  with

the word *tremolo*, *tremolando* (*trem*) added to distinguish between it and the reiteration according to time values.¹

(b) The wind instruments cannot produce the *tremolo*, but the drum roll (see **DRUM**) is actually a *tremolo*.

(c) The effect is obtained on keyboard instruments, more especially the pianoforte, by a shake in octaves or on two or more notes of a chord, with the use of the sustaining pedal. A similar device is used where string *tremoli* are transferred to wind instruments, especially clarinets in arrangements of orchestral music for military band.

(2) **VOCAL**.—The production of the true tremolo (rapid reiteration of a note without variation of pitch) is one of the most difficult technical feats of the singer. But here terminology has become confused, and this, as it appears in such ornaments as Caccini's *trillo* (see **ORNAMENTS, VOCAL**, also the quotation from Playford under **SHAKE**), is generally known as **VIBRATO** (*q.v.*). On the other hand, the term tremolo is commonly applied to a wavering of pitch in sustaining a single note which corresponds to the string player's vibrato. Both have been used as legitimate means of expression, but the second, since it often appears as the result of technical incompetence, is peculiarly liable to abuse.

C.

TREMULANT, a contrivance in the organ producing the same effect as *tremolando* in singing.

The air before reaching the pipes is admitted into a box containing a pallet to the end of which is attached a thin arm of metal with a weight on the end of it; when the air on its admission raises the pallet the metal arm begins to swing up and down, thus producing alternately an increase and diminution of wind-

¹ The shake on two notes of a chord thus  is spoken of as the fingered tremolo.

pressure. Its use is generally limited to such stops as the vox humana and a few other stops chiefly of the reed family. The tremulant is happily much less in vogue in this country than on the Continent, where its abuse is simply offensive. It is difficult to conceive how good taste can tolerate these rhythmical pulsations of a purely mechanical pathos. J. S.

TRENCHMORE, an old English country dance frequently mentioned by writers of the 16th and 17th century. According to Chappell (*Popular Music*) the earliest mention of it is in a Morality by William Bulleyn, published in 1564. The character of the dance may be gathered from the following amusing quotation from Selden's *Table Talk* (1689)¹:

'The Court of England is much altered. At a solemn Dancing, first you had the grave Measures, then the Corrantoes and the Galliards, and this is kept up with Ceremony; at length to *Trenchmore*, and the Cushion-Dance, and then all the Company, dance, Lord and Groom, Lady and Kitchen-Maid, no distinction. So in our Court, in Queen Elizabeth's time, Gravity and State were kept up. In King James's time things were pretty well. But in King Charles's time there has been nothing but *Trenchmore*, and the Cushion-Dance, *omnium gatherum* tolly-polly, hoite come toite.'

Trenchmore appears first in the *Dancing Master* in the fifth edition (1675), where it is directed to be danced 'longways for as many as will.' The tune there given (which we reprint) occurs in *Deuteromelia* (1609), where it is called 'Tomorrow the fox will come to town.'

W. B. S.

TRENTO, VITTORIO (b. Venice, 1761 or 1765), composer, pupil of Bertoni, and composer of ballets. His first, 'Mastino della Scala' (1785), was successful enough to procure him commissions from various towns. A drama in two acts, 'La finta ammalata,' was given at Florence in 1793. He was induced by Dragonetti to come to London, and there he composed the immensely popular 'Triumph of Love' (Drury Lane, 1797). His first opera-buffa, 'Teresa Vedova,' succeeded, and was followed by many others. In 1804 he composed 'Ifigenia in Aulide.' In 1806 he became impresario in Amsterdam, and there produced with great success an oratorio, 'The Deluge' (1808). Soon afterwards he went to Lisbon, also as impresario. His 'Climene,' the MS. score of which is in the British Museum, was given in 1811 for Catalani's benefit (*Q.-L.*). In 1824 he returned to Venice, and after that his name disappears. He composed about ten ballets, twenty operas, and a few oratorios,

one being the 'Maccabees.' His scores are in the collection of Ricordi of Milan. F. G.

TRESOR DES PIANISTES, LE. A remarkable collection of ancient and modern pianoforte music, made and edited by Madame FARRENC (*q.v.*), and published part by part by Leduc of Paris, from June 1861-72. Farrenc contributed some of the biographical notices to the work, but his death in 1865 prevented his having any large share in it; the rest of the biographies were written by Fétis, jun. The collection has been since superseded by separate publications and more thorough editing. G.

TRESOR MUSICAL, a collection of music edited by Robert van MALDEGHEM (*q.v.*), whose researches in the monasteries and libraries of the Continent, including the Vatican, were made with the encouragement of the Belgian Government, and rescued from obscurity many works of the old Flemish and Belgian composers. Every year since 1865 saw the publication, in a magnificent edition, by Musquardt, Brussels, of two books ('Musique religieuse, Musique profane') of the series, which was completed in 1893, in which year an index-volume was advertised. In the following index the more usual forms of certain composers' names are preferred to those given in Maldeghe's list.²

TRESTI, FLAMINIO (*b. Lodi, c. mid-16th cent.*), organist of S. Pietro di Bergolio, Alessandria, 1613, composed masses, motets, 4 books of madrigals, canzonette and vesper-

songs, published in Milan, Venice and Frankfurt-on-Main between 1585 and 1610 (*Q.-L.*).

TREU, DANIEL GOTTLIEB (called FEDELE in Italy (*b. Stuttgart, 1695; d. Breslau, Aug. 7, 1749*), violinist and composer, pupil of J. S. Küsser. He went to Venice in 1716 for further study under Vivaldi, and after producing a number of operas in Italy he went to Breslau, 1725, became Kapellmeister at Prague, 1727, and, finally, was in the service of Count Schaffgotsch at Hirschberg, 1740. He composed operas, cantatas and orchestral works (Mattheson; *Riemann; Q.-L.*).

TRIAD is a chord of three notes standing in the relation to one another of bottom note, third and fifth. It is of no consequence what the quality of the combination is, whether consonant or dissonant, major or minor. The following are specimens of major, minor, diminished and augmented triads respectively :

C. H. H. P.

TRIAL, (1) JEAN CLAUDE (*b. Avignon, Dec. 13, 1732; d. June 23, 1771*), French composer, was educated at the *maîtrise*, and early studied the violin, for which his first compositions were intended, under Garnier at Montpellier. Settling in Paris he became intimate with Rameau. He became conductor at the Opéra and was taken up by the Prince de Conti, who made him conductor of his own music, and procured him the joint-directorship with Berton of the Opéra (1767). He composed 'Ésope à Cythère' (1766) and 'La Fête de Flore' (1771), each in one act, and with Berton 'Sylvie', three acts (1765), and 'Théonis', one act (1767); also short overtures, orchestral divertissements, cantatas, ariettes and the music for 'La Chercheuse d'esprit.' He died of apoplexy.

(2) ANTOINE (*b. Avignon, 1736; d. Feb. 5, 1795*), his brother and junior by four years, was educated at the *maîtrise*, but forsook ecclesiastical plain-song for stage ariettes. Having appeared with success as a comedy-tenor in several provincial towns, he went to Paris in 1764, and made his début at the Théâtre Italien, July 4, 1764 in Philidor's 'Le Sorcier.' For thirty years composers eagerly vied with each other in writing parts for him, and he left permanent traces at the Opéra-Comique, where the comedy-tenor part is still called by his name. Like Dugazon, Antoine Trial embraced with fervour the doctrines of the Revolution, and on the fall of Robespierre was constrained by the mob to atone for his previous exploits by singing the 'Réveil du Peuple' on his knees. Forced to give up his post in the municipality, and subjected to many cruel humiliations, his mind gave way, and he poisoned himself. His wife, Marie Jeanne

Milon (*b.* Paris, Aug. 1, 1746; *d.* Feb. 13, 1818) made her début at the Théâtre Italien, Jan. 15, 1766, singing under the name of Mme. Mandeville. She had a voice of remarkable compass and flexibility, and brought into fashion airs full of roulades and vocalises.

(3) ARMAND EMMANUEL (*b.* Paris, Mar. 1, 1771; *d.* Paris, Sept. 9, 1803), their son, began early to compose, and produced at the Comédie Italienne 'Julien et Colette' (1788); 'Adelaïde et Mirval' (1791); 'Les Deux Petits Aveugles' (1792); 'Le Siège de Lille' (1793); 'La Cause et les effets, ou le Réveil du peuple en 1789' (1793), besides taking part in the celebrated revolutionary piece 'Le Congrès des rois.' A first-rate accompanist, Armand Trial might have made both name and money, but though he married Jeanne Méon, a charming artist at the Théâtre Favart, he plunged into dissipation, and died from its effects.

G. C.; with addns. M. L. P.

TRIAL BY JURY, a very extravagant extravaganza; words by W. S. Gilbert; music by Sullivan. Produced Royalty Theatre, London, Mar. 25, 1875. G.

TRIANGLE, an instrument of PEECUSSION (*q.v.*), much used in the modern orchestra, consisting of a steel rod bent in a triangular form, but open at one angle. The beateris of the same metal, and should be somewhat of a spindle shape, so as to give a heavier or lighter stroke at the performer's discretion. The triangle is hung by a string at the upper angle, held in the performer's hand, or more frequently attached to his desk or to one of his drums, as it is seldom that a man has nothing else to play besides this little instrument, except in military bands. It suits all keys, as besides the fundamental tone there are many subordinate ones, *not* harmonics. The woodcut is from an instrument of the pattern used at the Opéra in Paris. It is an isosceles triangle, the longest side $7\frac{1}{2}$ inches, and the short side or base 7 inches. Thickness $\frac{1}{4}$ of an inch. v. de P.

TRIBUT DE ZAMORA, LE, opera in 4 acts; words by d'Ennery and Brésil; music by Gounod. Produced Opéra, Paris, Apr. 1, 1881. G.

TRICINIUM, see BICINIUM.

TRICKLIR, JEAN BALTHASAR (*b.* Dijon, c. 1745; *d.* Dresden, Nov. 29, 1813), violoncellist, formed a string quartet with Schick, Benda and Hofmann, touring in Germany c. 1782. He was appointed at the Dresden court in 1783. He composed concertos and sonatas for violoncello, and wrote two theoretical treatises (E. v. d. Straeten, *Hist. of Violoncello*).

TRIÉBERT, (1) CHARLES LOUIS (*b.* Paris, Oct. 30, 1810; *d.* Gravelle-St. Maurice, July 18, 1867), French oboist, son of a wind-instrument

maker, was educated at the Conservatoire, and took the first oboe prize in Vogt's class in 1829. He had an excellent tone, great execution and good style, and was long remembered at the Théâtre des Italiens and the Société des Concerts. Although much occupied with instrument-making, he carried on his artistic cultivation with earnestness, and composed much for the oboe—original pieces, arrangement of operatic airs, and (in conjunction with Jancourt) fantaisies-concertantes for oboe and bassoon. At the Paris Exhibition of 1855 Triébert obtained a medal for his adaptation of Boehm's contrivances to the oboe, and for improved bassoons. This skilled manufacturer and eminent artist succeeded Verroust as professor of the oboe at the Conservatoire in Apr. 1863, and retained the post till his death.

His brother, (2) FRÉDÉRIC (*b. circa* 1813; *d.* Paris, Mar. 1878), was his partner, and showed considerable inventive genius. He constructed bassoons after Boehm's system, a specimen of which may be seen in the Museum of the Conservatoire. He left a son, (3) FRÉDÉRIC, one of the best oboists of the French school. G. C.

TRIEMER, JOHANN SEWALD (*b.* Weimar, c. 1700; *d.* Amsterdam, 1761). He studied the violoncello under Eyllenstein and composition under Ehrhardt, and from 1727 under Boismortier in Paris. He went to Alkmar in 1729 and afterwards settled in Amsterdam. In 1739 he published a work on the rudiments of music, and composed sonatas for violoncello, and psalms (E. v. d. Straeten, *Hist. of Violoncello*; Q.-L.).

TRIHORIS, TRIORI, TRIHORY, TRIORY, an old Breton dance, long obsolete. Cotgrave describes it as 'a kind of British and peasantry daunce, consisting of three steps, and performed, by three hobling youths, commonly in a round.' It is mentioned by Rabelais (*Pantagruel*, bk. iv. chap. xxxviii.) and by his imitator, Noël du Fail, Seigneur de la Herrisaye, in chap. xix. of his *Contes et Discours d'Eutrapel* (1585). From this passage it would seem that it was a 'Basse Danse,' and was followed by a 'Carole'—a Low Breton name for a dance in a round, or according to Cotgrave 'a kind of daunce wherein many daunce together.'¹ (See TOURDION.) Du Fail says the dance was 'trois fois plus magistrale et gaillarde que nulle autre.' It was the special dance of Basse Bretagne, as the PASSEPIED was of Haute Bretagne. Jehan Tabourot, in his *Orchésographie* (see ARBEAU), says the Trihoris was a kind of Branle, and that he learnt it at Poitiers from one of his scholars. He gives the following as the air to which it was danced:

¹ Compare the Italian 'Carola,' described in Symonds' *Renaissance in Italy*, vol. iv. p. 261, note.

(2) For 'trio,' in the sense of the central or contrasting section of a symphonic movement, see MINUET; SCHERZO; and MARCH.

TRIONFO DI DORI, IL. The title of a famous collection of madrigals, first published in Venice by Gardano in 1592. There are twenty-nine madrigals by as many Italian composers, and all are in six parts. All end with the refrain, 'Viva la bella Dori,' and the names of the writers of the words are given as well as those of the composers of the music. The contents are as follows:

Hippolito Bacundi. Un giorno a Pale sacro.
Hippolito Sabino. Dove sorge placevole.
Horatio Vecchi. Hor ch' ogni vento tace.
Giovanni Gabrieli. Se cantano gl' augelli.
Alfonso Preti. Ninfe a danzar venite.
Luca Marenzio. Leggadre Ninfe e pastorelli amanti.
Giovanni de Macque. Vaghe Ninfe selva saggio.
Horatio Colombano. All' apparir di Dori.
Giovanni Cavaccio. Giunta qui Dori.
Annibale Stabile. Nel tempo che ritorna Zefiro.
Paolo Bozzi. All' ombra d' un bel faggio.
Tiburdo Massalio. Su le fiorite sponde.
Giovanni Matteo Asola. In una verde spiaggia.
Giulio Eremita. Smeraldi eran le rive.
Filippo de Monte. Lungo le chiare linfe.
Giovanni Croce. Ove tra l' ombra e i fiori.
Pietr' Andrea Ronini. Quando lieta e vezzosa.
Alessandro Striggio. Eran Ninfe e Pastori.
Giovanni Florio. Più trasparente velo.
Leon Leoni. Di pastorali accenti.
Felice Anerio. Sotto l' ombroso speco.
Gasparo Zerto. L' inargentato lido.
Ruggiero Giovanelli. Quando apparisti.
Gasparo Costa. Mentre a quest' ombra intorno.
Lello Bertani. Dori, a quest' ombra e l' aura.
Ludovico Balbi. Mentre Pastori e Ninfe.
Giacomo Gastoldi. Al mormorar de' liquidi cristalli.
Costanzo Porta. Da lo spuntar de' matutini albori.
Giovanni Palestrina. Quando dal terzo cielo.

Two complete copies (sets of partbooks) are known, at Cassel and Bologna. In 1596 Phalèse of Antwerp brought out a new edition, retaining Gardano's dedicatory letter to Leonardo Sanudo. Incomplete parts are at Ghent. At Augsburg and Vienna there are complete sets of Gardano's reissue of 1599, and incomplete parts of Phalèse's edition of 1601 are at Ghent and in the R.C.M. In 1612 Johann Littich prepared for the press (dying before it could be brought out), a selection of sixteen of the madrigals, which were published at Nuremberg with the title 'Musicalische Streitkrantzlein,' and translations of the words into Latin and German. In the following year, Salomon Engelhart, Littich's successor at the Gymnasium of Count Mansfeld, brought out the remainder, which Littich had also prepared, reprinting the contributions of Croce and Luca Marenzio, and adding one German madrigal by Johann Leo Hasler. There are complete copies of the first set, and incomplete copies of the second, at Berlin and Grimma. Another Antwerp edition appeared in 1614, and in 1619 a new German translation of the words by Martinus Rinckhardt was printed together with the music at Leipzig (complete parts at Grimma). The work derives its chief interest from the fact that the more famous English publication, 'The TRIUMPHS OF ORIANA' (q.v.), was suggested, as to scheme and the recurring refrain, by the Italian series of madrigals.

BIBL.—DR. EMIL VOGEL, *Bibliothek der gedruckten weltlichen Vocalmusik Italiens.* M.

TRIPLE TIME (Fr. *mesure à trois temps*; Ger. *Trippeltakt*), see TIME.

TRIPLET (Fr. *triolet*; Ger. *Triole*; Ital. *terzina*). In modern notation each note is equal to two of the next lower denomination, and the division of a note into three is not provided for, although in the ancient 'measured music' it was an important part of time (see NOTATION; TIME). On this account notes worth one-third of the next longer kind have to be written as halves, and are then grouped in threes by means of curved lines, with the figure 3 usually placed over the middle note as an additional distinction. Such a group is called a triplet, and is executed at a slightly increased speed, so that the three triplet-notes are equal to two ordinary notes of the same species: for example—

BEETHOVEN, Sonata, Op. 2, No. 1.

Triplets may be formed of notes of any kind, and also of rests, or of notes and rests together.

BEETHOVEN, Sonata, Op. 22.

So also a group of two notes, one twice the length of the other, is read as the equivalent of a triplet, provided it is marked with the distinctive figure 3.

SCHUMANN, Trio, Op. 63.

In instrumental music, when the fingering is marked, there is some risk of the figure 3 of a triplet being confounded with the indication for the third finger. To obviate this, the two figures are always printed in different type, or, better still, the triplet figure is enclosed in brackets, thus (3). This plan appears to have been first introduced by Moscheles, in his edition of Beethoven, published by Cramer & Co.

Groups of a similar nature to triplets, but consisting of an arbitrary number of notes, are also frequently met with in instrumental music. These groups, which are sometimes called *quintolets*, *sextolets*, etc., according to the number of notes they contain, always have their number written above them, as an indication that they

are played at a rate different from ordinary notes of the same form (usually quicker). Their proper speed is found by referring them to ordinary groups of the same kind of notes; thus, if the general rhythm of the bar indicates four semiquavers to a beat, as in common time, a group of five, six or seven semiquavers would be made equal to four semiquavers, while a group of eight notes of the value of one beat would of course be written as demisemiquavers; if, however, the natural grouping of the bar were in threes, as in 9-16 time, a group of four or five (or sometimes two) semiquavers would be equal to three, while a group of six would require to be written as demisemiquavers. On the performance of triplets in certain passages in 18th-century music, see DOT. F. T.

TRISTAN UND ISOLDE, music-drama ('eine Handlung') in 3 acts, words and music by Wagner; produced Munich, June 10, 1865; Drury Lane (Franke & Pollini's German Opera), June 20, 1882; New York, Metropolitan Opera House, Dec. 1, 1886; in English, Carl Rosa Co., Liverpool, Apr. 15, 1898; in French, Théâtre Nouveau, Paris, under Lamoureux, Oct. 28, 1899. G.

TRITONE, the interval of the augmented fourth, consisting of three whole tones, whence the name is derived. In pure ecclesiastical music the use of the *Tritonus* or augmented fourth is strictly forbidden; as is also that of its inversion, the *Quinta falsa* or diminished fifth. It is scarcely necessary to say that the presence of these intervals is felt, whenever F and B are brought either into direct or indirect correspondence with each other, whatever may be the Mode in which the contact takes place. In the hexachordal system of Guido d' Arezzo, B, the third sound of the *Hexachordon durum*, was called MI; and F, the fourth sound of the *Hexachordon naturale*, was called FA. Mediæval writers, therefore, expressed their abhorrence of the false relation existing between these two sounds, in the proverb—

Mi contra fa est diabolus in musica.

W. S. R.

TRITONIUS, PETRUS (b. ? Bozen or Sterzing, before end of 15th cent.) (PETER TREIBENREIF or TRAYBENRAIFF),¹ belonged to a family of some consequence long settled in the Etschthal of Austrian Tyrol. He was born some time before the end of the 15th century, and the name being found about that time in the two Tyrolese towns of Bozen and Sterzing gives some colour to the conjecture that one or the other was his birthplace. He studied at the University of Padua, where he took the degree of Master of Arts; and then, following the custom of the humanist scholars of the time, adopted the Latin name of Tritonius. Return-

ing home, he was appointed teacher of Latin, possibly also of Music, to the Cathedral School of Brixen. In Italy Tritonius had made the acquaintance of the classical humanist scholar Conrad Celtes, who was afterwards appointed University Professor at Vienna, and under the patronage of the Emperor Maximilian had founded a learned Society (*Literaria Sodalitas Danubiana*) for the furtherance of literature and art on the new classical humanist principles. Tritonius became a member of this Society, and was invited by Celtes to settle in Vienna to be the instructor to the Society in song and instrumental music. At the instigation of Celtes Tritonius set a considerable number of the Odes of Horace to music in simple note for note counterpoint and strict observance of classical metre and quantities. Celtes had these sung by his pupils at the end of his own prelections on Horace. These and similar compositions of other Latin poems and church hymns by other members of the Society were printed and published in 1507 by Erhart Oeglin of Augsburg under the title:

'Melopoeae sive Harmoniae tetracenticae super xxlii genera carminum heroico-rum elegiacorum, lyricorum et ecclesiasticorum hymnorum per Petrum Tritonium et alios doctos sodalitates literariae nostrae musicos secundum naturas et tempora syllabarum et pedum compositae et regulatae ductu Chunrad Celts Feliciter impressae.'

At the foot of the title the following direction is appended:

'Optime musiphile, strophos id est repetitiones carminum collisiones syllabarum, conjugationes et connubia pedum pro affectu animi, motu, et gestu corporis diligenter observa.'

The whole title is printed in the form of a cup with the words added 'Krater Bachi.' Later in the same year Oeglin published a second impression of the settings by Tritonius alone, nineteen in number, with the shorter title, 'Harmoniae Petri Tritonii super odis Horatii Flacci.' These two publications appear to be the earliest specimens of German music-printing with movable types, the first in folio with wooden types, the other in 4to with metal. The settings by Tritonius must have met with much favour at the time. In 1532 and again in 1551 they were republished by Egenolph of Frankfurt. The style found many imitators, and a greater musician like Ludwig Senfl did not disdain to take the tenor of the settings by Tritonius and provide them with other harmonies. Freiherr von Liliencron described in Chrysander and Spitta's *Vierteljahrsschrift* for 1887 and afterwards separately published with a preliminary dissertation the settings of these Horatian Odes by Tritonius, Senfl and Hofheimer, and also a 'Schulausgabe' with transcription in modern score. The main importance of these works consists in the fact that they gave the first suggestion to the setting of German Chorals and afterwards of psalm

¹ See Dr. F. Walder, Eitner's *Monatshefte*, xxvii. 13, 14.

tunes generally, in simple four-part note for note counterpoint.

After the death of Celtes in 1508, the literary society which he had founded was dissolved, and Tritonius returned to the Tyrol and undertook the direction of the Latin School at Bozen. In 1521 he was settled at Schwatz on the Inn, not far from Innsbruck, where he was chiefly engaged in literary work.

J. R. M.

TRITTO (TURITTO ?), (1) GIACOMO (b. Altamura, near Bari, Apr. 2, 1733; d. Naples, Sept. 26 ?, 1824), studied under Cafaro and N. Sala at the Conservatorio della pietà de' Turchini, where he became a teacher in 1780, co-director with Paisiello in 1798, and Sala's successor as professor of counterpoint and composition in 1800. Between 1764 and 1815 he composed 50 operas, and wrote also a considerable amount of church music, including a number of important works, which all remained in MS. La Fage credits him with the introduction of the *Finale* in opera, which was hitherto attributed to Piccini. He wrote also several theoretical works. (See *Q.-L.*) His son (2) DOMENICO (b. Naples, June 1, 1776; d. Loreto, Dec. 1851), was also a composer of operas, church music and a symphony (*Q.-L.*; *Riemann*).

TRIUMPHES OF ORIANA, THE, a collection of madrigals written in honour of Queen Elizabeth and edited by Thomas Morley. The title-page of the original edition bears the date 1601, but the entry of the book in the Stationers' registers shows that it was not actually published until 1603, after the queen was dead. There is no reason to doubt that the collection was modelled on the TRIONFO DI DORI (*q.v.*), and the refrain, 'Long live fair Oriana,' corresponds with 'Viva la bella Dori' so closely that one of the Dori set, that by Giovanni Croce, was adapted to English words, and reprinted from the second book of MUSICA TRANSALPINA (*q.v.*). The contents of the collection are as follows:

Michael Este. Hence stars, a 5 (printed at the back of the dedication, with a note explaining that it was sent in too late for inclusion in the proper place).

Daniel Norcome. With angel's face, a 5.

John Mundy. Lightly she tripped, a 5.

Ellis Gibbons. Long live fair Oriana, a 5.

John Benet. All creatures now are merry-minded, a 5.

John Hilton. Fair Oriana, beauty's Queen, a 5.

George Marson. The Nymphs and Shepherds danced Lavalto's, a 5.

Richard Carlton. Calm was the air, a 5.

John Holmes. Thus Bonny-bonny, a 5.

Richard Nicolson. Sing Shepherds all, a 5.

Thomas Tomkins. The Fauns and Satyrs tripping, a 5.

Michael Cavendish. Come gentle swains, a 5.

William Cobbold. With wreaths of rose and laurel, a 5.

Thomas Morley. Arise awake, a 5.

John Farmer. Fair Nymphs, a 6.

John Wilbye. The Lady Oriana, a 6.

Thomas Hunt. Hark, did ye ever hear so sweet a singing? a 6.

Thomas Weekes. As Vesta was from Latmos hill descending, a 6.

John Milton. Fair Oriana, a 5.

Ellis Gibbons. Round about her chariot, a 6.

G. Kirbye. Bright Phoebus, a 6. (With angel's face.)

Robert Jones. Fair Oriana, a 6.

John Lisley. Fair Cithæra, a 6.

Thomas Morley. Hard by a crystal fountain, a 6.

Edward Johnson. Come blessed bird, a 6.

Giovanni Croce. Hard by a crystal fountain, a 6.

Thomas Bateson. When Oriana walked to take the air, a 6.

Francis Pilkington. When Oriana walked to take the air, a 2 a 5.

Thomas Bateson. Hark, hear you not? (Oriana's Farewell), a 5.

Michael East's contribution came too late for insertion in the proper place, and was printed at the back of the dedication to Charles Howard, Earl of Nottingham, Lord High Admiral. The original number was twenty-six, for Bateson's two and Pilkington's one were not in the original edition; adding these three pieces, the last two of which change the refrain to 'In Heaven lives Oriana,' we get the number twenty-nine, the same as that of the Trionfo di Dori. There were two issues of the first edition; Kirbye's madrigal in one has the words 'With angel's face,' the same words that Daniel Norcome used, and in the other the same music is set to 'Bright Phoebus.'³

There have been several reprints of the 'Triumphes' beginning with that of William Hawes (1814) and including an edition by Lionel Benson (Novello) and ENGLISH MADRIGAL SCHOOL, vol. xxxii. M., with addns.

TROCHEE (Lat. *trocheus chori*). A metrical foot, consisting of a long syllable followed by a short one. See METRE.

TROILO, ANTONIO, a 16th-17th century town musician of Vicenza, wrote 4-5-part instrumental canzonas (1606); 'Sinfonie, scherzi . . . a 2 voci,' to sing and play on any instruments (1608); also 10 psalms a 5 v. and a Magnificat in G. B. Biondi's 'Salmi intieri' (1607) (*Riemann*; *Q.-L.*).

TROJANO, MASSIMO (b. Corduba da Napoli, 1st half of 16th cent.), poet, comedian and musician, a male alto in the chapel of Jacob Fugger, c. 1568. In the same year he was appointed to the electoral chapel at Munich. In Apr. 1570 a warrant was issued against him as being connected with the murder of the violinist Battista Romano, and he fled the country. He wrote 4 books of 'Canzoni alla Napolitana,' a valuable collection of compositions by composers attached to the Bavarian court (Venice, 1569), and an account of the nuptials of William V., Duke of Bavaria in 1568, which appeared in a German translation by F. Wirthmann (1872) (*Q.-L.*).

TROMBA. The Italian word for TRUMPET (*q.v.*).

TROMBA DA TIRARSI, a form of trumpet used by Bach in his church cantatas which was fitted with a slide to 'draw out' (*tirarsi*), thereby enabling the player to obtain some of the missing notes of the scale in the ordinary harmonic series. It is generally supposed to have been identical with the little soprano trombone (PLATE LXXXIII. No. 7) used in Germany during the 18th century; but Altenburg (*Trompeter- und Pauker-Kunst*, 1795) compares it with the alto trombone. In the museum of the Berlin Hochschule für Musik there is a specimen of an ordinary D trumpet, by Hans

³ The writer concluded that 'Bright Phoebus' belonged to the second issue, but Fellowes (*English Madrigal Composers*, p. 248) supports the opposite view with careful evidence. c.

¹ First printed in Bateson's first set, in 1604.

² First printed in Pilkington's first set, 1613.

Veit of Nuremburg, 1651, in which the smaller end is fitted with a single sliding tube (cf. Catalogue, No. 639: Illustration Plate 24). This may be a primitive 'tromba da tirarsi', anticipating Hyde's invention by 150 years (see TRUMPET); or it may be merely an early attempt to supersede the use of crooks for putting the instrument in a lower key as noted by Praetorius (*Organographia*, 1618). A similar tuning slide is to be found in some of the early cornopeans or cornets of the 19th century. Bach also employs a 'corno da tirarsi'; but no details of a true 'slide horn' of his period are at present forthcoming, though such an addition to the horn was made by Dikhuth of Mannheim in 1812. (See TRUMPET.) F. W. G.

TROMBA MARINA (TRUMMSCHIEDT, BRUMMSCHIEDT, TYMPANISCHIZA, NONNENGEIGE, MARINE TRUMPET). A portable monochord played with the bow, probably the oldest bowed instrument known, and the archetype of all others. The country of its origin is uncertain, but is probably Germany. Once extensively employed in Germany and France as a popular instrument, and even used in the service of the church, it was almost disused early in the 18th century: but it figured in the 'Musique des Escuries' of the French monarchs, down to the year 1767: and L. Mozart, in his *Violinschule* (1756), describes it as then in use. It was in use later still in German nurseries.¹

The name Trummscheit or Trumbscheit is certainly derived from the word Trumba or Tromba—a Trumpet (compare the old German Trummete for Trompette and Krumhorn for Krumhorn); the second syllable 'scheit' signifies 'a piece of wood.' The name Tympanischiza is very curious and has created some misunderstanding. It is used by Glareanus in his *Dodecachordon* Lib. 1 (1547) as an attempt to latinise the word Trummscheit: the writer evidently imagined that the first syllable of the popular name was connected with an old German form of the word Trommel—a drum, while 'schiza' is the nearest he could attain to 'scheit.' There is no reason to believe that the word existed outside his treatise, which Praetorius in his *Syntagmum* (1618) carefully copies in this respect, although, as he says, the instrument itself was commonly used in Germany, France and the Netherlands. Such a barbaric name is unknown to the earlier writers Virdung, Agricola or Luscinius, though the last mentioned treatise is also written in Latin.

Most existing specimens date from the latter half of the 17th century. In its latest form the instrument has a fiddle head fitted with an iron screw. Some heads have rack-wheels to facilitate tuning; others have iron screw button

¹ Rühlmann, *Geschichte der Bogeninstrumente*, pp. 29, 31.

tops, a double iron ring working on the screw, into the outer ring of which the string is knotted. It has a round neck or handle about the size of a broomstick, dove-tailed into a top block or shoulder which forms the end of the body. The latter is a resonant box broadening towards the bottom, where it rests on the ground, and having a thin pine table, quite flat. The back or shell of the box is polygonal, being built up of very thin straight staves of maple. The number of staves in the shell is usually either five or seven: the joints are fortified internally, and sometimes externally also, with slips of cartilage paper or vellum.² Three pine bars are glued transversely across the table before it is glued to the outer edges of the shell. The table is sometimes pierced with a rose. In some specimens the box is constructed in two separate portions. In others, of later date, the bottom of the box spreads out at the edges like the bell of a trumpet. The total length is usually somewhat less than 6 feet; some specimens are a few inches over that length. (See PLATE LXXXVII. No. 2.)

The string is a very thick violoncello D string, or a double bass G string, stretched over a peculiar bridge. This is of hard and close-grained wood, and rests firmly on the table with the right foot only, upon which side the string bears with its whole weight. Properly, the bridge should be shaped something like a shoe, the heel being the right foot, the toe the left. The left foot touches the table lightly: and when the string is put in vibration this foot rattles rapidly on the table, like an organ reed. To increase the tone, a thin metallic plate is sometimes attached to the foot, and some bridges have a mechanical apparatus for adjusting its tension.

The marine trumpet is played with a heavy violoncello bow, plentifully rosined. (See PLATE LXXXII.) The open string is ordinarily tuned to CC: and when sounded with the bow, it yields a powerful note, of harsh and nasal character, something like an 8-feet wooden organ reed-pipe. Played by stopping in the ordinary way, the marine trumpet produces tones far less melodious than the bray of an ass. But this is not its legitimate use. It is properly played wholly in natural harmonics³ (see ACOUSTICS, subsection HARMONIC SERIES); hence the following scale arises:

Rühlmann omits the three last notes from the scale: but the writer has seen them marked on several specimens. The facility with which the

² In Mersenne's time, and doubtless in the original instrument, the box was a shallow triangular shape, tapering like a sword-sheath, and open at the lower end.

³ The bow must be drawn across the string a short distance below the upper nut, as described by Mersenne, and not between the thumb (or fingers) and the bridge as often wrongly depicted. F. W. G.

LXIV

Tromba Marina

A TRUMPET MARINE PLAYER

Bonnani's Gabinetto Armonico-Edition, 1776

marine trumpet yields the natural harmonics is due to its single string and its lopsided bridge. Paganini's extraordinary effects in harmonics on a single string were in fact produced by temporarily converting his violin into a small marine trumpet. As is well known, that clever player placed his single fourth string on the treble side of the bridge, screwing it up to a very high pitch, and leaving the bass foot of the bridge comparatively loose. He thus produced a powerful reedy tone, and obtained unlimited command over the harmonics.¹ According to information procured by Rühlmann from Marienthal, the Trummscheidt will bear lowering to B₇ and raising to E₇, but no more. According to him, it can also be made to yield the notes D and F in the lower octave, though less distinctly. The nuns use the instrument in their choral singing. On the festivals of the Church, and sometimes as a special compliment to a new-comer on her matriculation, they jubilate upon four marine trumpets accompanied by drums; one takes a principal part, the others are secondary.²

An inspection of the scale will explain how the marine trumpet became *par excellence* the Nonnen-geige: its scale corresponds with the female voice, with which its tone, resembling that of a clarinet, but more piercing and nasal, has something in common. Added to this it is extremely easy to play: the neck being rested on the breast or shoulder, and the string lightly touched with the thumb where the letters are marked on the neck, it yields its few notes with absolute accuracy. It was anciently used as a street instrument by mendicant musicians: and those who have heard it will agree with an ancient author that it sounds best at a distance. M. Jourdain, in a well-known passage in the *Bourgeois Gentilhomme* (1670), expresses a preference for it, thereby proclaiming his uncultivated taste.³ About the end of the 17th century the acoustical peculiarities of the Trummscheidt were the object of much investigation by the learned societies of England and France: the reader who desires to pursue the subject will find the necessary clues in Vidal and Hawkins. The name 'marine trumpet' (tromba marina) was probably given to the Trummscheidt on its introduction into Italy, on account of its external resemblance to the large speaking-trumpet used on board Italian

vessels, which is of the same length and tapering shape. A more recent theory is that, as the curious trembling bridge, which gives the instrument its trumpet-like tone, was added in the latter half of the 15th century, it was either due to the celebrated French trumpeter of the period, Marin or Maurin, or else the instrument with this improvement was named in his honour.

Specimens are not uncommon: several will be found in the museums of Bologna, Munich, Salzburg, Nuremberg, etc., and there are two good ones in the collection of the Conservatoire in Paris, one of which has sympathetic strings attached to the table internally. The Victoria and Albert Museum possesses a handsome but rather undersized French specimen (oddly described in the Catalogue as 'probably Dutch' also having sympathetic strings inside).

The Trummscheidt, in the Middle Ages, was sometimes fitted with two, three, and even four strings, one or more of which were Bourdons or drones. Illustrations of the 14th and 15th centuries show it as held and played at the shoulder, the open end pointing outwards like a trumpet.

E. J. P.; addns. F. W. G.

It is quite evident that the instrument was made in a variety of forms, and probably few specimens existed precisely alike. Grassineau, in his *Musical Dictionary*, 1740, describes it as having 'three tables which form its triangular body'; also that the neck was very long, and the single string very thick, and not stopped by pressure, but merely gently touched with the thumb. He says its sound was scarcely distinguishable from that of a trumpet, and that it had the trumpet's defect of some notes being either too flat or too sharp. One of its peculiar qualities of tone was by reason of the bridge being firm on one side and tremulous on the other.

In Michael Praetorius's *Syntagma musicum* it is engraved on Plate XXI. under the title the 'Trumscheit.' This is apparently about 7 feet long and, as Grassineau describes it, formed by three tapering boards placed triangularly, and open at the bottom. There are four circular sound-holes, one covered by an ornamental 'rose,' but it differs from the usual ones described by having four strings of varying length tuned by pegs inserted in a peg-box similar to that of an ordinary violin.

F. K.

In the year 1667 Pepys records in his diary that he heard 'one Monsieur Priu play on the trump-marine, which he do beyond belief.' The Frenchman's instrument was fitted with sympathetic strings inside which caused Pepys to hear 'a whole concert of chords together at the end of a pause,' but he would not let the inquisitive diarist into the secret. In 1699 a book of 'Trumpet tunes, ayres, marches and minuets' was published in London for the

¹ The interesting experiments of Sir Wm. Huggins, printed in the *Transactions of the Royal Society*, tend to show that the principle of the violin bridge is radically identical with that of the marine trumpet bridge, one foot serving as a *point d'appui*, the other as the conductor of vibration.

² The quartet of marine trumpets appears to be of ancient date. Hawkins (ch. 159) quotes from the *London Gazette*, Feb. 4, 1674, an advertisement of 'A rare Concert of four Trumpets Marine, never heard of before in England,' to be heard daily at the Fleeca Tavern near St. James's.

³ The music-master recommends the citizen to have a concert at his house every Wednesday or Thursday, and thus describes the requirements: 'Il vous faudra trois voix, un dessus, une haute-contre, et une basse, qui seront accompagnées d'une basse de viole, d'un théorbe, et d'un clavier pour les basses continues, avec deux dessus de violon pour jouer les ritornelles.' M. Jourdain: 'Il y faudra mettre aussi une trompette marine. La trompette marine est un instrument qui me plaît, et qui est harmonieux.'

'molk-trumpet.' The following extracts from a 17th century MS. entitled 'Sonata per la trompa marina' by Don Lorenzo de Castro will show the sort of music played upon this interesting instrument:

F. W. G.

TROMBA SPEZZATA, an instrument of the trumpet kind, formerly popular among the Italian peasantry. It was generally made of two slides, and was, probably, originally identical with the old English Sackbut. F. K.

TROMBETTI, ASCANIO, a Bolognese musician of the last quarter of the 16th century. On the title-page of his chief work published at Venice, 1589, he is described as Musico della illustrissima Signoria di Bologna. The work itself consists of motetti accomodati per cantare e far Concerti a 5, 6, 7, 8, 10 e 12, and shows the influence of the Venetian style of Andrea and Giovanni Gabrieli. From this work L. Torchi, in 'L' arte musicale in Italia,' vol. i., has reprinted 'Paratum est cor meum' a 5, and 'Misericordiae tuae' a 12, divided into three choirs. Several of these motets were also taken over into the German collections of Lindner in 1590 and Caspar Hasler 1600 and 1613. Other publications of Trombetti are Napolitane a 3, Venice, 1573, and two books of Madrigals a 4 and 5, Venice, 1583, 1586.

J. R. M.

TROMBONCINO, BARTHOLOMAEUS, a fertile composer of Frottole—the popular songs of that day—belonged to Verona, and was probably born in the latter half of the 15th century, since his works are contained in Petrucci's nine books of Frottole dating from 1504. He was in Mantua in 1487–95, being in the service of the Duke in 1494 and going to Venice in the follow-

ing year. In 1499 he was at the courts of Vicenza and Casale, and in 1501 again at Mantua, living there until 1513, when he went to Ferrara (Q.-L). The lists given in Eitner's *Bibliographie*, pp. 879–82, contain 107 of his compositions to secular and 2 to sacred words, all for 4 voices, as well as 9 Lamentations and 1 Benedictus for 3 voices. One of the Lamentations is reprinted in vol. i. of Torchi's 'L' arte musicale in Italia.' G., addns.

TROMBONE, formerly styled SACKBUT (Fr. and Ital. *trombone*; Ger. *Posaune*), a brass instrument characterised by its 'slide' which affecting the length of the tube instantaneously alters the pitch.

Tenor trombone in its normal position, sounding

Extended so as to produce

The Italian term trombone signifies a big trumpet, and another Italian name is Tromba Spezzata, i.e. 'broken trumpet.' For the etymology and use of the name 'sackbut' see under that heading.

It should be noted that the name trombone is specially applicable to an instrument the shifting slide of which is sufficiently long to lower the pitch three and a half tones, whereas the older instruments or sackbuts were more limited in this respect.

The two chief groups of brass instruments are the trumpets and horn classes, the greater length of tubing being in the one class cylindrical and in the other conical, with corresponding difference of tone quality. Differentiating in more detail, trombones are distinguished from trumpets by having a greater fullness of tone in the middle and lower registers, the 'tessitura' of trumpets lying higher than that of trombones of the same length and fundamental pitch. For instance, the trumpet in E_♭ differs in calibration but very slightly from the E_♭ alto trombone, but the difference in character is that between a soprano and an alto voice. This difference is chiefly due to the larger mouthpieces used on trombones, by means of which the lower notes are more easily produced, with a certain dignity and solemnity of tone which stands contrasted with the brilliancy of the trumpet. This difference, however, is merely one of degree, and is not obtrusive, therefore the trombone, when instruments are grouped

in families, is properly regarded as the natural bass of the trumpet.

DESCRIPTION.—The trombone is a very simple instrument, consisting essentially for about two-thirds of its length of cylindrical tubing, the remaining third being occupied by the gradual expansion of the bell. It might be regarded as perfect were it not that the great advantage obtained by the slide is to some extent interfered with by the fact that the outer or moving slide is necessarily rather larger than the inner one over which it works. In consequence of this difference of diameter certain notes are rather apt to 'break' and require humouring. The mouthpiece is usually cup-shaped, but sometimes more conical, and is held steadily to the player's lips by the left hand, which, chiefly, bears the weight of the instrument, the right hand controlling the movement of the slide and aiding in the balance. For the shorter shifts the movement should be almost entirely from the wrist, but the longer ones require more or less extension of the arm. For the bass trombone the full reach of the arm is insufficient, however, and is increased by means of a jointed handle.

To obviate the great extension required for the extreme shifts, the whole slide has been sometimes doubled, and by this means the shifts are reduced to half-length. This arrangement is necessary on the contrabass trombone in C or B \flat , and has been used on the bass instrument in F or E \flat . Its application, however, to the tenor trombone and to the bass in G, although not unknown, serves no useful purpose, and cannot be considered an improvement.

By the introduction of the slide, it is obvious that the trombone, alone of all the wind-family, has the accuracy and modulative power of stringed instruments. Its notes are not fixed, but made by ear and judgment. It is competent to produce at will a major or minor tone, or any one of the three different semitones.

POSITIONS AND COMPASS.—There are seven 'positions' for the movable slide, successive elongations of the tube, each of which produces its own harmonic series. The seven positions may be said in a general way to be each a semitone lower than the last. The first is with the slide entirely undrawn. But in the hands of a good player, the length of slide used for each successive position is not the same. But a judicious player, with a sensitive ear, has the remedy in his own power; and the mechanism as well as the mental sensation of trombone-playing, more nearly approaches that of voice production than that of any other instrument.

The trombone has been made in every register from soprano to contra-bass and in every key; those now generally used are the tenor trombone in B \flat , the bass trombone in G or F and, more rarely, E \flat , and the contra-

bass trombone. The alto trombone in E \flat (sometimes styled *trombonino* in Italian; Ger. *Altposaune*) is to all intents and purposes now obsolete, as are such other varieties as the 17th-century discant trombone, an octave above the tenor, used by Purcell in the canzona for the funeral of Queen Mary.

The following table gives the slide position for tenor and bass trombones:

TABLE OF TROMBONE POSITIONS

	Tenor.	G Bass.	F Bass.
First position . . .	B \flat	G	F
Second position . . .	A	F \sharp	E
Third position . . .	A \flat	F	E \flat
Fourth position . . .	G	E	D
Fifth position . . .	F \sharp	E \flat	D \flat
Sixth position . . .	F	D	C
Seventh position . . .	E	C \sharp	B

It is here seen that the player has in use the equivalent of seven different instruments, any one of which can be converted into any other by a single movement of the right arm; though some sequences involve more change, and are consequently of greater difficulty than others.

The harmonic series is the same as that of the horn and other cupped instruments. The lowest tones or fundamentals are somewhat difficult to produce, and are usually termed pedal notes. The available scale therefore begins with the second harmonic, runs without break to the sixth, omits the dissonant seventh harmonic, and may be considered to end with the eighth, though some higher notes are possible, especially in the longer positions.

The complete chromatic compass of the tenor

trombone is from  to  two or three semitones higher being also possible, while the three available pedal notes are

The contrabass trombone as introduced by Wagner was in B \flat , an octave lower than the tenor trombone. It has been made in England in C, a tone higher, unfortunately placing the

low E  required in the 'Ring' out of

reach. But the serious difficulty about this instrument is the strain on lungs and lip in the production of such deep tones. They are undoubtedly more easily sounded on the larger bore instruments of the saxhorn type.

THE VALVE TROMBONE.—The efficiency of the slide as applied to the trombone leaves nothing to be desired, and therefore the application of the valve action to this instrument as a substitute for the slide cannot be regarded as an improvement. The long study

and practice required for the mastery of the slide trombone left the way open for an instrument more easily learnt, hence the adaptation of the valve to the trombone family, and the instrument so furnished is largely used in military and other wind bands. It is true that the valve trombone has not quite the brilliancy of the slide, but it is a mistake to class it with the tenor and baritone saxhorns, as is sometimes done.

The usual number of valves is three, as on saxhorns, but the six-valve system, introduced by Adolphe Sax in 1850, has been applied to the trombone as well as to other instruments. A seventh valve, lowering the pitch from B \flat to F, has been added to an instrument made for Sir Henry Wood.¹ (See VALVE.)

Parts for the trombone are written as if sounded, the tenor trombone needing the tenor clef for the higher register; for the alto trombone the alto clef was used. It is usual to find three trombones, two tenor and a bass (or in France, three tenor, the third being preferably of larger calibre than the first and second), in the ordinary orchestra; the addition of a bass-tuba for four-part harmony is normal, although by no means completely satisfactory from the point of view of pure tone-colour. In such cases the tenor trombones will have a stave to themselves, the bass trombone and tuba taking another.

HISTORY.—Although the story respecting the finding of two Roman sackbuts in 1738 has been completely disproved, there is reason to credit the use of the slide as a means of slightly altering the pitch of an instrument, or even (when freely moving) of introducing tones foreign to those obtainable from its normal length, with some antiquity. Some such use can be traced among Eastern nations and in ancient times, but the evidence of gradual development cannot be introduced in a brief article. It must suffice to say that by the end of the 14th century the doubled slide was in use, and that in Virdung's *Musica getutscht* (published in 1511) there is a drawing of a Busaun (posaune or trombone) very similar in its general proportions to the present-day instrument, having the slide sufficiently long to give a 'shift' of three and a half tones, and therefore a complete chromatic scale. Towards the end of the 15th century there was a famous player and maker, Hans Neuschel of Nuremberg, whose work was continued by his sons, Hans and Jorg. (See *PLATE LXVIII.* No. 4.)²

It is noticeable that whereas the trumpet was regarded in the Middle Ages as an instrument reserved for the service of royalty and the

nobility, the trombone was from the first more freely employed by the various town-bands in festivals and pageants. Its use in churches, orchestras and town-bands was universal in Germany, Krüger publishing in 1885 'Psalmody sacra,' which contains four-part chorals with organ accompaniment and from four to six trombone parts.

There is an excellent representation of an angel playing a slide trombone in a ceiling-picture given in the appendix to Lacroix (*Arts de la Renaissance*), and in one replica of Paolo Veronese's great 'Marriage of Cana' (not that in the Salon Carré in the Louvre) a negro is performing on the same instrument. Michael Praetorius, in the *Theatrum seu Sciagraphia instrumentorum*, dated 1620, gives excellent figures of the Octav-Posaun, the Quart-Posaun, the Rechtgemeine Posaun, and the Alt-Posaun.

In this country, during the Tudor and Stuart reigns, the English school of playing was in high repute. Henry VIII. had ten players, and Mary and Elizabeth each maintained four. Towards the end of the 18th century, however, the interest taken in the instrument, or perhaps merely the number of players, appears to have fallen low, for Burney (*Commemoration of Handel*, 1784) relates the difficulty experienced in obtaining players on the sackbut or double trumpet, the only performers to be found in England being the six German musicians of the royal band. Handel and Bach used the trombone. For a time it appears to have been neglected, possibly owing to the improved French horn. Gluck and Mozart, however, wrote for it in opera, and Beethoven introduced it into the symphonic orchestra first in the finale of his symphony in C minor.

TROMLITZ, JOHANN GEORG (b. Gera, 1726; d. Leipzig, Feb. 1805), flautist, composer and flute manufacturer, composed concertos, sonatas and solos for the flute, songs and some instructive work (Tutor for Flute) (*Riemann*; Q.-L.).

TROMMEL, see DRUM.

TROPE. There arose in the 8th or 9th century, probably under Byzantine influence, a custom of making interpolations into the church chant, which in course of time spread through almost the whole range of liturgical song. Such interpolations had the generic name of trope. They speedily affected all the music of the Ordinary of the Mass; till then only one or two melodies of the simplest sort had been utilised for the congregational elements, viz. the Kyrie, Gloria, Credo, Sanctus and Agnus: now new melodies of an elaborate character grew up, and even the new melodies were further elaborated by tropes. Similarly

¹ For some years valve trombones were used in the Queen's Hall Orchestra, but now (1926), the slide instruments have been restored.

² This instrument, in the Rev. Canon F. W. Galpin's collection, dated MDLVII, by these makers, agrees very closely with the illustration in Virdung's work. Canon Galpin states that, as far as can be ascertained, this is the oldest specimen of the instrument in existence. (See *Proceedings of the Musical Association*, 1908-07, p. 1.)

long melodies were added in other parts of the Mass, particularly at the end of the Alleluia; and the ornamentation extended also on great occasions to special parts of the Hour services.

Soon a need arose for words to be fitted to these elaborate intercalated *vocalizzi*, and then the habit came in of intercalating words as well as music. The words were either adapted to the already existing music, or both words and music arose together. Thus the sequence developed as a trope, and acquired an independent position of its own (see SEQUENCE). Words were also fitted to Kyrie, Gloria in excelsis, Sanctus and Agnus in the form of tropes; but never to the Credo. Similarly, Epistles were 'forced' but not Gospels. In the Hour services the tropes invaded especially the closing respond of Matins, thus making a final peroration to that service; but as the development went on there was little left that had not suffered from these parasites. Even the short closing versicle and response 'Benedicamus domino, Deo gratias' was troped, and here as elsewhere the trope grew into an elaborate and almost independent composition. Then came a revulsion; as the 16th century drew on the tropes began to disappear, and finally, in the Tridentine revision of the Latin service-books all trace of tropes was banished, unless the one or two surviving sequences may be counted as such. But some tropes had sufficient merit to preserve their existence in a separate form; e.g. the popular melody set to 'Of the Father's love begotten'¹ is in origin a trope to the Sanctus, while the popular poem *O filii et filias*² is a trope to Benedicamus. W. H. F.

TROPPO, i.e. 'too much'; 'Allegro ma non troppo'—'Allegro; but not too much so.'

TROUBADOUR, THE, opera in 4 acts; words by Francis Hueffer; music by MacKenzie. Produced (Carl Rosa Co.) Drury Lane, June 8, 1886. M.

TROUBADOUR (Old Provençal nominative *trobair*, accusative *trobador*), 'inventor (of a melody),' the name given to the poet-musicians of Southern France whose art flourished from the end of the 11th till the end of the 13th century. The names of 460 troubadours have been recorded, and poems by the great majority of these are extant. Although the troubadours always set their lyrics to music, the melodies have in many cases been lost. Only 259 melodies have been preserved, whereas we have the words of over 2500 songs. The principal MSS. containing troubadour music are:

Milan, Biblioteca Ambrosiana, R 71 superiore (81 melodies).	
Paris, Bibliothèque Nationale, fonds français 22,543 (160 melodies).	
" " " " 844 (61 melodies).	
" " " " 20,080 (24 melodies).	

A few songs have been preserved in other MSS. For a complete list of the MSS. and of their contents, see J. B. Beck, *Die Melodien der Troubadours*, Strassburg, 1908.

¹ *Hymns Ancient and Modern*, No. 56.

² *Ibid.* No. 130.

Troubadour songs fall into two main categories, the 'poésie courtoise' and the 'chanson à personnages.' The latter genre was, however, little cultivated by the troubadours. It was far more popular with their Northern French contemporaries, the TROUVÈRES (q.v.).

'Courtly Poetry' consists chiefly of purely lyrical songs, *vers* and *canço*, the characteristic love-poetry of the troubadours. It comprises also the *sirventes*, a political or moral satire, the *tenso*, a dispute between two or more troubadours, the *partimen*, a debate on a given subject, and other minor genres.

The troubadours wrote their poems in stanzas and each stanza of a song was sung to the same melody (the only exception is the *descort*; see below). The music is therefore given at the beginning of each song in the MSS., the words of the first stanza being written underneath the notes. The remaining stanzas follow without music. The music is purely melodic, and there is no indication in the MSS. as to how the songs were accompanied. The melodies are written on staves, usually of four lines, in plain-song notation (MS. 20050 uses Messenian neumes). This shows the pitch of the notes quite clearly, but gives no clue as to the rhythmic principle on which the melodies are composed. Many different views have been put forth as to the way in which they should be interpreted as regards their rhythm. H. Riemann³ proposed a system which reduces all the melodies to phrases of four measures, each measure having four beats. P. Aubry⁴ and J. B. Beck,⁵ arguing from slightly different premises, both arrived at the same conclusion—namely that the melodies are written in the RHYTHMIC MODES (q.v.). Their arguments, though ingenious and supported by the evidence of a few songs that are actually written in proportional notation, were not found convincing by J. Combarieu,⁶ or by A. Gastoué,⁷ neither of whom considers that the music of the troubadours belongs to the *musica praeclara mensurata* of the Middle Ages.

As regards tonality, some of the melodies have a distinctly modal character, others approximate to the modern major mode.

The metrical form of the songs is very varied (it was a rule that no two songs should exactly correspond in form), but in the majority, the stanza falls into two main divisions, and the first half—often also the second half—contains two equal subdivisions, e.g. a b a b c c d, or a b a b c d c d. The musical form does not always correspond exactly with the metrical form, indeed it is rare to find a repeated musical phrase in the second half of the stanza. In many songs the melody flows on without

³ *Handbuch der Musikgeschichte*, 1905.

⁴ *La Rhythmologie musicale des troubadours et des trouvères*, 1907.

⁵ *Die Melodien der Troubadours*, 1908.

⁶ *Histoire de la musique*, vol. I. chapter xxi. 1923.

⁷ *Les Primitifs de la musique française*, 1922.

repetition through the stanza. A repeated melodic phrase in the first half is, however, often found. A closer approximation of musical to metrical form is found in the songs of the *trouvères*.

Guilhem Molinier, author of 'Las leys d'amors,' a 14th-century *Ars poetica* written for the 'most gay company' of Toulouse (see below), gives the following definitions of the principal genres, and of the style of music suitable to them:

'*Vers* is a poem in Romance (*i.e.* in the vernacular, not in Latin) which has from five to ten *coblas* (stanzas) with one or two *tornadas* (envoys). And it should treat of *sens* (intelligence, sense). He adds that since the word is derived from *verto*, 'which means turn or change,' a *vers* may also treat of other matters, 'for it is ever changing, for it treats of love or praise or blame.' 'A *vers* should have a slow quiet new melody, with fair and melodious rises and falls and with fair modulations and pleasing rests.'

'*Canso* is a poem which has from five to seven *coblas*. And it should treat principally of love or of praise. . . . A *canso* should have a slow melody, like a *vers*.'

'*Sirventes* is a poem which is served by *vers* and *canso* principally in two things, the one as regards the compass of its stanzas, the other as regards its melody.' That is to say, a *sirventes* copied the metrical form of some well-known song and was sung to its melody. 'And it should treat of blame or of general invective to reprove the foolish and the wicked, or it may treat, if desired, of the affairs of some war.'

'*Descort* is a very strange poem, and it may have as many *coblas* as the *vers*, that is from five to ten, and they must be singular, variable and not corresponding in rime, in melody and in language.' There is a *descort* by Raimbaut de Vaqueiras, of which the first five stanzas are written respectively in Provençal, Italian, French, Gascon and Portuguese, the last stanza, of ten lines, having two lines in each of these languages. Unluckily the music has not been preserved.

Melodies by 41 troubadours have been preserved, in addition to 27 anonymous songs. Many of the composers are represented by only one song.

The first of the troubadours—at all events the first whose works are extant—was Guilhem IX., Duke of Aquitaine (*d.* 1127). Only one of his melodies has survived.

Among the more famous troubadours may be mentioned:

Bernart de Ventadorn (*d.* 1195), the finest poet of them all. Forty-five of his poems and 19 of his melodies have survived. Some of the latter are extremely beautiful.

Bertran de Born (*d.* circa 1215), best known as a sower of discord between Henry II. of England and his sons. The majority of his 46

extant poems are *sirventes*, written to melodies by other troubadours. One original melody by him has survived.

Folquet of Marseilles (*d.* 1231), who wrote between 1180 and 1195, then renounced the world and died as Bishop of Toulouse. We have 27 poems and 13 melodies by him.

Peire Vidal (*d.* circa 1215), an eccentric character, but a fine poet and melodist. Fifty of his poems and 12 of his melodies have survived.

Guiraut de Bornelh (*d.* circa 1220), called in his own day 'Master of the Troubadours.' We have over 80 poems by him, but only 4 melodies. Two of these were used by Bertran de Born for *sirventes*.

Raimon de Miraval (22 melodies) and Peirol (17 melodies) (both *d.* circa 1220), though not among the greatest troubadour poets, were unusually fortunate as regards the number of their melodies that have survived.

Guiraut Riquier, the last of the troubadours (*d.* 1292), was also one of the most important. The music of 48 of his 89 songs has been preserved.

At the end of the 13th century the art of the troubadours died out. In the following century an attempt to revive it was made by certain citizens of Toulouse, who founded a kind of academy, 'la sobregaya companhia,' and offered prizes for the best *cansos*, dance-songs and *sirventes*. The academy is still in existence, but its members cannot be regarded as having been at any period successors of the troubadours.

(For Bibliography, see under TROUVÈRE.)

B. S.

TROUPENAS, EUGÈNE (*b.* Paris, 1799; *d.* there, Apr. 11, 1850), French music-publisher. As a child he showed decided taste for music, but his family intended him for an engineer, and put him to study mathematics with Wronsky, a Polish professor, who, however, dissuaded him from entering the École Polytechnique and indoctrinated him with his own misty transcendentalism. The results of this early training came out when, left in easy circumstances by the death of his parents, he became a music-publisher, for to the last it was the metaphysical side of the art which interested him. He never gave his ideas in full to the world, but a couple of letters which originally came out in the *Revue musicale* were published in pamphlet form with the title

'Essai sur la théorie de la musique, déduite du principe métaphysique sur lequel se fonde la réalité de cette science' (1832).

Troupenas took up the brothers Escudier when they came to seek their fortune in Paris, and it was with his assistance that they founded their journal *La France musicale*. A man of the world, a good musician, and a fascinating talker, his friendship was sought by many artists of eminence. Rossini, Auber and de Bériot were sincerely attached to him, and

found him always devoted to their interests. He also published Halévy's operas, Donizetti's 'La Favorita,' and all Henri Herz's pianoforte pieces at the time of his greatest popularity; indeed it is not too much to say that from 1825-50 his stock was one of the largest and best selected of all the publishing-houses in Paris. At his death it was purchased by the music publishers, Brandus (see SCHLESINGER), and the larger part still remains in their hands.

G. C.

TROUTBECK, the REV. JOHN (b. Blencowe, Cumberland, Nov. 12, 1832; d. Westminster, Oct. 11, 1899), a well-known translator of libretti into English, was educated at Rugby and Oxford, where he graduated B.A. 1856, and M.A. 1858. He took orders in 1855, and rose through various dignities to be precentor of Manchester, 1865-69, and minor canon of Westminster, 1869. He was buried in the East Walk of the Cloisters.¹ He translated the following for Novello & Co.'s 8vo series:

Bach. St. Matthew and St. John Passions; Christmas Oratorio; Magnificat, etc.	Graun. Der Tod Jesu.
Beethoven. Mount of Olives.	Hiller. Song of Victory.
Brahma. Song of Destiny.	Jensen. Feast of Adonis.
David. Le Désert.	Liszt. 13th Psalm.
Dvořák. Mass; St. Ludmilla; Spectre's Bride.	Mozart. Il seraglio.
Gade. Crusaders; Comala; Psyche; Zion.	Reinecke. Little Snowdrop.
Gluck. Iphigenia in Aulis; Iphigenia in Tauris; Orpheus.	Romberg. Lay of the Bell.
Goetz. Taming of the Shrew; By the Waters of Babylon; Naenia.	Saint-Saëns. Pa. xix.
Gounod. Redemption; Mors et Vita.	Schumann. Advent Hymn; the King's Son. Mignon's Requiem; New Year's Song.
	Tchaikovsky. Nature and Love.
	Wagner. Flying Dutchman.
	Weber. Jubilee Cantata; Preciosa.

besides many minor works. He also published *The Manchester Psalter* (1868), and *Hymn-Book* (1871), *A Music Primer for Schools*, and *A Primer for Church Choir Training* (1879), and compiled the hymn-book in use at Westminster Abbey in 1883. *The Cathedral Paraphrase Psalter* followed in 1894, and he joined Sir J. F. Bridge in preparing the 'Westminster Abbey Chant Book.'

G.

TROUVÈRE (old French nominative *trovere*, accusative *troveor*). The name given to the lyric poets of Northern France is etymologically identical with that of their Provençal predecessors and contemporaries, whose art they imitated (Hypothetical Latin *tropator*, *tropatorem*). (Cf. TROUBADOUR.)

The popularising in Northern France of the art and ideas of the Southern poets was largely the work of Eleanor of Aquitaine, granddaughter of the first of the troubadours. Her marriage with the French King Louis VII. in 1137 brought about important developments in the history of French literature. A patroness of the troubadours (to her Bernard of Ventadorn addressed many of his finest songs), she and her daughters after her encouraged the poets of the North to practise a similar form of art. From the middle of the 12th century a

school of poetry similar to that of the troubadours flourished in Northern France, dying out with the decay of chivalry at the end of the 13th century.

About two hundred trouvères are known to us by name, and melodies by nearly all of them have survived. Altogether about two thousand Northern French songs, including many anonymous works, have been preserved. The principal MSS. are:

Arras, Bibliothèque, 657.	
London, British Museum, Egerton 274.	
Paris, Bibliothèque de l'Arsenal, 1339.	
Paris, Bibliothèque Nationale, fonds français	844.
" "	845.
" "	846.
" "	847.
" "	1,691.
" "	12,615.
" "	20,050.
" "	24,406.
" "	25,566.
Rome, Biblioteca Vaticana, Christina 1490.	nouvelles acquisitions fr. 1050.
Siena, Biblioteca, H. X. 36.	

The most important of all these manuscripts is that of the Bibliothèque de l'Arsenal. It contains words as well as melodies of 482 songs. Pierre Aubry undertook the publication of this MS. in photographic facsimile with a transcription of the melodies into modern notation. His great work was nearing completion at the time of his death in 1910.

The 'courtly poetry' of the trouvères is written in the same style as that of the troubadours, and the music is of the same type. The form, both musical and metrical, used by the trouvères, is generally that of two *Stollen* and an *Abgesang*; that is to say, the first half of the stanza falls into two equal parts sung to a repeated melodic phrase, and the second half is sung to one melodic phrase. A repetition in the second half is, however, not unknown. The *lai* was similar to the Provençal *descort* in changing melody and metre for each stanza, but it was written in French throughout.

The *chanson à personnages* was more popular with the French than with the Provençal poets. The fact that many of the extant songs of this type are anonymous was formerly held to be a proof that they were of popular origin, or at least imitated from popular models. This view has now been given up, and it is generally admitted that even the anonymous songs are the work of skilled trouvères in their less serious moments. A good account of the different types of *chanson à personnages* is given in Pierre Aubry's *Trouvères et troubadours*, pp. 37-94. The most numerous are pastourelles, and the dancing-songs written to accompany various kinds of dances. The latter, which always have a refrain, have a special importance in the history both of literature and of music, since it was from them that the fixed forms of song, such as the ballade and the rondeau, were developed.

The pastourelle, which usually takes the form of a dialogue between the poet and a shepherdess, was cultivated by the troubadours, but was

¹ See *Mus. T.*, 1899, pp. 297 ff. and 734.

much more popular in Northern France. Over 100 French pastourelles are extant.

Among the principal trouvères of the 12th century are:

Gace Brulé, to whom 90 songs are attributed in the MSS., though his editor, G. Huet, thinks that only 34 are certainly his work.

Conon de Béthune (10 songs, 9 of which have music).

The Châtelain de Coucy (15 songs with music).

Blondel de Nesle (22 songs), whose name is probably best known in connexion with the charming but apocryphal story of his search for his imprisoned master, Richard Cœur de Lion (himself a trouvère).

In the 13th century, the best-known name, with the exception of Adam de la Hale, is that of Thibaut, Count of Champagne, afterwards King of Navarre. The extant songs attributed to him number over 70, and the melodies of all but 2 of these have survived. He wrote pastourelles, religious songs and jeux-partis (the French equivalent of the Provençal partimen), but the majority of his lyrics are love-songs in the Provençal style. As a writer of these he is unequalled among the trouvères and has few rivals even among the troubadours.

Colin Muset, a jongleur (15 songs, 8 with music), deserves mention for the charm and good humour of his songs.

Many literary academies were founded during the 13th century in Northern France. They were known as puy, from the town of Puy Notre Dame, where the earliest society of the kind had been founded in the 12th century by the troubadours. The most celebrated of the Northern French puy was that of Arras, and this town produced many trouvères in the 13th century. The name of Adam de la HALE (*q.v.*), eclipses that of all his fellow-citizens.

TROVATORE, IL, opera in 4 acts; libretto by Cammarano, music by Verdi. Produced Teatro Apollo, Rome, Jan. 19, 1853; Théâtre des Italiens, Paris, Dec. 23, 1854; in French, Opéra, Jan. 12, 1857; New York, Apr. 30, 1855; Covent Garden, May 17, 1855; in English, Drury Lane, Mar. 24, 1856.

TROYENS, LES, 'lyric poem,' words and music by Berlioz; originally forming one long

opera, but afterwards divided into two—(1) 'La Prise de Troie'; (2) 'Les Troyens à Carthage.' No. 1 was performed at the Paris Opéra, Nov. 15, 1899, after the composer's death.¹ No. 2 was produced at the Théâtre Lyrique, Nov. 4, 1863, revised at the Opéra-Comique, June 9, 1892, Opéra, June 10, 1921, and published in PF. score by Choudens. (See Berlioz's *Mémoires*.) The first performance of the work as a whole took place on Dec. 6 and 7, 1890,² at Karlsruhe, under Motll. *G.*, rev.

TRUELOVE (TROULUFFE), JOHN, a 15th-16th century English composer, wrote a sacred duet and some carols *a 2 v.* in conjunction with Richard SMERT (*q.v.*) of Plymtree, co. Devon (B.M. Add. MSS. 5665, MS. c. 1510).

TRUHN, FRIEDRICH HIERONYMUS (*b.* Elbing, Oct. 14, 1811; *d.* Berlin, Apr. 30, 1886), became scholar of Klein and Dehn, and also had a few lessons from Mendelssohn. He lived chiefly in Berlin and Dantzig, but with many intervals of travelling. One of his tours was made with Bülow. His operetta, 'Der vierjährige Posten,' was produced at Berlin, 1833, and his opera, 'Trilby,' 1835; but he is chiefly known by his partsongs—amongst them 'The Three Chafers.' He also contributed to the *Neue Zeitschrift für Musik* and the *Neue Berliner Musikzeitung*. He founded the *Neue Liedertafel* in Berlin. *G.*

TRUINET, see NUTTER.

TRUMPET (natural trumpet, Fr. *trompette*; Ger. *Trompete*, *Trummel*, *Tarantara*; Ital. *tromba*, *tr. doppia*, *clarino*; valve trumpet, Fr. *trompette à pistons*; Ger. *Ventiltrompete*; Ital. *tromba ventile*). An instrument, usually of brass consisting of a tube mainly cylindrical in bore doubled back on itself and played with a mouthpiece of the hemispherical variety (see MOUTHPIECE).

It will be well at the outset to define clearly the term trumpet as distinguished from horn, both to remove ambiguity and to afford a ready means for a broad classification of all lip-blown instruments. By trumpets, then, with which trombones must be included, we understand instruments of a peculiarly incisive and brilliant tone-quality, due partly to the tubing being cylindrical for a great portion of its length, and partly to the hemispherical form of the mouthpiece cup. Horns, whether short, as the natural horns of animals, or long, as the modern orchestral horns and tubas, are mainly conical in form, and are played with mouthpieces deeper in the cup than those suitable for trumpets. There are great varieties of tone-quality among horns, but, speaking generally, their tone is less brilliant, but broader, and more vocal, than that of the trumpet. The ordinary infantry bugle may be regarded as typical of the horn class, and the modern cornet as a somewhat

¹ See Jullien's *Berlioz*.

Galpin Collection

1. AFRICAN WAR HORN. 2. JEWISH SHOFAR. 3. BUZINE (S. Hainlein, 1460). 4. CLARINO or CLARION (J. Haas, *c.* 1650). 5. HAND TRUMPET (Lintner, 1786). 6. ENGLISH SLIDE TRUMPET (*c.* 1820). 7. TREBLE TROMBONE or TROMBA DA TIRARSI (J. Schmied, 1781). 8. ROMAN BUCCINA (*c.* 100 B.C.)—a copy. 9. ALPHORN (19th cent.). 10. GERMAN HUNTING HORN (F. Ehe, *c.* 1650). 11. ENGLISH HUNTING HORN (W. Bull, 1690). 12. HAND HORN (18th cent.).

UNIVERSITY COLLEGE,
NOTTINGHAM.

hybrid instrument, intermediate in character between the trumpet and horn.

The true trumpet character requires considerable length of tube. The Roman *lituus*, judging by one discovered in 1827, was pitched in G, or a major third higher than the modern cavalry trumpet, which is in E \flat , and although small valve trumpets in B \flat are now in use, the characteristic quality of the instrument is to be found at its best in the natural trumpets in D, with a total length of about eighty-eight inches.

NATURAL TRUMPET.—This is an instrument without side-holes, slide, valves, or in short, any means of altering its length. (See *PLATE LXXXIII.* Nos. 3, 4, 5.) Such an instrument is limited to the harmonic scale, and although the prime of the harmonic series can easily be obtained on wide-bore conical instruments, the proportions of the trumpet make it practically impossible to give this note; so that in actual practice the scale begins with the octave of the prime, and even this note is difficult on trumpets of small bore. To complete the diatonic scale, we find an early introduction of side-holes on small conical-bore instruments, such as the *zinken* or *cornetts*, on which the prime and its octave are easily produced, and this was followed later on the larger conical instruments such as *serpents* and *ophicleides*, by side-holes closed or opened by keys. The side-hole method of altering fundamental pitch, although it has been attempted on the trumpet, is utterly unsuited to it, and therefore the natural trumpet long held the field, and this is the instrument which must now be more particularly described.

Instruments such as the Greek *salpinx* and the Roman *tuba*, corresponding approximately to the modern coach-horn, being straight tubes with bell-mouths, cannot be conveniently handled if more than about 4 feet in length, and on such short tubes no harmonic higher than the eighth is practicable. An increase of length makes it possible to produce notes up to the tenth, twelfth and even the sixteenth notes of the harmonic series, covering many notes in the diatonic scale.

That the necessary increase of length might be practically adopted, the tube was doubled upon itself in various ways; but by the time of Virdung (1511) and Praetorius (1618) the natural trumpet had settled down to the form in which we still use it. Such an instrument is cylindrical in bore for about three-fourths of its length, the diameter being from $\frac{1}{10}$ to $\frac{4}{10}$ of an inch, the remaining fourth being the 'bell', with an increasing conical expansion terminating in a 'flange' of from four to five inches diameter. The mouthpiece has a somewhat shallow or hemispherical cup, and a rim with an internal diameter varying from that of a threepenny to a sixpenny piece.

The natural notes begin with 8-foot C, which is not used, and follow the harmonic series, up

to the C above the soprano clef. The actual sounds from the trumpet in D are a tone higher. Pedal notes seem to be unknown.¹

The trumpet is adapted for other keys than that in which it is built by the use of *CROOKS* (*q.v.*). Praetorius mentions the use of a crook by which the trumpet could be put from D into C, and this means of altering the pitch-note and key was extended downwards to B \flat and A \sharp , and by an inversion of the process the higher pitches of F and G were introduced, and in anticipation it may here be stated that the raising of the pitch has been extended to the B \flat soprano, or cornet pitch, although the really characteristic trumpet tone diminishes after F as a fundamental is reached.

The limitations imposed by the harmonic scale of the 'natural' trumpet led to various attempts to introduce means of making its scale completely diatonic and even chromatic. There are four possible means of achieving this result, and all have been tried. These are (1) the use of side-holes covered by keys, (2) the stopping or muting of the bell by means of the hand as on the French horn, (3) the alteration of fundamental length by means of a slide, and (4) a similar but more extended alteration by means of valves.² The first of these systems was introduced by Kölbl of St. Petersburg in 1770, and in 1795 Weidinger of Vienna produced a trumpet which had five keys covering side-holes. The general principle of side-holes, although within certain limits, as noted above, fairly satisfactory on conical instruments such as the bugle and the ophicleide, is not really applicable to instruments of cylindrical bore such as the trumpet, and in consequence, the keyed trumpet soon died out. The second method, that of muting and changing the pitch by placing the hand in the bell, was introduced by Michael Wöggel in 1780. His instrument, although called the 'Invention horn,' was really a hand-stopped trumpet, and to make the hand-stopping practicable, the general form of the instrument was bent to a curve; but as hand-stopped notes are utterly foreign to the true trumpet tone, the instrument had no value.

THE SLIDE TRUMPET.—The third plan, the change of length by means of a slide, has more merit than either of the foregoing. It was introduced by John Hyde

¹ Eichborn names 'Das kontra Register' or 'Posaunen Register,' but says 'es spricht sehr schwer an.'

² In the *Monatshfte für Musik-Gesch.* for 1881, No. III, is a long and interesting article by Eitner, investigating the facts as to the inventor of the 'Ventil trompete,' which is said to date from 1802 or 1803. The writer seems, however, to confuse entirely the key-system or 'Klappen Trompete' with the 'ventil' or valve. Eitner's error is exposed in the preface to Eichborn's *Die Trompete*.

about the end of the 18th century, and although it never obtained general acceptance throughout Europe, and is now disused owing to the improvement of the piston-valve instrument, its good points gave it a strong position in England for the rendering of classical trumpet music (see *PLATE LXXXIII.* No. 6). The slide trumpet as used by Harper may be thus described.¹

It consists of a tube sixty-six inches and three-quarters in length, and three-eighths of an inch in diameter. It is twice turned or curved, thus forming three lengths; the first and third lying close together, and the second about two inches apart. The last fifteen inches form a bell. The slide is connected with the second curve. It is a double tube five inches in length on each side, by which the length of the whole instrument can be extended. It is worked from the centre by the second and third fingers of the right hand, and after being pulled back is drawn forward to its original position by a spring fixed in a small tube occupying the centre of the instrument. There are five crooks, a tuning bit, and the mouthpiece.

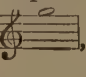

In the slide trumpet the slide is so placed and used as to be limited to an extension giving one tone only, but there appears to be no sufficient reason against the adoption of a long slide on the trombone principle. Trumpets are the natural treble to the trombones, and in this way the family could be made complete.

Slide trumpets have also been made with a double slide, having four limbs in all and affording twice the extension obtainable from the more ordinary model.

An attempt to amplify the scale of the slide trumpet by the addition of a single valve tuned to lower the pitch a minor tone was brought under the notice of the Musical Association in 1876, but the system did not come into general use.

THE VALVE TRUMPET.—The modern valve-trumpet in F has three valves, and crooks are but little used. (For the details of the valve-action, see *VALVE*.) This instrument is the only really effective substitute for the old natural trumpet, and it is to be regretted that it has gone so much out of favour, especially where the performance of classical music is concerned. Owing to its length and large bore it has a weight and nobility of tone which cannot be produced by the shorter, more popular high-pitched valve-trumpet in C, or B flat, the more usual key (see *PLATE LXXXIV.* No. 2).

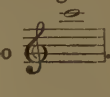

The effective compass of the F trumpet is

chromatically from  to 

sounding a fourth higher, the part being written as though in the key of C.

¹ Harper, *School for the Trumpet*. Rudall, Carte & Co.

It is practically superseded now by the high-pitched instrument having a chromatic

compass from  to 

If built in B flat, or played with a B flat crook, the part is written a tone higher. The use of an A crook necessitates the part being written a minor third higher. It is usual nowadays to give the part the correct key-signature, thus avoiding accidentals, and at the same time giving the player a better idea of the tonality of the music.

If this instrument has lost some of the nobility of tone which is characteristic of the natural trumpet and the valve trumpet in F, it has gained greatly in flexibility. Without it the latter-day effects demanded by composers would be impossible.

The trumpet is muted by the insertion into the bell of a pear-shaped stopper, and the part marked 'con sordino.'

The bass trumpet is a valve trumpet in C-basso, i.e., an instrument sounding an octave lower than the trumpet in C, the pitch of which is given above. Bass trumpets in B \flat and E \flat are also built for military bands.

HISTORY.—The mediæval use of the trumpet is well given in Eichborn's book *Die Trompete in alter und neuer Zeit*, published by Breitkopf & Härtel in 1881. Eichborn states that Henry VIII. of England had fourteen trumpeters, one 'Dudelsack' (or bagpipe), and ten trombones in his band, and Elizabeth, in 1587, ten trumpets and six trombones. Indeed, it is in the 16th century, according to him, that the 'building up of the art of sound' made a great advance. He divides the band of that day into seven groups, of which group 3, Zinken or Cornetts, Quart-Zinken, Krumm-horns, Quint-Zinken, Bass-Zinken and Serpents of the Bugle type; group 6, Trumpets, 'Klarinen,' and 'Principal or Field-Trumpets,' with group 7, the Trombones, from soprano to bass, most concern us.

Claudio Monteverdi names among the instruments for his 'Orfeo' (1607), one clarino, three trombe, and four tromboni; and Benevoli, in a Mass at Salzburg Cathedral in 1628, has 'Klarinen, Trompeten, Posaunen'; Praetorius in 1620 waxes enthusiastic, and says:

'Trummet ist ein herrlich Instrument, wenn ein gute Meister, der es wohl und künstlich zwingen kann, darüber kömmt.'

It is to be noticed that trumpets at the time of Praetorius, although used in 'choirs' or sets, were not made of different pitches or keys like other wind instruments similarly used, but were all pitched in D, and the difference in register or mean compass between the higher and lower parts was obtained by difference in bore, and in the proportions of the mouthpiece.

The higher trumpets or 'clarini' were of small bore, and were played with very shallow mouth-pieces. The 'tromba,' or third part in the choir, was slightly larger in bore and mouth-piece, and the 'principale,' or lowest part, required a still wider tubing and larger mouth-piece. The range of the different parts is here indicated :

Compass of the Trumpet.

In the above scale it is to be noted that the note  and its octave are slightly flat

as major tones below C, being the seventh and fourteenth notes of the harmonic scale. The eleventh of this scale is represented by

 and its true pitch lies between

the two. These notes as written could only be obtained by a modification of lip-action, and this remark applies also to the A above the staff, which does not exist in the true harmonic series. However, whether the trumpeters from the 15th to the 18th centuries played only the natural harmonics, or modified them to suit the growing needs of harmony, it is certain that they attained to an excellence which in the 19th century passed away.

The trumpet parts in the works of Bach and Handel are written very high and floridly ; so high that they cannot be performed on the modern valve trumpet. Praetorius (1618) gives for the trumpet in D the higher range that should be produced (a), that is to say from the seventeenth to the twenty-first proper tones of the instrument. All these notes are beyond the highest limits of the modern instrument.

The distinction into clarini and principale is found in Handel's scores, notably in the *Dettingen Te Deum*. To the clarino I. and II. of the score were allotted florid, but less fundamental passages, chiefly in the octave above those of the principale. A like arrangement for three trumpets occurs in J. S. Bach's cantata 'Lobe den Herrn,' though the principale is not definitely named. The mode of scoring is an exact parallel to that for the three trombones. A good example of it also occurs in Haydn's *Imperial Mass*, where, besides the 1st and 2nd trumpets, there is a completely independent 3rd part of principale character.

THE 'BACH' TRUMPET.—It was the merit of Kosleck of Berlin to introduce a high trumpet specially to perform Bach's trumpet parts in their integrity in the B minor Mass, which was produced under Joachim's direction at Eisenach on the occasion of the unveiling of the statue of J. S. Bach in Sept. 1884. A performance of the same work, in which Kosleck again

took part, was given by the London Bach Choir in the Albert Hall, London, March 21, 1885. This trumpet is not bent back but straight, and is fitted with two pistons. It is an A trumpet with posthorn bore and bell. Kosleck's trumpet was improved by Walter Morrow, the well-known English trumpeter, who altered the bore and bell to that of the real trumpet. Morrow's trumpet, like Kosleck's, is straight and has two pistons, measuring in length 58½ inches. It is also an A trumpet. With it the twentieth, and at French pitch the twenty-first proper tone of the 8-foot or normal trumpet can be reached. An instrument of this straight type is sometimes made in D, an octave higher than the old natural trumpet, or a tone higher than the modern valve trumpet in C, but owing to its limited length the proper tone-quality is somewhat lost (see ORCHESTRATION).

Bearing in mind the distinction already referred to between the trumpet and horn it will be clear that the ancestry of the trumpet is to be traced to the *LITUUS* (*q.v.*), rather than to the tuba (see TUBA, Roman). From the latter, which still keeps its name, are derived bugles, serpents, horns, euphoniums and bombardons and the like. It was early seen that two distinct varieties of tone-quality could be obtained, the large core and bell of the tuba favouring the production of the fundamental note and the lower partial tones, the long contracted pipe of the lituus breaking easily into harmonics and speaking freely in its upper octave.

N. C. G. ; incorporating material from W. H. S. and D. J. B.

TRUMPETER, SERGEANT-, an officer of the royal household, who presides over sixteen trumpeters in ordinary. The first mention of the office occurs in the reign of Edward VI., when it was held by Benedict Browne (who had been one of the sixteen trumpeters to Henry VIII. at a salary of 16d. a day), at an annual salary of £24 : 6 : 8. The office does not appear to have been regularly kept up for a very long

period. It is not again mentioned in any list of royal musicians until 1641. No further notice of it occurs until 1685, when Gervase Price held it, and appointments to it have since been continuously made. Price was succeeded by Matthias SHORE (*q.v.*), one of the trumpeters in ordinary, who was followed in 1700 by his son William, who in his turn was replaced, a few years later, by his brother John, the most celebrated trumpeter of his time. On John Shore's death in 1752 Valentine SNOW (*q.v.*), for whom Handel wrote the difficult obligato trumpet parts in his oratorios, etc., obtained the appointment. SNOW died in 1770, and for a long time the majority of his successors were not even musicians. One of them, however, John Charles Crowle, who held the office in 1812, deserves mention for having bequeathed to the British Museum the splendidly illustrated copy of Pennant's *London*, so dear to lovers of London topography. About 1858 it was decided that the office should again be given to a musician, although not to a trumpeter, and Joseph Williams, clarinettist, a member of the Queen's band of music, received the appointment, and upon his death in Apr. 1875, J. G. Waetzig, bassoon-player, also a member of the Queen's band, was appointed his successor. The salary of the office has long been £100 per annum. The Sergeant-Trumpeter formerly claimed, under letters patent, a fee of 12d. a day from every person sounding a trumpet, beating a drum, or playing a fife in any play or show without his licence (for which licence 20s. a year was demanded), and Matthias and William Shore successively issued advertisements in the newspapers authorising all magistrates to receive such fees for them and apply them to the relief of the poor. Such privileges were, however, long since abrogated.

TRUMPET MARINE, see TROMBA MARINA.

TRYDELL, REV. JOHN, an Irish writer on music who issued by subscription a work on the art: *Two Essays on the Theory and Practice of Music*, Dublin, printed for the editor . . . 1766, 8vo. In the preface he says 'there is no such thing as Irish music since the trade hath been opened with Italy'; and refers to the 'little remains or reliques preserved in the few Irish airs which have miraculously survived the changes of time.'

F. K.

TSCHUDI, BURKHARDT, founder of the house of Broadwood. (See SHUDI.)

TUA, MARIA FELICITA, known as TERESINA (b. Turin, May 22, 1867), completed her musical education at the Paris Conservatoire, where she received instruction on the violin from Massart, and obtained in 1880 a 'premium' or first prize. She afterwards played with brilliant success in concert tours over the greater part of the continent. On May 5, 1883, she made her first appearance in England at the Crystal

Palace, and played with so much success that she was re-engaged for the concert of the following week. She played at the Philharmonic on May 9 and 30; at the Floral Hall Concerts, June 9; at W. G. Cusins's concert, with whom she was heard in Beethoven's 'Kreutzer' sonata; and at other concerts. She returned to the continent, and did not reappear for the season of 1884 as was expected. She next made tours on the continent, and in 1887 visited America. In 1891,¹ she married Giuseppe Ippolito Franchi-Verney, Conte della Valetta, a musical critic. She retired for a time, but later she made tours in Italy and elsewhere. She contributed an appreciation of Joachim to the literature called forth by his death. In 1914 she married Count Emilio Quadrio de Maria Pontaschielli.² A. C.

TUBA, (1) this name, originally signifying a short, straight horn or trumpet, corresponding to our modern coach-horn, is now used as a generic name, vaguely perhaps, but conveniently given to the deeper-toned valve brass instruments, the euphonium (or tenor-tuba), and the bombardon in its two forms—bass-tuba and contrabass tuba.

Wagner's five tubas as employed in 'The Ring' were, with one exception, not tubas but modified horns with a funnel mouthpiece which, it was originally intended, were to be played by four of the eight horn-players required at other times in the score. They consisted of two 'tenor' tubas in B flat compass

to and two 'bass' tubas

in F compass to . The

fifth instrument was a contrabass tuba. In practice these tubas were eventually redesigned on the plan of the SAXHORN (*q.v.*), but still possessing the funnel, and not cup-shaped, mouthpiece, to which is due the softer and quieter tone-quality. (See PLATE LXXXIV. No. 4.)

Complete sets of these instruments have been used in England for performances of 'The Ring.' Abroad, the two highest parts have been played on the E flat FLÜGELHORN (*q.v.*), sometimes known as althorn. True tubas have a cup mouthpiece and are the modern substitutes for the old bass-horns and ophicleides, and are distinct from the bugle or higher-pitched type of brass instrument in that they are able to play all the notes lying between the fundamental note and the second harmonic. The bombardon is made in two forms, upright like the euphonium, and as used in military bands, circular (when it is called helicon), being so built to pass over the player's shoulder for convenience in marching.

The compass of these instruments is as follows: euphonium, corresponding to what

¹ Rakor.

 4. TUBA. 5. ORCHESTRAL HORN.

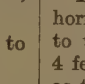

the Germans call baryton; the term tenor-tuba in B is also used (in B flat, 4 valves)

chromatically from  to .

This is the equivalent to the bass saxhorn in B flat.

Bombardon (bass tuba, helicon) (E flat, 4 valves) chromatically from  to .

 This instrument, however, for the concert orchestra is generally built in F one whole tone higher.

Bombardon (contrabass tuba) (B flat, 3 valves) chromatically from  to .

 the fundamental  is  8va.

possible. A fourth valve is sometimes added. This instrument, built in c', was the lowest of the Wagner group.

Tubas are made both with three and four valves, but for the full use of the pedal octave between the fundamental note and the second harmonic the four valves are necessary. A fifth valve has occasionally been introduced to correct the sharpening effect of valves used in combination, but the true remedy for this is a system of compensating lengths automatically brought into operation by the fourth VALVE (q.v.). The lowest note shown above for the B \flat contrabass is produced with the three valves in combination: for the other instruments the lowest note shown is the fundamental without valves, but several lower notes can be obtained with the valves. The upper limit given is the eighth harmonic, but the ninth and even the tenth can be used. As in all brass instruments the upper limit of compass is indefinite, and depends upon the skill of the player.

The notation of tuba parts has been variable. Wagner wrote for his first four 'tubas' as though they were horns in B flat alto and in F, and alternatively as horns in E flat and B flat basso. In brass bands the tubas are sometimes written for as transposing instruments, in which case the second harmonic, the octave above the fundamental, is always placed on the 'middle' C. In the concert orchestra and in military bands in England the usual and most satisfactory plan is to write the actual sounds required.

The tone-quality of the tubas is broad and round and they are a valuable part of the constitution of the military and brass band, the euphonium, with its extensive compass, vocal

tone, and great flexibility, being particularly well suited for solo work. In the concert and opera orchestra the tuba forms a solid bass to trombone harmony, although the tone is apt to become obtrusive unless used with great care or for special effect, e.g. those of Strauss's 'Don Quixote.'

For further details as to the general mechanism of the instrument, see SAXHORN, to which it is closely allied.

TUBA, (2) (TUBA MIRABILIS; TUBA MAJOR; TROMBA; OPHICLEIDE), a high-pressure reed-stop of 8 ft. pitch on an organ. (See ORGAN: VOCABULARY OF STOPS.)

TUBA, ROMAN, a straight conical metal horn with cup mouthpiece, somewhat similar to the modern coach-horn, and about 3½ or 4 feet in length. It is frequently referred to as the Roman trumpet, but as the characteristic of the trumpet is the great proportion of cylindrical tubing in its length, the tuba should be regarded rather as belonging to the horn family. The origin of such an instrument is doubtless to be found in the natural ox-horn or elephant's tusk, and must be regarded as prehistoric, as there are many evidences of great antiquity illustrating the use of metal horns and trumpets. The tuba was one of the four military instruments used by the Romans, the other three being the LITUUS, the CORNU and the BUCCINA (q.v.).

D. J. B.

TUBUPHONE, a variety of GLOCKENSPIEL (q.v.) which differs from it in that the steel bars are replaced by small tubes of metal arranged like the keyboard of a piano and struck with a hammer. The compass is chrom-

atic, from  to  8va. and the part

is written two octaves below the actual pitch.

TUCK, see TUCKER.

TUCKER, EDMUND (late 16th and early 17th century), English composer of church music, and possibly the father of the Rev. William TUCKER (q.v.). An Edward Tucker was organist of Salisbury Cathedral from c. 1626-33 (West's *Cath. Org.*). An anthem by Edmund Tucker, 'Christ Rising' is in R.C.M. 1045-51 (Barnard's MS. collection), and another, 'He blessed is,' in Tenb. O.B/356. Some of the anthems in the list of compositions by the Rev. William Tucker, described simply as by 'Tucker,' may be the work of Edmund. Barnard's 'Selected Church Music' (1641) was definitely prepared as a collection of compositions by composers then deceased, and the 'Benedicite' bound up with the Barnard part-books (R.C.M. (I. A1) may also be by Edmund Tucker.

J. M².

TUCKER (TUCKERE, TUCKERS), REV. WILLIAM (d. Feb. 28, 1679), English composer of church music. He was admitted a gentleman of the Chapel Royal, where he appears also to have been a copyist. In 1660 he was a minor canon and precentor of Westminster Abbey. His anthem 'O Give thanks unto y^e Lord,' is described in Harl. MSS. 7339, Tudway collection, as by 'Will. Tucker, gentleman of y^e Chappell to King Charles y^e 2d and Praecentor of y^e Abby Church in Westminster.' His name occurs many times in the lists and accounts of payments to the royal musicians.¹ He was buried in the Abbey Cloisters, Mar. 1, 1679. Besides the compositions given below, there are a service and six anthems at Ely Cathedral; and the following is included in a catalogue of 'severall Services and Anthems that have been transcribed into the books of his Majesty's Chappell Royal since anno 1670 to Midsummer 1676.'²

'Benedicite Service'; 'O clap your Hands'; 'I was glad'; 'Praise the Lord, ye Servants'; 'Unto Thee, O Lord.'

TUCKERMAN, SAMUEL PARKMAN, MUS.D. (b. Boston, Mass., U.S.A., Feb. 11, 1819; d. Newport, Rhode Island, June 30, 1890). At an early age he received instruction in church music and organ-playing from Charles Zeuner. From 1840, and for some years after, he was organist and director of the choir in St. Paul's Church, Boston, and during that time published two collections of hymn tunes and anthems, 'The Episcopal Harp' (chiefly original compositions) and 'The National Lyre,' the latter with S. A. Bancroft, and Henry K. Oliver. In 1849 he went to England, to make himself thoroughly acquainted with the English cathedral school of church music, both ancient and modern. In 1851 he took the Lambeth degree of Doctor of Music, and then returned to the United States and resumed his connexion with

St. Paul's Church in his native city. He lectured upon *Church Music in the Old World and the New*, and gave several public performances of cathedral and church music from the 4th to the 19th century. In 1856 he returned to England, and remained eight years, forming a fine musical library. In 1864 he returned to the United States and succeeded Dr. Edward Hodges as organist of Trinity Church, New York.

Many of Tuckerman's compositions were published by Novello. In 1852 he received a diploma from the Academy of St. Cecilia, Rome. G.

TUCKET, TUCK, the name of a trumpet sound,⁴ of frequent occurrence in the works of the Elizabethan dramatists. Shakespeare (*Henry V.*, Act. iv. Sc. 2) has, 'Then let the trumpets sound The tucket-sonance, and the note to mount'; and in *The Devil's Law Case* (1623) is a stage direction, 'Two tuckets by several trumpets.' The word is clearly derived from the Italian *toccato*, which Florio (*A Worlde of Wordes*, 1598) translates 'a touch, a touching.'

Like most early musical signals, the tucket came to England from Italy, and though it is always mentioned by English writers as a trumpet sound, the derivation of the word shows that in all probability it was originally applied to a drum signal. (See **MILITARY SOUNDS AND SIGNALS**.) Francis Markham (*Five Decades of Epistles of Warre*, 1622) says that a 'Tucquet' was a signal for marching used by cavalry troops. The word still survives in the French 'Doquet' or 'Toquet,' which Larousse explains as 'nom que l'on donne à la quatrième partie de trompette d'une fanfare de cavallerie.' There are no musical examples extant of the notes which were played.

Closely allied with the word tucket is the Scotch term 'tuck' or 'touk,' usually applied to the beating of a drum, but by early writers used as the equivalent of a stroke or blow. Thus Gawin Douglas's *Virgil* has (line 249) 'Heracles it smytis with ane mychty touk.' The word is also occasionally used as a verb, both active and neuter. In Spalding's *History of the Troubles in Scotland* (vol. ii. p. 166) is the following: 'Aberdeen caused tuck drums through the town,' and in *Battle Harlaw*, Evergreen (i. 85), the word is used thus: 'The dandring drums alloud did touk.' 'Tuck of drum' is of frequent occurrence in Scottish writers of the 19th century (see Scott's *Rokeby*, canto iii. stanza 17; Carlyle's *Life of Schiller*; Stevenson's *Inland Voyage*, etc.; also Jamieson's *Dictionary of the Scottish Language*, s.v. 'Tuck' and 'Touk'). (See **TUSCH**.) W. B. S.

TUCZEK, a Bohemian family of artists—the same name as Duschek or Dussek. The compilers of dictionaries have fallen into much confusion between the different members.

⁴ Johnson says 'a musical instrument,' but this is inaccurate.

¹ See H. C. de Lafontaine, *The King's Music*.

² See *The King's Music*, 1st Aug. 1766.

³ See Edmund TUCKER.

(1) FRANZ (*d. circa* 1780) was choirmaster of St. Peter's at Prague (1771). His son and pupil,

(2) FRANZ (*b. circa* 1755; *d. Pest*, 1820) was a singer in Count Sweett's theatre, became accompanist to the theatre at Prague in 1796, Kapellmeister at Sagan to the Duke of Courland in 1797, conductor of the theatre at Breslau in 1799, and of the Leopoldstadt theatre in Vienna in 1801. He was a versatile composer, writing masses, cantatas (one was performed at Sagan in 1798, on the recovery of the King of Prussia), oratorios ('Moses in Egypt,' and 'Samson,' 1803), operettas ('Le Charme du baiser,' Vienna, 1803, etc.), and music for a tragedy, 'Lanassa,' his best work, given at Pest in 1813. His chief printed work is the PF. score of 'Dämona,' a raïry opera in three acts, performed at Vienna, 1802. Pieces for piano and for guitar were also printed.

(3) FRANZ (*b. Königratz*, Jan. 29, 1782; *d. Charlottenburg* near Berlin, Aug. 4, 1850), another son, a musician first in Vienna, and afterwards in Berlin, had two daughters, of whom one married Rott the actor. The other,

(4) LEOPOLDINE TUCZEK-HERRENBURG (*b. Vienna*, Nov. 11, 1821; *d. Baden*, near Vienna, Sept. 1883), was a pupil of Josephine Fröhlich's at the Vienna Conservatorium in 1829-34, played little parts at the court theatre with Unger, Garcia and Moriani, from the time she was 13, and thus formed herself as an actress. She was also thoroughly trained as a singer by Mozatti, Gentiluomo and Curzi, and made her first appearance in Weigl's 'Nachtigall und Rabi.' In 1841, on the recommendation of Franz Wild, Count Redern offered her a star-engagement in Berlin, as successor to Sophie Löwe in *ingénue* parts. Her Susanna, Zerlina, Sonnambula, Madeleine, etc., pleased so much as to lead to an offer of engagement on liberal terms, which she accepted on her release from the court theatre at Vienna. She sang at the unveiling of the Beethoven memorial in Bonn (1845). She made her farewell appearance in Berlin, Dec. 6, 1861, when the king himself threw her a laurel-wreath, and sent her a miniature laurel-tree in silver, bearing sixty-five leaves, on which were written the names of her parts, including Mrs. Ford in 'The Merry Wives of Windsor.' Her voice had a compass of 2½ octaves, and her refined and piquant acting made her a model *soubrette*. F. G.

TUDOR CHURCH MUSIC. A critical edition of the English masters of the 16th and 17th centuries, published by the Oxford University Press for the CARNEGIE TRUST (*q.v.*). The editorial committee consists of Prof. P. C. Buck, Dr. E. H. Fellowes, Miss S. Townsend Warner, Rev. A. Ramsbotham. The ten vols. (some still, 1927, in the press) consist of:

5. Robert Whyte.
6. Tallis (Latin).
7. Byrd (Gradualia).
8. Tomkins (Services, etc.).
9. Byrd (Masses and Misc.).
10. Merbecke, Aston and Parsley.

TUDWAY, THOMAS, Mus.D. (*d. Nov.* 23, 1726),¹ was admitted a chorister of the Chapel Royal in or soon after 1660. On Apr. 22, 1664, he was elected a lay vicar (tenor) of St. George's Chapel, Windsor. About Michaelmas, 1670, he became organist of King's College, Cambridge, in succession to Henry Loosemore (whose name disappears from the College accounts after Midsummer, 1670), and received the quarter's pay at Christmas, and an allowance for seven weeks' commons. He obtained the post of instructor of the choristers at King's College at Christmas, 1679, and retained it until Midsummer, 1680. He was also organist at Pembroke College. In 1681 he graduated as Mus.B. at Cambridge, his exercises being Ps. xx. in English, and Ps. ii. in Latin, both with orchestral accompaniment.² On Jan. 30, 1704-05, he was chosen as professor of music in the University in succession to Dr. Staggin. Shortly afterwards he proceeded Mus.D., his exercise for which—an anthem, 'Thou, O Lord, hast heard our desire'—was performed in King's College Chapel on Apr. 16, in the presence of Queen Anne, who bestowed upon the composer the honorary title of Composer and Organist-extraordinary to her. On July 28, 1706, he was suspended from his offices for 'speaking words highly reflecting upon Her Majesty and her administration.'³ On another occasion his inveterate habit of punning got him into trouble.⁴ His suspension continued until Mar. 10, 1706-07, when he recanted, and was formally absolved and reinstated in his offices.⁵ In 1714-20 he was engaged in the work by which his name is preserved. It was undertaken at the desire of Edward, Lord Harley, afterwards Earl of Oxford, and forms an important collection⁶ of cathedral music, in six thick 4to vols., now in the B.M. (Harl. MSS. 7337-7342), an Evening Service, eighteen anthems, and a Latin motet by Tudway himself being included in it. Another Service by him is in a MS. at Ely Cathedral, and some songs and catches were printed in the collections of the period. He wrote anthems and a Te Deum with orchestral accompaniment, for the consecration of Lord Oxford's private chapel at Wimpole, in 1720. His portrait, formerly in the Music School at Oxford, is now in the Bodleian. W. H. H.

³ Records of Pembroke College, Cambridge.

⁴ Burney, *Hist. of Music*, iii. 459 n., relates the following anecdote, which may possibly include the obnoxious pun. 'In the time of the Duke of Somerset's Chancellorship at Cambridge, during the discontents of several members of the University at the rigours of his government and paucity of his patronage, Tudway, himself a malcontent, and joining in the clamour, said, "The Chancellor rides us all, without a bit in our mouths!"'

⁵ Register of Emmanuel College in *Hist. MSS. Comm.*, 4th Report, p. 419.

⁶ For an alphabetical list, under composers, see Oliphant's *Catalogue of MS. Music in the Brit. Mus.* (1842), p. 31, etc.

1. Taverner (Masses).
2. Byrd (English Services, etc.).
3. Taverner (Motets).
4. Gibbons (Services and Anthems).

The contents of the collection are as follows :

VOL. I.

Tallis. Whole Service, D minor with B[¹] (Benedictus).
Anthem, I call and cry. a 5.
Do. Wipe away my sins. a 5.
Do. With all our hearts. a 5.
Do. O Lord give Thy Holy. a 4.
Bird. Whole Service, D minor with B[¹] (Benedictus).
Anthem, Sing joyfully. a 6.
Do. O Lord, turn Thy wrath. a 5.
Do. Bow thine ear. a 5.
Do. O Lord, make. a 5.
Do. Save me, O God. a 5.
Do. Prevent us, O Lord. a 5.
Tallis. Anthem, Discomit them. a 5.
Tye. Even. Serv., G minor, 1545.
Bull. Anthem, 2 trebles. Almighty God 1592. (Organ ps.).
Morley. Even. Serv., D minor. a 5.
Barcroft. Morning Service, G minor, 1532 (Benedictus).
Stonard. Evening Service in C. a 5. 1558.
Amner. Whole Service, D minor. a 4 (Benedictus).
Anthem, Christ rising again. a 4.
Mundy. Do. O Lord I bow. a 5.
O. Gibbons. Service, 1635 (Benedictus).
Anthem, O Lord, increase. a 4.
Do. Why art thou so heavy. a 4.

VOL. II.

Child. Whole Service, D. a 4 (Jubilate).
Anthem, Sing we merrily. a 8.
Do. O Lord God. a 5.
Do. O praise the Lord. a 6.
Whole Service, F. (Jubilate and Cantata).
Evening Service, A.
Do. C minor (given in D).
Humphrey. Even. Serv., E minor. Verse.
Anthem, Thou art my king. a 4.
Do. Haste Thee, O God. a 4.
Do. O Lord my God. a 4.
Do. Like as the hart. a 3.
Do. By the waters. a 3.
Do. O give thanks. a 4.
Do. Have mercy. a 3.
Farrant. Kyrie and Credo from High Service.
Child. Whole Service, E minor. Verse (Jubilate).
Anthem, Praise the Lord. a 4.
Do. O Lord, grant the King. a 6.
Evening Service in G. a 4.
Humphrey. Anthem, O praise the Lord. a 3.
Funeral Anthem, Lord, teach us. a 3.
Do. O be joyful. a 3. Orch.
Do. The King shall rejoice. a 4. Orch.
Do. Hear, O heavens. a 3.
Rogers. Whole Service, in D (Jubilate).
Loosemore. Whole Service, in D minor. a 4, 5, 6.
Wise. Whole Service, D minor (Jubilate).
Anthem, Awake, put on. a 3.
Do. The ways of Zion. a 2.
Holder. Evening Service, C.
Anthem, Thou O God.
Creighton. Whole Service, C (Jubilate).
Anthem, I will arise.
Aldrich. Anthem (from Latin). We have heard. a 4.

VOL. III.

Henry VIII. Anthem, O Lord the Maker. a 5.
Bervin. Whole Service. Dorian.
Tomkins. Anthem, O praise the Lord. a 12.
Do. Glory be to God. a 10.
Do. O God, the proud. a 8.
Do. Turn Thou us, O praise.
Matth. White. Anthem, O praise God. a 8.

O. Gibbons. Anthem, Behold Thou hast made. a 5.
H. Moll. Even. Serv. D min. with B[¹].
Portman. Whole Service, G (Benedictus).
H. Moll. Evening Service, F.
Patrick. Whole Service, G minor (Benedictus).
Farrant. Whole Service, called Anthem's High, A minor (Benedictus).
Morley. Funeral Anthem, I am the resurrection.
Do. Man that is born.
Do. I heard a voice.
Giles. Anthem, O give thanks. a 5.
Tomkins. Do. Almighty God. a 5.
Hooper. Do. Behold this is Christ. a 5.
Batten. Do. Hear my prayer. a 4.
Loosemore. Put me not to shame.
Lawes [W.]. Anthem, The Lord is my light. a 4.
Canon. Non nobis, Morley (Byrd).
Do. I am so weary. a 3 (Ford).
Do. O that men would. a 3.
Do. Haste thee, O Lord. a 3 (Ramsey).
Do. Music Divine. a 3.
Do. He weepeth sore. a 4. (Lawes).
Do. Miserere. a 3.

Tucker. Anthem, O give thanks. a 4.
Do. I will magnify. a 4.
Jewett. Do. I heard a voice. a 4.
Creighton. Whole Service in E[¹].
Anthem, Praise the Lord. a 3.
Aldrich. Whole Service in G.
Anthem, Out of the deep.
Do. O praise the Lord. a 4.
Do. Sing unto the Lord. a 4.
Amner. Whole Service in G ('Caesar'). a 5.
Wise. Evening Service in E[¹].
Anthem, How are the mighty.
Do. I will sing a new song. a 4.
Do. O praise God. a 3.
Do. Behold how good. a 3.
Turner. Whole Service, in A.
Anthem, O praise the Lord.
Do. The King shall rejoice.
O. Gibbons. Do. Hosanna. a 6.
Aldrich. Do. O Lord, grant the King. a 5.

Giles. Anthem, I will magnify. a 5.
Lugg. Do. Behold how good. a 5.
Blow. Whole Service, in G.
Anthem, Save me, O God.
Do. O Lord God. a 8.
Do. O God, my heart. a 4.
Do. And I heard a great voice. a 4.
Do. The kings of Tharsis.
Do. Praise the Lord. a 5.
Aldrich. Even. Serv. in F. Verse.
Purcell. Whole Service, in B[¹].
Do. Rejoice the Lord.
Do. Praise the Lord. a 2.
Do. I was glad.
Do. O God, Thou art.
Do. Lord, how long. a 5.
Do. O God, Thou hast cast. a 6.
Do. Save me, O God. a 5.
Humphrey, Blow, Turner.
Anthem, I will always give thanks.

VOL. IV.

Amner. Whole Service, in D minor. ('Caesar's').
Anthem, O sing unto the Lord.
Do. Lord, I am not.
Do. Remember not.
Tye. Do. O God, be merciful.
Barcroft. Anthem, O Almighty God.
O. Gibbons. Do. Lift up your heads. a 6.
Farrant. Do. O Lord God Almighty. a 4.
Wilkinson. Do. I am the resurrection.
Laud. Do. Praise the Lord.
Shepherd. Anthem. Haste Thee, O God. a 4.
Fox. Do. Teach me Thy way. a 4.
Gibbs. Do. Have mercy upon me. a 4.
Hilton. Do. Lord for Thy tender. a 4.
Mudd. Do. O God, that hast prepared. a 4.
Wilkinson. Do. O Lord God. a 4.
Lugg. Whole Service, in D.
Hooper. Anthem, Almighty God.
Tye. Do. O Lord, deliver me. a 5.
Amner. Anthem, Sing, O heavens. a 7.
Hutchinson. Do. Behold how good. a 4.
Ramsey. Whole Service, in F.
Locke. Anthem, When the Son of man.
Do. Sing unto the Lord.
Chr. Gibbons. Anthem, How long wilt thou?
Blow. Whole Service, in A.
Anthem, I beheld and lo a great.
Do. O sing unto God.

Blow. Anthem, Why do the heathen.
Do. We will rejoice.
Do. O Lord, Thou hast redeemed.
Do. Thy righteousness, O Lord.
Do. God is our hope. a 8.
Do. O God, give thanks. a 5.
Purcell. Whole Service, in B[¹].
Anthem, O give thanks.
Do. Behold I bring you.
Do. Be merciful.
Aldrich. Whole Service in A.
Anthem, I will love Thee.
Do. The Lord is King.
Do. Give the king thy judgment.
Do. If the Lord Himself.
Do. O Lord, I have heard.
Locke. Anthem, Lord, let me know mine end.
Do. Not unto us.
E. Gibbons. Anthem, How hath the city sat desolate.
Hall. Whole Service, in E[¹].
Anthem, Let God arise. a 2.
Do. O clap your hands. a 3.
Do. By the waters. a 3.
Norris. Morning Service, in G minor.
Anthem, Blessed are those.
Do. I will give thanks.
Wildbore. Anthem, Almighty and everlasting.
Clark. Anthem, The earth is the Lord's. a 4.
Do. Hear my crying.
Do. Praise the Lord. Full.
Do. Bow down Thine ear. a 3.
Tudway. Anthem, The Lord hath declared.
Purcell. Anthem, Blessed is the man.
Do. Thou knowest, Lord.

VOL. V.

Purcell. Te Deum, in D.
Jubilate, in D.
Tudway. Anthem, Is it true?
Do. Sing we merrily.
Do. My God, my God.
Do. Man that is born.
Do. I am the resurrection.
Do. I heard a voice.
Do. I will lift up.
Do. I cry, O heavens.
Do. I will sing (Blenheim).
Do. Thou, O God.
Evening Service, in B[¹].
Turner. Whole Service, in E.
Anthem, The Queen shall rejoice.
Do. Behold now, praise.
Do. Lord, Thou hast been.
Do. The Lord is righteous.
Hawkins. Whole Service, in A.
Anthem, O Lord, grant the Queen.
Do. My God, my God.
Do. Lord, Thou art become.
Do. Lord, who shall dwell.
Do. Bow down Thine ear.
Holmes. Anthem, Arise, shine!
Cooper. Do. I waited patiently.
Wankles. Do. Awake up my glory.
Richardson. Do. O Lord God of my salvation.
Bishop. Morning Service, in D.
Anthem, O Lord our Governor.
Wilson. Evening Service, in G.
Hart. Anthem, I will give thanks.

Hart. Anthem, Praise the Lord.
Lamb. Evening Service, in E minor.
Anthem, Unto Thee have I cried.
Do. O worship the Lord.
Goldwin. Whole Service in F.
Anthem, O Lord God of hosts.
Do. Hear me, O God.
Croft. Anthem, We will rejoice.
Do. I will sing.
King. Whole Service, in F.
Anthem, Hear, O Lord.
Do. Hear my crying.
Do. Sing unto God.
Holmes. Anthem, I will love Thee, O Lord.
Williams. Evening Service, in G.
Woolcot. Morning Service in G.
Anthem, O Lord, Thou hast cast.
Bowman. Anthem, Shew yourself joyful.
Croft. Anthem, Praise the Lord, O my soul.
Do. I will always give thanks.
Church. Whole Service, in F.
Anthem, O Lord, grant the Queen.
Do. Righteous art Thou.
Do. Praise the Lord.
Do. Lord, Thou art become.
Weldon. Anthem, Hear my crying.

¹ This anthem is more probably by William Mundy, although the Durham parthbooks assign it to John Shepherd.

VOL. VI.

Croft. Morning Service, in D. (Orch.)	Richardson. Evening Service in C. 1713.
Tudway. Anthem, My heart rejoiceth. (Orch.)	Goldwin. Anthem, O praise God. # 2.
Do. Behold how good.	Do. I will sing. # 4.
Do. O praise the Lord.	Do. O be joyful.
Do. Arise, shine.	Broderip. Whole Service, in D. Anthem, God is our hope.
Do. Plead Thou.	Jones. Evening Service, in F. Greene. Anthem, O sing unto the Lord. # 5.
Do. Give the Lord the honour.	Do. Bow down Thine ear. # 6.
Roseingrave. Anthem, Arise, shine. (Orch.)	C. King. Evening Service, in Bb. Greene. Anthem, O God, Thou art my God. Solo.
Nelson. Morning Service, in G. Lamb. Anthem, If the Lord Himself.	Do. O give thanks.
Do. I will give thanks. # 3.	Walkly. Morning Service, in Bb. Church. Whole Service, in E minor.
Goldwin. Anthem, Ascribe unto the Lord.	Anthem, Turn Thy face from my sins.
Do. Thy way, O God.	Do. Blessed are those.
Hall. Do. Comfort ye my people. The souls of the righteous.	Hawkins. Anthem, Merciful Lord.
Finch. Te Deum in G minor. Anthem, Grant we beseech Thee.	Croft. Anthem, Offer the sacrifice. # 4.
Hawkins. Whole Service, in G. Anthem, Blessed be Thou.	Do. I cried unto the Lord.
Do. O Lord my God.	Hendale (Hendel). Te Deum and Jubilate, in D. (Orch.) 1713.
Hawkins, jun. Anthem, O praise the Lord.	

TÜRK, DANIEL GOTTLÖB (b. Clausswitz, near Chemnitz, Saxony, Aug. 10, 1756; d. Halle, Aug. 26, 1813), writer on theory, son of a musician in the service of Count Schönburg, learned first from his father, and afterwards from Homilius at the Kreuzschule in Dresden. In 1772 he went to the University of Leipzig, where he became the pupil and friend of J. A. Hiller, who procured his admittance as a violinist to the opera and the Grosses Concert. About this period he produced two symphonies and a cantata. In 1776, owing to Hiller's influence, he became cantor of S. Ulrich at Halle, and in 1779 Musikdirector of the University. In 1787 he was made organist of the Liebfrauenkirche. Türk was the author of several books on the theory of music which have become recognised text-books: *Von dem wichtigsten Pflichten eines Organisten* (1787); *Clavierschule* (1789),¹ and a Method for beginners compiled from it (1792); and *Kurze Anweisung zum Generalbassspielen* (1791); all of which passed through several editions. In 1806 he prepared and in 1808 published an *Anleitung zu Temperaturberechnung* . . . with special reference to Kirnberger's *Kunst des reinen Satzes*. In 1808 he was made doctor and professor of musical theory by the University. He died after a long illness. His compositions—PF. sonatas and pieces, and a cantata 'The Shepherds of Bethlehem' (1782)—once popular, have wholly disappeared.

F. G.

TULOU, JEAN LOUIS (b. Paris, Sept. 12, 1786; d. Nantes, July 24, 1865), eminent French flute-player and composer. He was the son of a good bassoon-player named Jean Pierre Tulou (b. Paris, 1749; d. 1799), and entered the Conservatoire very young, studied the flute with Wunderlich, and took the first prize in 1801. He first made his mark at the Théâtre Italien, and in 1813 succeeded his master at the Opéra. In 1816 the production

of 'Le Rossignol,' an insignificant opera by Lebrun, gave him an opportunity of showing his powers in a series of passages *à deux* with the singer, Mme. Albert, and proving himself the first flute-player in the world. Drouet himself acknowledged the superiority of a rival whose style was so pure, whose intonation was so perfect, and who drew so excellent a tone from his 4-keyed wooden flute. His droll comments on the *régime* of the Restoration were resented by the Ministry in a practical form, for he was passed over in the appointment of flute-player to the Chapelle du Roi, and also in the professorship at the Conservatoire on Wunderlich's death. In consequence of this slight he left the Opéra in 1822, but returned in 1826 with the title of first flute solo. On Jan. 1, 1829, he became professor at the Conservatoire, where his class was well attended. Among his pupils may be mentioned V. Coche, Rémusat, Forestier, Donjon, Brunot, Altès and Demersseman. Tulou frequently played at the Société des Concerts, and wrote much for his instrument, especially during the time he was teaching. His works include innumerable airs with variations, fantasias on operatic airs, concertos, and grand soli with orchestra, a few duets for two flutes, a grand trio for three flutes, soli for the Conservatoire examinations, etc. In 1856 Tulou retired from the Conservatoire and the flute-making business. His trade-mark was a nightingale, doubtless in allusion to the opera in which he made his first success. Both as performer and manufacturer he opposed Boehm's system. Nevertheless he took medals at the Exhibitions of 1834, 1839, 1844 and 1849, was honourably mentioned at that of 1851 in London, and gained a medal of the first class at the Paris Exhibition of 1855. After his retirement he lived at Nantes. g. c.

TUMA, FRANZ (b. Kosteletz, Bohemia, Oct. 2, 1704; d. Convent of the Barmherzigen Brüder, Vienna, Feb. 4, 1774), a distinguished church-composer, and player on the viola da gamba. He was a pupil of Černohorsky (Regens chori at Prague, with whom he also fulfilled an engagement as tenor-singer), and of J. J. Fux in Vienna. In 1741 he became Kapellmeister to the Dowager Empress Elisabeth, on whose death in 1750 he devoted himself entirely to his muse. In 1768 he retired to the Premonstratensian monastery of Gera, but after some years returned to Vienna. Tuma was greatly respected by connoisseurs of music amongst the court and nobility, and received many proofs of esteem from Maria Theresa. His numerous church-compositions (see Q.-L. for list) are distinguished by a complete mastery of construction, and a singular appropriateness between the harmony and the words, besides striking the hearer as the emanations of a sincerely devout mind. Especially celebrated are his Masses in D minor

¹ See APOGGIATURA and ARPEGGIO, where his rules are quoted.

and E minor, which are masterpieces in the line of Bach. As a chorister in the cathedral of Vienna, Haydn had the opportunity of becoming practically acquainted with the works of this solid master.

C. F. P.

TUNDER, FRANZ (b. Lübeck, 1614; d. there, Nov. 5, 1667), organist and church composer.

While still a pupil of Frescobaldi at Rome, he was recalled to Lübeck in 1641 to take the important position of organist to the Marienkirche. His abilities found speedy recognition at the hands of his fellow-citizens, who granted him successive increases of salary and other advantages. His efforts, too, for the artistic development of church music with the aid of instrumental accompaniment were heartily seconded. Taking advantage of the fact that a violist and lutenist were usually engaged to perform in church, on the occasion of the official attendance of the magistrates, he gradually increased the number of instrumentalists for service on festival occasions, and surrounded himself with a phalanx of efficient violin, viola and trombone players. Out of these small beginnings originated the afterwards famous 'Abendmusiken' of Lübeck, which took place more especially in the season of Advent. One of his instrumentalists, who is also said to have been his pupil in composition, was Thomas Baltzar, who afterwards acquired celebrity in England as the most astonishing violin-player of his day. Tunder was succeeded on his death by Dietrich BUXTEHUDE (q.v.), who, it would appear, married the daughter of his predecessor in order to succeed to the position, a condition which was afterwards insisted upon in the case of Buxtehude's own successor.

Of Tunder's compositions nothing was ever printed during his lifetime, and nothing was known until a happy accident led to the discovery in the Royal Library at Upsala in Sweden of a large number of church compositions by Buxtehude, Tunder, and other North German masters, which a former Swedish Royal Kapellmeister at Stockholm, Gustav Düben by name, had made it his business to collect and copy. Seventeen of Tunder's church works have thus been rescued from oblivion, and are now accessible in *D.D.T.* (first series), vol. iii., edited by Seiffert. They include pieces for solo voices with accompaniment for one or more strings and organ, as well as choral works designed on a larger scale. Some are Choral-cantatas with the Choral-melody sometimes as vocal solo with full accompaniment of strings, and also arranged and varied with other combinations of voices and instruments. One expressive little piece, 'Ach Herr, lass deine lieben Engelein,' for soprano solo with accompaniment of strings and organ, has frequently been performed in Germany. It may be observed that the texts are mostly suitable for the season of Advent. Besides these vocal

works of Tunder seven Choral-variations for organ by him exist in MS. in the Library at Lüneburg. Of these, two have been published in modern times, one, 'Komm Heiliger Geist,' is lithographed in Eitner's *Monatshefte* for 1886; the other, 'Jesus Christus unser Heiland,' has appeared in a collection of 'Choral-Vorspiele älterer Meister,' edited by Karl Straube.

BIBL.—WILHELM STAHL, *Franz Tunder und Dietrich Buxtehude*, Leipzig, 1926; CARL STREHL, *Die Organisten an der St. Marien Kirche*, etc., Bd. 5, heft 2 of the *Zeitschrift des Vereins für Lübeckische Geschichte und Altertumskunde*. J. R. M.

TUNE appears to be really the same word as tone, but in course of a long period of familiar usage it has come to have a conventional meaning which is quite different.

The meaning of both forms was at first no more than 'sound,' but tune has come to mean not only a series of sounds, but a series which appears to have a definite form of some kind, either through the balance of phrases or periods or the regular distribution of groups of bars or cadences. It may be fairly defined as formalised melody: for whereas melody is a general term which is applicable to any fragment of music consisting of single notes which has a contour—whether it is found in inner parts or outer, in a motet of Palestrina or a fugue of Bach—tune is more specially restricted to a strongly outlined part which predominates over its accompaniment or other parts sounding with it, and has a certain completeness of its own. Tune is most familiarly illustrated in settings of short and simple verses of poetry, or in dances, where the outlines of structure are always exceptionally obvious. (See MELODY.)

C. H. H. P.

TUNING (to tune; Fr. *accorder*; Ger. *Stimmen*; Ital. *accordare*); the adjustment to a recognised scale of any musical instrument capable of alteration in the pitch of the notes composing it.

The violin family, the harp, piano, organ and harmonium, are examples of instruments capable of being tuned. The accordance of the violin, viola and violoncello, as is well known, is in fifths which are tuned by the player.¹ The harpist also tunes his harp. But the tuning of the piano, organ and harmonium is affected by tuners who acquire their art, in the piano especially, by long practice, and adopt tuning as an independent calling, having little to do with the mechanical processes of making the instrument. At Antwerp, as early as the first half of the 17th century, there were harpsichord-tuners who were employed in that vocation only; for instance, in *De Liggeren der Antwerpsche Sint Lucasgilde*, p. 24, edited by Rombouts and Van Lerius (the Hague), we find named as a master Michiel Colyns, *Claversingelstelder Wynmeester*, i.e.

¹ The accordancess of the guitar, lute, theorbo and similar instruments tuned by fifths, fourths and thirds will be found in the descriptions of the instruments.

harpisichord-tuner and son of a master (in modern Flemish *Clavecimbel-steller*).

In all keyboard instruments the chief difficulty has been found in what is known as 'laying the scale, bearings, or groundwork,' of the tuning; an adjustment of a portion of the compass, at most equal in extent to the stave

with the alto clef , from which the

remainder can be tuned by means of simple octaves and unisons. We have records of these groundworks by which we are enabled to trace the progress of tuning for nearly four hundred years. The earliest are by Schlick (1511), Ammerbach (1571), and Mersenne (1636). It is not, however, by the first of these in order of time that we discover the earliest method of laying the scale or groundwork, but the second. Ammerbach published at Leipzig in 1571 an *Orgel oder Instrument Tabulatur*, in which he gives the following directions for the groundwork. We will render this and the examples which follow into modern notation, each pair of notes being tuned together.

For the Naturals (*das gelbe Clavier*).

For the Sharps (*Obertasten*).

must be Major Thirds
(*müssen grosse Terzen sein*).

are Minor Thirds (*tiefer erklingen*).

There is not a word about temperament!

By the stave for the naturals we may restore the tuning of the Guido scale of the earliest organs and clavichords, which had only the B \flat as an upper key in two octaves. These would be provided for either by tuning up from the G (a minor third) or down from the F (a fifth), all the intervals employed being approximately just. We may also suppose that from the introduction of the full chromatic scale in organs before 1426, to the date of Schlick's publication 1511, and indeed afterwards, such a groundwork as Ammerbach's may have sufficed. There was a difference in clavichords arising from the fretting, to which we will refer later. Now, in 1511, Arnolt Schlick, a blind organist alluded to by Virdung, in his *Spiegel der Orgelmacher* (Mirror of Organbuilders)—republished in Berlin in 1869,—came out as a reformer of tuning. He had combated the utter subordination of the sharps or upper keys to the natural notes, and by the invention of a system of tuning of fifths and octaves had introduced a groundwork which afforded a kind of rough-and-ready unequal temperament and gave the sharps a quasi-independence. This

is his scale which he gives out for organs, clavicymbals, clavichords, lutes, harps, intending it for wherever it could be applied.

He gives directions that ascending fifths should be made flat to accommodate the major thirds, particularly F-A, G-B \sharp , and C-E,—excepting G \sharp , which should be so tuned to E \flat as to get a tolerable cadence or dominant chord, the common chord of E to A. The G \sharp to the E \flat , he calls the 'wolf,' and says it is not used as a dominant chord to cadence C \sharp . Indeed, from the dissonance attending the use of C \sharp and A \flat , they being also out of tune with each other, he recommends the player to avoid using them as keynotes, by the artifice of transposition.

The fact of Ammerbach's publication of the older groundwork 60 years later proves that Schlick's was slow to commend itself to practice. However, we find Schlick's principle adopted and published by Mersenne (*Harmonie universelle*, Paris, 1636), and it was doubtless by that time established to the exclusion of the earlier system. With this groundwork Mersenne adopted, at least in theory, equal temperament (see TEMPERAMENT), of which in Liv. 2, Prop. xi. p. 132, of the before-named work, he gives the correct figures, and in the next volume, Prop. xii., goes on to say that equal temperament is the most used and the most convenient, and that all practical musicians allow that the division of the octave into twelve half-tones is the easiest for performance. Ellis, in his exhaustive Lecture on the History of Musical Pitch (*Journal of the Society of Arts*, Appendix of Apr. 2, 1880), considers corroboration of this statement necessary. We certainly do not find it in Mersenne's notation of the tuning scale, which we here transpose from the baritone clef. For the tuner's guidance

Les Feintes. The Sharps and Flats.

the ascending fifths are marked as flat, the descending as sharp, but the last fifth, G \sharp -E \flat , is excepted as being the 'defect of the accord.' With this recognition of the 'wolf' it is clear that Mersenne was not thinking of equal

temperament. But Schlick's principle of fifths and octaves had become paramount.

We will now go back to the interesting 'gebunden' or fretted CLAVICHORD (*q.v.*). The octave open scale of this instrument is F G A B \flat C D E \flat F, or C D E \flat F G A B \flat C, according to the note which may be accepted as the starting-point. Both of these are analogous to church modes, but may be taken as favourite popular scales, before harmony had fixed the present major and minor and the feeling had arisen for the leading note. We derive the fretted clavichord tuning from Ammerbach thus :

Later on, no doubt, four fifths up, F C G D A \sharp and two fifths down, F B \flat E \flat , would be used with octaves inserted to keep the tuning for the groundwork, in the best part of the keyboard for hearing. We have found the fretted or stopped semitones, which included the natural B and E, adjusted by a kind of rough temperament, intended to give equal semi mean-tones and resembling the lute and guitar semitones.

When J. Sebastian Bach had under his hands the 'bundfrei' or fret-free clavichord, each key having its own strings, he could adopt the tuning by which he might compose in all the twenty-four keys, from which we have the 48 Preludes and Fugues.¹

Emanuel Bach (*Versuch*, etc., Berlin, 1753) gives, p. 10, very clear testimony as to his own preference for equal temperament tuning. He says we can go farther with this new kind of tuning although the old kind had chords better than could be found in musical instruments generally. He does not allude to his father, but brings in a hitherto unused interval in keyboard instrument tuning—the fourth. Not, it is true, in place of the fifth ; but as one of the trials to test the accuracy of the tuning. At the present time beginners in tuning find the fourth a difficult interval when struck simultaneously with the note to which it makes the interval : there is a feeling of dissonance not at all perceptible in the fifth. It is therefore not strange that for centuries we do not find it used for instruments capable of more or less sustained harmony. The introduction of a short groundwork for the piano, confined to the simple chromatic scale between

is traditionally attributed to Robert Wornum, early in the 19th century. In this now universally adopted system for the piano, the

fourth is regarded and treated as the inversion of the fifth ; and for the intentional 'Mean-tone' system (see TEMPERAMENT) employed almost universally up to about 1840-50, the following groundwork came into use :

—the wolf being, as of old, at the meeting of G \sharp and E \flat . The advantages of the short system were in the greater resemblance of vibration between notes so near, and the facilities offered for using common chords as trials. It will be observed that the pitch-note has changed from F to the treble C ; possibly from the introduction of the TUNING-FORK in 1711. In Great Britain and Italy a C-fork has been nearly always adhered to since that date for keyboard instruments ; but for the violins, A (on account of the violin open string), which in France and Germany has been also adopted as the keyboard tuning-note. But the pitch-pipe may have also had to do with the change of pitch-note.

The long tuning scale did not at once go out of use ; it was adhered to for organs, and for pianos by tuners of the old school. It went out in Broadwood's establishment with the last tuner who used it, about the year 1869. The change to intentional equal temperament in pianos in 1846, in England, which preceded by some years the change in the organ, was ushered in by an inclination to sharper major thirds : examples differing as different tuners were inclined to more or less 'sweet' common chords of C, G and F. The wolf ceasing to howl so loudly, another short groundwork, which went through the chain of fourths and fifths without break, became by degrees more general with the piano until it prevailed entirely. It is as follows :

and is also the groundwork for tuning the harmonium.

The old way of tuning pianos by the tuning hammer (or a tuning lever) remains in vogue, notwithstanding the ever-recurring attempts to introduce mechanical contrivances of screws, etc., which profess to make tuning easy and to bring it more or less within the immediate control of the player. Feasible as such an improvement appears to be, it has not yet

¹ He did not get this tuning on the organ, it would appear, although his preference for it is shown in Ellis's *History of Musical Pitch* already referred to. (See the *Journal of the Society of Arts*, Mar. 5, 1800.)

come into the domain of the practical. The co-ordination of hand and ear, possessed by a skilled tuner, still prevails, and the difficulty of getting the wire to pass over the bridge continuously and equally, without the governed strain of the tuner's hand, is still to be overcome before a mechanical system can rival a tuner's dexterity.

In considering practical tuning we must at once dismiss the idea that the ear of a musician is capable of distinguishing small fractions of a complete vibration in a second. Professor Preyer of Jena limited the power of perception of the difference of pitch of two notes heard in succession by the best ears to about one-third of a double vibration in a second in any part of the scale. By the phenomena of beats between two notes heard at the same time we can make much finer distinctions, which are of great use in tuning the organ and harmonium; but with the piano we may not entirely depend upon them, and a good musical ear for melodic succession has the advantage. In fact the rapid beats of the upper partial tones frequently prevent the recognition of the slower beats of the fundamental tones of the notes themselves until they become too faint to count by. The tuner also finds difficulty in tuning the treble of a piano by beats only.

Still, to tune the groundwork of a piano to a carefully measured set of chromatic tuning-forks, such as Scheibler formerly provided, would ensure a nearer approach to a perfect equal temperament than the existing system of fourths and fifths, with the slight flattening upwards of fifths and downwards of fourths, to bring all within the perfect octave. But to achieve this, a normal pitch admitting of no variation is a necessity, because no tuner could give the time to work by a set of forks making beats with the pitch wanted. A. J. H.

THE ORGAN TUNER'S PRACTICE.—The organ no longer remains with the groundwork of fifths and octaves only; modern tuners use fifths and fourths in the treble C-C, of the Principal of 4-ft. pitch; the organ being tuned entirely by the rapidity of the beats arising from the slight deviation from perfection of these intervals. (See *ORGAN*, Vol. III. p. 762.)

In equal or even temperament each fifth is tuned slightly narrower than a perfect fifth, (see *TEMPERAMENT*), and each fourth slightly wider than a perfect fourth; the fourth being rather more imperfect intervals—pitch for pitch—than the fifths.

The pulsations or beats in tuning necessarily follow the law of vibrations and double their rate in the octave above; and the number of beats or pulsations of these intervals in this octave has been computed to average 75 per minute in 8-ft. pitch (Diapason), for the pitch C=264 to C=528, which is somewhat sharper than the Diapason Normal, now (1926) in

general use (see *PITCH*). These figures must be doubled for use with the Principal of 4-ft. pitch, viz. 150 beats per minute. Music being a science of ratios no two intervals of the same degree should beat at the same rate, but *evenly* quicken, as the pitch rises, to double the rate at the octave above, as before mentioned. Below is given the order of the intervals used in tuning the bearings on the Principal 4 ft.

When the tuning of this series is completed the D# and G# above should prove to be an evenly wide fourth with the others. Before proceeding farther it is well to test these bearings in such major thirds, minor sixths, and triads as lie within the compass of this septave, after which the octaves above and below must be carefully tuned, and tested with their own fifths and fourths (below or above) already tuned.

When the full compass of the Principal 4 ft. has been tuned and tested in fifths, fourths, major thirds, major tenths and common chords in chromatic order, the remainder of the stops may be tuned to the Principal 4 ft., in the order in which they stand on the sound-board, each stop being tested independently afterwards.

Mutation stops are tuned as pure intervals to the ground or prime tone; and in the *VOIX CÉLESTES* (q.v.) one rank of pipes is tuned to beat with the other (see *VOIX CÉLESTES*).

The means by which the various pipes are tuned are given in the article *ORGAN*.

Harmoniums and American organs are tuned by scraping the metal tongue of the reed near the free end to sharpen it, and near the attached end to flatten it.

Of equal or even temperament tuning it must be said that it can only be tolerated by means of fine tuning, any deviation from which offends and ultimately vitiates the ear; such tuning can only be quickly achieved by years of study and practice.

Space will not permit of entering into the minutest details, or of dealing with the side issues connected with this subject, but the reader may be referred to the Bibliography of organ-literature to be found in vol. iii., and to such works as: *An Essay on the Theory and Practice of Tuning in General, and on Scheibler's Invention of tuning Pianofortes and Organs by the Metronome in Particular* (Robt. Cocks & Co., 1853); *The Tuner's Guide* (Musical Bouquet Office); *The History of the Piano-*

forte, by Edgar Brinsmead (Cassell, Petter & Galpin); *Construction, Tuning and Care of the Pianoforte*, by Dr. Henry Fisher (J. Curwen & Sons); *Pianos ('Work' Handbook, Cassell & Co.)*. T. E.

TUNING-FORK (Fr. *diapason*; Ger. *Stimmgabel*; Ital. *corista*). This familiar and valuable pitch-carrier was invented in 1711 by John Shore, Handel's famous trumpeter. From a musical instrument it has become a philosophical one, chiefly from its great permanence in retaining a pitch; since it is flattened by heat and sharpened by cold to an amount which is determinable for any particular observations. A fork is tuned by filing the ends of the prongs to sharpen, and between them at the base, to flatten; and after this it should stand for some weeks and be tested again, owing to the fact that filing disturbs the molecular structure. Rust affects a fork but very little, the effect being to flatten it slightly. Tuning-forks have been used to construct a keyboard instrument, but the paucity of harmonic upper partial tones causes a monotonous quality of tone. An account of the combination of tuning-forks into a tonometer for the accurate measurement of pitch will be found under **SCHIEBLER**, the inventor. A. J. H.

The valuable collection of tuning-forks made by Dr. A. J. Ellis is now in the Royal Institution, together with those of the writer, A. J. H. P. KINS.

TUNING-SLIDE (organ), an adjustable metal clip or cylinder, attached to the upper end of open metal flue-pipes, for convenience in tuning. T. E.

TUNSTED, SIMON (b. Norwich, 14th century), the reputed author of the treatise *De quatuor principalibus musicæ*, though himself born at Norwich, derived his surname from Tunstead in Norfolk, of which place his father was a native.

He became one of the *Fratres Minores* of the Order of St. Francis at Oxford, and it was there that he is said to have taken the degree of Doctor of Theology. He appears to have been well versed in all the seven liberal arts, but, like Walter Odington, especially in music and astronomy. The only literary works attributed to Tunsted, besides that above referred to, are a commentary on the *Meteora* of Aristotle and additions to Richard Wallingford's *Albion*; but the work by which his name has been, rightly or wrongly, handed down to posterity is the musical one. Of this there are two MSS. in the Bodleian Library, numbered Bodley 515 and Digby 90. Owing to the former MS. being described in the old catalogue of 1697 as '*De musica continua et discreta cum diagrammatibus*,' many musical historians have believed that there are two distinct works by

this author; but the only real difference is that the Digby MS. contains the prologue beginning '*Quemadmodum inter triticum et zizania*,' which the Bodley MS. omits. The work itself contains warrant for both titles. From the colophon to each MS. we learn that the treatise was written in 1351, when Simon Tunsted was Regent of the Minorites at Oxford. He is said to have afterwards become Head of the English branch of his Order,¹ and to have died in the nunnery of St. Clara, at Bruisyard, in Suffolk, in 1369.

The *De quatuor principalibus* treats of music in almost every form then known, from definitions of musical terms in the *Primum principale* down to an account of '*Musica mensurabilis*' in the *Quartum principale*. This latter part is perhaps the most important of the whole work. Tunsted quotes Philip de Vitry '*qui fuit flos totius mundi musicorum*.' The whole treatise has been printed by de Coussemaker. The British Museum contains a third copy of *De quatuor principalibus* (Add. MSS. 8866), and in another MS. (Add. MSS. 10,336) there is an epitome of several chapters of the *Secundum principale*, written by a Fellow of New College, Oxford, early in the 16th century. A. H. H.

TUOTILO (**TUTILO**), monk of St. Gall, c. 900, pupil of Marcellus and Iso, a master in all arts and sciences, who could play all the musical instruments of his time, and instructed the sons of the nobility in their use. He composed a Christmas tropes, '*Hodie cantandus est nobis puer*,' which is looked upon as the origin of the Christmas (Miracle) plays (Ambros, vol. 2; *Riemann*, under both names).

TURANDOT, a 5-act play of Schiller (after Carlo Gozzi), founded on a Chinese subject, orchestral music to which was composed by Weber in 1809. His music consists of an overture and six numbers, three of them marches, all more or less founded on a Chinese melody, which Weber took from Rousseau's Dictionary of Music (vol. ii. plate N), and which opens the overture exactly as Rousseau gives it.

The overture was originally composed as an '*Overture Chinesa*' in 1806, and afterwards revised. The first performance of the overture in its present shape was at Strassburg, Dec. 31, 1814. The play has been 'freely

¹ Twenty-ninth Provincial of the English Friars Minor in 1360.
W. H. G. F.

translated' into English by Sabilla Novello (1872).

For other works (operas, etc.) on this subject see REISSIGER, VESQUE VON PUTTLINGEN (J. Hoven), BUSONI, PUCCINI.

TURBAN, CHARLES PAUL (b. Strassburg, Oct. 3, 1845; d. Paris, May 11, 1905), was educated at the Paris Conservatoire, where he obtained a second and first accessit for clarinet in 1862 and 1863 respectively, a second prize in 1864 and a first in 1865. He was a member of the orchestras of the Gymnase, the Théâtre Italien, and the Opéra successively. He held the position of solo clarinet at the Opéra and at the Conservatoire concerts. He was associated with Taffanel in the foundation of the Société des Instruments à vent (see PARIS) in 1879, and made many journeys with the other members of the society, winning a European reputation. He became professor of the clarinet in the Paris Conservatoire in 1900, and shortly afterwards retired from the Opéra.

TURCA, ALLA, i.e. in Turkish style; the accepted meaning of which is a spirited simple melody, with a lively accentuated accompaniment. The two best examples of this are the finale to Mozart's PF. Sonata in A (Köchel, 331), which is inscribed by the composer 'Alla Turca' (and which has served on occasion as ballet-music for the 'Seraglio') and the theme of Beethoven's variations in D (op. 76), which he afterwards took for the 'Marcia alla Turca,' which follows the Dervish chorus in the 'Ruins of Athens.'

TURCO IN ITALIA, IL, opera by Rossini. Produced La Scala, Milan, Aug. 14, 1814; His Majesty's, May 19, 1821.

TURE-LURE (soft u), or **TOURE-LOURE**, a very ancient lyrical burden or refrain, probably of Provençal origin. The old English form is 'tirra-lirra' (Shakespeare, 'The lark that tirra-lirra chants.' Compare the French 'Turlut,' a titlark; 'Turlutaine,' a bird-organ). In old French music it is also found as 'Tur-lu-tu-tu,' 'Tur-lu-ru' (in a popular air 'Io canto tur-lu-ru'), 'tur-lur-ibo,' etc. The form 'turelure' was also employed for 'chanson.' It often occurs in the old French burlesques. The following specimens, taken from *Les Parodies du Nouveau Théâtre Italien*, 1731, will illustrate its use.

1. 'Ho! Ho! toure-louribo.'

The term still survives in English popular music in the forms 'tooral-looral-looral,' and 'tol-de-rol.'

E. J. P.

TURGES (STURGES), EDMUND (late 15th and early 16th cent.), English composer. Barclay Squire (*Archæologia*, vol. lvi.) refers to two Turges, William and Edmund (both of Petworth), who came to King's College, Cambridge, the former in 1513, the latter in 1522. An 'Inventarye of the Pryke Songys longynge to the Kyngys College in Cambrye (in 1529)'—printed in *The Ecclesiologist* for 1863—refers to '6 bokys off parchmente conteyninge Turges massys and antems'; but as many of Turges's compositions date back to the first years of the century, he cannot be identified with either of the Petworth Turges mentioned above. He is more likely to have been, as Barclay Squire suggests, the son of a John Turges of an earlier generation, who was harper to Queen Margaret. One of Turges's part-songs beginning:

'From stormy wyndis and grevous whethir
Good Lord preserve the estrige fethir,'

celebrates the marriage of Prince Arthur and Catherine of Aragon, and must therefore have been written between Nov. 14, 1501 (the date of the marriage), and Apr. 2, 1502 (that of the Prince's death). The Kyrie and Gloria from a 3-part Mass by Turges are in B.M. Add. MSS. 5665/109b, which also contains compositions by Mower, Cornyshe and Sir Thomas Packe, and was written before 1510, as copies of documents bearing this date are bound up in it. A Magnificat by Turges is at Caius College, Cambridge, and a 4-part 'Gaude flore virginal' is in the Eton College MS.—written between 1490 and 1504 (see Davey, *Hist. Eng. Mus.*). This MS. originally contained 97 pieces, of which only 43 remain, and the index shows that another Hymn to the Virgin by Turges is among the missing compositions.

Alas, it is I, a 3. B.M. Add. MSS. 5465/17b; B.M. Add. MSS. 11,558/7b. Score.

Enforce yourself, a 3
 (2nd part) Sovereign Lord, a 3 } B.M. Add. MSS. 5465/115b.

J. M^{re}.

TURIN. If in some ways the musical organisations of Turin cannot boast the great traditions of other Italian cities, the catholic tastes and the enterprise of its musicians and music-lovers have given to the Piedmontese capital the primacy in other respects. The Conservatorio does not equal in importance the schools of Milan and Bologna, yet the orchestral concerts of Turin have long had the reputation of being second to none. In its devotion to the classics Turin perhaps stands first amongst the Italian centres. Established by Pedrotti in 1872 the popular concerts have served their purpose to make the public familiar with symphonic music, and the great German composers have ever found a ready welcome. At the same time the orchestra grew steadily in number and in excellence, and its visit to the Paris exhibition of 1878 was a triumph for the players and their conductors, Pedrotti and Mancinelli. Pedrotti retired in 1882 and the popular concerts ceased, but during the Exhibition of 1884 the local orchestra conducted by Franco Faccio gave a remarkable series of concerts with programmes in which the most popular name was that of Wagner. A number of symphonic works by Italians were also performed, and although it would be idle to pretend that the symphonies of such men as Foroni and Bolzoni compare favourably at any point with their classical models, it should not be forgotten that they, with Sgambati and Martucci, devoted themselves to symphonic music at a time when, for most Italians, music and opera were synonymous. In 1895 another concert society was formed under the chairmanship of Count E. de Villanova, and during the exhibition of 1898 a very successful series of forty-eight concerts was given, mainly conducted by Arturo Toscanini.

The Teatro Regio plays an important part in the musical life of the city. Giovanni Bolzoni, who did much to create a tradition and establish a high standard of critical appreciation in the public, was appointed conductor in 1884 (on Verdi's recommendation); five years later he became director of the Liceo Musicale, a position he held for twenty-nine years. It was at the Teatro Regio that Wagner's 'Lohengrin' triumphed (in 1877) for the first time in Italy, and the Turinese since have been supposed to nourish a warmer admiration for Wagner than any other Italian audience. The theatre was considerably altered and renovated in comparatively recent years and reopened in 1906. Two operas of Puccini were produced at the Teatro Regio for the first time: 'Manon Lescaut' (1893) and 'Bohème' (1896). F. B.

TURINA, JOAQUIN (b. Seville, Dec. 9, 1882), Spanish composer, pianist and teacher. After preliminary studies in his native town and Madrid, he worked from 1905-14 with Vincent d'Indy at the Schola Cantorum in Paris, and has written a small Spanish *Enciclopedia abreviada de la música* (Madrid, 1917), which embodies the teaching of his master. His musical outlook is different from that of FALLA; his style is distinctive. Yet they are alike in their Spanish seriousness of purpose and their attitude to music as being an art, and not a diversion 'for the frivolity of women and the dissipation of men.' Turina's chief interest is chamber music; but his 'Procesión del Rocío' is a brilliant orchestral study, which never fails to make its effect. His stage works include a lyric comedy, 'Margot,' music for the old morality play, *La Adúltera penitente* (by Moreto, arranged by Martínez-Sierra) and 'Jardín de oriente' (1923). His chamber music includes a PF. quintet, string quartet, 'Escena Andaluza,' viola, PF. and string quartet; 'Poema de una Sanluquena,' violin and PF.; and numerous songs of great merit. J. B. T.

TURINI, FRANCESCO (b. Prague, c. 1595; d. Brescia, 1656), learned contrapuntist, son of Gregorio Turini, cornet-player to the Emperor Rudolph II., and author of 'Teutsche Lieder' a 4, in imitation of the Italian Villanella (Frankfort, 1610). His father dying early, the Emperor took up the young Francesco, had him trained in Venice and Rome, and made him his chamber-organist. Later he became organist of the cathedral at Brescia. He published 'Messe a 4 e 5 voci a Capella,' op. 1 (Gardano, 1643); 'Mottetti a voce sola,' for all four kinds of voices (1629 and 1640); 'Madrigali a 1, 2, e 3, con sonate a 2 e 3' (1621, 1624, etc.); and 'Motetti commodi.' A canon of his is quoted by Burney, the theme of which—

was a favourite with Handel, who employs it in his organ fugue in B \flat , and in his oboe concerto, No. 2, in the same key. The phrase had been previously used by Thomas Morley, who begins his canzonet, 'Cruel, you pull away too soon your dainty lips,' with the same theme. It is also the initial phrase of Palestrina's 'Tu es Petrus,' and was employed by Bach in his well-known pedal fugue in E \flat , and by Dr. Croft in his psalm-tune, 'St. Anne's.' F. G.

TURKEY, see MUHAMMEDAN.

TURKISH CRESCENT, see GLOCKENSPIEL.

TURKISH MUSIC (*Türkische*, or *Janitscharen Musik*; Ital. *banda turca*), a term which was at one time used to denote the percussion instruments in the orchestra, bass-drum, cymbals and triangle. The band of the Janissaries,

abolished in 1825, is said to have comprised a piccolo and oboes in addition to the percussion instruments named. The modern use of percussive effects is too individual to make the collective term appropriate. G.

TURLE, (1) **JAMES** (b. Taunton, Somerset, Mar. 5, 1802; d. London, June 28, 1882), was a chorister at Wells Cathedral, under Dodd Perkins, from July 1810 to Dec. 1813. He was organist of Christ Church, Southwark, from 1819-29, and from the latter date to 1831 organist of St. James's, Bermondsey.

From 1819-31 he was assistant to Thomas Greatorex as organist and master of the choristers of Westminster Abbey, and upon Greatorex's death in 1831 was appointed his successor. In 1840-43 he was part conductor of the Ancient Concerts. In 1875 he was released from active duty by the appointment of J. F. BRIDGE (q.v.) as his assistant. From 1829-56 he was music master at the School for the Indigent Blind. He composed and edited many services, anthems, and chants, and edited, with E. Taylor, *The Art of Singing at Sight* (1846) and 'The People's Music Book.' He also composed many glees (MS.). His remarkable skill and ability as a teacher were strikingly manifested by the number of those who received their early training from him, and rose to eminence in their profession. He was buried in Norwood Cemetery.

(2) **ROBERT** (b. Taunton, Mar. 19, 1804; d. Salisbury, Mar. 26, 1877), his brother, was a chorister at Westminster Abbey from 1814 to Aug. 1821; and organist of Armagh Cathedral from 1823-72.

(3) **WILLIAM** (b. Taunton, 1795), first cousin of the preceding two, was a chorister of Wells Cathedral from 1804-10. After quitting the choir he paid a short visit to America, and on his return to England in 1812 became organist of St. James's, Taunton, which he quitted upon being appointed organist of St. Mary Magdalen's in the same town. W. H. H.

TURN (Fr. *brisée*; Ger. *Doppelschlag*; Ital. *gruppetto*), an ornament much used in both ancient and modern music, instrumental as well as vocal. Its sign is a curve ~ placed above or below the note, and it is rendered by four notes—namely, the note next above the written note, the written note itself, the note below, and the written note again (Ex. 1). It is thus identical with a figure frequently employed in composition, and known as the *half-circle* (*Halbzirkel*, *circolo mezzo*). The written note is called the principal note of the turn, and the others are termed respectively the upper and lower auxiliary notes.

1. Written. Played.

On account of its gracefulness, and also no

doubt in consequence of its presenting little difficulty of execution, the turn has always been a very favourite ornament, so much so that C. P. E. Bach says of it:

'This beautiful grace is as it were too complaisant, it suits well everywhere, and on this account is often abused, for many players imagine that the whole grace and beauty of pianoforte-playing consist in making a turn every moment.'

Properly introduced, however, it is of the greatest value, both in slow movements, in which it serves to connect and fill up long notes in a melody, and also in rapid tempo and on short notes, where it lends brightness and accent to the phrase.

When the sign stands directly above a note, the four notes of the turn are played rapidly, and, if the written note is a long one, the last of the four is sustained until its duration is completed (Ex. 2); if, however, the written note is too short to admit of this difference, the four notes are made equal (Ex. 3).

2. MOZART, Violin Sonata in G major.

3. MOZART, Rondo in A minor.

When the sign is placed a little to the right of the note, the written note is played first, and the four notes of the turn follow it, all four being of equal length. The exact moment for the beginning of the turn is not fixed; it may be soon after the written note, the four turn-notes being then rather slow (Ex. 4), or later, in which case the turn will be more rapid (Ex. 5). The former rendering is best suited to a slow movement, the latter to one of a livelier character.

4. BEETHOVEN, Sonata, Op. 10, No. 1.

5. BEETHOVEN, Sonata, Op. 2, No. 1.

Both the turn upon the written note and that which follows it may be expressed in small

grace-notes, instead of by the sign. For this purpose the turn upon the note will require three small notes, which are placed before the principal note though played within its value, and the turn *after* the note will require four (Ex. 6). This method of writing the turn is usually employed in modern music in preference to the sign.

6. MOZART, Sonata in F. Turn on the note.

MOZART, Tema con Variazioni.

The upper auxiliary note of a turn is always the next degree of the scale above the principal note, and is therefore either a tone or a semitone distant from it, according to the position in the scale held by the written note. Thus, in a turn on the first degree, the upper note is a tone above (Ex. 7), while a turn on the third degree is made with the semitone (Ex. 8). The lower auxiliary note may likewise follow the scale, and may therefore be also either a tone or a semitone from its principal note; but the effect of the smaller distance is as a rule the more agreeable, and it is therefore customary to raise the lower note chromatically in those cases in which it would naturally be a tone distant from its principal note (Ex. 9).

This alteration of the lower note is in accordance with a rule which governs the use of auxiliary notes in general, but in the construction of both the ordinary turn and the turn of the SHAKE (*q.v.*), the rule is not invariably followed. The case in which it is most strictly observed is when the principal note of the turn is the fifth degree of the scale, yet even here, when it is accompanied by the tonic harmony, an exception is occasionally met with. That Bach did not object to the use of a lower auxiliary note a tone below the principal note is proved by the four semiquavers in the subject of the C \sharp major fugue in the Well-tempered Clavier, and by others similar instances. Another and more frequent exception occurs when the *upper* note is only a semitone above the principal note, in which case the lower note is generally made a tone below (Ex. 10). In the case of a turn on the fifth degree of the *minor* scale the rule is always observed, and both notes are

a semitone distant (Ex. 11). A turn of this kind is termed a chromatic turn, because its notes form part of a chromatic scale.

10. MOZART, Violin Sonata in G.

11. MOZART, Clarinet Trio in E \flat .

All chromatic alterations in a turn can be indicated by means of accidentals placed above or below the sign, although they frequently have to be made without any such indication. An accidental above the sign refers to the upper auxiliary note, and one underneath it to the lower, as in the following example from Haydn :

12. Sonata in E \flat .

When the note which bears a turn is dotted, and is followed by a note of half its own length, the last note of the turn falls in the place of the dot, the other three notes being either quick or slow, according to the character of the movement (Ex. 13). When, however, the dotted note is followed by two short notes (Ex. 14), or when it represents a full bar of 3-4, or a half-bar of 6-8 or 6-4 time (Ex. 15), the rule does not apply, and the note is treated simply as a long note.

13. MOZART, Sonata in D.

14. BEETHOVEN, Sonata, Op. 13, Adagio.

15. BEETHOVEN, Sonata, Op. 10, No. 1.

A turn on a note followed by two dots is

played so that the last note falls in the place of the first dot (Ex. 16).

16. MOZART, Sonata in C minor.

The turn on the dotted note was frequently written by Mozart in a somewhat ambiguous fashion, by means of four small notes (Ex. 17), the fourth of which has in performance to be made longer than the other three, although written of the same length, in order that it may represent the dot, according to rule.

17. MOZART, Sonata in F, Adagio.

An apparent exception to the rule that a turn is played during some portion of the value of its written note occurs when the sign is placed over the second of two notes of the same name, whether connected by a tie or not (Ex. 18).

18. HAYDN, Trio in G.

In this case the turn is played *before* the note over which the sign stands, so that the written note forms the *last* note of the turn. This apparently exceptional rendering may be explained by the assumption that the second of the two notes stands in the place of a dot to the first, and this is supported by the fact that any such example might be written without the second note, but with a dot in its stead, as in Ex. 19, when the rendering would be precisely the same. If, however, the first of two notes of the same name is already dotted, the second cannot be said to bear to it the relation of a dot, and accordingly a turn in such a case would be treated simply as a turn over the note (Ex. 20).

19.

20. HAYDN, Sonata in G minor.

INVERTED TURNS.—When the order of the notes of a turn is reversed, so as to begin with the lower note instead of the upper, the turn is said to be inverted, and its sign is either placed on end thus, ~ , or drawn in the contrary direction to the ordinary sign, thus ~ (Ex. 21). The inverted turn is however more frequently written in small notes than indicated by a sign (Ex. 22).

21. C. P. E. BACH, Sonata in B \flat , Largo.

22. MOZART, Rondo in A minor.

In certain cases, particularly at the beginning of a phrase, the effect of the ordinary turn starting with the upper note is unsatisfactory and deficient in accent. The perception of this fact led to the invention of a particular form of turn (called by C. P. E. Bach the *Geschnelte Doppelschlag*), in which the four notes of the ordinary turn were preceded by a short principal note, written as a small grace-note (Ex. 23).

23. Written. C. P. E. BACH, Sonata.

A similar turn of five notes (instead of four), also frequently met with, is indicated by the compound sign ~ , and called in German the *Prallende Doppelschlag*. The difference of name

24. BEETHOVEN, Violin Sonata,
Op. 12, No. 1.

is unimportant, since it merely means the same ornament introduced under different circumstances; but the sign has remained longer in use than the older mode of writing shown in Ex. 23, and is still occasionally met with (Ex. 24).

When a note bearing a turn of either four or five notes is preceded by an appoggiatura (Ex. 25), or by a slurred note one degree higher than itself, the entrance of the turn is slightly delayed, the preceding note being prolonged, precisely as the beginning of the 'bound trill' is delayed. (See SHAKE.)

25. W. F. BACH, Sonata in D.

Like the shake, the turn can occur in two parts at once, and Hummel indicates this by a double sign, \approx ; this is, however, rarely if ever met with in the works of other composers, the usual method being to write out the ornament in full, in ordinary notes.

F. T.

TURNER, AUSTIN T. (b. Bristol, 1823; d. Sydney, New South Wales, Apr. 13, 1901), was a chorister at the Cathedral at Bristol, and at the age of 20 was appointed vicar choral at Lincoln. He went to Australia in 1854, and was selected as singing-master to the Government School at Ballarat. He was the pioneer of music in that place, being the first conductor of the Philharmonic Society, which among other oratorios performed Mendelssohn's 'St. Paul' and Spohr's 'Last Judgment,' and, for the first time in Australia, Sullivan's 'Prodigal Son.' His sacred cantata 'Adoration,' for soli, chorus and full orchestra, was produced by the Melbourne Philharmonic Society on Nov. 24, 1874. He was also the author of a choral song; two masses, sung with full orchestral accompaniments at St. Francis' Church, Melbourne; several glees, madrigals and minor works. He was organist of Christ Church, Ballarat, for many years.

G.

TURNER, WILLIAM, Mus.D. (b. 1651; d. Duke Street, Westminster, Jan. 13, 1739/40), son of Charles Turner, cook at Pembroke College, Oxford, began his musical education as a chorister of Christ Church, Oxford, under Edward Lowe, and was afterwards admitted a chorister of the Chapel Royal under Captain Henry Cooke. Whilst in the latter capacity he joined his fellow-choristers, John Blow and Pelham Humfrey, in the composition of the 'Club Anthem,' his contribution being a bass solo in the middle. After quitting the choir his voice settled into a fine counter-tenor, and

he became a member of the choir of Lincoln Cathedral. On Oct. 11, 1669, he was sworn in as a gentleman of the Chapel Royal, and soon afterwards became a vicar choral of St. Paul's, and a lay vicar of Westminster Abbey. He set an ode by Nahum Tate, for St. Cecilia's Day, 1685. He graduated as Mus.D. at Cambridge in 1696. A birthday ode for the Princess Anne was composed in 1698. He composed much church music; two services and six anthems (including 'The King shall rejoice,' composed for St. Cecilia's Day, 1697, and 'The Queen shall rejoice,' for the coronation of Queen Anne) are contained in the Tudway collection (Harl. MSS. 7339 and 7341). Eight more anthems are at Ely Cathedral, and others in the choir books of the Chapel Royal and Westminster Abbey. Boyce printed the anthem 'Lord, Thou hast been our refuge' in his Cathedral Music. Many of Turner's songs were printed in the collections of the period. He contributed songs to D'Urvey's 'Fond Husband' (1676) and 'Madam Fickle' (1677), and wrote the music for a masque 'Presumptuous Love' given at Lincoln's Inn Fields in 1716. A large collection of his songs and catches is in the Fitzwilliam Museum, Cambridge. Playford's 'Harmonia Sacra,' 1688, contains a solo hymn, 'Thus mortals must submit to fate.' He died at his house in Duke Street, Westminster, having survived his wife (with whom he had lived nearly seventy years) only four days, she dying on Jan. 9, aged 85. They were buried, Jan. 16, in one grave in the west cloister of Westminster Abbey. Their youngest daughter, Anne, was the wife of John ROBINSON (q.v.), organist of Westminster Abbey.

W. H. H.; addns. from D.N.B., etc.

TURNER, WILLIAM, published in 1724 a treatise on the grammar of music entitled

'Sound Anatomiz'd, in a Philosophical Essay on Musick. To which is added A Discourse concerning the Abuse of Musick.'

He tells us incidentally that violins on some occasions go ten degrees higher than E la, i.e. up to g''' , and that some organs are made to go a whole octave lower than Gamma Ut. A third edition was published by Walsh in Sept. 1739. Turner also edited Ravenscroft's Psalms, 8vo, 1728, and 4to, 1746. Some sonatas, published about the same date, were probably by him, as well as songs for several plays.

J. F. R. S.

TURNHOUT (1) GERARD DE (GHEERT JACQUES, called DE TURNHOUT) (b. Turnhout, Belgium, c. 1520; d. Madrid, Sept. 15, 1580), singer, 1545, master in the Confrérie de la Vierge, 1562, and Kapellmeister, 1563, of Antwerp Cathedral. In 1572 Philip II. summoned him to Spain. He composed masses, motets, chansons, etc., some in collective volumes of Phalèse and of Tylman Susato. (2) JEAN

¹ See D'Urvey's *New Collection of Songs and Poems*, 1683.

DE (JEAN JACQUES), son of Gerard, maître de chapelle of Philip II., and the governor of the Netherlands at Brussels. In 1611 he is mentioned as second master, and in 1618 as first master (Kapellmeister) of the royal chapel there. He composed one book each of 6-part madrigals, 1589, 5-part madrigals, 1595, and 5-8-part motets, 1594 (*Riemann*; *Q.-L.*).

TURPIN, EDMUND HAET (b. Nottingham, May 4, 1835; d. London, Oct. 25, 1907), organist, was local organist at the age of 13; he also studied composition and piano, and became practically acquainted with the instruments of the orchestra and military band. He gave an organ recital at the Great Exhibition of 1851, and in 1857 came to live in London; in 1869 he was appointed to the organ at St. George's, Bloomsbury, and in 1886 to that of St. Bride's, Fleet Street. In 1875 he became Hon. Secretary of the R.C.O., to which institution he devoted much attention, especially in developing the examinations. He received the degree of Mus.D. from the Archbishop of Canterbury in 1889, and in 1892 was appointed warden of Trinity College of Music, London. Dr. Turpin was for long connected with the musical press of London, and from 1880 edited the *Musical Standard*, as well as other musical papers such as the *Musical World*, of which, as of *Musical News*, he was joint-editor. In 1883 he was conductor of the London orchestra at the Cardiff Eisteddfod. His works embrace two masses, a Stabat Mater, the oratorios 'St. John the Baptist' and 'Hezekiah,' 'A Song of Faith,' produced in London, 1867; 'Jerusalem,' a cantata; anthems; services; a symphony-overture for orchestra and military band; chamber music and pianoforte pieces; songs, hymn-tunes and much organ music. He also edited the 'Student's Edition' of classical pianoforte music (Weekes & Co.), with marginal analyses and directions. He succeeded W. T. Best as editor of a complete edition of Bach's organ works. He was buried on Oct. 30, 1907, at Highgate Cemetery, a memorial service being held at St. Bride's. a.

TURTON, see STURTON.

TUSCH, probably a form of *Touche*, that is, *toccata*, and that again related to TUCK, TUCKET (*q.v.*).

TUTTI (Ital.), all; a term used to designate those parts of a vocal or instrumental composition which are performed by the whole of the forces at once. In the scores, and more frequently in the chorus parts of masses, cantatas, etc., the parts for the solo quartet (where such is employed) are often written on the same set of staves as the chorus parts, in which case the words solo and tutti are used to distinguish the one from the other. The same thing is done in the solo part of a pianoforte concerto, and also in the band parts of concertos generally, so that the orchestra may know where to avoid

overpowering the solo instrument. The term *ripieno* was formerly applied to those violins which only played in the *tutti*. For this end in some scores the string parts are marked S and T or S and R where requisite.

The term *tutti* has also been applied to those portions of a concerto in which the orchestra—not necessarily the whole orchestra—plays while the solo instrument is silent. See *CONCERTO*.

In pure orchestral music, especially up to Beethoven's time, we speak of the forte passages as 'the *tutti*,' from the fact of their being the places where the full orchestra is used in a mass. F. C.

TYE, CHRISTOPHER (b. circa 1500; d. before Mar. 15, 1572/3), composer, was for the chief part of his life closely connected with Cambridge and Ely, and may have been a native of the eastern counties, where the surname was not uncommon. The statement that he was born at Westminster is a mistake arising from a misunderstanding of Fuller, who places him among the Worthies of Westminster. Wood's conjecture that he 'seems to be a Western man born' has nothing to support it. If he is to be identified with a boy named Tye who was in the choir of King's College, Cambridge (fifth in the list of choristers in 1511, and second in the list in 1512), his birth may be placed between 1497 and 1500; but it is not certain, though it is extremely likely, that Christopher is identical with either this chorister, or a singing-man named Tye, who was in the choir in 1527; for there was a Richard Tye who was lay-clerk from 1535-45, to whom these entries may refer.

The full name, Christopher Tye, first appears in the extant Chapel documents of King's College in 1537 as that of one of the lay clerks. He had taken his degree of Mus.B. at Cambridge in 1536; the Grace for his degree speaks of his ten years' study in the art of music, with much practice in composition and teaching boys. He was required to compose a Mass to be sung 'vel paulo post comitia vel eo ipso die quo serenissimi principis observabitur adventus.' Tye was appointed Magister Choristarum, with a yearly salary of £10, at Ely Cathedral in 1541 or 1542, soon after the establishment of the Ely Bishopric, and in 1545 he proceeded Mus.D. at Cambridge, when again he was directed to compose a Mass for his exercise. Three years later, in 1548, he was incorporated in the University of Oxford. It is possible that Tye owed a good deal to the influence of Dr. Richard Cox, who was made Archdeacon of Ely in 1541, and was elected Chancellor of the University of Oxford in 1547. He had been at King's College in 1519, where he may have become acquainted with Tye: afterwards when he was Bishop of Ely, he was certainly Tye's friend. That Cox was schoolmaster to Edward VI. from 1544 to 1550, lends some support to the belief

that Tye was the Prince's music-master. This has been questioned, chiefly on the ground that the sole authority for the statement is Samuel Rowley's play *When You see Me, You Know Me*, 1605, in which Edward addresses Tye as 'our music's lecturer.' The Preface to the 'Actes of the Apostles,' however, certainly points to some friendly relation between the two, such as might exist between master and pupil, and there seems to be no need to reject the tradition. In Rowley's play the Prince repeats what we may believe to be a genuine saying of Henry VIII. with regard to Tye:

'I oft have heard my Father merrily speake
In your hye praise, and thus his Highnesse sayth,
England, one God. one truth, one Doctor hath
For Musicks Art, and that is Doctor Tye.'¹

It has also been suggested that Tye was music-master to the Princesses Mary and Elizabeth, but there is no evidence on the subject.

The short reign of Edward VI. was marked by great activity among the writers of music for the English Service, in which it has been presumed that Tye took a leading part (see List of Works). The one work, however, which he published, and by which his name is remembered, was not written for church use. This was

'The Actes of the Apostles, translated into Englyshe Metre, and dedicated to the kynges most excellent Maiestye, by Christofer Tye, Doctor in Musyke, and one of the Gentylmen of hys graces moste honourable Chappell, wyth notes to eche Chapter, to synge and also to play vpon the Lute, very necessarye for studentes after theyr studye, to fyle theyr wyttes, and also for all Christians that cannot synge, to reade the good and Godlye storyes of the lyues of Christ hys Apostles. 1553.'

A rimed Preface addressed to Edward, of which a considerable part is given by Hawkins, sets forth the object of the publication, which was to spread the knowledge of Bible stories, by treating them much as Sternhold had treated the Psalms:

'That such good thinges your grace might moue
Your lute when ye assaye:
In stede of songes of wanton loue
These storyes then to playe.'

As a matter of fact the Chapters of the 'Actes' (of which no more than fourteen are printed) are arranged for four voices, and the parts are so disposed on the page that a lute-player could make nothing of them as they stand. In some copies of the book the colophon runs 'Imprynted at London by Wyllyam Seres dwellynge at the signe of the Hedghogge'; in others, 'Imprynted at London by Nycolas Hyll, for Wyllyam Seres.'² Two of the settings are Canons, and in each of the others a little point of imitation is introduced to give interest to the music, but what Tye aims at is simplicity and tunefulness; as he says:

'And thouge they be not curious
But for the letter mete:
Ye shall them fynde harmonious
And eke pleasaunt and swete.'

It is an interesting testimony to the success with which he adopted a popular style that two of the best-known Psalm tunes (WINDSOR OR ETON (*q.v.*); and Winchester Old), have been traced to their sources in the 'Actes of the Apostles.' The music indeed is excellent, but when Burney writes of Tye that he was 'perhaps as good a poet as Sternhold,' he was doing an injustice to Sternhold.

Tye describes himself here as gentleman of the King's Chapel, an appointment which is not recorded elsewhere. His name is not in the list of Edward VI.'s Chapel, printed by both Burney and Hawkins; nor is it to be found in the *Old Cheque-Book of the Chapel Royal* (ed. Rimbault, 1872), which, however, does not begin till 1561. Fuller adds that 'he was probably the organist,' which Wood amplifies into the statement that 'he was chief organist of Edward 6 and first organist of Elizabeth,' but this seems to be mere conjecture. There is no reason to doubt that Tye continued to hold his place of magister choristarum at Ely, from his first appointment up to 1561; for though the Treasurer's Rolls are lost excepting that for 1547 (which shows a payment to Tye), there is a special 'Donatio' made to him on behalf of the Dean and Chapter, dated May 23, 1559, 'pro diligenti servitio . . . hactenus impenso.' By this document, in which he is described as organist as well as magister choristarum, he is granted the power of discharging on the Manor of Sutton, to ensure the payment of his annuity of £10.

In the early part of 1561 Tye resigned his places at Ely, being succeeded as magister choristarum by the composer, Robert White, who may have been his son-in-law. Tye had already been ordained deacon by Bishop Cox in July 1560, and priest in Nov. of the same year. Before Sept. 1560 he was presented to the living of Doddington-cum-Marche in the Isle of Ely, and was established there with his family before Mar. 1561, when we learn that he, as rector of Doddington, 'est Sacerdos ac residet ibidem et est Doctor Musice non tamen habilis ad predicandum' (not, however, skilful at preaching) 'nec ad id specialiter licenciatus et alit ibidem familiam' (*Certificatorium Dioc. Eliensis*, a return to Archbishop Parker in answer to questions about the Ely clergy). In 1564 Tye was in possession of two other livings. On May 13, 1564, he paid first-fruits for the rectory of Newton-cum-capella, near Doddington; the other was Wilberham (or Wilbraham) Parva, near Cambridge, to which he was presented, probably in 1561. This living was sequestrated in June 1564, as Tye had neglected to pay first-fruits, but the amount due was

¹ The chief part of the scenes in which Tye is introduced will be found in Hawkins's *History*, 1875, p. 462.

² Steele, *Earliest English Music Printing*, 1903.

paid on the following Oct. 19. In June 1570 the living of Doddington was also sequestrated, in consequence of some payments not having been made to the Bishop. Viewed in connexion with an unusual bond taken from Dr. Tye at his wife's request, with regard to the living of Doddington, 'that he should not let any part of his Benefice' without the Bishop's consent, 'but from year to year,' this second sequestration seems to point to some habitual carelessness or incapacity in business matters on Tye's part. He resigned the living of Newton in 1570; he had already resigned Wilberham in 1567.

Tye continued to write verses till the last years of his life; in 1571 John Lesley, Bishop of Ross, who was then a prisoner in the custody of Bishop Cox, notes in his Diary, Sunday, Aug. 26: 'I maid certanes versis upon the hunting the day precedent, and gave them to Doctour Ty, doctour in music, for ane argument, to mak the same in Inglis' (*Bannatyne Miscellany*, 1855, vol. iii. p. 144). Whether Tye was the author of a poem called 'A Notable Historye of Nastagio and Trauersari,' a translation in verse of a tale from Boccaccio, by C. T., 1569, is not certain; there is nothing in it which he could not have written.

There is one more notice of Tye as rector of Doddington on Aug. 27, 1571, when he signed some Articles of Doctrine, with the other Ely clergy, in a volume now at Ely. He died before Mar. 15, 1572/73, when his successor was appointed.

Of his family, his son Peter was rector of Trinity Church, Ely, and also held livings in Norfolk. Bishop Cox says of him that

'he is a common Dicer, a common Bowler, and a common Hunter, and is indicted for killing of Deer. . . . His Father Dr. Ty hath told me and others, not without Grief, that he wrote a Letter, counterfeiting his Father's hand, and carried it to my Lord of Canterbury; and by that Means was made Minister.'¹

Peter Tye was married at Trinity Church, where seven of his children were baptized. It is therefore very likely that Mary Tye, who married Robert Rowley at the same church in 1560, was Dr. Tye's daughter. If so, we may conjecture that Ellen Tye, who married the composer Robert White, was also his daughter; for by her Will, dated Nov. 21, 1574, Ellen White left legacies to her mother, Katherine Tye, and a sister Mary Rowley, besides a sister Susan Fulke and a brother-in-law Thomas Hawkes. It is conjectured that a Richard Tye who married Alice Smyth at Trinity Church, 1568, and possibly an Agnes Tye who married John Horner at Wilberham Parva in 1575, may have been Dr. Tye's children.

Anthony Wood's story of Dr. Tye and Queen Elizabeth is given here for what it is worth.

'Dr. Tye was a peevish and humoursome man, especially in his latter dayes, and sometimes playing on y^e Organ in y^e chap. of qu. Elizab. wh. contained much musick, but little delight to the ear, she would send y^e verger to tell him yt he play'd out of Tune: whereupon he sent word yt her cares were out of Tune.'²

Tye occupies an important place in the history of English church music. 'Music,' says Fuller, 'which received a grievous wound in England at the dissolution of abbeys, was much beholding to him for her recovery; such his excellent skill and piety, that he kept it up in credit at court and in all cathedrals during his life.' This is a traditional account, but it is probably correct. He has been called 'the Father of the Anthem,' and it is most likely that he helped to set the model which was accepted by Edwardian and early Elizabethan church composers (see ANTHEM). In writing for the English Service, his 'direct, homely, almost popular' manner of writing is strongly marked;³ that he adopted it deliberately may be seen by comparing it with the greater elaboration of his Latin works, which in many cases must have been written side by side with the English. For it must not be assumed that his settings of Latin words are necessarily earlier than those of English words. Some of course are, and may belong to his pre-Reformation days (among them perhaps we may place the contents of B.M. Add. MSS. 17,802-5), but the only dated composition by him which we possess is the 'In quo corriget' (MS. Mus. Sch. E, 423), which bears the date 1568, near the end of his life. We have seen that two of his masses (possibly the Peterhouse Mass and the 'Euge Bone') were written as exercises for his degrees, and it is quite likely that many of his settings of Latin words, and those of other writers were similarly composed without any view to their performance in the Latin Service.

Tye's settings of the 'Actes of the Apostles' have often been reprinted, singly or all together, fitted with a great variety of new words. The only other work of his which was printed in his lifetime was a prayer, 'O Lord of Hosts,' in Day's Psalter, 1563, where no composer's name is given but the initial 'S,' by which Shepherd is probably meant. This has been edited for the Church Music Society. It is a curious fact that no other work by Tye is to be found in Day's publications. Barnard printed (1641) 'I will exalt Thee' and 'Sing unto the Lord' (reproduced in Boyce's 'Cathedral Music'); 'O God be merciful'; and 'I lift my heart'; also 'Haste Thee, O God' under the name of Shepherd, with which it has been reprinted by the Motet Society, and as one of Novello's Octavo Anthems. Shepherd's setting of these words is quite different. Rimbault's 'Cathedral Music' contains the Ely Evening Service;

³ Strype, Annals, vol. II. App. I. No. 51.

impromptu adornment to the simple country melodies sung by the peasants; they are also used as ritornels or refrains at the end of each verse of the song. They are not sung to words, but merely vocalised, although passages resembling them in form are of frequent occurrence in Tyrolean melodies. The following example

will be found in a dance song from von Spaun's collection. Moscheles ('Tyrolese Melodies,' 1827) tried to note down some of the Jodels

sung by the Rainer family, but the result was neither accurate nor successful. W. B. S.

The Tyrolean songs of the Rainer family were published in two folio volumes, by Willis, in 1827 and 1828. How far the melodies may claim to be the genuine folk-tunes of the district is to some extent questionable. A footnote informs us that two, out of the twelve which comprise the first volumes, are by one of the family, and two others considerably altered from the originals by him. Some of the verses are also claimed as his, and one song is headed 'composed by M: I. Seidel.' Moscheles noted and arranged the tunes in four parts, and the English words are by William Ball. 'The [Merry] Swiss Boy,' the first song in the book, is the sole survivor of the series. This song had an immense run of popular favour, and its simple melody figured largely in the old piano-forte Tutors. F. K.

UBER, (1) CHRISTIAN BENJAMIN (b. Breslau, Sept. 20, 1746; d. there, 1812), studied law at Halle and became a barrister at Breslau in 1774, holding eventually some high offices at the law courts. At Halle he continued his early musical studies under Türk. Uber's house at Breslau became the rendezvous of distinguished musicians, artists and literary men, and every Wednesday and Saturday public performances took place there, ranging from chamber music to opera; sometimes also a play would be given, owing to the presence of some famous actor. Uber was a talented composer, and wrote a comic opera in 3 acts, 'Clarisse,' an ode from the history of 'Miss Fanny Welkes' (Weelkes?) (1772); a divertimento for harpsichord, 2 violins, 2 flutes, 2 horns, viola and bass (1777); 6 divertimentos for harpsichord, flute, violin, 2 horns and bass (1783); 6 trios for harpsichord, violin and violoncello, and a number of harpsichord sonatas with and without accompaniment of other instruments.

(2) CHRISTIAN FRIEDRICH HERMANN (b. Breslau, Apr. 22, 1781; d. Dresden, Mar. 2, 1822), son of Christian Benjamin, studied law at Halle University, and music under Türk, for whom he deputed as conductor of the subscription concerts, where he played a violin concerto in D, of his own composition, and also brought out a cantata, 'Das Grab,' both being well received. Soon after he devoted himself entirely to music, became chamber musician to Prince Louis Ferdinand of Prussia, after whose death in 1806 he was first violinist at Brunswick; and in 1808 he became Kapellmeister at the Opera, Cassels, where he wrote several French operas ('Les Marins'), an Intermezzo 'Der falsche Werber,' music to Schiller's 'Der Taucher,' Klingemann's 'Moses,' etc. In 1814 he was Kapellmeister at Mayence theatre (opera, 'Der frohe Tag') and in 1816 musical director of Seconda's theatrical troupe at Dresden. Having long been in delicate health he retired into private life at Leipzig, but in 1818 accepted the position of cantor and musical director of the 'Kreuzkirche,' Dresden. There he wrote, among other works, an Easter cantata and a Passion ('Die letzten Worte des Erlösers'), which proved his swan song, as he was buried on Good Friday 1822, the day of its first performance.

(3) ALEXANDER (b. Breslau, 1783; d. there, 1824), another son of Christian Benjamin, started his musical career as violinist but soon exchanged the violin for the violoncello, which he studied under Jäger. He was an intimate friend of C. M. v. Weber, Berner and Klingohr. In 1804 he toured with great success as a violoncellist in South Germany. In 1820 he settled at Basle, where he married a singer, returning to

Breslau in 1821, and becoming Kapellmeister to Prince Schönaich-Carolath in 1823, which post he held till his death. He composed several concertos, variations, etc., for violoncello, several overtures, vocal music, etc. (Schilling; Mendel; E. van der Straeten, *Hist. of the Violoncello*).

E. v. d. s.

UBERTI, ANTONIO (b. Verona, 1697; d. Berlin, Jan. 20, 1783), of German parents named Hubert, was a pupil of Porpora, and was usually called Porporino from that circumstance. He was an eminent singer in the Italian opera in Germany, and was appointed chamber singer to Frederick the Great at Berlin. His most distinguished pupil was Mme. MARA. (Riemann.)

M.

UBERTI, GIULIO (b. Milan, 1805; d. 1876), poet, patriot and teacher of declamation. Together with his friends, Modena and Mazzini, by the power of the pen he succeeded in raising the youth of Italy to action against the tyranny of a foreign domination, and to the establishment of the national independence. His poems are noticed at length by Cesare Cantù in his *History of Italian Literature*. He lived at Milan the greater portion of his life, engaged as a teacher of declamation. He numbered Malibran and Grisi amongst his pupils, and was the last of the masters of declamation who still preserved the old traditions of classical tragic acting. He died by his own hand in 1876, a patriot but a republican to the end.

J. C. G.

U.C., see UNA CORDA.

UCCELLINI, DON MARCO, of Modena, master of the instrumental music of the Duke of Modena, 1645; also maestro di cappella at Modena Cathedral, 1654. In 1669 he appears again under the former title only. Fétis's statement that he was maestro di cappella at the court of Parma appears to lack confirmation. He wrote psalms for 3-5 concerted parts with instruments, and litanies of the Holy Virgin, 5 v., with instruments, op. 6 (Venice, 1654); Canto dell' ozio regio, opera di musica (1660); 3 books of 'sonate,' arie, correnti, etc., published between 1639 and 1645; sonatas or canzonas for violin solo and bass, op. 5 (Ven., 1649); 'Composizioni armoniche' for violin and other instruments, in 4 and 5 parts, lib. 7 (Antwerp, 1668); Sinfonie boscarecchie for solo violin and bass with addition of 2 other violins, op. 8 (Antwerp, 1669; other ed., 1677). His violin compositions prove him a virtuoso who was probably unequalled in his time, as he already made use of the 6th position. Schering¹ mentions Sinfonici concerti, brevi e facili (1667), in which, so he says, the violin soli show here and there a distinct concerto character,

¹ *Geschichte des Instrumentalkonzerts*, p. 26.

and some cadenzas in his sonatas remind one, almost of de Bériot.

E. v. d. s.

UGALDE, DELPHINE, née BEAUCÉ (b. Paris, Dec. 3, 1829; d. there, July 19, 1910). She was taught music by her mother, an excellent musician and teacher of singing, and a good comedian; and singing by Moreau-Sainti and, according to Soubies and Malherbe, by Cinti-Damoreau. She married a Spanish musician, Ugalde (d. 1858). In July 1848 she made her début at the Opéra-Comique as Angèle ('Domino noir'), became a great favourite, being a brilliant singer and actress, and remained there until 1858, except for a short season at the Variétés in a revival of Favart's 'Trois sultanes.' At the former theatre she sang in the many successful new operas of the period, viz. in 'Le Caïd,' 'Songe d'une nuit d'été,' and as Eros in 'Psyché' (A. Thomas), 'Les Monténégrins' (Limnander), 'Le Toréador' (Adam), 'La Fée aux Roses' and 'Dame de Pique' (Halévy), 'Galathée' (Massé), etc. In 1851, on leave of absence, she sang at Her Majesty's as Nette in 'L'Enfant prodigue' and Corilla in Gnecco's 'Prova,' with moderate success. She sang here again in 1857 in concerts, with better effect. On Aug. 28, 1858, she sang as Leonora ('Trovatore') at the Opéra, for Roger's benefit. She was then engaged at the Lyrique, where she made a great success as Susanne, Blonde, Reiza, as the heroine in Massé's 'Fée Carabosse' and the hero in Semet's 'Gil Blas.' Later she sang there again as Papagena and Taven ('Mireille'), having in the meantime sung at the Opéra-Comique, and in 1863 at the Bouffes as Roland in 'Les Bavards' (Offenbach). She sang there again, under the management of Varcollier, her second husband, as Eurydice in 'Orphée aux Enfers,' and in 1867 in an operetta of her own composition, 'La Halte au moulin,' favourably reviewed at the time. In 1870 she sang at the Opéra-Comique for the last time, as Juana in 'Déa' (Jules Cohen), and in 1871 at the Athénée in 'Javotte' (Jonas). Among her pupils were Marie Sass of the Opéra (a successful Elizabeth in 'Tannhäuser' and Sélina in 'L'Africaine') and her own daughter (by her second husband) known as Marguerite Ugalde who, after successful débuts at the Opéra-Comique in the 'Fille du régiment' and as Niklausse on the production of 'Contes d'Hoffmann,' became identified with opéra-bouffe, in which she made a reputation.

A. C.; rev. M. L. F.

UGOLINI, VINCENZO (b. Perugia), a 16th-17th century church composer of the Roman school. He was a pupil of Bernardino Nassini, and teacher of Benevoli. Appointed maestro di cappella of Santa Maria Maggiore, Rome, in 1603¹ he was attacked in 1604 by a severe illness which left him in delicate health for the

rest of his life. Although he had to interrupt his work, he was left in the possession of his place on account of his exceptional merit. In 1609 he went to Benevento as maestro di cappella of the cathedral, but in 1614 he was in the service of Cardinal Arigoni at Rome, and from 1616-20 he was at the French church of St. Louis at Rome. In the latter year he succeeded Soriano at the Cappella Giulia of St. Peter's, Rome, where he remained until 1626, when he resigned, but remained active until 1630 or after, as the dedication of his 12-part psalms is signed in the latter year. He was one of the most learned church musicians and a profound and dignified representative of Palestrina's school. He composed 2 books of 5-part madrigals (1615); 4 books of 1-4-part motets with *continuo* (1616-19); 2 books of 8-part psalms (1620); 2 books of 8 and 12-part masses and motets (1622); 1 book of 8-part psalms and Vespers with bass for the organ (1628); 1 book of 12-part Vesper-psalms and motets, one with a bass for the organ (1630); various sacred songs, etc., in collective volumes.

E. v. d. s.

UHLIG, THEODOR (b. Wurzen, near Leipzig, Feb. 15, 1822; d. Dresden, Jan. 3, 1853), learnt the violin from Schneider at Dessau, in 1837-1840, and entered the royal band at Dresden in 1841. His compositions, though very numerous, and ranging over a wide variety of forms, are not as important as his theoretical works, *Die Wahl der Taktarten, Die gesunde Vernunft und das Verbot der Fortschreitung in Quinten, and Druckfehler in der Symphonie-Partituren Beethovens*; nor is he as famous for these as for the fact that Wagner corresponded with him during an interesting period of the great composer's career. The letters were published in 1888. (Riemann.)

M.

UILLEANN PIPES. This is the correct name of the Irish domestic pipes, a name which, by a strange Anglicised corruption, was for a century written 'Union.' (See PLATE IV. No. 7.) The Uilleann pipes are to be identified with the 'woollen' bagpipes of Shakespeare (*Merchant of Venice*), but the etymology is from the Irish *uilleann* = the elbow, inasmuch as the wind is supplied by a bellows acted on by the elbow, whereas the Irish *Piob Mor* (or warpipe) is blown by the mouth. For long, the name was supposed to be derived from the period of the Union between England and Ireland (1800), but there are numerous references to players on the 'Union pipes' between the years 1750 and 1780. At the close of the 16th century they came into vogue, but the instrument was much improved in the 18th century, and Burney praises it highly in 1780. Uilleann pipes are made in Dublin, Belfast and Cork, and there are Pipers' Clubs in each of those cities. (See BAGPIPE; IRISH MUSIC.)

W. H. G. F.

¹ Riemann says 1592-1603.

UKELELE, a small guitar very common in Hawaii, but only introduced into the Sandwich Islands about the year 1877 by the Portuguese. It resembles in outline the *Machète*. (See *GUITAR*.) Other names given to it are 'taropatch fiddle' and 'the flea' (the smallest size). The ordinary tuning of the 4 strings is *b', f#, d', a'*. F. W. G.

ULBRICH, MAXIMILIAN (*b. Vienna, c. 1752; d. there, Sept. 14, 1814*), son of a bass singer in the Imperial Chapel. He studied music under Wagenseil and Reuter, and held a remunerative office in the civil service which enabled him to follow his art without the fear of material want. His oratorio, 'The Israelites in the Desert,' was performed at Vienna in 1779 and 1783. He wrote a four-part litany and other church music; also two operas, symphonies and a harpsichord concerto with orchestra. E. v. d. s.

ULIBISCHEW, the German mode of spelling the Russian name more generally transliterated as **OULBICHEFF** (*q.v.*). G.

ULRICH, HUGO (*b. Oppeln, Silesia, Nov. 26, 1827; d. Mar. 23, 1872*), a composer of great ability, whose life was wasted owing to adverse circumstances, and probably also to want of strength of character. His father was school-master at Oppeln. By 12 he had lost both his parents, and was thrown helpless on the world. He then got into the Gymnasium or Convict at Breslau; subsequently went to Glogau, and in 1846 to Berlin. From Mosewius, the excellent director of the University of Breslau, he had an introduction to A. B. Marx; but Ulrich had no money to pay the fees. With Meyerbeer's help, however, he became a pupil of Dehn for two years, and then produced his op. 1, a PF. trio, followed by two symphonies, all of which excited much attention. The B minor symphony (1852) went the round of Germany, and the 'Symphonie triomphale' obtained the prize of 1500 francs from the Royal Academy of Brussels in 1853, and was very much performed and applauded. In 1855 he went to Italy and lived for long in the various great towns, but was driven back by want of means to Berlin. He brought with him an unfinished opera, 'Bertrand de Born' (still in MS.). He taught for a short time in the Conservatorium, but teaching was distasteful to him; he had not the strength to struggle against fate, and after attempting a third symphony (in G) he appears to have broken down, or at least to have relinquished his old high standard, and to have betaken himself to pot-boilers of various kinds. Amongst these his arrangements of symphonies and other orchestral works are prominent, and of first-rate merit. He left a quartet, two overtures, a violoncello sonata, and various PF. works. G.

UMBREIT, KARL GOTTLIEB (*b. Rehstedt, near Gotha, Jan. 9, 1763; d. there, Apr. 28,*

1829), a pupil of Kittel, was organist at Sonneborn in Coburg. He enjoyed a great reputation as organist, organ-composer and teacher. He wrote several books of Chorals, one of these being edited in French by A. Choron (1824), and a number of preludes and fugues for the organ. Three books of easy Choral-preludes were republished by Simrock at Bonn, and a book of posthumous preludes and fantasias, edited by his son, Dr. Fr. Wm. C. Umbreit, at Gotha (Lampert), 1833-34. E. v. d. s.

UMLAUF, (1) **IGNAZ** (*b. Vienna, 1756; d. there, June 8, 1796*), popular dramatic composer in his day. In 1772 he entered the orchestra of the court theatre as violin-player, in 1778 became Kapellmeister of the German Singspiel, in 1789 deputy Kapellmeister (with Salieri as chief) at the court theatre, and later was associated with Weigl in a similar manner at the Opera. His first opera, 'I rovinati,' was composed to Italian words by Boccherini (court theatre, 1772). When the Emperor Joseph instituted the national Singspiel (for which Mozart composed the 'Entführung') he chose Umlauf to start it, and his 'Bergknappen' (edited by Haas, *D.T.Ö.* vol. xviii.) was the first German Singspiel produced at the Burgtheater (Feb. 17, 1778). This was succeeded by 'Die Apotheke'; 'Die pucefarbenen Schuhe,' or 'Die schöne Schusterin' (long a favourite with the charming singer Mme. Weiss in the principal part) (1779); 'Das Irrlicht,' comic opera in three acts, with Mme. Lange; and 'Der Oberamtmann und die Soldaten' (after Calderon), a five-act play with airs and serenade (1782); 'Die glücklichen Jäger,' and 'Der Ring der Liebe,' both Singspiele (1786).

These operas are all distinguished by a pleasing style, a fine flow of melody, and plenty of striking tunes. Umlauf never left Vienna but once, and that was in 1790, when he went with Salieri and a part of the court band to the Coronation of the Emperor Leopold II. at Frankfort.¹ A set of variations on the favourite air from 'Das Irrlicht,' 'Zu Steffan sprach in Traume,' composed for the celebrated bass-singer Fischer, was long attributed to Mozart, but they were really written by Eberl (see Köchel's *Verzeichniss*, Appendix V. No. 288). Pianoforte scores appeared of 'Die schöne Schusterin' and 'Das Irrlicht,' while several of the airs from the other Singspiele were published singly or in arrangements. Umlauf's son

(2) **MICHAEL** (*b. Vienna, Aug. 9, 1781; d. Baden, near Vienna, June 20, 1842*), was violinist at the Opera, in 1804 began to compose ballets, was Kapellmeister of the two court theatres from 1810-25, and was engaged again in 1840. He is said to have been a clever musician, published PF. sonatas, etc., and

¹ Mozart was there too, but in a private capacity, and at his own expense; he gave a concert, at which he played himself.

composed a Singspiel, 'Der Grenadier' (Kärnthnertheater, 1812), an opera 'Das Wirthshaus in Granada,' and some church compositions.

His chief interest, however, is the important part he took in the performance of Beethoven's works. On these occasions they both acted as conductors, Umlauf standing by the side of, or behind, Beethoven; but it was his beat only which the orchestra followed, as Beethoven was either carried away by his impetuosity and went too fast, as at the performance of 'Fidelio' in 1814, or, owing to his deafness, lost the time altogether, as at concerts in 1814, 1819 and 1824. At the first two performances of the ninth symphony in May 1824, Beethoven merely gave the tempo at the beginning of each movement, an arrangement which the programme announced in the following diplomatic terms: 'Herr Schuppanzigh will lead the orchestra, and Herr Kapellmeister Umlauf conducts the whole performance. Herr L. v. Beethoven will take part in conducting the whole performance.'

C. F. P.

UNA CORDA (Ital. 'one string'; Fr. *petite pédale*; Ger. *mit Verschiebung*). An indication of the use of the left pedal of the pianoforte, by means of which the action is shifted a little to the right, and the hammers made to strike a single string (in modern instruments generally two strings) instead of the three which are ordinarily struck. The direction is sometimes abbreviated into U.C. The return to the use of three strings is indicated by the letters *t.c.*, *tre corde*, *tutte le corde*, or sometimes *tutto il cembalo*. (See PEDAL; MUTE.)

The shifting pedal produces a beautiful and delicate quality of tone, arising from the sympathetic vibrations of the unused strings, which is by no means the same thing as the ordinary *pianissimo*, but is of the greatest service in producing certain special effects. Beethoven uses it frequently, in the later sonatas (from op. 101), and in the Andante of the G major concerto, op. 58, the whole of which movement is to be played *a una corda*, except the long shake in the middle, in which Beethoven requires the gradual addition of the other strings, and afterwards the gradual return from three strings to one. His directions are '*due, e poi tre corde*,' and afterwards '*due, poi una corda*,' but it is not possible to carry them out strictly on the modern pianoforte, as the shifting action now only reduces to two strings instead of one.

In music for string instruments, the direction *a una corda* is occasionally given, to denote that the passage is to be played upon a single string, instead of passing from one string to the next, in order to avoid any break in the quality of tone produced.

F. T.

UNDA MARIS (the sea-wave), a name for the undulating organ-stop, more generally known as VOIX CÉLESTES.

G.

UNEQUAL TEMPERAMENT, an uneven distribution of the 'beats' in tuning, resulting in some keys being better in tune than others. See TEMPERAMENT and TUNING.

T. E.

UNEQUAL VOICES, a term generally used in music for mixed choirs of male and female singers. (See EQUAL VOICES.)

UNGER, CAROLINE (b. Stuhlweissenburg, near Pest, Oct. 28, 1805; d. at her villa, 'La Concezione,' near Florence, Mar. 23, 1877), a great singer.

Her father was master of the household (*Wirtschaftsrath*) to Baron Hakelberg at Stuhlweissenburg. Unger was one of Schubert's friends, and recommended him to Count Johann Esterhazy in 1818, so that his daughter must have been brought up in the midst of music. She was trained by no meaner singers than Aloysia Lange, Mozart's sister-in-law, and Vogl, Schubert's friend and best interpreter,¹ and is said to have made her début at Vienna, Feb. 24, 1821, in 'Così fan tutte.' Early in 1824 Sontag and she came into contact with Beethoven in studying the soprano and contralto parts of his Mass in D and Choral Symphony. No efforts or representations could induce the master to alter the extreme range of their parts. 'I remember once saying to him,' writes Unger, 'that he did not know how to write for voices, since my part in the symphony had one note too high for my voice.' His answer was, 'Learn away, and the note will soon come.' On the day of performance, May 7, the note did come; the excitement of the audience was enormous, and it was then, at the close of the symphony, that the happy idea occurred to Unger of turning the deaf Beethoven round to the room, in order that he might see the applause which he could not hear, and of which he was therefore unaware. After this she took an engagement from Barbaja in Italy, and sang there many years (spelling her name UNGHER), during which Donizetti wrote for her 'Parisina,' 'Belisario' and 'Maria di Rudenz'; Bellini, 'La straniera'; Mercadante, 'Le due illustre rivali'; Pacini, 'Niobe,' etc. etc. In Oct. 1833 she sang in Paris at the Théâtre-Italien for one season only. It was perhaps on this occasion that Rossini is said to have spoken of her as possessing 'the ardour of the South, the energy of the North, brazen lungs, a silver voice, and a golden talent.' She then returned to Italy, but in 1840 married Sabatier, a Florentine gentleman, and retired from the stage. In 1869 she was in London, and at one of the Saturday Concerts at the Crystal Palace confirmed to the writer of this article the anecdote above related of her turning Beethoven round. Her dramatic ability and intelligence, says Fétis, were great; she was large, good-looking and attractive; the lower and middle parts of her voice were broad

¹ Her own statement, in Nohl's *Beethoven*, vol. III. p. 486.

and fine, but in her upper notes there was much harshness, especially when they were at all forced. Mme. Regan Schimon was one of her principal pupils. G.

UNGER, GEORG (b. Leipzig, Mar. 6, 1837; d. there, Feb. 2, 1887), was at first a student of theology, but made his début on the operatic stage of his native town in 1867 with such success that he soon fulfilled engagements in different German towns; in 1876 he was chosen by Wagner to create the part of Siegfried at Bayreuth. In the following year he came to London for the famous series of Wagner concerts in the Albert Hall, but his frequent inability to appear caused the composer to take a dislike to him, and he returned to Leipzig in the same year, singing in the opera there until 1881. He was the earliest of a class of 'Helden-tenor' that has since been numerous in Germany. M.

UNGER, HERMANN (b. Kamenz, Saxony, Oct. 26, 1886), first studied classical philology at Freiburg and Leipzig, then went to Munich, where he took a musical training under Edgar Istel and Joseph Haas, proceeding later to Meiningen, where he stayed for some considerable period of time with Reger. Fine counterpoint with the structural methods of chamber-music mark even his works for solo pianoforte. Without any revolutionary tendencies, his works are imbued by a fresh naturalness and reveal the characteristics of the folk-songs which are their source. Unger may justly be termed the founder of musical miniatures.

WORKS.—PF., opp. 1, 2, 3, 7, 16, 18, 25, 29; songs, opp. 14, 15, 19, 20, 21, 22, 23; Anthem of Life, op. 25; orch. symphony, op. 31; an *à cappella* choir, op. 12; old German songs for chorus and orch., op. 30; 'Night,' a suite, op. 8; German Dances, op. 16; Pictures from the Orient, op. 18; Rondo, op. 22; Rustic Scenes, op. 24; symphonic suite, op. 26; symphony in D min., op. 27; in *MS.*, 'Narcenlieder,' for baritone; trio for PF., clar., and vla.; string trio; sonata for vcl.; divertimento for string quartet; variations for 2 PF's.; numerous songs and choral compositions.

K. D. H.

UNGER, JOHANN FRIEDRICH (b. Brunswick, 1716; d. there, 1781), a councillor of justice at Brunswick. It is claimed in the *Dictionary of Musicians* (1827) that he was an inventor of a machine to be attached to a harpsichord which recorded the notes played. A description of it was published in 1774 under the title *Entwurf einer Maschine*.

F. K.

UNION OF GRADUATES IN MUSIC (INCORPORATED). The formation of this Union was suggested by Sir John Stainer, who took the chair at a meeting held at the R.C.O., Jan. 4, 1893, at which the Union was formally constituted, Sir John being the first president, and Thomas Lea Southgate the hon. sec. Those only are eligible for membership

'upon whom Degrees in Music have been conferred by one of the Universities of the United Kingdom of Great Britain and Ireland, or by any authority in the said United Kingdom which confers degrees by virtue of a Royal Charter or by the sanction of the Crown or of Parliament.'

The Union was incorporated in 1897. A 'Roll

and Kalendar' is issued annually since 1893, and latterly an annual conference of members has been held at one or other of the Universities. Many distinguished musicians have held the office of president. (See DEGREES.)

UNION PIPES, see UILLEANN PIPES.

UNISON, simultaneous occurrence of two sounds of the same pitch. Passages in octaves are sometimes marked *Unis.*, but this is not strictly correct. C. H. H. P.

UNIVERSAL EDITION, a music publishing combine which began in 1901 by the purchase of a number of the individually owned businesses of Vienna, and issued editions of the classics in large quantities. By the purchase of the Munich business of Joseph Aibl (1904) it acquired the majority of the works of Richard Strauss, which together with the works of Bruckner, Mahler, Delius and other prominent composers gave it a representative catalogue of modern music. The Universal Edition has also specialised in the works of the younger generation, and from 1920 has produced the *D.T.Ö.* Emil Hertzka is managing director. (*Riemann.*)

UNIVERSITY CHORAL SOCIETIES, see CAMBRIDGE; DUBLIN; EDINBURGH; OXFORD.

UPBEAT and OFFBEAT. The Greeks had a word 'anakrousis' which they used as we talk of 'striking up' a piece of music. Of this the French made '*anacrouse*,' while the Germans use '*Auftakt*' to express what we call 'offbeat.' The cry of nearly all animals, including man, proceeds from an unaccented note (generally low) to an accented (high), and it is therefore in the nature of things that much music should begin on the offbeat, a doctrine associated with the names of Westphal and Riemann.

The offbeat in this sense is not necessarily limited to the last note of the bar. It would include, for instance, the three preliminary notes of the 'Marseillaise,' but eventually it includes all phrases that do not begin with the first of the bar. Westphal calls all such phrases '*aufaktig*,' as we might say, 'offbeaten.' It is convenient to confine 'upbeat' to the last of the bar, leaving 'offbeat' for any other note than the first. A. H. F. S.

UP BOW, see BOWING.

UPPER PARTIALS. The higher or more acute partial tones. (See ACOUSTICS, subsection HARMONIC SERIES.)

UPRIGHT PIANOFORTE, see PIANO-FORTE.

URBANI, PIETRO (b. Milan, 1749; d. South Cumberland Street, Dublin, Dec. 1816¹), appears to have been an excellent theoretical musician, and his singing was considered good and tasteful.

He came to London, but about 1780 made his way into Scotland. In Glasgow he resided

¹ Date given by W. H. O. Z.

three years, singing Scottish songs, and in 1784 he was in Edinburgh, being engaged at the St. Cecilia Hall Concerts. He was eminent as a teacher, and his arrangements of the vocal melodies of Scotland were much admired. Between 1792 and 1804 he issued six folio books of his arrangements of Scottish songs, and these are remarkable for being the first to have opening and concluding symphonies, and elaborate accompaniments which employ two violins, viola and pianoforte.

The books were dedicated to different Scottish ladies of title, and some of the poetry was by Burns, who knew and esteemed the musician. About 1795-96 Urbani entered into a musio-selling and publishing business, and the firm of Urbani and Liston was at 10 Princes Street, Edinburgh, until about 1808-9. It was then broken up, and Urbani's books of Scottish song were reissued by other firms. He attempted to introduce Handel's oratorios to the Glasgow and Edinburgh public, but this entailed heavy losses, and with the failure of his music business Urbani retired, broken in health and fortune, to Dublin. He died there in poverty, leaving his widow destitute. Two of his operas were performed in Dublin, viz. 'Il Farnace' and 'Il trionfo di Clelia.' F. K.

URBANI VALENTINO, see VALENTINI (3).

URFEY, THOMAS D' (b. Exeter, 1653; d. Feb. 26, 1723), the grandson of a French Huguenot, who fled from La Rochelle before the siege in 1628 and settled at Exeter, his mother being of the family of the Marmions of Huntingdonshire. Thomas D'Urfev was educated for the law, but abandoned that profession for poetry and the drama.

Between 1676 (when his 'Siege of Memphis' was given at the King's Theatre) and his death, he produced upwards of thirty plays, which were at first very popular, but were in the course of a few years afterwards banished from the stage on account of their licentiousness and indecency. The songs in a few of them still survive, being preserved through having had the good fortune to be allied to the music of Henry Purcell. These are in *A Fool's Preference*, 1688; *Bussy d'Amboise*, 1691; *The Richmond Heiress*, 1693; and the three parts of *Don Quixote*, 1694-95. His comic opera, 'Wonders in the Sun,' 1706, was set by Giovanni Battista Draghi. Much of his fame was owing to his songs and to the lively manner in which he himself sang them, which procured him the favour of Charles II., William III. and Queen Anne. In this he resembled Tom Moore, and like him he was particularly apt at adapting his verses to existing music. He published, between 1683 and 1685, three collections of songs written by himself, and set to music by the best composers of the period. His connexion with the early edition of the celebrated collection of songs called 'Wit and Mirth; or,

Pills to purge Melancholy,' is uncertain. Editions of this range from 1682 to 1720; that with the airs first appeared in two volumes in 1698-1699, and the number of volumes increases with almost every edition. The dates of these later ones are 1707-1712, 1714 and 1719, when it had reached five volumes 12mo. In 1720 a sixth was added. These six volumes were recently reprinted. In the musical part he appears to have had the assistance of John Lenton. The collection is disfigured with the grossest obscenity, but it is valuable for its important bearing on vocal music of the period, and for the many early airs that it contains. D'Urfev wrote several of the birthday and New Year's odes which were set to music by Purcell and Blow, and supplied the former with the words for his fine ode known as 'The Yorkshire Feast Song.' In the latter part of his life he was reduced to great distress, from which he was relieved by the profits of a performance of his own comedy 'The Fond Husband; or, The Plotting Sisters,' which the managers of the theatre generously gave for his benefit on June 15, 1713. D'Urfev was buried at St. James's, Piccadilly, where, against the outer south wall of the tower of the church, may be seen a tablet with the simple inscription, 'Tom D'Urfev, Dyed Feb^y 26, 1723.'

W. H. H.; addns. F. K.

URHAN, CHRÉTIEN (b. Montjoie, near Aix-la-Chapelle, Feb. 16, 1790; d. Belleville, Paris, Nov. 2, 1845), was the son of a violinist. He early showed great taste for music, and while still untaught began to compose for his two favourite instruments, the violin and piano. The Empress Josephine, happening to hear him at Aix-la-Chapelle, was so struck with his precocious talent that she brought him to Paris, and specially recommended him to Lesueur, whose influence was of much service to Urhan.

The latter entered the orchestra of the Opéra in 1816, was promoted first to a place among the first violins, and finally, on Baillot's retirement (1831), to that of first violin-solo. As a concert-player he made his mark as one of the foremost violinists of the day with Mayseder's brilliant compositions, which he was the first to introduce in Paris. He was frequently heard at the 'Concerts du Conservatoire,' of which he was one of the originators, and where his performances on the viola and the viole d'amour excited great attention. He also contributed to the success of the memorable evenings for chamber-music founded by Baillot, and of Fétis's 'Concerts historiques.'

He left two string quintets; two quintets for three violas, violoncello, double-bass and drums *ad lib.*; PF. pieces for two and four hands; and melodies for one and two voices, including a romance on two notes only, all published by Richault, and now almost unprocurable. Urhan styled all his music

'romantic.' He was godfather to Julius Stockhausen the singer. G. C.

URHEEN, the Chinese fiddle, consists of a small circular block of wood hollowed out and covered at one end with the skin of a serpent, forming the table or sounding-board. The two strings (usually of silk) are tuned in the interval of a fifth from each other. (See *PLATE LII*. No. 4.) The hairs of the bow pass under the strings, and as the strings are close together the chief difficulty of the novice is to learn to press the bow squarely on one string without touching the other. Tradescant Lay¹ says that:

'Out of this wretched thing performers contrive sometimes to draw sounds of great brilliancy, so that I have heartily wished them a better tool for their pains.'

There is no mention of the Urheen or of any kind of fiddle in the Chinese sacred books which record the teaching and doings of Confucius. The instrument probably came into China from India with the Buddhist religion during the first century of our era. E. H.-A.

URIO, FRANCESCO ANTONIO, Milanese composer of the 17th and 18th centuries. The title of his first published work, of which there are copies in the library of the Liceo Musicale of Bologna, in the State Library of Berlin, the British Museum, etc., is as follows:

'Motetti di concerto a due, tre e quattro voci, con violini, e senza. Opera prima. Composti e Dedicati all' Eminentissimo e Reverendissimo Principe il signor Cardinale Pietro Ottoboni . . . da Francesco Antonio Urio de Milano Minore Conventuale, Maestro di Cappella nell' Insigne Basilica de' Santi Dodici Apostoli di Roma. In Roma MDCXC. nella Stamperia di Gio. Giacomo Komarek, Boemo, etc.'

Between this date and that of his second work—also contained in the Bologna Library—he had migrated from Rome to Venice, and was maestro di cappella of the church of the Fràri.

'Salini concertati a tre voci con Violini à beneplacito del Padre Francesco Antonio Urio Maestro di Cappella nella Chiesa del Frari di Venetia. Opera Seconda dedicata all' Eccellenza del signor Don Filippo Antonio Spinola Colonna, Duca del Tasto, Gentiluomo della Camera di S. M. Cattolica, suo Generale della Cavalleria nello Stato di Milano, e Castellano del Castel Nuovo di Napoli, etc. In Bologna per Martino Silvani, 1697, etc.'

Arthur Pougin, in his *Supplement to Fétis' Biographie*, states that Urio wrote a *Cantata di camera* (1696), and two oratorios, 'Sansone accecato da' Filisti' (1701), and 'Maddalena covertita' (1706), for Ferdinand de' Medici, Prince of Tuscany, but neither the authority for the statement nor the place where the works are to be found can now be ascertained. A *Tantum Ergo* for soprano solo and figured bass is in the R.C.M., and a nameless oratorio is at Modena. The most important known work ascribed to Urio, however, is a *Te Deum* for voices and orchestra, which owes its interest, not only to its merits, which are considerable, but to the fact that Handel used it largely, taking, as his custom was, themes and passages from it, principally for his *Dettingen Te Deum* (10 numbers), and also for 'Saul' (6 numbers), 'Israel in Egypt' (1 ditto) and 'L' Allegro' (1 ditto).

¹ *The Chinese as They Are*, London, 1841.

Of this work three MSS. are known to be in existence: (1) In the R.C.M., which is inscribed 'John Stafford Smith, A.D. 1780. *Te Deum* by Urio—a Jesuit of Bologna. Apud 1682.' Over the score: 'Te Deum Urio. Con due Trombe, due Oboe, Violini & due Viole obligati & Fagotto a 5 Voci.' (2) In the B.M. Add. MSS. 31,478, 'Te Deum Laudamus con due Trombe, due Oboe et Violini, et due Viole obligati. Del Padre Frañco Uria [sic] Bolognese.' This title is followed by a note in ink, apparently in the handwriting of Dr. Thomas Bever, Fellow of All Souls, Oxford, and a collector of 18th-century music:

'This curious score was transcribed from an Italian Copy in the Collection of Dr. Samuel Howard, Mus. D., organist of St. Bride's, and St. Clement's Danes. It formerly belonged to Mr. Handel, who borrowed from hence several Verses in the *Dettingen Te Deum*, as well as some other passages in the Oratorio of Saul. T. B.

'This copy was written by John Anderson, a Chorister of St. Paul's 1781. Pri. 11. 8s. 0d.'

Above this in pencil, in another hand:

'In the copy purchased by J. W. Callcott at the sale of Warren Horne, the date is put as 1661.'

(3) The copy just mentioned as having been sold at Warren Horne's sale came into the possession of Schoelcher (as stated in a note of Joseph Warren on the fly-leaf of No. 2), and is now in the library of the Conservatoire at Paris.

It is an oblong quarto, with no title-page, but bearing above the top line of the score on p. 1, 'Te Deum, Urio, 1660.'²

The 'Italian copy,' which was first Handel's and then Dr. Howard's, if not that in the R.C.M. (which is certainly in an Italian hand), has vanished for the present.⁴

The whole subject of this *Te Deum* is reviewed in close detail by Percy Robinson in *Handel and his Orbit* (London, 1908). Robinson's researches have led to the discovery that URIO and ERBA (*q.v.*) are places in the neighbourhood of Milan (Urio is north of Como on the shores of the lake), and on this he founds the theory that the MSS. which bear these names are Handel's own composition and date from the Italian period.

The *Te Deum* was published by Chrysander (from what original the writer does not know) as No. 5 of his 'Denkmäler' of Handel (Bergedorf, 1871). It has been examined chiefly in its connexion with the *Dettingen Te Deum* by Prout, in the *Monthly Musical Record* for Nov. 1871, and we recommend the student to read the very interesting analysis there given, as well as Robinson's book. See also Sedley Taylor, *The Indebtedness of Handel* (Cambridge, 1906). G.; rev.

² In the score itself these are given as 'Violetta' (in alto clef) and 'Violetta tenore' (in tenor clef).

³ Notes by J. W. Callcott and Vincent Novello having reference to Handel's 'borrowings' are appended to this copy and are reproduced in former editions of this Dictionary.

⁴ A manuscript of the work bearing the words 'Te Deum Uria' [sic] was purchased at a sale in London in 1925 by W. Barclay Squire. It was fully described by P. Robinson in the *Bulletin de la Société Union Musicologique* (6me année, 1re fascicule).

URLUS, JACQUES (b. Amsterdam, Feb. 1868), operatic tenor. Educated at Utrecht, he studied singing at the Conservatoire, Amsterdam, and first sang in public at a concert in Utrecht in 1887. After that he went through a careful preparation for the operatic stage and made his début in the same city in 1894 as Canio in 'Pagliacci.' One by one he mastered the leading Wagnerian parts, for which his robust voice and declamatory gifts obviously fitted him, and ere long was engaged for Bayreuth, where he sang for several seasons with invariable success. During the Beecham spring season of 1910 he made his début at Covent Garden as Tristan, making a favourable impression, and returned in the following winter to sing Tannhäuser. He also appeared at Covent Garden in 1914 as Parsifal and Siegmund, under Bodanzky; and again in 1924 as Siegmund and Tristan under Bruno Walter. On the Continent he was engaged for considerable periods at the Paris Opéra and at Leipzig, while from 1912-17 he sang regularly at the Metropolitan Opera House, New York. He has many decorations, including one from the Queen of Holland.

H. K.

URQUHART, THOMAS, an early London violin-maker, who worked in the reign of Charles II. The dates on his violins are chiefly in the 'seventies and 'eighties. The model superficially resembles Gasparo da Saló; it is high, straight and flat in the middle of the belly, and has a rigid and antique appearance. The corners have but little prominence. The sound-holes are 'set straight,' and terminate boldly in circles, the inner members being so far carried on and introverted that the straight cut in each is parallel to the axis of the fiddle. This is Urquhart's distinctive characteristic. The purfling is narrow, coarse and placed very near the edge. The violins are found of two sizes; those of the larger size would be very useful chamber instruments but for the height of the model, which renders them somewhat unmanageable. The varnish, of excellent quality ('equal to that on many Italian instruments,' says Hart), is sometimes yellowish brown, sometimes red. Urquhart is considered to have been a Scotsman; he made flutes as well as violins, and one of his flutes was formerly in the possession of the late John Glen of Edinburgh. Edward Pamphilon, a London violin-maker on London Bridge, about 1680-90, is said to have been his pupil. E. J. P.; addn. F. K.

USANDIZAGA, JOSÉ MARÍA (b. San Sebastian, Mar. 31, 1887; d. Oct. 1915), Spanish (Basque) composer, who, had he lived, might have done much for modern Spanish opera. His 'Mendy-Mendiyan' was produced at Bilbao (1910), and 'Las Golondrinas' at Madrid (1914). A posthumous work, not yet performed, is 'La Llama,' and there are works for chorus and

orchestra and a string quartet. Usandizaga was a student at the Schola Cantorum, Paris.

J. B. T.

USE, the name given to any special group of rites or ceremonies belonging to a particular Church. Fundamentally all the Western Latin Services are the same; but local differences, both in rite and ceremony, naturally arose, and in the 13th century these crystallised into orderly Uses. Thus in England many dioceses other than that of Salisbury adopted the ways of that Cathedral, or in other words followed Sarum Use. Similarly in the North, York Use was popular, and in the West the Use of Hereford. Abroad a similar state of things prevailed; Rome had its Use, but it was in the main a local or at most an Italian Use, while elsewhere in France, Germany, etc., diocesan Uses preserved their local distinctions. At the Reformation a desire for uniformity in all quarters alike altered this. In England the local Uses were superseded by 'The Book of Common Prayer . . . according to the Use of the Church of England': while abroad after the Council of Trent the reformed Roman Use was widely adopted to the exclusion of the local Uses. The Old Religious Orders had Uses of their own; the Franciscans were instrumental in forming and disseminating the Roman Use, and even after the Tridentine reform the Old Religious Orders kept their own Uses. In the 17th and 18th centuries, France rebelled against the uniformity, and a new set of French diocesan Uses grew up which were only with difficulty suppressed when the pendulum again swung back in the direction of uniformity in the middle of the 19th century.

At the present time the Roman Use prevails almost through the whole of the West where the Latin Services are in use; and revisions both of the text and of the music which are in progress under the guidance of the Vatican will no doubt tend to make this uniformity of Use all the more general and the more satisfactory; though the ancient Orders (which have been foremost in the work of revision) will no doubt retain their own Uses: and still more the Uniat Churches of the East, Armenians, Syrians, Greeks, etc., who, while in communion with Rome, use a language and a rite other than Latin. The English Prayer-Book has similarly disseminated 'the Use of the Church of England' throughout the world. This Use, though very definite as far as rite and ceremonial go, is not specific on the side of music pure and simple, for no official music is specified in conjunction with it as the old plain-song is specified in the case of the Latin Uses. At the beginning of the present century¹ the Vatican insisted more strongly than ever on the claim of this plain-song to be the official ritual music of the Church, though not to the exclusion of

¹ *Motu Proprio* of Pope Pius X., Nov. 22, 1903.

more modern or of harmonised music: and the result should be the banishing, not only of much unworthy modern music, but also of the debased or frankly modern plain-song that obtained currency in many of the French Uses, and has been too much adopted from them for English Services.

W. H. F.

USPER, FRANCESCO SPONGIA (SPONZA), DETTO, also called simply Franc. Sponga, a 15th-16th century Venetian priest and organ virtuoso, pupil of Monteverdi. About 1614 he was organist at San Salvatore, Venice. When Grills, the organist at St. Mark's, fell ill in 1621, Usper became his deputy, but when Grills died in 1623 Carlo Fillago was appointed as his successor. In 1627 he was principal of the great school of St. John the Evangelist at Venice. In a catalogue at Bologna it is surmised that he was born at Parenzo. He composed: 'Ricerari et arie francesi,' 4 v. (1595); 1 book madrigals, 5 v. (1604); 'Messa e Salmi,' 5 v., with organ and various instruments, together with symphonies and motets, 1-6 v. (1614); 1 book motets, symphonies, sonatas, canzonas and capriccios, 1-8 parts, with basso continuo; also 'La Battaglia,' a 8, to sing and play . . ., op. 3 (1619); Vesper-psalms for the whole year, partly for 2 choirs . . ., a 4, 5 and 8 v., with basso continuo, op. 5 (1627) (Q.-L.).

UT, the first note of the major scale in the nomenclature of France and Italy: =C. In naming the note C, *Ut* has been generally supplanted by *Do*; but for the key of C, *Ut* is retained. See HEXACHORD; SOLMISATION.

UTTENDAL (UTENTHAL), ALEXANDER (d. Innsbruck, May 8, 1581), a Netherlander by birth, is first heard of as a boy-chorister in the chapel of the Archduke Ferdinand at Prague. In 1568 he appears as singer in the chapel of the same Archduke at Innsbruck. In 1573, in return for various compositions dedicated to the Archduke, he received the title of court composer (Hofkomponist), and in 1579 or earlier was appointed second Kapellmeister with certain special duties for the care and instruction of the choir-boys. He enjoyed special favour with the Archduke, who generously assisted him in the publication of his works. In 1580 he was offered, but declined, the post of Kapellmeister to the Saxon court at Dresden, vacant by the death of Antonio Scandelli.

His works were all published at Nuremberg, and are as follows:

1. Septem Psalmi Poenitentiales, adjunctis ex Prophetarum scriptis Orationibus ejusdem Argumenti Quinque, ad Dodecachordi

modos duodecim aptissima tam vivas voci quam diversa musicorum instrumentorum generibus harmonia accommodati . . . 1570.

2. Sacrarum Cantionum quas vulgo motetas vocant, antea nunquam in lucem editarum sed nunc recens admodum tam instrumentis musicis quam vivae melodiae quinque vocibus attemperatarum Liber Primus, 1571.

3. Sacrae Cantiones . . . Sex et plurium vocum . . . Liber Secundus, 1573.

4. Tres Missae, quinque et Sex Vocum . . . Item Magnificat per octo Tonos quatuor vocibus . . . 1573.

5. Frühe neue Teutsche und Frantzösische Lieder, Heilich zu Singen, auch auf allerley Instrumenten zu gebrauchen nach sonderer Art der Music componirt, mit vier, fünf und mehr Stimmen . . . 1574. This work contains 26 secular songs, 13 German a 4-8 and 13 French a 4-6.

6. Lib. 3 Sacrarum Cantionum . . . 5 et 6 voc. 1577.

A special distinction of this master is said to be that he is particularly careful in the notation of all accidentals in his works, so that the principles deduced from his works afford a good clue to the right application of these in other works of the period. He is also one of the earliest to use the natural ♮ instead of ♯ to cancel the flat ♭. Only a few of his works have appeared in modern editions. In the fourth volume of Proske's 'Musica divina,' there is a musicianly and deeply expressive setting of the Psalm Miserere, composed throughout in motet style, a 5, in six divisions. In Commer's collection 'Geistliche und weltliche Lieder aus den xvi.-xviii. Jahrhundert' there are three German secular songs a 4, very melodious, and W. Barclay Squire has published one of the French songs, a 4, 'Petite nymphe folastre.'

J. R. M.

BIRN, JOSEF LEONTHALER, *Die kirchenmusikalischen Werke von Uttendal*, (Vienna Dissertation, 1919.)

UTTINI, FRANCESCO ANTONIO BARTOLOMEO (b. Bologna, 1723; d. Stockholm, Oct. 25, 1795), pupil of Sandoni and Perti, member of the Accademia dei Filarmonici in 1743, and 'Prince' of that society in 1751. In 1753 he was at Copenhagen, and on Oct. 30, 1754, he gave a concert at Hamburg, when he appeared also as a singer. Thence he went to Stockholm as court Kapellmeister, where he wrote, and produced, between 1754 and 1765 8 Italian and 5 French operas. In 1768 he visited London, where Henry Fought published his 'Six sonatas for 2 violins and a bass . . ., one sonata for the violoncello and another for the harpsichord, op. 1.' He was the first composer of operas in the Swedish language, viz., 'Thetis och Peleus' (1773) and 'Aline' (1776). Apart from the above-named works he wrote 3 symphonies for 4, 6 and 8 instruments, 12 sonatas and 9 trios for 2 violins and bass. Apparently he did not excel as a conductor, for when Naumann was called to Stockholm in 1776 for the reorganisation of the orchestra he found it in a deplorable condition (Riemann; Q.-L.).

VACCAJ (VACCAR), NICOLA (*b.* Tolentino, Italy, Mar. 15, 1790; *d.* Pesaro, Aug. 5, 1848), a prolific composer of Italian operas. He passed the first ten or twelve years of his life at Pesaro, a few more at Rome with a view to the law, and it was not till his seventeenth or eighteenth year that he threw off this, and took lessons of Jannaconi in counterpoint. In 1811 he went to Naples and put himself under Paisiello for dramatic composition, and there wrote a couple of cantatas and some church music. In 1815 he brought out his first opera, 'I solitari di Scozia,' at Naples. The next seven years were passed at Venice, each one with its opera. None, however, was sufficiently successful, and he therefore took up the teaching of singing, and practised it in Trieste and in Vienna. In 1824 he resumed opera composition, and in 1825 wrote amongst several others his most favourite work, 'Giulietta e Romeo,' for Naples. In 1829 he visited Paris, and stayed there two years as a singing-master in great popularity. He then passed a short time in London, and in 1831 we again find him writing operas in Italy, amongst others 'Marco Visconti' and 'Giovanna Grey'—the latter for Malibran, for whose death in 1837 he wrote an elegiac cantata. In 1833 and 1834 he was again in London, singing occasionally at Lady Morgan's and elsewhere. In 1838 he succeeded Basili as head and principal professor of composition of the Conservatorio of Milan. In 1844 he left his active duties, returned to Pesaro, and wrote a fresh opera, 'Virginia,' for the Argentina Theatre, Rome (1845): it was his last work. His works contain fifteen operas besides those mentioned above, twelve Ariette per Camera (Cramer, London), and a Method (Ricordi). 'Giulietta e Romeo' was performed at the King's Theatre, Haymarket, London, Apr. 10, 1832, and its final scene, with the beautiful song, 'Ah, se tu dormi,' was often substituted for the last act of Bellini's 'Capuletti ed i Montecchi.' *g.*; addn. w. H. G. F.

BIBL.—G. VACCAR (son), *Vita di N. Vaccar*. (1892.)

VACCARI, FRANÇOIS (*b.* Modena, 1775; *d.* Portugal, after 1823), an excellent violinist, who at the age of 10 studied under Nardini at Florence; three years later he was giving concerts at Mentone, and here it was that Pichl induced him to astonish his auditors with a concerto played at first sight. Following upon this, he achieved successes at Parma, Piacenza, Verona, Padua and Venice, after which he spent some years at Milan. In 1804 he was appointed a member of the court band of Spain, but the troubles of 1808 brought about his resignation. He toured in Spain until the following year, when he visited Paris, and travelled in Germany. In 1815 he came to

England. He also went to Lisbon in the same year, and subsequently returned to Madrid, where he was appointed leader of the royal music. He was again in Paris in 1823, and also in London, where he was heard at the Philharmonic Concerts. He composed several pot-pourris of popular airs, for violin and piano; also some popular variations for the same instruments, on 'God save the King.' An 'Aria' by him for soprano was published in London in 1814.

VACCHELLI, GIOVANNI BATTISTA, of Rubiera, Modena, a 17th-century Minorite friar, organist in 1646 of the town of Rubiera. In 1664 he was a member of the Accademia della morte del final da Modona l' Accademia Naufragante, and in 1667 was also maestro di cappella di Pesaro. He wrote motetti concertati, 2-4 v., with a bass for the organ, op. 1 (1646); motetti a voce sola, book 1, op. 2 (1664); sacri concerti, 1-4 v., with and without violins, op. 3 (1667) (*Q.-L.*).

VACH, FERDINAND (*b.* Jazlovce, near Řičan, 1860), Moravian conductor and choir-master. He received his musical education at the Organ School, Prague, and then conducted for a time at the Brno Theatre. He made his reputation as a choral conductor with the choir 'Moravan' at Kroměříž (1886). Appointed singing master at the training school for teachers, he founded a male voice choir among his pupils (1903), which became the now famous Choral Society of Moravian Teachers (*Pěvecké sdružení moravských učitelů*). Vach has since transferred his activities to Brno, where he is professor at the Teachers' School, the Organ School and the State Conservatoire. He has composed orchestral works, cantatas, choruses and church music, and made many admirable arrangements of folk music for his choir. Over twenty years' work under the same conductor gave a wonderful unanimity of feeling and technical perfection to this body of singers. The P.S.M.U. with their director have toured Czechoslovakia, Germany, Austria and Russia. In 1919 they were heard in London, at Queen's Hall. A choir of women teachers was founded in 1914. R. N.

VACHER (LEVACHER), PIERRE JEAN (*b.* Paris, Aug. 2, 1772; *d.* there, 1819), violinist and composer. At 8 years of age he began his violin studies, first with Alfred Monin, and then with Viotti. When the French Revolution broke out, Vacher—then 19 years of age—went to Bordeaux and became leader of the orchestra at the principal theatre there. His stay in Bordeaux was brief, however, and he returned to Paris, where he

fulfilled similar duties at the Théâtre du Vaudeville, and made several of his tasteful romances popular through introducing them into the theatrical programme. From the Vaudeville he went to the Théâtre-Feydeau, and from thence to the Opéra orchestra. A number of Vacher's trios and airs were published in Paris by Nadermann, Gaveaux, Janet, Frey and Omont.

VACHON, PIERRE (b. Arles, 1731; d. Berlin, 1802), violinist and composer. The foundation of his education as a violinist was laid in his native town. At the age of 20 he went to Paris and became the pupil of Chabran. In 1758 he was heard at the Concert Spirituel in Paris, in a concerto of his own. According to the contemporary account of the concert in the *Mercure de France*, Vachon achieved a brilliant success. In 1761 he was appointed leader of the Prince de Conti's band. In 1772 he was in London. In 1784 he toured in Germany, where the Emperor appointed him director of the court music. He remained in this post until superannuated in 1798, when he retired on a pension. La Borde¹ states that Vachon excelled in chamber music. He wrote several operas, a number of instrumental pieces, quartets, trios and concertos for violin and orchestra. Most of these were published by Chevardière in Paris, but six sonatas for violin and bass were published in London in 1770.

VACQUERAS, BELTRAME (BERTRANDUS, BERNARDUS, *alias* de Crassia), a Spaniard, and singer in the Papal Chapel, 1483-1507; probably identical with Bertrandus the bass (*contrabassista*) singer, who appears in the lists of singers at St. Peter's, Rome, 1481-82. Petrucci published a chanson and a motet in 1501 and 1503. The song, 'Ve ci la danse barbare,' is remarkable for the interwoven dance tune. Glarean, who valued him highly as a composer, included his psalm, 'Domine non secundum peccata,' in his Dodecachordon. The Sistine Chapel at Rome possesses in MS. a Mass 'Obon du cœur,' 4 v., a Mass 'L'homme arme,' 4 v., and a number of minor vocal compositions, 2-6 v. (Q.-L.; Ambros; Riemann).

VAET, JACOBUS (d. Jan. 8, 1567), church composer, was a native of Flanders.

He was in the service of Maximilian, King of Bohemia, to whom he acted as 'chori musici praefectus,' in 1562, the year that his work,

'Modulationes quinque vocum (vulgo motecta) nuncupate, serenissimi Bohemiae Regis, musicarum modulationum, rectoris celebrissimi, Venetis apud Antonium Gardanum,

was published in two volumes. He was appointed chief Kapellmeister at Vienna, Dec. 1, 1564, four months after Maximilian II. had succeeded Ferdinand as Emperor. He retained

this post, in which he had been preceded by Jachet Buus (see JACHET) until his death. A motet in his memory, 'In obitum Jacobi Vaet,' by Jacob Regnart, 'Defunctum charites vaetem merore requirunt,' set for seven voices, was published in 1568, in the fifth and last volume of Pierre Joannellus's 'Novus Thesaurus,' a work containing many of Vaet's own compositions, notably the great Te Deum set for eight voices, considered his finest production. Both this work and the earlier 'Thesaurus musicus' published in 1564, show Vaet as pre-eminently a court musician, for among the large number of his motets included in these volumes are compositions in honour of Emperor Ferdinand I.; of Maximilian II.; of Maximilian's two sons, Rudolf and Ernst; of Albert Duke of Bavaria; and of Queen Katherine of Poland; many of these with other motets and the Te Deum have been reprinted by Franz Commer (Coll. op. mus. bat., vols. 2, 4, 5 and 9).

Some of Vaet's sacred compositions were included in the great collection 'Evangelia domin. et fest. dierum,' in six volumes, published at Nuremberg, 1554-56, and in the four volumes of 'Eccles. cant. quatuor vocum,' published by Tylman Susato at Antwerp, 1553; four are in 'Novum et insigne op. mus.,' Noribergae, 1558; three motets are in Dietrich Gerlach's 'Tricinia sacra,' 1567; others are in 'Lib. II suav. et jucund. harm.,' 1568, and in 'Select. sac. cant.' three books, published in 1569. The usual transcriptions of these vocal compositions into tablature for organ or lute took place; specimens are to be seen in Joh. Rühling's 'Tabulaturbuch,' 1583, and in Emanuel Adriansen's 'Pratum musicum,' 1584.

Only two secular compositions can be found to balance this mass of sacred music, 'Sans vous ne puis' in 'Premier livre des chansons a quatre parties,' Louvain 1554 and 1558, and 'Amour leal' in the first book of the 'Jardin musical,' Antwerp, 1556.

Allusions to Vaet's methods of composition are sometimes to be found in early theoretical works. Zacconi² refers to the introduction of 'proportione imperfetta' or duple time into the 'Hymni' of 'Jacobo Vaed, musico antico e celebrato.' A century later Angelo Berardi³ bases his conclusion that there is little difference to be found between the 'cantilene ecclesiastiche e le volgari' on his examination of 16th-century compositions by various musicians, among them Jac. Vaet.

A stray little bit of information garnered by Van der Straeten⁴ may possibly be connected with Vaet. He extracts it from 'Les comptes de la châtellerie d'Ypres,' 1499. It runs:

'Meester Jean Vaet ende Joos Gheeraerd, pensionaris van Ypre, was ghepresenteert twee kennen wyns, van XXXII stuivers.'

¹ *Essai sur la musique*, vol. III.

² *Prattica*, 1592, p. 49.

³ *Misc. musicale*, 1689, p. 40.

⁴ *Pays-Bas*, I. p. 120.

Van der Straeten also states that in the *Poemata* of François Haemus published at Antwerp, 1578, is an elegy on the death of Jacques Vasius, first Kapellmeister to the Emperor Maximilian, doubtless identical with Jacques Vaet; this tends to confirm Vaet's supposed Flemish nationality, for Haemus devotes many of his poems to dwellers in Courtrai and other towns close by. Moreover, Guicciardini¹ definitely states that among native musicians 'di presente vivono Glaches de Waet, Glachetto di Berchem, etc., e molti altri tutti maestri di musica celeberrimi, & sparsi con honore & gradi per il mondo.'

Manuscript copies of a Magnificat, of motets and masses composed by Vaet are in the following libraries:

- Augsburg.**—Missa sex vocum super carmen 'Tityre tu patulae,' Jacobus Vaet, 1595.
Berlin.—Missa sex vocum super 'Ego flos campi'; a motet for five, and one for four voices.
Breslau.—MS. 203, dated 1583, Magnificats, I.-VIII. toni, for four voices. MS. 97, Missa super 'Vitam quae facit,' dated May 17, 1593, and Missa super 'Tityre tu patulae,' both for six voices. Eighteen motets for 4, 5, 6, and 8 voices, are in MSS. 1, 3 (dated 1573), 3, 5, 6 (dated 1567), 7 and 11 (dated 1583). (See Bohn's Catalogue.)
Brieg.—One motet for five, and one for six voices. (See Kuhn's Catalogue.)
Dresden.—MS. 276. The Te Deum in three movements, for eight voices, scored by Wilhelm Fischer. (See Kade's Catalogue.) Another MS. score made by J. G. Bastiaens is in the library of the Maatschappij tot Bevordering der Toonkunst.
Liegnitz.—Motet for five voices. (See Plüdel's Catalogue.)
London.—British Museum. A. D. MS. 31,392, in late tablature; 'Salve Regina,' 'Aspicite Domine,' 'In tenebris' and 'Huc me sideris.'
Lübeck.—In a cantional 'Reges terrae' for five voices; 'Beata es' for four voices.
Munich.—Mus. MS. 45. An unpublished Mass 'Disimulare' for six voices. Mus. MS. 82, 'Magnificat VIII. tonorum, auctore Jacobo Vaet (l) Caesar. maj. Capellae magister. Anno Domini, 1566,' for four voices, unpublished. Mus. MS. 41, Hymn, 'O gloriosa domina,' for eight voices, in two movements. Mus. MS. 1536. An incomplete set of paribooks, dated 1589, with sixteen motets and hymns, for six and eight voices. Mus. MS. 1501. Motet for four voices. (See J. J. Maier's Catalogue.)
Nuremberg.—Lorenzkirche Bibliothek. MS. Sign. 227, S. Egid, dated Sept. 3, 1573; Missa Quodlibetica cum quinque vocibus a Jacobo Vaet excellentissimo musico composita. Missa sex vocum facta ad imitationem cantilenae 'Si me tenses,' auctore Jacobo Vaet. (See H. Botstiber's Catalogue.)
Prague Library.—Missa super 'Tityre tu patulae' for six voices. Magnificat VIII. tonorum for four voices, and six motets.
Stuttgart.—Landes-Bibl. MS. 5. 'Dum sceleris' for five voices.
Vienna.—MS. 15,950. Three masses for six voices; 'Ego flos campi,' 'Disimulare' and 'Tityre tu patulae.' A Mass, 'J'ay mis, mon cœur,' for eight voices. MS. 19,280. Canon, sex vocum, dedicated to 'Maximiliano Bohemorum Regi, Archiduci Austriæ,' and with the text 'Qui operetur est Petro,' etc. A minute description of this work, printed at Vienna by Raphael Hofhalter, in 1560, is to be found in Schmid's *Uttaviano dei Petrucci*, 1845, p. 215. MSS. 16,613, 18,828 and 19,189, contain motets. (See Mantuan's Catalogue.)
Zwickau.—MS. 742, date about 1580, an incomplete copy of the Mass super 'Si me tenses.' (See Vohlhard's Catalogue.)

C. S.

VAGANS, *i.e.* wandering, uncertain—an old name for the Quinta Pars in a mass or motet, so called because it was not necessarily of any particular compass, but might be a second soprano, or alto, or tenor; though usually a tenor.

G.

VAISSEAU-FANTÔME, LE, opera in 2 acts; words translated or imitated from the *FLIEGENDE HOLLÄNDER* (*q.v.*), of Wagner (from whom the scenario was purchased), music by Dietsch. Produced Opéra, Paris, Nov. 9, 1842.

G.

VAL, FRANÇOIS DU, see DUVAL.
 VALDERRÁBANO, ENRIQUEZ DE, see ENRIQUEZ.

VALDRIGHI, COUNT LUIGI FRANCESCO (*b.* Modena, 1837; *d.* there, Apr. 20, 1899),

musical historian to whose untiring zeal we owe a number of new facts as well as corrections, especially with regard to Modenese musicians. They are contained in a collection of small pamphlets, called *Musurgiana*, comprising biographies, descriptions of famous instruments for the compilation of which his position of honorary librarian or curator of the Este Museum afforded him special facilities. His most important work is perhaps his *Nomocheliurgographia*, the most extensive record of musical instrument makers, ancient and modern, in existence. He wrote also a continuation of Gandini's *Chronicle of Modenese Theatres*, and other minor works. He was an amateur violoncellist, and possessed a very valuable collection of ancient instruments which he left to the Este Museum. The Academy of Sciences and Arts of Modena and the Academy of S. Cecilia at Rome both elected him an honorary member.

E. v. d. s.

VALENTINE, JOHN (*d.* Leicester, 1791), a composer, mainly of instrumental pieces, settled at Leicester in the latter half of the 18th century. His works include some songs, an 'Ode on the Birthday of the Marquis of Granby,' a set of 'Thirty Psalm Tunes,' and several books of marches and minuets, among which are, 'Twenty-four Marches, Minuets, and Airs in Seven parts,' 'Eight easy Symphonies for two Violins and two Hautboys,' 'Sixteen Marches and Minuets,' etc. etc.

F. K.

VALENTINE, ROBERT, a violinist and composer of the early 18th century. He may be identical with a flautist who lived at Rome in 1714, and appeared in London in 1731, and who was known in Italy as Roberto Valentino or Valentini. Long before the date of his appearance in London (if the two men are identical) he had published with Walsh numerous works as follows:

Op.

1. Twelve sonatas for two violins and bass.
2. Twelve sonatas or soli for a flute.
3. Twelve sonatas for a flute (*c.* 1701).
4. Six sonatas for two violins, two oboes or German flutes, with bass.
5. Twelve sonatas for flute.
6. Twelve sonatas for two flutes (or Six sonatas for two violins).
7. Six sonatas for two flutes, or two violins.
- 9 and 10. Sets of Aires, for two flutes and bass.
- 11 and 13. Flute sonatas, and six Sets of Aires and a Chacon for two flutes (*c.* 1720).

Sonatas for flute, adaptable for violin, mandola or oboe, appeared in Rome about 1730, and MS. compositions are at Upsala, Rostock and Wolfenbüttel. In Alfred Moffat's 'Meisterschule' two are reprinted (*Q.-L.*, etc.). M.

VALENTINI, GIOVANNI, was from 1614 court organist to the Archduke Ferdinand at Graz; after the latter's enthronement as the Emperor Ferdinand II., Valentini was his Imperial court organist in Vienna.²

Books of masses were published in 1617, 1621

¹ *Descr. di tutti paesi bassi*, 1567, p. 29.

² Thus Riemann; *Q.-L.* gives 1617 in place of 1614.

(2), some motets, and in 1618, madrigals with accompaniment in 1619, 1621 and 1625, and 'Musiche a 2 voci' in 1622. A four-part setting of the 'Vesperae integrae' and other sacred compositions are in MS. The four sonatas 'a 5 e 4' for strings, at Cassel, one of which was published as 'Enharmonische sonate' in Riemann's 'Alte Kammermusik,' are probably, as Eitner surmises, the work of Giuseppe VALENTINI. M.

VALENTINI, GIUSEPPE (GIUSEFFO) (b. Florence c. 1680), was in the service of the Grand Duke of Tuscany. His concerted chamber music was published at Rome, Amsterdam (op. 1 appeared at both in 1701), London and Bologna, and MS. compositions are in many libraries.

Op.

1. Twelve sinfonie a 3.
2. 'Bizzarerie' for three stringed instruments with bass.
3. Twelve Fantasie for the same.
4. 'Idee per camera' for the same.
5. Twelve 'Sonate' for the same.
- 6 and 7. Concerti grossi.
8. 'Sonata da camera,' or 'Alletamenti,' for violin and violoncello with bass.

The Roman edition of op. 8 is dated 1714. For a sonata reprinted by Riemann see under the name of Giovanni VALENTINI. M.

VALENTINI, PIETRO FRANCESCO (d. Rome, 1654), a great contrapuntist, scholar of G. M. Nanini. Various books of canons, madrigals, 'favole' (possibly for the stage), appeared in 1629, 1631 and 1645, and canzonets, etc., by him were published before and after his death (lists in *Q.-L.* and *Riemann*). His canons were his greatest achievement, and two of them are famous. The first, on a line from the *Salve Regina*, was published in Rome in 1629, 'con le sue Resolutioni in piu di Duemila Modi'; it is given by Kircher (*Musurgia*, vol. i. p. 402), and was selected by Marburg, more than a century later (1763), as the theme of seven of his *Critical Letters on Music*, occupying fifty quarto pages (vol. ii. p. 89). He speaks of the subject of the canon with enthusiasm, as one of the most remarkable he had ever known, for containing in itself all the possible modifications necessary for its almost infinite treatment—for the same qualities in fact which distinguish the subject of Bach's 'Art of Fugue' and the 'Et vitam venturi' of Cherubini's great 'Credo.'

The first subject is:

which gives direct rise to three others; viz.—

Second subject, the first in retrograde motion.

Third subject, the first inverted.

Fourth subject, the second inverted.

Each of these fits to each or all of the others in plain counterpoint, and each may be treated in imitation in every interval above and below, and at all distances, and may be augmented or diminished, and this for 2, 3, 4, 5 or 6 voices. Kircher computes that it may be sung more than 3000 different ways.

The second canon—'Nel nodo di Salomo (like a Solomon's knot) a 96 voci'—published in 1631, consists of the common chord of G, and may be varied almost *ad infinitum*, with insufferable monotony it must be allowed. (See also Burney, *Hist.* vol. iii. p. 522.) G.

Valentini's productions further include:

- Two Favole (stage works with intermezzi): 'La Mitra' and 'La trasformazione di Dafne.'
- Two books of Madrigals. 5 v. with basso continuo *ad lib.*
- Two books 'Motetti ad una voce con instrumenti.'
- Two books of Motets. 2 to 4 v.
- Two books 'Canzonetti spirituali a voce sola.'
- Two books similarly called for 2 and 3 v. and two for 2 to 4 v.
- Canoni musicali.
- Two books, 'Musiche spirituali per la Natività N.S. Gesù Cristo.'
- Two books, 'Canoni, sonetti ed arie a voce sola.'
- Four books, similarly called for 1 and 2 v.
- Two books, Litanies and Motets.
- A theoretical work, MS. in Barbarine library at Rome. (*Riemann*.)

VALENTINI (VALENTINO URBANI), a celebrated *evirato*, who came to London, Dec. 6, 1707.

He seems to have arrived here possessed of a contralto voice of small power, which fell afterwards to a high tenor, and with an opera, 'Il trionfo d' Amore,' in his pocket. The translation of this piece he entrusted to Motteux; and he subsequently sold to Vanbrugh,¹ for a considerable sum, the right of representation. The 'Baroness,' Margherita de l'Épine, Mrs. Tofts, and Leveridge sang with him in this opera ('Love's Triumph'), and, if the printed score may be trusted, they all, including Valentini, sang English words. The piece was produced at the end of Feb. 1708, and he took a benefit in it on Mar. 17. Meanwhile, he had already sung (Dec. 1707) as Orontes, a 'contratenor,' in 'Thomyris,' Hughes understudying the part. Valentini's dress² in this piece cost £25:17:3, a very large sum in those days; his turban and feathers cost £3:10s., and his 'buskins' 12s. We find him³ (Dec. 31, 1707) joining with the 'Signiora Margaritta' (de l'Épine), Mrs. Tofts, Heidegger, and the chief members of the orchestra in a complaint against the dishonesty and tyranny of Rich. They claimed various amounts due for salaries, 'cloaths,' etc. Valentini's pay was fixed at £7:10s. a night, as large a sum as any singer then received; but he seems to have had

¹ The Coke papers formerly in the possession of Julian Marshall.

² *Ibid.*

³ Busby.

difficulty in extracting payment of it from Vanbrugh.

There is extant a curious letter, in which de l'Épine appeals to the Vice-Chamberlain (Coke) for '*juste reuange*' to the '*impertinence*' of which '*cette créature*' (Valentini) had been guilty, in preventing her from singing one of her songs a few days before; and declares that she would never suffer '*ce monster, ennemi des hommes des fâmes et de Dieu*' to sing one of her songs without her singing one of his! The letter is simply endorsed by the Vice-Chamberlain, 'Mrs. Margarita about Mr. Valentini.'

Valentini sang, with Nicolini, in '*Pyrrhus and Demetrius*,' a part which he resumed in 1709. Nicolini and he sang their music to the Italian words, while the rest of the company sang in English, as was not unusual in the *gallimaufries*¹ of the time. Valentini reappeared (1710) in '*Almahide*,' and (1711) in the original cast of '*Rinaldo*,' as Eustazio, a tenor. In 1712 he sang another tenor part, that of Silvio in '*Pastor Fido*'; and in the following year another, Egeo in '*Teseo*,' as well as that of Ricimer in '*Ernelinda*.' In the season (1713) he again joined in a petition, with Pepusch and his wife, la Galeratti, and other artists, for the better regulation of their benefits. Valentini sang again in '*Creso*,' 1714, and had a benefit concert at Hickford's Great Room on Mar. 31, 1715, when he was assisted by Anastasia Robinson.

Galliard says of him that, 'though less powerful in voice and action than Nicolini, he was more chaste in his singing.'

J. M.; addn. W. H. G. F.

VALENTINO, HENRI JUSTIN ARMAND JOSEPH (b. Lille, Oct. 14, 1787; d. Versailles, Jan. 28, 1865), eminent French conductor. His father, of Italian origin, was an army-chemist, and intended him for a soldier, but at 12 he was playing the violin at the theatre, at 14 was suddenly called upon to supply the place of the conductor, and henceforth made conducting his special business.

In 1813 he married a niece of Persuis, the composer, on whose recommendation he became in 1818 deputy-conductor of the Opéra under R. Kreutzer, and in 1820 was rewarded with the reversion of the title of first conductor conjointly with Habeneck. The decree did not take effect till Kreutzer's resignation in 1824, when the two deputies had long been exercising the function of conductor in turn. Amongst the works produced under Valentino's direction between 1827 and 1830 may be mentioned '*Moïse*,' '*La Muette de Portici*,' '*Guillaume Tell*' and '*Le Dieu et la Bayadère*.' He also held from Apr. 10, 1824, the reversion after Plantade of the post of maître de chapelle honoraire to the King, but this he lost by the Revolution of 1830, which also brought about

¹ The Coke papers.

changes at the Opéra. Dr. Véron, the new director, inaugurated his reign by cutting down salaries, and Valentino, determined not to sacrifice the musicians who served under him to his own interests, resigned. He soon after succeeded Crémont as chief conductor of the Opéra-Comique, an enviable post which he occupied from Apr. 1831 to Apr. 1836. Here he produced '*Zampa*,' '*Le Pré aux Clercs*,' '*Le Prison d'Édimbourg*,' '*Le Châlet*,' '*Robin des Bois*' ('*Der Freischütz*'), '*Le Cheval de bronze*,' '*Actéon*' and '*L'Eclair*.' On the direction of all these popular works he bestowed a care, zeal and attention to *nuances* beyond all praise.

On resigning the Opéra-Comique, Valentino settled at Chantilly, but was soon offered the direction of the popular Concerts of classical music. Fascinated by the idea of rivalling the Concerts du Conservatoire and spreading the taste for high-class instrumental music, he courageously put himself at the head of the enterprise. The spot selected was the hall at 251 Rue St. Honoré, where Musard had given masked balls and concerts of dance-music, and which was now destined to hear the classical masterpieces interpreted by a first-rate orchestra of eighty-five players—and all for 2 francs! But the public was not ripe for classical music, and preferred the 1 franc nights and dance-music, under a less eminent conductor. The '*Concerts Valentino*,' started in Oct. 1837, came to an end in Apr. 1841. He came to London in 1839, and gave concerts at the Crown and Anchor Tavern (see PROMENADE CONCERTS).

Valentino retired to Versailles in 1841 and lived in obscurity for twenty-four years. He was indeed asked in 1846 to return to the Opéra, but declined.

G. C.

VALENZUELA (VALENZOLA), PEDRO (16th cent.), Spanish madrigalist, resident in Italy, and described as cantor in St. Mark's, Venice, and maestro de l' Accademia Filarmonica, Verona. His madrigals, which are all in Italian words, were published under the title:

Madrigali a 5 v., con uno a 6 et un Dialogo a 8. Venice, Gardano, 1578. 5 partbooks (B.M.).

One of these, '*La Verginella*,' has been included by Barclay Squire in '*Ausgewählte Madrigale*.'

J. B. T.

VALERIANO (CAVALIERE VALERIANO PELLEGRI), a very distinguished *musico*, attached to the court of the Elector Palatine, about 1712. In that year he visited London, replacing Nicolini, who left in June. Valeriano, who had a counter-tenor voice of great beauty, 'created' the principal parts in '*Pastor Fido*,' produced Nov. 21, and in '*Teseo*,' first performed Jan. 10, 1713. He sang also the chief rôle in '*Ernelinda*,' and drew the highest salary of the season (about £650). His engagement

terminated, Valeriano left England, and did not return here again. J. M.

VALERIUS, ADRIANUS (b. Middelburg; d. Veere, Jan. 27, 1625), was the author of a famous collection of Netherland Songs, published at Haarlem in 1621 and 1626, under the title of 'Nederlandsche Gedenck-clanck.' He spent much of his life at Veere, where from 1606 until his death he held various legal offices.

Although many of the splendid national songs of the Netherlands are included in other contemporary collections, a special value is attached to the 'Gedenck-clanck,' because Valerius gave the tunes in musical notation exactly as they were sung, while other collectors only indicated by name the tune (*stem*) to which the verses were set. Valerius also prefixed short histories of the patriotic events which had inspired the songs. It is probable that many of the songs, both words and music, were written by himself; and he did not hesitate to use many English, German, French and Italian tunes in his collections (see *SONG*, p. 49). There are about seventy-six songs altogether, varying in merit. Some are written in parts, and all have lute or cithern accompaniment.¹

A. H. W.

VALESI, FULGENTIO, of Parma. In 1611 he calls himself 'Monache San Ambrosiana.' He wrote one book, 'Napolitane,' 3 v. (Venice, 1587), canons of various kinds on two canti fermi of the first tonus (1st mode), 3-6 v. (Milan, 1611). In Lucino's *Concerti*, 1616: Vias tuas, 2 v., Alta immensa, 4 v.

E. v. d. s.

VALESI, JOHANN EVANGELIST (WALLIS-HAUSER, called VALESI) (b. Unterhattenhofen, Bavaria, Apr. 28, 1735; d. Munich, 1811), adopted son of the Rev. Count Valvasoni, pupil of Placidus Cammerloher at Munich, where he was originally sent for the study of theology. In 1754 he was appointed court singer to the Prince-Bishop of Freising. In 1755 he was acclaimed the greatest singer in Germany, and appeared with great success at Amsterdam and Brussels. In 1756 he became chamber singer to the Duke of Bavaria, who sent him for further studies to Padua, where he adopted the name of Valesi. In 1771 he appeared in opera at Florence and Siena. The famous Tibaldi travelled specially from Rome to Siena to hear him. He remained for five years in Italy, where he appeared with signal success at Milan, Parma, Genoa, Turin, Rome and Venice, where the famous Biancha Saccetti became his pupil. In 1776 he returned to Munich, and in 1777 visited Prague, Dresden and Berlin, where Frederick the Great offered him an engagement which he declined. From 1778 the Elector of Bavaria, fearing to lose him, would no longer

grant him leave of absence. In 1798 he was pensioned, and devoted himself henceforth entirely to teaching. He trained over 200 excellent singers, the most prominent being Valentin Adamberger. C. M. von Weber was also his pupil in 1798, and his son and four daughters all attained notable success as singers (*Riemann*; Schilling).

VALLA, GIORGIO (b. Piacenza c. 1450 (?); d. Venice, 1499), studied at Pavia, became professor *humaniorum* at Venice and practised as a doctor. He published a Latin translation of the introduction to harmony by Euclid under the name of Cleonidas (*Cleonidae harmonicum introductorium*, etc., Venice, 1497). In his collection of scientific essays (Venice, 1497-1501), *De expetendis et fugiendis rebus*, is also a treatise, *De musica*, lib. v., *Sed primo de inventione et commoditate ejus*. Boemus in his *Carmen Salphicum* of 1515 speaks of him as the composer of a 4-part hymn (*Mendel*; Q.-L.).

VALLARA, FRANCESCO MARIA, of Parma, Carmelite monk, still living at Mantua in 1733. He wrote two books on Gregorian chant, and one on the *cantus fermus*; also a collection ('*Selva di varie composizioni*,' etc., Parma, 1733) of church compositions in *cantus fermus* for a solo choir, and for 2 choirs in counterpoint (Q.-L.).

VALLERIA, ALWINA (b. Baltimore, U.S.A., Oct. 12, 1848; d. Nice, Feb. 17, 1925), a singer, whose real name was Schoening, entered the R.A.M., London, as Alwina Valleria Lohman, in Sept. 1867.

She studied the piano with W. H. Holmes, and singing with Wallworth, and in Dec. 1867 gained the Westmorland Scholarship; received further instruction in singing from Arditi, and on June 2, 1871, made her first appearance in public at a concert of her master's in the Hanover Square Rooms, when she sang 'Gli angui d' inferno' from 'Zauberflöte' in the original key, after which she was promptly engaged for Italian opera at St. Petersburg, where she made her first appearance on the stage Oct. 23 of the same year, as Linda di Chamouni. Her next engagements were in Germany and at La Scala, Milan. She was afterwards engaged at Her Majesty's Opera, Drury Lane, for two seasons, and made her first appearance May 3, 1873, as Marta. In 1877-1878 she was engaged in Italian opera at Her Majesty's Theatre, making a great success as Micaela on the production of 'Carmen.' In 1879-82 she sang at Covent Garden, undertaking a large number of parts.

On Oct. 22, 1879, she made her début in New York as Margaret in 'Faust,' adding Aida to her repertory in the same season. For the seasons 1882 and 1883 she sang in English opera under Carl Rosa in the 'Flying Dutchman' and 'Tannhäuser'; and on Apr. 9, 1883, was much praised for her spirited performance

¹ Dr. A. D. Loman published nineteen songs with harmony (of which fourteen are Netherland tunes) from the 1626 edition of the 'Gedenck-clanck' in 1871. (See VEREENIGING.)

of Colomba, on the production of Mackenzie's opera in 1883; she also created the principal parts in Goring Thomas's 'Nadeshda' in 1885, and in Mackenzie's 'Troubadour' in 1886. After that date she virtually retired. She sang in oratorio for the first time on Dec. 26, 1882, at Manchester, in the 'Messiah,' and was very successful at the Handel and Leeds Festivals of 1883, at the Philharmonic and other concerts. Her voice, which extended from B \flat below the line to D in alt (in her earlier years to F), was of considerable flexibility, fair power and volume and pleasant quality. She was, moreover, an admirable actress. On Aug. 23, 1879, she married R. H. P. Hutchinson, of Husband's Bosworth, near Rugby.

A. C.

VALLET (VALET, VALE), NICOLAS, a 17th-century French lutenist, who lived at Amsterdam, where he became also a publisher. He wrote an instruction book for the lute, *The Secret of the Muses*, which appeared in 1615 in a Dutch, a Latin and a French edition,¹ and contained a composition by Claude Lejeune; 'Le second livre de la tablature de luth' (1618 and 1619); 'Piété royale,' the 150 Psalms of David arranged for the lute (1620); 21 Psalms arranged for the voice and lute (1619); 'Apollinis süsse Leyer' . . . for violin and bass (Amsterdam, Janssen, 1642) (Q.-L.; Mendel).

VALLOTTI, P. FRANCESCO ANTONIO (b. Piedmont, June 11, 1697; d. Padua, Jan. 16, 1780), attained a high reputation as the best organist and one of the best church composers in Italy. To his skill on the organ he owed the appointment of maestro di cappella at the church of S. Antony, at Padua, which he held from 1730 to his death. He had been third organist for eight years before his appointment as maestro.² His compositions for the Church are very numerous. In 1770 he composed a Requiem for the funeral of Tartini; but his *magnum opus* was a theoretical work, entitled *Della scienza teorica, e pratica, della moderna musica*. The original plan of this treatise embraced four volumes: Vol. I., treating of the scientific or mathematical basis of music; Vol. II., of the 'practical elements' of music, including the Scale, Temperament, the Cadences and the Modes, both ecclesiastical and modern; Vol. III., of Counterpoint; and Vol. IV., of the method of accompanying a Thorough-Bass. Vol. I. only was published, at Padua, in 1779; and its contents are valuable enough to make the loss of the remaining portions of the work a subject of deep regret. In this volume the mathematical proportions of the consonant and dissonant intervals are described with a clearness for which we seek in vain in most of the older treatises on the same

subject—not excepting that of Tartini himself. Many motets, etc., in MS. are noted in Q.-L.

An attempt to complete Vallotti's great work was made after his death by his disciple and successor, P. Luigi Antonio SABBATINI; and his system of teaching was continued by his talented but somewhat eccentric pupil, the Abbé VOGLER.

VALSE, see WALTZ.

VALVE (Fr. *piston*; Ger. *Ventil*). The Latin word *valvae*, signifying a pair of folding leaves or doors, has, in the English singular form (valve), such an extended meaning as to include many mechanical devices for the diverting or otherwise controlling the passage of gases or fluids through pipes, which depart widely from the type of a hinged door shutting against a face. For the use of valves in bellows-blown instruments see ORGAN, HARMONIUM, etc.; their application to other wind instruments is here considered.

Although the development of valve actions during the past century has revolutionised wind-instrument construction in certain directions, it is not easy to say when valves of some kind or other were first used to vary the length of a musical tube. As soon as an assemblage of tubes of various lengths (the Pan's pipe) gave place to a single tube varied in length by means of lateral holes covered by the fingers, the valve system was virtually introduced, and to this day there is no more perfectly acting valve than the natural pad of the finger-tip working from the natural hinge of the finger. The causes which operated in introducing valve-work, so far as instruments with side-holes are concerned, were these: (1) Key-modulation and chromatic notes were to a large extent impracticable so long as the difficulty remained of closing more than seven, or at the most eight, holes with the fingers, and at the same time supporting an instrument. (2) The limited stretch of the fingers rendered impossible the placing in their best positions of many of the holes on the larger instruments.

ANCIENT HISTORY.—Probably the earliest known example of mechanical means for controlling a number of ventages or finger-holes is a Greek or Roman tibia, one of four discovered in 1876 at Pompeii, and now in the Museum at Naples. This instrument is made of ivory, cased with silver or bronze: it is of cylindrical bore, and is pierced with eleven lateral holes. Fitting over the holes are eleven sliding sockets or shutters, any one or more of which can be closed. By means of these sliders the sequence of tones and semitones, and therefore the *mode*, could be varied. Passing to the time of Virdung (1511) we find an open-standing key or hinged valve worked by the little finger, used

¹ Mendel speaks of 'A French edition of earlier date.'
² Q.-L.

both on the flûte-à-bec and on the bombardt to extend the compass downwards. Praetorius (1616) also shows the larger flutes with one key only, but the great double-quint pommer (a bass double-reed instrument) is shown with four keys, all, however, for the extension of the compass downwards, and not to obviate the awkward placing of the customary six finger-holes. The *d*♯ key was added to the 'German' flute or flûte traversière about 1660, and during the 18th and 19th centuries the addition, both to reed instruments and to flutes, of valves worked by keys or levers, gradually extended. Whether the valves were covered with skin, or were carefully adjusted metal plugs with a conical seating, does not affect the principle, although it is to the latter only that the name 'valve' is usually given, both by instrumentalists and by instrument-makers, so far as wood instruments are concerned.

At the present day, when valve-instruments are named, all such lip-blown instruments with cupped mouth-pieces are generally understood as do not fall under the classification of natural horns, bugles, and trumpets, or of slide instruments (trombones). These, our distinctively modern brass instruments, date from early in the 19th century for their very inception, and for a considerable part of that century were used concurrently with key-bugles, serpents and ophicleides, the surviving representatives of the zinke or cornett class. In the larger zinken, as we find from Praetorius, the finger-holes were sometimes supplemented by a hole governed by an 'open-standing' key, and this key or valve, when closed, extended the compass downwards, just as a similar key did on the flûte-à-bec. From the cornetto torto or curved cornett the serpent was derived, at first having six finger-holes, which from their necessarily small size gave very poor tone and faulty intonation. By degrees keys were added both in addition to and in substitution for finger-holes, but it was not until the invention of the key-bugle by Joseph Halliday in 1810, and of the ophicleide, that the best result obtainable from key-work adapted to conical brass instruments of the bugle type was seen. Some years previous to this date similar keyed-valves had been applied both to the trumpet and the horn, but these instruments are eminently unsuitable for the system.

As every note on a wind instrument is derived as a harmonic from a given prime or fundamental note, the pitch of which is determined by the length of the tube, notes not in the harmonic series of the original prime can only be obtained by altering the length of the tube. Whether this alteration is by lengthening or shortening is not very material with flutes and reed instruments; but the characteristic tone of brass instruments is impaired unless every note speaks through the bell-mouth, and therefore the application of side-holes to shorten

the tube, whether covered by the fingers or by valves, has gradually become a thing of the past. The key-bugle, however, held an important position from 1820-35, and the ophicleide to a much later date; in short, until the initial difficulties encountered in the design of the various piston-valve actions to be presently described were thoroughly overcome. The alteration of length by means of added tube in the form of crooks as on the horn and trumpet, and by means of the telescoping slides of the trombone, was introduced for some centuries before any valve action to attain the same result, and the modern brass instrument valve can be most simply regarded as a means of instantaneously adding a crook or tubing of the length required to flatten the pitch of the instrument by one or more semitones.

THE MODERN USE.—The various forms of valves used in modern brass instruments differ essentially from the above-mentioned hinged or flap-valves used on wood instruments and such brass instruments as the ophicleide, inasmuch as while on these latter the cutting-off of the air-column at a side-hole prevents, in whole or in part, any tone proceeding from the bell-mouth, thereby disturbing uniformity of quality, the valves we now have to consider are so contrived as to leave the conditions at the bell-mouth unaffected. In this there is a distinct invention, very different from the gradual introduction of keywork as a supplement or alternative to the covering of side-holes with the fingers.

According to evidence adduced by J. G. KASTNER¹ (*q.v.*), Blümel, a Silesian, devised piston-valves for the horn about the year 1813, and sold his invention to Stölzel, a native of Breslau and a horn-player. Stölzel improved upon the idea and took out a patent in Germany. In these valves or their subsequent modifications, a cylindrical piston works vertically in a casing, and in the prevailing type of piston there are three ways or passages, one of which, when the piston is in its normal position, forms part of the main tubing of the instrument; the other two are so placed that when the piston is depressed they introduce into the circuit an extra length of tubing sufficient to lower the pitch one or more semitones. The early piston-valves were cumbersome, and the passages through them were either constricted in diameter, or so placed as to introduce sharp angles instead of gently flowing curves. The many attempts to overcome these defects resulted in various designs of valves, too numerous to mention; but in the 1851 International Exhibition in London Dr. J. P. Oates exhibited improved pistons designed on such sound principles that his ideas have been the basis of all the best work since. His

¹ *Manuel général de musique militaire*, Paris, 1848; but see also CLAGGET.

pistons, which he described as 'equi-trilateral' valves (the name referring to the spacing of the passages), gained a prize medal. Patents were taken out by John Shaw in 1824 and in 1838, but his schemes aimed at substitutes for the piston-valve rather than improvements upon it.

The only alternative to the piston-valve is the rotary cylinder-valve, which has been and still is largely used on the continent and in America, although not in England. This valve, introduced about the year 1820, is simply a four-way stop-cock turning in a cylindrical case in the plane of the instrument, two of its four ways forming part of the main channel, the other two, on its rotating through a quadrant of the circle, admitting the air to the by-path. With this valve it is possible to produce a very close shake, but as the mechanism connecting the axle with the finger touch-piece is somewhat complicated and delicate it is liable to get out of order, and in this respect cannot be compared with the simplicity of the piston-valve, which has a rectilinear vertical traverse direct from the finger.

Whether the piston or the rotary cylinder valve is used, the practical result as regards the scale of the instrument is the same. The first valve lowers the pitch one tone, the second valve a semitone, and the third three semitones. When a fourth valve is added, it is adjusted to lower the pitch two tones and a semitone, or a perfect fourth. From each of these different fundamental pitches a new harmonic series can be produced, and also from the valves when used in combination; the ordinary three valves giving in addition to the changes noted above, a tone and a half with the first and second, two tones with the second and third, two and a half tones with the first and third, and three tones with the first, second and third valves depressed together.

The table here given shows the actual sounds corresponding to the 'open' and the valve notes of an instrument having the 8-foot C for its fundamental or pedal note, with the natural harmonics proper both to the normal length of the instrument and to the length or change in fundamental pitch due to the tubing added by the different valves or their combinations. The harmonic seventh to each prime is shown by a small figure seven, thus, $\flat\flat\flat$, etc., but these notes are seldom used, as they are slightly flat for either just or tempered intonation. Column 6 is divided to show the similarity of result due to the use of the first and second valves combined, or the third valve used singly, the only difference being that the notes due to the third valve are all slightly flatter than those from the first and second combined.

This difference arises from an inherent difficulty in the valve system, for the tubing connected with each valve bearing a certain proportion to the normal length of the instrument is

too short when this normal length is increased by the depression of a valve. In other words, valves in combination always give notes too sharp, and the effect is cumulative. The most obvious remedy is to use six separate valves in place of the usual three with their three combinations. This plan was introduced by Sax, but not with much success, and the growing use of the fourth valve, to complete the scale in

the pedal octave, with the increased difficulty of combined valves, led to many attempts to introduce means to compensate for the error. Some of these were theoretically sound, but practically cumbersome, and therefore were not largely adopted. The importance of improving the intonation of the lowest octave of the larger brass instruments especially, led the writer of this article to design for Boosey & Co. in 1874, with a modification patented in 1878, a system of 'Compensating Pistons' still increasingly used, which pistons were examined by the late Dr. W. H. Stone, whose

description of them in the first edition of this Dictionary is as follows :

'In the ordinary arrangement the first valve lowers the pitch one tone; the second half a tone; and the third a tone and a half; but as the length of the instrument should be, speaking roughly, in inverse proportion to the number of vibrations of the required notes, the desired result is not exactly obtained when two or three valves are used in combination. Thus, in an instrument in the key of C, the first valve lowers the pitch to B \flat , the third valve lowers it to A \sharp . For the low G the first valve is used in combination with the third, but its tubing is tuned to give the interval from C to B \flat , and as the instrument when the third valve is down is virtually in A \sharp , the tubing of the first valve is not sufficiently long to flatten the pitch a true tone from A to G. This defect is intensified when all three valves are used together to produce D \flat and G \flat . A numerical illustration may make this more clear: let the first valve tubing be one-eighth the length of the instrument, and the third valve tubing one-fifth, the length of the instrument being unity; one-fifth added thereto will lengthen it in the right proportion to lower its pitch a minor third—i.e. from C to A \sharp . To produce G, we should be able to lower the instrument one tone from A \sharp , but the first valve will increase the length only one-eighth of unity, and not one-eighth of 1- $\frac{1}{5}$. G will therefore be somewhat sharp.

'Thus far with reference to instruments with three valves, but the defect is aggravated in those with four. Any actual lengthening of the valve slides by mechanism connected with the valve is practically inadmissible, as the lightness and rapidity of action of the valve would be thereby interfered with, but in the compensating pistons a lengthening of the valve slides is brought about as follows. The tubing connected with the third valve is passed through the first and second in such a way that when the third is pressed down, the vibrating column of air passes through passages in the first and second, in addition to the two passages in the third, as in the common arrangement: and for the purpose of bringing additional tubing into action in connection with the first and second valves, as required for correct intonation (when they are either or both used in combination with the third), two air-passages are added to each of these valves, and in connection with each pair of passages a loop or circuit of tube of the required length, which is added to the effective length of the instrument only when the third valve is used in connection with the others. Such additional tubing compensates for the lowering of the pitch due to pressing down the third valve. No extra moving parts are introduced, and the established fingering is preserved.'

In the above description an instrument with three valves is assumed, but it will be readily understood that the system is applied to the greatest advantage on four-valved instruments.

The illustrations show :

FIG. 1.

A set of saxhorn valves of the usual construction. The faint dotted line A...A and the strong dotted line B...B indicate respectively the air-passage for the 'open' notes, and the air-passage when the piston No. 1 is down.

VALVE

FIG. 2.

A set of four valves for the euphonium or tuba on the compensating system. The strong line B...B in this case indicates the air-passage when the piston No. 4 is down.

FIG. 3.

Indicates by the line D...D the air-passage when all pistons are down. The faint dotted line C...C indicates the air-passage for the 'open' notes in all cases.

In all the piston valves so far described the helical wire spring is under compression when the valve is pressed down, and this compression or closing of the spring introduces a tendency to a rotary movement which is checked by a pin working in a slot. The direct vertical action is thus preserved, but some friction necessarily results, and this detracts from the desired lightness and quickness of the valve action.

A patented design, No. 193729, to obviate this difficulty has been introduced by Boosey & Co. It is based upon an extension of the spring instead of the usual compression, and the connexion between the spring and the piston is so contrived as to relieve the latter of any

friction due to the tendency to rotate inherent in the older system. A remarkably light, quick and noiseless action is thus obtained.

The only brass instrument which has gained nothing¹ from the introduction of the valve system is the **TROMBONE**. This instrument, from its peculiar proportions, lends itself admirably to the telescopic slide principle by which changes of pitch corresponding to those obtained by valves can be obtained by six different 'shifts.' It is impossible to apply the slide principle, however, to instruments which have little cylindrical tubing, and it is the invention of the valve which has made possible the variety in tone quality and the chromatic compass of modern brass instruments.

Under the article **CLAGGET** there is reference to a contrivance included in his patent of 1788 for combining two trumpets, in D and E_♭ respectively, in such manner that they could be played with the same mouthpiece and the air-passage be diverted from one to the other by means of a valve. It has been suggested that credit should be given to Clagget as the inventor of the piston valve, and this in a limited measure is reasonable. The essence of the modern valve, however, is that its three windways allow of the use of one bell for a complete scale, which was impossible on Clagget's system.

D. J. B.

VALVERDE, JOAQUÍN (*d. Madrid, Mar. 19, 1910*), Spanish composer of light opera, whose 'Gran Vía' (written in collaboration with CHUECA (*q.v.*), 1886), went the round of Europe. 'Cadiz,' the march from which was at one time almost the Spanish national anthem, has a delicious satire on English officers quartered there during the Peninsular War. In the combination of Chueca and Valverde, it was the latter who provided the knowledge of composition, the former the tunes.

J. B. T.

VAMP (verb), to extemporise an accompaniment to a song or instrumental solo. The name and the thing are confined to the least artistic class of musical performances, but real skill in 'vamping' requires no small knowledge of the usual harmonic transitions and great quickness in following the solo performer. The word is generally considered to be more or less slang of a modern date, but the following extract from a song in *The Merry Musician or a Cure for the Spleen*, vol. i., 1716, p. 68, shows that it has at least some degree of antiquity.

'Next Morpew the harper with his pig's face
Lies tickling a treble and vamping a base.'

F. K.

VAMP-HORN, a form of speaking trumpet or megaphone used in certain churches in the 18th and early 19th centuries to increase the power of the voice either for leading the singing or giving out necessary notices. Specimens exist at Braybrook and Harrington, Northants;

¹ For attempts to apply the principle to the trombone, see **TROMBONE**.

Willoughton, Lincolnshire; Charing, Kent; and East Leake, Notts. They are made of tin and vary from 2 feet to 6 feet in length. (**PLATE LXVIII.** No. 5.)

F. W. G.

VAMPYR, DER, opera in 4 acts; words by C. G. Häser, music by Marschner. Produced Leipzig, Mar. 28, 1828; in London, Theatre Royal English Opera-House, in 3 acts, Aug. 25, 1829.

G.

VANBRUGHE, GEORGE, a popular song-composer in the early part of the 18th century. Besides many single songs, and those found in different collections, he issued two thin folio books of songs, the earlier being 'Mirth and Harmony; Consisting of Vocal and instrumental Musick; as songs, and ariets, for one and two voices,' London, Walsh, for the author, c. 1713. The latter is 'Modern Harmony or a desire to pleasing,' London, Walsh, c. 1720. No biographical details of him appear to be extant.

F. K.

VANHALL, JOHN BAPTIST, see **WANHAL**.

VANINI, FRANCESCA, see **BOSCHI** (2).

VANNEO, STEFFANO (*b. Recanati, Ancona, 1493*), Augustinian monk and choirmaster at the monastery of Ascoli; wrote a didactic treatise on music which ranks with the best of its time. Book 1 deals with Gregorian chant, solmisation and modes; Book 2 with the complete system of mensural music; Book 3 with counterpoint. The original, written in Italian and finished in 1531, was never published, but a Latin translation by Vincento Rosetti of Verona was published in 1533.

E. v. d. s.

VANNINI, FRA ELIA (*b. Medicina, Province of Rome, 2nd half of 17th cent.*), of a Jewish family, became a Carmelite monk, and was maestro di cappella, in 1692, at the church of Medicina, and from 1693-99 at the principal church of Ravenna. He composed: Litanies of the Holy Virgin in 4-6 parts, with violin *ad lib.*; Psalms and Vespers, 3-4 v.; 5 litanies *a* 6 and 8 v. with instruments, lib. 2, op. 4; Psalms (complete), 2-4 v. with symphonies, op. 5 (1699); Sonatas *a* 3, op. 1 (Bologna, 1691).

M. v. d. s.

VANNUCCI, DOMENICO FRANCESCO (*b. Lucca, c. 1718; d. there, Aug. 7, 1775*), an excellent violoncellist and composer; director of the seminary of the cathedral, teacher of L. Boccherini. He composed six oratorios, masses of 4 and 8 parts, responses, etc. (*Q.-L.*).

VARESI, FELICE (*b. Calais*), one of the leading baritones of his day in Italy, was taken at an early age to Milan, where he received a first-rate education. Varesi has a place of his own in operatic history, as at Venice, on Mar. 11, 1851, he was the first Rigoletto. Four years earlier at Florence he had created the title-rôle in Verdi's 'Macbeth.' It would seem that after his great success as Rigoletto he thought the part of the elder Germont in 'Traviata' unworthy of him. At any rate, on the rather disastrous first night of 'Traviata' at Venice,

on Mar. 6, 1853, he gave a perfunctory performance, (see VERDI). Varesi came to London in 1864—too late for his fame, his fine voice had lost its freshness, but, according to Chorley, the touch of the artist was unmistakable.

His daughter, (2) ELENA, soprano, sang at Drury Lane in 1873 and again in 1875, having been first recommended to Mapleson by Madame Ristori. In 1875 she was Zerlina to the Don Giovanni of Jean de Reszke. She made no special success with the public in London—her opportunities were few—but discerning critics found in her a florid singer of consummate skill and the purest school.

S. H. P.

VARIANT (Ger. *Variante*) (1), the usual expression for varying versions or readings of a piece of music, such as frequently occur where an editor has to compile a text for publication from several manuscript sources.

(2) Similarly, students of folk-song to the several versions of songs preserved by aural tradition.

(3) Riemann thus described the sudden changes from major to minor, or *vice versa*, which occur frequently in modern music without involving modulation, and of which the ancient *TIERCE DE PICARDIE* is the prototype (cf. TRANSITION).

VARIATIONS. In the days when modern music was struggling in the earliest stages of its development, when most of the forms of art which are familiar in the present day were either unknown or in their crudest state of infancy, composers who aimed at making works of any size laboured under great disadvantages. They were as fully conscious as composers are now of the necessity of some system of structure or principle of art to unify the whole of each work, and to carry on the interest from moment to moment; but as they had not discovered any form which could extend for more than a few phrases or periods, their only means of making the music last any length of time was to repeat, and to disguise the repetition and give it fresh interest by artistic devices.

In choral music they took some old familiar piece of plain-song, or a good secular tune, put it into very long notes, and gave it to one of the voices to sing; and then made something ostensibly new upon this basis by winding round it ingenious and elaborate counterpoint for all the other voices. The movement lasted as long as the tune served, and for other movements—if the work happened to be a mass, or work necessarily divided into separate pieces—they either took a new tune and treated it in the same way, or repeated the former one, and sometimes sang it backwards for variety, with new turns of counterpoint each time.

Similarly, in instrumental music, as soon as their art was enough advanced to produce good, clear and complete dance-tunes and songs, they

extended the musical performances by repeating the tunes, with such other touches of fresh interest as could be obtained by grace-notes and ornamental passages, and runs inserted in the bass or other parts. In this way the attention of composers came to be very much drawn to the art of varying a given theme, and presenting it in new lights; and they carried it to a remarkably advanced stage when scarcely any of the other modern forms of art had passed the period of incubation.

In choral music the art was limited to the practice of using a given tune as the central thread to hold the whole work together; and it almost died out when maturer principles of structure were discovered; but in instrumental music it has held its own ever since, and not only plays a part of great importance in the most modern sonatas and symphonies, but has given rise to a special form which has been a great favourite with all the greatest masters, and is known by the name of Variations.

THE ENGLISH VIRGINAL WRITERS.—The early masters had different ways of applying the device. One, which appears to have been a favourite, was to write only one variation at a time, and to extend the piece by joining a fresh theme to the end of each variation, so that a series of themes and single variations alternated throughout. In order to make the members of the series hang together, the variations to the different themes were often made in similar style; while the successive themes supplied some little contrast by bringing different successions of harmony into prominence. There are several pieces constructed in this fashion by Byrd, Bull and Orlando Gibbons, who were among the earliest composers of instrumental music in modern Europe; and they consist chiefly of sets of Pavans, or Galliards, or neat little tunes like Bull's 'Jewel.'¹ Many are interesting for ingenuity and originality of character, but the form in this shape never rose to any high pitch of artistic excellence. Another form, which will be noticed more fully later on, was to repeat incessantly a short clause of bass progression, with new figures and new turns of counterpoint over it each time; and another, more closely allied to the modern order of variations, was a piece constructed upon a theme like 'Sellenger's Round,' which did not come to a complete end, but stopped on the Dominant harmony and so returned upon itself; by which means a continuous flow of successive versions of the theme was obtained, ending with a coda.

These early masters also produced examples of a far more mature form of regular theme and variations, not unlike thoroughly modern works of the kind; in which they showed at once a very wide comprehension of the various prin-

¹ Fitzwilliam Virginal Book, II. 138. For the collections in which these English works of the 16th century are contained see VIRGINAL MUSIC.

ciples upon which variations can be constructed, and an excellent perception of the more difficult art of varying the styles of the respective members of the series so as to make them set off one another, as well as serve towards the balance and proportion of the whole set.

Two of the works which illustrate best the different sides of the question at this early date are Byrd's variations to the secular tune known as 'The Carman's Whistle' and Bull's set called 'Les Buffons.' These two represent respectively two of the most important principles upon which variations are made, since the first series is almost entirely melodic and the second structural; that is, each variation in the first series is connected with the theme mainly through the melody, whereas in the second the succession of the harmonies is the chief bond of connexion; both themes are well adapted to illustrate these principles, the tune of the first having plenty of definite character, and the harmonies of the second being planned on such broad and simple lines as are most likely to remain in the memory.

Byrd's series consists of eight variations, in all of which, except the last, the melody is brought very prominently forward; a different character being given to each variation by the figures introduced to accompany it. The way in which the various styles succeed one another is very happy. The first is smooth and full, and the second rugged and forcible; the third quiet and plaintive, and the fourth lively and rhythmic; and so on in similar alternation to the last, which is appropriately made massive and full, and is the only one which is based exclusively on the harmonies and ignores the tune. The two following examples give the opening bars of the fourth and sixth variations, and illustrate the style and way of applying the characteristic figures very happily. The upper part is the tune of the theme.

Ex. 1. Var. 4.

Ex. 2. Var. 6.

Byrd's variations are remarkable not only for their intrinsic qualities, but also as rare examples of melodic treatment in those early days, when composers were more inclined to notice the bass than the tune. Bull was by no means so great a genius as Byrd, but he had a vein of melody, a good deal of vivacity, and a considerable sense of effect. In 'Les Buffons' the former gift is scarcely brought into play, but the two latter are very serviceable. The theme is the simplest possible succession of chords, as follows:

Ex. 3.

Upon this fourteen variations are constructed, which are varied and contrasted with one another throughout, upon the same general principles of succession as in Byrd's series. Many of them are merely made of scale passages, or rather commonplace figures; but some are well devised, and the two following are interesting as examples of the freedom with which composers had learnt to treat structural variations even in such early days. Ex. 4 is the beginning of the second variation, and Ex. 5 is the thirteenth, which flows out of the one preceding it.

Ex. 4.

Ex. 5.

EARLY CONTINENTAL TYPES.—In the time which followed Byrd and Bull the best energies

of composers were chiefly directed to the development of such instrumental forms as the suite and the canzona, and the earlier kinds of sonata; and sets of variations were not so common. There are a few examples among Frescobaldi's compositions; as the 'Aria detta Balletto' in the second book of *toccatas, canzonas, etc.*, which is curious on account of the way the variations are put into different times; but his works of the kind are on the whole neither so interesting nor so satisfactory as Byrd's. It is also common to meet with an occasional variation on one or more of the regular dance-movements in the suites; and in that position they were commonly called 'doubles.' There is a curious and unusual experiment in a suite of Kuhnau's in E minor, in which the courante in 6-4 time is a complete variation of the allemande in common time that precedes it.¹ But the art of varying a theme of some sort was cultivated to a greater extent about this time under other guises. In Germany composers were fond of harmonising their chorales in all sorts of ingenious ways, such as are found later in perfection in Bach's cantatas and passions; they also used the chorales as a kind of *canto fermo* upon which they based elaborate movements for the organ, full of ingenious and effective figures and various devices of counterpoint; and not a little of the great development of organ-playing, which culminated in J. S. Bach, was carried on by the cultivation of this form of art.

THE GROUND BASS.—Another form which was more obviously allied to the sets of variations, and indeed can in some cases hardly be distinguished from them, was the ground bass or *basso ostinato*, which was a very favourite form of art all over Europe during the greater part of the 17th century. The principle of following the bass of the theme is indeed constantly made use of in variations, and in theory the only difference between the two forms is that in a ground bass the bass passage, which is repeated over and over again, is the whole bond of connexion which joins the series together; while in variations the bass may change entirely so long as the theme is recognisable either by means of the melody or the succession of the harmonies. But in practice, though there are many examples in which a good clear bass figure is made to persist with obstinate regularity in this form, it often gave place to the succession of the harmonies, or was itself so varied as to become scarcely recognisable. For instance, a ground in E minor by Blow, with twenty-eight divisions, begins with a section that is much more like a theme for variations; and though the bass moves in good steps, it has no very decided figure. A comparison of the first half of the so-called ground with

¹ In a sonata by Pergolesi in C minor the giga is a variation of the foregoing gavotte. Some suites of the same period have a virtual identity of theme throughout.

the corresponding part of the bass of the twentieth division will show that the view musicians then took of the repetitions was at least a liberal one:

In this case the outline of the bass as defined by the successive steps downwards is pretty well maintained, but in a few other divisions which are more elaborately constructed, not only is the bass altered, but even harmonies which do not strictly correspond with the originals are introduced. Such treatment clearly destroys the individuality of the form of art, and makes the work to all intents a theme with variations, under limitations. The real type of movement constructed on a ground bass has a decided character of its own, as the obstinate reiteration of a good figure is necessarily a striking bond of connexion throughout the piece; and if the figures built upon it are well varied it can be made very amusing. In Purcell's use of this form, which he was evidently fond of, the type is kept much purer, and the divisions on the ground are really what they pretend to be. A quotation of the bass of a ground by him² will illustrate better than any description the difference between the real thing and a hybrid like Blow's:

But even so genuine a specimen as Purcell's is closely allied to a theme with variations; and at a time when the form was so popular that it was not only a favourite with composers, but the constant resource of performers with any talent for extemporising to show off their skill in two directions at once, it seems very likely that the more elastic but less pure form adopted by Blow and others should have been easily allowed to pass in the crowd of experiments; and thus composers were constantly developing the form of 'Theme and Variations' under another name.

CORELLI AND OTHERS.—A celebrated example which bears upon this question is the twelfth and last sonata of Corelli's Opera

² See Purcell Society's edition, vi. p. 30, 'A New Ground'; also found in the song 'Here the Deities Approve' in 'Orpheus Britannicus.'

Quinta, which is called 'La Follia.' This is sometimes described as a theme and twenty-two variations, and sometimes as divisions on a ground. The bass of the theme was well known in those days as 'Farinel's Ground' (see Farinelli (2)), and was commonly used by musicians and composers, as for instance by Vivaldi. Hawkins speaks of it as 'the favourite air known in England as Farinelli's Ground,' showing a confusion in his mind even as to the difference between a 'ground' and a tune. In Corelli's work the bass is not repeated at all regularly, so it is to all intents and purposes a series of free variations. These are most of them very simple, being different forms of arpeggios on the harmonies of the theme, but they are well devised so as to contrast and set off one another, and are effective in their way for the violin. The tempi vary from *adagio* and *andante* to *allegro* and *vivace*, and the time-signatures also as 3-4, 4-4 and 3-8. Corelli evidently took an easy view of variations, for both in this set and in the *chaconne* in the twelfth sonata of op. 2 the harmonies are not at all strictly followed, and occasionally have next to nothing to do with the theme for several bars together; and this appears to have been rather a characteristic of the Italian style of writing such things. The treatment of the form in this instance and in many others of nearly the same period (as those by Blow, and many by Locatelli and others a little later), together with the lax way in which Hawkins speaks of the subject, tend to the conclusion that this popular form of ground-bass movement was gradually becoming mixed up with the form of theme and variations, and trenching on its province. Even the length of the bass in the 'Follia' and other examples is in favour of this view, because the effect of the ground bass is lost when it extends beyond very moderate limits. The best examples are after such a concise fashion as the bass quoted from Purcell, and such superb specimens as the 'Crucifixus' in Bach's Mass, his *passacaglia* in C minor, and similar works by Buxtehude for the organ. If the ground bass has several clauses, as in Corelli's 'Follia' or Blow's piece (Ex. 6), it loses its effect and has to be treated after the manner of a theme; and the adoption of long periods led composers to that treatment, at the same time that the habit of looking at their subject in the direction of the bass rather than the upper part influenced their manner of dealing with variations.

THE GOLDBERG VARIATIONS.—This condition of things throws an interesting light upon J. S. Bach's thirty variations on an aria in G major¹ for a harpsichord with two rows of keys, which is the first very important work of its kind, and still among the most remarkable in existence,

though it is very seldom played in public in consequence of the difficulty of giving due effect on the single keyboard of the pianoforte to the rapid crossing passages which are written for two. The aria which serves for theme is not after the manner of a modern aria, but is a dance movement like those in the suites. It is in fact a *sarabande* of the expressive and elaborate kind familiar among Bach's works; it has plenty of fine melody but no catching tune, and nothing to invite melodic variations of the modern kind. On the other hand, it is constructed of very broad and simple successions of harmony, with the bass moving a step of some sort in almost every bar; and upon this motion of bass or harmonies the whole series of variations is really constructed. It is therefore actually almost as much of a ground-bass movement as Corelli's 'Follia' or Blow's example. The actual bass figure is not repeated, but either the steps by which it moves or the regular changes of the harmony are always represented in some way under the elaborate texture of the figures. In fact, what Bach does is to take out the harmonic framework upon which the aria is built, and use it to build thirty other little movements upon. The way in which these are developed from the original will be best understood by a comparison of the opening bars of some of the variations with the corresponding portion of the bass of the theme.

The following is the bass of the first eight bars of the aria, with figures to represent the principal harmonies:

Ex. 2.

In a good many variations, such as the 1st, 2nd, 4th, 12th and 22nd, these steps are very clearly maintained. The bass figure of the 2nd variation will serve to illustrate this:

Ex. 10.

It is very rare, however, that the same positions of the chords are rigidly adhered to throughout. All positions are held to be interchangeable. This would be less possible in dealing with a modern theme with weak or irregular motions of harmony; but where the changes are so strict and clear, the successions

¹ Aria mit 30 Veränderungen, known as the Goldberg Variations (see GOLDBERG, Johann Gottlieb).

are traceable even through a looser treatment of the original. An example which will illustrate Bach's method of interchanging positions of the same chords, and the ingenuity with which he builds one form upon another, is the opening of the tenth variation, which is a complete little four-part fughetta :

In bar (b) the first position of the chord of the dominant is implied instead of its first inversion; in bar (c) there is a similar interchange, and in bars (d) and (g) the principal emphasis of the bar falls upon a first inversion instead of a first position of the same chord.

In other variations he goes much further still. In the ninth the strict succession of chords is frequently altered, but in such a way that the character and general contour of the harmonic succession is still to be felt in the background. For instance, in the passage corresponding to bars (e) and (f) the harmonies of E minor and G are forced in, in the place of those of G and A. Then the harmony of C and A, which really represents bar (f), is driven into the bar corresponding with (g); and in order to make the final chord of the cadence answer in position with the original, all that appears of the chord corresponding to bar (g) is the last quaver. The following example will show the nature of the change, beginning at the half-bar corresponding with (d) where the first half close falls, up to the first close in the principal key in bar (h) :

This appears to be rather an extreme instance, but in reality the change is caused by nothing more than the happy idea of turning the passing note in bar (d) in an opposite direction and so leading to the intrusion of the chord of E; thus causing the chords of G and C, which follow in their proper order, to come one step too late, and forcing the penultimate chord of the cadence into very close quarters. But the form of the cadence is preserved all the same, and so the change turns out to be more in superficial appearance than reality; while the regularity of the succession is still sufficiently obvious to identify the theme.

The manner in which all the variations are written is contrapuntal, and in many cases they

are cast in some one or other of the old contrapuntal forms. Every third variation throughout, except the last, is a canon of some sort, with a free bass which generally follows the outlines of the bass of the theme. These take all the intervals in regular order—a canon at the unison in the 3rd variation, a canon at the second in the 6th, and so on up to a canon at the ninth in the 27th variation, the canons at the fourth and fifth being complicated by making them in contrary motion. Variation 10 is a complete fughetta, and variation 16 an overture after the French model, managed by making the part which represents the first half of the theme into the *maestoso* movement, and the latter part into the *fugal* one. The last variation is a 'Quodlibet'; that is, a movement in which several bits of familiar tunes are worked in together. The tunes are 'Volkslieder' of a very bright and happy type. It begins with one to the words 'Ich bin so lang nicht bei dir g'west,' on the top of which another, 'Kraut und Rüben haben mich vertrieben,' is introduced; and the fragments of the two, and probably bits of others which are not identified, are mixed up together in amusing but artistic confusion throughout, always following the harmonic succession of the original aria. After the Quodlibet the theme is directed to be played again, so as to make the cycle complete—a plan followed by Beethoven more than once, most notably in the last movement of his sonata in E, op. 109. Every variation in the series has a perfectly distinct character of its own, and is knit together closely and compactly by the figures used; which vary from the most pointed vivacity to the noblest dignity and calm; and are so distributed as to keep the action always going, and the interest alive at every step; the result of this many-sided technical workmanship being a perfectly mature art-form.

In this respect, as in many others, Bach seems to sum up in his own lifetime the labours of several generations, and to arrive at a point of artistic development which the next generation fell far behind; for a height equal to that of his work was not again reached till Beethoven's time. But the aspect of Bach's work is peculiar to himself and his time. The technical side is brought into extreme prominence. This is shown most obviously in the canons and fugues, but it is also shown in the texture of the other variations. Some few are extremely expressive and beautiful, but it was not with the paramount object of making them all so that Bach attacked his problem, for his variations are rather developments of ideas embodied in vigorous and regular rhythmic figures than romantic or dramatic types. Both the ideas and the way of treating them belong to the old contrapuntal school, and that style of variation-writing which is most richly and comprehen-

sively shown in this series of variations comes to an end with Bach.

He produced several other sets in the same manner, notably the famous chaconne in the suite in D for violin solo; but it is not necessary to analyse that work, since the same principles are observed throughout, even to the repetition of the theme at the end to clench it all together. As in the previous case, the basis of the variation is the harmonic framework of the theme; and the melody hardly ever makes its reappearance till its resumption at the end. The bass steps are just as freely dealt with as in the previous case, from which it may be gathered that Bach considered the harmonic structure the chief thing in a chaconne (which has the reputation of being a movement on a ground-bass) as much as in a regular theme and variations. He also produced an example of a different kind, in a little set of eight variations on a very beautiful and melodious theme in A minor. In this the harmonic framework is not nearly so noticeable, and the variations are not made to depend upon it so much as in the other cases. Some few of them are constructed on the same principles as the great set of thirty, but more often the melody of the theme plays an unmistakable part. This may be seen from a comparison of the melody of the 3rd, 4th and 5th bars of the theme, with the same portion of the third variation.

Ex. 13.
Theme.

Another composer showed this tendency to follow the tune even more markedly. This was Rameau, who was born two years before Handel and Bach, but was brought more strongly under the rising influences of the early sonata period, through his connexion with the French operatic school, and the French instrumental school, of which Couperin was the happiest representative. These French composers were almost the first of any ability in Europe to give their attention unreservedly to tunes, and to make tune, and character of a tuneful kind, the object of their ambition. Rameau produced a number of charming tuneful pieces of a harmonic cast, and naturally treated variations also from the point of view of tune, studying to bring the tune forward, and to make it, rather than the harmonic successions, the basis of his variations. When operatic influences came into play and influenced the instrumental music of German composers, and when the traditions of the Protestant school gave place to those of the southern and Catholic Germans, the same result followed.

PREVALENCE OF THE MELODIC STYLE.—Other circumstances also affected the form unfavourably. The cause of the falling off in vigour, depth of feeling and technical resource from the standard of Handel and Bach is obvious enough in other departments; since men were thrown back, as they had been after Palestrina's time, through having to cope with new forms of art. In the case of variations—by this time an old and established form—the cause of such falling off is not easy to see; but in reality variations were just as amenable to unfavourable influences as the rest of instrumental music, since composers began to try to treat them in the same style as their sonata movements. They dropped the contrapuntal methods, with the opportunities afforded by them, and as they had not yet developed the art of expressing effective musical ideas in the modern style apart from the regular sonata form, their works of the kind seem, by the side of Bach's, to be sadly lacking in interest. Moreover, the object of writing them was changing. Bach wrote up to the level of his own ideas of art, without thinking what would please the ordinary public; but the composers of the middle of the 18th century wrote their clavier music chiefly for the use or pleasure of average amateurs, on whom first-rate art would be thrown away; and aimed at nothing more than respectable workmanship and easy agreeable tunefulness. The public were losing their interest in the rich counterpoint and massive nobility of style of the older school, and were setting their affections more and more on tune and simply intelligible form; and composers were easily led in the same direction. The consequences were happy enough in the end, but in the earlier stages of the new style varia-

tion-making appears to have suffered; and it only regained its position in rare cases, when composers of exceptional genius returned, in spite of the tendency of their time, to the method of building a fair proportion of their variations on the old principles, and found in the harmonic framework equal opportunities to those afforded by the tunes.

HAYDN'S CONTRIBUTION.—How strongly Haydn and Mozart were drawn in the prevailing direction is shown by the number of cases in which they took simple and popular tunes as themes, and by the preponderance of the melodic element in their variations. This is even more noticeable in Mozart than in Haydn, who took on the whole a more serious and original view of the form. True, he did not write nearly so many sets as his younger contemporary, and several that he did write are of the very slightest and most elementary kind—witness that which forms the last movement of the clavier sonata in E \flat , that on a tune in 'tempo di minuetto' in a sonata in A, and that in a sonata for clavier and violin in C. In these cases he is obviously not exerting himself at all, but merely treating the matter lightly and easily. But when he set about his work seriously, it has far more variety, interest and many-sided ingenuity than Mozart's. This is the case with several of the sets in the string quartets, and with the remarkable one for clavier alone in F minor, and the beautiful slow movement in the sonata for clavier and violin in F. The things most noticeable in these are the remarkable freedom with which he treats his theme, and the original means adopted to combine the sets into complete and coherent wholes. Probably no one except Beethoven, Schumann and Brahms took a freer view of the limits of fair variation; the less essential chords and root harmonies of the theme are frequently changed, even without the melody being preserved to make up for the deviation, and in certain cases whole passages appear to be entirely altered, and to have little if any connexion with the theme beyond observance of the length of its prominent periods, and the fact that the final cadences come in the right forms and places. This occurs most naturally in a minor variation of a major theme, or *vice versa*, where a passage in the relative major is made to correspond with a passage in the dominant key, and the succession of chords is necessarily altered to a different course to make the passage flow back to the principal key at the same place, both in variation and theme. There is an extremely interesting example of such changes in the slow movement of the quartet in E \flat , No. 22 Trautwein. The theme is in B \flat , and the first variation in B \flat minor. The second half of the theme begins in F, and has a whole period of eight bars, closing in that key, before going back to B \flat . The correspond-

ing part of the first variation begins with the same notes transferred from first violin to violoncello, and has the same kind of motion, and similar free contrapuntal imitation; but it proceeds by a chain of closely interlaced modulations through $E\flat$ minor and $A\flat$, and closes in $D\flat$. And not only that, but the portion which corresponds with the resumption of the principal idea begins in the original key in $D\flat$, and only gets home to the principal key for the last phrase of four bars, in which the subject again appears. So that for eleven bars the variation is only connected with the theme by the fact that the successive progressions are analogous in major and minor modes, and by a slight similarity in the character of the music. This was a very important position to take up in variation-writing, and by such action Haydn fully established a much broader and freer principle of representing the theme than had been done before. The following examples are respectively the first eight bars of the second half of the theme, and the corresponding portion of the 1st variation:

Ex. 17.

Theme.

Ex. 18.

Var. 1.

The other noticeable feature of Haydn's treatment of the variation-form is illustrated very happily by the 'Andante con variazioni' in F minor for clavier solo, and by the movement in the F major sonata for clavier and

violin; both showing how strongly he regarded the form as one to be unified in some way or other beyond the mere connexion based on identity of structure or tune which is common to all the members of the series. The first of these is really a set of variations on two themes; since the principal theme in the minor is followed by a slighter one contrasting with it, in the major. The variations on these two themes alternate throughout, and end with a repetition of the principal theme in its original form, passing into an elaborate coda full of allusions to its principal figures. Thus there is a double alternation of modes and of styles throughout binding the members together; and the free development of the features of the theme in the coda gives all the weight and interest necessary to clench the work at the end. The slow movement for clavier and violin is somewhat different in system, but aims at the same object. After the theme comes an episode, springing out of a figure in the cadence of the theme and modulating to the dominant and back; then comes the first variation in full, followed by another episode modulating to $B\flat$, with plenty of development of characteristic figures of the theme, coming back (after about the same length as the first episode) to a pause on the dominant chord of the principal key, and followed by another variation with demisemiquaver ornamental passages for the pianoforte. This variation deviates a little at the end, and pauses on the dominant chord again; and then the beautiful and serene theme is given out once more in its original form. This is therefore an ingenious kind of rondo in the form of variations. The short contrasting episodes are quite in rondo-form, the only difference being that the two middle repetitions of the theme are made unusually interesting by appearing in a fresh guise. One more point worth noting about Haydn's works of this kind is that some of his themes are so rich and complex. In a few of the sets in the quartets the theme is not so much a tune as a network of figures combined in a regular harmonic scheme—see Ex. 17; and the same holds true of the 'Andante con variazioni' mentioned above, which is long, and full of the most various and remarkable figures. It may be said finally that there is no branch of composition in which Haydn was richer and more truly polyphonic than in his best sets of variations.

MOZART'S STYLE.—Mozart, on the other hand, represents the extreme of the melodic form of variations. If in many of Haydn's slighter examples this tendency was perceptible, in Mozart it comes to a head. The variations which he makes purely out of ornamental versions of the tune of the theme are at least four times as many as his harmonic and more seriously conceived ones. As has been said before, Mozart wrote far more sets than Haydn,

and many of them were probably *pièces d'occasion*—trifles upon which there was neither time nor need to spend much thought. It is scarcely too much to say, moreover, that variation-writing was not Mozart's best province. Two of his greatest gifts, the power of moulding his form with the most refined and perfect accuracy, and spontaneous melody, have here no full opportunity. The themes which necessarily decide the form are in many cases not his own, and, except in rare instances, it does not seem to have entered into his head to try to make new and beautiful melodies on the foundation of their harmonic framework. He seems rather to have aimed at making variations which would be easily recognisable by moderately gifted amateurs; and it must be allowed that it takes a good deal of musical intelligence to see the connexion between a theme and a variation which is well enough conceived to bear frequent hearing. It is also certain that the finest variations have been produced by scarcely any but composers of a very deep and intellectual organisation, like Beethoven, Bach and Brahms. Mozart was gifted with the most perfect and refined musical organisation ever known; but he was not naturally a man of deep feeling or intellectuality, and the result is that his variation-building is neither impressive nor genuinely interesting. Its chief merits are delicate manipulation, illustrating the last phase of harpsichord-playing as applied to the Viennese type of pianoforte with shallow keys, and he obtains the good balance in each set as a whole without any of Haydn's interesting devices. A certain similarity in the general plan of several of the independent sets suggests that he had a regular scheme for laying out the succession of variations. The earlier ones generally have the tune of the theme very prominent; then come one or two based rather more upon the harmonic framework, so as to prevent the recurrence becoming wearisome; about two-thirds of the way through, if the theme be in the major, there will be a minor variation, and *vice versa*; then, in order to give weight to the conclusion and throw it into relief, the last variation but one has a codetta of some sort or an unbarred cadenza, or else there is an unbarred cadenza dividing the last variation from the final coda, which usually takes up clearly the features of the theme. These unbarred cadenzas are a characteristic feature of Mozart's sets of variations, and indicate that he regarded them as show pieces for concerts and such occasions, since they are nothing but pure finger-flourishes to show off the dexterity and neatness of the performer. There are two—one of them a very long one—in the set on Paisiello's 'Salve tu Domine,' another long one in that on Sarti's 'Come un agnello,' a long one in that on 'Lison dormait,' and others of more moderate dimensions in the

sets on Gluck's 'Unser dummer Pöbel meint,' Duport's minuet, 'Je suis Lindor,' and others. In his treatment of the harmonic framework, Mozart is generally more strict than Haydn, but he is by no means tied by any sense of obligation in that respect, and even makes excellent point out of harmonic digression. A most effective example, which contains a principle in a nutshell, is his treatment of the most characteristic phrase of 'Unser dummer Pöbel' in the fourth variation. The phrase is as follows:

Ex. 19.

To this he gives a most amusing turn by, as it were, missing the mark by a semitone:

Ex. 20.

then he goes on to the end of the half of the variation which contains the passage, and begins it again as if for repeat; and then again overshoots the mark by a semitone:

Ex. 21.

There is probably no simpler example of an harmonic inconsistency serving a definite purpose in variations. In a less obvious way there are some in which very happy effect is obtained by going an unexpected way round between one essential point of harmony and another, and in such refinements Mozart is most successful.

When he introduces sets of variations into sonatas and such works as his clarinet quintet, he seems to have taken more pains with them; there are proportionately more free and harmonic variations among them; and the element of show illustrated by the unbarred cadenza is not so prominent. There are good examples of variety of treatment and success in balancing the various members of the series in the variations in the fine sonata in F for violin and pianoforte. True, the basis of the variations is for the most part melodic, but the principle is treated with more solid effect than usual. The same remark applies to the last movement of the pianoforte sonata in D, written in 1777. This contains some extremely happy examples of the exclusive use of the harmonic principle, as in the 9th variation, in which the vigour and individuality of the figure give the variation all the appearance of an independent piece. Similarly in the 11th, *adagio cantabile*, and in the last, in which the time is changed from 4-4 to 3-4, the melody is

so devised as to appear really new, and not merely the theme in an ornamental dress.

An excellent use to which Mozart frequently puts variations is that of presenting the subjects of sonata-movements in new lights, or adding to their interest by new turns and ornaments when they reappear a second or third time in the course of the movement. One example is the recurrence of the theme in the 'Rondo en Polonoise' which forms the middle movement in the sonata in D just referred to. Another is the slow movement of the well-known sonata in C minor, connected with the fantasia in the same key.

The cases in which Mozart ventured to give a variation a thoroughly independent character are rare. He seems to have thought it better to keep always in sight of his theme, and though he invented some charming and effective devices which have been used by later composers, as a rule the variations wait upon the theme too subserviently, and the figures are often too simple and familiar to be interesting. The following ('Je suis Lindor') is a fair sample of his way of ornamenting a tune :

Ex. 22.
Theme.

Variation.

BEETHOVEN'S CONSUMMATION.—Beethoven's work forms an era in the history of variation-making. It was a branch of art eminently congenial to him; for not only did his instinct for close thematic development make him quick to see the various ways of treating details, but his mind was always inclined to present the innermost core of his idea in different forms. This is evinced plainly enough in the way in which he perfects his subjects. His sketches show how ideas often came to him in the rough; and how, sometimes by slow degrees, he brought them to that refined and effective form which alone satisfied him. The substratum of the idea is the same from first to last, but it has to undergo many alterations of detail before he finds the best way to say it. Even in this his practice differed extremely from Mozart's, but in the treatment of the actual form of theme and variations it differed still more. In principle Beethoven did not leave the line taken up by the composers of the

sonata period, but he brought the old and new principles more to an equality than before, and was also very much more daring in presenting his model in entirely new lights. The proportion of purely ornamental variations in his works is small; and examples in which the variations follow the theme very closely are more conspicuous in the early part of his life than later; but even among such comparatively early examples as the first movement of the sonata in A \flat (op. 26), or the still earlier ones in the sonata in G (op. 14, No. 2), and the set on Righini's air, there is a fertility of resource and imagination, and in the last case a daring independence of style, which far outstrip anything previously done in the same line.

In some sets the old structural principle is once more predominant, as in the well-known 32 in C minor (1806), a set which is as much of a chaconne as any by Corelli, Bach or Handel. The theme is in chaconne time, and the strong steps of the bass have the old ground-bass character. It is true he uses the melody of the theme in one or two instances—it would be almost impossible to avoid it at a time when melody counted for so much; but in the large majority the variation turns upon the structural system of the harmonies. Among other points this set is remarkable as a model of coherence; almost every variation makes a perfect complement to the one that precedes it, and sets it off in the same way. In several cases the variations are grouped together, externally as well as in spirit, by treating the same figures in different ways; as happens with the 1st, 2nd and 3rd, with the 7th and 8th, and with the 26th and 27th and others. The 12th marks a new departure in the series, being the first in the major, and the four that follow it are closely connected by being variations upon that variation; while at the same time they form the single block in the major mode in the whole series. Every variation hangs together as closely as those in Bach's great set of thirty by the definite character of the figures used, while the whole resembles that set in the vigour of the style.

In most of the other remarkable sets the principles of treatment are more mixed. For instance, in that on the ballet air from the 'Men of Prometheus,' some have a technical interest like Bach's, and some have an advanced ornamental character after the fashion of Mozart's. Among ingenious devices which may fairly be taken as types, the sixth variation is worth noting. The tune is given intact at most available points in its original pitch and original form, but the harmonies are in a different key. A marked feature in the series is that it has an introduction consisting merely of the bass of the theme, and three variations on that are given before the real theme makes its appearance; as happens also in the last

movement of the *Eroica* symphony, which has the same subject, and some of the same variations, but is not a set of variations in the ordinary sense of the word, since it has various episodes, fugal and otherwise, as in the movement from Haydn's violin and pianoforte sonata described above.

Others of Beethoven's sets have original external traits; such as the set in F (op. 34), in which all the numbers are in different keys except the theme and the last two variations, the others going in successive steps of thirds downwards. The variations themselves are for the most part based on the melody, but a most ingenious variety of character is kept up throughout, partly by changing the time in each successively.

BEETHOVEN'S LAST PERIOD.—The sets so far alluded to belong to the early or middle period of Beethoven's life, but the finest examples of his work of this kind belong to the last period, such as those in the quartet in E \flat , and the variations 'In modo lido' in the quartet in A (op. 132), those in the trio in B \flat , in the sonatas in E (op. 109), and C minor (op. 111), the two in the ninth symphony, and the thirty-three on the waltz by Diabelli. These last five are the finest and most interesting in existence, and illustrate all manner of ways of using the form. In most cases the treatment of the theme is very free, and is sometimes complicated by the structure of the movement. In the slow movement of the ninth symphony for instance the theme and variations are interspersed with episodes formed on a different subject and by passages of development based on the principal theme itself. In the choral part the variations are simply based upon the idea, each division corresponding to a variation being really a movement made out of a varied version of the theme adapted in style to the sentiment of the words, and developed without regard to the structure of the periods or plan of the tune.

The sets in the two sonatas are more strict, and the harmonic and structural variations are in about equal proportions. Their coherence is quite as strong as that of the thirty-two in C minor, or even stronger; while there is infinitely more musical interest in them. In fact, there is a romantic element which colours each set and gives it a special unity. The individual character given to each variation is as strong as possible, and such as to give it an interest of its own beyond its connexion with the theme; while it is so managed that whenever the freedom of style has a tendency to obliterate the sense of the theme, a variation soon follows in which the theme is brought forward clearly enough to re-establish the sense of its presence as the idea from which the whole series springs.

The set in op. 109 is an excellent model of the most artistic way of doing this, without the

device being so obvious as it is in the works of the earlier masters. The first variation has such a marked melody of its own that it necessarily leads the mind away from the theme. But the balance is re-established by the next variation, which is a double one, the repeats of the theme being given with different forms of variations, severally like and unlike the original. The next variation is also double, but in a different sense, the repeats being given in full with different treatment of the same figures. Moreover, the balance is still kept up, since the first half is chiefly structural, and the second resumes the melody of the theme more clearly. The next two are more obscure, and therefore serve all the better to enhance the effect of the very clear reappearance of the theme in the final variation.

This plan of making double variations was a favourite one with Beethoven, and he uses it again in the fourth variation in op. 111, and in the Diabelli set. In op. 111 it is worth noticing that there is an emotional phase also. The first two variations gradually work up to a vehement climax, culminating in the third. After this outburst there comes a wonderful stillness in the fourth (9-16), like the reaction from a crisis of passion, and this stillness is maintained throughout, notwithstanding the two very different manners of the double variation. Then there is a codetta and a passage wandering through mazes of curious short transitions, constantly hinting at figures of the theme; out of which the theme itself emerges at last, sailing with wind and tide in perfect fruition of its freedom; the last variation of all seems to float away into the air as the tune sings through the haze of shakes and rapid light passages that spin round it, and the whole ends in quiet repose. In such a sense Beethoven gave to his variations a dramatic or emotional texture, which may be felt, by those who understand it, to be true of the innermost workings of their emotions, but can hardly be explained in words.

DIABELLI VARIATIONS ANALYSED.—Technically the most remarkable set of all is that of thirty-three on the Diabelli waltz. In this appear many traits recalling those in Bach's set of thirty. For instance, there is a fughetto, cast in the structural mould of the theme; there are imitative variations, of thoroughly modern type; and there are also examples of the imitations being treated by inversion in the second half, as was the manner of Bach. But in style there is little to recall the methods of the older master, and it is useless to try and lay down hard and fast technical rules to explain the detailed connexion of theme and variation. In all these last sets, and in the Diabelli set especially, Beethoven is making transformations rather than variations. He takes the theme in all its phases—harmonic,

melodic, or rhythmic—and having the idea well in his mind, reproduces it with unlimited variety in different aspects. At one moment a variation may follow the melody of the theme, at another the harmonic structure, at another it will be enough that some special trait like the persistence of an inner portion of the harmony in thirds or otherwise is reproduced, as in the second phrase of variation No. 8. At other times he will scarcely do more than indicate clearly the places where the cadences and signs of the periods fall, as in variation 13, with the long pauses; while at other times he works by nothing more than analogy, as in the relations of the end of the first half and beginning of the second half of variation 5, and the beginnings of the second halves of Nos. 9, 13 and 22. In other cases there are even more complicated reasons for the connexion. An example occurs as early as the first variation. The strong type of figure, moving by diatonic steps, adopted at the beginning, is worked out in longer reaches in the second half, until it forces the harmony away from the lines of the theme into short transitional digressions. These occur in two successive periods, which are brought round again and rendered externally as well as ideally intelligible by the way in which the periods are made to match. In a few other cases nothing but the strong points of the periods is indicated, and the hearer is left in doubt till he hears the strong cadence of the period, and then he feels himself at home again directly, but only to be immediately bewildered by a fresh stroke of genius in a direction where he does not expect it. The happiest example of this is variation 13, already alluded to, which is principally rhythmic, just indicating by a sort of suggestion here and there a humorous version of the theme, and making all the progressions seem absurdly wrong at first sight, though they come perfectly right in the end.

Another most wonderful variation is the twentieth, in which again there is a mere suggestion of the theme woven into mazes of transitions, passing away from the harmony of the theme in the less essential points, but always restoring the balance at the close, melodic and structural principles being mixed up almost inextricably. In almost all the variations except the fugue (No. 32) the periods are kept quite clear, and match the original faithfully; and this is the strongest point in helping the hearer or reader to follow the connexion. The free fugue, which comes last but one, is exactly in the very best place to break any sense of monotony in the recurrence of these exact periods, while the last variation sets the balance even again in a very distinct and weighty way, in favour of the plan and melody of the theme.

In connexion with the point illustrated by

the fugue in this set, it is noticeable that Beethoven from the first seems to have aimed at relieving in some striking and decisive way the monotony which is liable to result from the constant recurrence of short sections, and the persistence of one key. His codas are frequently very long and free, and often contain extra variations mixed up with telling passages of modulation. The early set of variations on a theme by Righini (1790) affords one remarkable illustration of this, and the twelve on the Russian air from 'Das Waldmädchen' (1797), another. In the last movement of op. 111 the same end is gained by the string of transitions in the body of the movement before the last two variations; a similar passage occurs in the slow movement of the ninth symphony; and in a few instances he gained the same end by putting some of the variations in a different key, as in those of the E_b quartet, which also contain a modulating episode near the end.

The history of variations seems to be summed up in the set we have just been considering. In the earlier stages of the art the plan of the bass and the harmonies indicated by it was generally the paramount consideration with composers, and great technical ingenuity was expended. In characteristic sets of the earlier sonata-period the melody became paramount, and technical ingenuity was scarcely attempted. In Beethoven's latest productions structural and melodic elements are brought to a balance, and made to minister in all the ways that artistic experience and musical feeling could suggest to the development of the ideas which lie in the kernel of the theme, and to the presentation of them in new lights.

LATER COMPOSERS.—Several composers in the generation after Beethoven produced isolated examples, which are really musical and interesting. Schubert is particularly happy in the variations on the 'Tod und Mädchen' theme in the D minor quartet, in which there is great beauty of sound, charm of idea, and contrast of style, without anything strikingly original or ingenious in principle. Weber produced numbers of very effective and characteristic sets for pianoforte. Mendelssohn left one or two artistic works of the kind, of which the 'Variations sérieuses' is the best. In this set there are happy instrumental effects, and the whole makes an effective pianoforte piece; but Mendelssohn's view of this branch of art was only at the level of the simple standard of Mozart, and not even so free and spontaneous as Haydn's; and in his application of melodic and structural principles he is extremely strict. Far more interesting is Schumann's treatment of the form in such examples as the Andante and Variations for two pianos, and the well-known 'Études symphoniques.' His view of the art tended to

independence as much as Mendelssohn's did to rigidity, and at times he was even superfluously free in his rendering of the structural aspect of the theme. His devices are less noticeable for ingenuity than for the boldness with which he gives a thoroughly warm, free, and romantic version of the theme, or works up some of its characteristic figures into a movement of nearly equal proportions with it.

BRAHMS.—By far the finest variations since Beethoven are the numerous sets by Brahms, who was akin to Beethoven more especially in those characteristics of intellect and strong emphatic character, which seem to make variations one of the most natural modes of expressing ideas. In the Variations and Fugue on a theme of Handel (op. 24), the superb set for orchestra on a theme of Haydn (op. 56*a*), those for four hands on a theme of Schumann (op. 23), the two Paganini sets, and the fine set on an original theme in D (op. 21, No. 1), he not only showed complete mastery and perception of all aspects of the form, but a very unusual power of presenting his theme in different lights, and giving a most powerful individuality both of rhythm and figure to the several members of each series. His principles are in the main those of Beethoven, while he applies such devices as condensation of groups of chords, anticipations, inversions, analogues, sophistication by means of chromatic passing notes, etc., with an elaborate but fluent ingenuity which sometimes makes the tracing of the theme in a variation quite a difficult intellectual exercise. But analysis almost always proves the treatment to be logical, and the general impression is sufficiently true to the theme in broad outline for the principle of the form to be intelligible. He uses double variations with the happiest effect, as in those on the theme by Haydn, where the characteristic repetition of halves is sometimes made specially interesting by building one variation upon another, and making the repetition a more elaborate version of the first form of each half of the variations. Where the variations are strongly divided from one another, and form a string of separate little pieces, the contrasts and balances are admirably devised. In some cases again the sets are specially noticeable for their continuity, and for the way in which one variation seems to glide into another; while they are sometimes connected by different treatment of similar figures, so that the whole presents a happy impression of unity and completeness. Brahms is also, like Beethoven, most successful in his codas. Two very large ones are the fugue in the Handel set, and the fine, massive coda on a ground-bass derived from the first phrase of the theme, in the Haydn variations. Another on a large scale, but in different style, is that which concludes the Hungarian set (op. 21, No. 2).

In the following examples—which show the first four bars of the theme, and the corresponding portion of the third variation in the first Paganini set—the nature of several very characteristic devices, such as anticipation, insertion of new chords between essential points of the harmonic succession, doubling the variation by giving the repetition of each half in full, with new touches of effect, etc., is illustrated.

Ex. 23.

Ex. 24.

A peculiar adaptation of the variation-principle to the details of other forms of art remains to be noticed. In this also Beethoven led the way. A very fine example is the conclusion of the Marcia funebre of the Eroica symphony, where the subject is made to express a terrible depth of grief by the constant breaks of the melody, which seem to represent sobs. A similar device—in that case amounting to a complete variation—is the repetition of the short 'Arioso dolente' in A \flat minor in the middle of the final fugue in the sonata in A \flat (op. 110). Here again the object is obviously to intensify the sadness of the movement by constant breaks and irregularities of rhythm. Another passage of the same kind is the end of the overture to 'Coriolan.'

INCIDENTAL DEVELOPMENTS.—With a similar view Berlioz has given varied forms of his 'idée fixe' in the 'Épisode de la vie d'un

artiste,' adapting it each time to the changed conditions implied by the movement in which it appears. Its original form is as follows :

Ex. 25.

In the ball scene it takes a form appropriate to the dance motion :

Ex. 26.

Another form occurs in the 'Scène aux champs,' and in the final 'Nuit de Sabbat' it is purposely brutalised into the following :

Ex. 27.

Wagner, carrying out the same method on a grander scale, has made great use of it in adapting his 'leitmotiven' to the changed circumstances of the individuals or ideas to which they belong. One of the most remarkable instances is the change from one of Siegfried's tunes as given by his own horn in his early days, representing his light-hearted boyish stage of life—

Ex. 28.

to the tune which represents him as the full-grown hero bidding adieu to Brünnhilde, which is given with the whole force of the orchestra.

Ex. 29.

Liszt has frequently made characteristic variations of his prominent figures for the same purposes, as in the 'Faust' symphony, and 'Les Préludes.'

Among the devices known as 'æsthetic,' variations again play a most prominent part; movements of symphonies and sonatas, etc., being often linked together by different forms of the same idea. Interesting examples of this are to be met with in Schumann's Symphonies in D minor and C, and again in Brahms's Symphony in D (see SYMPHONY).

In such a manner the principle of variation has pervaded all musical art from its earliest days to its latest, and appears to be one of its most characteristic and interesting features. In its early stages it was chiefly a mechanical

device, but as the true position of ideas in music has come more and more to be felt and understood, the more obvious has it become that they can be represented in different phases. Thus the interest of the development of instrumental movements in modern symphonies and sonatas is frequently enhanced by the way in which the subjects are varied when they are reintroduced according to the usual principles of structure; in operas and similar works ever since Mozart's time characteristic features are made all the more appropriate by adapting them to different situations; and it is even possible that after all its long history the variation still affords one of the most favourable opportunities for the exercise of their genius by composers of the future. C. H. H. P.

MODERN VARIATIONS

The prophecy of Sir Hubert Parry's last sentence has been fulfilled; he himself played no small part in its fulfilment. But the above article was written when the romantic movement in music had reached its height, when the symphonic poem was held to be typical of the modern trend of the art, and adherence to the older and stricter forms was generally regarded as reactionary. It will be noticed that while Parry's estimate of Brahms as a writer of variations is accurate his record of Brahms's achievement is necessarily incomplete. Neither the clarinet quintet nor the fourth symphony were then written and both end with variations. The finale to the symphony in E minor is indeed the apotheosis of the chaconne type which traces its descent from Corelli's 'La folia' through Bach's violin sonata in D minor. In that finale Brahms brought back into modern music a form which Beethoven had left unexplored and produced a work which may be placed beside Beethoven's Diabelli variations and Bach's Goldberg variations, and in right of which a place may be claimed for Brahms of equal honour with these earlier masters.

Nothing else in the epoch comes within range of this finale for originality of design and masterliness of handling, although several composers made good use of the established form. Dvořák's 'Symphonic Variations' for orchestra, and the popular set in Tchaikovsky's third suite are noteworthy, but far more important in the latter's output is the 'Tema con variazioni,' followed by 'Variazione finale e coda' of the trio for pianoforte and strings in A minor (op. 50). This fine work may be held to be the modern counterpart of the Mozart type, just as Brahms's several works are of the Beethoven and Bach types, for Tchaikovsky relies mainly on the capacities of the tune for rhythmic variation as against the German reliance on the harmonic structure. In every one of them the contour of the principal phrase

makes its appearance and is instantly recognisable, e.g.

Ex. 30. Theme.

Variation II.

Variation III.

Variation VI. *Tempo di Valse.*

Variation VIII. *Fuga.*

Variation X. *Tempo di mazurka.*

a method which incorporates the transformation principle of Berlioz and Liszt (see above) with Mozart's method of melodic variation.

It is claimed for César Franck that he was a master of

'la grande variation, n'ayant rien de commun disons-le bien vite, avec le "thème varié," qui fit la joie des auditeurs d'Haydn et le tourment des pianistes romantiques, avait été entrevue par J. S. Bach, esprit universel, et quelques très rares compositeurs,'¹

but it is not easy for those outside the immediate circle of discipleship to see in what way Franck added to the resources of variation form. His 'Variations symphoniques' is a wholly delightful work which employs a good deal of the rhythmic transformation illustrated above from the Tchaikovsky variations and in its rhapsodic treatment of the theme, a composite one, is akin to Schumann. His variation here and elsewhere is generally in the nature of a free development. The use of the term 'Symphonic,' which both Franck and Dvořák adopted, prompts the question, what is the difference between symphonic and other variations? The answer cannot be very precise. It may be suggested, however, that composers tend to use the qualifying adjective to describe their desire for a greater measure of continuity between the several numbers than

the variation form with its clear-cut divisions generally implies. Tchaikovsky's variations in the trio aim primarily at direct contrasts of mood, while Franck's 'Variations symphoniques' grow out of one another. Parry's fine set of 'Symphonic Variations' for orchestra (1897) shows the intention with exceptional clearness, for in them the numbers fall naturally into groups corresponding with the contrasted movements of a symphony, and distinguished by the directions, 'Maestoso energico,' 'Allegretto grazioso,' 'Allegro scherzando vivace' and 'Largo appassionato' leading into a finale which begins 'Moderato' soon to become 'Vivace.' The method is to a certain extent that of Brahms, though the whole flavour of the work, as well as this element in its design, is a very personal contribution to the style.

A further phase of the variation form is that in which the technical method is allied with ideas which bring this strictest of designs within the range of PROGRAMME MUSIC (*q.v.*). Another English example, Elgar's 'Enigma' variations for orchestra (1899), may be pointed to as representative of the new phase. Each one of its fourteen numbers bears initials or other device indicating that it is a character study of a personal friend, and it is said that in addition to the theme which unites their contrasted characteristics there is another theme never heard but with which all are mentally consonant (see ELGAR). Technically the style relates to that of Tchaikovsky for each of the exquisite little miniatures takes its principle of cohesion direct from the simple germs of the tune

Ex. 31.

subjected to a number of rhythmic transformations and combined with counter-subjects. Compare the following, Var. V., with Tchaikovsky's 'Tempo di valse,' quoted from above.

Ex. 32. Vln.

Vcl. C.B.

Incidentally it is noticeable that Elgar modifies and weakens the tune in bar 2 to make the counterpoint fit.

¹ Vincent d'Indy, *Oscar Franck*, p. 61.

This is a consideration by which his masterful contemporary, Richard Strauss, was untroubled in the work which effected the union between the variation form and the symphonic poem, 'Don Quixote (Introduzione, Tema con variazioni e finale) fantasische, Variationen über ein Thema ritterlichen Characters für grosses Orchester' (op. 35). It actually appeared in the year before Elgar's 'Enigma.' Here the 'programme' idea takes complete control of the form. It is no mere question of contrasted moods; the aim is definitely pictorial,¹ but the pictures are arranged in such a way as to accord with the traditions of developing a highly complex theme in a series of variations. Many later examples of the use of the form in one or other of its several aspects might be cited. No composer has applied himself to the form with greater seriousness than Max REGER (*q.v.*), and his several large sets bring a 20th-century view of harmony and counterpoint to bear on models evolved by Bach and Brahms. Others have resorted to it more sporadically, and it has been adapted to such different psychological situations as are represented by Vaughan Williams's 'Fantasia on a theme by Tallis' and Dohnányi's 'Variations on a Nursery Song,' the one brooding in an atmosphere of mystical religion, the others sparkling with vivacious humour. But such things hardly mark a further development in the form. The 19th century made the form plastic in the hands of the individual composer, and after 'Don Quixote' all things are possible. C.

VARLAMOV, ALEXANDER IGOROVICH (b. Moscow, Nov. 15/27, 1801; d. St. Petersburg, Oct. 1848), song-writer, was the son of a nobleman of Moldavian extraction. He entered the court choir as a chorister at ten years of age, and his uncommon abilities soon attracted the attention of Bortniansky. His voice having broken and failing to regain its sweetness and power, he left the Imperial choir in 1819, and was appointed director of the choir of the chapel of the Russian embassy at The Hague, being also attached to the court of the Princess (Anna Pavlovna) of Orange. He returned to Russia in 1823, and settled in Moscow as a teacher. Besides singing, he taught also the violin and the guitar. From 1829-31 Varlamov was again employed in the Imperial court choir as teacher of choral singing. But he soon drifted back to his native town where he now settled once more as a teacher. His first nine songs were published about 1833, and soon became popular. Varlamov died suddenly of heart disease.

¹ It is to be observed, however, that in the score itself only the names of Don Quixote and Sancho Panza attached to themes indicate the pictorial intention. But the variations describing the episodes of the windmills, the flocks of sheep, the penitents, Dulcinea, the ride through the air and the death of the knight would all be sufficiently intelligible to readers of Cervantes without the explanation which has been given by commentators.

The entire collection of his songs, numbering 223, was published by Stellovsky in twelve books. Numerous other editions exist. In style and technical method they are closely allied to the songs of Alabiev. In the majority of them the use of Russian sentiment and colour is very superficial. The most famous is the 'Red Sarafan,' which is often mistaken for a genuine folk-song, and is known all over the world. This air and another one by the same composer ('I saddle the horse') have been used by Wieniawski in his popular fantasia for violin 'Souvenir de Moscou.'

R. N.

VARNEY, (1) PIERRE JOSEPH ALPHONSE (b. Paris, Dec. 1, 1811; d. there, Feb. 7, 1879), was educated at the Conservatoire as a violinist, and was a pupil of Reicha for composition. He was successively conductor at the Théâtre historique and the Théâtre lyrique, at Ghent, The Hague, Rouen, the Bouffes Parisiens, and at Bordeaux (1865-78). Several short operas and operettas of slight construction by him were brought out at the various places where he worked. He is best known as having furnished the music for the celebrated Chant des Girondins, 'Mourir pour la Patrie,' the words of which were by Dumas, and which played so important a part in the revolution of 1848.

His son, (2) LOUIS (b. Paris, c. 1844; d. Caunteret, Aug. 20, 1908), wrote upwards of thirty-five operettas, most of them produced with success in Paris from 1876 onwards. The three-act 'Les Forains' (1894) was given at Vienna in 1895, as 'Olympia,' and in the same year at Berlin as 'Die Gaukler.' 'Le Pompier de service' (1897) and 'Les Demoiselles de Saint Cyr' (1898) were very successful (*Baker*). M.

VAROTTI (VAROTUS), MICHELE (b. Novara, 16th cent.), canon at Novara Cathedral; composed masses, Magnificats, Lamentations, etc., between 1563 and 1595 (*Fétis*; *Q.-L.*).

VARSOVIANA, a dance very similar in character to the Polka, Mazurka and Redowa. It is probably of French origin, and seems to have been introduced by a dancing-master named Désiré in 1853. Somewhat later it was much danced at the Tuileries balls, and is said to have been a favourite with the Empress Eugénie. The music is characterised by strong accents on the first notes of the second and fourth bars, corresponding with marked pauses in the dance. The tempo is rather slow. The following is the tune to which the Varsovia was generally danced:

W. B. S.

VASCELLO FANTASMA, IL, an Italian version of Wagner's *FLIEGENDE HOLLÄNDER* (q.v.).

VASCONCELLOS, JOAQUIM DE, Portuguese historian. His most important work is the biographical dictionary of Portuguese musicians, *Os músicos portugueses* (1870), in which he corrected many mistakes made by Fétis and others on Portuguese music. He also wrote a life of the 18th-century singer Luiza TODI (q.v.) (1873); Notes on the Catalogue of the Library of King John IV. (lost in the Lisbon earthquake), and later a facsimile, and commentary (1874-76) and index (1905) of this catalogue, which is of great importance to students of the history of Portuguese and Spanish music.

J. B. T.

VASQUEZ, JUAN (b. Badajoz, 16th cent.), Spanish composer, studied at Seville, and is said to have been maestro de capilla at Burgos, though he never describes himself as such in any of his works. His villancicos (3-5 v.) are compositions in which 'the chief singing part' is often a folk-song, while the other voices supply a contrapuntal background. The melody is repeated over and over again in an unaltered form, as in some of the motets of MORALES, while the other parts are constantly varied. He published

Villancicos i Canciones de Juan Vasquez, a 3 y a 4. Osuna, 1551. Partbooks. (Madrid, Bibl. Medinacell.)
Recopilación de sonetos y villancicos a 4 y a 5 de Juan Vasquez. Seville, 1560. Partbooks. (Madrid: Bibl. Medinacell.)

Transcriptions and other arrangements for the *vihuela* (Spanish lute) are found in the tablature-books of Daza, Enriquez, Fuenllana, Milan and Pisador. He also published:

Agenda Defunctorum. Sevilla, 1566. (Barcelona, Bibl. de la Diputació.)

J. B. T.

VASSILENKO, SERGIUS NIKIPHOROVICH (b. Moscow, 1872), Russian composer. After taking up law at the university, he entered the Conservatoire in 1896, where he studied under S. Taneiev and Ippolytov-Ivanov. In his last year (1901) he was awarded a gold medal for his cantata 'The Legend of the City of Kitezh,' which he remodelled as an opera, afterwards produced at the Private Opera, Moscow, of which he was the conductor. He organised and conducted a series of Historical Concerts in connexion with the Imperial Russian Music Society. He was appointed professor at the Moscow Conservatoire.

Vassilenko's early works were very interesting, and suggested that, breaking away from the Tchaikovsky tradition, he might create an original style of his own. His 'Legend of Kitezh' and the 'Epic Poem' for orchestra show a profound knowledge of the old Russian church music and are penetrated by a mediæval and mystical atmosphere. His symphony in E minor, op. 10, shows a departure from the national style, and in the symphonic poem based on Oscar Wilde's 'The Garden of

Death,' he enters upon a period of complete reaction from the religious and archaic tendencies of his youth. His suite 'Au Soleil,' which discloses the influence of the French impressionists, was produced by Sir Henry J. Wood, at a Promenade Concert, Sept. 11, 1917. Vassilenko's works comprise:

2 symphonies, E min., op. 10, and F maj., op. 22; epic poem for orchestra, op. 4; 2 symphonic poems, 'The Garden of Death,' op. 12, and 'Hymns Nocturnus' (The Witches' Flight), op. 16; suite for orchestra, 'Au Soleil,' op. 17; violin concerto, op. 14; songs and incidental music.

R. N.

VATERLÄNDISCHE KÜNSTLER-VEREIN (Society of Artists of the Fatherland), a name which has become famous through Beethoven's op. 120. 'The Fatherland' here means Austria.

Schindler (*Life of Beethoven*, ii. 34) says that in the winter of 1822-23, the publishing firm of DIABELLI (q.v.) in Vienna formed a plan for issuing a collective set of variations for the pianoforte. No fewer than fifty-one composers, among whom were the first Viennese masters of the time,¹ consented to contribute to the collection, which was published in two large oblong books (Nos. 1380-81) under the title of

'Vaterländische Künstlerverein, Veränderungen über ein vorgelegtes Thema, komponirt von den vorzüglichsten und Virtuosen Wiens und der k. k. österreichischen Staaten.'²

It is an indication of the position held by Beethoven among the musicians of Vienna, that the whole of the first book is taken up with his variations, thirty-three in number, while the other fifty composers are represented by a single variation each. Beethoven's composition has the separate title:

'33 Veränderungen über einen Walzer für das Pianoforte komponirt und der Frau Antonia von Brentano, gebornen Edlen von Birkenstock, hochachtungsvoll zugeeignet von Ludwig van Beethoven. 120 Werk. Wien bey Cappi und Diabelli.'

(For a full discussion of it, see VARIATIONS, subsection DIABELLI VARIATIONS ANALYSED.) The work was published in June 1823. On the 16th of the month an elaborate advertisement³ appeared in the *Österreichisch-kaiserliche privilegierte Wiener Zeitung*.

The original manuscript of op. 120, formerly in the possession of C. A. Spina, subsequently in that of Dr. Steger of Vienna, was offered for sale at 42,000 marks (£2100) by Karl W. Hiersemann of Leipzig and in the *Zeitschrift* of the Int. Mus. Ges. of Sept. 1908. Interesting information concerning the sketches for the composition is given in Nottebohm's *Zweite Beethoveniana*, Leipzig, 1887. Beethoven was fond of presenting copies of the printed work to his friends, and the writer possesses two such copies with autograph dedications.

The second book of the variations appeared in the latter half of 1823 or early in 1824.

¹ It is curious that the names of Seyfried and Weigl are not in the list.

² Society of Artists of the Fatherland. Variations on a given theme, written by the most prominent composers and performers of Vienna and the Imperial States of Austria.

³ It was quoted in former editions of this Dictionary. It is merely a eulogy of Beethoven's handling of the variation form.

Anton Diabelli, the composer and publisher, had meanwhile dissolved partnership with Cappi, and the name of the firm was now 'A. Diabelli & Co.' As in the first book (Beethoven's portion) so here the theme by Diabelli precedes the variations. It consists of thirty-two bars, and, although of slight importance in itself, is well fitted for variation-writing. The waltz is followed by fifty variations:

(1) Ignatz Assmayer; (2) Carl Maria von Bocklet; (3) Leopold Eustache Czapek; (4) Carl Czerny; (5) Joseph Czerny; (6) Moritz Graf Dietrichstein¹; (7) Joseph Drechsler; (8) A. Emanuel Förster ('his last composition'); (9) Jakob Freystaedter; (10) Johann Gnsbacher; (11) Abbé Gelinek; (12) Anton Halm; (13) Joachim Hoffmann; (14) Johann Horzalks; (15) Joseph Hugelmann; (16) J. N. Hummel; (17) Anselm Hüttenbrenner; (18) Frederic Kalkbrenner ('written during his stay in Vienna'); (19) Friedrich August Kanne; (20) Joseph Kerkowsky; (21) Conradin Kreutzer; (22) Eduard Baron von Lanny; (23) M. J. Leisendorff; (24) Franz Liszt ('a boy of eleven years old, born in Hungary'); (25) Joseph Mayrder; (26) Ignatz Mouchelles; (27) Ignatz F. Edler von Mosel; (28) W. A. Mozart *fil.*; (29) Joseph Panny; (30) Hieronymus Payer; (31) J. P. Flix; (32) Wenzel Plachy; (33) Gotfried Rieger; (34) P. J. Rotté; (35) Franz Rozer; (36) Johann Schenk; (37) Frank Schoberlechner; (38) Franz Schubert; (39) Simon Sechter ('imitatio quasi Canon a tre voci'); (40) S. R. D.; (41) Abbé Stadler; (42) Joseph de Szalay; (43) Wenzel Tomaschek; (44) Michael Umlauf; (45) Fr. Dionysius Weber; (46) Franz Weber; (47) Ch. A. de Winkler; (48) Franz Weiss; (49) Johann Wittasek; (50) J. H. Worzschek.

A long coda by Carl Czerny is appended to the variations. The MS. of Schubert's variation, No. 38, which is in the Imperial Library of Vienna, bears the date Mar. 1821. According to this the later date given by Schindler for the inception of the plan must be incorrect.

M. F.

VAUCORBEIL, AUGUSTE EMMANUEL (real name, VEAUORBEILLE) (b. Rouen, Dec. 15, 1821; d. Nov. 2, 1884), composer, was the son of an actor long a favourite at the Gymnase under the name of Ferville.

Vaucorbeil entered the Paris Conservatoire in 1835, where he was patronised by Queen Marie Amélie, who made him an allowance. Here he studied seven years, Dourlen being his master for harmony, while Cherubini gave him some advice on composition. He took the second solfeggio prize in 1838. His first publication was twenty-two songs, of which 'Simple Chanson' had some success at the time. His chamber music—two string quartets, some sonatas for PF. and violin, and one for viola, and two suites for PF.—was well spoken of by J. d'Ortigue in the *Journal des Débats*. He wrote a three-act opéra-comique, 'La Bataille d'Amour' (Apr. 13, 1863), and a *scena* with chorus, 'La Mort de Diane,' sung by Mme. Krauss at a Conservatoire concert (1870). Of an unpublished opera, 'Mahomet,' we know only some fragments played in 1877, but, as far as we can judge, the qualities required for success on the stage were not possessed by Vaucorbeil. In 1871 he became professor of vocal ensemble at the Conservatoire, and in 1872 accepted the post of Government commissary of the subsidised theatres. In 1878 he

obtained the title of Inspector des Beaux-Arts, and soon after was made director of the Opéra for seven years, entering on his functions by agreement with Halanzier, July 16, 1879.

G. C.; rev. M. L. P.

VAUDEVILLE, a French word, which has had successively four meanings: (1) a popular song, generally satirical; (2) couplets inserted in a play; (3) the play itself; and lastly (4) a theatre for plays of this kind, with songs. Most etymologists derive the word from Vaux de Vire, the name given to songs sung in the valleys (*vauz*) near Vire by a certain fuller and song-writer named Olivier Basselin, who was probably born at Vire at the end of the 14th or beginning of the 15th century. His songs were collected and published in 1610 by an *avocat* named Jean le Houx.² They contain such lines as these:

'Faisant l'amour, je ne saurais rien dire
Ni rien chanter, sinon un *vau de vire*.'

Others³ maintain that vaudeville comes from *voix de ville*, quoting as their authority the 'Recueil des plus belles et excellentes chansons en forme de voix de villes' (Paris, 1575) by Jean Chardavoine, a musician of Anjou, but we, with Ménage, prefer the former derivation. It is at any rate certain that the word 'vaudeville' was employed by writers in the 16th century to denote a song sung about the town, with a catching tune. Many lampoons, such as the *Mazarinades*, are vaudevilles. The word was used in this sense for some time, as is evident from a passage from Rousseau's *Confessions*;

'A complete collection of the vaudevilles of the court and of Paris for over fifty years, contains a host of anecdotes which might be sought in vain elsewhere, and supplies materials for a history of France, such as no other nation could produce.'

It was about 1700 that the mere street-song passed into 'topical' verses in a dramatic piece. The plays at the fairs of St. Germain and St. Laurent contained vaudevilles, generally adapted to well-known tunes so as to ensure their immediate popularity. Occasionally fresh music was written for them, and the vaudevilles composed by Joseph Mouret (a Provençal, called by his contemporaries 'le musicien des Graces'), Gillier, Quinault the elder and Blavet had great success in their day.

The next step was to conclude the play with a *vaudeville finale*, in which each character sang a verse in turn. Of this Beaumarchais's *Mariage de Figaro* (1784) gives a well-known example.

The rage for vaudevilles gave rise to pieces entirely in verse and parodies of operas, and largely contributed to the creation of the opéra-comique. To distinguish between these different

¹ The Graf Dietrichstein, mentioned under No. 6, was the leading aristocratic musician of the time. Schubert's 'Erikönig' is dedicated to him. The initials S. R. D. under No. 40 probably indicate the name of some other aristocratic amateur.

² The *Vaux de Vire* of Jean Le Houx of Vire were published in English by J. P. Mulrehead (London, 1875).

³ See Fénelon, *Biographie*, under 'Leroy,' p. 280b.

classes of pieces the name *comédies à ariettes* was given to what are now called *opéras-comiques*, and the others became successively '*pièces en vaudevilles*,' '*comédies mêlées de vaudevilles*,' then '*comédies vaudevilles*' and finally '*vaudevilles*.'

It is thus evident that the word would afford material for a book embracing some most curious chapters in the history of French dramatic literature; for the vaudeville includes all styles—the comedy of intrigue, scenes of domestic life, village pieces, *tableaux* of passing events, parodies and so forth. It was therefore natural that from having found a home wherever it could, it should at last have a special house erected for it. The Théâtre du Vaudeville was built in 1792, on the site of a dancing-saloon called 'Vauxhall d'hiver' or the 'Petit Panthéon,' between the Rue de Chartres and the Rue St. Thomas du Louvre, on the site of the Hôtel Rambouillet and on ground now occupied by the Galerie Septentrionale, and by a part of the new court of the Louvre. This theatre was burnt down in 1838, when the company removed to the Théâtre des Nouveautés, in the Place de la Bourse. This new Théâtre du Vaudeville having disappeared in its turn was replaced by the house in the Boulevard des Capucines, at the corner of the Rue de la Chaussée d'Antin. We cannot enumerate here the authors who have contributed to its success; suffice it to say that *vaudeville*, born so to speak simultaneously with the French Revolution, crystallised into one of the most characteristic forms of the old French '*esprit*'; that later, as has been justly remarked, it launched boldly into all the speculations of modern thought, from the historic plays of Ancelot and Rozier, and the Aristophanes satires of 1848, down to the works—as remarkable for variety as for intense realism—of Émile Augier, Dumas fils, Théodore Barrière, Octave Feuillet, Georges Sand and Victorien Sardou.

This last period, so interesting from a literary and philosophical point of view, is, musically, wellnigh barren, while the early days of vaudeville were enlivened by the flowing and charming inspirations of Chardin (or Chardiny) and Wecht, Doche (father and son), Henri Blanchard and others less known. Most of the vaudevilles composed by these musicians are to be found in '*La Clé du caveau*' (1st ed., 1807; 4th and most complete, 1872). The airs are in notation without accompaniment. In the library of the Paris Conservatoire is a MS. collection of vaudevilles in eighteen volumes, with an index, made by Henri Blanchard. These have an accompaniment for four strings.

The *comédie vaudeville* or vaudeville proper has now been abandoned for the *comédie de genre*, but it is not improbable that it may be revived. At any rate the couplet is not likely

to die in a land where, as Beaumarchais said, everything ends with a song. Since his day manners in France have, it is true, greatly changed, but the taste for light, amusing, satirical verses with a catching refrain remains, and is likely to remain. Unfortunately the vaudeville, in the old sense of the word, has taken refuge in the *café concerts*, where the music is generally indifferent and the words poor, if not objectionable. Occasionally in the *revues* at the small Paris theatres a smart and witty vaudeville may still be heard. G. C.

VAUGHAN, THOMAS (b. Norwich, 1782; d. Birmingham, Jan. 9, 1843), tenor singer, was a chorister of Norwich Cathedral under Dr. BECKWITH (*q.v.*). In June 1799 he was elected a lay-clerk of St. George's Chapel, Windsor. On May 28, 1803, he was admitted a gentleman of the Chapel Royal, and about the same time obtained the appointments of vicar-choral of St. Paul's and lay-vicar of Westminster Abbey. In Mar. 1806 he resigned his place at Windsor and in the same year married Miss Tennant, who had appeared as a soprano singer about 1797, and from 1800 had sung at the Concert of Ancient Music and the provincial festivals, for some years occupying a good position. In 1813 Vaughan was chosen to succeed Samuel HARRISON (*q.v.*) as principal tenor at the Concert of Ancient Music and the provincial festivals, which position he occupied for more than a quarter of a century. His voice was a genuine tenor, the deficiency of natural power in which was concealed by purity of tone, great distinctness of pronunciation and faultlessness of intonation. Vaughan sang the tenor part in Beethoven's Ninth Symphony on its production by the Philharmonic Society, London, Mar. 21, 1825. He was buried Jan. 17, 1843, in the west cloister of Westminster Abbey.

W. H. H.

VAUGHAN WILLIAMS, RALPH (b. Down Ampney, Gloucestershire, Oct. 12, 1872), composer, son of the Rev. Arthur Vaughan Williams, was educated at Charterhouse (1887–1890) and Trinity College, Cambridge (1892–1895).

The two years between school and university (1890–92) were spent in musical study at the R.C.M. Vaughan Williams took the degree of B.Mus. at Cambridge while still an undergraduate (1894), and returned to the R.C.M. for further study, 1895–96. Composition was always his main object; he studied with Charles Wood at Cambridge and with Parry and Stanford at the R.C.M. He also learnt the organ from Alan Gray at Cambridge and Parratt at the R.C.M., and the piano, merely as a necessary acquisition, from other teachers at the R.C.M. The piano has indeed had as little influence on his output as it is possible

for that all-pervading instrument to have on a composer of to-day. The organ has had a little more; he held an organistship (South Lambeth Church) for three years after leaving the R.C.M., but they were not years in which he was shut up to the organ loft, for during part of that time he was in Berlin studying at the Akademie der Künste and taking composition lessons from Max Bruch. The organistship may have shown Vaughan Williams how great was the need for a fine tune to Bishop Walsham How's hymn 'For all the Saints.' Certainly it contributed some valuable experiences when at a later date (1905-06) he undertook the musical editorship of 'The English Hymnal.' His 'Sine Nomine'¹ written for that work is one of the noblest melodies of English hymnody. Amongst his published compositions are 'Three preludes for organ, founded on Welsh Tunes,' and certain other organ works of his have been played from MS. Their style, however, does not suggest that they are the outcome of a close practical acquaintance with the instrument.

The fact that he was not faced with the immediate necessity for earning a living may have retarded his development or have made it possible. He was not forced to equip himself quickly with a serviceable technique either as composer or performer. At the R.C.M. he belonged to a generation which included Coleridge Taylor, William Hurlstone and Gustav Holst, and his compositions there certainly made less mark than those of these contemporaries. He visited Bayreuth in 1896 and there heard Wagner practically for the first time. After he left the R.C.M. he was comparatively free to extend his period of studentship according to inclination and for a time he undertook little in the way of executive work beyond the organistship already mentioned and some lecturing on music for the University Extension. He was profoundly dissatisfied with his own efforts as a composer, and most of his work of that time has been withdrawn or withheld from publication. He found that the music he had been taught alike in England and in Germany did not enable him to say what he wanted to say. He took his D.Mus. degree at Cambridge in 1901; the fact may be named as marking the end of his scholastic career.

At about that time he began to discover the language of the English folk-song and to make it his own. He was not an original member of the FOLK-SONG SOCIETY (*q.v.*) founded in 1899, but he joined it in 1904. His own songs written at about that time, of which 'Linden Lee' is typical, show clearly the modal and rhythmic influences of the folk-song. But more than that, from the folk-song has sprung that style which Vaughan Williams has evolved for himself, a style in which vocal melodies are

woven in a polyphony which at times seems recklessly oblivious of harmonic consequences.

In No. 7 of the Folk-song Society's *Journal* there are, amongst many others, a number of tunes noted by Vaughan Williams at King's Lynn, Norfolk, in Jan. 1905. The result of these researches was something more practical than the recovery of half-forgotten melodies and their bestowal in an antiquarian pigeon-hole. On his folk-song excursions Vaughan Williams lived in the country and among the people. The orchestral 'Impression,' 'In the Fen Country,' and the three 'Norfolk Rhapsodies' for orchestra were the result. The latter take their thematic material from some of the finest and most diversified of the folk-tunes he gathered, but whereas in many essays of a similar kind by his contemporaries the tunes have the character of quotations amongst more or less extraneous matter, in Vaughan Williams's rhapsodies the idiom of the tunes chosen permeates the whole melodic outline, and decides the harmonic structure. 'In the Fen Country' claims no folk-song origin; it is the first of many works, of which the 'Pastoral' symphony (1922) is the greatest example, in which Vaughan Williams's creative power seems to have been set free by his converse with the folk-singer. He did not adopt the folk-song manner as a conscious nationalistic pose; he merely found at King's Lynn his own musical language, for which he had searched the schools of London and Berlin in vain.

A natural corollary to this was Vaughan Williams's interest and active participation in the spread of the COMPETITION FESTIVALS (*q.v.*) throughout the country. The Leith Hill (Dorking) Festival has been from its foundation under his personal care.² Started as a village institution it has grown into a four days' festival in which competition and practice lead to excellent performances by combined choirs and instrumentalists, but Vaughan Williams's horror of the sophistication by which excessive organisation destroys artistic impulse has kept it simple. In all his activities he has refused to be bound by material restrictions. The fact that a work of his own is published will not prevent his altering a passage, and if he writes a programme note³ to a new work his chief desire seems to be to avoid giving his hearers a cut and dried interpretation of his musical thought.

The successful production at the Leeds Festival (1907) of Vaughan Williams's first important work for choir and orchestra, 'Toward the Unknown Region,' inevitably brought him some of the responsibilities and trammels of publicity. He was marked down as a 'coming composer,' and 'A Sea Symphony,' at the

² There is no record of the Leith Hill festival in the Year Book (1925) of the British Federation of Musical Competition Festivals.

³ See his notes to 'Flos campi.' New Queen's Hall Orchestra Symphony Concert, Oct. 10, 1926.

next festival (1910) declared his arrival. The latter work, however, was not undertaken as successor to the former. The large-hearted aspiration and the rugged speech of Walt Whitman had captured his imagination at an earlier date. He made up his mind that Whitman was the poet for him, just as, when he first heard 'Bushes and Briars,' he had 'said to himself that that was the music for him.'¹ The setting of poems from *Leaves of Grass* had been in his mind at least from 1903, and the composition of 'A Sea Symphony' occupied some six years from that date. 'Toward the Unknown Region' may be regarded as an essay in the direction of the larger work and a comparison of it with the finale of the symphony called 'The Explorers,' shows at once the similarity of mood and aim. Two influences apart from those already named are discernible as concomitants in the individual style of these choral works; they are Purcell and Parry. Vaughan Williams had been editing the 'Welcome Odes' of the former for the PURCELL SOCIETY (*q.v.*) during the years of the Sea Symphony's gestation, and something of Purcell's declamatory directness is felt in the symphony, notably in the first baritone solo. Parry's manner of marshalling the choral masses in exuberant contrapuntal climaxes was in the blood of the Yorkshire festivals. Its presence here needs no accounting for.

Very different from the massive style of these choral works is the intimate cycle of six songs for tenor voice, string quartet, and PF., 'On Wenlock Edge' (from Housman's poems *A Shropshire Lad*) first sung by Gervase Elwes in London on Nov. 15, 1909. Its production followed a time spent by Vaughan Williams in Paris for the purpose of study with Maurice Ravel; consequently every one was prepared to find that his work had become 'Frenchified,' and many declared that they found what they expected, and attributed what was new in 'On Wenlock Edge' to Ravel. Never was a critical shaft more ill-directed. Abroad and in Paris itself this was the work which first called attention to Vaughan Williams as a new voice and a very English one. Its English qualities were only unrecognisable at first by Londoners, because they had forgotten their native musical language. Vaughan Williams's personal faith on the vexed question of nationality in art has been succinctly stated in an essay which he wrote for a students' magazine in 1912. There he took to task the British composer's acquisitiveness and condemned 'the desire to "do it too" whenever the newest thing comes over from abroad.'² His recourse to Ravel as a teacher had nothing to do with acquiring

Ravel's personal style for future reproduction. His self-criticism had told him while he was in the act of fashioning 'A Sea Symphony' that his own technique was still clumsy and inchoate. He went to the man whose suppleness of mind could help him to clear away what was stodgy and incommunicative in his own. He came back with his powers of expression clarified.

The works produced at a series of Three Choirs Festivals, that is to say the Fantasia on a theme by Tallis³ for strings (Gloucester 1910), the Five Mystical Songs (Herbert) for baritone solo,⁴ choir and orchestra (Worcester 1911) and the Fantasia on Christmas Carols also for baritone solo,⁵ choir and orchestra (Hereford 1912) are all fraught with that quality of inward reflection which marks Vaughan Williams's art as something distinct from the strident appeal to the senses so characteristic of most modern music, but his reflections are not detached from common life; it is indeed the common life which generates them. Even when he joins hands with George Herbert in the Mystical Songs his music assumes no pose of cloistral devotion; it remains homely like Herbert's verse.

The music to *The Wasps* of Aristophanes, from which an orchestral suite has been made and the overture from which has been much played, was a contribution to that free and easy presentation of Greek drama which is characteristic of the English Universities (see GREEK PLAYS, MUSIC TO). Incidentally it served to bring Vaughan Williams into touch with the requirements of the theatre. Two much larger works were to complete this period of his career as composer, his first purely orchestral symphony and his first opera. 'A London Symphony' received its first performance on Mar. 27, 1914, when it was conducted by Geoffrey Toye at one of a series of concerts given by F. B. Ellis (a keen amateur musician), for the purpose of bringing forward music, particularly native works, which the regular concert-giving institutions tended to neglect. Vaughan Williams was by this time in no way dependent for a hearing on such a special occasion as this, but he was heart and soul with the younger men, who indeed regarded him as a leader; he allowed his symphony to be produced in these conditions and under a comparatively untried conductor, preferring the enthusiasm of friends to the more public *réclame* which might have been secured elsewhere. The symphony was well played and well received, but no immediate repetition was called for, and it was not heard again until 1918 when Adrian Boult gave it with the London Symphony Orchestra. Its real life began with its publication by the Carnegie Trust, and by that time the

⁴ Sung by Campbell McInnes at the first performance.

⁵ *Ibid.*

composer had made very extensive alterations¹ in the score, cutting out the second trio of the scherzo and considerably condensing the finale.

The question has been raised as to how far 'A London Symphony' is to be regarded as 'programme' music, since the composer has claimed a purely subjective intention while including a number of objective details, such as the Westminster chimes, the cry of the lavender seller, the jingle of bells on a hansom cab, and the suggestion of a mouth organ or concertina. Without discussing the question here we may quote again from the article already alluded to a passage which seems to bear directly on the case.

'Have not we all about us forms of musical expression which we can take and purify and raise to the level of great art? For instance, the lilt of the chorus at a music-hall joining in a popular song, the children dancing to a barrel organ, the rousing fervour of a Salvation Army hymn, St. Paul's and a great choir singing in one of its festivals, the Welshmen striking up one of their own hymns whenever they win a goal at an international football match, the cries of the street pedlars, the factory girls singing their sentimental songs. Have all these nothing to say to us?'²

In 'A London Symphony' Vaughan Williams has shown how much such things have to say to him, while the work viewed from the formal side draws its strength from the balanced structure of the classical type (see SYMPHONY, p. 241).

The quotation may also serve to show why Vaughan Williams had the ambition to write an opera in which an English boxing-match was the central feature of the action. He found a sympathetic librettist in Harold Child, and 'Hugh the Drover,' a work brimming with the life of the English countryside, expressed in frank untiring melody,³ was the result. Composer and librettist worked together, and the published score describes it as 'a romantic ballad opera in two acts by Harold Child and R. Vaughan Williams.' Though mainly written and composed between 1911-14 it had to wait for completion, publication and presentation until after the war.

In 1914 Vaughan Williams, at the age of 42 entered the army as an orderly in the Territorial R.A.M.C. In this corps he served in Macedonia 1916-17, was recommended for a commission in the Artillery, and after a course in Heavy Gunners in England served in France through the campaign of 1918 as Lieutenant R.G.A. Besides the break in his personal career which these facts indicate, the change in musical conditions at home wrought by these years made his position on his return a very different one. He had been a leader of the young men and several of the best of his group

had been killed. The older generation of musicians, too, was passing away. Allen had succeeded Parry as Director of the Royal College of Music and was quick to secure Vaughan Williams as teacher of composition amongst the staff which had to be re-formed. He soon became a member of the Board of Professors there, and also succeeded Allen in 1920 as conductor of the London Bach choir. These activities he still (1927) pursues, and since the death of Cecil Sharp he has directed the music of the English Folk-dance Society.

In 1920 the first annual congress of the newly formed BRITISH MUSIC SOCIETY (*q.v.*) chose 'A London Symphony' as the chief native work for presentation, and a fine performance of it was given at Queen's Hall (May 4) under Albert Coates. In the gradual revival of the several provincial festivals Vaughan Williams's vocal works took a place of increasing importance, the 'Sea Symphony' especially. Continental musicians increased their knowledge of his music through its performances at the congresses of the INTERNATIONAL SOCIETY FOR CONTEMPORARY MUSIC (*q.v.*), and, moreover, several English conductors, Wood,⁴ Boult, Coates and others, gave it in their programmes in various continental cities. The first new work of first-rate importance to appear was the 'Pastoral Symphony,' given under Adrian Boult by the Royal Philharmonic Society (Queen's Hall, Jan. 26, 1922). In the following year Vaughan Williams accepted the invitation of Mr. Stoechel to visit America and produce this symphony at the Norfolk Conn. Festival.

The opera 'Hugh the Drover' was taken up by the R.C.M., which undertook the cost of publication and its production in the theatre equipped by the Council in memory of Parry. It was given there in a series of 'dress rehearsals' in July 1924, and while the preparation of these was in progress the British National Opera Company decided on its public presentation, and brought it out (His Majesty's Theatre, July 14, 1924) aided by facilities offered by the R.C.M. Since then the B.N.O.C. has performed it in most of the larger cities of Great Britain in which the company tours.

Previously (1922) the R.C.M. had produced on its own stage another operatic essay, 'The Shepherds of the Delectable Mountains,' a scene from the *Pilgrim's Progress*, which may be grouped with the 'Pastoral Symphony,' and the splendid Mass in G minor *a cappella* (first performed by R. R. Terry at Westminster Cathedral in 1923)⁵ as representative of Vaughan Williams's mind in composition after the break which the war had caused. 'The Shepherds' is

¹ The original version was analysed by G. S. Kaye Butterworth in a programme note to the first performance. The published score is dedicated to his memory.

² *R.O.M. Magazine*, vol. 9, No. 1.

³ There are allusions to nine traditional tunes in 'Hugh the Drover.' Most of them are no more than allusions, and all are quite subsidiary to the purely original music.

⁴ Sir Henry Wood gave 'A London Symphony' in his programmes of the 'Bowl' concerts in California, 1924-25.

⁵ At Westminster it was sung liturgically. The Mass has been frequently heard in concert performance. It has been given at Leipzig in the Thomas-Kirche by STRAUSS (*q.v.*).

no 'opera' in the generally received sense of the term; it is a dialogue *en tableau*. Were it not for its stage setting it might have been called an oratorio with at least as much appropriateness as attaches to the use of that term in connexion with 'Sancta Civitas,' Vaughan Williams's latest (1925) work for solo voices, choir and orchestra. The two are indeed alike in their subject-matter, since it is the far-off vision of the Holy City as the Pilgrim approaches which gives the chief occasion for music to 'The Shepherds of the Delectable Mountains.' The choice of subjects for these works ('Sancta Civitas' is the Apocalyptic vision) and the general tone and manner of the treatment shows the deepening of that mystical side of Vaughan Williams's nature manifested earlier in the Herbert songs and in the Tallis Fantasia. But all these works, and not least the 'Pastoral Symphony' which had no literary subject and is purely orchestral,¹ show a style matured, unified and in a sense simplified. It may be that certain harmonic devices, the parallel fifths and 'false relations,' are inclined sometimes to stiffen into mannerisms. But such incidents apart, it is the very personal quality of all this music which gives it its peculiar eloquence. The suggestions from without, the influences of folk-song and of modal polyphony, have become assimilated, and each work as it appears shows something more of the man. Moreover, to place side by side such contrasted works as 'The Shepherds' and the ballet 'Old King Cole' is to realise at once to what diverse purposes of seriousness and of fun the Vaughan Williams idiom is amenable.² This is not the place for analysis³ nor, happily, has the time come for a summary of Vaughan Williams's output. Of the latest phase of his art, however, including the strangely attractive suite 'Flos campi' for viola, voices and orchestra, and the 'Concerto Académico,' a thoroughly unacademic work for violin and orchestra, it may be said that it is the fulfilment of the earlier; it holds the attention in a distracted age as the work of one who has admitted no distraction from his course, and who steers 'for the deep waters only.'

Works by Vaughan Williams, including particulars of first productions:

CHORAL

- 'Toward the Unknown Region' (Whitman). (Leeds Fest., 1907.)
- 'Willow Wood' (Rossett). Baritone solo, women's voices, orch. (Comp. 1903, Mus. League Fest., Liverpool, 1909.)
- 'A Sea Symphony' (Whitman). Sop. and baritone soli, ch. and orch. (Leeds Fest., 1910.)
- Five Mystical Songs (Herbert). Baritone solo, ch. and orch. (Worcester Fest., 1911.)
- Fantasia on Christmas Carols. Baritone solo, ch. and orch. (Hereford Fest., 1912.)

¹ There is a sort of chant or cantillation for soprano or tenor voice in the finale which may be played alternatively on the clarinet.

² These two works were given together in the operatic performances organised by Napier Miles (q.v.) in the Theatre Royal, Bristol, Oct. 1926.

³ An analytical study of the 'Pastoral Symphony' by Herbert Howells will be found in *Music and Letters*, vol. III, No. 2.

- Motets, 'O Praise the Lord.' Double choir. (London Church Choirs Ass., St. Paul's Cathedral, 1913.)
- 'O clap your hands.' Ch., brass and organ.
- 'Lord, Thou hast been our refuge.' Ch., semi-ch., orch. (or organ). Mass in G minor. (Westminster Cathedral, 1923.)
- 'Sancta Civitas' (The Holy City), an oratorio. Words from the Authorized Version, with additions from Taverner's Bible and other sources. Ten. and baritone soli, ch., semi-ch. and orch. (Oxford, May 7, 1926, and in London by the Bach Choir, June 9, 1926.)
- Partsongs, choral arrangements of English folk-songs, carols, etc.

ORCHESTRAL

- Serenade. Small orch. (Bournemouth, 1901.)
- Bucolic Suite. (Bournemouth, 1902.)
- Two Orchestral Impressions: (1) 'Harnham Down'; (2) 'Boldrewood.' (Queen's Hall, 1907.)
- Three Norfolk Rhapsodies: No. 1 (Queen's Hall Promenade, 1906); Nos. 2 and 3 (Cardiff Fest. 1907.)
- Symphonic Impression, 'In the Fen Country.' Fantasia on a Theme by Tallis. Strings. (Queen's Hall, Beecham, 1909; Gloucester Fest., 1910.)
- 'A London Symphony.' (G. Toye, Queen's Hall, 1914; rev. version, B.M.S., A. Coates conducting, Queen's Hall, May 4, 1920.)
- 'The Lark ascending.' Romance. Vln. and orch. (Comp. 1914, first perf. B.M.S., vln. Marie Hall, A. Boulton conducting, Queen's Hall, June 14, 1921.)
- 'A Pastoral Symphony.' (R. Philh., A. Boulton, Queen's Hall, Jan. 26, 1922.)
- Suite, 'Flos campi.' Viola solo, small orch., including voices. (Queen's Hall, Terlie vln. Wood conducting, Oct. 10, 1925.)
- Concerto Académico. Vln. and orch. (Aeolian Hall, vln. Jelly D'Aranyi, Anthony Bernard conducting, Nov. 6, 1925.)

STAGE WORKS

- Choruses and Incidental Music to *Paris Anniversary* (Ben Jonson) (Stratford-on-Avon, 1905.)
- Incidental Music, *The Wasps* (Aristophanes). (Cambridge, 1909.)
- 'The Shepherds of the Delectable Mountains,' a scene from *The Pilgrim's Progress*, set as an opera in one act. (R.C.M., 1922.)
- Ballet. 'Old King Cole.' (Cambridge, 1923.)
- 'Hugh the Drover,' ballet opera in 2 acts, libretto by Harold Child (Comp. 1911-14, produced privately B.C.M. 1924, in public by B.N.O.C., M. Sargent conducting, His Majesty's Theatre, London, July 14, 1924.)

CHAMBER MUSIC

- Quintet, PF. and strings in C minor.
- Quartet for strings in G minor.
- Fantasy Quintet for strings.

- 'On Wenlock Edge' (Housman, *A Shropshire Lad*). A cycle of songs for tenor voice, string quartet, and PF. (London, 1909.)
- 'Four Hymns' for tenor voice and stringed orch. or PF. with viola obb. (Worcester Fest., 1920.)
- Many songs, including 'The House of Life' (6 sonnets of Rossetti); 'Songs of Travel' (Stevenson), two vols.; three Rondels, 'Merciless Beauties.' G.

VAUTOR, THOMAS, one of the latest of the English madrigal composers, published in 1619:

- 'The First Set: Being Songs of diuers Ayres and Natures, of Flute and Six parts: Apt for *Vols* and *Voyces* . . . London; Printed by Thomas Stadenham, for Matthew Lowmes and John Browne.'

In the Dedication to George Villiers, Marquess (afterwards Duke) of Buckingham, the composer tells his patron that he was

'an individuall appendant of your . . . noble Mothers house and name,'

and says of his songs that

'some were composed in your tender yeares, and in your most worthy Fathers house, (from whom, and your most honourable Mother, for many yeares, I received part of my meanes and liuelyhoode).'

From this it seems that Vautor must have been a domestic musician in the house of Sir George Villiers (the father of Buckingham) and his wife. She was Mary, daughter of Anthony Beaumont of Glenfield, Leicestershire, and before her marriage had been a waiting-woman in the household of her cousin, Lady Beaumont (of Cole Orton); another member of which branch of the Beaumont family was Sir Thomas Beaumont of Stoughton (d. 1614); his death is celebrated by Vautor in

'An Elegie, on the death of his right worshipfull Master, Sir Thomas Beaumont, Knight, of Stoughton in Leicestershire.'

Sir George Villiers died in 1606, and after his

death Lady Villiers lived with her sons at Goadby, a village in the north-eastern corner of the county: this connexion with both Stoughton and Goadby entitles Vautor to be regarded as a Leicestershire musician. The only other biographical details that are known about him are that on May 11, 1616, he was dispensed for not hearing the lectures of the 'praelector musicae' at Oxford, 'being in practice in the country' and that on the same day he supplicated for the degree of Bachelor of Music, being described as of Lincoln College. His request was granted by grace, on the condition that he should compose 'hymnum choralem sex partium'; he was admitted Mus.B. on July 4, 1616.

So far, no music by Vautor has been discovered except the work published in 1619, which is one of the rarest music-books of the early 17th century. It is reprinted in *ENGLISH MADRIGAL SCHOOL*, vol. xxxiv. The compositions contained in it show a curious striving after originality, displayed not only in the selection of the words set, but also in a fondness for various musical devices peculiar to the composer. The last number in the collection, the great six-part madrigal 'Shepherds and Nymphs of Diana' is a direct imitation in its words of the 'Oriana' madrigals published eighteen years earlier, while its music echoes, not unsuccessfully, the style of Wilbye. But probably the real Vautor may be better detected in the five-part 'Sweet Suffolk Owle' and the Latin 'Mira cano,' with its curious effects of full chords repeated ten times in succession. Though he was evidently far below the greater English musicians of his day, Vautor is an interesting figure, and deserves to be better known.

W. B. S.

VAUTROLIER, THOMAS (*d.* before Mar. 1587), an early printer, who printed several music-books in England during Elizabeth's reign. He was a Huguenot, came from either Paris or Rouen, and settled in London about 1564, although his first book is dated 1570. His printing-office was at Blackfriars, and his wife appears to have greatly assisted him in his business; for, leaving her in charge of his affairs, he went to Edinburgh, and traded there as a bookseller. After his return he again went to Scotland and established a press at Edinburgh in 1584. In 1586 he came back to London and died shortly before March 1587.

According to Johnson's *Typographia*, 1824, Vautrollier printed, in octavo, *A Brief Introduction to Musick*. Another book bearing his imprint is 'Cantiones quae argumento Sacrae Vocantur, quinque et sex partium,' by Tallis and Byrd. This beautifully printed music-book is in oblong 8vo, and dated 1575. It contains at the end of the book the full text of the patent of music-printing granted to Tallis and Byrd. Besides the copy in the British Museum,

there is one in the York Minster library. With the date 1587 there were two editions of the 'Psalmes of David in metre,' printed by Vautrollier, or his wife.

F. K.

VAUXHALL GARDENS. In 1615 one Jane Vaux, widow of John Vaux, was tenant, as a copyholder of the manor of Kennington, of a tenement situate near to the Thames. About 1660 this house, with the grounds attached to it, was opened as a place of public entertainment. The earliest mention of it as such is in Evelyn's Diary, under date July 2, 1661: 'I went to see the New Spring Garden at Lambeth, a pretty contrived plantation.' Pepys at later dates frequently mentions it, and from him we learn that there was an older place of the same name and description in the neighbourhood. On May 29, 1662, he says,

'With my wife and the two maids and the boy took boat and to Fox-hall. . . . To the old Spring Garden. . . . Thence to the new one, where I never was before, which much exceeds the other.'

The musical entertainment appears to have been of the most primitive description. Pepys (May 28, 1667) says,

'By water to Fox-hall and there walked in Spring Garden. . . . But to hear the nightingale and other birds, and here fiddles, and there a harp, and here a Jew's trumpet, and here laughing and there fine people walking, is mighty diverting.'

Addison, in *The Spectator*, mentions the place as much resorted to. In 1730 Jonathan Tyers obtained a lease of it and opened it June 7, 1732, with an entertainment termed a 'Ridotto al fresco,' then a novelty in England, which was attended by about 400 persons. This became very attractive, and was frequently repeated in that and following seasons; and the success attending it induced Tyers to open the Gardens in 1736 every evening during the summer. He erected a large covered orchestra, closed at the back and sides, with the front open to the Gardens, and engaged a good band. Along the sides of the quadrangle in which the orchestra stood were placed covered boxes, open at the front, in which the company could sit and sup or take refreshments. These boxes were adorned with paintings by Hayman from designs by Hogarth. There was also a rotunda in which the concert was given in bad weather.

In 1737 an organ was erected in the orchestra in the Gardens, and James WORGAN (*q.v.*) appointed organist. An organ concerto formed, for a long series of years, a prominent feature in the concerts. On the opening of the Gardens on May 1, 1738, Roubiliac's statue of Handel (expressly commissioned by Tyers), was first exhibited.² In 1745 Tyers increased the

¹ See JEW'S HARP.

² This statue remained in the Gardens, in various situations, sometimes in the open air and sometimes under cover, until 1818, when it was removed to the house of the Rev. Jonathan Tyers Barrett, D.D. (to whom the property in the Gardens had devolved, and who then contemplated a sale of it), in Duke Street, Westminster, where it remained until his death. It was purchased at auction in 1839 by Brown, a statuary, who in 1864 sold it to the Sacred Harmonic Society. It now (1928) decorates the staircase of the business premises of Novello (160 Wardour Street).

orchestra and introduced instrumental solos; Arne was engaged as composer, and Mrs. Arne, Reinhold and Lowe as singers. Richard Collet led the band, Hebden played the bassoon, Valentine Snow the trumpet and Thomas Vincent the oboe. In 1749 Tyers adroitly managed, by offering the loan of all his lanterns, lamps, etc., and the assistance of thirty of his servants at the display of fireworks in the Green Park on the rejoicings for the peace of Aix-la-Chapelle, to obtain permission to have the music composed by Handel for that occasion publicly rehearsed in Vauxhall, before its performance in the Green Park. The rehearsal took place on Friday, Apr. 21, by a band of 100 performers, before an audience of 12,000 persons admitted by 2s. 6d. tickets. The throng of carriages was so great that the traffic over London Bridge (then the only metropolitan road between Middlesex and Surrey) was stopped for nearly three hours. After Lowe withdrew, Vernon was the principal tenor singer. On the death of Jonathan Tyers in 1767 he was succeeded in the management by his two sons, one of whom, Thomas, who had written the words of many songs for the Gardens, soon afterwards sold his interest in the place to his brother's family.

In 1774 Hook (*q.v.*) was engaged as organist and composer, and held these appointments until 1820. In his time the singers were Mrs. Martyr, Mrs. Wrighten, Mrs. Weichsell, Miss Poole (Mrs. Dickons), Miss Leary, Mrs. Mountain, Mrs. Bland (probably the most universally favourite female singer who ever appeared in the Gardens), Miss Tunstall, Miss Povey, Vernon, Incedon, Dignum, Charles Taylor, Collyer, Mahon, etc. etc. Parke, the oboist, was for many years the principal solo instrumentalist. On May 29, 1786, the Gardens were opened for the season, for the first time under the name 'Vauxhall Gardens' (the old name of 'Spring Garden' having been continued up to that time), with a jubilee performance in commemoration of their first nightly opening by Tyers fifty years before. In 1798 fireworks were occasionally introduced, and afterwards became one of the permanent attractions of the place. The favour shown by the Prince of Wales (afterwards George IV.), made the Gardens the resort of the fashionable world, and the galas given during the Regency, on the occasions and the anniversaries of the several victories over Napoleon, attracted immense numbers of persons. During that period the prosperity of the establishment culminated. In 1815 the celebrated performer on the tight rope, Madame Saqui, appeared, and excited universal astonishment by her ascent on the rope to the summit of the firework tower (60 feet high), during the pyrotechnic display. She continued one of the principal attractions of the Gardens for many years.

In 1818, the Gardens having become the property of the Rev. Dr. Jon. Tyres Barrett, who deemed the receipt of an income from them inconsistent with his sacred calling, they were submitted to auction (on Apr. 11), but bought in. In 1822, however, they passed into the hands of Bish, Gye and Hughes. Great changes then took place in the character of the entertainments; and a theatre was erected, in which at first ballets, and afterwards vaudevilles, were performed. The concert, however, was retained as a leading feature, and in 1823 the singers were Miss Tunstall, Miss Noel, Miss Melville, Goulden, Collyer, Clark and Master Longhurst. In 1826 Miss Stephens, Mme. Vestris, Braham, Sinclair, De Begnis, etc., were engaged. In 1827 horsemanship was introduced and a mimic representation of the Battle of Waterloo (which proved attractive for several seasons), given on the firework ground. Miss Graddon, T. Phillips, Horn and Mr. and Mrs. Fitzwilliam were the singers, and Blewitt, T. Cooke and Horn the composers. In 1828 Blewitt, T. Cooke and R. Hughes were the composers, and Misses Helme, Knight and Coveney, Benson, Williams and Tinney the singers. In 1829 Rossini's 'Il Barbiere di Siviglia' was performed in the theatre by Miss Fanny Ayton, Mesdames Castelli and De Angioli, and Signori Torri, Giubilei, De Angioli and Pellegrini; the orchestral concert being supported by Misses Helme and P. Horton (afterwards Mrs. German Reed), George Robinson, W. H. Williams and George Smith; Blewitt and T. Cooke continuing as composers.

In 1830 Bishop was placed at the head of the musical department, and continued so for three years. He produced during that period the vaudevilles of 'Under the Oak,' and 'Adelaide, or the Royal William,' 1830; 'The Magic Fan,' 'The Sedan Chair,' and 'The Battle of Champagne,' 1832, and many single songs, amongst which was the still popular ballad, 'My pretty Jane,' written for the sweet-toned alto voice of George Robinson. His singers included Miss Hughes and Mrs. Waylett. Balloon ascents formed a main feature of the attractions a few years later. As far back as 1802 Garnerin had made an ascent from the Gardens, but that was an isolated case. In 1835 Charles Green ascended and remained in the air all night. On Nov. 7, 1836, Green, Monck Mason and Holland ascended in the large balloon, afterwards known as the 'Nassau,' and descended next morning near Coblenz, having travelled nearly 500 miles in eighteen hours. In July 1837 Green ascended, with Cocking attached in a parachute beneath the balloon, when the latter was killed in his descent by the failure of his machinery. The Gardens now rapidly declined. In 1840 an attempt was made to sell them, but they were bought in at £20,000.

In 1843 they were under the management of Wardell; masquerades, frequented by the most disreputable classes of the community, were given; matters grew worse and worse, until in 1855 they came into the hands of Edward Tyrrell Smith, and reached their lowest depth of degradation. The musical arrangements were beneath contempt; a platform for promiscuous dancing was laid down; and everything lowered in quality. They were not afterwards regularly opened, but speculators were forthcoming who ventured to give entertainments for a few nights in each year, 'for positively the last nights,' until 1859, when the theatre, orchestra, and all the fittings were sold by auction. On July 25 in that year the trees were felled and the site handed over to builders. Vauxhall Gardens had a longer existence than any public gardens in England, and assisted in maintaining a taste for music as a source of rational enjoyment, although they did little or nothing towards promoting its advancement.

W. H. H.

Arne and Worgan seem to have begun the practice of publishing books of songs sung at Vauxhall about 1750; they were followed by Walsh and Johnson. James Hook issued one or two books annually from 1769 till early in the 19th century; they were published successively by Welcker, Thomson, Preston, Bland & Weller and Dale. On Bland & Weller's issues are pretty vignettes of the gardens. Other views are in Bickham's 'Musical Entertainer,' and several are reproduced in Wroth's *London Pleasure Gardens*, 1896.

F. K.

VECCHI, GIUSEPPE, was a Papal singer, and maestro di cappella in 1683.

VECCHI, LORENZO (b. Bologna, 1566), received his scientific and musical education as *alumnus* of St. Petronio, where he was 'missionarius' and maestro di cappella in 1605, when he published his first book of masses, 8 v. Two pieces by him are contained in Lucino's 'Le gemme'; and a Requiem, 5 v., as well as a Sanctus, Agnus and Postcommunio, all in MS., are in the library of Augsburg Cathedral.

E. v. d. s.

VECCHI (VECCHI), ORAZIO¹ (b. ? Modena c. 1551; d. there, Feb. 19, 1605), became the pupil of a monk named Salvatore Essenga, who was himself not unknown as a composer, and who published a volume of 'Madrigali,' containing a piece (doubtless his first essay) by Vecchi, in 1566.

The latter entered holy orders and was made first, in 1586, canon, and then, five years later, archdeacon, of Correggio. Soon afterwards, however, he seems to have deserted his office in order to live at his native town; and

by Apr. 1595 he was punished for his non-residence by being deprived of his canonry. Possibly the real reason of his absence or of his deprivation, or both, was the singular excitability and quarrelsomeness of his disposition, of which several stories are told. Be this as it may, in Oct. 1596 he was made maestro di cappella of Modena Cathedral; and two years later received the same post in the court, in which capacity he had not only to act as music-master to the ducal family, but also to furnish all sorts of music for solemn and festival occasions, grand mascarades, etc. Through this connexion his reputation extended widely. He was summoned at one time to the court of the Emperor Rudolf II.; at another he was requested to compose some particular music for the King of Poland. In 1604 he was supplanted in his office by the intrigue of a pupil, Geminiano Capi-Lupi; and within a year he died, it is said, of mortification at his ill-treatment.

Among Orazio's writings the work which calls for special notice, and which gives him an important place in the history of music, is his 'Amfiparnasso, commedia harmonica,' which was produced at Modena in 1594 and published at Venice three years later. The 'Amfiparnasso' has been claimed as the first example of a real opera, but on insufficient grounds. It is an attempt to translate into music the 'commedia dell' arte,' the characteristic figures of which (Pantalone, Arlecchino, Brighella, the Dottor Graziano, etc.) were to be seen at every village fair in North Italy, during the 16th and 17th centuries. The work is a series of madrigals, grouped in three acts and preceded by a prologue, in which it is clearly and unmistakably stated that the work is intended to appeal to the ear only, and not to the eye. The lines

'Ma voi sappiat' intanto
Che questo di cui parlo
Spettacolo si mira con la mente
Dov' entra per l' orecchie, e non per gl' occhi,'

are proof positive that it was never intended to be acted, even in dumb show, as has generally been suggested. The characters of the comedy would be as well known to an Italian audience as Punch and Judy are to English children, and the various dialects employed would differentiate the characters at once, especially as Vecchi has represented their characteristic rhythms and cadences in his music with great skill. The 'Amfiparnasso,' although deservedly ranked as a masterpiece, is by no means the first attempt in this style. Orlando Lassus had already treated the same subject on a smaller scale, and Striggio's 'Cicalamento delle Donne al Bucato' appeared as early as 1567. For a complete analysis of the 'Amfiparnasso' see the *Monthly Musical Record* for Mar. and Apr. 1906. Specimens of Vecchi's madrigals are in the second volume of Torchi's

¹ Orazio's separate compositions are indexed in Eitner's *Bibliographie des xvi. und xvii. Jahrhunderte*, pp. 890-895; they consist of sixty-two Italian and forty-four Latin numbers; besides forty-two (in German collections) with German words, many of which are presumably identical with compositions differently entitled in Italian or Latin.

'L'arte musicale in Italia,' and the third of 'Arion.'

R. L. F.; addns. E. J. D.

'Amfiparnasso' has been reprinted by Eitner in 'Die Oper,' and by Torchi, 'L'arte musicale,' vol. iv. The madrigal publications of Vecchi's lifetime include

Four books of Canzonettes. (4 v.) 1580, etc.
A book of Madrigals. (6 and 7 v.) 1583.
A book of Madrigals. (5 v.) 1589.
'Selva di varia recreatione.' 1590.
Two books of Canzonettes. (3 v.) 1597.
'Convito musicale.' (2-8 v.) 1597.
'Le veglie di Siena.' (4-6 v.) 1604.
Lamentations.
Motets, Masses. (See List in Q.-L.)

BIBL.—JOHANNES HOL, *Horatio Vecchi als weltlicher Komponist; Part I, Vecchi's Leben.* (Basle Dissertation, 1917.)

VECCHI, ORFEO (*b.* Milan c. 1540; *d.* there, before 1604), an important and prolific church composer, and maestro di cappella of the church of Santa Maria della Scala (from which the famous Scala theatre received its name). Apart from some 5-part madrigals which appeared in 1604 in 'Scielata di madrigali,' and are the only secular music known to be by him, his published works are a Mass, Vesper Psalms, Magnificat, motet, etc., and fauxbourdons, 8 v. (1590); 3 books of 5-part masses (1588, 1598, 1602); 1 book of Psalms, 2 Magnificats, 4 antiphons, and fauxbourdons, 5 v. (1596); motets, 5 v., book 2 (1598); motets and other excellent pieces, 5 v., book 1 (1599; other edition, 1603); motets, 6 v., book 3 (1598); the complete Psalms, 5 v. (1598), another edition with 2 Magnificats, fauxbourdons and antiphons, with basso continuo (1614); 7 penitential Psalms 6 v. (1601); motets, 4 v. (1603); cantiones sacrae, 6 v. (Antwerp, 1603); cantiones sacrae, 5 v. (Antwerp, 1608). Many of these have appeared in various editions, some of his works appear in collective volumes, and a considerable number are preserved in MS. in the library of Milan Cathedral and other libraries (*Mendel; Q.-L.; Riemann*).

VECSEY, FRANZ VON (*b.* Budapest, Mar. 23, 1893), violin virtuoso. He was a pupil of his father and afterwards of Hubay and Joachim. He made a tour as a 'wonder-child' at the age of 10 (Berlin, Oct. 17, 1903), soon afterwards appeared in London, and is now one of the most esteemed violinists in Germany. Eberhardt in one of his excellent books on violin technique speaks of him as one of the greatest living masters of his instrument.

W. W. C.

VEICHTNER, FRANZ ADAM (*b.* probably Prussia, 1745; *d.* St. Petersburg ?). He studied the violin under Franz Benda, and composition under Riepel. About 1763-64 he was engaged by the Russian Count Kaiserling at Königsberg, Prussia, and there he composed some violin concertos mentioned by Reichardt (*Autobiography*). In 1771 he was Konzertmeister at the court of the Duke of Courland at Mitau. When the orchestra was dissolved he went to Italy, where he met with signal success, especially in some concerts at Milan. From Italy he went as Kapellmeister

to St. Petersburg, where he is said to have remained to the time of his death. His cantata 'Cephalus and Procris' (words by Ramler) was performed in 1780 in Berlin. He also wrote an oratorio, a 'Hymn to God'; about 60 symphonies in 10 parts, whereof 4 are published (Leipzig, 1777); also two Russian symphonies in 8 parts, a violin concerto (Leipzig, 1771); 3 quartets, op. 3 (St. Petersburg, 1802, and Berlin, Hummel); 24 fantasias, op. 7, for violin and bass, books 1 and 2 (Leipzig, Breitkopf & Härtel); 24 sonatas for violin and bass, 4 books, op. 8. Two 'Divertissements' for orchestras, soli for violin and bass, etc., remained in MS.

E. V. D. S.

VEILED PROPHET OF KHORASSAN, THE, opera in 3 acts; words by W. Barclay Squire, after Moore (see also LALLA ROOKEH); music by Stanford. Produced Court Theatre, Hanover, as 'Der verschleierte Prophet' (German version by Ernst Frank, Feb. 6, 1881); in an Italian version by G. Mazzucato as 'Il profeta velato,' Covent Garden, July 26, 1893.

G.

VEILED VOICE (*Voce velata*). A voice is said to be veiled when it is not clear, but sounding as if it passed through some interposed medium. The definition found in some dictionaries, namely, 'a husky voice,' is incorrect. Huskiness is produced by an obstruction somewhere along the line of the vocal cords, a small quantity of thick mucus which obstinately adheres to them, or an abrasion of the delicate membrane which lines them, from cold or over-exertion. But the veil is due to a special condition, temporary or permanent, of the entire surface of the vocal chords, which affects the tone itself without producing a separate accompanying sound. There are two distinct kinds of veil—that which is natural, proceeding from the special aforesaid condition of the vocal cords in a healthy state, and that which proceeds from a defective position of the vocal organs (bad production), overwork or disease. Almost every fine dramatic voice has a very slight veil upon it, scarcely recognisable as such, but imparting to it a certain richness and pathos often wanting in voices of crystalline clearness. It is in sound like atmosphere in a picture. The veil is therefore not a defect in every degree. Some great singers have had it to a considerable extent. Amongst these, Pasta, one of the first who united classic acting to fine singing, could never overcome a veil that was sufficient at times to be very much in the way, but was counterbalanced by her other great qualities; and Dorus-Gras, the French soprano, was a remarkable instance of the possession of large powers with a veil upon the voice, that would in most cases have been a serious impediment to vocal display. She, however, made the most brilliant singing pierce the impediment, like the sun shining

through the mist. The slight veil on the voice of Jenny Lind gave it volume and consistency, and the same may be said of Salvini the actor, who had, perhaps, the finest speaking voice that ever was heard.

H. C. D.

VELLUTI, GIOVANNI-BATTISTA (b. Monterone, Ancona, 1781; d. Italy, Feb. 1861), was the last of the great male sopranos of Italy. At the age of 14 he was taken up by the Abbate Calpi, who received him into his house and instructed him in music. After the traditional six years of solfeggi, he made his début, in the autumn of 1800, at Forlì; and for the next two or three years continued to sing at the little theatres of the Romagna. In 1805, appearing at Rome, he earned a great success in Nicolini's 'Selvaggia'; and two years later, in the same city, he sang the 'Trajano' of the same composer, by which he established his position as the first singer of the day. With no less éclat he appeared in 1807 at the San Carlo in Naples, and at La Scala in Milan, during the Carnival of 1809, in 'Coriolano,' by Nicolini, and 'Ifigenia in Aulide,' by Federici. After singing at Turin, and again at Milan, he appeared in 1812 at Vienna, where he was crowned, medallised and celebrated in verse. On his return to Italy, he continued to reap golden honours at Milan and other places until 1825, when he came to London. Here he was the first sopranoist whom that generation of opera-goers had ever heard, the last (Roselli) having ceased to sing in 1800, at the King's Theatre; and a strong prejudice was rather naturally felt against the new singer.

His first reception at concerts was far from favourable, the scurrilous abuse lavished upon him before he was heard, cruel and illiberal; and such was the popular prejudice and general cry that unusual precautions were deemed necessary to secure a somewhat partial audience, and prevent his being driven from the stage on his very first entry upon it. The very first note he uttered gave a shock of surprise, almost of disgust, to inexperienced ears, but his performance was listened to with attention and great applause throughout, with but few audible expressions of disapprobation, speedily suppressed. The opera he had chosen (performed July 23, 1825) was "Il crociato in Egitto," by a German composer named Mayerbeer (sic), till then totally unknown in this country.¹

It must be remembered that Velluti at this time was no longer young, and doubtless had lost much of the vigour and freshness of his splendid voice, which had formerly been one of large compass. When he first sang in England, the middle notes had begun to fail, and many of them were harsh and grating to the ear, though the upper register was still exquisitely sweet, and he had retained the power of holding, swelling, and diminishing his tone with delightful effect. The lower notes were full and mellow, and he showed great ingenuity in passing from one register to the other, and

avoiding the defective portions of his scale. His manner was florid, but not extravagant; his embellishments, tasteful and neatly executed, and not commonplace. His usual style was suave, but rather wanting in variety; he never rose to *bravura*. In appearance he had been remarkably handsome, and was still good-looking. Velluti received £600 for his services during that (part) season, but was re-engaged for the next at a salary of £2300, as director of the music as well as singer. He then appeared in Morlacchi's 'Tebaldo ed Isolina,' which he considered his best opera. He was much less admired, however, in this than in the former work; and his favour sensibly declined. For his benefit he sang in Rossini's 'Aureliano in Palmira,' but in connexion with this got into a dispute about extra pay to the chorus, and the case was decided against him in the Sheriff's Court.

In 1829 Velluti came to London once more and sang on a few occasions. On one of these he was heard by Mendelssohn,⁴ with an effect only of intense loathing. His voice, indeed, had completely lost its beauty, and he was not engaged. He returned to Italy, and died in the early part of Feb. 1861. It is strange that no fine portrait should exist of so great a singer and so handsome a man: there is an oval by Jügel, after Mouron, representing him as Trajano, and a woodcut, in which he appears as Tebaldo.⁵

J. M.

VELOCE, CON VELOCITÀ, VELOCISSIMO—'Swiftly; with the utmost rapidity.' A term exploited by the 'Romanticists,' generally used of an *ad libitum* passage in a quick movement, as, for instance, a scale-passage, or similar figure, in a cadenza. It indicates an increased rate of speed—not, like *accelerando*, a gradual quickening of the time, but an immediate access of celerity, lasting evenly until the end of the passage or figure to which it is applied. The original time is then resumed without the words *a tempo* being required. In the large majority of cases the term is only applied to loud passages, as frequently in the works of Chopin, and in the finale of Schumann's Sonata in F# minor, op. 11; but in one instance at least, the slow movement of his second concerto, the former composer applies it to a soft passage, coupling *velocissimo* with *delicatissimo*. In Chopin's 'La ci darem' Variations it is applied to an entire variation. Under such conditions it must be regarded as equivalent to *Presto con fuoco*. It is worthy of notice that in Czerny's 'Études de la vélocité' the direction occurs only once, and then in the superlative, applying, moreover, to an entire study. It is also found in Clementi's 'Gradus.'

M.

⁴ Letter of May 19, 1829, to Devrient. See also MENDELSSOHN, Vol. III., p. 385.

⁵ Another portrait, as well as a 'Cavatina a voce sola con pianoforte' of his composition, is preserved in the *Autograph Gramscik* in the State Library, Berlin (Q.-L.).

¹ The wits of the day called him 'non vir, sed veluti.'

² This statement is contradicted by Ebers (*Seven Years*).

³ Lord Mount-Edgumbe.

VELUT, GILET (EGIDIUS), an early 15th-century church composer (probably Netherlander), of whom some MS. compositions are preserved at Bologna, Vienna, and 5 songs in the Bodleian Library. One of the latter, 'Je voel servir,' has been republished in score by Stainer (Q.-L.).

VENEGAS DE HENESTROSA, LUYs (16th cent.), Spanish lutenist (*vihuelista*), author of a book in tablature entitled :

Libro de cifra nueva para tecla, harpa y vihuela. Alcalá de Henares, 1567. (Bibl. Nac., Madrid.)

The *cifra nueva* (new tablature) for 'key-board, harp or lute' was on the same principle as that used by CABEZÓN, and not real lute-tablature. The lines drawn across the page do not represent the strings of the instrument, but the parts for the different voices. A composition in 3-part counterpoint is written on 3 lines; 4-part on 4 lines, etc. The figures represent, not the frets of the lute, but the notes of the scale. The key is indicated at the beginning of each piece. When this is F, the figure '1' represents F, '2' G, '3' A, etc. The particular octave to which the figures referred was distinguished by dots and other signs: thus 1' was an octave higher than 1, 1' an octave higher than 1'. Accidentals followed the notes they affected instead of preceding them. Venegas gives transcriptions for keyboard, harp or vihuela of several old Spanish ballads, *diferencias* (variations), together with church music by Morales, Josquin des Prés, Soto and Vila. (v. PISADOR, for the importance of lute transcriptions for chromatic alteration.)

J. B. T.

VENETIAN SWELL. The first Swell Organ produced its effect by placing the front of the box containing the pipes under the control of the player, who by means of a pedal could raise or lower the panel at will, so releasing or muffling the sound. This plan was first adopted in the organ at St. Magnus, London Bridge, built in 1712. (See ORGAN: SWELL ORGAN.) The first Harpsichord Swell made its crescendo by the raising of the lid. These clumsy contrivances were superseded by the Venetian Swell, an invention patented by Shudi in 1769 (see SWELL; HARPSICHORD), and so called from its resemblance to the laths of a Venetian blind. This ingenious device was first applied to the harpsichord, but was soon adopted by organ-builders. The louvres were generally in horizontal rows and so hung as to close by their own weight; but in very large Swell Organs the size and number of these shutters made them too heavy for control by the foot, and they are now placed vertically and closed by a spring. The old form of Swell could only be left either quite open or completely closed: a balanced Swell has been introduced which allows the shutters to be left at any angle. In almost all cases the control is given to the

foot of the player—generally the right foot.¹ This arrangement has had disastrous effects upon the pedalling of many players. Several ingenious attempts have been made to enable the organist to open and close the box by other means. In the large organ built by Willis for the 1862 Exhibition, a crescendo could be made by blowing into a small pipe. This, however, was liable to inconvenient sudden sforzandos. R. H. M. Bosanquet used a movable back attached to the seat by a hinge. A strap fastened to this was passed over one shoulder and under the other arm of the player. When the player leant forward he pulled on the back of the seat, and this opened the Swell. The action of the back Swell and Swell Pedal were distinct, so that acting on the former might not depress the latter. W. P⁴.

VENICE. The frequent and laudatory references made by foreigners to the Conservatori of Venice abundantly prove the reputation which they enjoyed during the 17th and 18th centuries. The President de Brosses, in his *Lettres historiques* (vol. i.), speaks of the pleasure he received from Venetian music generally :

'The music *par excellence* is the music of the Hospitals; . . . the girls sing like angels; they play the violin, the flute, the organ, the hautboy, the violoncello, the bassoon, in short no instrument is large enough to frighten them.'

Casotti (*Lettre*, July 29, 1713) assures us that at Vespers in the Incurabili they do not chant, they enchant (non cantano ma incantano). Rousseau (*Confessions*, vii.) bears similar testimony to the charm of the singing in the Venetian Conservatori; and readers of Dr. Burney's letters will not have forgotten his reference to the Incurabili, 'where Buranello and his nightingales . . . poured balm into my wounded ears.' Finally, at the close of the 18th century, Mancini wrote :

'I am of opinion that in all Italy there are no schools of music worthy the name, save the Conservatori of Venice and Naples and the school conducted by Bartolommeo Nucci of Pescia.'

The Venetians were always a music-loving race, and the city long possessed schools of music in the choir of St. Mark's, in the theatres, and above all in the four great Scuole or Conservatori, which were attached to the pious foundations of the Pietà, the Mendicanti, the Ospedaletto and the Incurabili. So famous did these schools become that the greatest masters of Italy, and even of Europe, applied for the post of director. The names of Lotti, Galuppi, Scarlatti, Hasse, Porpora, Jommelli, Cimarosa, to take a few only, must always shed a lustre upon the Conservatori over which they presided; and there is a tradition that Mozart promised an oratorio for the Incurabili choir.

¹ Frequently now (1925) swell pedals are placed above the centre of the pedal-board where they may be reached by either foot.

The four hospitals were not, in their origin, designed as schools of music. They were built and endowed by the munificence of private citizens to receive the poor and infirm; their position as Conservatori was only gradually developed. The Pietà at San Giovanni in Bragola was founded in the year 1348 by Fra Pierazzo d' Assisi as a branch of the Foundling Hospital at San Francesco della Vigna. After the death of Pierazzo both hospitals were united at San Giovanni and placed under the ducal supervision. The institution was supplied with wood and corn free of charge, and enjoyed a rental of nearly three hundred thousand ducats. The children of the hospitals were taught singing, and the school of music gradually developed until it came to enjoy the highest reputation in Venice. At the time of de Brosse's visit the Pietà possessed the finest orchestra in the city. The Hospital of the Pietà was the only one of the Conservatori which survived the downfall of the republic and escaped the financial collapse which overtook so many pious foundations of Venice.

The Hospital of the Mendicanti was first founded in the 13th century, for the reception of lepers. As leprosy gradually disappeared from Venice, the institution and its funds were devoted to the assistance of mendicants and impotent persons. In the 17th century Bartolommeo Bontempelli and Domenico Biava, two wealthy citizens, built and endowed the Hospital at SS. Giovanni e Paolo. The school of music at the Mendicanti sprang up in the same way as the school at the Pietà had grown, and towards the close of the 18th century it had acquired a high repute. In the year 1775, on May 28, the Emperor Joseph II. was entertained at the Mendicanti, and a new oratorio was performed in his honour. The contemporary account of the visit describes how

'the Emperor and his brother, the Grand Duke of Tuscany, attempted to enter the choir. They were not recognised at first by the lady guardians of that door, forbidden to all men without distinction of person, and admittance was refused. The Emperor, however, was presently recognised and admitted. He amused himself by turning over the leaves of the music, and by taking part in a full chorus with his own well-modulated voice.'

In the year 1777, owing to financial difficulties, the hospital of the Mendicanti was closed, though the choir continued to take part in concerts and oratorios. The buildings of the Mendicanti now form part of the Civic Hospital of Venice.

The Ospedaleto was founded in 1527, at SS. Giovanni e Paolo, as a poorhouse and orphanage. S. Girolamo Miani was among its early benefactors, and so too, by report, was Ignatius Loyola. The Conservatoire of the Ospedaleto seems to have been the least renowned of the four Venetian Schools, though Dr. Burney ex-

presses himself much satisfied with the singing which he heard there, ranking it after the Incurabili.

The Incurabili, on the Zattere, a hospital for incurables, was founded in 1522 by two noble ladies, Maria Malipiero and Maria Grimani, under the inspiration of San Gaetano Thiene. The first building was of wood; but the new church was begun in 1566 and finished in 1600. The education of the girls who were admitted to the hospital was supervised by a committee of twelve noble ladies. Dr. Burney gives the palm to the orchestra and choir of the Incurabili. This Conservatoire was raised to its high position by the labours of the two famous masters, Lotti and Galuppi. Galuppi, called Il Buranello, was the last maestro of the Incurabili choir, and wrote for it the last oratorio performed before the closing of the institution in 1776, the 'Moyse de Sinai revertens.' Six years later the concert-room of the Incurabili was opened once more for a performance of Galuppi's 'Tobias,' in honour of Pope Pius IV.

The pupils were divided into two classes, the novices and the *provette* or pupil teachers, whose duty it was to instruct the novices in the rudiments of music under the guidance of the maestro. The number of scholars in each Conservatorio varied from sixty to eighty. Every Saturday and Sunday evening the choirs performed full musical Vespers or a motet, usually written by their own maestro. The churches were crowded, and the town divided into factions which discussed, criticised and supported this or that favourite singer. On great festivals an oratorio was usually given. The choir sang behind a screen and was invisible. Admission to the choir was forbidden to all men except the maestro; but, Rousseau, by the help of le Blond, French Consul, succeeded in evading this rule and was enabled to visit the choir of the Mendicanti and to make the acquaintance of the young singers whose voices had so delighted him. Special tribunes, called Coretti, were reserved for ambassadors and high State officials. Inside the church applause was forbidden.

At present (1927) the chief school of music in Venice is the LICEO BENEDETTO MARCELLO, which, founded in 1877, acquired a high reputation under the guidance of its director and professor of composition, Wolf-Ferrazi—the composer of 'Le donne curiose' and 'I gioielli della Madonna'—who held the position from 1902–12.

LA FENICE, the most important of the Venetian theatres, was built in 1790 by Antonio Selva and burnt before completion. It was reconstructed on Selva's plans by Tommaso Meduna in 1792. Most notable first performances given at La Fenice are Rossini's 'Tancredi' (1813) and 'Semiramide' (1823);

Verdi's 'Ernani' (1844), 'Rigoletto' (1851) and 'Traviata' (1853).

VENI CREATOR SPIRITUS, the popular hymn written by Rutilius Maurus and used at Whitsunday, Ordinations, etc. The English version, by Bishop Cosyn, in the Book of Common Prayer—'Come, Holy Ghost, our souls inspire'—is in Long Measure, answering, so far, to the eight syllables of the original hymn, and susceptible of adaptation to the plain-song melody.

VENI SANCTE SPIRITUS, a Prose or Sequence sung on Whitsunday, and during the Octave of Pentecost (see SEQUENCE (2)).

VENTE, the name familiarly given to the 95th Psalm—in the Vulgate 'Venite exultemus Domino'—which in the Anglican Service is sung immediately before the Psalms of the day at Matins. (See SERVICE.)

VENOSA, CARLO GESUALDO, see GESUALDO.

VENTADOUR THEATRE, see PARIS, Vol. IV, p. 46.

VENTIL is the German term for the valve in brass instruments. 'Ventilhorn' and 'Ventil-trompet' are therefore equivalent to Valve-horn and Valve-trumpet. (See VALVE.) G.

VENTO, IVO DE, a contemporary of Orlando Lassus at the Bavarian court. His nationality and birthplace have not been ascertained, though he may more reasonably be considered a Netherlander by birth than a Spaniard. He is first heard of in 1568 as Kapellmeister to the Chapel of Duke William of Bavaria at Landshut. In 1569 he was appointed organist to the Ducal Chapel at Munich where Lassus was Kapellmeister. His name appears in the Chapel accounts preserved in the Munich archives till 1575, when his death is indicated as having taken place after Michaelmas.¹ Vento's works, all published by Adam Berg of Munich, consist of Latin motets and German sacred and secular songs, with titles and dates as follows:

1. Latine Cantiones quas vulgo Motteta vocant 4 voc, suavissima melodia etiam instrumentis . . . 1569.
2. Latine Cantiones . . . 5 voc. 1570.
3. Liber Motetorum, 4 vocum. 1571.
4. Mutetiae aliquot sacre, 4 voc. . . 1574.
5. Quinque Motetæ, duo Madrigalia, Gallice cantiones duæ et quatuor Germanicæ. 5-8 voc . . . 1576.
6. Neue Teutsche Liedlein mit 5 Stim. 1569.

¹ Sandberger, *Beiträge*.

7. Neue Teutsche Lieder mit 4, 5, 6 Stim. 1570.
8. Neue Teutsche Lieder mit 4 St. sampt 2 Dialogen mit 7 u. 8 Stim. 1570.
9. Schöne ausersene neue Teutsche Lieder mit 4 Stim. 1572.
10. Neue Teutsche Lieder mit 3 Stim. 1572.
11. Teutsche Lieder mit 5 Stim. sampt einem Dialog mit 8. 1573.

Vento's German songs would appear to have been received with much favour, as repeated editions of each book appeared from time to time up to 1591. Eitner considers them to have more of German character and sentiment in them than the similar works of Scandelli or Regnart. Commer, in his collection 'Geistliche und weltliche Lieder aus dem xvi.-xvii. Jahrhundert' has republished five, two with sacred texts *a* 5, and three secular *a* 4. Schöberlein's *Schatz* contains a setting *a* 4 of 'Also hat Gott die Welt geliebt.' Of the Latin works there is only a short Motet *a* 4, 'Factum est silentium,' republished in Lück's 'Sammlung.' Various masses by Vento have remained in MS.

BIBL.—SANDBERGER, *Beiträge zur Geschichte der Bayerischen Hofkapelle* (Documents vol. III.) : KRETZSCHMAR, *Ivo de Vento*, pp. III, 118 (Munich Dissertation, Lindenberg, 1918). See review in Z.M.W. Apr. 1919, pp. 425, 426.

VENTO, MATTHIAS (b. Naples, c. 1735–1736; d. London, Nov. 22, 1776²), an Italian musician who came to England at the suggestion of Giardini about 1763. He composed a number of operas, as 'Demofonte,' 1764, 'La conquista de Messico,' 1767, 'Artaxerxes,' c. 1771, etc. His collections of 'Lessons' for the harpsichord and similar pieces were very numerous; he also composed vocal duets and solo songs. Most of his work was published by Bremner, and afterwards by Welcker. Burney speaks not very highly of his music, but implies that Vento's numerous scholars were sufficient to enable him to publish his pieces successfully.

F. K.

VENTURI, POMPILO, a 16th-century composer of Siena, who wrote 3 books of villanelle; book 2 published in 1571, book 3 in 1583 (Venice, Scotto).

VENTURI, STEFANO, a composer of the 16th-century Venetian school. He published several books of madrigals *a* 4 and 5 from 1592–98. Two of his madrigals *a* 5 adapted to English texts appeared, one in Yonge's 'Musica transalpina' 1597, the other in Morley's collection of 1598. Morley also refers to him approvingly in his *Plain and Easy Introduction*, classing him as a madrigalist along with Vecchi, Giovanelli and Croce. No independent publication of sacred works by Venturi is known, but in Caspar Hassler's Collection, 'Symphonice sacre,' 1600, there appeared three motets by him, one *a* 7, two *a* 8, which have since been republished in modern times by F. Commer.

J. R. M.

VENTURINI, FRANCISCUS (d. Hanover, Apr. 18, 1745), a distinguished violinist-composer, pupil of J. B. FARINELLI at Hanover,

² From his tombstone in St. James's Church.

where Venturini was married in 1697. He is described in the church register as 'Gallus.' In 1698 he was a member of the Electoral Chapel, and succeeded Farinelli as 'director of the Instrumentalists' in 1713, afterwards becoming court Kapellmeister. Mattheson relates that he made his acquaintance at the Hanoverian court on June 5, 1706. These data, communicated from state documents by Dr. Fischer, are curiously contrasted with the documents of the Württemberg court chapel, published by Sittard, according to which Francesco Venturini appears as violinist in the lists of the court musicians at Stuttgart, and is pensioned as such on Feb. 1, 1745. No explanation of this mystery has been found so far. A 'C. Venturini' was engaged as bass singer at the court at Hanover in 1667. Francisus wrote 12 concerti da camera for 4-9 instruments, op. 1, dedicated to the Duke of Brunswick and Luneburg. He left in MS. a concerto for 6 instruments, a sonata I., overtures for 8 instruments, overtures for 5 instruments, and 4 violin concertos (Q.-L.).

E. v. d. s.

VÊPRES SICILIENNES, LES, opera in 5 acts; libretto by Scribe and Duveyrier; music by Verdi. Produced June 13, 1855, Opéra, Paris; in Italian as 'Giovanna de Guzman,' Scala, Milan, Feb. 4, 1856; Drury Lane, July 27, 1859; New York, Academy of Music, Nov. 7, 1859. G.

VERACINI, (1) ANTONIO, a violinist and composer who lived during the second half of the 17th century at Florence, one of the most eminent and influential composers of that time. His sonatas are of particular importance and prove a complete command of the technical resources of the violin, while their form shows a transition from the older to the newer form. The movements are more articulate, and there is a freer flow of melody in the slow movements than in the works of his predecessors, and even of his contemporaries. He was in the service of the Grand Duchess Victoria of Tuscany. His sonatas for 2 violins and violone (v'cl.) or archlute, with bass for the organ, op. 1 (Florence, 1692), are dedicated to the Grand Duchess, and bear the arms of the Grand Duke (Ferdinand II.) and his wife 'Vittoria' on the covers. The dedication is dated 'Firenze, 8th Dec. 1692.' The second violin and organ parts are in the British Museum. Other existing compositions of his are: 'Sonate da chiesa' for violin and violoncello or basso continuo, op. 2 (Amsterdam; Roger—copy of original edition); ten 'Sonate da camera' for violin and violone, or archlute, with basso for the harpsichord, op. 3 (Modena, 1696). Gustav Jensen edited one of the trio-sonatas, op. 1 (Augener). According to Fétis he published three sets of sonatas. His nephew and pupil,

(2) FRANCESCO MARIA (b. Florence, c. 1685; d. ? Pisa, 1750¹), a celebrated violinist and composer, was known as 'Il Fiorentino.' He appears to have settled early at Venice, where TARTINI (q.v.) was so much impressed by his style as to leave Venice without appearing in public, and retire to Ancona for further study after the model of Veracini. He visited England for the first time in 1714, acting as leader of the Italian Opera band, and appearing as soloist between the acts. He was then 'regarded as the greatest violinist in Europe.'² His début at the King's Theatre took place on Saturday, Jan. 23, 1714, when he was advertised as 'The Famous Signor Veracini lately arrived from Italy.' He continued to play 'symphonies' between the acts of the operas at the King's Theatre until Dec. 24, 1714. He played for the BARONESS (q.v.) at her benefit concert of Mar. 17, and gave his own benefit concert at Hickford's Rooms on Apr. 22, when he performed

'an Extraordinary concert of Music both vocal and instrumental of his own compositions, viz. several solos for violin never performed before.'

In 1720 he accepted an appointment as solo-player to the Elector of Saxony at Dresden. There he threw himself out of a high window, and in consequence was lamed for life. According to one version he did this in a fit of insanity; but another report goes to the effect that PISENDEL (q.v.), the leading German musician at Dresden, in order to prepare a humiliation to Veracini, who by his conceit and arrogance had incurred the hostility of the Germans, asked him to play a concerto at sight before the court, and afterwards made a violinist of the orchestra repeat the piece. As the latter had carefully prepared his music, the audience, to Veracini's mortification, gave the preference to his performance and applauded him greatly. Be this as it may, Veracini left Dresden for Prague (1723) and Italy. In 1735 we find him again in London, where he achieved a signal success as a composer. His opera 'Adriano' was first performed at the King's Theatre 'by his Majesty's command' on Nov. 25, 1735, and given 17 times during the season. The artists who took part were Farinelli, Senesino, Bertolli, Montagnana and Cuzzoni. Many of the songs from this opera were printed separately by Walsh. As a violinist Geminiani, then a rising star, appears to have impaired his success. Dr. Burney heard Veracini lead the band in Hickford's Rooms in 1745. He seems to have been greatly impressed with the veteran violinist's bold style. He is reported to have died in reduced circumstances.

Veracini's compositions show him to have been a musician of remarkable originality and solid attainments.

¹ Q.-L., quoting Fürstenau (*Beiträge zur Geschichte der Kgl. Sächs. Kapelle*), says that Veracini died in London in 1750.

² Burney, *Hist.* vol. iv. p. 640.

He published two sets of twelve sonatas each (Dresden and Amsterdam, 1721; London and Florence, 1744). For London he composed the operas 'Adriano,' 1735; 'Roselinda,' 1744; 'L' errore di Salomone,' 1744. A number of concertos, sonatas, and symphonies for two violins, viola, violoncello and basso have remained in manuscript, and some of them are in the public libraries of Florence and Bologna. A set of Veracini's sonatas for violin and flute was published in Venice in 1716. He also wrote two cantatas, 'Nice e Tirsi' and 'Parla al ritratto dell' Amante,' a canon for two sopranos, 'Ut relevet miserum,' and an air for soprano and quartet, 'M' assalgono affanno fierezza.' The 'Sonate accademiche a violino solo' (London and Florence, 1744), op. 2, are dedicated to Augustus III., Elector of Saxony, Veracini's patron, and were licensed for publication in England by George II. on Mar. 13, 1744. An engraved portrait of Veracini playing the violin faces the title-page of these sonatas. Some of his sonatas have been edited by Ferd. David (Breitkopf & Härtel) and von Wasielewski (Senff, Simrock), and have been played by Joachim and others.

P. D.; addns. E. H.-A. and E. v. d. s.

VERBONNET, JEAN, 15th-16th century Netherlandish composer. Of his compositions are known only: 'Hy sit die wertste,' 4 v. from Susato's 'Muziek Boexken' (1551); a fine four-part setting of 'Dulces exuviae,' etc., from Virgil's *Aeneid*; a *Salve Regina*, 4 v., 2 masses and 4 songs in the Codex Basevi (16th century) one of which is superscribed 'Io Ghisling alias Verbonnet'; which has led to his being identified with GHISELIN (*q.v.*); but Ambros points out that the word 'alias' was sometimes used for 'or' where uncertainty existed about the authorships, and that the style of these two masters was totally different. A three-part Mass signed 'Verbenet' in the Cod. 1594 of the Leipzig University Library may probably have to be attributed to Verbonnet. (Ambros, iii. 251; Riemann.)

VERDELOT, PHILIPPE, a Flemish composer of the early part of the 16th century, appears to have settled in Italy when young, since his first work—a motet—was printed in the 'Fior de' motetti e canzoni' published, as is believed, at Rome in 1526, and since he is found to have resided at Florence, as maestro di musica in San Giovanni, some time between 1530 and 1540. It is certain, however, that he was previously attached to the singing staff of the

church of S. Mark at Venice, and we have the authority of Guicciardini² for the statement that he was already dead by the year 1567. His earliest composition is in a collection of Juntas in 1526,³ and his latest publication, 'Electiones diversorum motetorum,' is dated 1549.

Verdelot is commemorated by Cosmo Bartoli and by Vincenzo Galilei, who printed two lute-pieces by him in 'Fronimo.' His works had reached France and were printed in French collections as early as the year 1530. Verdelot's 'remarkable skill in the science of music is well shown in the fifth part which he added to Jannequin's 'Bataille.'

Antonio Gardano, the publisher, when introducing in 1541 the reprint of a collection of six-part madrigals by Verdelot, describes them on the title-page as the most divine and most beautiful music ever heard ('la più divina e più bella musica che se udisse giammai'). On the general question of precedence in the composition of the madrigal, see MADRIGAL. Besides the fact insisted on by Eitner⁵ that only a very few of Willaert's secular compositions are properly madrigals, the most of them being rather in the lighter style of villanellas, his first composition of the kind appeared only in 1538, while as early as 1536 Willaert himself had arranged in lute tablature for solo voice and lute accompaniment twenty-two madrigals by Verdelot ('Intavolatura degli Madrigali di Verdelotto da cantare et sonare nel lauto . . . per Messer Adriano,' Venice, 1536). Apart from the early mention of the name in the 14th century, the earliest known volume of musical pieces described as madrigals bears the date 1533, and Verdelot is the chief contributor. It is entitled 'Madrigali novi de diversi excellentissimi Musici.'⁶ Costanzo Festa also appears as a contributor to this volume, and his name otherwise as a composer appears earlier in print than that of Verdelot. (It should be mentioned that this first book of madrigals is not perfectly preserved, two part-books only existing in the Staatsbibliothek at Munich.) From 1537 onwards various collections of Verdelot's madrigals for four, five and six voices were made by enterprising publishers, such as Scotto and Gardano, but generally mixed up with the works of other composers. Eitner says that no independent collection of Verdelot's madrigals is known to exist (but see *Q.-L.*). Out of the miscellaneous collections he reckons up about 100 as composed by Verdelot, although with regard to many of them some uncertainty prevails from the carelessness of the publishers in affixing names, and perhaps also their wish to pass off inferior compositions as

¹ Two notices cited by Van der Straeten, *La Musique aux Pays-Bas*, vol. vi. p. 322, suggest that the name of 'Verdelot' is an appellative; if so we are ignorant of the composer's real name. One of the cases referred to is connected with the town of Bruges.

the work of the more celebrated masters. Jannequin's 'Bataille,' with Verdelot's added fifth part, first appeared in Tylman Susato's tenth book of 'Chansons,' published at Antwerp in 1545, and has been reprinted in modern times by Commer. Besides madrigals, Verdelot appears as composer of motets in the various collections made by publishers from 1532 onwards. Forty are enumerated in Eitner's *Bibliographie*, several of them imperfectly preserved. Of the complete works which Ambros examined, he praises the masterly construction and the finely developed sense for beauty and pleasing harmony. Only one Mass by Verdelot is known, one entitled 'Philomena,' in a volume of five masses published by Scotto, Venice, in 1544. Fétis and Ambros say that several exist in manuscript in the archives of the Sistine Chapel at Rome; but Codex 38, to which Fétis refers, is shown by Haberl's *Katalog der Musikwerke im päpstlichen Archiv*, pp. 18, 171 and 172, to contain only three motets by Verdelot.¹ Three of Verdelot's madrigals are contained in Ott's *Liederbuch*, 1544, reprinted by Eitner, and one of these also reappeared in 'Arion,' vol. iii.

R. L. P. and J. R. M.

VERDI, GIUSEPPE (*b.* Le Roncole, Italy, Oct. 10, 1813; *d.* S. Agata, near Busseto, Jan. 27, 1901), one of the greatest and most popular operatic composers of the 19th century.

Unlike many musicians who have passed their infancy and childhood amongst artistic surroundings, Verdi's musical genius had to fight for its development against many difficulties. His father, Carlo Verdi, kept a small shop at Le Roncole, a little hamlet in the province of Parma. Once a week Carlo Verdi walked up to Busseto, making his chief purchases from a certain Barezzi, who was destined to serve as a bridge to Giuseppe Verdi over many a chasm.

Giuseppe, though good and obedient, was rather of a melancholy character; one thing only, we are told, could rouse him from his habitual indifference, and that was the occasional passing through the village of a grinding organ; to the child who in after years was to afford an inexhaustible repertory to those instruments for half a century all over the world, this was an irresistible attraction. This slight hint of his musical aptitude must have been accompanied by others which the traditions of Le Roncole have not transmitted, since we know that even in early childhood the boy was possessed of a spinet.

Another evidence of Giuseppe's musical aptitude is given by the following fact, which occurred when he was only 7 years old. He was then assisting the priest at the Mass in the little church of Le Roncole. At the very moment of the elevation of the Host, the

harmonies that flowed from the organ struck the child as so sweet that he stood motionless in ecstasy. 'Water,' said the priest to the acolyte; and the latter evidently not heeding him, the demand was repeated. Still no reply. 'Water,' a third time said the priest, kicking the child so brutally that he fell headlong down the steps of the altar, knocked his head against the floor, and was brought unconscious into the sacristy. After this event Giuseppe's father engaged Baistrocchi, the local organist, to give him music lessons. At the end of a year Baistrocchi made a declaration to the effect that the pupil had learned all that the teacher could impart, and thereupon resigned his position as Verdi's teacher.

Two years after, having completed this first stage in his musical education, Verdi—then but ten years old—was appointed as organist in the room of old Baistrocchi. The dream of his parents was thus for the time realised: yet before long the mind of the elder Verdi began to be haunted with the thought that some knowledge of the three R's could but bring good to his son in after life: and after debating his scheme with his wife, he resolved upon sending Giuseppe to a school in Busseto. This would have been beyond the small means of the good Verdi, but for the fact that at Busseto lived a countryman and friend—a cobbler named Pugnatta. This Pugnatta took upon himself to give Giuseppe board and lodging, and send him to the principal school of the town, all at the very moderate price of threepence a day. And to Pugnatta's Giuseppe went: and while attending the school most assiduously, kept his situation as organist of Le Roncole, walking there every Sunday morning, and back to Busseto after the evening service.

One night, while the poor lad was walking towards Le Roncole, worn out by fatigue and want of sleep or food, he did not notice that he was in the wrong track, and of a sudden, missing his ground, he fell into a deep canal. It was dark, it was bitter cold, and his limbs were absolutely paralysed; and but for an old woman who was passing by the spot and heard his cries for help, the exhausted and chilled boy would have been carried off by the current.

The following story of another and earlier very narrow escape from death we give on the entire responsibility of Pougin. In 1814 Russian and Austrian troops had been passing through Italy, leaving death and destruction everywhere. A detachment having stopped for a few hours at Le Roncole, all the women took refuge in the church; but not even that holy place was respected by these savages. The doors were unhinged, and the poor helpless women and children ruthlessly wounded and killed. Verdi's mother, with the little Giuseppe in her arms, was among those who took refuge in the church; but when the door was burst open she did not

¹ See also Van der Straeten, *Musique aux Pays-Bas*, vol. vi. p. 473.

lose her spirits, but ascending the narrow staircase of the belfry, hid herself and her baby among some timber that was there, and did not leave her hiding-place until the drunken troops were far beyond the village.

EDUCATION.—Giuseppe Verdi, after two years' schooling at Busseto, had learned to write, read and cypher: whereupon the above-mentioned Barezzi began to take much interest in the talented Roncolese, gave him employment in his business, and opened a way to the development of his musical faculty.

Music was uppermost in the minds of the Bussetesi. Barezzi himself was first flute in the cathedral orchestra. His house was the residence of the Philharmonic Society, of which he was the president and patron, and it was there that all rehearsals were held, and all Philharmonic concerts given, under the conductorship of Ferdinando Provesi, organist of the cathedral.

This was the fittest residence for a lad of Verdi's turn of mind, and he immediately felt it. Without neglecting his chief occupation, he regularly attended the rehearsals, and undertook the task of copying out the parts from the score; and all this in such earnest that old Provesi began to notice Giuseppe with approval, and give him the foundation of a sound musical knowledge. Provesi was the first man in Busseto to understand Verdi's real vocation, and to advise him to devote himself to music. Don Pietro Seletti, the boy's Latin teacher, bore a grudge to Provesi. The fact that Provesi encouraged Verdi to study music was therefore enough for Don Pietro to dissuade him as strongly from it.

But a short time after this admonition there was to be a Mass at a chapel in Busseto where Don Pietro Seletti was the officiating priest. The organist was unable to attend, and Don Pietro was induced to let Verdi play the organ. The Mass over, Don Pietro sent for him. 'Whose music did you play?' said he; 'it was a most beautiful thing.' 'Why,' timidly answered the boy, 'I had no music, and I was playing extempore, just as I felt.' 'Ah! indeed,' rejoined Don Pietro; 'well, I am a fool, and you cannot do better than study music.'

Under the intelligent guidance of Provesi, Verdi studied until he was 16. During this period he often came to the help of his old master both as organist and as conductor of the Philharmonic Society. The archives of the society still contain works written by Verdi at that time, and composed, copied, taught, rehearsed, and conducted by himself.

It became evident that Busseto was too narrow a field for the aspirations of the young composer, and efforts were made to afford him the means of going to Milan, the most important Italian town, musically speaking. The

financial question came again to the front, and, thanks to the good-will of the Bussetesi, it had a happy solution. The Monte di Pietà, an institution granting four premiums of 300 francs a year, each given for four years to promising young men wanting means for undertaking the study of science or art, was induced by Barezzi to award one of the four premiums to Verdi, with the important modification of allowing him 600 francs a year for two years, instead of 300 for four years. Barezzi himself advanced the money necessary for music lessons, board, and lodging in Milan; and Seletti gave him an introduction to his nephew, a professor there, who most heartily welcomed him.

We come now to an incident of Verdi's artistic life to which a very undue importance has been often attached; we mean his being refused a scholarship at the Conservatorio di Musica di Milan, on the ground of his showing no special aptitude for music.

To a vacant scholarship—for pianoforte, singing, or composition—there is always a number of candidates, occasionally amounting to as many as a hundred. A committee of professors under the presidency of the Principal is appointed to examine all the competitors, and choose the best. The committee can only select one amongst those that have the fewest disqualifications, but nobody can accuse them of ignorance or ill-will if the chosen candidate, after five years' tuition, turns out to be a mere conductor of operettas, while one of the ninety-nine dismissed, after ten years' hard study elsewhere, writes a masterpiece of operatic or sacred music. Let us then bear no grudge to Basily, the then principal of the Conservatorio of Milan, for not having the foresight to recognise in the young organist of Le Roncole the man who was destined to write 'Rigoletto.'

But though failing to be admitted to the Conservatorio, Verdi stuck to the career which he had undertaken, and, on the advice of Alessandro Rolla, then conductor of La Scala, he asked Signor Lavigna to give him lessons in composition and orchestration. Lavigna was a distinguished musician and a composer of no ordinary merit, his operas having been performed several times with success. He consented to give the lessons, and to him actually belongs the honour of being the teacher of Verdi.

This was in 1831, when Verdi was 18. The two years 1831-33 passed in an uninterrupted succession of exercises in harmony, counterpoint and fugue, and a daily study of Mozart's 'Don Giovanni.' In 1833 Ferdinando Provesi died. The trustees of the Monte di Pietà of Busseto, and the other contributors towards Verdi's musical training, had acted with the intention that, after Provesi's death, Verdi should be his successor both as maestro di cappella and organist of the Cathedral, and

also conductor of the Philharmonic Society. Verdi felt very sorry for the death of Provesi; with him he had lost the man who first taught him the elements of his art, and showed him the way to excellence; and though Verdi felt a call to something nobler in life, yet he kept his word to his countrymen and went to Busseto to fill the place left vacant by his deceased professor. The appointment rested with the authorities of the Cathedral, men who had little liking for Verdi, whom they called 'the fashionable maestrino,' and preferred Verdi's competitor, one Giovanni Ferrari.

Verdi next fell in love with Margherita, Barezzi's eldest daughter, whose father, unlike most fathers, did not oppose Margherita's union to a talented though very poor young man. In 1836 they were married.

AUTOBIOGRAPHY.—In 1838 Verdi, with his wife and two children, left Busseto and settled in Milan, in the hope of performing his opera 'Oberto Conte di S. Bonifacio.' We are fortunately able to give the relation of this most important period of an artist's career, in words that may be said to be Verdi's own.

The first part of the narrative refers to the time when he was in Milan, studying with Lavigna. On his return there his kind old master was gone—died while his pupil was at Busseto. And here is Verdi's narrative:

'About the year 1833 or 1834 there was in Milan a Philharmonic Society composed of first-rate vocalists, under the direction of one Masini. The Society was then in the bustle and hurry of arranging a performance of Haydn's "Creation," at the Teatro Filodrammatico. Signor Lavigna, my teacher of composition, asked me whether I should like to attend the rehearsals, in order to improve my mind, to which I willingly answered in the affirmative. Nobody would notice the young man sitting in the darkest corner of the hall. Three maestri shared the conducting between them; but one day it happened that neither of the three was present at the time appointed for rehearsal. The ladies and gentlemen were growing fidgety, when Masini, who did not feel himself equal to accompanying from the full orchestral score, desired me to be the accompanist for the evening: and as perhaps he believed in my skill as little as he did in his own, he added, "It will be quite enough to play the bass only." I was fresh from my studies, and certainly not puzzled by a full orchestral score; I therefore answered, "All right," and took my place at the piano.

'The rehearsal began, and in the course of it I gradually warmed up, so that at last, instead of confining myself to the mere piano part, I played the accompaniment with my left hand, while conducting most emphatically with my right. It was a tremendous success, all the more because quite unexpected. The re-

hearsal over, everybody congratulated me upon it. In short, whether the three maestri were too busy to attend the rehearsals, or whether there was some other reason, I was appointed to conduct the performance, which was so welcomed by the audience that it had to be repeated in the large and beautiful hall of the Casino dei Nobili, in presence of the Archduke and Archduchess Ranieri.

'A short time afterwards, I was engaged by Count Renato Borromeo to write the music for a cantata for chorus and orchestra, on the occasion of the marriage of some member of the Count's family—if I remember right. I must say, however, that I never got so much as a penny out of all that, because the whole work was a gratuitous one.

'Masini next urged me to write an opera, and handed me a libretto, which, after having been touched up by Solera, became "Oberto, Conte di San Bonifacio."

'I closed immediately with the proposition, and went to Busseto, where I was obliged to remain nearly three years, and during that time I wrote out the whole opera. The three years over, I took my way back to Milan, carrying with me the score, and the solo parts copied out by myself.

'But here difficulties began. Masini being no longer conductor, my chance of seeing my opera produced there was at an end. However, whether Masini had confidence in my talents, or wished to show me some kindness, he assured me he would not leave a stone unturned until my opera was brought out at La Scala.

'The result was that the opera was put down for the spring of 1839, to be performed at La Scala for the benefit of the Pio Istituto; and among the interpreters were the four excellent artists Mme. Strepponi, Moriani, Giorgio Ronconi and Marini.

'After a few rehearsals Moriani fell seriously ill, everything was brought to a standstill, and all hope of a performance gone! I broke down utterly, and was thinking of going back to Busseto, when one fine morning one of the theatre attendants knocked at my door and said sulkily, "Are you the maestro from Parma who was to give an opera for the Pio Istituto? Come with me to the theatre; the impresario wants to speak to you."

'The impresario was Bartolemeo Merelli.

'On my entering his room, he abruptly told me that having heard my "Oberto" spoken of very favourably he was willing to produce it during the next season, provided I would make some slight alterations in the compass of the solo parts, as the artists engaged were not the same who were to perform it before. His only condition was that he should share with me the sale of the copyright. This was not asking much for the work of a beginner. And in fact,

even after its favourable reception, Ricordi would give no more than 2000 Austrian livres (£87) for it.

‘Though “Oberto” was not extraordinarily successful, yet it was well received by the public, and was performed several times; and Merelli even found it convenient to extend the season and give some additional performances of it. The principal interpreters were Mme. Marini, Salvi and Marini. I had been obliged to make some cuts, and had written an entirely new number, the quartet, on a situation suggested by Merelli himself; which proved to be one of the most successful pieces in the whole work.

‘Merelli next made me an offer which, considering the time at which it was made, may be called a splendid one. He proposed to engage me to write three operas, one every eight months, to be performed either at Milan or Vienna, where he was the impresario of both the principal theatrical houses: he to give me 4000 livres (£134) for each opera, and the profits of the copyright to be divided between us. I agreed to everything, and shortly afterwards Merelli went to Vienna leaving instructions to Rossi to write a libretto for me, which he did, and it was the “Proscritto.” I had not yet brought myself to begin to set it to music, when Merelli, coming hurriedly to Milan during the spring of 1840, told me that he was in want of a comic opera for the next autumn, that he would send me a libretto, and that I was to write it before the “Proscritto.” I could not well say no, and so Merelli gave me several librettos of Romani to choose from, all of which had already been set to music, though owing to failure or other reasons, they could safely be set again. I read them and did not like any: but there was no time to lose, so I picked out one that seemed to me not so bad as the others, “Il finto Stanislao,” a title which I changed into “Un giorno di regno.”

‘At that period of my life I was living in an unpretentious little house near the Porta Ticinese, and my small family was with me—that is, my young wife and my two sons. As soon as I set to work I had a severe attack of angina, that confined me to my bed for several days, and just when I began to get better I remembered that quarter-day was only three days off, and that I had to pay fifty crowns. Though in my financial position this was not a small sum, my illness had prevented me from taking the necessary steps; and the means of communication with Busseto—the mail left only twice a week—did not allow me time enough to write to my excellent father-in-law Barezzi, and get the money from him. It vexed me so much to let the quarter-day pass by without paying the rent, that my wife, seeing my anxieties, took the few valuable trinkets she had, went out, and a little while after came back

with the necessary amount. I was deeply touched by this tender affection, and promised myself to buy everything back again, which I could have done in a very short time, thanks to my agreement with Merelli.

‘But now terrible misfortunes crowded upon me. At the beginning of April my child falls ill, the doctors cannot understand what is the matter, and the dear little creature goes off quickly in his mother’s arms. Moreover, a few days after the other child is taken ill too, and he too dies, and in June my young wife is taken from me by a most violent inflammation of the brain, so that on the 19th June I saw the third coffin carried out of my house. In a very little over two months, three persons so very dear to me had disappeared for ever. I was alone, alone! My family had been destroyed; and in the very midst of these trials I had to fulfil my engagement and write a comic opera! “Un giorno di regno” proved a dead failure; the music was, of course, to blame, but the interpretation had a considerable share in the fiasco. In a sudden moment of despondency, embittered by the failure of my opera, I despaired of finding any comfort in my art, and resolved to give up composition. To that effect I wrote to Dr. Pasetti (whom I had not once met since the failure of the opera) asking him to persuade Merelli to tear up the agreement.

‘Merelli thereupon sent for me and scolded me like a naughty child. He would not even hear of my being so much disappointed by the cold reception of my work: but I stuck to my determination, and in the end he gave me back the agreement saying, “Now listen to me; I can’t compel you to write if you don’t want to do it; but my confidence in your talent is greater than ever; nobody knows but some day you may return on your decision and write again: at all events if you let me know two months in advance, take my word for it your opera shall be performed.”

‘I thanked him very heartily indeed; but his kindness did not shake my resolution, and away I went. I took up a new residence in Milan near the Corsia de’ Servi. I was utterly disheartened, and the thought of writing never once flashed through my mind. One evening, just at the corner of the Galleria De Cristoforis, I stumbled upon Merelli, who was hurrying towards the theatre. It was snowing beautifully, and he, without stopping, thrust his arm under mine and made me keep pace with him. On the way he never left off talking, telling me that he did not know where to turn for a new opera; Nicola was engaged by him, but had not begun to work because he was dissatisfied with the libretto.

“Only think,” says Merelli, “here is Solera’s libretto! such a beautiful subject! Take it, just take it, and read it over.”

"What on earth shall I do with it? . . . I am in no humour to read librettos."

" . . . It won't kill you; read it, and then bring it back to me again." And he gives me the manuscript. It was written on large sheets in big letters, as was the custom in those days. I read it up, and went away.

'While walking home I felt rather queer; there was something that I could not well explain about me. I was burdened with a sense of sadness. I got into my room, and throwing the manuscript angrily on the writing-table, I stood for a moment motionless before it. The book as I threw it down, opened, my eyes fell on the page, and I read the line

"Va, pensiero, sull' all dorate."

I read on, and was touched by the stanzas inasmuch as they were almost a paraphrase of the Bible, the reading of which was the comfort of my solitary life.

'I read one page, then another; then, decided as I was to keep my promise not to write any more, I did violence to my feelings, shut up the book, went to bed, and put out the candle. I tried to sleep, but "Nabucco" was running a mad career through my brain, and sleep would not come. I got up, and read the libretto again—not once, but two or three times, so that in the morning I could have said it off by heart. Yet my resolution was not shaken, and in the afternoon I went to the theatre to return the manuscript to Merelli.

"Isn't it beautiful?" says he.

"More than beautiful, wonderful."

"Well, set it to music."

'I looked rather blank, but not knowing what to do went home with "Nabucco" in my pocket. One day a line, the next day another line, a note, a bar, a melody . . . at last I found that by imperceptible degrees the opera was done!

'It was then the autumn of 1841, and calling to mind Merelli's promise, I went straight to him to announce that "Nabucco" was ready for performance, and that he might bring it out in the coming Carnival.

'Merelli emphatically declared that he would stick to his word; but at the same time he called my attention to the fact that it was impossible to bring out the opera during the Carnival, because the repertory was all settled, and no less than three new operas by known composers already on the list; to give, together with them, a fourth, by a man who was almost a debutant, was a dangerous business for everybody, especially for me; it would therefore be safer to put off my opera till Easter. This, however, I peremptorily refused:—either during the Carnival or never; for I knew very well that during the spring it was utterly impossible to have two such good artists as Strepconi and Ronconi, on whom, knowing

they were engaged for the Carnival season, I had mainly built my hopes of success.

'The issue was, that after a long succession of vacillations, one fine morning I saw the posters on the walls and "Nabucco" *not* there.

'I was young and easily roused, and I wrote a nasty letter to Merelli, wherein I freely expressed my feelings. No sooner was the letter gone than I felt something like remorse, and besides, a certain fear lest my rashness had spoiled the whole business.

'Merelli sent for me, and on my entering his office he says in an angry tone: "Is this the way you write to your friends? . . . Yet you are right; I'll give 'Nabucco'; but you must remember that because of the outlay on the other operas, I absolutely cannot afford new scenes or new costumes for you, and we must be content to make a shift with what we have in stock."

'I was determined to see the opera performed, and therefore agreed to what he said, and new posters were printed, on which "Nabucco" appeared with the rest.

'At the end of February 1842 we had the first rehearsal, and twelve days later, on March 9, the first performance. The principal interpreters were Mmes. Strepponi and Bollinzaghi, and Signori Ronconi, Miraglia and Derivis.

'With this opera my career as a composer may rightly be said to have begun; and though it is true that I had to fight against a great many difficulties, it is no less true that "Nabucco" was born under a very good star.' So far the maestro's own narrative.

OPERATIC CAREER.—Eleven months later (Feb. 11, 1843), Verdi achieved a still more indisputable success with 'I Lombardi alla prima Crociata,' interpreted by Mme. Frezzolini-Poggi, and Guasco, Severi and Derivis. Solera had taken the plot from the poem of Tommaso Grossi, the author of 'Marco Visconti.' This opera gave Verdi his first experience in the difficulty of finding libretti unobjectionable to the Italian governments. Though five years had still to elapse before the breaking out of the Milan revolt, yet something was brewing throughout Italy, and no occasion was missed by the patriots in giving vent to their feelings. As soon as the Archbishop of Milan got wind of the subject of the new opera he sent a letter to the chief of the police, Torresani, saying that he knew the libretto to be a profane and irreverent one, and that if Torresani did not veto the performance, he himself would write straight to the Austrian Emperor.

Merelli, Solera and Verdi were forthwith summoned to appear before Torresani and hear from him what alterations should be made in the opera. Verdi, in his usual blunt manner, took no notice of the peremptory summons.

'I am satisfied with the opera as it is,' said he, 'and will not change a word or a note of it. *It shall be given as it is, or not given at all!*' Thereupon Merelli and Solera went to see Torresani—who, to his honour be it said, besides being the most inflexible agent of the government, was an enthusiastic admirer of art and artists—and so impressed him with the responsibility he would assume by preventing the performance of a masterpiece of all masterpieces, like 'I Lombardi,' that at the end Torresani got up and said, 'I am not the man to prevent genius from getting on in this world. Go on; I take the whole thing upon myself; only put *Salve Maria* instead of *Ave Maria*, just to show the Archbishop that we are inclined to please him; and as for the rest, it is all right.' The opera had an enthusiastic reception, and the chorus,

'O Signore, dal tetto natio,'

had to be repeated three times. The Milanese, the pioneers of the Italian revolution, always on the look out, knew very well that the Austrian Governor could not miss the meaning of the applause to that suggestively worded chorus.

Of Verdi's first three operas 'I Lombardi' has stood its ground the best. In Italy it is still very often played. On Nov. 26, 1847, it was performed with considerable alterations in the music, and a libretto adapted by Vaez and Royer, but with little success, under the title of 'Jérusalem,' at the French Opéra. The experiment of retranslating the work into Italian was not a happy one, and 'Gerusalemme' in Italy was little better welcomed than 'Jérusalem' had been in Paris.

Verdi's works were soon eagerly sought after by all the impresarios, and the composer gave the preference to Venice, and wrote 'Ernani' (Mar. 9, 1844) for the Fenice theatre there. The success was enormous, and during the following nine months it was produced on fifteen different stages. The libretto, borrowed from Victor Hugo's *Hernani*, was the work of F. Piave of Venice, of whom we shall have occasion to speak again. The police interfered before the performance, and absolutely would not allow a *conspiracy* on the stage. This time many expressions in the poem, and many notes in the music, had to be changed; and besides the annoyances of the police, Verdi had some trouble with a Count Mocenigo, whose aristocratical susceptibility treated the blowing of the horn by Sylva in the last act as a disgrace to the theatre. In the end, after much grumbling, the horn was allowed admittance. The chorus 'Si ridesti il Leon di Castiglia' gave the Venetians an opportunity for a political manifestation in the same spirit as that at the production of 'I Lombardi' at Milan.

'I due Foscari' (Nov. 3, 1844) followed close

on 'Ernani.' It was brought out in Rome at the Argentina, but notwithstanding several beauties, the opera is not reckoned amongst the maestro's best. Three months after 'I due Foscari,' 'Giovanna d' Arco' was given at the Scala in Milan (Feb. 15, 1845). The overture alone survives. 'Alzira' (Aug. 12, 1845), performed at the San Carlo at Naples, neither added to nor detracted from its author's popularity; while 'Attila' (Mar. 17, 1846), produced at the Fenice, was the most successful after 'Ernani.' In this opera a cue to political demonstration was given by the aria,

'Cara Patria già madre e Regina,'

and by the no less popular line,

'Avrai tu l' Universo, resti l' Italia a me.'

The habitués of Covent Garden have little idea what 'enthusiastic applause' means in Italy, and in Venice especially, and in what acts of sheer frenzy the audiences of 1846 would indulge to give the Austrian Government an unmistakable sign of their feelings. The over-crowded house was in a perfect roar—the noise often entirely covering the sound of both orchestra and chorus, and lasting till the police could restore order, or till there was no breath left in the audience.

'Attila' was followed by 'Macbeth' (Mar. 14, 1847), at the Pergola of Florence. The book was again the work of Piave, though to please the poet and composer, Andrea Maffei, the renowned translator of Byron, Moore, Schiller and Goethe, did not disdain to write some portions of it. This opera, owing chiefly to the lack of a tenor part, received scant justice in Italy, and still less abroad.

Verdi's fame was now firmly established, and Lumley, the manager of Her Majesty's Theatre, London, proposed to him to write a new opera, an offer which the composer gladly accepted. 'King Lear' was first named as a fit subject for an English audience, but as love—the steam-power of all operatic engines—had no share in the plot, it was feared that the work would want the first requisite for success. It was therefore settled to take the plot from Schiller's 'Robbers.' Maffei himself was engaged to write the poem, and no less famous artists than Jenny Lind, Lablache and Gardoni to interpret it. On this occasion the Muse did not smile on her devotee, and the first performance in London (July 22, 1847) proved no more than what in theatrical jargon is called a *succès d'estime*; a judgment afterwards endorsed by many audiences. 'I masnadieri' was not only Verdi's first work for the English stage, but was the last opera conducted by Costa at Her Majesty's previous to his joining the rival house at Covent Garden. This coincidence all but shunted Verdi's intellectual activity into a new track. Lumley, deserted by the fashion-

able conductor, made a liberal offer to Verdi, if he would act for three years as conductor. Verdi had a strong inclination to accept the offer, but there was a drawback in the fact that he had agreed with Lucca, the publisher, of Milan, to write two operas for him. Negotiations were set on foot with the view of breaking off the agreement, but Lucca would not hear of it, and Verdi had therefore to leave London, take a house at Passy, and write the 'Corsaro' and the 'Battaglia di Legnano.'

'Il corsaro' (Oct. 25, 1848, Trieste) was a failure. 'La Battaglia di Legnano' (Jan. 27, 1849, Rome), though welcomed on the first night, was virtually another failure. During the summer of 1849, when the cholera was making ravages in France, Verdi, at his father's request, left Paris and went home, and he then bought the villa of S. Agata, his favourite residence, of which we shall give a description farther on.

It was in the solitude of the country near Busseto that 'Luisa Miller' was composed for the San Carlo of Naples, where it was produced with great and deserved success on Dec. 8, 1849. The poem, one of the best ever accepted by an Italian composer, was the work of Cammarano, who took the plot from Schiller's *Kabale und Liebe* and adapted it most effectively to the operatic stage.

In connexion with 'Luisa Miller' we shall relate an authentic incident illustrating the way in which the superstitious blood of the south can be stirred. The word 'jettatore' is familiar to anybody acquainted with Naples. It means somebody still more to be dreaded than an evil angel, a man who comes to you with the best intentions, and who yet, by the 'evil eye,' or a charm attached to his person, unwittingly brings all kinds of accidents and misfortunes upon you. There was, at this time, one Capecelatro, an amateur composer, and a frantic admirer of all musicians, and, welcome or not welcome, an unavoidable friend to them. He was looked upon as a 'jettatore,' and it was an accepted fact in all Neapolitan circles that the cold reception of 'Alzira' at San Carlo four years before was entirely due to his shaking hands with Verdi, and predicting a great triumph. To prevent the repetition of such a calamity, it was evident that Capecelatro must not be allowed to see, speak or write to Verdi on any pretence whatever before the first performance of 'Luisa Miller' was over. Therefore a body of volunteers was levied amongst the composer's many friends, whose duty was to keep Capecelatro at a distance. Upon setting his foot on Neapolitan ground, Verdi found himself surrounded by this legion of friends; they never left him alone for a minute; they stood at the door of his hotel; they accompanied him to the theatre and in the street; and had

more than once to contend fiercely against the persistent and unreasonable Capecelatro. All went smoothly with the rehearsals, and the first performance was wonderfully good. During the interval before the last act—which, by the bye, is one of Verdi's most impressive and powerful creations—a great excitement pervaded the house, and every one was anxious to see the previous success crowned by a still warmer reception of the final terzetto. Verdi was standing on the stage in the centre of his guards, receiving congratulations from all, when suddenly a man rushed frantically forward, and crying out 'At last!' threw his arms fondly round Verdi's neck. At the same moment a side-scene fell heavily on the stage, and had it not been for Verdi's presence of mind, throwing himself back with his admirer hanging on him, both would have been crushed. We need not say that the admirer was Capecelatro, and that the last act of 'Luisa Miller' had, compared to the others, a very cold reception.

'Stiffelio' (Nov. 16, 1850, Trieste) was a failure; and even after being rewritten and reproduced under the title of 'Aroldo' (Aug. 16, 1857, Rimini) it did not become popular, though the score contains some remarkable passages, amongst others a great *pezzo concertato* and a duet for soprano and bass, which would be almost sufficient themselves, nowadays, to ensure the success of an Italian opera.

We are now going to deal with the period of the artist's career in which he wrote the masterpieces that have given him his world-wide fame—'Rigoletto,' 'Trovatore,' and 'La traviata.' Wanting a new libretto for La Fenice, Verdi requested Piave to adapt the 'Le Roi s'amuse' of Victor Hugo, and one was soon prepared, with the suggestive French title changed into 'La maledizione.' Widely open to criticism as is Victor Hugo's drama, the situations and plot are yet admirably fit for opera-goers who do not trouble themselves about the why and the wherefore, but are satisfied with what is presented to them, provided it rouses their interest. Verdi saw the advantages offered by the libretto, and forthwith sent it to Venice for approval. But after the political events of 1848-49 the police kept a keener eye than before on all performances, and an opera in which a king is made to appear under such a light as François I. in 'Le Roi s'amuse' was met by a flat refusal. The direction of La Fenice and the poet were driven almost mad by the answer; the season was drawing near, and they would probably have to do without the *grand' opera d'obbligo*. Other subjects were proposed to the composer, who, with his Olympian calm, always refused on principle, saying, 'Either "La maledizione" or none.' Days went on without any solution to the problem, when it was brought to an unexpected

end in a quarter where help seemed least likely. The chief of the Austrian police, Martello—who, like Torresani, had as great a love for the interests of art as he had hatred to patriotic ideas—came one morning into Piave's room with a bundle of papers under his arm, and patting him on the shoulder, said, 'Here is your business; I have found it, and we shall have the opera.' And then he began to show how all the necessary alterations could be made without any change in the dramatic situations. The king was changed into a duke of Mantua, the title into 'Rigoletto,' and all the curses were made to wreak their fury on the head of the insignificant duke of a petty town. Verdi accepted the alterations, and after receiving the complete libretto, went to Busseto and set furiously to work. And his inspiration served him so well that in forty days he was back at Venice with 'Rigoletto' ready, and its production took place on Mar. 11, 1851. This was as great and genuine a success as was ever achieved by any operatic composer; since no change, either of time or artistic taste, has been able to dim the beauty of this masterpiece.

Nearly two years passed before the appearance of 'Il trovatore,' which was performed at Rome at the Teatro Apollo on Jan. 19, 1853; and in little more than a month later 'La Traviata' was brought out at the Fenice at Venice (Mar. 6, 1853). The reception of the two works was very different: 'Il trovatore' from the very first hearing was appreciated in full; 'La traviata' was a dead failure. 'Caro Emanuele,' wrote Verdi to his friend and pupil Muzio, 'Traviata last night made a fiasco. Is the fault mine or the actors? Time will show.' Time showed that the responsibility was to be laid entirely to the singers, though they were amongst the best of the day. The tenor, Graziani, took cold and sang his part throughout in a hoarse and almost inaudible voice. Varesi, the baritone, having what he would call a secondary rôle, took no trouble to bring out the dramatic importance of his short but capital part, so that the effect of the celebrated duet between Violetta and Germont in the second act was entirely missed. Mme. Donatelli, who impersonated the delicate, sickly heroine, was one of the stoutest ladies on or off the stage, and when at the beginning of the third act the doctor declares that consumption has wasted away the young lady, and that she cannot live more than a few hours, the audience was thrown in a state of perfectly uproarious glee, a state very different from that necessary to appreciate the tragic action of the last act. Yet the failure at Venice did not prevent the opera from being received enthusiastically elsewhere. In connexion with the 'Traviata' we may add that at its first performance in French, at Paris, Oct. 27, 1864, the

heroine was Christine Nilsson, who then made her first appearance before the public.

Next to the 'Traviata' Verdi wrote 'Les Vêpres Siciliennes,' which appeared in Paris on June 13, 1855. It is strange that writing for the French stage an Italian composer should have chosen for his subject a massacre of the French by the Sicilians. Scribe and Duveyrier may be complimented upon their poetry, but not upon their common sense in offering such a drama to an Italian composer, who, writing for the first time for the Opéra, could hardly refuse a libretto imposed on him by the then omnipotent Scribe. However, the music was appreciated to its value by the French public, who, overlooking the inopportune argument, welcomed heartily the work of the Italian maestro. In Italy—where the opera was reproduced with a different libretto, and under the title of 'Giovanna di Guzman,' the Austrian police not allowing a poem glorifying the revolt of Sicily against oppressors—it did not actually fail, but its many beauties have never been fully appreciated.

'Simone Boccanegra,'—by Piave, expressly composed by Verdi for La Fenice and produced Mar. 12, 1857—was a total failure, though the prologue and last act may be ranked amongst his most powerful inspirations. The failure was owing to the dull and confused libretto, and to a very bad interpretation. Both book and music were afterwards altered—the former by Arrigo Boito—and the opera was revived with success in Milan on Mar. 24, 1881.

'Un ballo in maschera,' though written for the San Carlo of Naples, was produced at the Teatro Apollo of Rome. Its original title was 'Gustavo III.'; but during the rehearsals occurred the attempt of Orsini against Napoleon III. (Jan. 13, 1858), and the performance of an opera with so suggestive a title was interdicted. Verdi received a peremptory order from the police to adapt his music to different words, and upon his refusal the manager of San Carlo brought an action against him for 200,000 francs damages. When this was known, together with the fact that he had refused to ask permission to produce his work as it was, there was very nearly a revolution in Naples. Crowds assembled under his window, and accompanied him through the streets, shouting 'Viva Verdi,' i.e. 'Viva Vittorio Emanuele Re D' Italia.'

In this crisis Jasovacci, the enterprising impresario of Rome, called on Verdi, and taking the responsibility of arranging everything with the Roman police, entered into a contract to produce the work at Rome. Richard, Governor of Boston, was substituted for Gustavus III.; the opera was re-christened 'Un ballo in maschera,' was brought out (Feb. 17, 1859), and Verdi achieved one of his greatest successes.

His next three were written for St. Petersburg, Paris and Cairo.

'La forza del destino'—the plot borrowed by Piave from 'Don Alvar,' a Spanish drama by the Duke of Rivas—was performed with moderate success on Nov. 10, 1862, at St. Petersburg. Seven years later Verdi had the libretto modified by Ghislanzoni, and after various alterations in the music, the opera was again brought before the public.

'Don Carlos,' the words by Méry and Du Locle, was enthusiastically received at the Opéra in Paris, Mar. 11, 1867. Verdi afterwards (1883) introduced some changes in the score, materially shortening the opera.

G. M.; rev. and abridged by F. B.

THE REQUIEM AND 'AIDA.'—Shortly after Rossini's death (1868) Verdi suggested that his memory should be honoured with the composition of a Requiem in which all the most eminent Italian composers of the time should contribute one number. The scheme seemed at first acceptable. But it was not an easy matter to gather together thirteen composers of some standing, and of the names which appear in the original list, apart from Verdi, only two or three are still remembered to-day.¹ There was also a significant omission. Boito, whose 'Mefistofele' had been unsuccessfully performed at La Scala the very year in which Rossini died, was then looked upon as a revolutionary and ignored, while far less gifted men were asked to contribute. When all the numbers were assembled, the faults of the scheme, the inevitable want of homogeneity, the clash of different styles, were but too evident. The idea was then dropped. But when Alessandro Manzoni died in Milan in 1873, Verdi, who had always admired the poet most deeply and sincerely, thought again of the 'Libera me' he had written for Rossini and decided to complete the Requiem. Between the writing of the last number for the proposed Rossini Requiem and the completion of the Manzoni Requiem, Verdi, however, added another opera to his repertory. The Egyptian Government desiring to inaugurate the new opera-house in Cairo with special pomp asked him to write an opera for the occasion on a story suggested by the French Egyptologist, Mariette Bey. Verdi accepted, and the score of 'Aida' was ready by the autumn of 1870. The outbreak of war between France and Prussia, however, delayed the performance,

since the stage decorations had been prepared in Paris. 'Aida' was first produced in December 1871 under the conductorship of Bottesini at Cairo,² and in Feb. 1872 at La Scala conducted by Verdi.

'Aida' was immediately accepted as the most finished and most typical work of its composer. There was no definite break with the Italian tradition which demands that the claims of the singer and of lyrical expression should stand foremost. But the melody of 'Aida,' if it flows not less easily, has greater distinction than the melody of 'Traviata' or 'Don Carlos,' and there are no such lapses into the frankly popular vein which are noticeable now and again in 'Rigoletto.'

Before proceeding to the two last and greatest operas of Verdi it is necessary to revert to the Requiem, which when first heard produced not a little stir and provoked a good deal of hostile criticism in Germany and elsewhere. Two facts gave some semblance of reason to the objections raised against it. In the first place it was known that Verdi, whatever his views on religion, was not by any means an ardent Catholic and had identified himself with the Liberals. In the second place it was urged that his art was not fitted for religious service for the very qualities which made it admirable for the theatre. The answer to such criticism is simple enough. Antagonism to Church party, or to what was then the policy of the Church, does not constitute irreligion. No one has stigmatised policy in more unambiguous terms than Dante, yet he remains the greatest Christian of his time. The second objection falls before the evidence of the common source of church and theatre music. The only question we have a right to ask is whether the composer was sincere in his expression. The years that have gone have answered it conclusively. The manner may be that of a Latin, impetuous, impulsive, picturesque, but the sincerity of the Requiem is above question. Nor could it be otherwise, for Verdi was sincere in all things. Adverse criticism gained strength at the time owing to the onslaught of Bülow who, in the *Allgemeine Zeitung*, 1874, defined the Requiem as a monstrosity. Brahms, however, who had not heard it, on reading Bülow's notice, bought the score, read it through, and declared it to be the work of genius. It must be added that some years later Bülow wrote a repentant letter to Verdi (1892) declaring himself to have been before blinded by fanaticism and partisanship, and frankly owning that even an inadequate performance of the Requiem had since moved him profoundly. He was answered by Verdi with equal frankness and generosity. Both letters deserve to be closely studied for their

¹ The list of contributors was as follows:

1. Requiem eternam (G minor), Buzzola.
2. Dies irae (C minor), Bazzini.
3. Tuba mirum (E♭ minor), Pedrotti.
4. Quid sum miser (A♭ major), Cagnoni.
6. Recordare (F major), Ricci.
6. Ingemisco (A minor), Nini.
7. Confutatis (D major), Boucheron.
8. Lacrymosa (G major, C minor), Cocca.
9. Domine Jesu (C major), Gaspari.
10. Sanctus (D♭ major), Platania.
11. Agnus Dei (F major), Petrella.
12. Lux aeterna (A♭ major), Mabellini.
13. Libera me (C minor), Verdi.

² Cast: Aida, Pozzoni-Anastasi; Amneris, Grossi; Radames Mongini; Ramfis, Medini; Amonaro, Costa; the King, Steller.

bearing on criticism as well as for the characteristic nobility of mind they reveal.

RELATIONS WITH BOITO.—The years which passed between 'Aida' and the next opera, 'Otello,' were years of quiet and perhaps unconscious preparation in which Verdi found at last his ideal librettist, Boito. The relations between the two had been somewhat strained at first, as could be expected in view of the fact that Boito was the leader of the young and revolutionary, while Verdi ever believed that the pace of evolution should not be forced, and that progress is not achieved by rushing blindly forward, but by a deeper understanding of the fundamental laws which have governed music in all ages. Boito in his young days had also turned the popular tenor song in 'Rigoletto,' 'La donna è mobile,' into a polka—which was not likely to endear him to Verdi. But in 1862 the two were brought together in the composition of the 'Inno delle Nazioni' which Verdi wrote for the London Exhibition on words of Boito. In the following year, however, Boito in a toast expressed views which Verdi interpreted as an attack on himself. Boito probably meant nothing of the kind, but he was sanguine, fiery and apt to express his ideas very forcibly. Verdi, on the other hand, kept his temper, but having come to the conclusion that Boito looked upon his art with little respect, if not with contempt, could not be easily induced to believe the opposite. Ever since La Scala performance of 'Aida' Boito had professed himself ready to write a libretto for Verdi. He would consider himself 'honoured and highly fortunate' to write for Verdi, although he would not write a line for anybody else. For long nothing came of it. When the subject of 'Otello' was suggested to Verdi by his publisher Ricordi and the conductor Faccio (1879), the composer did not seem very enthusiastic. Boito submitted a first sketch, which Verdi liked, but although he advised the poet to continue the work he would not accept it definitely. When the text was finished it was shown to Verdi, who then promised to set it to music. But the relations between poet and composer were destined to have yet another set-back. A banquet was given to Boito after the first performance of 'Mefistofele' at the S. Carlo Theatre in Naples, and the composer, pressed to say something on the subject of 'Jago'—this was the first title of 'Otello'—was reported as having expressed regret at not being able to write the music for it himself. Verdi saw in this a reflection on his own ability to write an adequate setting, and immediately offered to return the libretto to Boito. The latter wrote at length pointing out that the pretended slur was not in anything he had actually said, but only in the fantastic interpretation of his words by an irresponsible reporter. Verdi, still protesting

that he was too old, that he could not promise to set to work again, that he had served the public too long, accepted nevertheless the explanation. 'Otello' was finished on Nov. 1, 1886, and performed at La Scala in Feb. 1887, conducted by Franco Faccio, with Pantaleoni, Petrovich, Tamagno and Maurel as principal performers. The success was immediate. The opera was acknowledged as marking the highest point ever reached by Italian opera, and 'Otello' triumphed soon after in all the great European theatres.

VERDI'S ULTIMATE STYLE.—Technically it marks a distinct advance on 'Aida.' Still greater is the advance it marks as regards Verdi's outlook on music and opera. It is known that he had once cherished the idea of setting to music 'King Lear,' and that he had finally put it aside because it had not a love interest in its tragic story, and love, he thought then, was essential to opera. In 'Otello' he proved that opera is possible without a love interest, for the theme of 'Otello' is not love but jealousy. Specially is this the case in Boito's version of the tragedy, which in its inevitable compression ignores the first doubts of the Moor and his desperate longing to trust Desdemona rather than Jago. Another point which may be made here, although it applies equally to 'Falstaff,' concerns Verdi's style. It has been said sometimes that his operas fall into three periods and that the later works show traces of Wagnerian influence. Nothing could be further from the truth. The texture of Wagner's music is essentially contrapuntal, while the texture of Verdi is ever melodic and harmonic. The orchestration of Wagner is based on the contrapuntal style of many threads of equal value being skilfully drawn together; the orchestration of Verdi is founded on the assumption that the singer, and melody with him, are the chief considerations to which the orchestra is subservient. The difference between the earlier and the later operas of Verdi is not one of method but of manner. The accompaniment which before was often colourless and even threadbare becomes ornate, characteristic, picturesque. Once it was the humble slave of the melody; later it becomes its helper, sharing its moods, adding to its power without, however, presuming to take its place. One has only to compare the accompaniment to 'Morire si Pura e Bella' in 'Aida' with the love duet in 'Otello' to see the difference between the two conceptions. Verdi was in favour of certain reforms advocated by Wagner, but he held that it would be unwise for Italians to follow a foreign example. And his evolution followed Italian precedent, for the problem which, as the internal evidence of his operas shows, concerned him most was essentially the same which had attracted Monteverdi—the importance of the recitative and the tyranny

of pure lyricism. Verdi never felt anything like a revolt against the old system of arias, cabalettas and recitatives. He held, in fact, that if there is to be such a thing as a stereotyped plan for opera, one system may be as good as another. But he laboured unceasingly to bring the recitative into line with lyricism and give it a real and living interest. From this point of view his work shows a continuous progress culminating in 'Otello' and 'Falstaff.' The question of a dramatic recitative to take the place of lyrical expression was much to the fore when 'Otello' was first produced, and critics were found who demurred to the lyricism of 'Ora e per sempre' on the ground that it impeded the dramatic progress of the action. The objection is baseless for the reason that a lyrical expression at this point of the drama has its *raison d'être* not in the whim or desire of the composer, but in the psychology of the character, and is hence fully justified.

Verdi was delighted with the reception of 'Otello,' and he derived particular satisfaction from its success in London. He was afraid that Shakespeare's countrymen might find something to say about the way Boito had handled the text. Critics, however, took a broad view, and neither the omission of the first act of the tragedy nor the interpolation of the 'Credo' of Jago provoked unfavourable comment. And the good fortune of 'Otello' made him look upon 'Falstaff' more favourably from the first. Boito suggested it as far back as 1889, and although Verdi appeared to fear lest his age might prevent him from carrying out his part, he was evidently anxious to set to work, and in the following year some progress was made, Verdi protesting that he was writing merely to while away the time. He was exceedingly satisfied with Boito's libretto, and for the first time in his long career he wrote the music without asking the poet to alter a syllable. He had long wished to write a comic opera, and he had possibly given some consideration to the subject of 'The Merry Wives of Windsor' more than once. A rumour was spread that he was composing an opera on 'Falstaff' in 1868; it may have been less completely erroneous than was then thought. It is interesting to note in a letter written in 1891 that Verdi thought a great theatre like La Scala damaging to the effect of 'Falstaff.' It may well be that the comparative coldness with which the opera was then received by the public at large was due to the inadequacy of a large stage for a work abounding in fine, subtle points. In London a performance given by students of the R.C.M. in a comparatively small theatre has evoked more genuine enthusiasm than the elaborate performances at Covent Garden.

'Falstaff' was performed at La Scala on

Feb. 9, 1893, conducted by Edoardo Mascheroni, and sung by Mmes. Zilli, Stehle, Pasqua, Guerrini and MM. Garbin, Maurel, Paroli, Pini-Corsi, Pelagalli-Rossetti and Arimondi. It revealed a new aspect of Verdi's genius of which there is not a glimmer in his other operas. Fra Melitone, the comic character in 'La forza del destino,' is caricature. The essence of 'Falstaff' is humour not caricature. The one needs characterisation while the other implies exaggeration and distortion of character. Every scene abounds in happy strokes. From the first merry bustle which opens the opera to the last glittering fugue proclaiming that 'all in the world is a jest,' it is a succession of wonderful touches where music adds not only charm and eloquence to the word but often completes the thought of the poet. We need only quote Ford's monologue as an example of this subtle yet indissoluble bond between word and notes. Throughout the monologue runs the figure associated with Falstaff's words: 'I'll bamboozle him, neatly, neatly.' Ford grows quite lyrical in praise of his own jealousy and his own foresight, and the orchestra immediately follows this up with the phrase which before accompanied the words: 'And yet they say that jealous husbands are fools!' The fear of dishonour, the belief in his own wisdom, the desire of revenge, all are in the music as thoughts recurring and haunting the unfortunate Ford. There are also very different elements, such as the mellow sadness of the scene which precedes the final punishment of Falstaff in Windsor Park, and the exquisite grace of the love duets between Fenton and Anne Ford which give to the comedy its rich humanity. Above all stands the admirable characterisation. The Falstaff of Boito and Verdi may not be a faithful reproduction of the Falstaff of Shakespeare—but like him he is a diverting and forgivable rogue. Such he was conceived and painted by the composer, who at once grasped the drift of his collaborator and emphasised those traits which make him absurdly plausible and a cause of fun in others.

The first performance of 'Falstaff' was a great personal triumph, and Verdi was recalled times without number. He was also offered a marquisate which he refused without thanks. But he knew the theatre and audiences too well not to realise that somehow 'Falstaff' had not stirred the people as 'Otello' and 'Aida' had done. It was played and well received all over Italy and in the principal musical centres abroad, but it failed to arouse the enthusiasm of Verdi's other operas. It seemed too fine and aristocratic to appeal to the average audience. Verdi began to feel that his work was done, and the thought lay heavier on him than his years. He prepared with Boito the French translation of 'Falstaff,' but 'it is

useless,' he wrote, 'as we shall certainly not go to Paris,' and in a letter to Mme. Zilli, who had sung the part of Alice, he recalled the happy days spent in preparing for the first performance of 'Falstaff,' and how when parting he knew that 'as artists we shall meet no more,' concluding with the phrase 'everything is ended,' underlined. In Nov. 1897 his second wife, who had always been a dear companion, died after a short illness, and left him sadder than he had ever been. The loneliness of old age was all around him, and although he was not physically ill the extraordinary vitality which had kept him young in mind and body so long was slowly ebbing away, and he complained of failing strength and the uselessness of living while unable to read, to see, to feel. He died at S. Agata on Jan. 27, 1901, after a long and painful agony. Boito, who was near him, wrote of his end:

'The Master is dead, and has taken with him a large share of vital warmth and light. We were all sunned by his olympic old age. He died magnificently like a dumb, formidable wrestler. The silence of death fell on him a week before he breathed his last. With bent head he seemed to take the measure of the dreaded adversary and withstand his attack. His resistance was heroic. . . . He fought up to the last moment magnificently against death. . . . I have never felt before such hatred and contempt for this mysterious power, blind, senseless. . . .'

MISCELLANY.—Verdi wrote a great many compositions between the ages of 13 and 18, that is, before coming to Milan. Amongst them are Marches for brass band, short symphonies, six concertos and variations for pianoforte; many serenades, cantatas, arie, and a great many duetti, terzetti and church compositions, including a Stabat Mater. During the three years he remained at Milan he wrote amongst other things two symphonies which were performed there, and a cantata. Upon his return to Busseto, he wrote a 'Messa' and a 'Vespro,' three settings of Tantum Ergo and other sacred compositions, as well as choruses to Alessandro Manzoni's tragedies and 'Il cinque Maggio.' Everything is lost with the exception of a few 'symphonies,' probably 'overtures,' and the music to Manzoni's poems.

To this must be added the 'Inno delle nazioni' (Her Majesty's Theatre, 1862); a group of sacred works, consisting of an Ave Maria *a 4*, upon the 'scala enigmatica' (treated

like a *canto fermo*, each voice having the scale in turn); a Stabat Mater *a 4* with orchestra; 'Laudi alla Vergine Maria' for four-part female chorus; a Te Deum for two four-part choirs and orchestra, 1898, first sung at the Paris Opéra on Apr. 7, 1898; and a string quartet (Naples, 1873) which does not de-

serve the complete neglect into which it has fallen.

The most important recent contribution to literature about Verdi is the volume *I copiolettere di Giuseppe Verdi*, edited by Gaetano Cesari and Alessandro Luzio, consisting of the copy of letters written by Verdi between the years 1844-1900. It was Verdi's habit to write and keep a copy of every letter he sent out. These copies, filling five thick volumes, now collected and published, give us an extraordinary insight into the mind and character of a man whose simplicity, honesty and far-sightedness deserve in themselves to be called great. From these we see how clear a conception he had of his craft, of the theatre, and how a work for the theatre should be prepared. We can follow the correspondence with the poets who wrote his libretti; his suggestions for changes of scenes and dialogue; his description of the action, of the entrances and exits, of the characters—follow him in fact step by step in his long career and in his relations with other men, with humble impresarios, and with his famous collaborators—a publication more important and infinitely more truthful than many an autobiography.

Verdi's dicta have been often discussed and less often understood. 'There will be progress in going back to the old' does not mean that we are to adopt the manner of the old composers, but that in the old composers is the surest foundation of musical art. He did not believe in the 'realism' that became fashionable with 'Cavalleria rusticana,' hence his 'it is better to invent reality than to copy it,' and he pointed to Shakespeare, who 'created' his characters instead of seeking them ready to his hand, as the supreme arbiter. If his opinions on foreign schools have seemed at times unfair or exaggerated, it should be remembered that they were generally meant as a protest against fashions which Verdi felt could not but lead his own countrymen astray.

He was a just and charitable man. The great bulk of his fortune was left in trust for the Casa di Riposo for old musicians which he himself had founded in Milan. F. B.

VERDINA, PIETRO (*d.* Vienna, July 1643),
 singer in 1619 in the Imperial Chapel, Vienna;
 from 1634–35 vice-Kapellmeister. In 1641 the
 emperor presented him with a gold medal. A
 mass of his in MS. is in the library of Krems-
 münster, and Giac. Vincenti's 'Lilia sacra,'
 etc. (1618), contains two motets and 2 canzons,
 3 v. (*Q.-L.*).

VERDONCK (VERDONCK, VERDONCK
 and other forms of spelling), CORNELIUS
 (b. Turnhout, Belgium, 1563; d. Antwerp,
 July 4, 1625). From 1579 or 1580 Verdonck
 belonged to the service of Corneille Pruken,
 treasurer (afterwards sheriff) of the city of
 Antwerp, who died in 1598. He then passed
 to the service of Pruken's nephews, Arnold
 de Cordes (1598–1601) and Jean de Cordes
 (1601–25). This makes Verdonck's sojourn in
 Spain¹ as *moço de capilla* (singer), then oratorio
 singer at the court of Madrid, very doubtful.
 There exists, however, another musician of the
 same name, contemporary, and possibly related,
 living in Spain as singer in the Royal Chapel
 'moyo de oratorio de Sa. Magestad.' It may
 also be he who was a prebend of the church at
 Eindhoven.

As a musician he must have been highly
 appreciated by his contemporaries, as the

following epitaph, inscribed to his memory in
 the Carmelite Church² at Antwerp, shows:

D. O. M. S.
 SISTE GRADUM VIATOR
 UT PERLEGAS QUAM OB REM HIC LAPIS LITTERATUS SIET

 ABIT
 IV NON. JUL. ANNO MDCXXV AETAT. LXII
 AT TU LECTOR BENE PRECARE ET VALE
 CLIENTI SUO MOESTUS PONEBAT
 DE CORDES.

His compositions consist chiefly of madrigals
 for four, six and up to nine voices, many of
 which appear in the miscellaneous collections
 published at Antwerp by Hubert Waelrant and
 Peter Phalèse between 1585 and 1610. A book
 of 'Poesies françoises' a 5, with one a 10,
 was published in 1599, and a set of 6-part
 madrigals in 1603. One of his madrigals was
 received into Young's English collection
 entitled 'Musica transalpina,' published in
 London, 1588. A few sacred compositions
 also appear among the published works of
 Verdonck. A Magnificat a 5 appeared at
 Antwerp in 1584. An Ave Maria of his for
 four voices is printed in Proske's 'Musica
 divina,' Annus ii. Liber ii. 1874. J. R. M.

VEREENIGING VOOR NEDER-
 LANDSCHE MUZIEKGESCHIEDENIS (As-
 sociation for the History of Dutch Music) is the
 literary branch of the national Society for the
 Advancement of Music (see MAATSCHAPPIJ TOT
 BEVORDERING DER TOONKUNST). It was separ-
 ated in 1868–69 for the purpose of collecting and
 publishing materials for the musical history of
 the Dutch Netherlands, especially during the
 period extending from Obrecht (1450) to Swee-
 linck (1621). Its publications are as follows:

1. Sweelinck, Regina Coeli (ed. H. A. Vlot, 1869).
2. Old Dutch Songs, from the lute-book of Adrianus Valerius (ed. A. D. Loman, 1871).
3. Organ compositions, by Sweelinck and Scheldt (ed. R. Eitner, 1871).
4. Twelve Geuzeliedjes, songs of the Geuzen during the Spanish oppression (ed. A. D. Loman, 1872).
5. Three madrigals by Schuyt, and two chansons by Sweelinck (ed. R. Eitner, 1873).
6. Eight Psalms by Sweelinck (ed. R. Eitner), with Life by F. H. L. Tiedeman (1876).
7. Chanson by Sweelinck (ed. R. Eitner, 1877).
8. Selections from Wanning, 'Lili Sententiae' (ed. R. Eitner, 1878).
9. Mass 'Fortuna desperata,' by Jacob Obrecht (ed. R. Eitner, 1880).
10. Old Dutch Dances arranged for piano (four hands) by J. C. M. van Riemsdijk (1882).
11. Const. Huygens, 'Pathodia sacra et profana' (ed. W. J. A. Jonckbloet and J. F. N. Laus, 1883).
12. Six Psalms by Sweelinck, in four parts (ed. R. Eitner, 1884).
13. J. A. Reinken, 'Hortus musicus' (ed. J. C. M. van Riemsdijk, 1886).
14. J. A. Reinken, Partite diverse sopra l'aria: 'Schweiget mir von Welber nehmen' (1887).
- (Without No.) J. P. Sweelinck, 'O Sacrum Convivium,' five-part motet.
15. J. P. Sweelinck, Canto sacra, 'Hodie Christus natus est,' five parts.

¹ Now disappeared. Copy was supplied by M. Goovaerts, keeper of the public archives.

¹ Q.-L., Van der Straeten.

16. 24 Songs of the 15th and 16th centuries, for one voice with accompt. (ed. J. C. M. van Riemsdijk).
17. J. P. Sweelinck, Ps. cl., for eight voices.
18. Obrecht, Passio Domini (St. Matthew), for four voices.
19. A. van Noordt, 'Tabulaturbuch,' Psalms and Fantasias (1659) (ed. Max Seiffert).
20. Old Dutch 'Boerenliedjes' and 'Contradansen,' for violin with PF. accompt. (ed. Julius Röntgen), first set.
21. Marches used in Holland during the War of the Spanish Succession, 1702-1713, collected by J. W. Enschedé, arranged for PF. duet by A. Averkamp.
22. 50 Psalms by Cornelis Boskoop (1668), (ed. Max Seiffert).
23. Old Dutch 'Boerenliedjes' and 'Contradansen' (ed. Julius Röntgen), second set (cf. No. 20).
24. Six-part madrigals by Jan Tolluis (1597) (ed. Max Seiffert).
25. Netherlandish Dances of the 16th century (arranged for PF. duet by J. Röntgen), first set.
26. A Dutch Music-book (1672) (ed. Fl. van H. Duyse).
27. Netherlandish Dances of the 16th century (arranged for PF. duet by J. Röntgen), second book.
28. Scherz musical per la viola da gamba, by Johan Schenk (ed. Dr. Hugo Lechtenfrdt).
29. First Music-book of Tielman (Tyman) Susato after the edition of 1661 (ed. Fl. van Duyse).
30. 25 Three-voiced old Dutch Songs, 16th century (ed. Julius Wolf).
31. Two sonatas for violin with piano accompt. by Pietro Locatelli da Bergamo (ed. Julius Röntgen).
32. Compositionen musical per il cembalo. Divisi in due parti di Corrado Federico Hurlburch (ed. Max Seiffert).
33. Old Dutch 'Boerenliedjes' and 'Contradansen' (ed. Julius Röntgen), third and fourth sets, cf. No. 20.
34. Orchestral compositions by Dutch masters of the early 17th century. 'Paduanen' 'Gallarden' by Melchior Borchgreving, Benedictus Grep and Nicolaus Glistow (ed. H. F. Virth).
35. 'Missa super Benedictis,' by Adrian Willaert, for 5-voiced mixed choir (ed. Ant. Averkamp).
36. Old Dutch 'Boerenliedjes' and 'Contradansen' (ed. Julius Röntgen). Fifth set, cf. No. 20.
37. Old Dutch clavier music from the Music-book of Anna Maria van Eyl (1671) (ed. Julius Röntgen).
38. 'Missa ad modum benedicti' (16 v.); Filippo de Monte (ed. A. Smijers).

The Vereeniging has also published complete collections of the works of Sweelinck (ed. Max Seiffert) and Obrecht (ed. Joh. Wolff). The collected works of Josquin des Prés (ed. A. Smijers are (1927) in progress. Other publications are a volume entitled *Musique et musiciens au XVII^e siècle. Correspondance et œuvres musicales de Constantin Huygens, publiées par W. J. A. Jonckbloet et J. P. N. Land* (1882). Besides these works, transactions (*Bouwsteenen*) were published from 1869-1881. Their place was taken by a regular journal (*Tijdschrift*), publication of which was begun in 1882 and is still continued.

R. L. P.

VERHEYEN, PIERRE (b. Ghent, 1750; d. there, Jan. 11, 1819), son of a singer at St. Bavon, Ghent. Leonard Boutmy gave him his first music lessons. He went to Maastricht to prepare for the University, but his love for music prevailed, and soon after he became tenor singer at Bruges Cathedral, where he produced also some masses and psalms of his own. The paucity of his pay turned his attention towards the theatre, and after some successful tours in Flanders, Northern France and Holland he obtained an engagement at the theatre at Brussels through Witzthumb, who also became his first master in the art of composition, which he continued to study under F. Kraft at Ghent, where, in 1786, he became solo tenor at the cathedral and composer to the Bishop, Prince Lobkowitz. After holding a post of Kapellmeister at Maastricht for some time, he returned in 1790 to Ghent to fill a similar post at Ste Pharaïlde. On the invasion of the French he lost this position, became organist at the 'Temple de la Raison,'

and began to compose operas, which were given at various theatres, chamber music and a number of songs (*romances*). When order had once more been restored to the country, Verheyen resumed his position at Ghent, and composed chiefly for the Church, including 15 masses with full orchestra, 12 masses with organ, a Requiem for Haydn, a Te Deum, numerous psalms, etc. He also composed a cantata, 'La Bataille de Waterloo,' 1816, and in this year a medal was struck in his honour; but in spite of all this he lived and died in very straitened circumstances.

R. v. d. s.

VERHULST, JOHANNES JOSEPHUS HERMAN (b. The Hague, Mar. 19, 1816; d. there, Jan. 17, 1891), was one of the earliest students at the Royal School of Music there, where he learned violin and theory. He afterwards played in the orchestra of the French Opéra under Charles Hansen, and wrote many pieces, amongst others an Overture in B minor which was published by the Maatschappij tot Bevordering der Toonkunst. An allowance from the king enabled him to go first to Cologne, where he studied with Joseph Klein, and then to Leipzig, where he arrived Jan. 12, 1838, and was well received by Mendelssohn, and soon after made director of the important 'Euterpe' Concerts. There and in Germany he remained till 1842, when he returned to The Hague and was at once decorated by the King with the order of the Lion and made Director of the Music at court. Subsequently he resided at Rotterdam, where he became director of the Maatschappij tot bevordering der Toonkunst, at The Hague and at Amsterdam, where for many years he conducted the Felix Meritis Society, the concerts of the 'Maatschappij' and the Cecilia Concerts, as well as the Dilegentia Society at The Hague (from 1860). As a conductor he was very famous in his own country. He retired in 1866. His compositions comprise symphonies, overtures, quartets, much church music (amongst other pieces a Requiem for men's voices), songs and part-songs to Dutch words. Verhulst's music is little known out of his own country. In England the writer only remembers to have heard one piece, an intermezzo for orchestra called 'Gruss aus der Ferne,' performed occasionally at the Crystal Palace. Verhulst's friendship with Schumann was one of the greatest events of his life. How close and affectionate it was may be judged from the many letters given in Jansen's *Davidsbündler*, and especially the following note written at the end of one of Schumann's visits to Holland:

Dear Verhulst,—Good-bye. It delighted me to find you in your old spirits. Unfortunately you cannot say the same of me. Perhaps my good genius may yet bring me back to my former condition. It delighted me too to find that you have got so dear a wife: in that matter we are both equally fortunate. Give her

a nice message from me and take a hearty greeting and embrace for yourself from your old

ROBERT SCH.

Scheveningen, Sept. 8, 1852.

Schumann's 'Overture, Scherzo, and Finale' (op. 52) is dedicated to Verhulst, who possessed the autograph, with the following inscription¹:

J. J. Verhulst
übergiebt die Partitur des alten Opus
mit alten Sympathien.

Rotterdam d. 18 Dec. 1853. R. Schumann.

G.

VERKAUFTE BRAUT, DIE (see *PRODANÁ NEVĚSTA*).

VERMONT, PIERRE, Netherlandish composer, singer in the Papal Chapel from 1529-30, singer in the Royal Chapel, Paris, 1532, and in 1547 appears in an account of the obsequies of Francis I. as 'chapelain des hautes messes' (chanter). In Attaignant's collections of motets and of chansons, 1533-35, there are 8 numbers signed *Vermont primus* and 3 signed *Vermont* only; whether they both refer to Pierre Vermont, since he appears in the lists of singers, has yet to be established. Henry Expert has re-edited a chanson by Vermont *primus* from the Collection of Chansons of 1520 (*Fétis*; *Q.-L.*).

VERNE, the name adopted in 1893 by the two younger sisters of Marie WURM (*q.v.*).

(1) MATHILDE, a pupil of Mme. Schumann, has had a successful career in London as pianist and teacher. She is well known as a chamber-music player and for many years has organised and appeared at the 'Tuesday, 12 o'clock' concerts, a series of well-diversified programmes given during the winter months in London.

In 1909 Miss Mathilde Verne started her school of pianoforte-playing at Kensington, which she has maintained successfully ever since.

(2) ADELA, was a pupil of her sister Mathilde and first appeared in London in 1898. She pursued a brilliant career as a concert pianist and toured successfully all over the world. Later she has taken part in the training offered by her sister's school.

c.

VERNIZZI, OTTAVIO (b. Bologna, c. 1580), organist of S. Petronio from about 1603-48. He was one of the earliest dramatic composers, and wrote 5 'Azioni drammatiche,' the first interludes performed at Bologna between 1617 and 1625, the last one being 'Intermezzi della coronazione di Apollo per Dafne convertita in lauro.' His other works are: motets, 5-10 v., with an organ part for the double chorus motets, lib. 1, 1603; *Armonia ecclesiasticorum*, motets, 2-4 v., with organ, op. 2, 1604; *Angelici concentus*, motets, 2-4 v., op. 3, 1606 (other editions, 1611 and 1631); *Celestium applausus*, motets with basso continuo for organ, op. 4, 1612; *concerti spirituali*, 2-4 v., op. 6, 1648. Adr. Banchieri, who was his

friend, included a Concerto ossia Mottetto in his 'Nuovi pensieri,' 1613 (*Fétis*; *Q.-L.*).

VERNON, JOSEPH (b. Coventry, c. 1738; d. South Lambeth, Mar. 19, 1782), singer, is believed to have been a chorister at St. Paul's Cathedral, London, under William Savage, master of the children; he originally appeared at Drury Lane as a soprano singer in 1751. On Feb. 23 he sang in 'Alfred' (music by Arne and others), and on Nov. 19 performed the part of Thyrsis in Dr. Boyce's 'Shepherd's Lottery.' In 1754 he became a tenor singer. In the early part of 1755 he married, at the Savoy Chapel, Miss Poitier, a singer at Drury Lane. There was some irregularity in the performance of the ceremony which infringed the law for the prevention of clandestine marriages, and Wilkinson, the chaplain of the Savoy, and Grierson, his curate, the actual celebrant, were tried, convicted, and transported. Vernon had been compelled to appear as a witness against Grierson upon his trial, and the public, unjustly suspecting him of having instigated the prosecution, refused to allow him to appear upon the stage. His enforced retirement lasted until the end of 1756, when he was permitted to return, and became an established favourite.

He had an indifferent voice, but sang with such excellent taste and judgment as to render his organic defect almost imperceptible. He was, moreover, an admirable actor, and was constantly allotted parts in which no singing was required. This rare union of the qualities of singer and actor peculiarly fitted him for such parts as the Clown in 'Twelfth Night,' and Autolycus in 'The Winter's Tale,' in both of which he excelled. He was the original Cymon in Michael Arne's opera of that name, and in 1762 created the part of Apollo in 'Midas.' Linley composed for him the well-known song in 'The School for Scandal.' He sang in Michael Arne's 'Fairytale' in 1764, and in the same year succeeded Lowe as the tenor singer at Vauxhall. He remained a favourite singer there until the winter of 1781. He composed, and in 1772 published in a volume,

'The New Songs in the Pantomime of The Witches; the celebrated Epilogue in the Comedy of Twelfth Night; a Song in The Two Gentlemen of Verona; and two favourite Ballads sung by Mr. Vernon at Vauxhall.'

His wife, as 'Mrs. Vernon,' was singing at Drury Lane in 'Thomas and Sally,' in 1760, and a few years later, in other Drury Lane operas, including 'Midas,' 1764, as 'Miss Poitier.'

W. H. H.; rev. F. K.

VÉRON, LOUIS DESIRÉ (b. Paris, Apr. 5, 1798; d. there, Sept. 27, 1867), the son of a stationer, studied medicine on leaving school, and took his doctor's degree in 1823. He had been intimate with the chemist Regnaud, and on his death bought the patent of his 'Pâte Regnaud,' and made a fortune. In 1828 he gave up doctoring, and took to writing for the press. In 1829 he founded the *Revue de Paris*,

¹ See Jansen's *Davidbündler*. See also Nieck Robert Schumann (1925) for several references to the friendship.

and became a personage of importance. In spite of this, however, he gave up journalism, and became (Mar. 2, 1831) director of the Opéra for five years, with a subsidy of 810,000 francs for the first year, 760,000 francs for the second, and 710,000 francs (respectively £32,500, £30,500 and £28,500) for the last three. Thus at his ease in money matters, with an excellent body of artists, and an able coadjutor in Edmond Duponchel (*b.* 1795; *d.* 1868), who looked after the *mise en scène*, his usual luck did not fail him, for the first work he produced was 'Robert le Diable' (Nov. 21, 1831). The success of Meyerbeer's first masterpiece is well known, but it is not so well known that the manager of the Opéra exacted from the composer a large sum in consideration of the expenses of mounting the opera. With much energy and tact Véron at once set to work to vary and renew the repertory, beginning in 1832 with the ballet 'La Sylphide' and ending with the production, Feb. 23, 1835, of 'La Juive,' with Falcon, Nourrit and Levasseur—his greatest success after 'Robert.' Véron relinquished his licence to Duponchel, and took to politics. Failing to secure his election as a Deputy in 1838 he returned to journalism, and became in turn manager, editor and sole proprietor (1844) of the *Constitutionnel*. Véron was twice elected a member of the Corps Législatif. While attending the Chamber he found time to write his own life under the title of *Mémoires d'un bourgeois de Paris* (Paris, 1854, 6 vols. 8vo), which obtained a *succès de curiosité*, and encouraged his author to further works: *Cinq cent mille francs de rente* (1855, 2 vols. 8vo), a novel of manners; a sequel to the *Mémoires* (1856); a political treatise, *Quatre ans de règne. Où allons-nous?* (1857); and, finally, one coming more within the scope of this Dictionary, *Les Théâtres de Paris* (from 1806-60) (1860, 8vo). These books are all forgotten, but 'Mimi Véron' (his nickname at the Opéra balls), the man of business and purveyor of pleasures under Louis Philippe, was a characteristic personage in his day, and a typical 'Bourgeois de Paris,' both in his industry and his vanity. G. C.

VEROVIO, MICHEL ANGELO (called MICHEL-ANGELO DEL VIOLINO), a Roman violinist of the beginning of the 17th century. According to Arteaga (*La rivulazione del teatro musicale*, etc., vol. i. p. 345), he enlarged the resources of violin-playing by the introduction of shakes, mordents, vibrato and other graces. Pietro della Valle and G. B. Doni likewise give accounts of his playing. E. V. D. S.

VEROVIO, SIMONE, a music printer and publisher at Rome, 1586-1604. He was apparently the first who used engraved copper-plates, with Martin van Buyten, a Hollander, as his engraver. A list of his publications appears in Q.-L.

VERSCHIEBUNG (Ger., literally *shoving aside*); see UNA CORDA and MUTE.

VERSCHWORENEN, DIE (*i.e.* The Conspirators)—a one-act play, with dialogue, adapted by Castelli from the French, and composed by Schubert. The MS. in the British Museum has the date Apr. 1823 at the end. The title was changed by the licensors to the less suggestive one of 'Der häusliche Krieg' (*i.e.* The Domestic Struggle), but the piece was not adopted by the management, and remained unperformed till Mar. 1, 1861, when Herbeck produced it at a Musikverein concert. It was brought out on the stage at Frankfort, Aug. 29, 1861; in Paris, as 'La Croisade des dames,' Feb. 3, 1868; at a Crystal Palace Concert ('The Conspirators'), Mar. 2, 1872. G.

VERSE, a term used in church music to signify a passage sung by one or more solo voices. This use came from the Latin into the English services, where the compounds 'Verse-service' and 'Verse-anthem' were applied to compositions which included portions for one or more solo voices with instrumental accompaniment. (See ANTHEM and SERVICE.)

VERSICLE (Lat. *versiculum*), see RESPONSE.

VERSO, ANTONIO IL, a 16th-17th century composer of Piazza, Sicily, lived chiefly at Palermo, and was a pupil of Pietro Vinci. He composed 15 books of madrigals for 3 to 6 v., published between 1594 and 1619; 1 book of motets, 3-6 v. (1606); 4 books of sacred songs, 2-4 v., book 4 with a dialogue, 6 v., and bass for the organ (1611); 1 book villanelle, 3 v. (1612) (*Fétis*; Q.-L.).

VERSTOVSKY, ALEXIS NICHOLAEVICH (*b.* Govt. of Tambov, Feb. 18/Mar. 1, 1799; *d.* Moscow, Nov. 5/17, 1862), probably the most gifted of Glinka's predecessors, was born at his father's manorial mansion in the Government of Tambov.

He was educated at the Institute of Civil Engineers in St. Petersburg, but managed to work fairly steadily at music while carrying on his studies there. His masters for the piano-forte were Field and Steibelt; the violin he learnt from Böhm, singing from Tarquini, and theory from Brandt and Tseiner. Yet with all these advantages Verstovsky remained, like his contemporary Alabiev, merely an accomplished amateur as regards the technique of the art. At nineteen he composed his first vaudeville, and his pleasing, tuneful music soon became the fashion and was much imitated by other less talented composers. In 1824 he was appointed Inspector of the Imperial Opera, Moscow, and in 1842 he married a Russian actress, very famous in her day, Nadejda Repin, who left the stage soon after her marriage. Between 1825 and 1832 Verstovsky wrote the music for a number of typical vaudevilles. In 1828 he tried his hand for the first time at opera and produced

'Pan Tvardovsky' with considerable success. He followed this up by five more operas: 'Vadim' (1832), 'Askold's Tomb' (1835), 'Home-sickness' (1835), 'The Boundary Hills' (1841), and 'Gromoboi' (1845). Of all these works 'Askold's Tomb' was the most deservedly popular.

At this time Russian society so ardently desired the regeneration of national music that it was easily persuaded to believe that a truly representative composer had arisen in the person of Verstovsky. In the first twenty-five years of its existence 'Askold's Tomb' was given four hundred times in Moscow, and reached its two hundredth performance in St. Petersburg. It has never completely passed out of the repertory of national opera, and was revived with some success by the Private Opera Company of Moscow in 1897. It is not grand opera, the music being interspersed with spoken dialogue, and the style throughout, with its mixture of half-gipsy, half-street melodies, is exceedingly patchy. In the episodes which deal with the supernatural it is easy to trace the influence of Weber. The orchestration is very elementary. Yet, with all its weaknesses, 'Askold's Tomb' contains melody which must have seemed fresh, and even original, at the time it was written, and touches of humour which show its composer to have been the true forerunner of Dargomijsky and Moussorgsky. To hail him as the founder of national opera was somewhat premature. Russian music, like Russian literature at that period, was still destined to move a few years longer in grooves of routine and imitation, before Glinka appeared with his higher ideals to lift national opera above the superficial conception of it which we find in Verstovsky and his predecessors. Besides six operas and twenty-two vaudevilles, Verstovsky wrote several dramatic scenes, melodramas, and cantatas. Of his twenty-nine songs the most famous is his setting of Poushkin's Byronic poem 'The Black Shawl.' R. N.

VESI, SIMON, of Forlì, chaplain in 1646 at Padua Cathedral, and from 1648 maestro di cappella to Giorgio Cornaro, Bishop of Padua, Count di Piove, di Sacco, etc. Composed masses, motets, psalms and other church music; also 'Le mascherate di . . .,' 2-4 v., with 2 violins *ad lib.*, op. 5 (1660).

E. v. d. s.

VESPA, GIROLAMO, of Naples, a 16th-century Franciscan monk. From 1589 he calls himself maestro di cappella of the arch-diocese of Fermo, and in 1591 of the Cathedral of Osimo. He composed 4 books of 5-part madrigals (1570-91); vesper psalms (1589); cantiones sacrae; motets, 5-8 v. (1594); some motets, etc., in collective volumes (*Q.-L.*).

VESPERALE—the Vespéral. This Latin Service-book, strictly speaking, need not contain more than the single service of Vespers or

Evensong; but in practice it as a rule contains besides this (and the music belonging to it) the service of Compline, and may even include parts of the Lesser Hours as well of Prime, Terce, Sext, and None, and even of Lauds and Mattins for special occasions.

W. H. F.

VESPERs (Lat. *Officium Vesperarum, Vesperae, Oratio vespertina, Ad Vesperas*); the last but one and most important of the 'Horae Diurnae' or 'Day hours,' in the Antiphonarium.

The music sung at Vespers, though in itself far less considerable than the music of Mattins, has through force of circumstances become more elaborated than the music used at any other of the Hours. The plain-song is found in the Vespéral (see *VESPERALE*), but this service is the chief opportunity for introducing into the Hour Services other music than the plain-song. The Psalmody, for example, is often treated in Faux Bourdon. Many such settings by the great composers are still extant.

The great polyphonic composers wrote Magnificats which were necessarily very elaborate; for during the Canticle the High Altar is censed, and sometimes other altars also—a ceremony which often occupies a considerable time. (See *MAGNIFICAT*.)

The hymns for the various seasons have also been frequently set, in very elaborate form, by the polyphonic composers; Palestrina's 'Hymni totius anni' is a complete collection, of unapproachable beauty. Some fine isolated specimens will also be found among the works of Tallis, Byrd and other composers of the English school; and Proske has published many interesting examples, collected from various sources. The four 'Antiphons of Our Lady'—*Alma Redemptoris, Ave Regina, Regina Coeli* and *Salve Regina*—have been treated by many good writers, including Palestrina, Anerio and O. Lassus, in the form of highly developed motets.

VESPRI SICILIANI, see *VÊPRES SICILIENNES*, LES.

VESQUE VON PÜTTLINGEN, JOHANN (J. HOVEN) (b. Opole, July 23, 1803; d. Vienna, Oct. 29, 1883), composer of operas, was born of a noble family of Belgian origin at Opole, the residence of Prince Alexander Lubomirski. His parents went to live in Vienna in 1804, and at 12 years old he was sent to the Löwenbürgische Convict there for about a year. He began his musical studies in 1816, learning successively from Leidesdorf, Moscheles and Worzischek. In 1822 he went to the University of Vienna in order to study for the civil service, which he entered in 1827. As early as 1830 he completed an opera, on the libretto of Rossini's 'Donna del Lago,' which was performed by amateurs in a private house. In 1833 he studied counterpoint, etc., with Sechter, and in Oct. 1838 a two-act opera, 'Turandot,' was given with success at the

Kärnthnertheater. In this and his other musical compositions he adopted the pseudonym of 'J. Hoven.' Two years later a third opera, 'Jeanne d'Arc,' in three acts, was given in Vienna. The work was considered worthy of being performed at Dresden in 1845, with Johanna Wagner in the principal part. His other operas are 'Der Liebeszauber,' four acts, 1845; 'Ein Abenteuer Carl des II.,' one act, 1850; 'Burg Thayer,' three acts, apparently not performed; 'Der lustige Rath,' two acts, 1852, produced at Weimar by Liszt; 'Lips Tellian,' one act, 1854. In 1872 he retired from the civil service, and in 1879 received the title of 'Geheimrath.' He enjoyed the friendship of nearly all the musicians of his time; he corresponded with Mendelssohn, Schumann, Berlioz, Liszt, and many other distinguished men. His compositions of various kinds reach the opus number 58, besides two masses, and other works unpublished. He also published a book, *Das musikalische Autorrecht*. The above information is obtained from a sketch of his life published by Holder of Vienna, 1887, bearing no author's name.

VESTALE, LA, lyric tragedy in 3 acts; words by Jouy; music by Spontini. Produced Opéra, Paris, Dec. 15, 1807.

VESTRIS (VESTRI), a family of Italian musicians and dancers, originally of Florence. Of the eight children of Marie Hippolyte Vestris and Violante Béatrix de Dominique Bruscagli, his wife, the four best known settled in Paris in 1747 with their mother and eldest brother, Jean-Baptiste, called the 'cuisinier' of the family.

(1) GAËTAN APOLLINE BALTHASAR (b. Florence, Apr. 18, 1729; d. Paris, Sept. 23, 1808), dancer and Italian choreograph, appeared at the Paris Opéra in 1747; was first dancer of the King's ballets in 1749, and in 1751 succeeded his master, Dupré, the '*diou de la danse*,' who had begun the reform which raised the dance to a higher level. Vestris travelled much, however. He was in Berlin and in Italy (1754); at Stuttgart, where he directed the ballet with Noverre in 1760; at Vienna (Jan. and Sept. 1767: Leopold Mozart speaks of him at this time) and at Warsaw.

Master and 'compositeur des ballets' (1770-1775), first dancer (1776-81), Vestris retired May 12, 1782. From 1776 he had received a salary of 4500 livres as first dancer at the court. He appeared again in 1795, 1799 and 1800, for the débuts of his grandsons.

He married (June 16, 1792) Mlle Heinel (b. Bayreuth, Oct. 4, 1753; d. Paris, Mar. 17, 1808), a dancer at the Opéra from 1766-82, by whom he had one son (b. May 9, 1791).

Vestris contributed, like Noverre, to the reform of the ballet. He suppressed the masks of the dancers, and brought more sincerity into the costume. Called by his brother 'le *diou de*

la danse,' like Dupré of old he was 'grand, très bel homme et parfait dans la danse noble.'¹

(2) MARIE JEAN AUGUSTIN (called Auguste; also Vestr' Allard (b. Mar. 27, 1760; d. Montmartre, Paris, Dec. 5, 1842), natural son of Vestris (1) and of Marie Allard (a dancer at the Opéra from 1761-81). He made his début at the Opéra at the age of 12. As 'danseur seul' (1776) and 'premier sujet' (1780), Augustin was considered the first dancer of his time.² He created the style called 'demi-caractère comique.'

In 1780 Augustin spent some time in England with his father. His benefit alone brought him in 12,000 guineas. Of a capricious, difficult nature he was imprisoned on July 16, 1784, for refusing to play before the court and the King of Sweden at the Opéra.

At the Revolution he went over to England and became ballet-master at the King's Theatre at the same time that Haydn was composer there. After his retirement from the Opéra (Sept. 27, 1816) he fell into great misery and was even imprisoned for debt (July 22, 1819). He was the husband of the dancer Anne Catherine Augier (called Aimée) (1777-1809). She had made her début at the Opéra in 1793, and was separated from him. Augustin married again in 1823. His second wife, Jeanne Marie Tuillière, died before him, May 4, 1842. He reappeared for one night at the Opéra in 'Paul et Virginie' (1826) as Domingo. Under Louis Philippe he tried in vain to get himself nominated ballet-master at the court (1833); but he was professor from 1821 till c. 1826 to the École 'de Perfectionnement' and to the École 'de grâce' at the Opéra. Among his pupils may be mentioned La Tagliani and the dancer Parrot, whose portrait, by Adèle Romance, was exhibited at the Exposition des Femmes Peintres du XVIII^e siècle, Paris, May 1926.

(3) AUGUSTE ARMAND (b. Paris, 1788; d. 1825), son of the preceding, made his début at the Opéra, Mar. 1, 1800, beside his father and grandfather. Protected by Mme. Bonaparte, he resigned this post (Oct. 20, 1803) in order to travel first to Italy, then to England, where he married the singer Lucia Elizabeth Bartolozzi (see VESTRIS, Mme.). He then became ballet-master at the King's Theatre. He returned to Paris with his wife, leaving her about 1820.

(4) MARIE FRANÇOISE THÉRÈSE (b. Florence, Feb. 1, 1726 or 1731; d. Paris, Jan. 18, 1808), a dancer. After travelling in Italy and visiting Vienna and Dresden, she was the first of the family to arrive in Paris in 1746. She was admitted to the 'ballets du roi' in 1749, and made her début at the Opéra in a *pas de deux* with her brother Gaëtan (1) (Apr. 1, 1751). She remained there until 1766.

¹ Mme. Lebrun, *Mémoires*, i. 132.

² See Noverre, *Lettre sur les ballets*, also Mme. Lebrun, *Mémoires*, i. 132.

(5) MARIE CATHERINE VIOLANTE (or VIOLANTINA) (b. Florence, c. 1732; d. Paris, Apr. 23, 1791), singer and dancer. She arrived in Paris in 1748; sang first at the court, then at the Concert Spirituel (Aug. 15, 1752), accompanied on the flute by her brother Angiolo (5). In December of the same year she was in London, where she married the celebrated violinist Felice de GIARDINI (*q.v.*). She appeared later in the Concert Spirituel up to 1757 as an Italian singer, under the name of Vestris-Giardini. Her name is also found as Jardiny.

(6) ANGIOLO MARIA GASPARO (b. Florence, Nov. 19, 1730; d. Paris, June 10, 1809) brother of Gaëtan Vestris (1), flautist, dancer and actor, was admitted to the ballets (1753-1757) after having appeared at the Concert Spirituel as flautist (see VESTRIS 4 and 5). He danced at Stuttgart (1758), was engaged there (1761) and married there in 1766 Françoise Rose Gourgaud (b. Marseilles, Apr. 7, 1743; d. Paris, Oct. 5, 1804) the future celebrated actress of the Théâtre-Français, step-sister of Dugazon. Angiolo left the Opéra for the Comédie-Italienne (1769-80), at which he was but a mediocre actor.

(7) CHARLES (b. Paris, 1797), a dancer, pupil and son (or nephew) of Augustin (2), made his début at the age of 12 at the Opéra in 'La Caravane' (Oct. 3, 1809) and remained there until 1813. He then went abroad.

J. G. F.

VESTRIS, MME. LUCIA ELIZABETH (ELIZA LUCY¹) (b. London, Jan. 3 or Mar. 2, 1797; d. Fulham, Aug. 8, 1856), daughter of Gaetan Stefano Bartolozzi, and granddaughter of Francesco Bartolozzi, the celebrated engraver. On Jan. 28, 1813, she married Auguste Armand Vestris (3 above), dancer and ballet-master at the King's Theatre and grandson of Gaëtan Vestris. It was on the occasion of his benefit at that theatre (July 20, 1815) that his wife, having received instruction in singing from Corri, made her first appearance in public as Proserpine in Winter's 'Il ratto di Proserpina.' Her success that season was great, in spite of her then limited ideas of acting and want of vocal cultivation. She reappeared in 1816 in Winter's 'Proserpina' and 'Zaira,' Martini's 'Cosa rara,' and Mozart's 'Così fan tutte' and 'Nozze' (Susanna), but with less success, her faults becoming more manifest with familiarity. In the winter she appeared at the Italian Opera, Paris, and at various theatres there, including the Français, where she played Camille in 'Les Horaces,' with Talma as Horace. About this time Vestris deserted her. On Feb. 19, 1820, she made her début at Drury Lane as Lilla in 'The Siege of Belgrade'; made an immediate success in that and in Adela ('The Haunted

Tower'), 'Artaxerxes,' 'Macheath' and 'Giovanni in London,' and remained for many years a favourite at the patent theatres, not only in opera, but in musical farces and comedies.

In certain of these she introduced well-known songs—'Cherry ripe,' 'I've been roaming,' 'Meet me by moonlight alone,' and others, which gained their popularity at the outset through her very popular ballad singing. During her engagements with Elliston, Charles Kemble, etc., with their permission she reappeared at the King's Theatre, and played in Rossini's operas on their production in England, viz. as Pippo (in 'La Gazza'), Mar. 10, 1821; Malcolm Graeme (in 'Donna del lago'), Feb. 18, 1823; Zamira (in 'Ricardo e Zoraida'), June 5, 1823; Edoardo (in 'Matilde di Shabran'), July 3, 1823; Emma (in 'Zelmira'), at Mme. Colbran-Rossini's début, Jan. 24, 1824; and Arsace, with Pasta as Semiramide, July 15, 1824. She played there also in 1825, and on Apr. 12, 1826, she played Fatima on the production of 'Oberon.' In 1827 she appeared in English at Covent Garden, as George Brown in 'The White Maid' ('La Dame blanche'), Jan. 2, a part played in Paris by the tenor Ponchard, and Blonde in 'The Seraglio,' a mutilated version of Mozart's 'Entführung,' Nov. 24. With her subsequent career as manager of the Olympic, Covent Garden and Lyceum, we cannot deal, save to mention that during her tenancy of Covent Garden, in conjunction with Charles Mathews the younger (whom she married July 18, 1838), opera was occasionally performed, viz. 'Artaxerxes,' 'Comus,' etc., English versions of 'Norma,' 'Elena di Feltre' (Mercadante), and 'Figaro,' with Miss Kemble, Miss Rainforth, etc., and with Benedict as conductor. In 'Figaro' she played Cherubino, but resigned 'Voi che sapete' to Miss Kemble. She had appeared in Dublin in 1824, 1831, 1836, 1841, 1843 and 1845; and took a farewell benefit there in 1847. She is buried at Kensal Green.

'As a girl she was extremely bewitching, if not faultlessly beautiful—endowed with one of the most musical, easy, rich contralto voices ever bestowed on a singer, and retaining its charm to the last—full of taste and fancy for all that was luxurious, but either not willing, or not able to learn, beyond a certain depth.'

At the Italian Opera, says Chorley,³

'If she had possessed musical patience and energy, she might have queneed it, because she possessed (half Italian by birth) one of the most luscious of low voices, great personal beauty, an almost faultless figure, which she adorned with consummate art, and no common stage address. But a less arduous career pleased her better; so she could not—or perhaps would not—remain on the Italian stage.'

A. C.

VIADANA (LODOVICO GROSSI) (b. Viadana, c. 1564; d. Gualtieri on the Po, May 2, 1645), took his name from the place of his birth. He was (according to Parazzi's monograph, 1876) a pupil of Costanzo Porta, in 1594

¹ Signature at second marriage.

² *Athenæum*, Aug. 17, 1856.

³ *Musical Recollections*.

was maestro in the cathedral of Mantua, an office he retained for fifteen years, visiting Venice and Rome during that period. In 1596 he entered the Franciscan order, and in 1609 was appointed maestro at Concordia, whence in 1612 he went to the cathedral at Fano. From 1615 he lived at Piacenza, and died in the Franciscan convent at Gualtieri. He composed and published a number of volumes of canzonets (1590, 1594), madrigals (1591 and 1593), psalms (1595, 1604, 1612), canticles and masses (1596, etc.); but the work upon which his historical significance rests is a collection of

¹ 'Cento concerti ecclesiastici a 1, a 2, a 3, e a 4 voci, con il basso continuo per sonar nell' organo. Nova inventione commoda per ogni sorte di cantori e per gli organisti.'

published at Venice, 1602, in partbooks. In consequence of this publication Viadana has been commonly regarded as the inventor of the (unfigured) *basso continuo* to accompany the voice on an instrument—a judgment expressed, but, as Ambros¹ thinks, unfairly, in the remark of a contemporary, Praetorius. As a matter of fact, *basso continuo* had been employed in the accompaniment of recitative two years earlier by Caccini and Peri and others before them. Viadana mentions in his preface, however, that his concerti had been performed in Rome 5 or 6 years before, that they were admired and imitated and that imitations were printed. Therefore Peri, Caccini and Cavalieri² may have got the idea from him. The question is discussed at length under THOROUGH-BASS. Whatever way the claim of priority be decided, the method enabled Viadana to employ a freer and lighter style than his contemporaries of the Roman school. Building up his compositions (in his 'Cento concerti') from the bass instead of from a cantus firmus, he succeeded in creating real self-contained melodies; and if he cannot be justly regarded as the inventor of the notion of *basso continuo*, he at least was led by it to a not far-off view of the modern principle of melodic, as opposed to contrapuntal, composition. (See Q.-L. for list of works.) Parazzi mentions a portrait of Viadana which was in the Franciscan convent of the town of Viadana about the middle of the 18th century, also another portrait in the possession of G. Grossi, the last of the family, who died 1814, aged 93. This was afterwards presented to the 'Chiesa Arcipretale Plebana del Castello di Viadana,' where it was hung in the sacristy.

Théâtre-Italien, Paris, June 19, 1825. The music was afterwards adapted to the new libretto of 'LE COMTE OREY' (q.v.). G.

VIANESI, AUGUSTE CHARLES LÉONARD FRANÇOIS (b. Leghorn, Nov. 2, 1837; d. New York City, Nov. 11, 1908), who was naturalised a Frenchman in 1885, had been for many years the conductor of various Italian opera companies before finally becoming first conductor at the Opéra in Paris. He was the son of a musician, and was taught music by the advice of Pacini and Döhler, and became a chorus-master in Italy. In 1857 he came to Paris furnished with a letter of introduction to Rossini from Pasta, and in Paris he completed his musical education. In 1859 he was called to London to conduct the orchestra at Drury Lane. He then went to New York, and was afterwards engaged at the Imperial Theatre at Moscow. He made a short stay in St. Petersburg, and then for twelve years conducted the Italian opera at Covent Garden. On July 1, 1887, Vianesi was chosen by the directors of the Opéra to replace ALTÈS as conductor. In 1892 and 1893 he conducted opera in New York and Philadelphia. A. J.

VIARDOT-GARCIA, (1) MICHELLE FERDINANDE PAULINE (b. Paris, July 18, 1821; d. there, May 17/18, 1910), a great lyric actress and singer, younger sister of Maria Malibran, and daughter of the famous Spanish tenor and teacher, Manuel del Popolo GARCIA (q.v.), and of his wife, Joaquina Sitchéz, an accomplished actress. She received her names from her sponsors, Ferdinand Paër, the composer, and the Princess Pauline Galitzin.

The child showed extraordinary intelligence, with a marvellous aptitude for learning and retaining everything. She learned languages as if in play. Her facility for painting, especially portrait-painting, was equally great. Her earliest pianoforte lessons were given her by Marcos Vega, at New York, when she was not 4 years old. At 8, after her return from Mexico, she played the accompaniments for her father at his singing-lessons, 'and I think,' she wrote afterwards, 'I profited by the lessons even more than the pupils did.' She thus acquired a knowledge of Garcia's method, although she never was his pupil in the usual sense, and assures us that her mother was her 'only singing-master.' Her father worked her hard, however, as he did every one. In his drawing-room operettas, composed for his pupils, there were parts for her, 'containing,' she said, 'things more difficult than any I have sung since.' I still preserve them as precious treasures.' The piano she studied for many years with Meysenbergh, and afterwards with Liszt; counterpoint and composition with Reicha.

After the death of her father and sister she lived with her mother at Brussels, where, in 1837, she made her first appearance as a singer,

SONTAG AS 'DONNA ANNA'

PAULINE VIARDOT-GARCIA

From a lithograph by N. Piosczynski

under the auspices of her brother-in-law, Charles de Bériot. She afterwards sang for him on a concert tour, and in 1838 at the Théâtre de la Renaissance in Paris, at a concert, where her powers of execution were brilliantly displayed in a 'Cadence du Diable' framed on the 'Trillo del Diavolo' of Tartini. On May 9, 1839, she appeared at Her Majesty's Theatre as Desdemona in 'Otello,' and with genuine success, which increased at each performance. A certain resemblance to her sister MALIBRAN (*q.v.*) in voice and style won the favour of her audience, while critics were not wanting who discerned in her, even at that early age, an originality and an intellectual force all her own. In the autumn of the same year she was engaged for the Théâtre-Italien by the impresario Louis Viardot (*b. Dijon, Côte d'Or, 1800; d. May 5, 1883*), a distinguished writer and critic, founder of the *Revue Indépendante*, director of the Théâtre-Italien from 1838. She appeared there on Oct. 8, 1839. There, chiefly in the operas of Rossini, she shared in the triumphs of Grisi, Persiani, Rubini, Tamburini and Lablache. Her face lacked regularity of feature; her voice, a mezzo-soprano, but so extended by art as to compass more than three octaves, from tenor C to F in alt, was neither equal nor always beautiful in tone. It had probably been overworked in youth: although expressive it was thin and sometimes even harsh, but she could turn her very deficiencies to account. Her picturesque weirdness and statuesque grace, her inventive power and consummate mastery over all the resources of her art, nay, her voice and face, irregular, but full of contrast and expression—all these appealed to the imagination, and formed an ensemble irresistible in its piquancy and originality.

In 1841 she married Viardot, who resigned the Opera management, and accompanied her to Italy, Spain, Germany, Russia and England. At Berlin, after her performance of Rahel, in 'La Juive,' one of her greatest parts, she was serenaded by the whole orchestra. Here, too, she astounded both connoisseurs and public by volunteering at a moment's notice to sing the part of Isabelle in 'Robert le Diable' for Fräulein Tuzcek, in addition to her own part of Alice—a bold attempt, vindicated by its brilliant success.

She returned to Paris in 1849 for the production of Meyerbeer's 'Prophète.' She had been specially chosen by the composer for Fidès, and to her help and suggestions he was more indebted than is generally known. She was indeed, as Moscheles wrote, 'the life and soul of the opera, which owed to her at least half of its great success.' She played Fidès more than 200 times in all the chief opera-houses in Europe.

From 1848-58 she appeared every year in London. In Paris, 1851, she created the title-part in Gounod's 'Sapho.' In 1859 Carvalho,

director of the Théâtre-Lyrique, revived the 'Orphée' of Gluck, which had not been heard for thirty years. The part of Orphée, restored (by Berlioz) from a high tenor to the contralto for which it was written, was taken by Mme. Viardot, who achieved in it a triumph perhaps unique.¹ This revival was followed in 1861 by that of Gluck's 'Alceste' at the Opéra. The music of this—as Berlioz calls it—'wellnigh inaccessible part,' was less suited than that of Orphée to Mme. Viardot's voice, but it was perhaps the greatest of all her achievements, and a worthy crown to a repertory which had included Desdemona, Cenerentola, Rosina, Norma, Arsace, Camilla ('Orazi'), Amina, Romeo, Lucia, Maria di Rohan, Ninette, Leonora ('Favorita'), Azucena, Donna Anna, Zerlina, Rahel, Iphigénie, Alice, Isabelle, Valentine, Fidès and Orphée.

In 1863 Mme. Viardot fixed her abode at Baden, and sang no more at the Opera, though she appeared at concerts, and was heard in London as late as 1870. She composed a great deal, and several operettas, the books of which were written for her by Turgéniev, were represented in her little private theatre by her pupils and her children. One of these, 'Le Dernier Sorcier,' translated into German by Richard Pohl as 'Der letzte Zauberer,' was performed in public at Weimar, Carlsruhe and Riga. In 1871 she was obliged, as the wife of a Frenchman, to leave Germany, and after that lived in Paris. She devoted much time to teaching, and taught singing at the Paris Conservatoire, 1871-75. Among her pupils may be named Désirée Artôt, Orgeni, Marianne Brandt and Antoinette Sterling. Mme. Viardot published several collections of original songs, and vocal transcriptions of some of Chopin's mazurkas, made famous by her own singing of them and by that of Jenny Lind. Her daughter,

(2) LOUISE PAULINE MARIE HÉRITTE - VIARDOT (*b. Paris, Dec. 14, 1841; d. Heidelberg, Jan. 1918*), was a teacher of singing successively in the Conservatoire of St. Petersburg, Dr. Hoch's conservatorium at Frankfurt and at Berlin. She married, 1862, the 'General-Consul,' Hérितte. Her comic opera 'Lindoro' was given at Weimar in 1879, a cantata, 'Das Bacchusfest,' at Stockholm in 1880, and many songs, etc., have been published. Another daughter, Marianne, married the composer and pianist, Alphonse DUVERNOY. Her son, (3) PAUL VIARDOT (*b. Courtavenel, July 20, 1857*), a pupil of Léonard, appeared with success in London and elsewhere as a violinist. He conducted at the Opéra in Paris occasionally.

Mme. Viardot was the centre of a distinguished circle of friends, by whom she was as much beloved for her virtues as admired for

VIBRATO (Ital. from *vibrare*, 'to vibrate') is used to mean the pulsation of a note by slight and rapidly recurring variations of pitch.

I. INSTRUMENTAL.—(a) It belongs essentially to the art of the string-player who produces a throbbing effect on sustained notes by the rapid oscillating motion from the wrist of the finger stopping the note. As an emotional effect produced by physical means it has obvious dangers, but no string-player's technique is complete without its acquirement. C.

Vibrato has undoubtedly been known to stringed-instrument players for over three centuries. Its origin is a matter for speculation, although Leopold Mozart (*Violinschule*, 1756), gracefully disposed of the question in the phrase 'Nature herself suggested it to man.' We can trace the use of the 'vibrato' as far back as 1636, when Mersenne (*Harmonie universelle*) eulogises 'Les Sieurs Bocan Lazzarin' and others, who played with a *tremblement qui ravissent l'esprit*. The viol-players of Mersenne's time also employed the vibrato with circumspection. Christopher Simpson (*The Division Violinist*, 1659) advocates its use in 'any movement of the voice imitated by the viol.' A glimpse of the progress of the 'vibrato' is afforded us by Geminiani (*The Art of Violin Playing*, 1751), who attempts a minute description of the 'vibrato' under the heading: 'Of the Shake,' in which he embodies the modern elements of the art. Baillot (*L'Art du violon*) calls it *l'ondulation de la main gauche*. In fact the term 'vibrato' is a modern description of a well-established practice. O. E.

(b) The *vibrato* is obtainable to a limited extent on wind instruments, notably flute and cornet, by an irregularity in the supply of wind which causes the pitch to waver. The mechanism known as TREMULANT (*q.v.*) on the organ has a similar effect, as also stops such as the VOIX CÉLESTES (*q.v.*), where two ranks of pipes slightly out of tune with one another are heard simultaneously.

II. VOCAL.—(a) This vibrato, more commonly called TREMOLO (*q.v.*), seems to be a natural property of some voices and has been cultivated (often with deplorable results) by others. Obviously the first necessity of the singer with a natural tendency to waver in pitch is to secure control. The vibrato tends to appear in moments of emotional intensity, and such appearances in a voice generally under control have their force. The artificial

simulation of emotion is as offensive as the incapacity to sustain a note at its true pitch. C.

(b) The singer's vibrato, corresponding to the string-player's tremolo, is an alternate partial extinction and re-enforcement of the note. This was a legitimate figure used rhythmically of the *floriture* of the Farinelli and Caffarelli period. It was introduced with wonderful effect by Jenny Lind in 'La figlia del reggimento.' In the midst of a flood of vocalisation these groups of notes occurred,

executed with the same brilliance and precision as they would be on the pianoforte.

VICARS-CHORAL, 'the assistants or deputies of the canons or prebendaries of [English] collegiate churches, in the discharge of their duties, especially, though not exclusively, those performed in the choir or chancel, as distinguished from those belonging to the altar and pulpit.' (Hook.)

The vicars-choral answer to the *κανονικοί ψαλτάρι* of the early Church. Originally each member of the capitular body had a vicar-choral or minor canon attached to his dignity, whose appointment only lasted during his own life; but in process of time the numbers of these inferior ecclesiastical corporations became diminished. The difference between minor canons and vicars-choral appears to be that whereas for the former, only clergy are eligible, the latter post can be held by either laymen or clerics. The former term is generally found in cathedrals of the new foundation, where the lay-members are termed 'lay-clerks,' the name 'vicars-choral' being chiefly confined to cathedrals of the old foundation. St. Patrick's (Dublin) and Hereford have both minor canons and vicars-choral; in the former the two bodies form distinct corporations, in the latter they are united. In all cathedrals of the old foundation in England, in St. David's, and in twelve Irish cathedrals, the vicars-choral form a distinct corporation, the members of which vary in number from twelve to three: these corporations are distinct from the chapter as regards property, but in subjection to it as to the performance of the services. Formerly the members of these ecclesiastical colleges lived in common in collegiate buildings, some of which (as at Hereford, Wells and York) still exist. The 42nd Canon orders that the vicars-choral shall 'be urged to the study of the Holy Scriptures, and every one of them to have the New Testament, not only in English, but also in Latin.' The name is entirely confined to the Anglican Church. (Jebb on *Choral Service*; Hook's *Church Dictionary*, etc.) W. B. S.

VICENTINO, NICOLA (b. Vicenza, 1511 or 1512).¹ If we are to believe the title he gives himself in his first publication, as 'unico discepolo' to Adrian Willaert,² he had his musical education at Venice; but as the 'unico' is plainly false, we may perhaps question the 'discepolo.' He became ordained, entered the service of Ipolito di Este, cardinal of Ferrara, and accompanied him to Rome, where he lived, it seems, for many years. In 1546 he published a volume of five-part madrigals, with explanatory directions, written with the design of restoring the Greek modes. He then invented a peculiar instrument, the 'archicembalo,' with several keyboards, in order to illustrate his system, and employed a private choir to practise it. He published also a theoretical work entitled *L'antica musica ridotta alla moderna prattica* (Rome, 1555). His efforts were, however, rewarded with scant success, and he experienced much opposition. One contest into which he was led in defence of his theory, and in which he was defeated—that, namely, with Lusitano—is famous. (See DANKERTS.) The cardinal, his patron, is said to have looked on Vicentino's discomfiture as a personal affront; he took him back to Ferrara, and appointed him maestro di cappella in his court. This post he appears to have held until his death. If we may judge by a medal struck in his honour, which describes him as 'perfectae musicae divisionisque inventor,' he must have enjoyed a certain amount of fame; but there is a story that the medal was his own device. His real eminence was that of a performer on the clavichord, and it is difficult to quarrel with the criticism of J. B. Doni and Apostolo Zeno, who ridiculed him for pretending to be anything more than a performer. At best his theories belong only to a passing phase in the history of music.³ R. L. P.

VICTIMAE PASCHALI, see SEQUENCE (b), section (I).

VICTORIA, TOMÁS LUIS DE (b. Avila, c. 1535 or 1540; d. Madrid, Aug. 27, 1611), Spanish church composer, who has hitherto been more generally known in musical history by his name in its Italianised form, Vittoria, Tommaso Ludovico da. In Spanish documents his name sometimes appears as Vitoria, but never Vittoria. In his Latin publications it is always given as Thomas Ludovicus de (or à) Vitoria.

As a composer Victoria has usually been reckoned as belonging to the Roman school of Palestrina, and allowed to be next to Palestrina, the greatest musician of the school. But

Spanish by birth, he always remained Spanish in feeling, though like Escobedo, Morales, Soto, and other Spanish musicians, he made Rome for a considerable time the chief sphere of his musical activity, and as a younger contemporary of Palestrina was naturally influenced by him to some extent. It is a striking coincidence, and may be regarded as a symbol of the close connexion of the Spanish music of the 16th century with Spanish religion that Avila, the birthplace of St. Teresa, the most striking embodiment of the Spanish religious spirit, was also the birthplace of Victoria, the noblest representative of Spanish music. The mystic-ascetical spirit peculiar to Spain is common to both. It is the expression of this spirit in Victoria's music that vindicates his claim to an independent position of his own alongside of Palestrina and redeems him from the charge of being merely a subordinate member of the school like Anerio and Soriano. Avila, in Old Castile, is inferred to have been his birthplace from the designation Abulensis being always appended to his name in the Latin titles of his works. Various documents unearthed by Perez Pastor and quoted by Pedrell appear to show that Sanchidrian, a small village near Avila, was the home of his family, but as Sanchidrian itself is also described as 'tierra de la ciudad de Avila,' this may be sufficient to warrant the acceptance of Avila as the place of his birth, as no doubt it would also be the place of his early education. The precise date of his birth has not been ascertained, but the known facts of his life have induced most authorities to place it about 1540. F. Pedrell, the modern editor of his works, is inclined to place it earlier, sometime between 1530 and 1535. About his earlier life in Spain we have no authentic record. It may be conjectured with some degree of probability that his teacher in musical composition was Bartolomeo Escobedo, who after serving in the Sistine Chapel choir from 1536 had retired to Spain in 1554, and been provided with a church benefice in Segovia, within easy reach of Avila. The more celebrated Spanish master Christobal Morales cannot have been his teacher, as, leaving Rome in 1545, Morales had died in 1553 after a somewhat unsettled life between Toledo, Seville and Malaga. H. Collet, the French biographer of Victoria, indulges in the interesting speculation whether, and how far, while still in Spain, Victoria may have been acquainted with and influenced by St. Teresa and the reforming religious movement associated with her name. It was in 1554 that what Teresa describes as her 'conversion,' the beginning of her mystical experiences, took place, and 1562 is the date of her first foundation at Avila of a religious house of reformed Carmelites. It appears too that in her book of the 'Foundations,' she mentions Augustin de Victoria, who is known to be a brother of the

¹ The place has been incorrectly given as Rome, and the date as 1513; but the latter is fixed to a year or two earlier by the notice in his 'Antica musica,' 1555, that he was then in his 44th year.

² Caffi has singularly inverted the relation, making Vicentino Willaert's master: *Storia della musica sacra nella più cappella ducale di san Marco in Venezia*, I. 83, 136; Venice, 1854.

³ A manuscript notice furnished in 1826 by Abbate Todeschini of Vicenza to the Gesellschaft der Musikfreunde in Vienna, and now preserved in the library of that society, adds nothing to our knowledge of Vicentino's biography.

composer, as one who had greatly befriended her and her religious houses. It is probable that some time before 1565 Victoria was ordained to the priesthood, but our first authentic piece of information with regard to him consists of a privilege from King Philip II., dated Dec. 14, 1565, granting to Maestro Tomé de Victoria an allowance from the royal exchequer, apparently to enable him to proceed to Rome for the further study of music.

In 1566 Victoria appears engaged as a chaplain-singer at the Collegium Germanicum in Rome. This institution had been founded in 1552 by Ignatius Loyola for the training of German priests to combat Lutheranism, and specially for service in Bavaria and the Rhineland. It continued to flourish under the fostering care of the two Spanish successors of Ignatius, Diego Lainez and Francisco Borgia, and afterwards owed much to the patronage of Dukes Albert and William of Bavaria, also to Otto Truchsess, Bishop of Augsburg and Roman cardinal, who had for a time the Flemish musician Jacques de Kerle of Ypres in his service. With such patrons it was natural that music should occupy a prominent place in the studies of the institution. In 1571 Victoria became choirmaster, and in 1572 dedicated to Otto Truchsess as his chief patron a book of motets, 14 numbers *a* 4, 9 *a* 5, 9 *a* 6 and 1 *a* 8, 33 in all. This book already contains the majority of Victoria's works in the free motet form, to which only small additions were made in later publications. It opens with the well-known 'O quam gloriosum' and includes the very beautiful and expressive 'O vos omnes,' which has been mistakenly ascribed to Morales, though it reappears as Victoria's own work in his later publication of 1583 and in the Dillingen editions of his motets in 1589. Mention may also be made of the very pathetic piece for Holy Week, 'Vere languores nostros,' but the whole contents of this work are of first-rate quality and show Victoria as already the fully fledged master in his own particular style of religious composition. There is no trace of his having had personally to work himself free from any trammels of Netherland scholasticism; he appears to have entered at once into the heritage of a style of greater simplicity and expressiveness, which may have been partly indicated previously in works of Arcadelt and Morales, but was only first completely illustrated by Palestrina in his motets of 1563 and 1569. The date of publication of Victoria's work is sufficient to dispose of the suggestion that in the adoption of this style he was influenced by such other members of the Roman school as Nanino or Marenzio. On the other hand, the general resemblance of his motet style to that of Palestrina is so striking that many of his works might easily be mistaken for compositions of Palestrina. There is only this difference, that in

Victoria there is often a greater immediate warmth or tenderness of devotional feeling, an ascetically restrained ardour of mystical rapture with perhaps less of outward artistic grace, and less cultivation of contrapuntal art for its own sake. Victoria is often more interested in the appropriate use of expressive homophonic harmony than in the mere flow of melodic polyphony. It may also be claimed that if Victoria's general style is based on that first fully developed by Palestrina, Palestrina in his turn was partly influenced by Victoria in his later adoption of what he himself described as a more ardently passionate style ('usus sum genere aliquanto alacriore') for his motets from the canticles published in 1584. It is interesting in this respect to compare Victoria's 'Vadam et circuibō' and 'Vidi speciosam,' both *a* 6, from the book of 1572, with some of Palestrina's motets from the canticles on similar texts.

The Collegium Germanicum was for some time amalgamated with the Collegium Romanum, the other institution of Ignatius, but in 1573 Pope Gregory XIII. reorganised and re-endowed the former as a separate institution, and we are told in some detail how on the occasion of the transfer of the *alumni Germanici* to the new abode provided for them there was a solemn ceremony of parting between them and their *Italiani convivitori*, when with the help of some members of the Sistine Chapel a psalm by Victoria *a* 8 for two choirs, 'Super flumina Babylonis,' was sung. Another change of domicile took place in 1575, when Gregory presented to the college the Palazzo San Apollinare with the church attached to it.

In 1576 Victoria dedicated to Duke Ernest of Bavaria, Count Palatine of the Rhine and Administrator of the Bishoprics of Freising and Hildesheim, afterwards Archbishop of Cologne, a miscellaneous collection of masses, Magnificats and motets, which, however, reappear in later separate publications and may then be more conveniently noticed. The Bavarian dukes showed their interest in the German college by appointing those who had been its pupils to important ecclesiastical positions in Bavaria and the Rhineland, which had the further result of spreading Victoria's reputation as a Church composer throughout Germany.

For what reason Victoria in 1578 retired from the Collegium Germanicum was not previously known, but a document of 1611 recently brought to light and quoted by R. Mitjana¹ appears to show that in that year Victoria received the appointment of chaplain to the widowed Empress Maria, daughter of Charles V. and sister of Philip II. of Spain. Where at first he exercised his duties in this capacity is not stated. It was not till 1581 that the Empress returned to Spain, and, after paying a visit to her brother Philip, then in Lisbon, definitely

¹ *Estudios sobre algunos músicos españoles del siglo xvi.* (1918.)

settled in Madrid in 1582, to take up her abode along with her daughter the Infanta Margaret in the convent of Franciscan nuns founded by her sister Doña Juana of Portugal, which was afterwards known as the house of the Descalzas Reales. The Infanta became a professed nun in this house Mar. 25, 1584. Until her definite settlement in Madrid, Victoria may not have been in constant attendance on the Empress, and as it is not till 1583 that in one of his dedications he speaks of himself as about to return to Spain ('*natale solum rev'surus*'), he may have had leisure in Rome from 1581-83 to superintend the publication of several of his works. It would also appear from the same document that besides being chaplain to the Empress, from 1586 he acted as choirmaster to the chapel of the Descalzas Reales.

Meantime, in 1581, two comprehensive works of Victoria appeared in print at Rome. One, bearing the title '*Cantica B. Virginis per annum*,' contains two sets of Magnificats on the eight tones, one set with the odd verses, the other with the even verses composed; also eight settings *a* 5 and 8 of the four Marian antiphons, '*Alma Redemptoris*,' '*Ave Regina*,' '*Regina Coeli*' and '*Salve Regina*.' The Magnificats are *a* 4, but with some verses *a* 3, probably for solo voices, and the last verse usually *a* 5 or 6, with an occasional canon. This work was dedicated to Michael Bonello, otherwise known as Cardinal Alessandrino, a nephew of Pope Pius V., who had been one of the early pupils of the Collegium Germanicum. In the dedication the composer declares his whole ambition to be to employ music solely as an instrument to raise the mind pleasantly to the contemplation of divine truth. Unlike his Roman contemporaries, Nanino, Anerio and Marenzio, who occupied themselves with the composition of madrigals, and following more in the wake of his Spanish predecessors, Morales and Guerrero, Victoria seems to have disdained to occupy himself with secular music even as an occasional relaxation. His other publication of 1581 is '*Hymni totius anni secundum sanctae Romanae ecclesiae consuetudinem*,' which contains 32 settings *a* 4 of the Latin hymns usually sung at the vespers of festivals and saints' days, the even verses only being composed, while the others are understood to be sung to the unison plain-song. The last hymn, '*Pange lingua*,' is described as being '*more Hispano*,' the *cantus firmus* being an old Spanish melody to the hymn of a very popular character, different from the usual plain-song. To the Hymns are appended four of the vesper psalms *a* 8 set for double choir. In the dedication to Pope Gregory XIII. Victoria describes himself as driven by a sort of natural instinct ('*naturali quodam feror instinctu*') to the exclusive cultivation of sacred music, and modestly refers to the

approbation which his labours in that field have met with. As bearing on the artistic relations of Victoria and Palestrina, it may be noted in passing that these comprehensive publications of Magnificats and Hymns appeared several years before the similar publications of Palestrina, 1589 and 1591. The hymns of Victoria may also be thought to have a character of greater austerity and less elaboration than those of Palestrina.

In 1583 appeared two further publications of Victoria. One consists of motets and psalms, 53 numbers *a* 4 to 12, most of which had already appeared in 1572 and 1576. Of the few new works in this collection may be specially mentioned two simple but very beautiful motets for equal voices—one for Trinity Sunday, '*Duo Seraphim*,' the other a motet for Communion, '*Domine non sum dignus*—also '*Trahe me post te*' *a* 6, set with some appropriateness to the text as a double canon for four of the voices. The last number is the psalm '*Laetatus sum*' *a* 12, for three choirs. This may have been the psalm for three choirs reported as having been sung on the occasion of the entrance of the Collegium Germanicum into possession of the Church San Apollinare in 1575, though wrongly described as '*Confitemini Domino*.' The dedication of this collection of motets and psalms is peculiar. It is addressed

'to the Blessed Virgin Mother of God and to all the Saints reigning in heavenly felicity with Christ, to celebrate their praises on occasion of their festivals, and to animate with greater sweetness the devotion of the faithful.'

Victoria subscribes himself here for the first time as '*reverendus Dominus, Presbyter Abulensis*.' From this H. Collet drew the somewhat hasty conclusion that the year 1583 marked a special mystical crisis in Victoria's life which induced him to seek the priesthood. But this suggestion now falls to the ground with the discovery that Victoria had been appointed some years previously as chaplain to the Empress Maria, and further evidence supplied by Pedrell justifies the assertion that he had already been ordained a priest in the diocese of Avila before leaving Spain in 1565. The other publication of 1583 is a book of masses dedicated to Philip II. From the title, '*Missarum libri duo*,' etc., taken in conjunction with the language used in the dedication, it might be inferred that he had originally intended to publish two books together, of which, however, only Liber I. then actually appeared. Although, too, in the dedication he makes no mention of his appointment as private chaplain to the Empress, his language would imply that the discharge of his duties as chaplain would henceforth give him no reason for any further occupation with the composition and publication of music. Reviewing his career and once more repeating that he had been led by a secret natural instinct and impulse ('*ipsa me natura*

tacito quodam instinctu impulsuque ducebat') to devote himself exclusively to the composition of Church music, in which, as it appeared, he had given satisfaction to those best qualified to judge, he declares himself now weary and desirous of repose so as to give his mind more to the divine contemplation befitting a priest; but, being about to return to Spain, in order not to return empty he desires to present to the King in person this book of masses as the final fruits of his talent ('postremum hunc ingenii partum'). With the composition of masses he had thought it most fitting to terminate his labours ('in hoc meos labores placuit terminare').

He thus thought of himself as then bidding farewell to music, but, happily, it was not to be as he anticipated. In fulfilling his duties as chaplain to the Empress, he also became choir-master to the house of the Descalzas Reales. This first book of masses contains nine, of which, however, five had already appeared in the miscellaneous collection of 1576, so that only four are really new. There are five *a 4*, 'Quam pulchri,' 'O quam gloriosum,' 'Simile est regnum,' 'Ave Maris Stella' and 'Pro defunctis'; two *a 5*, 'De Beata Virgine' and 'Surge Propera'; two *a 6*, 'Dum compleverunt' and 'Gaudeamus.' It is noticeable that none of Victoria's masses take their themes from secular songs. His themes are taken from his own or other motets or from plain-song. All these masses are distinguished by a careful and concise declamation of the text, without relapsing too much into mere homophonic utterance, beautiful themes with fine harmony resulting from their various combinations. In the final Agnus Victoria usually makes a discreet use of canon without any parade of unnecessary ingenuity. They are mostly canons in unison or at the octave. The best known of these masses is perhaps the 'O quam gloriosum,' based on his own early motet of 1572, very concise throughout, with a wonderfully simple and beautiful 'Et incarnatus.' P. Wagner¹ points out how freely Victoria deals with his own motet themes by only using those which are more appropriate to the text of the mass, and specially by not always beginning each part of the mass with exactly the same themes, as was the general fashion of the time. The 'Ave Maris Stella' is remarkable for the fine melody of its themes borrowed from the liturgical hymn. In the first Hosanna Victoria takes the liberty of making the tenor sing the hymn with its own text, while in the second Agnus *a 5* a second tenor voice sings the hymn tune throughout to the proper words of the mass. 'Simile est regnum,' which has also very fine melodies, concludes with a second Agnus *a 8*, in which four additional voices sing together a responsive four-part canon in unison. The mass 'Gaudeamus' is remarkable

for the use made of the short liturgical theme 'Gaudeamus' as a *cantus firmus*. In the first Kyrie the alto voice announces the theme by first singing it to its text 'Gaudeamus.' Elsewhere the theme is sung to the proper words of the mass, except in the concluding Agnus *a 7*, in which two voices sing in canon at the octave nothing else but both theme and text 'Gaudeamus,' while the other voices sing the usual words of the mass. This work would thus seem to have been intended for All Saints' Day, or for some of the other saints' days, when the mass begins with the introit 'Gaudeamus.' A prominent theme at the beginning of some parts of this mass is the 'io son ferito' theme of Palestrina's popular madrigal, which may have been intended as an act of homage to the Roman master, unless its adoption be purely accidental.

In 1585 appeared at Rome one of Victoria's most important publications, that which bears the title 'Officium hebdomadae sanctae.' This contains in order the chief music for Palm Sunday and the last three days of Holy Week. For Palm Sunday there is the motet 'Pueri hebraeorum,' *a 4*, for the preliminary service of Benediction of Palms; the 'Passio secundum Matthaeum,' in which only the 'Turba' verses are composed, very simply *a 4*, but with considerable dramatic appropriateness, followed by the very expressive Communion motet, 'O Domine Jesu Christe,' *a 6*. For the three last days of Holy Week there are the nine Lamentation Lessons of the First Nocturns of Matins for each day, set *a 4* to *8*, and the 18 Responsoria of the Second and Third Nocturns, *a 4* and *3*, all of these in Victoria's most refined style of devotional pathos and tenderness of sentiment. For the mass of Holy Thursday there is a 'Tantum ergo,' *a 5*, based on the popular Spanish 'Pange lingua' tune. For Good Friday, besides the 'Passio secundum Ioannem,' *a 4*, there is the very lovely motet 'Vere languores,' *a 4*, taken over from the book of 1572, to be sung at the Adoration of the Cross, and a very simple setting of the Improperia similar to that of Palestrina. The last piece in the book is the hymn 'Vexilla regis' (*more Hispano*), *a 4* to *6*, which has another old Spanish melody quite different from the familiar Roman. The whole work would thus seem to have been intended for Spanish use, either in Spain itself or in the Spanish churches in Rome. The Lamentations, however, were copied into the Sistine Chapel choir-books, two of them appearing in an earlier form than that in which they were afterwards published. They may thus have been in use there before those of Palestrina, which were only published in 1588. The 'Officium hebdomadae sanctae' bears no dedication beyond what may be implied by the beautiful engraving of the Crucifixion on the title-page, accompanied on another page by the

¹ *Geschichte der Messe*, Bd. i. pp. 425-8.

last verse of the hymn 'Vexilla regis.' The work itself testifies to the thoroughly devotional liturgical spirit which inspired all the musical labours of the composer.

Another publication of 1585 bears the title 'Motetta festorum totius anni cum communi Sanctorum.' This was dedicated to Charles Emanuel, Duke of Savoy, a distinguished prince of the time, who was just then returning from Spain after having concluded a temporary alliance with Philip II. as against France. In the dedication the composer, with a curious allusion to the significance of his own name ('Victoriae nomine'), expresses the hope that his book might meet the Duke as a good omen on his return. He mentions that he had only been induced to offer his book for the Duke's acceptance by the persuasions of one with whom he was bound in ties of close friendship, Juvenal Ancina, a native of Fossano in the Duke's Piedmontese territories. Ancina was then a well-known priest at the Roman oratory of St. Philip Neri, and afterwards editor of a book of 'Laude spirituali' for the use of the oratory, and at a later time Bishop of Saluzzo. The dedication is followed by what is described as a 'Protrepticon epigramma,' written by Ancina, consisting of 22 couplets of elegiac verse addressed to the Duke, extolling in extremely laudatory terms the merits of Victoria and his works. He describes Victoria as

'Servus Christi ardens, Abulae gloria magna suae . . . quem pia Roma colit, praecentorum urbis decus immortale recentum,' etc.

After this tribute to the composer's renown, it is perhaps matter for surprise that the contents of the book are not wholly new, but mainly consist of a reprint of the motets of a festival character from his earlier publications, with only 10 new pieces, all excellent of their kind. The more important may be the seven specially composed for the Commune Sanctorum, the high quality of which is vouched for by their inclusion in Proske's 'Musica divina.' The book also includes two pieces by other masters, one *a* 4 by his countryman Guerrero, choirmaster of Seville Cathedral, and one *a* 8 by Soriano, a Roman pupil of Palestrina, which would seem to show that Victoria took some interest in the works of his contemporaries.

From 1585-92 Victoria published nothing new, but in 1589 two important editions of his motets and psalms, reprints of his own book of 1583, appeared at Dillingen and Milan, testifying to the spread of his reputation both in Germany and northern Italy. The publisher of the Dillingen edition, in dedicating it to the Dean of Augsburg Cathedral, describes Victoria as acknowledged to be one of the greatest masters of the time in sacred music. In 1592 Victoria himself emerges once more to the light of day by the publication at Rome of his

second book of masses, dedicated to the Prince Cardinal Albert, sixth son of the Empress Maria. This prince was for some time Archbishop of Toledo and Primate of Spain, until by dispensation he was allowed to resign his ecclesiastical functions in order to marry and become lay Viceroy of Portugal for the King of Spain. In the dedication the composer mentions for the first time his appointment as chaplain to the Empress. He also states that it was in response to a request from the Cardinal himself that he presents to him this new work. At the same time he makes a mysterious allusion to other works of his which had been published under the patronage of the Cardinal, and were in the hands of all,¹ but what these works were we have no knowledge. Along with a setting of the 'Asperges' and 'Vidi aquam' for the preliminary ceremonies of the mass, the book contains seven masses: three *a* 4, 'Quarti toni,' 'O magnum mysterium' and 'Pro defunctis'; two *a* 5, 'Trahe me post te' and 'Ascendens Christus'; one *a* 6, 'Vidi speciosam'; and one *a* 8, 'Salve Regina.' The mass 'Quarti toni' is remarkable for its very expressive use of the so-called Hypophrygian Mode. It may be noted generally in Victoria's works that without overstepping the then recognised limits of the diatonic system, he makes freer use of chromatic modulations for the sake of expressive harmony than Palestrina, who relies so much on beautiful flow of melody, usually does. On this mass Proske remarks:

'Every note betrays the master who in devout contemplation served the sanctuary and among all the Roman contemporaries of Palestrina stood next to him in spiritual nobility. Work and prayer, genius and humility are here blended in perfect harmony.'

Of the other masses in this book, the 'Vide speciosam,' based on his own fine motet, may be thought to be the finest, but the 'Salve Regina' *a* 8 is also a work of exceptional beauty, based on a very free handling of the beautiful phrases of his motet of 1576, which have so much the expression of spiritual aspiration. In 'O magnum mysterium' the composer adopts in the Gloria and Credo the parlando homophonic style of text declamation, and makes much less use than we might have expected of the themes of the beautiful Christmas motet after which the mass is named. The mass 'Pro defunctis' is the same as that in 1583 with a new responsorium added, 'Pecantem me quotidie.' The liturgical melody is in the soprano part of the mass throughout, and the responsoria are set with alternate unison plain-song.

With royal and other patronage Victoria had been enabled to bring out his works in magnificent folio editions. A document of 1598 quoted by Pedrell gives us full details of the contract entered into between Victoria and a

¹ 'Sicut caetera opera quae, tuo edita patrocinio, jamdudum in omnium manibus versantur.'

printing house at Madrid for the publication of his book of 1600 dedicated to King Philip III. This book consists of a miscellaneous collection of masses, Magnificats, motets, psalms and hymns, a considerable quantity of new work being mixed up with a republication of earlier. The works contained in the book were evidently meant for performance in the chapel of the Descalzas Reales; as in the dedication the composer expresses the pious hope that they 'may tend to the increase of true devotion in clarissimo hoc templo augustissimae amitae tuae Joanne.' As most of them are composed on a large scale, viz., for 8 and 12 voices, royal patronage must have enabled the nuns to maintain a considerable choir. Among the new works are two masses *a* 8 for two choirs, 'Alma Redemptoris' and 'Ave Regina,' one *a* 9 for two choirs of five and four voices respectively, entitled 'Pro Victoria,' one *a* 12 for three choirs, 'Laetatus sum.' Of these the most peculiar is the mass 'Pro Victoria' with its strange intermixture of different styles, some parts written in the most sedate *a cappella* style, others in a fanfare fashion after the manner of Jannequin's battle-pieces with rapid parlando homophonic declamation. No contrast could be greater than that between the first two sections of the Kyrie and the third, or between the quiet opening of the Agnus and the excited parlando declamation of the 'Dona nobis pacem.' The work would seem to be less one of thanksgiving for a victory, for which, indeed, there was little occasion towards the disastrous end of the reign of Philip II. than an impassioned supplication for victory, not only from the peculiar setting of the 'Dona nobis' but from the stress also laid upon the words 'suscipe deprecationem nostram' in the Gloria, perhaps too from the parlando setting of the 'in nomine Domini' of the Benedictus. But this mass has also a very beautiful 'Et incarnatus' in the composer's usual better style.

Another special feature of the whole book is the provision of an organ accompaniment, which, however, is only a duplication of the voice parts of one or other of the two or three choirs. With regard to the mass 'Laetatus sum' *a* 12 it may be mentioned that it has little connexion thematically with the psalm *a* 12 beginning with these words with which in this very book it is associated. Victoria is less strict in these matters than Palestrina. He does not lay such stress as Palestrina usually does on the exact thematic connexion of the different movements of the mass with one another or with the motets after which they are named. Yet in this respect he only follows the example first set by Palestrina himself in his Missa Papae Marcelli, in which the different sections of the mass have little direct thematic connexion with one another. There

are two new Magnificats in this book, one *a* 8, one *a* 12, with all the verses composed more or less antiphonally, also a simple Nunc Dimittis *a* 4. In the case of the psalms written for two or more choirs, the organ accompaniment would in case of necessity take the place of one of the choirs. It was this growing practice towards the end of the 16th century of composing the Vesper Psalms and Magnificat for antiphonal choirs that gradually led to the giving of a more independent position to organ accompaniment and to the invention of the system of figured bass. (See THOROUGH-BASS.)

Of the other new pieces of 1600 we need only mention a beautiful new setting of the hymn 'Ave Maris Stella' which has the peculiarity of the proper melody being given complete in every verse to the soprano part, differing in this respect from the older custom of putting it more in the tenor. In Victoria's earlier setting of 1581 only one of the verses has the melody in the soprano. In this matter, as in that of organ accompaniment, Victoria with all his strict ecclesiasticism otherwise was yet evidently more open to modernising influences than Palestrina.

In March 1603 took place the death of the Empress Maria, and as a tribute to her memory Victoria composed and in 1605 published at Madrid what Proske and others have described as 'the crown of all his works,' 'the greatest triumph of his genius,' 'Officium defunctorum sex vocibus in obitu et obsequiis Sacrae Imperatricis.' It was appropriately dedicated to the Princess Margaret, daughter of the Empress, who ever since 1584 had been a professed nun of the Descalzas Reales. The title gives us sufficient reason for believing that the mass was sung at the funeral of the Empress, although the contemporary record of the funeral ceremonies quoted by Pedrell makes no mention of Victoria or his music. The work consists of those parts of the Requiem mass then usually composed, the Introit with the Kyrie, the Gradual, Offertorium, Sanctus, Benedictus, Agnus and Communio, each part preceded by the unison plain-song intonation, but also with the plain-song melody continued more or less freely in the second soprano. The hymn 'Dies Irae,' which figures so prominently in later requiems, is not composed by Victoria, and if then sung at all, would be sung in its plain-song setting. But besides the mass Victoria has composed a touchingly expressive motet *a* 6. 'Versa est in luctum,' also the responsorium 'Libera me' with alternate plain-song, and an extremely pathetic setting in simple homophonic harmony *a* 4, of the Second Lesson of the Vigil Office 'Taedet animam meam.' He had previously published in 1583 and 1592 a very good Requiem Mass *a* 4, and indeed incorporates into his later work the small trio movement of the 'Libera'

'Tremens factus sum,' but the work of 1605 being for 6 voices is composed on a larger scale, and gives occasion for more powerful and expressive harmonies. The whole work is justly reckoned as a masterpiece of the highest order. There is no display of art for art's sake, but its artistic merit just consists in its subordination of art to the sincere expression of religious devotion. After the death of the Empress, Victoria continued to occupy the modest position of chaplain to the Princess Margaret and the house of the Descalzas, but seems to have retired from the position of choirmaster, while retaining that of organist. By her will the Empress bequeathed to him a pension chargeable on the revenues of certain bishoprics, and in this way as well as by gifts from distinguished patrons he was enabled to live comfortably. Although in the dedication of the work of 1605 he had described it as his 'swan-song,' he had at the same time expressed his desire and hope that if his life were prolonged, he might yet be able to offer for Princess Margaret's acceptance other greater works. But so far as we have any knowledge, this hope was not fulfilled. During the remainder of his life, he issued no new publications, and we have no mention of new compositions. Previously there was much uncertainty as to the date of his death, but recent investigation has now ascertained it to have taken place August 27, 1611.

With the almost too sudden change of musical style and outlook which began to prevail from the beginning of the 17th century, Victoria shared in the general oblivion which soon overtook the works of the older masters of vocal polyphony. A certain degree of interest was first reawakened by musical historians towards the end of the 18th century, which afterwards under the influence of the romantic movement at the beginning of the 19th century took the more practical form of a renewed publication of some of their works and the revival of them in public performance. Victoria began to be more generally known by one very delightful short motet *a 4*, 'Jesu dulcis memoria,' universally attributed to him, though it does not appear in any of his own published works, and its original source is nowhere specified. A fuller knowledge and appreciation of him first became possible by the labours of Canon Proske of Ratisbon, who in his 'Musica divina' (1853-61) published a large and excellent selection of his works, masses, motets, responsoria, etc. At the instance of the late F. X. Haberl the publication of a complete edition of Victoria's works was undertaken by Breitkopf and Härtel in 1896 under the editorship of F. Pedrell of Barcelona, the contents of which are as follows:

Vol. I.—Motets, *a 4-8*, 44 nos., without reckoning second parts separately.
Vol. II.—Ten masses, *a 4-5*.

Vol. III.—Eighteen Magnificats, *a 4-12*, with a Nunc Dimittis, *a 4*.
Vol. IV.—Five masses, *a 6-8*.
Vol. V.—Hymns, 34 nos. *a 4*, and the 'Officium Hebdomadae Sanctae'.
Vol. VI.—Three masses, *a 8-12*, and the two masses, 'Pro Defunctis,' with the smaller pieces attached to them.
Vol. VII.—Ten psalms and sequences, *a 8-12*, and ten settings of the Marian Antiphons, *a 5* and *8*, with three smaller works.
Vol. VIII.—Has a lengthy bio-bibliographical study of the composer, provided with the necessary documents, and a musical supplement of five other works, gleaned from various quarters, a 'Missa Dominicalis,' *a 4*, composed with alternate plain-song, two of the Lamentation Lessons in their earlier version from the Sistine Chapel archives, the motet, 'Jesu dulcis memoria,' and two others, 'Ave Maria,' 'Benedicam Dominum,' taken over from Proske's 'Musica divina' without any indication of source.

Victoria's separate works thus reckoned up just come short of 180, a small number as compared with those of Palestrina, over 700, or those of O. de Lassus, over 1200, but all or nearly all of the highest value.

VICTORINUS, GEORGIUS (*b.* Huldshösch, Bavaria, *c.* middle of 16th cent.; *d.* Munich, 1624). About 1591 he was living in the Jesuit monastery of St. Michael as *Musicus praefectus*. On July 7, 1597, the day of the consecration of the church of St. Michael, a sacred play was given by students in the place in front of the church, for which Victorinus had composed the music. Nine hundred singers performed the choruses. Costumes and decorations were specially produced for the occasion, and the fall of the angels into the burning hell created quite a sensation. The play was afterwards repeated several times, but nothing but the scenario has been preserved. A few only of Victorinus's compositions are still in existence. A Magnificat, 6 v., of 1591, and 3 litanies, 4-10 v., in MS., are in the Munich library, and some 20 songs of his are contained in his valuable collection of church music by various authors, viz.: 'Thesaurus litaniarum' (1596), 'Siren coelestis' (1616; English edition by Wm. Braythwait, London, 1638) and 'Philomela coelestis' (1624). E. v. d. s.

VIDAL, a name borne by several French musicians and writers on music. The earliest (1) B. VIDAL, whose initial only is known (*d.* Paris, Feb. 1800), was a talented guitarist and teacher during the last quarter of the 18th century, and published sonatas, short pieces, and a method for his instrument, *Nouvelle Méthode de guitare dédiée aux amateurs* (Paris).

(2) JEAN JACQUES (*b.* Sorreze, Mar. 7, 1789; *d.* June 14, 1867), a clever violinist formed in Kreutzer's school, won the first prize for violin at the Conservatoire in 1808, and the second Grand Prix de Rome for composition in 1809. He was for twenty years in Baillot's quartet-party, belonged to the Opéra orchestra and that of the Société des Concerts; conducted

the orchestra of the Théâtre Italien from 1829–1831, played first violin in Louis Philippe's band, and was a valued teacher.

(3) LOUIS ANTOINE (*b.* Rouen, July 10, 1820; *d.* Paris, Jan. 7, 1891) was an erudite musical historian, author of copious and valuable works on the violin. He was an excellent amateur musician (he studied the violoncello with Franchomme), an accomplished linguist, and he was a friend of J. B. Vuillaume. In 1876 the first volume of his great work *Les Instruments à archet*, dealing with the history of the violin, was published by J. Claye, Rue Saint-Benoit, Paris. The second volume appeared in 1877, and dealt exhaustively with the subject of makers, while the third volume, dated 1878, discoursed of musical typography and gave not only biographies of musical composers, but also a magnificent bibliography of chamber music. These three sumptuous volumes were illustrated by Frédéric Hillemacher, and the edition was limited to 500 copies. In 1878 part of the above work was published under the title *Les Vieilles Corporations de Paris* (Quantin). It forms a complete and exhaustive history of the Corporation of St. Julien des Ménétriers and the French Minstrels. In response to a demand for a separate edition of that part of *Les Instruments à archet* which dealt with the history and manufacture of the violin, Quantin published, in 1889, *La Lutherie et les luthiers*, of which as before only 500 copies were printed. Vidal was member of the Société de l'Histoire de Paris et de l'Île-de-France. He was compiling a history of the pianoforte when he died.

E. H.-A.; rev. M. P.

(4) FRANÇOIS (*b.* Aix, July 14, 1832), Provençal poet, the author of *Lou Tambourin* (Avignon, 1864), an interesting work on the Tambourine of Provence, and the Galoubet, or pipe. It is in the Provençal dialect, with a French translation.

G. C.

(5) PAUL ANTONIN (*b.* Toulouse, Haute-Garonne, June 16, 1863), passed brilliantly through the Paris Conservatoire, and took successively the first harmony prize in 1879, the first counterpoint and fugue prize in 1880, and the first Grand Prix de Rome in 1883, with the cantata 'Le Gladiateur.' He was assistant chorus-director at the Opéra, 1889–92; director of the singing and conductor there, 1892–1906. He taught at the Conservatoire, solfège (1894), accompaniment (1896), and composition, from 1910 onwards. His activity as a composer has extended in many directions. At the Opéra he gave 'La maladetta' (ballet, Feb. 24, 1893), 'La Burgonde' (Dec. 23, 1898); at the Opéra-Comique, 'Guernica' (1895). He has composed incidental music for various plays, such as 'Le Baiser' (Banville), 'La Reine Fiammette' (Mendès), etc., performed at the Théâtre des Marionnettes, Cercle funambulesque, etc.;

pantomimes, 'Pierrot assassin,' 'Colombine pardonnée' (1888), etc.; 2 'Mystères,' 'Noël ou le Mystère de la Nativité' (1890), 'Les Mystères d'Eleusis' (1894); an operetta, 'Eros' (1892). He founded the Concerts de l'Opéra with G. Marty, 1895–97, for which he arranged a series of old dances. A successful 'Suite de danses' (music by Chopin) was orchestrated by him, in co-operation with A. Messager (Opéra, June 23, 1913). As a composer of sacred music, he has composed motets, a cantata, 'Ecce Sacerdos magnus' (choir, organ, string orchestra). He has published many arrangements of old music. His pedagogic works as yet published are: *52 Leçons d'harmonie de Luigi Cherubini*, in 3 volumes (Paris, Enoch). A *Manuel pratique d'harmonie et Notes et observations sur la composition et l'exécution* is in preparation.

His brother (6) JOSEPH BERNARD (*b.* Toulouse, Nov. 15, 1859; *d.* Paris, Dec. 18, 1924) was a military bandmaster and won the first trombone prize at the Paris Conservatoire, 1882. He composed operettas, 'Le Mariage d'Yvette' (1896), 'Le Chevalier de Fontenoy,' etc. A collection of songs, 'Marches et chansons des soldats de France' (with J. Jouvin and Captain Gillet), appeared in 1919 (Paris, Plon).

VIELLE, see HURDY GURDY.

VIENNA. The perennial importance of Vienna in musical history is evidenced by the number of great composers who lived and worked there. Schubert, Lanner and Johann Strauss were born there; Beethoven and Brahms made it their second home. Gluck, Mozart, Haydn, Bruckner, Hugo Wolf and Mahler lived in Vienna and all are buried there. Richard Strauss has settled there, and it continues to be an important centre of musical life, despite the political straits through which Austria and its capital have passed.

The following is a summary of its main musical institutions:

STAATSOOPER (State opera, formerly Hofoper), built by van der Nüll and Siccardsburg, opened May 25, 1869, holds 2260 persons. Its directors have been: Herbeck (1870–75); Jauner (1875–80); Jahn, Hans Richter (1880–1896); Gustav Mahler (1896–1907); Felix Weingartner (1907–11); Hans Gregor (1911–1918); Franz Schalk (1918 up to the present time, 1926); during 1920–24 Dr. Richard Strauss together with Franz Schalk. Since its foundation the ensemble consisted of the most famous singers, and the orchestral and choral staffs have been trained and selected with the utmost care and especially developed through Hans Richter and Gustav Mahler. Hans

Richter, including in the repertory the works of Gluck, Mozart and Wagner, disposed of an ensemble of world-famed artists: Winkelmann, Reichmann, Scaria, van Dyck, Schrödter, Lucca, Materna, Renard, Schläger. The genius of Gustav Mahler fully developed the forces which made the Vienna Opera capable of unsurpassed performances. Alfred Roller, Franz Schalk and Bruno Walter worked with him. Through systematic and untiring effort the ideal of performance was realised, and not only did Mahler inaugurate cyclical performances of the unshortened works by Mozart and Wagner, but he encouraged as well the production of his contemporaries (Strauss, Pfitzner, Reznicek, Zemlinsky, Bittner). Felix Weingartner, following Mahler, brought the performance of 'Elektra' by Richard Strauss. During 1911-18 (Direktor Gregor) were first given Debussy's 'Pelléas et Mélisande,' Strauss's 'Salomé,' 'Rosenkavalier,' 'Ariadne.' In 1919 the Opera celebrated in a great and successful musical festival its fifty years' foundation. During the period Strauss-Schalk the repertory became enriched through 'Die Frau ohne Schatten' (first performance), 'Josephs-Legende,' 'Schlagobers,' all by Strauss; 'Palestrina,' by Pfitzner; Puccini's three-act operas; 'Die Gezeichneten' and 'Der Schatzgräber,' by Schreker; 'Die tote Stadt,' by Korngold; 'Die Kollhaymerin' and 'Das Rosengärtlein,' by Bittner; 'Der Zwerg,' by Zemlinsky; 'Fredegundis,' by Schmidt; Moussorgsky's 'Boris Godounov'; 'Pulcinella,' by Stravinsky; 'André Chénier,' by Giordano; 'Höllisch Gold,' by Bittner; 'Don Gil,' by Braunsfels. Besides Schalk, the present conductors are Reichenberger, Heger, Alwin. The famous Viennese tradition for the works especially of Mozart, Beethoven and Wagner has been kept fully alive. Notwithstanding the continual economic struggle, the Viennese Opera conducted by Franz Schalk has lately confirmed its reputation outside its own city by performances given with the utmost success at Salzburg, Geneva, Paris and Cologne.

Here must also be mentioned the **VOLKSOPER**, a private theatre opened in 1904 and capable of holding 1840 persons; temporary directors: Rainer Simons, Weingartner, Dr. Stiedry, Blech.

ORCHESTRAL CONCERTS.—The famous orchestra of the 'Wiener Philharmoniker' consists of members of the Staatsoper orchestra only. It gives eight symphony concerts each season, besides one extra concert for the benefit of its pension fund. The Philharmonic Concerts were founded by Otto Nicolai. The first concert was given by the Philharmonische Akademie, Mar. 18, 1842, in the Redoutensaal. The orchestra became an independent organisation in 1860, and since then its programmes have been remarkable for catholicity and

progress. Wagner's name appeared for the first time in 1861 with the Faust overture, Brahms two years later with the second Serenade (op. 16). In 1863 Wagner appeared as conductor of the prelude and 'Liebestod' from Tristan. List of its most famous conductors: Otto Nicolai (1842-47), Georg Hellmesberger (1847-48), Otto Dessoff (1860-1875), Hans Richter (1875-82), Gustav Mahler (1898-1901), Joseph Hellmesberger (1901-03), Franz Schalk (1903, 1905-08), Muck (1904-06), Mottl (1904-07), Strauss (1906-08), Weingartner since 1908; Schalk, Furtwängler and Walter appearing as guest conductors. The orchestra is self-governing, choosing its own conductor and committee of twelve members. It has pension and sick funds, and has done much in the cause of Austrian charities.

GESELLSCHAFT DER MUSIKFREUNDE.—This institution was suggested in 1812 and founded 1813 mainly through Dr. Joseph von Sonnleitner after two great performances of Handel's 'Alexander's Feast.' The first patron was the Cardinal Archduke Rudolph, Beethoven's pupil and patron (1814-31). The 'Musikfeste' (oratorios only with 1000 performers) were repeated in the Riding-school every year until 1847. In 1830 the Society, having meanwhile founded a conservatorium, a musical library and museum, moved into a house of its own, but having far outgrown it, removed in 1870 to the present large building (by Hansen) 'An-der-Wien,' where, besides its own concerts, many other large concerts are now held. The 'Singverein,' a choral society of 300-350 members, was founded by the Gesellschaft in 1858, the 'Orchesterverein' established in 1860. Both perform the so-called 'Gesellschaftsconcerte,' amounting to eight oratorio concerts given each season without interruption from 1860 onward. Down to 1848 the concerts were conducted by the best musicians among the members in turn, but in 1851 Hellmesberger was appointed as professional conductor. His successors were Herbeck (1859-70, 1875-77), Anton Rubinstein (1871-72), Johannes Brahms (1872-75), E. Kremser (1878-80), W. Gericke (1880-84) (first performance of Liszt, Dante Symphony, and Berlioz's Requiem), Hans Richter (1885-90) (Bach, Mass in B minor and 'Christmas oratorio,' Weber Centenary Festival, 1886), W. Gericke (1890-95) (Mozart Festival, 1891, Bruckner, Mass F minor), R. von Perger (1895-1900), F. Löwe (1900-04), Franz Schalk (1904-21) (first complete performance of Bach's 'St. Matthew Passion,' Bach Festival, 1912; Beethoven Festival, 1920). Present conductors are W. Furtwängler and L. Reichwein.

The **WIENER KONZERTVEREIN**, founded 1900, gives its concerts in the new 'Wiener Konzerthaus' (opened 1913), founded by the Wiener Konzerthausgesellschaft. Ferdinand Löwe,

the famous interpreter of Bruckner, was the artistic guide up to 1924 (*d.* 1925). Present conductors, Dirk Fock, Rudolf Nilius. The Wiener Konzerthaus contains three concert-halls for 2100, 900 and 420 people.

THE WIENER TONKÜNSTLER ORCHESTER, founded in 1907 by Oskar Nedbal, gives its concerts in the building of the 'Gesellschaft der Musikfreunde,' whose three concert halls contain 2000, 600 and 200 people. Present conductors are Clemens Krauss (Frankfort) and Hans Knappertsbusch (Munich). Sunday concerts, Anton Konrath.

THE WIENER SYMPHONIE ORCHESTER, uniting the two orchestras above mentioned since 1919, gives the majority of all orchestral concerts in Vienna.

CHORAL SOCIETIES.—The most prominent are the SINGVEREIN DER GESELLSCHAFT DER MUSIKFREUNDE and the WIENER SINGAKADEMIE, both founded 1858, devoted to the study and performance of old and new classical choral music (Handel, Bach, Haydn, Beethoven, Schumann, Bruckner, Brahms, Wolf). (See above.) Conductors of the Singakademie were, amongst others, Brahms (1864), Stegmayer, Dessoff, Weinwurm, Heuberger, Mandyczewski, Ochs and Walter. The present conductor is Paul von Klenau.

THE PHILHARMONISCHE CHOR, founded by Franz Schreker, gives its care to modern choral music exclusively (Schönberg, Mahler).

THE ORATORIEN-VEREINIGUNG has Rudolf Nilius for its leader. Two old and famous male choirs complete this list: the WIENER MÄNNERGESANGSVEREIN (conductor, Luze), founded in 1843, and the SCHUBERTBUND, founded in 1863 (conductor, Keldorfer).

There exist innumerable other vocal societies for the performance of church music (Palestrina, Haydn, Schubert, Bruckner, Liszt) and musical societies of working people, all testifying to the deeply rooted musical sense of the Viennese population.

CHAMBER MUSIC.—The principal chamber-music organisation inheriting the great tradition of the Joachim quartet is the ROSÉ QUARTET (*q.v.*) (Rosé, Fischer, Ruzsitska, Walter). Others are the Fitzer Quartet, Buxbaum Quartet, Sedlak-Winkler Quartet and many more. Special care is given to the literature for wind instruments by the 'Bläservereinigung der Wiener Philharmoniker,' with Professor Wunderer as chief.

EDUCATION: UNIVERSITY.—The Musik-historische Seminar, devoted to purely scientific and theoretical work, was founded by the eminent scientist Professor Guido Adler (*q.v.*), president of the society for the publication of musical monuments in Austria and chief of the university's seminary for musical history. This institution contains a large library and has produced a great number of well-known

scientists and artists in and outside of Austria who continue the work of their leader. (Rietsch, Kurth, Fischer, Wellesz, Orel, Haas, Weigl, Kornauth, Grosz, Pisk, Gál).

HOCHSCHULE und AKADEMIE FÜR MUSIK UND DARSTELLEND KUNST.—This establishment has its origin in the Conservatorium founded by the Gesellschaft der Musikfreunde in 1817 (with Antonio Salieri as first leader) as a school for singing, and quickly developing into importance, it enlarged itself in 1819 through a violin class, which was followed in 1821 by a school for all instruments, Joseph Böhm teaching from the beginning. Ernst, Joachim, Grün, Hellmesberger were his pupils (see VIOLIN-PLAYING). In 1870 it was again enlarged by an opera school, and in 1874 by a dramatic school. Guided for a long time by a committee, its first real director was Gottfried Preyer (1843-47). Reorganised through Hellmesberger (1851-93, followed by Fuchs, 1893-1899), it became world famous, having as teachers S. Sechter, J. Herbeck, A. Bruckner, O. Dessoff, H. Grädener, A. Door, T. Epstein, R. Fuchs, E. Mandyczewski, G. Bachrich, R. Heuberger. Innumerable artists have gone forth from this venerable school, amongst the most important of which we name Ernst, Staudigl, Goldmark, Richter, Mottl, Wolf, Mahler, Brodsky, Löwe, Nikisch, Josef Schalk, Franz Schalk, Rosé, Fritz Kreisler and many more.

Since 1908 the Conservatorium has become the property of the State, changing its name into 'Akademie für Musik und darstellende Kunst.' Reorganised in 1924, it is now a university with Professor Joseph Marx as rector and Professor Franz Schmidt as director of the academy. The instruction includes every instrumental and theoretical branch. Since 1910 a department for church music has been added to the State academy at Klosterneuburg, with Professor Max Springer as leader. There are besides more than 100 private music schools in Vienna, amongst which are the Neue Wiener Konservatorium, founded by Professor Richard Robert and Fr. Ondříček.

LIBRARIES AND COLLECTIONS.—The collections of the Gesellschaft der Musikfreunde consist of an archive, a library and a museum, its possessions having gradually increased to its present enormous extent. Its library, founded in 1819, the society acquiring the valuable collection of E. L. Gerber, quickly developed its importance through gifts and legacies. The society came into possession of the Spaun-Witteczek collection of Schubert, of Köchel's Mozart collection and of the library of Johannes Brahms. The society inherited the precious collection of autographs in possession of its first protector, the Archduke Rudolph, and the original of all the Schubert

symphonies, bequeathed by Nicolaus Dumba. The archive now contains nearly 40,000 pieces of music, printed or manuscript, divided into seventeen classes and 10,000 printed vols. The valuable museum includes fragments of J. S. Bach, Haydn's Ten Commandments, Mass in B \flat , a great cantata and six string quartets (1771), Mozart's PF. concerto in D minor, a quintet, his last cantata (Nov. 1791), Beethoven's first violin concerto (a fragment), many songs, the sonata op. 81 (first part), a quantity of sketches, the *Eroica* of Beethoven, choruses by Gluck and Handel, Schubert's opera 'Alfonso und Estrella,' Singspiele, chamber music, symphonies and many songs. The museum possesses besides a large collection of letters, pictures and engravings of celebrated musicians and a collection of ancient musical instruments, medals, busts, etc., from all countries. C. F. Pohl was its archivist and librarian from 1866 until his death in 1887, when he was followed by Dr. Eusebius Mandyczewski, who holds this important office at the present day.

The music collection of the Nationalbibliothek (formerly Hofbibliothek) was founded 1829, and includes numerous autographs of earlier date, ancient and new musical prints and an extensive library. Lately the collection of manuscripts has become considerably enriched, especially through the bequest of Anton Bruckner's original scores (see LIBRARIES). In close connexion with the Nationalbibliothek are the archives of the Staatsoper, the Hofkapelle, the Theater an der Wien, the old Kärntnertortheater. At the head of the music collection is Dr. Robert Haas. The renowned Estensian collection of musical instruments has been placed in the new imperial Burg. The music department of the Wiener Stadtbibliothek (library of the city of Vienna, custos Dr. Alfred Orel) is chiefly occupied with the collection of such documents and facts as concern the musical life in Vienna during the 19th century, possessing many valuable manuscripts connected with it.

POPULAR EDUCATION.—The Wiener Volksbildungsverein (founded 1887), the Societies 'Volksheim' and Urania, popular lectures at the University and at the Academy, together with workmen's symphony concerts, spread the musical education among the broad masses of the people, a work to which great care and much time is devoted.

VIERDANCK, JOHANN, a 16th-century composer. He was a choir-boy in the court chapel at Dresden, and in 1628 was sent to Vienna to study under Sansoni. From about 1640 he was organist at St. Mary's Church, Stralsund. He wrote: 'Erster Theil neuer Pavenen Gagliarden,' 'Balletten und Correnten,' for 2 violins and violon (violoncello) with basso continuo (Rostock, 1637 and 1641);

'Ander Theil' (second part of former), containing some capriccios, canzonas and sonatas for from 2 to 5 instruments, with and without basso continuo (1641); 'Erster Theil geistlicher Concerten,' 2-4 v. (1642), several more editions; 'Geistliche Concerten,' 3-9 v., with basso continuo (1643); 'Ander Theil geistlicher concerten,' 3-9 v. (1643). Schilling compares him with Leo Hassler, whom he resembles closely in style and manner, and Mattheson speaks of him in terms of the highest praise.

E. v. d. s.

VIERLING, GEORG (b. Frankenthal, Bavarian Palatinate, Sept. 15, 1820; d. Wiesbaden, May 1, 1901), son of Jakob Vierling (1796-1867), schoolmaster and organist, studied the organ under J. H. C. Rinck of Darmstadt and under A. B. Marx at Berlin, and in 1847 became organist of the Oberkirche at Frankfurt-on-the-Oder, and conducted the Singakademie there. After passing a short time at Mainz he took up his permanent residence in Berlin, and founded the Bach-Verein, which did much to advance the study of the great master. He was made royal music-director in 1859, and in 1882 professor and a member of the Berlin Academy.

His works, all in the classical style, include:

Symphony, op. 33; Overtures to 'The Tempest,' 'Maria Stuart,' 'Im Frühling,' 'Hermannschlacht,' and 'Die Hexe'; a PF. trio, op. 51; 'Hero and Leander,' 'The Rape of the Sabinas,' 'Alarichs Tod,' and 'Konstantin' for chorus and orchestra; in addition to numerous solo and part-songs, pianoforte pieces, etc. A pilgrims' song of the 7th century, 'O Roma Nobilis,' for 6-part chorus *a cappella*, is op. 63.

G.

VIERLING, JOHANN GOTTFRIED (b. Metzels, Meiningen, Jan. 25, 1750; d. Schmalkalden, Nov. 22, 1813), studied at Schmalkalden under the organist Fischer, whom he succeeded afterwards in office. He employed a prolonged leave of absence to study under C. P. E. Bach at Hamburg, and Kirmberger at Berlin, whence he returned to his modest position which he retained to the time of his death. He was accounted one of the greatest organists of his time and a composer of sterling merit. He wrote a four-part Hymn-book with a short introduction to thorough-bass (1789); an attempt at an instruction book for improvising (*präludieren*) for the unpractised (1794); an Instruction in Thorough-bass (1805); several books of organ pieces, many of which have appeared in modern editions; 127th Psalm for 3-part chorus and orchestra; about 40 cantatas for chorus, solo voices and orchestra, a Magnificat, etc. (MS.); a singspiel, 'Empfindung und Empfindelei'; Harvest Festival music (MS.); songs in K. W. Justi's 'Gedichte' (1810); 2 pianoforte trios, op. 1 (1781); one quartet for pianoforte, 2 violins and bass, op. 4; 6 sonatas for pianoforte, dedicated to Kirmberger (Leipzig, Breitkopf, 1781); Riemann mentions a pianoforte quintet, but apparently in mistake for the quartet.

E. v. d. s.

BIEL.—KARL PAULKE, *Johann Gottfried Vierling, 1750-1813*. A.M., Oct. 1922, pp. 143-55. With a catalogue of his compositions.

VIERNE, (1) LOUIS (b. Poitiers, 1870), organist, studied at the Paris Conservatoire under Franck and Widor. After acting as assistant to the latter at St. Sulpice he was appointed to Notre Dame, Paris. His compositions include a Mass for chorus and orchestra, a symphony, a string quartet, sonatas for violin and piano and violoncello and piano, and many smaller instrumental and vocal pieces. For the organ he has written 5 symphonies and about 30 short pieces. The best of his organ works are brilliantly effective and of considerable harmonic originality.

(2) RENÉ, brother of the above (b. Lille, Mar. 11, 1878; d. Verdun), organist. He fell in the European war. He was organist at Notre Dame des Champs, Paris, and wrote for the organ some sets of short pieces which, though mainly simple, and in some cases designed for manuals only, show freshness and originality.

H. G.

VIEUX, MAURICE EDGARD (b. Savy-Berlette, Apr. 14, 1884), viola-player. After brilliant studies at the Paris Conservatoire he took the first viola prize in 1902. On the death of his master, Laforge (1918), he took on his class, of which he is now the regular professor. Maurice Vieux has for long been viola soloist in the Société des Concerts du Conservatoire, and has taken part in the most important chamber-music performances. His qualities of style and of technique are of the first order, but he is chiefly distinguished for the beauty and fullness of his tone.

M. P.

VIEUXTEMPS, (1) HENRI (b. Verviers, Belgium, Feb. 20, 1820¹; d. Mustapha-lez-Alger, Algiers, June 6, 1881), celebrated violinist and composer for his instrument.

His father, a retired officer, was an instrument-maker and piano-tuner. Through the kindness of one Genin he had instruction from Lecloux, a competent local musician, and by the time he was 6 played Rode's 5th concerto in public with orchestra. In the winter of 1827 he and his father made a tour with Lecloux, in the course of which the boy was heard by De Bériot, who at once adopted him as his pupil, devoted himself to his thorough musical education, and in 1828 took him to Paris and produced him in public. On De Bériot's departure to Italy in 1831, the boy returned to Brussels, where he remained for some time, studying and practising hard, but without any guidance but his own. In 1833 his father took him on a lengthened tour through Germany—the first of an enormous series—in the course of which he met Guhr, Spohr, Molique and other musicians, and heard much music, amongst the rest 'Fidelio.' The journey extended as far as Munich and Vienna, where he excited surprise,

not only for his fullness of tone, purity of intonation, and elegance of style, but also for the ready way in which he played off a MS. piece of Mayseder's at sight (*A.M.Z.*, 1834, p. 160). He remained in Vienna during the winter, and while there took lessons in counterpoint from Sechter. There, too, he made the acquaintance of Mayseder, Czerny and others. He also played Beethoven's violin concerto (at that time a novelty) at the Concert Spirituel. The party then returned northwards by Prague, Dresden, Leipzig (where Schumann welcomed him in a genial article in his *Neue Zeitschrift*), Berlin and Hamburg.

In the spring of 1834 he was in London at the same time with De Bériot, and played for the first time at the Philharmonic on June 2.² Here, too, he met Paganini. The winter of 1835 was spent in Paris, where he made a long stay, studying composition under Reicha. After this he began to write, and his compositions were brought forward in Holland in 1836. In 1837 he and his father made a second visit to Vienna, and in 1838 they took a journey to Russia, by Warsaw, travelling for part of the way with Henselt. The success was so great as to induce another visit in the following year, when he made the journey by Riga, this time with Servais. On the road he made the acquaintance of Richard Wagner. But a little later, at Narva, he was taken with a serious illness which delayed his arrival for some months, and lost him the winter season of 1838. The summer was spent in the country, mostly in composition—concerto in E, Fantaisie-Caprice, etc.—both which he produced in the following winter amid the most prodigious enthusiasm; which was repeated in his native country when he returned, especially at the Rubens Fêtes in Antwerp (Aug. 1840), where he was decorated with the Order of Leopold, and in Paris, where he played the concerto at the Concert du Conservatoire, Jan. 12, 1841. He then made a second visit to London, and performed at the Philharmonic concert of Apr. 19, and at two others of the same series—a rare proof of the strong impression he made.

The next few years were taken up in another enormous continental tour, and in a voyage to America in 1844. A large number of compositions (opp. 6 to 19) were published after regaining Brussels; but the strain of the incessant occupation of the tour necessitated a long *Kur* at Stuttgart. During this he composed his A major concerto (op. 25) and played it at Brussels in Jan. 1845. In the following autumn he married Miss Josephine Eder, an eminent pianist of Vienna. Shortly after this he accepted an invitation to settle in St. Petersburg as solo violinist to the Emperor, and professor in the Conservatoire, and in Sept. 1846 quitted Western Europe for Russia. In 1852,

¹ The materials for this sketch are supplied by Vieuxtemps's autograph published in the *Guide Musical*, and translated in the *Musical World*, June 25, 1881, and following nos., by Philharmonic Programmes, the *A.M.Z.* and other sources.

² Moscheles, *L'Es.* 1, 304; and Philh. Programmes.

however, he threw up this strange contract and returned to his old arena and his incessant wanderings. 1853 saw the composition of his concerto in D minor (op. 31). 1855 was spent in Belgium, and at a property which he had acquired near Frankfort. In 1857 he again visited the United States in company with Thalberg, and in the winter of 1858 was once more in Paris occupied in finishing his 5th concerto in A minor (op. 37). The next ten years were occupied in constant touring all over central Europe, and, somewhat later, Italy. Serious affliction now overtook his hitherto prosperous course. First his father, and then—June 29, 1868—his beloved wife, died. To divert his mind from the shock of these losses he engaged in another enormous tour over Europe, and that again was followed, in Aug. 1870, by a third expedition to the United States, from which he returned in the spring of 1871 to find Paris in ruins. This was the last of his huge tours. From 1871–73, on the invitation of Gevaert, who had succeeded Fétis at the Brussels Conservatoire, he acted as teacher to the violin class there, and as director of the popular concerts; but this sphere of activity was suddenly ended by a paralytic attack which disabled the whole of his left side, and in consequence made playing impossible. His passion for travelling, however, remained to the last, and it was at Mustapha-lex-Alger, in Algiers, that he died, leaving a 6th concerto, in G, dedicated to Mme. Norman-Néruda, by whom it was first played. In 1872 Vieuxtemps was elected member of the Académie Royale of Belgium, on which occasion he read a memoir of Étienne Jean Soubre.

Vieuxtemps was one of the greatest violinists of modern times, and with De Bériot heads the French school. He had all the great qualities of technique so characteristic of that school. His intonation was perfect, his command of the bow unsurpassed. An astonishing staccato—in up and down bow—was a speciality of his; and in addition he had a tone of such breadth and power as is not generally found with French violinists. He was fond of strong dramatic accents and contrasts, and, generally speaking, his style was better adapted to his own compositions and those of other French composers than to the works of the great classical masters. At the same time it should be said that he gained some of his greatest successes in the concertos of Beethoven and Mendelssohn, and was by no means unsuccessful as a quartet-player.

As a composer for the violin he had a wider success than almost any one since Spohr; and the fact that not a few of his works, though written more than half a century ago, are still stock-pieces of the repertories of many violinists, shows such vitality as to lift him out of the rank of composers of merely ephemeral

productions of the virtuoso genre. It must be granted that their value is very unequal. While De Bériot, with his somewhat flimsy workmanship but undeniable charm of sentimental melody, has often been compared to Bellini and Donizetti, Vieuxtemps might not improperly be called the Meyerbeer among composers for the violin. He appears to share the good and the bad qualities of that great opera-writer. On the one hand, no lack of invention, beauty of melody, extremely clever calculation of effect; and on the other, a somewhat bombastic and theatrical pathos, and occasional lapses into triviality.

The best-known of his works are the concertos, No. 1, in E (op. 10); No. 2, in F# minor (op. 19); No. 3, in A (op. 25); No. 4, in D minor (op. 31); No. 5, in A minor (op. 37); No. 6, in G (op. 47); the Fantaisie Caprice and Ballade et Polonaise. He also published a sonata for piano and violin, three cadenzas for Beethoven's violin concerto, and a large number of concert pieces. A statue was erected to his memory at Verviers in 1898. P. D.

BIBL.—TH. RADOUX, *H. Vieuxtemps, sa vie et ses œuvres* (1891); PAUL BREGHANS, *Henri Vieuxtemps* (Turnhout, 1920). (*Les Grands Belges*.)

The brothers of Henri Vieuxtemps were :

(2) JEAN JOSEPH LUCIEN (b. July 5, 1828; d. Brussels, Jan. 1901), pianist, teacher and composer for the piano.

(3) JULES JOSEPH ERNEST (b. Brussels, Mar. 1832; d. Belfast, Mar. 20, 1896), violoncellist, who for many years was solo violoncellist at the Italian Opera in London and later in the Hallé orchestra at Manchester. (*Riemann*.)

VIGANO, SALVATORE (b. Naples, Mar. 29, 1769; d. Milan, Aug. 10, 1821), a famous dancer, and composer both of the action and the music of ballets, who will have a longer reputation than is otherwise his due, owing to his connexion with Beethoven. He began his career at Rome in female parts, women being then forbidden the stage there. We next find him at Madrid—where he married Maria Medina, a famous dancer—Bordeaux, London and Venice. At Venice in 1791 he brought out an opera, 'Raoul, sire de Créqui,' both words and music his own. Thence he came to Vienna, where he and his wife made their début, May 13, 1793. He then travelled in Germany, and returned to Vienna in 1799. Here he attracted the notice of the Empress, and the result was his ballet of *The Men of Prometheus*, 'Gli uomini di Prometeo,' or 'Die Geschöpfe des Prometheus' (music by Beethoven), the subject of which is said to have been suggested by Haydn's 'Creation' (Schöpfung), then in its first fame. The piece is called an heroic allegorical ballet, in two acts. It was produced at the Court Theatre, Mar. 28, 1801, and the two 'creations' were danced by Vigano and Mlle. Cassentini, his wife being then *passée*. It had

a remarkable run, being performed sixteen times in 1801, and thirteen times in 1802. Vignano was evidently a man of great ability, and made a real reputation for his abandonment of the old artificial Italian style of ballet in favour of a 'closer imitation of nature.' Ten ballets of his are mentioned in the *A.M.Z.*, and no doubt these are not all that he composed. How solid was his success may be judged from a passage in one of the letters of Henri Beyle (Stendhal): 'Vignano has been immensely prosperous; 4000 francs are the usual income of a ballet composer, but he has had 44,000 for the year 1819 alone.'

Vignano seems to have given his name to a kind of minuet in 4-4 time; at least, if we may so interpret the title of a set of twelve Variations on a Minuet 'a la Vignano,' which Beethoven published in Feb. 1796.

The minuet was certainly danced, for the names of the dancers are given,¹ and is as certainly in Common time:

It is worth noting that Beethoven has put the concluding variation and coda into triple time:

There is a life of Vignano—*Commentarii della vita*, etc., by Carlo Ritorni, 8vo, Milan, 1838; and much information on him and on the ballet of Prometheus (from which the above is chiefly compiled) is given by Thayer in his *Beethoven*, vol. ii. pp. 124-6 and 380-84 (1st ed.). See also *Krehbiel*, i. 283 *et seq.* G.

VIGNATI, GIUSEPPE, an early 18th-century opera composer of Bologna. Only text-books of his operas between 1702 and 1726 are in existence. Some cantatas and church music works are preserved in MS. (*Q.-L.*).

VIGNERS, E., see LATVIAN MUSIC.

VIGUERIE, BERNARD (b. Carcassonne, Languedoc, c. 1761; d. Paris, Mar. 1819), pupil of Charpentier at Paris, where he settled as teacher and music publisher. He wrote a considerable number of pianoforte sonatas,

with and without accompaniment of the violin; 'Overture *ad lib.*' for pianoforte, violin and bass (*ad lib.*), op. 11. He contributed also to the notorious 'battle-piece' literature by 'La Bataille de Maringo,' which was published in London as 'The Battle of Marengo, a sonata . . . with additions by the Marquis of Salvo'; 2 caprices for PF., op. 3. In Le Cène's 6 concerti he is also represented. His Tutor for the pianoforte appeared in a large number of editions, and attained great popularity. Most of his works were published by himself. E. v. d. s.

VIHAN (WIHAN), HANUŠ, see BOHEMIAN STRING QUARTET.

VIHUELA, a guitar-shaped instrument, the Spanish equivalent of the lute. It had a flat back and a comparatively short neck though the head with the pegs was bent backwards at an angle of about 135°. From the 13th to the 16th centuries there were three kinds of vihuela: (1) *vihuela de péndola* (see *PLATE XXVIII.* No. 2), played with a plectrum, like the modern mandoline, and the Calabrian *chitarra battente*; (2) *vihuela de arco* (see *PLATE XLVI.* No. 1), played with a bow, i.e. a viol; and (3) *vihuela de mano*, played with the hand. It was the last which became the universal instrument in 16th-century Spain and for which music of all sorts was arranged. The lute proper, as it was known in other parts of Europe, was only played in Spain by strangers and was called *vihuela de Flandes* (Flemish lute).

At the time of Luis MILAN (*q.v.*), author of the earliest Spanish book of lute-tablature (1535), the vihuela had six strings (5 double and one single), usually tuned at intervals of a 4th with a major 3rd between the third and fourth strings:

Vihuela
(16th cent.).

Guitar
(19th and 20th cent.).

Music of the Spanish *vihuelistas* may therefore be played on the modern guitar by (a) transposing the instrument up a minor 3rd (which is frequently done by modern players and easily accomplished by means of a *capotasto*, Span. *cejuela*, fastened round the neck at the level of the third string); and (b) by lowering the third string a semitone. The late Dr. Oscar Chilesotti used to play old Italian lute-music on the guitar to friends who visited him at Bassano; and old Spanish music for the vihuela is sometimes included in modern Spanish programmes for the guitar.

The vihuela was generally the instrument of elegant and polite society. The popular instrument, even as early as the time of Luis Milan, was the GUITAR (*q.v.*). At first it had only four strings tuned like the inner ones of the

¹ The title of the original edition (given in the *Wiener Zeitung* of Feb. 27, 1796) runs as follows: 'XII Variazioni per il Clavicembalo o Piano-Forte Sul Menuetto ballato dalla Signa. Venturini e Sign. Cechi nel Ballo delle Nozze disturbate, del Sign. Luigi van Beethoven No. 3. In Vienna presso Artaria e Comp.' The Ballet was composed by J. J. Halbl, and produced at the Court Theatre, May 18, 1796.

vihuela. It was called 'Spanish' when it regularly began to be made with five strings; and from that time forward, the vihuela began to disappear. Ten books of tablature for the vihuela were published in Spain between 1535 and 1578; but FUENLLANA (*q.v.*) writing in 1554 already includes pieces for the guitar, and by the end of the 16th century the vihuela was practically obsolete. Now that the guitar has six strings (the sixth was added about 1800) it is as difficult to play, and as effective when well played, as the vihuela is ever likely to have been.

The following books of tablature for the vihuela were published in Spain:

A. IN ITALIAN LUTE-TABLATURE

MILAN, LUIS. Libro de musica de vihuela de mano intitulado El Maestro. Valencia, 1535-6. (B.M.; Bibl. Nat., Paris; Bibl. Nac. and Bibl. Real, Madrid; Bibl. Diputación, Barcelona.)

NARVAEZ, LUIS DE. Los seys libros del Delphin de Musica. Valladolid, 1538. (B.M.; Bibl. Nac., Madrid; Bibl. Prov., Toledo.)

MUDARRA, ALONSO DE. Tres libros en cifras para vihuela. Seville, 1546. (Bibl. Nac., Madrid; Bibl. Escorial.)

ENRIQUEZ DE VALDERRABANO, ENRIQUE. Libro de musica de vihuela, intitulado Silva de Sirenas. Valladolid, 1547. (B.M.; Bibl. Nac., Madrid; Bibl. Univ. Barcelona; Staatsbibl., Vienna.)

PRADON, DIEGO. Libro de musica de vihuela. Salamanca, 1552. (B.M.; Bibl. Nat., Paris; Bibl. Nac., Madrid; Bibl. Escorial.)

FUENLLANA, MIGUEL DE. Libro de musica de vihuela intitulado Orphenica Lyra. Seville, 1554. (B.M.; Bibl. Nac. and Conserv., Paris; Bibl. Nac., Madrid; Bibl. Escorial; Bibl. Diputación, Barcelona; Staatsbibl., Vienna; Bibl. Wiesbaden; Bibl. Univ., Innsbruck.)

DAZA, ESTEBAN. Libro de musica en cifras para vihuela intitulado El Farnaso. Cordoba, 1576. (Bibl. Nac., Madrid.)

See MORPHY, *Les Luthistes espagnols* (Leipzig, 1902); Villalba, *10 Canciones españolas de los siglos XV y XVI* (Madrid); Luis Milán and the *Vihuelistas* (Oxford, 1925). A complete edition of the Spanish vihuelistas is in course of publication by E. M. Turner (Junta para Ampliación de Estudios, Madrid).

J. B. T.

VILA, PEDRO ALBERTO (*b. ?* Barcelona, 1517; *d.* there, Nov. 16, 1582), Spanish madrigalist, organist and canon of the Cathedral at Barcelona, who published a set entitled

Odarum quas vulgo madrigales appellamus . . . lib. I. Barcelona, 1561. (Barcelona, Bibl. de la Diputación; also only.)

The words of this curious collection are in Spanish, Catalan, Italian or French. A few pieces in MS. are preserved in the same library; and in the library of the Orfeo Català, Barcelona; while organ-works are printed in the tablature of VENEGAS (*q.v.*). J. B. T.

VILAR, JOSEPH THEODOR (*b.* Barcelona, Aug. 10, 1836; *d.* there, Oct. 21, 1905), studied with Ramon Vilanova (1801-70), the cathedral organist, himself a composer of church music of some distinction. In 1859 he went to Paris to continue his education with Henri Herz for piano and Bazin and Halévy for composition. On his return to his native city in 1863 he wrote an abridgment of musical history, played at concerts, and wrote a considerable number of zarzuelas. 'La Romeria de Racasens' (1867),

'L'Ultim Rey de Magnolia' (1868), 'El Pescadors de San Pol' (1869), 'Una Prometensa,' 'La Rambla de las Flores,' and 'Pot mes qui piuta' (1870), 'La Lluna en un cove,' 'L'Escò del pecat,' and 'La Torre del amor' (1871). He was second conductor at one of the subordinate theatres, and afterwards rose to be chorus-master and finally conductor at the Teatro Principal. Later on he devoted himself exclusively to teaching and composition. M.

VILBAC, ALPHONSE CHARLES RENAUD DE, (*b.* Montpellier, June 3, 1829; *d.* Brussels, Mar. 19, 1884), entered the Paris Conservatoire in 1842, and in 1844 took the first organ-prize, and the Prix de Rome at the same time as Victor Massé. The favourite pupil of Halévy, and remarkably industrious, he first became known as a composer of pianoforte pieces, more brilliant than original, but, like all young prize-winners on their return from Italy, he aspired to the stage. It was not, however, till Sept. 4, 1857, that he produced his first work, 'Au clair de la lune,' a pretty operetta in one act (Bouffes Parisiens), followed closely by his last, 'Don Almanzor' (Théâtre Lyrique, Apr. 16, 1858). He found his true vocation as organist of Saint-Eugène (1855-71), where he rivalled Lefébure-Wély in improvisation, and equalled him in execution. Unfortunately he became a mere music-publisher's hack, and amateur pianists are familiar with his mosaïques, fantaisies, etc., for two and four hands, with such titles as 'Beautés de l'Opéra,' etc. This journeyman's work did not even pay, and he died in poverty. So brilliant and agreeable a talker deserved a better fate. He became nearly blind, but to the last retained his charming manner and his ability as a musician. The library of the Conservatoire contains the MSS. of his cantata 'Le Renégat de Tangier' and a 'Messe solennelle' (Aug. 1847). He also left printed scores of several orchestral works, 'Pompadour gavotte,' 'Chanson cyprïote,' 'Marche serbe,' etc. G. C.

VILLAGE ROMEO AND JULIET, A, opera in a prologue and 3 acts, text (after Gottfried Keller) and music by Frederick Delius. Produced Berlin Komische Oper, 1907; Covent Garden, in English, Feb. 22, 1910.

VILLALBA, P. LUIS (*b.* Valladolid, 1873; *d.* Madrid, Jan. 9, 1921), Spanish composer and musical historian. He came of a family of musicians, but entered the Augustinian order at the age of 14 and was a monk in the Escorial until shortly before his death. He renounced his order and went to live in Madrid, though he still remained a priest. His historical work was printed mainly in *La Ciudad de Dios*—'The City of God,' a review published at the Escorial, and notable for its studies of Spanish musical history. It includes a course of lectures on chamber music in Spain (*La Música*

de cámara en España) and a study of the organ in Spain in the 15th and 16th centuries. He edited a set of songs from the *vihuelistas* (Spanish lutenists) of the 16th century (v. VIHUELA) and an 'Antología de organistas clásicos españoles,' besides numerous transcriptions of old music which have never been collected.

J. B. T.

VILLANCICO, a Spanish musical term which has had different meanings at different times. (1) A form of Spanish verse, similar to (or identical with) the Spanish Arabic *muwashshah* and *zajal*, i.e. having the refrain at the beginning and (in the latter) repeated after every verse, together with a complicated rhyme-pattern; (2) The music to which these types of verse was sung: first monodic (cf. ALFONSO X.) then a madrigalesque composition for 3-5 v., the melody often being treated as a solo and accompanied by the other voices, as in Byrd's 'Psalms, Sonnets and Songs,' 1588. (cf. VASQUEZ). (3) A composition resembling a cantata, with soli and chorus, accompanied by strings and organ, and sometimes with wind instruments as well. The words are always in Spanish (never in Latin); the favourite subject is the visit of the Shepherds to the Manger, singing in rustic dialects from different parts of Spain. The *villancico*, however, is not exclusively Christmas music.

J. B. T.

VILLANELLA (Ital., a country girl), an unaccompanied part-song, of light rustic character, sharing, in about equal proportions, the characteristics of the Canzonetta and the Balletta. The looseness of the style is forcibly described by Morley, who, in Part III. of his *Introduction to Practicall Musicke*, speaks of it thus:

'The last degree of gravity (if they have any at all) is given to the *villanelle*, or country songs, which are made only for the ditties sake: for, so they be aptly set to expresse the nature of the ditty, the composer (though he were never so excellent) will not stick to take many perfect cords of one kind together, for, in this kind they think it no fault (as being a kind of keeping *decorum*) to make a clownish musick to a clownish matter: and though many times the ditty be fine enough, yet because it carrieth that name *Villanella*, they take those disallowances as being good enough for a plow and cart.'

This severe criticism is, however, applicable only to villanelle of the very lowest order. The productions of Kapsberger—whose attempts in this direction were very numerous—and of other composers wanting the delicate touch necessary for the successful manipulation of a style so light and airy, are certainly not free from reproach. But the villanelle of Pomponio Nenna, Stefano Felis, and other masters of the Neapolitan School,¹ differ but little from the charming canzonetti, the canzone alla Napolitana, and the balletti, for which they are so justly celebrated, and may be fairly classed

among the most delightful productions of the lighter kind that the earlier half of the 17th century has bequeathed to us. Among the lighter madrigals of Luca Marenzio—such as 'Vezzosa' augelli—there are many which exhibit almost all the more prominent characteristics of the villanella in their most refined form: and the greater number of the canzone of Giovanni Feretti, and the balletti of Gastoldi—to which Morley is generally believed to have been indebted for the first suggestion of his own still more charming ballets—differ from true villanella only in name. The same may be said of Morley's own compositions in the same style. (See MADRIGAL.)

W. S. R.

VILLANI, GABRIELE, a 16th-century composer of Piacenza, who wrote 2 books of 'Toscanello,' 4 v. (Venice, 1587, 1591).

VILLANI, GASPARO (b. Piacenza, late 16th cent.), organist at Piacenza Cathedral in 1610; wrote: 'Missa, Psalmi ad Vesperas et Motecta,' 16 v., lib. 2 (1610); 3 books of psalms, op. 3 (12 v.), lib. 5 (8 v.), op. 7 (5 v.); litanies, 8 v., lib. 1 (1610); 'Ad Deum opt. max. ad Deiparamque Virginem . . .' lib. 4, 20 v. (1611), containing a Mass, Hymnus, Te Deum; 5 eight-part masses, lib. 6 (1612) (Q.-L.).

VILLAROSA, IL MARCHESE DI, the author of a Dictionary of Neapolitan musicians, entitled *Memorie dei compositori di musica del Regno di Napoli, raccolte dal Marchese di Villarosa*. Napoli, 1840. He was also the author of a work on Pergolesi (2nd ed., Naples, 1843), and to him is due the first certain knowledge of the place and date of the birth of that great composer.

G.

VILLI, LE, opera in 2 acts, text by Fontana; music by Puccini. Produced, in its original form in one act, Teatro dal Verme, Milan, May 31, 1884; in 2 acts, Reggio Theatre, Turin, Dec. 26, 1884; New York, Metropolitan Opera House, Dec. 17, 1908. Adam's ballet 'Giselle' and Loder's 'Night Dancers' have the same subject.

VILLOTA (VILLOTTA), a Venetian folksong of which the melody, according to Karl Somborn's monograph on the form, was used for many different sets of words.

VILLOTEAU, GUILLAUME ANDRÉ (b. Bel-lême, Dept. de l'Orne, Sept. 6, 1759; d. Tours, Apr. 27, 1839), a French writer on music. After the death of his father he was put, at 4 years of age, into the maîtrise of the Cathedral of Le Mans, and afterwards into the town school, under the Fathers of the Oratory. He declined, however, to enter a seminary, enlisted as a dragoon, but was totally unfitted for a military life, and ultimately went up for three years to the Sorbonne, and obtained a place in the choir of Notre Dame. The outbreak of the Revolution brought this employment to an end, and in 1792 he entered the chorus of the Opéra, and remained there till offered a place as musician

¹ The Stadtbibliothek at Munich contains a large number of these works, by Giovanni de' Antiquis, and fourteen other Neapolitan composers; printed at Venice in 1874, in two very rare vols. obl. 8vo.

among the savants who accompanied Napoleon on his expedition to Egypt.

This musical mission opened to him a congenial sphere for his very considerable abilities. Having studied on the spot ancient music, both Egyptian and Oriental, he returned to Paris, and continued his researches in the public libraries. As a member of the Institut de l'Égypte, he was anxious, before taking part in the great work which that body was commissioned by Government to draw up, to publish a *Mémoire sur la possibilité et l'utilité d'une théorie exacte des principes naturels de la musique* (Paris, 1809, 88 pp. 8vo), which he had read before the Société libre des Sciences et des Arts. This was followed by *Recherches sur l'analogie de la musique avec les arts qui ont pour objet l'imitation du langage* (ibid., 1807, 2 vols. 8vo), in which he developed some of his favourite ideas. This huge book, in four parts, with all its tediousness, purposeless digressions and false philosophy, is crammed full of learning, and contains ideas which at that date were new and original.¹

Villoteau's fame rests not on this book, but on his share in *La Description de l'Égypte*, the magnificent work in twenty vols. folio (eleven being plates), which took seventeen years to publish (1809-26), and which reflected so much credit on Conté and Jomard, the distinguished secretaries of the commission. The musical portions are: (1) On the present condition of music in Egypt; researches and observations historical and descriptive made in the country (240 pp., October 1812); (2) A description, historical, technical and literary, of musical instruments in use among the Orientals (170 pp., 1813, with three plates engraved by Dechamel); (3) A dissertation on the different kinds of musical instruments to be seen on the ancient monuments of Egypt, and on the names given them in their own language by the first inhabitants of the country (26 pp.); (4) The music of ancient Egypt (70 pp., 1816).

As a student, and unversed in matters of business, Villoteau made no profit either out of his position or his labours. Three-parts ruined by a notary, whom he had commissioned to buy him a property in Touraine, he had to leave Paris for Tours, where he owned a small house. Here he lived on his own slender resources, and on certain small sums allowed him by government for a French translation of Meibom's *Antiquæ musicae auctores VII* (1652), which, however, was never published. The MS., now in the library of the Conservatoire, is in three columns, the original Greek, and translations into Latin and French, all in Villoteau's hand.

¹ According to Rétis, its success was so small that the publisher exported or destroyed all the unsold copies, a fact which would account for its present scarcity, but as the copyright was Villoteau's own property, and it had been entered at Galland's, it is difficult to believe a story so much to the discredit of a respectable bookseller like Renouard.

During his last years Villoteau wrote a *Traité de phonétique*, now lost, which was not approved by the Institut de France, and consequently not published. G. C.

VIN.A, see INDIAN MUSIC, subsection INSTRUMENTS. (PLATE XXXVII.)

VINACESI, CAVALIERE BENEDETTO (b. Brescia, c. 1670; d. Venice, 1719), maestro di cappella to Prince Francesco Gonzaga di Castiglione. He was appointed to the second organ of St. Mark's, Venice, on Sept. 7, 1704, at 200 ducats per annum which, in 1714, was raised to 300 ducats, and from 1706 he was also choir-master at the Conservatorio dell' Ospedaletto (female orphanage). He composed a great deal of church music, including motets for 2 and 3 voices (1714), a motet for solo voice with 3 viols (MS. in Berlin Library), 2 oratorios, several operas, including 'Scipione Africano,' composed in conjunction with Franco. Cavalli (Venice, 1678), and a book of church sonatas, 'Sfere armoniche,' for 2 violins, violoncello and basso continuo for organ (1696) (*Fétis*; Schilling; *Q.-L.*).

VINCENT, a family of English musicians who were all recognised composers and performers during the early part of the 18th century, and consisted of (1) RICHARD, (2) THOMAS, (3) JAMES, and (4) THOMAS, junior. All these signed, in the order given, the trust deed of the ROYAL SOCIETY OF MUSICIANS in Aug. 1739. As the contemporary publications frequently merely gave the name of the composer of a piece of music as 'Mr. Vincent,' it is exceedingly difficult to separate these members of the family.

(1) RICHARD was probably the uncle and (2) THOMAS the father of Thomas, junior, the oboist, whose father was, according to Burney,² a bassoon-player in the Guards. (3) JAMES (d. Oct. 6, 1749³), the brother of Thomas (4), was, according to the same authority, 'Joint organist of the Temple with Stanley, and a brilliant performer.' He died young. Several songs 'composed by Mr. Vincent' are to be found in Watt's 'Musical Miscellany,' vol. iv. 1730, but it is not clear whether they are by James, whose full name appears on single songs. There was also a Richard Vincent, junior. A notice of the death of a Richard Vincent occurs in the *Gentleman's Magazine* under date Aug. 10, 1783:

'In Tottenham Court Road, aged eighty-two, Mr. Richard Vincent, the oldest musician belonging to Covent Garden playhouse, and to Vauxhall Gardens, who enjoyed till the last years of his life a remarkable flow of spirits.'

(4) THOMAS (b. circa 1720; d. ? May 10, 1783), oboist and composer, became the pupil of SAMMARTINI, who taught him his method of playing, by which the oboe, hitherto of coarse

² *General History of Music*, iv. 487.

³ See *London Magazine*, Oct. 1749.

tone, became valuable as a solo instrument. His first publication was

¹ 'Six Solos for a Hautboy, German Flute, Violin, or Harpsichord, with a Thorough Bass, Composed by Thomas Vincent, Junior, opera prima, London. Printed by Wm. Smith at the Golden Bass in Middle Row, Holborn, and sold by the author at his house in Golden Square.'

His opera secunda, with a copyright dated Oct. 27, 1748, was

² 'A Set of Familiar Lessons for the Harpsichord,' op. 2, published by John Cox, London, and 'Six Solos for a Hautboy, German Flute, Violin, or Harpsichord.'

Thomas had entered the King's band as a hautboy-player in 1735. He was there also in 1758; the Thomas Vincent who was in this band in 1778 was possibly his son.

Alfred Moffat¹ published an arrangement of a sonata, in A minor, for the violin, by Thomas Vincent, in his 'Old English Violin Music' (Novello). F. K.

VINCENTI, GIACOMO, an important 16th-17th-century music publisher and printer of Venice, in partnership with Ricciardo Amadino from 1583-86, when they separated, each continuing under his own name. G. Vincenti can be traced until Dec. 24, 1618, when he was succeeded by Alessandro Vincenti. Giacomo published a considerable number of collective volumes of sacred and secular vocal music mostly compiled and edited by himself (Eitner; E. Vogel, *Bibliothek*, etc.; Q.-L.).

VINCI, LEONARDO (b. Strongoli, Calabria, 1690; d. Naples, May 28, 1730), was a pupil of Gaetano Greco at the Conservatorio dei Poveri di Gesù Cristo in Naples. His first known work was a comic opera in Neapolitan dialect, 'Lo cecato fauzo' (Il falso cieco), produced at the Teatro de' Fiorentini in 1719. The *Gazzetta di Napoli* of Apr. 25 informs us that the opera met with a great success, and that the composer was maestro di cappella to the Prince of Sansevero. The latter, it will be remembered, was also a patron of Alessandro Scarlatti. This opera was followed by others of the same sort, 'Le zite 'n galera' (1722) being the earliest of which the music has survived. Florimo mentions a serious opera, 'La Stratonice,' as having been produced in 1720, but no trace of it is to be found. The earliest extant example of his serious style is 'Silla dittatore,' produced on the birthday of Charles VI. at the Teatro S. Bartolomeo in 1723, in which the principal parts were sung by Nicolo Grimaldi and Maria Benti-Bulgarelli, generally known as La Romanina. His connexion with the Teatro Fiorentini terminated after 1722, and the new Teatro della Pace (afterwards the scene of so many of Logroscino's triumphs) was inaugurated on May 15, 1724, with his comic opera 'La mogliera fedele.' He seems, however, to have devoted himself for the rest of his life mainly to *opera seria*, and the few comic operas which appeared later at the Teatro Nuovo (the special theatre of Leo's

comic muse) were in most cases revivals of earlier works. On the death of A. Scarlatti in 1725 he became pro-vice-maestro of the royal chapel, the post becoming vacant by the promotion of Mancini and Sarro; this appointment he held until his death. Florimo states that he was maestro, but this was not possible, as Mancini, who succeeded Scarlatti, did not die until 1738 or 1739. In 1728 (according to Florimo) Vinci entered the Congregation of the Rosary in the monastery of S. Caterina a Formiello, but apparently this did not prevent his continuing to write for the stage. The date of his death has been erroneously given by Fétis and others as 1734 or 1732, and it has been supposed that he was poisoned by a relative of a Roman lady with whom he had a liaison. But F. Piovano² demonstrated clearly that he must have been dead before June 1731, and definite information is given by the curious inscription on a caricature of him by Ghezzi in the Vatican Library, reproduced in the *R.M.I.* for 1904, fasc. 2. From this we learn that he died at Naples on Sunday, May 28, 1730. Ghezzi, whose comments on his sitters are as brutal as his portraits, says nothing whatever about either poison or a love-affair:

'He died of colic pains so suddenly that he could not even make his confession, and if the sister of Cardinal Ruffo had not given some assistance he could not even have been buried, not even three paoli being found on him, since he was a man who would have gambled his eyes away.'

Burney rightly praises Vinci for his strong sense of dramatic expression. Of the immediate followers of Scarlatti he is certainly the most vigorous, and his short career as a composer is long enough to give a very clear view of the gradual development of the aria-form from the type of Scarlatti as shown in 'Silla dittatore' (1723) to that generally associated with the name of Pergolesi, but found in Vinci ('Astianatte' 1725 and 'Artaserse' 1730) before the other had been heard of as a composer. There can be little doubt that this extension of the aria form owed its first inception to Farinelli. The great singer was equally celebrated for his agility and for his sustaining power; and in almost all the arias composed for him by Vinci, as well as in the few that he sang in Scarlatti's later operas, we may note that the desire to display these two qualities has gradually led to a sharper differentiation of two contrasting subjects, treated in the conventional binary form. The form A₁ B₂ A₂ B₁ || contrasting section || Da Capo may be traced in Scarlatti's earlier chamber cantatas; but it is not until the time of Vinci that the subjects A and B are made to contrast almost as strongly as they would in a sonata of Mozart. The well-known air 'Vo solcando un mar crudele' is a good example. This extension of the aria-form by Farinelli and Vinci is

¹ To whose researches are due many of the facts here recorded.

² *Sammelbände* of the Int. Mus. Ges. viii. 70.

important on account of its powerful influence on the forms of the concerto and the symphony.¹ In addition to the works of Vinci, mentioned in *Q.-L.*, there are several of his operas at Münster (Santini's Library) and at Montecassino.

E. J. D.

VINCI, LEONARDO DA (*b.* Vinci, 1452; *d.* chateau Clos-Lucé, Amboise, near Paris, May 2, 1519), the great painter and universal genius, was also an excellent singer, lutenist and viola da gamba player. He made several improvements in the construction of the viols, especially with regard to the finger-board, and constructed a new species of lute which, however, did not prove successful. E. v. d. s.

VINCI, PIETRO (*b.* Nicosia, c. 1540; *d.* there² or Palermo,³ c. 1584), maestro di cappella at San Maria Maggiore, Bergamo, 1571, and from the end of 1581 in a similar position at Nicosia. He was a prolific church composer, a long list of whose works, masses, motets and madrigals appears in *Fétis* and in *Q.-L.* Some compositions of his pupils, Ambrosio Marien and Antonio il Verso, are included among his own madrigals and motets (*Fétis*; Schilling; *Q.-L.*).

VINER, WILLIAM⁴ (*d.* Nov.⁵ 1716), a violinist and composer for that instrument in considerable favour in Ireland during the early part of the 18th century, and master of the State Music there, 1703-16, when he died.⁴ About 1730-35, Walsh published a set of solos for violin and bass by him. He was the arranger of a piece in 'Aria di camera' (c. 1727), and is mentioned in very high terms in a poem by Pilkington, *The Progress of Musick in Ireland*, Dublin, 1730. The following is an extract from a lengthy panegyric on Viner in the poem mentioned:

'The Muses now from Albion's Isle retreat,
And here, with kind indulgence, fix their seat;
Then Viner rose, with all their warmth inspired,
A Bard caress'd by all, by all admir'd.

While round in crowds the fair creation stand
The polish'd Viol trembling in his hand,
While swift as thought, from note to note he springs,
Flies o'er the unerring Tones, and sweeps the sounding strings,' etc.

F. K.

VINER, WILLIAM LETTON (LITTON) (*b.* Bath, May 14, 1790; *d.* Westfield, Mass., U.S.A., July 24, 1867), a composer, chiefly of hymn tunes and sacred music. He was a pupil of Charles Wesley, and in 1820 became organist of St. Michael's, Bath, after having, even in early life, made considerable progress both as a composer and as performer on the organ. He left Bath for Cornwall, and on Dec. 2, 1835, was appointed organist at St. Mary's Chapelry, Penzance. In 1859 he emigrated to America. He wrote an overture for 'Rob Roy' while at Bath, but though constantly performed at the theatre

there, it does not appear to have been published. Other secular pieces are of his composition, but he is best known by his collections of hymn and psalm tunes. These are, 'One Hundred Psalm and Hymn Tunes in score,' 1838; 'A Useful Selection from the most approved Psalms,' 1846, and 'The Chanter's Companion,' 1857, etc. F. K.

VINES, RICARDO (*b.* Lérida, Feb. 5, 1875), Spanish pianist, studied in Paris, one of the first to understand the music of Debussy and Ravel and to make it convincing through his brilliant technique. J. B. T.

VINGT-QUATRE VIOLONS. No reader of French 'mémoires' of the 17th century can be ignorant of the part played by ballets at the courts of Henri IV., Louis XIII. and Louis XIV. The ballet combined the pleasures of music, dancing and the play, gave great opportunities for magnificent display, and was for nearly a century the favourite diversion of princes and *grands seigneurs*, thus preparing the way for opera. The passion for *ballets de cour* and dancing led to the formation of a special band for violinists, who, under Louis XIII., bore the name of the 'band of 24 violins of the King's chamber.' Its members, no longer mere *ménéstriers* (see *ROI DES VIOLONS*), became *musiciens en charge*, with a prospect of being eventually admitted to the *Chapelle du Roi*. Their functions were to play for the dancing at all the court-balls, as well as to perform airs, minuets and rigadoons, in the King's antechamber, during his *lever* and public dinner on New Year's Day, May 1, the King's fête-day, and on his return from the war, or from Fontainebleau.

No complete list of 'the 24 violins' who enlivened the court of the melancholy Louis XIII. has yet been made, but some of their airs may be seen in the MS. collection of PHILIDOR *ainé* (*q.v.*)—one of the precious possessions of the Conservatoire library. The composers' names are Michel Henri, Constantin, Dumanoir, Robert Verdié, Mazuel, Le Page, Verpré, de la Pierre, de la Vallez and Lazarin, all, we conjecture, among the 24. The violinists occasionally acted in the ballets, as in the 'Ballet des doubles femmes' (1625), when they walked in backwards, dressed as old women with masks at the back of their heads, so as to look as if they were playing behind their backs. This had a great success, and was revived by Taglioni (the father) in the masked ball in Auber's 'Gustave III.' in 1833.

In Louis XIV.'s reign the band of 24 violins was called the 'grande bande,' and on Dumanoir's appointment as *Roi des Violons*, the King made him conductor, with the title of '25me violon de la Chambre.' The post, however, was suppressed at the same time with that of the *Roi des ménestriers* (May 22, 1697). The 'grande bande,' again called 'the 24 violins,'

¹ A complete discussion of this question will be found in D. F. Tovey's pamphlet *The Classical Concerto*.

² *Q.-L.* ³ *Fétis*.

Information from W. H. G. F.
His will was proved Nov. 30, 1716 W. H. G. F.

continued to exist till 1761, when Louis XV. dissolved it by decree (Aug. 22). During the rage for French fashions in music which obtained in Charles II.'s reign, the '24 violins' were imitated here in the 'King's music,' and became the 'four-and-twenty fiddlers all of a row' of the nursery rhyme. Meantime a dangerous rival had sprung up in its own home. In 1655 Lully obtained the direction of a party of sixteen violins, called the 'petite bande.' As violinist, leader and composer he soon eclipsed his rival, and his brilliant career is well known. The modest position of conductor of a few musicians, whose duty was simply, like that of the 'grande bande,' to play at the King's levers, dinners, and balls, satisfied him at first, but only because it brought him in contact with the nobility, and furthered his chance of becoming 'Surintendant de la Musique' to Louis XIV. This point once gained, nothing further was heard of the 'petite bande,' and by the beginning of the next reign it had wholly disappeared.

The 24 violins remained, but as time went on they became old-fashioned and distasteful to the courtiers. Accordingly, as fast as their places fell vacant they were filled by musicians from the Chapelle du Roi, and thus the band became independent of the community of St. Julien. After 1761 the only persons privileged to play symphonies in the King's apartments were the musicians of his 'chamber' and 'chapel.'

G. C.

VINNING, LOUISA (b. Kingsbridge, Devon, Nov. 10, 1836¹; d. London, 1904), sang at the Plymouth Theatre when only two and a half years old, and appeared in public from 1840-1842, under the title of the 'Infant Sappho,' as a singer and harpist at the Adelaide Gallery, Polytechnic, and elsewhere. She afterwards received instruction in singing from Frank Mori, and on Dec. 12, 1856, was brought prominently into notice by taking the soprano part in the second and third parts of the 'Messiah' at the Sacred Harmonic Society's Concert, at a moment's notice, and 'with credit to herself,' in place of the singer engaged, who became suddenly indisposed during the performance. Miss Vinning afterwards sang at the Crystal Palace, the Worcester Festival, 1857, the Monday Popular Concerts (1861), and elsewhere until her marriage with J. S. C. Heywood, in or about 1865. At her concert, on July 5, 1860, Mme. Montigny-Rémaury first appeared in England.

A. C.

VIOL (Fr. *violle*; Ital. *viola*), the generic English name of the bowed instruments which succeeded the mediæval fiddle and preceded, at any rate as far as their literature was concerned if not in actual invention, the VIOLIN FAMILY (*q.v.*). The viol was invented in the 15th century, and passed out of general use in the 18th. It differs from the violin in having

deeper ribs, and a flat back, which is sloped off at the top, and was strengthened internally by cross-bars and a broad centre-piece, on which the sound-post rests. The shoulders curve upwards, joining the neck at a tangent, instead of at right angles, as in the violin. The neck is broad and thin, the finger-board was fitted originally with movable frets; the number of strings is varied, six being the normal number; the peg-box is usually surmounted by a carved head. The SOUND-HOLES (*q.v.*) are of the C pattern. The viol was made in three principal sizes—Bass (*viola da gamba*), tenor (*viola da braccio*) and treble or descant. These are the types belonging to the CHEST OF VIOLS (*q.v.*) and employed in the old English school of concerted chamber music. To these must be added the double bass (*violone*), as well as sundry subsidiary types enumerated below (see PLATES LXXXVII. and LXXXVIII.).

(1) BASS VIOL (Ital. *viola da gamba*), the most important of the series, since it was the one most used for solo work and produced many notable virtuosi, was the popular instrument of accompaniment² after the lute, and the foundation of the ensemble. The bass viol is about the size of the violoncello but with longer neck,³ the strings measuring about 30 inches from nut to bridge. As its Italian name implies, it is held violoncello-wise in performance. Its six catgut strings were tuned like the lute:

This was the classical tuning, but the lowest string was sometimes tuned down to C, and some continental instruments had a seventh string tuned to G above the highest here shown. Christopher SIMPSON (*q.v.*) gives in his *Division Viol* (2nd edition, 1667) a complete description of the technique of performance as well as information about the English school of composers, for whom he claims pre-eminence. Of special importance is his description of the method of bowing,⁴ the bow being held underhand, a method which long survived in playing the double bass. The bass viol retained its popularity in England longer than elsewhere. By the time that Simpson wrote it was already being supplanted in Italy. But in England it survived Simpson by more than a century. C. F. ABEL (*q.v.*) was the last of the great virtuosi here. The scores of J. S. Bach contain noteworthy uses of it for special effects,⁵

² See title-page to Dowland's *First Booke of Songs*, 'so made that all the parts together, or each of them severally, may be sung to the lute, opherlan, or viol de gamba.'

but Bach wrote considerably after the classical era of the viols was over. For an account of tablature applied to the bass viol see *LYRA VIOL*.

(2) **TENOR VIOL** (Ital. *viola da braccio*), as its Italian name implies, is held by the arm, and is an instrument generally similar to the bass viol, but of small size proportioned to its higher pitch. Its tuning is

Its position was that of the middle member of the ensemble in the old English chamber music, and it never had any independent existence to speak of as a solo instrument in this country. In the 18th century its lowest string was discarded, and with five strings its compass was approximated to that of the modern viola, which gradually superseded it. (See also *VIOLA DA SPALLA* under *VIOLIN FAMILY*.)

(3) **TREBLE or DESCANT VIOL**, tuned an octave above the six-stringed bass viol, and therefore when properly built just half its size, formed the upper parts, one or more, of the ensemble. In England it had no vogue as a solo instrument; in France the *dessus de viole* became fashionable, and a smaller size (*pardessus de viole*) tuned a fourth higher than the *dessus* was much used.¹

(4) **DOUBLE-BASS VIOL** (*violone*), a six-stringed instrument tuned like the bass viol, but sounding an octave lower, was common in Italy and Germany.² It has been customary to speak of the modern double-bass (see under *VIOLIN FAMILY*) of the orchestra as the last of the viols. It retained characteristics of the double-bass viol in its shape, its tuning by fourths and the method of bowing. Its body being strengthened, its strings thickened and their number reduced to three (then augmented again to four), it became a sort of hybrid between the old violone and the violin family.

Subsidiary types of later usage are as follows:

(5) **VIOLA BASTARDA**, a bass viol mounted with sympathetic strings like the *viola d'amore*. It afterwards developed into the *BARYTON* (q.v.).

According to Michael Praetorius (*Syntagma musicum*, 1614-20) the *viola bastarda* had six strings and was made in five different pitches.

We give a normal tuning. He also states that it was to this instrument that the English first applied sympathetic strings. Engel (*The Violin Family*, 1883) says that the *viola bastarda* was somewhat like the

viola da gamba in shape, but slightly longer and narrower. He states that the six strings were tuned as above.

(6) **VIOLA D' AMORE**³ (Fr. *viola d'amour*), a tenor viol with sympathetic strings. It usually has seven stopped strings. The sympathetic strings, of fine steel or brass, pass through small holes drilled in the lower part of the bridge, and under the finger-board: their number varies from seven to fourteen. They are tuned to a diatonic or chromatic scale. We give an ordinary tuning of the gut strings, though tunings were very variable⁴ and it was a common practice to tune to the key of the piece. The sympathetic strings, tuned to the scale (in this case of D), diatonic or chromatic,

are sometimes screwed up by pegs similar to those of the gut strings: but the better plan is to attach them to wrest-pins driven into the sides of the peg-box.

As Praetorius (*Syntagma musicum*) describes several sizes of the *viola bastarda*, one of the smaller members of the family may, perhaps, be claimed as the true ancestor of the *viola d'amore*. According to the English authority—John Playford—who describes the instrument in his *Musicks Recreation on the Viol*, *Lyra-way*, 1661, Daniel Faurant, the inventor of the 'Poliphant' and the 'Stump,' created the *viola d'amore*. Yet, to go further back, the 'Bourdons' of centuries anterior to Praetorius and Playford may equally claim a place in the ancestry of this instrument.

On the authority of Evelyn, the *viola d'amore* had five strings, and made its début in England in the latter half of the 17th century. He records in his *Diary* under Nov. 20, 1679, that he dined at Mr. Slingsby's, Master of the Mint, who provided some excellent music for his guests; among those artists who took part Evelyn enumerates

'Nicholas, on the Violin, but, above all for sweetness and novelty, the *Viola d' Amore* of five wire strings played on with a bow being but an ordinary violin played on *lyra-way* by a German.'

It is worthy of note that neither Mattheson nor Evelyn mentions the sympathetic strings. Burney⁵ also speaks of the instrument as a novelty in 1716, when he says, Signor Attilio Ariosti played 'a symphony' between the acts of the opera '*Amadis*,' on July 12, the last night of the season. He played again some years later, and composed six sonatas for *viola d'amore*, which were published by subscription

³ Eugène de Bricqueville, *La Viola d'amour* (Paris, 1908), suggests that the original name was '*viola da Mori*' (viol of the Moors), which might point to the derivation of the instrument itself from the several Oriental instruments employing sympathetic strings.

⁴ Mattheson, *Das neu-eröffnete Orchester* (Hamburg, 1713), directs the instrument to be tuned to the chord of C, major or minor.

⁵ *Gen. Hist. of Mus.* iv. 267.

¹ Dolmetsch, *Interpretation*, p. 451.

² Praetorius, *Syntagma musicum*, distinguishes between *viola di gamba* and '*violone*' or '*contrabasso di gamba*.'

in London, in 1728, under the title 'Cantatas, and a Collection of Lessons for the Viola d' Amore.' By the end of the 18th century this viol, according to Laborde,¹ was obsolete. He says it had four metal strings placed below the regular gut strings.

But the instrument has never become wholly obsolete. Hector Berlioz praised its tone quality and Meyerbeer included it in an air in 'Les Huguenots.' Later composers have resorted to it for special effects in orchestral works, notably Richard Strauss ('Sinfonia domestica') and Loeffler ('The Death of Tintagelles'). In the 19th century it had, too, its famous exponents (see Van WAELFELGHEM and ZOELLER). E. J. P., E. H.-A.; rev. C.

VIOLA, see VIOLIN FAMILY (2).

VIOLA, ALESSANDRO DELLA, see MERLO.

VIOLA, ALFONSO DELLA (b. Ferrara, early 16th cent.; d. there (?) after 1567). He was maestro di cappella in the service of Hercules II., Duke of Este, at Ferrara, and appears to have been the first who accompanied dramatic action throughout with music. He may be regarded, therefore, as one of the pioneers of the opera, although it was not until Cavalieri, Peri and Monteverdi that the *stilo rappresentativo*, the *arte nova*, provided composers with the means of individual characterisation. In Alfonso's dramas the dialogue was sung by choruses in madrigal form. The first of his tragedies, 'Orbecche,' was performed in 1541 at his own house, in the presence of the Duke Hercules II. and Cardinal Ravenna Salviati (Allacci, *Dramaturgia*, p. 577). The second work for which he composed the music was *Il sacrificio* (the book published Ferrara, Fr. Rossi, 1555), performed on Feb. 11 and Mar. 4, 1554, at the palace of the Duke Francis d'Este. His third work was 'Arethusa,' a pastoral by Lollo, performed at the palace of Schivanoja in 1563 for the benefit of the students, in the presence of Alfonso II., Duke of Ferrara, and his brother, Cardinal Louis. The text-book only was published at Ferrara in 1566. A second pastoral, 'Lo sfortunato,' by Agost. Argenti Edelmann of Ferrara, set to music by Alfonso, was performed in 1557. Apart from the libretti nothing has survived of these dramas. Two books of madrigals (1539, 1540) and some motets and songs in collective volumes are still in existence (*Fétis*; *Q.-L.*).

VIOLA, FRANCESCO DALLA OT DELLA (b. Ferrara, 1st half of 16th cent.), probably related to Alfonso. He was a pupil of Willaert, a collection of whose motets and madrigals he edited and published at Ferrara in 1558 under the title 'Musica nova.' Zarlin² tells us that Francesco was maestro di cappella to Alfonso d'Este, Duke of Ferrara, who was his great admirer, and whom he accompanied to

Venice in Apr. 1562. This may also account for Cyprian de Rore's retirement from the court of Ferrara after the death of Hercules II. Francesco dalla Viola composed: madrigals 4 v., lib. i. (1567); madrigals 4 and 5 v. (1575, 2nd ed. 1599). Three masses and some motets in MS. are in the Estense Library at Modena; also a number of songs in collective volumes (*Fétis*; Valdrighi; *Q.-L.*).

VIOLA DA GAMBA (2), see ORGAN: VOCABULARY OF STOPS.

VIOLA D' AMORE, see VIOL (6).

VIOLA DI BORDONE (VIOLA BASTARDA), see BARYTON (1); VIOL (5).

VIOLA DI FAGOTTO (BASSOON VIOL), a name sometimes given to the Viola Bastarda. See VIOL (5). E. J. P.

VIOLA POMPOSA, see VIOLIN FAMILY (9).

VIOL D'ORCHESTRE, a string-toned organ-stop of 8 ft. pitch, and very small scale. This stop is one of the bearded Gamba tribe. (See ORGAN: VOCABULARY OF STOPS.)

VIOLET, a name sometimes given to the viola d' amore (see VIOL (6)). L. Mozart calls the viola d' amore with chromatic sympathetic apparatus the 'English Violet': a singular denomination, for, as in the case of the Cor anglais, the instrument appears never to have been made, and seldom used in this country. E. J. P.

VIOLETTA, the French version of Verdi's 'La traviata,' by M. E. Duprez; produced at the Théâtre-Lyrique, Oct. 27, 1864. G.

VIOLETTA MARINA, a viola with sympathetic strings. (See VIOL.)

VIOLETTA PICCOLA. Michael Praetorius mentions this instrument amongst the viols he enumerates in his *Syntagma musicum*, 1614-20. He calls it 'Cant Viol de Gamba (Violetta Piccola),' and mentions four kinds, some with six, some with five, four and three strings. It answered in tone 'partly to the tenor and partly to the violin.' A violetta piccola was shown at the special Exhibition of Musical Instruments, held at South Kensington Museum in 1872. E. H.-A.

VIOLIN DIAPASON, an organ stop of 8 ft. pitch, in scale between the open diapason and the dulciana. The pipes are open, and have a slot near the top. (See ORGAN: VOCABULARY OF STOPS.) W. P. A.

VIOLIN FAMILY. The violin and viol descended from a common ancestry, which is to be found in the various earlier forms of the late 15th and early 16th centuries. Both are the outcome of a gradual evolution and emerged in their perfect forms within some 15 years from

¹ *Essai sur la musique*, 1780.

² *Dimostrazioni armoniche*, p. 1.

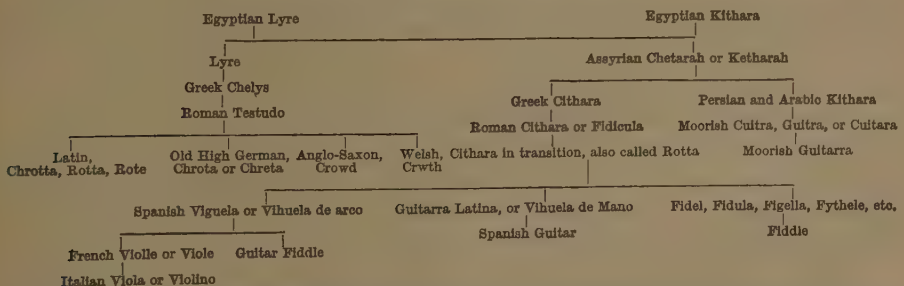

each other about the middle of the 16th century.¹ The viols on the title page of Ganassi dal Fontego's '*Fontegara*,' 1535, are practically perfect in shape (more so than those shown on the title-page of his *Regola Rubertina* of 1543), and Dr. Kinsky (Heyer Cat. II. p. 369) gives the date of the first example of a perfect viola da gamba, by Duiffoprugcar as c. 1550, while the first description of violins, with four strings tuned in fifths, occurs in Philibert Jambe-de-Fer's '*Epitome musical*,' etc., published at Lyons, 1556. Count Valdrighi (*Nomocheliurgografia*) mentions the use of '*violini*' in Italian monasteries during the early 16th century, and *joueurs de violons* occur in documents of the Dukes of Lorraine as early as 1490. In both cases, however, the name is applied to viols. The frontispiece² of a rare chap-book, *La violina con la sua risposta*, Brescia, c. 1550, belonging to Mr. E. Heron-Allen, proves the use of the word in that sense, as it shows Apollo playing on a lyra. This is significant in another way as the Lira da braccio (see LIRA) was the immediate progenitor of the violin. An interesting fact is that Ventura Linarolo, Venice, the maker of a beautiful *lirone da braccio*, dated 1577, in the Wm. Heyer Museum (formerly Cologne, now Leipzig), made also a perfect violin in 1587, now in the collection of ancient musical instruments in Vienna. This is one of the oldest existing examples of a genuine violin with *f* holes crossed in the centre, which is not the case with the *ff*'s of the *lirone* although they are far more elegant in shape. Dr. Kinsky mentions also a violin, apparently of Bohemian origin, dated 1575, now in the Bach house at Eisenach. It is evident that the violin had already reached its final form by then, but whether the *violons* mentioned in the accounts of the wedding of Henry II. of France with Catherine of Medici at Rouen in 1550, of the eight '*vyolons*,' etc., of Francis I. (1515-47), and of the *joueurs de violons* at the court of Lorraine in 1555, refer to violins proper cannot

be decided with certainty, although, considering Jambe-de-Fer's book, it appears possible.

It is not known who first constructed a perfect violin, but as it required only slight alterations to change the lyra into the violin and the idea was, so to speak, in the air, it probably occurred to several makers at various places at almost the same time. Several authorities assume with good reason that the first instruments of the violin type were of a pattern corresponding in size to the lyra da braccio, or a large viola, and that it was possibly Gasparo Bertolotti, called from his birthplace da Salò (1540-1609), who evolved therefrom the model of the modern violin. His workmanship in this was characterised by rugged strength, the centre bouts shortened and rather shallow, the sound-holes cut wide, the scroll inelegant, but the wood, especially of the tables, of the finest quality and even grain, and his instruments are covered with a choice brownish varnish. His first violins were highly arched, but repeated experiments convinced him of the advantages of a lower arching until eventually he adopted a comparatively flat model. Gasparo, apart from viols, made, however, more violas and violones which are still greatly valued.

Giovanni Paolo Maggini (1580-c. 1640), the pupil of Gasparo,³ worked at first upon his master's lines but soon made great advances upon the latter's work, especially in the shape of the sound-holes, the scroll and the cutting of the wood for tables and backs. His model, at first fairly high, became flatter in his later work. His varnish, of excellent quality, is of a golden brown or yellow colour, and many of his instruments have two rows of purfling. He was also famed for his violones as well as for his violins. Other Brescian masters who worked on his lines, beside his son Pietro Santo Maggini, were Matteo Bente, Domenico and Antonio Pasta, Giovita Rodiani and Pellegrino Zanetto.

1 GENEALOGICAL TABLE OF THE FIDDLE OR VIOLIN (from Kathleen Schlesinger's *The Precursors of the Violin*, p. 245).

The above Table, compiled by Miss Schlesinger, shows that the lyre, with a vaulted sound-chest, was the ancestor of all boat-shaped instruments, while the kithara, with the tripartite shallow sound-chest, composed of back, ribs and table, led, through various evolutionary stages, to the viol and the violin.

² Reproduced in E. van der Straeten's *The Romance of the Fiddle*.

³ According to a document of 1602, see Rev. E. H. Haweis, *Old Violins*, p. 31.

THE CREMONA MAKERS.¹—Cremona's undying fame as the classical town of violin-makers, began with the Amati dynasty. The first of this famous family was Andrea Amati (c. 1520–c. 1580) whose work was closely related to that of the early Brescians. The achievements of Andrea and his sons Antonio and Girolamo are fully described under their own names. This extraordinary family reached the height of its artistic achievements in Nicolo (1596–1684), the son of Girolamo, who not only inherited his father's genius, but started out to construct a new model of his own, and after many attempts succeeded in producing those wonderful violins known as the 'Grand Amatis,' in which he was surpassed only by his pupil Antonio STRADIVARI (*q.v.*), that greatest of all violin-makers. His greatest and most original pupils were Carlo Bergonzi and Domenico Montagnana, who afterwards settled at Venice; other pupils of distinction were (1) Alessandro Gagliano, who went to Naples, where his son Niccolo worked after him but on original lines, and was guided by his son Ferdinando; (2) Lorenzo Guadagnini, and his son Giovanni Battista, who settled at Piacenza; (3) his sons Francesco and Omobono. Francesco Gobetti, Venice (1690–1715) is also considered to have been a pupil of Stradivari. Among the pupils of Niccolo Amati was also his son Girolamo, the last violin-maker of that famous family; Paolo Grancino of Milan, more important than the former but surpassed by his son Giovanni; Andrea Guarneri, like Andreas Amati, the first of a great family of violin-makers, and an excellent master who was, however, surpassed by his sons Giuseppe Giovan Battista and Pietro Giovanni, both makers of distinct individuality. Pietro Guarneri, son of Giuseppe filius Andreae, was also an excellent maker, but the greatest of the family was Giuseppe Antonio, better known as Giuseppe del Gesù, who shares the palm with Stradivari, whose instruments he surpasses in power and brilliance of tone in his latter period. Stradivari's violins, however, are sweeter, more intimate and poetical. Among the distinguished pupils of Niccolo Amati were also Giovanni Battista and Pietro Giacomo Rogeri of Brescia—the latter specially noted for his violoncellos,—and Paolo Albani of Palermo is also mentioned among the pupils of Nicolo. The Ruggieri family of Cremona, not to be confounded with Rogeri, produced several eminent violin-makers; foremost among them was Francesco Ruggieri (also Ruger) detto il Per, who was also a pupil of Niccolo Amati. Greatly valued is also the work of Giacinto R. detto il Per, Vincenzo—and lastly Gambattista R. detto il Per. The Testore family of Milan, consisting of Carlo Giuseppe (c. 1690–1720), Carlo

Antonio (1730–64), his son Giovanni and his brother Paolo Antonio were excellent makers, and so were several members of the Tononi family of Bologna.

ENGLISH MAKERS.—Jacob Rayman, who probably came from the Tyrol and settled in London about 1620, may be looked on as the father of violin-making in England. Thomas Urquhart, Edward Pemberton and Christopher Wise belong to the mid-17th century. Edward Pamphilon worked in London from c. 1680. Daniel Parker made good instruments (c. 1700–30), still obtainable at a moderate price. Barak Norman (1688–1740) was essentially viol-maker, but made also violins and especially violoncellos of excellent workmanship. Nathaniel Cross (1700–50), worked for many years together with Barak Norman. Daniel Parker, John Barrett, early Stradivari copyists, John Hare and Peter Wamsley were excellent makers of the early 18th century.

Benjamin Banks of Salisbury (1727–95), was the greatest English violin-maker; his sons Benjamin, James and Henry were of average merit. Edmund Aireton, Edward Betts, Richard Duke, Thomas Dodd (instruments bearing his name were made by John Lott and Bernard Fendt, but covered with very fine varnish by him), John Dickeson, William Forster and his son William, John, and his son Henry John Furber, Samuel Gilkes, Charles Harris, Thomas Smith, Richard Tobin, were excellent makers of the late 18th and early 19th centuries.

The longest line of violin-makers is that of the Hill family, of whom Joseph Hill, a pupil of Wamsley, William (c. 1741), and Lockey (1800–40), were makers of note. William Ebsworth Hill, son of Lockey, and his sons, now living, are chiefly noted as repairers and dealers. John Thomas Hart (1805–74), a pupil of Gilkes, and his descendants were and are chiefly repairers and dealers. The Kennedy family: Alexander (1700–86), John (1730–1816), Thomas (1784–c. 1870), and George Crash of Manchester were prolific makers of good second-class instruments. Frederic, Joseph and George A. Chanot followed in the footsteps of their father. The latter settled in Manchester. Alfred Chanot, the son of Frederic, is also a maker and repairer now living in London.

FRENCH MAKERS.—Like the rest of the various European countries the French violin-makers were but copyists of the Italians. Those of outstanding merit were Nicolas Lupot (1758–1824), unrivalled in his copies of Stradivari, and J. B. Vuillaume (1798–1875), a most prolific maker of eminently clever copies of Cremonese masters. The nearest approach to the work of these two masters was that of Pierre Silvestre (1801–59), a pupil of Lupot and, like his master, a copyist of Stradivari. His brother Hippolyte, for some time his

¹ See the articles under the names of principal makers for details of their individual styles.

partner, and their nephew Hippolyte Chrétien Silvestre, succeeded him in business. Other distinguished French makers were : Seb. Phil. Bernardel, Jacques Bocquay, C. Boullangier, François Chanut, who made a violin of guitar shape, his brother Georges, a clever copyist of Stradivari and Guarneri, and Georges, the son of the latter, who settled in London (see *supra*) where he was succeeded by his sons, Charles Henry, Charles Jacquot, Koliker, Charles Maucotel, who settled in London, and his brother, Charles Ad. Maucotel, François Médard, Claude Aug. Miremont, Didier Nicolas, Claude Pierray, F. S. Pique, a copyist of Stradivari of high merit. Finally we must mention Jacques Pierre Thibout, a maker of merit, who encouraged Tarisio to bring his rare Italian instruments to Paris.

GERMAN MAKERS.—The ravages of the Thirty Years War, which had devastated the whole country, had completely extinguished the rare lute and viol-makers' art which during the 15th and 16th centuries stood highest in Europe. Only the Tyrolean Mountains had enjoyed comparative immunity from the horrors of that time. There, in the quiet village of Absam, was Jacob Stainer, the most famous German violin-maker, born, 1621, and in the same year Mathias Albani, an excellent maker, first saw the light of day at Bozen; he was, however, far surpassed by his son Mathias (c. 1650–1680), who worked on the lines of Amati and produced a number of very fine instruments.

18th-century German makers of merit were : Paul Alletsee (Aletzie) Munich; his oldest known violins are dated 1698. About 1720 he appears to have worked temporarily at Venice, as the beautiful *viole d'amour*, which belonged to L. van WAERFELGHEM (*q.v.*) had a label which read 'Paolo Aletzie, Venetia, 1720'; workmanship and varnish were of the finest quality. He was especially famed for his basses. His son-in-law, Joh. Andr. Kämbl, succeeded him as court instrument-maker in Munich in 1738. Anton Bachmann (1716–1800), court instrument-maker, Berlin, and his son Carl Ludwig B. worked on Italian models; the latter was chiefly noted for his violas. Martin Diel of Mainz was the first of a long line of violin-makers, extending over a period of more than 150 years. Martin and his son Nicolaus made some good violas and violoncellos. Friedrich Diehl (as the name was spelled by later members of the family) received a bronze medal at the Paris exhibition in 1867. Nicolaus Döpfer, the master and father-in-law of Martin Diel, made some good large violas. Joh. Andr. Dörfel was founder of the Graslitz violin-making industry. Johann Udalric Eberle was a good copyist of Italian masters, noted for his fine violas d'amour. Thomas Edlinger of Augsburg worked at Prague and was the master of Eberle.

Christoph Friedrich Hunger, Leipzig (1718–1787), excellent maker, specially noted for his violas. Joh. Jauch, Mathias Klotz Mittenwald (1653–1743), founder of Mittenwald violin industry, studied in Italy, achieved good workmanship on the Stainer model. He was surpassed by his son Sebastian (1696–1743), and the latter's son Joseph (c. 1743, *d.* after 1808), noted for fine workmanship, and a flatter model. Georg, brother of Sebastian, was also a good maker but careless in the selection of wood. Other members of the family are more or less indifferent. Leonard Maussiel, Stainer pattern, work resembling Tecchler's; Sympert Niggell, flat model.

Johann Gottlob Pfretzschner (1753–1823), member of a violin-maker's family of several generations, was the first Markneukirchen maker to abandon the Stainer model in favour of that of Stradivari.

Daniel Achatius Stadlmann of Vienna and Widhalm of Nuremberg were both excellent imitators of Stainer.

19th-century makers : Ludw. C. A. Bausch, Leipzig, chiefly repairer and famous bow-maker; W. H. Hammig, Leipzig; Karl A. Hörlein, Würzburg; Gabriel Lemböck, Vienna; Neuner, Berlin; Jac. Aug. Otto, head of a numerous family of violin-makers, author of a book on the construction of the violin—other notable members of this family were Ludwig O. of Cologne, afterwards Petersburg, his son Hermann, and Louis O., Düsseldorf; Béla Szepessy, known as Béla, who settled in London.

NETHERLANDISH MAKERS.—Mattys Hofmans, worked at Antwerp c. 1685–1725; Hendrick (also referred to as Peter) Jakobsz, latter 17th to early 18th century, copied Niccolo Amati with great skill and is said to be the first who used whalebone for his purfling; Pieter Rombouts, Amsterdam (1674–c. 1740), produced fine workmanship and varnish; he also used whalebone for purfling. Jan Koeppers worked at the Hague between 1755–1780, and the Frenchman, Lefebvre, at Amsterdam between 1720–1735.

In the above article we have only been able to mention the most important makers of those countries in which violin-making attained a high degree of excellence. For that reason we cannot include the names of wholesale manufacturers who work at the great industrial centres of violin-makers, Markneukirchen, Mittenwald, Klingenthal, in Germany, Graslitz in Austria and Mirecourt in France. Further particulars about the most important of those named may be found under their several names in this Dictionary, while these as well as all the rest may be found in the works of Hart v. Lütgendorff, and Dr. Kinsky's *Catalogue of the Wm. Heyer Museum*, vol. ii. (See below : Bibliography.)

DESCRIPTION OF INSTRUMENTS

The name 'violin' was in the first instance applied to a type and not a species, and this type, like that of the viol, the lute, the recorder, and of most other instruments, repeated itself in at least four different species, corresponding with the four parts of the human voice. As in the case of all stringed instruments, so in the violin family the construction of an instrument of a fairly low compass preceded that of the highest and lowest instruments of its type, and the word violin was first applied to an alto instrument. (See VIOLA below.) We have therefore (1) the treble violin, afterwards called violin by preference; (2) the alto violin, called viola by the Italians, alto by the French, tenor by the English, as it represented that part when the real tenor violin disappeared, and Bratsche, from *viola da braccio*, or Viola by the Germans; (3) the tenor violin, which became obsolete early in the 18th century; (4) the bass violin, to which the Italian word *violoncello*, meaning a small bass, is now generally applied, while (5) the large bass retained in Italy the name of the contrabass viol=*violone*; in England it is generally referred to as double-bass, but the more correct word *contrabass* is now frequently used, as the equivalent *basse contre* is in France.

CONSTITUENT PARTS OF THE VIOLIN.—It will be clear from the above that the description of the model holds good for all members of the family as they only differ in size but not in shape.

The wood used in the construction of the violin is: sycamore (maple) for the back, neck, ribs and bridge; pine for the table, bass bar, blocks, linings and soundpost; ebony for the finger-board, tail-piece, nut and pegs. The latter were formerly often of boxwood while in latter years they are often made of rosewood, which is least subject to slipping. The nut was in former times frequently made of ivory, which resists the wear from the strings better than ebony. For the back and the ribs the 17th- and 18th-century makers often used pearwood (cf. *PLATE LXXVIII.*).

The strings are made from sheepgut which after undergoing an elaborate process of preparation is cut into thin strands, which then are twisted together by a ropemaker's wheel, three to four strands being used for a violin E string, four for an A string, six to nine for a D string, and proportionately more for the strings of the larger instruments. The finest strings were formerly made in Italy, but for some years past it has been found that England¹ produces the best gut, and the Germans the best makers, and the best Italian strings of

¹ An English enterprise which deserves mention here is the method of testing strings invented by James Kelway Toms, of Wellington, Somerset, which has given these strings, issued under the name of the inventor's late father, John R. Toms, a world-wide reputation.

to-day are those made of English gut by German makers.

Fig. 4 shows the inner side of the table. The bass bar, *a*; approximate position for the sound-post, *b*.

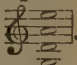

FUNCTIONS OF VARIOUS PARTS.—The vibrations of the strings caused by the friction of the bow are communicated to the bridge, transmitted by the latter to the table, and by this to the surrounding air, outside as well as inside the instrument. The inner air, as well as the sound-post and ribs cause the back to vibrate, the sound-post and ribs receiving their vibrations from the table as well as the inner air. Both the nut and the bridge must be high enough to allow the strings to vibrate freely without rattling against the finger-board, yet not so high as to cause undue exertion of the fingers in stopping the notes. As the vibrations of the fourth string are greater than those of the others, the finger-board is cut away a little under this string to allow of the necessary space. The feet of the bridge, which are most essential in the transmission of the vibrations to the table, must be shaped to the arching of the latter so as to insure perfect contact; this must also be the case with the sound-post with respect to both the table and the back, as the object of that cylindrical rod is not only the transmission of the vibrations, as stated above, but also the support of the right foot of the bridge. The left foot of the latter is supported by the bass bar, which transmits its vibrations over the whole length of the instrument, and restores the balance between the vibrations of the table and the stronger vibrations of the lower strings. With the raising of the pitch, the use of thicker strings and of a higher bridge, which came into vogue in the early 19th century, the pressure upon the table was considerably increased, so that the bass bar, in order adequately to perform its functions under the altered circumstances, had to be made both longer and deeper, and the bass bars in old instruments had to be replaced by those of larger dimensions. The tone power depends chiefly upon the vibrations of the table and the back, the ribs being of little account in this respect, but their height is an important factor in determining the volume of air enclosed in the sound-body. The sound- or *f*-holes have the double function of bringing the enclosed air of the body into communication with the outer air, and of making the narrow waist of the table between the centre bouts sufficiently flexible.

The corner blocks were introduced to strengthen the finely tapering projections at the extremities of the centre bouts, as well as to hold the table and the back firmly glued to the ribs, and the latter is also the purpose of the linings, consisting of fine strips of wood glued to the inner edges of the ribs which thus provide a greater surface for that purpose and strengthen the whole structure of the body.

The varnish has very little, if any, influence upon the tone of the violin, but it provides a protective covering for the wood, and considerably enhances the beauty of the instrument.

MEMBERS OF THE FAMILY

(1) The VIOLIN has three gut strings, and a fourth, or bass string, covered with plated

copper or silver wire. They are tuned 

(For special tunings see SCORDATURA.) Steel wire or silk strings are often used for the first or E string of late, on account of their durability, but such strings cannot compare with gut strings in quality of tone. The total length of the violin has been determined by the average length of the human arm, in a slightly bent position so as to ensure free action of all its muscles as well as those of the hand and fingers. The average measurements of a full size violin are: total length, $23\frac{1}{2}$ in.; length of body, 14 in.; width of upper bouts, $6\frac{3}{8}$ in.; do. of lower bouts, $8\frac{3}{8}$ in.; height of ribs at top, $1\frac{3}{8}$ in.; at bottom, $1\frac{1}{2}$ in. There are also three-quarter and half-size violins for the use of children.

(2) The VIOLA, also called tenor in English; French=Alto, German=Bratsche, from *viola da braccio*. The tuning is ; the

measurements of a Stradivari viola of 1723 are: length of body, $16\frac{3}{8}$ in.; widths: upper bouts, $7\frac{1}{2}$ in.; centre bouts, $5\frac{1}{2}$ in.; lower bouts, $9\frac{1}{2}$ in.; height of ribs, at top, $1\frac{1}{2}$ in.; at bottom, $1\frac{1}{8}$ in.; total length, c. 26 in. The violas in general use have a body length of 16 in. or even a little less. The instrument is only $\frac{1}{4}$ larger than the violin, although this is much too little for the thickness and weight of its strings and the fact that it is tuned a fifth lower than the violin, which gives a ratio of 3:2. The result is a slightly veiled and reedy tone, rather nasal in the smaller instruments, but of sympathetic and penetrating quality. The small violas, which for various reasons are more convenient for the player, have not the real tenor quality, and this occasioned Berlioz's remonstrance in his book on orchestration against their use. The music for the viola is mostly written in the alto, or C clef on the third line, but the notes in the higher compass of the instrument are written in the G, or treble clef. The viola is the oldest member of the violin family. It was at first called violino (the diminutive of viola), until the smaller treble instrument came into use, when the name was transferred to the latter, but both words were used indiscriminately for many years.

Giovanni Gabrieli in his 'Sacrae symphoniae,' 1597, has a 'violino' part written in the alto clef and demanding the compass of the viola, and L. Zaccconi in his *Musica prattica*, 1596, uses the word in the same sense. Even Carlo FARINA (*q.v.*) between 1620 and 1630 calls himself *violinista* on his title-pages, and *violista*

in a dedication. There were originally three instruments for the middle parts which Merse-
sienne (*Harmonie universelle*, 1636) calls
Cinquième, Haute-contre, and Taille, and he
reproduces a fantasia by Henri Le Jeune,
showing the use and compass of all the members
of the violin family in which they appear with
clefs and compass, used in the piece, as follows :

He explains in another place that the tuning of
the Dessus, the Cinquième and the Haute-Contre
is the same, viz.: *g, d', a', e''*; that of the Taille,
c, g, d', a', and that of the Basse-contre *Bb, F,*
c, g, and adds :

'The Cinquième is the smallest of the three which
are in unison. The 24 violins of the King called it
Haute-contre, the Haute-Contre Taille and the Taille
Cinquième.'

This shows how much confusion there was still
in the designation of the violins in the early
17th century. Soon, however, the Haute-
contre became the alto, and the Taille the tenor
violin, of which we shall speak presently.

The viola was only used in the orchestra,
where it merely doubled either the bass or the
second violin, until Bach and Handel gave it
greater prominence, but it was not until it
became an integral part of the string quartet
under Haydn and Mozart that it developed
a distinct individuality, and chiefly through
C. Stamitz (1746-1801) rose even to the dignity
of a solo instrument, as which it shines at the
present time in the hands of that brilliant
master Lionel TERTIS.

(3) The VIOLONCELLO (Ital. *violoncello*; Fr.
violoncelle; Ger. *Violoncell*). The word is the
diminutive of violone, and the frequently used
word 'cello' is a senseless mutilation of violon-

cello. The tuning is ; the average

dimensions are: total length, 48½ in.; length
of body, c. 30 in.; widths: upper bouts, 13½ in.,
lower bouts, 17½ in.; height of ribs, at the top,
4½ in.; at the bottom, 5 in. For the use of pupils,
half-size and three-quarter size instruments are
made, and slightly smaller full-size instruments
are often used by women. The violoncello
came into existence together with the other
members of the family, and two beautiful
instruments by Andrea Amati, made between
1560-70, are still in existence. In its early
times the instrument was often referred to
as 'violoncino,' 'violunzel,' 'bass-violin,' or
simply as 'bass.' Until the end of the 17th
century it merely filled the bass part in the

orchestra, and its tuning sometimes underwent
slight modifications. Purcell was the first
English composer who preferred the violoncello
to the viola da gamba, but the latter was not
superseded by the former in this country until
the arrival of Cervetto, Caporale and other
Italian violoncellists. The first solos written
for the instrument are probably the sonatas and
ricercare by Domenico Gabrieli, dated 1689
(MS. in Estense Library, Modena). Bach and
Handel made important use of the violoncello
as a solo instrument, and since then it has
become as such second only to the violin (see
VIOLONCELLO-PLAYING). The music for the
instrument, on account of its large compass,
requires the use of the bass, the tenor and the
treble clefs. The latter, if following the bass
clef, is written according to classical usage an
octave higher than it sounds. In the 18th
century the soprano and mezzo-soprano C clefs
were also used occasionally.

Old Italian violoncellos of a large pattern,
even such by famous masters, are sometimes
found to have had a small circular hole in the
centre of the back, which has since been filled
up. They were in former times used in church
processions, suspended from the neck of the
player by a little metal hook attached to a
strap.

(4) The DOUBLE-BASS or Contrabass (Ital.
contrabasso; Fr. *contrebasse*; Ger. *Kontrabass*).
This is the Proteus of the violin family which
has been constructed from its first appearance,
and still exists, in a greater variety of sizes,
patterns and tunings than any other of its
members. A real contrabass is depicted in
Jost Amman's 'Turnirbuch' of 1566. The
double-bass has retained several features of the
contrabass viol, the violone, and even the name
was frequently used in several countries, in-
cluding England and Germany, as late as the
19th century. It retained the sloping shoulders,
the flat back and corners of the viol, although
it adopted the *f* holes and scroll of the violin.
From the 17th century downward we meet with
many various combinations of the viol and
the violin model. Some show the latter in
every detail, others with the only difference of
sloping shoulders, or with these and a flat back,
etc. While the average total length of a full-
size double-bass is about 6 feet, there are in-
numerable deviations from this measurement
apart from smaller sizes ranging downward to
about 4½ feet in length, with other measure-
ments in proportion. The number of strings
varied between three and six, with a very large
variety of tunings. In the modern orchestra
we meet chiefly with four-stringed basses tuned

sounding an octave lower; in a few
cases a fifth string giving the lower C is added.
Apart from these, three-stringed basses, which

were in great favour during the 19th century, are frequently to be met with tuned 

What these lose in compass, they gain in brightness of tone on account of the smaller pressure upon the table. The double-bass is the only transposing instrument of the violin family; it is always written an octave higher than it sounds, and represents in the orchestra the 16-foot register of the organ. Down to the end of the 18th century the neck of the double-bass was always fretted in the manner of the older contrabass viol, but with the increasing technique of the players, and more florid figuration in orchestral bass parts, frets have been abandoned. In most cases the double-basses strengthen the bass of the violoncellos by doubling their part in the lower octave; but when the latter have very rapid passages, the contrabass part must be reduced¹ to fundamental notes, as the heavy strings are slow at changing their rate of vibration. Where the latter is not implied, as in tremolo or repeated notes, their rapid succession is very effective. The first known use in the orchestra was by BALTAZARINI (*q.v.*), whose band of 20 violins included one contrabass; and a contrabass was also included in Louis XIV.'s 24 violins. M. Pignolet de Monteclair introduced it into the orchestra of the Paris Opera c. 1706. The first virtuoso on the instrument was Joseph Kämpfer in the latter part of the 18th century, but to Domenico DRAGONETTI (1763-1846) belongs the credit of having developed the higher technique. The next great virtuoso, Giovanni BOTTESINI (1821-1889), introduced the use of a bow made after the pattern, and held in the manner of, the violoncello bow. Sergei KUSEVITZKY (*q.v.*) is the greatest living virtuoso of the double-bass.

SUBSIDIARY MEMBERS OF THE FAMILY AND OBSOLETE INSTRUMENTS

Of the numerous variations of which specimens may be found in the various museums of Europe and America only those can be mentioned which were of particular interest.

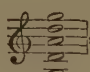

(1) SAVART'S TRAPEZOID-VIOLIN, constructed by Felix Savart of Paris in 1819. This instrument, which was constructed on scientific principles, had a sound-body in trapezoid form and straight longitudinal sound-holes, and was pronounced by a jury, including Cherubini, Catel, Lesueur and a number of celebrated scientists, to be equal to the best Cremonese violins. Guitar-shaped violins were constructed by the French naval engineer,

(2) Francis Chanot, after years of experiments, from 1817. The French Academy gave a very favourable opinion on the instrument, for which Chanot was granted a patent. It

¹ Nevertheless modern composers require and get an extraordinary amount of agility from the double-basses.

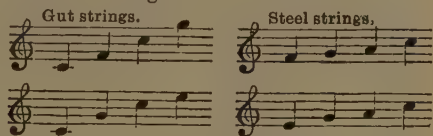

had many admirers, and several noted instrument-makers of the period imitated his theory.

(3) The VIOLON D'AMOUR was a small violon d'amour (see under VIOL, VIOLA D'AMORE) of violin shape. It had five strings, tuned

 and six sympathetic strings, and was used in the 18th century.

(4) The QUINTON, or quinte, used in France during the 18th century, was a violin strung and tuned like the above, but without sympathetic strings. (See PLATE LXXXVII. No. 6.)

(5) The HARDANGER VIOLIN is an ordinary violin mounted with four gut strings and four sympathetic strings of steel. The finger-board, tail-piece and edges of the table are often inlaid with designs in mother-of-pearl and different coloured wood. They are used by Norwegian fiddlers. The Museum of the Brussels Conservatoire, has a fine specimen by Anders Heldahl of Bergen dated 1851, and also a collection of Norwegian Folk-dances which gives two alternate tunings for the instrument.

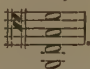

(6) Silent violins which were, and are still, made for practising, have only the upper part of the violin without the ribs and back; others have in place of the sound-body only an open frame, following the outlines of the table.

There were also violins made in fayence, china, tortoiseshell and various metals, but they are of no practical value.

(7) The VIOLA ALTA is a large tenor, constructed by K. A. Hörlein of Würzburg (1872-1875), according to instructions given him by Hermann RITTER, who played it in the Bayreuth Festival Orchestra. The instrument has a powerful tone of fine quality, but on account of its size it requires a player with a fairly long arm, and is somewhat tiring to hold for a great length of time. The dimensions are: total length, 26 in.; body c. 18½ in. In 1898 Ritter added a fifth string to his viola corresponding to the violin *e* string, so that his instrument combined the compass of both those instruments. Michael Balling was an eminent performer on the viola alta.

F. Chanot and Dr. Alfred Stelzner have both made violas in their respective special models.

(8) The TENOR VIOLIN was the real tenor instrument of the violin family, for which D. Hizler, in his *Neue Musica*, Tübingen, 1628,

gives the tuning as . In the Wm.

Heyer Museum (formerly at Cologne, now at Leipzig) there are three specimens: one by

Joseph Meyer zu Graffenhausen (?), A[n]no 1668—total length, $27\frac{1}{2}$ in.; body, $16\frac{3}{4}$ in.; width of upper bouts, $8\frac{1}{8}$ in.; lower bouts, $9\frac{1}{2}$ in.; height of ribs, 2 in.; one by a Bavarian maker of the first half of the 18th century—total length, $27\frac{1}{8}$ in.; body, $17\frac{1}{8}$ in. The third is a six-stringed instrument by Gio. Picinetti flo, anno 1682, for which Dr. G. Kinsky, in his catalogue, gives the tuning as

The dimensions do not differ much from those of the two former.

The tenor violin was used by Handel and J. S. Bach, but became obsolete by the middle of the 18th century. A long *viola* passage, written in the bass clef, in Joh. Christian Bach's Overture (symphony), op. 18 No. 3, seems to indicate that he must have still used a tenor violin with the tuning given by Hitzler.

(9) The VIOLA POMPOSA, which Bach invented to facilitate the playing of quick and high violoncello passages, exceeding the skill of his violoncellists, was a five-stringed instrument with a total length of c. $30\frac{1}{2}$ in. and body length of c. $17\frac{1}{8}$ in.; height of ribs, c. $3\frac{1}{2}$ in.; tuned

Georg PISENDEL (q.v.)

was the only remarkable executant on this instrument, which had but a short existence. (See PLATE LXXXVIII. No. 6.)

(10) The VIOLA DA SPALLA was a viola of only slightly smaller proportions than the *viola pomposa*, but it had only four strings, tuned like the ordinary *viola*. It derived its name from the fact that it was held across the chest suspended from a strap over the right shoulder (Ital. *Spalla*). It was used largely by wandering musicians during the 17th and early 18th centuries.

(11) The VIOLOTTA was constructed by Dr. Alfred Stelzner of Dresden to fill the gap which occurs in the modern string quartet between the *viola* (alto) and the violoncello (bass). It is a real tenor violin, built on the model invented and applied by him to all the members of the violin family, employing, for acoustic reasons, the ellipse and parabola instead of circular segments for the outlines of the body.¹ The tone of the violotta is full and of beautiful

quality; it is tuned

Measure-

ments: total length, $28\frac{1}{2}$ in.; body, c. 16 in.; width of upper bouts, $9\frac{1}{2}$ in.; lower bouts, $11\frac{1}{8}$ in.; height of ribs, at top, $1\frac{1}{2}$ in.; middle, c. $2\frac{3}{8}$ in.; bottom, c. $2\frac{1}{8}$ in. Felix Dräseke, Arnold Krug, Jul. Major and others have written for it in

chamber music, and Max Schillings has made effective use of it in his opera 'Der Pfeifertag.'

More or less successful experiments in the construction of tenor violins have been made also by J. B. Vuillaume, Paris (1855), B. Dubois, Paris (1833), Hopf, Josephstadt (Bohemia, c. 1800), Valentino de Zorzi, Florence (1908). All these are played under the chin, and tuned like the violotta. Hermann Ritter has also constructed a tenor violin with the same tuning but held between the knees.

(12) The VIOLONCELLO PICCOLO was used by Bach and others in the late 17th and 18th centuries as offering greater facilities to the player, when the technique of violoncello-playing was still in its infancy. It was in reality merely a half-size violoncello with a total length of about 3 feet, and corresponding other measurements. These instruments often showed features of the *viols* in the flame-shape sound-holes, sometimes combined with a rosette in the upper part of the table and the absence of projecting edges of the table and back. They are now used only by juvenile students.

(13) The ARPEGGIONE or GUITAR VIOLONCELLO constructed by Joh. Georg Stanfer of Vienna about 1824 is a six-stringed instrument

tuned which suggests the

model invented by F. Chanut both in outline and the shape of the sound-holes. The neck was provided with 24 metal frets. Its total length is c. $3\frac{1}{2}$ feet; length of body, $25\frac{1}{2}$ in.; upper width, $12\frac{1}{2}$ in.; lower width, $14\frac{1}{4}$ in.; height of ribs, $4\frac{1}{2}$ in. (See PLATE LXXXVIII. No. 3.) Franz Schubert wrote a beautiful sonata in A minor for it which was played by Vinc. Schuster, who also published a tutor for the arpeggione, which deservedly fell into disuse after an existence of about ten years.

(14) The CELLONE is a bass violoncello belonging to the family of the Stelzner instruments (see VIOLOTTA above), and exhibits the same model as these. It was intended chiefly as a contrabass for chamber music and used as such by the same composers, who also employed

the violotta. The tuning is Total

length, 3 feet $10\frac{1}{2}$ in.; length of body, c. $30\frac{3}{4}$ in.; width of upper bouts, $15\frac{1}{8}$ in.; lower bouts, c. 18 in.; height of ribs, $6\frac{1}{2}$ in.

(15) The OCTOBASS, constructed by J. B. Vuillaume in Paris in 1849, was a double-bass 4 metres high; with three strings tuned

; the notes were stopped by

8ve.....

means of a system of levers and 8 pedals. In 1851 Vuillaume made a similar instrument on an

improved system, an Italian 17th-century three-stringed double-bass known as the giant, now in the Victoria and Albert Museum; it measures 103 inches in length. Similar giant basses have been made from time to time in all European countries, and John Geyer, a German-American, made one in 1889 4½ metres in length.

E. v. d. s.

VIOLINO PICCOLO, a violin of small size, usually tuned a fourth higher than the ordinary violin, its open strings being an octave above those of the viola.

Among the thirty-six musical instruments employed by Claudio Monteverdi in the orchestra of his opera 'Orfeo,' published in 1609, and reissued in 1615, the score includes *Piccoli Violini alla Francese*. This title, written by an Italian, has caused a slight confusion as to the nationality of the violin proper, and at the same time given credence to a conjecture that the violin was a French invention. Naturally the correctness of the surmise rests upon the kind of instrument Monteverdi intended to designate by the appellation *Piccolo Violino*. The directions given in the published score of 'Orfeo' indicate that the composer introduced several instruments into the orchestra solely for the purpose of imparting greater dramatic power and contrast than had hitherto been attained. Bearing this in mind—also the facts that Monteverdi was himself an Italian, that he lived in his native country where violins were being made by Gasparo da Salò more than forty years previous to the composition of 'Orfeo,' and that no French violin-maker or violinist is on record at this date—it is more than probable that the *Piccoli Violini alla Francese* indicated were none other than the *POCHETTE (q.v.)* (see also KIT), which 17th-century French dandies and dancing-masters were accustomed to carry in their pockets to

madrigal parties and lessons. Famous makers of the French pochettes in the first half of the 17th century were Pierre Le Duc and Du Mesnil of Paris.

Leopold Mozart says the Quart-geige is smaller than the ordinary violin, and is used by children.

'Some years ago,' he continues, 'Concertos were written for these little violins, called by the Italians *Violino Piccolo*; and as they have a much higher compass than the ordinary violin, they were frequently used in open-air serenades (*Nachstücke*) with a flute, harp and other similar instruments. Now, however [1756], the small violin can be dispensed with. Everything is played on the common violin in the higher positions.' (*Violinschule*, p. 2.)

The 'Three-quarter Fiddle' is still used by children, but is always abandoned as early as possible. In its more normal or violin shape J. S. Bach occasionally employed the *violino piccolo* in his church cantatas and also in the first Brandenburg Concerto (F major), sometimes treating it as a solo instrument.

F. W. G.; incorporating material from E. J. P. and E. H.-A.

VIOLIN-PLAYING. For technique see the articles **FINGERING** and **BOWING**. The following is an historical summary. C.

In order to gain an idea of the way the violin was played in its first period, we naturally look to the scores of contemporaneous composers. But here we meet with a difficulty. Down to the end of the 16th century we do not find the instruments specified by which the different parts are to be played. On the titles of the earlier works of A. and G. Gabrieli (1557-1613) we read: '*Sacrae Cantiones, tum viva voce tum omnis generis Instrumentis cantatu commodissimae*' (most convenient for the voice, as for all kinds of instruments), or '*Sacrae Symphoniae tam vocibus quam instrumentis*' (for voices as well as instruments); or '*Psalmi tum omnis generis instrumentorum tum ad vocis modulationem accommodati*' (Psalms for all kinds of instruments and the voice); or '*Buone da cantare e suonare*,' or other similar directions.¹

The earliest instance of a part being specially marked for 'Violino,' we find in 'Concerti di Andrea e Giovanni Gabrieli—per voci e stromenti musicali. Venetia, 1587.' In Gabrieli's scores the cornetti (See **CORNETT**) alternate with the violins in taking the lead. His instrumental compositions may roughly be divided into two classes, the one evidently based on his vocal style, the other decidedly instrumental in character. In a 'Sonata' belonging to the first class, we find an instrumental double choir, a cornetto and three trombones forming the first choir, a violin and three trombones the second, the two being employed antiphonally; the setting is contrapuntal

throughout, and the effect not unlike that of a motet for double choir. The violin part does not materially differ from that for the cornetto. To the second class belong the sonatas and canzoni for two or three violins with bass. Here the setting is much more complicated, mostly in fugato-form (not regular fugues), reminding us to a certain extent of organ-style, and certainly not vocal in character, but purely instrumental. The scores of Gabrieli contain the first beginnings of the modern art of instrumentation, and mark an epoch in the history of music. Not content with writing, in addition to the voices, obligato instrumental parts, he takes into consideration the quality (timbre) of the various instruments. That this should have been brought about at the very period in which the violin came into general use, can certainly not be considered a mere accident, although it may be impossible to show which of the two was cause and which effect. Once the violin was generally accepted as the leading instrument of the orchestra, its technique appears soon to have made considerable progress. While Gabrieli never exceeds the third position, we find but a few years later, in a score of Claudio Monteverdi (1610), passages going up to the fifth position: after an obligato passage for two cornetti, enter the violins (1st and 2nd):

Violin 1. 2.

etc.

The manner in which, in this example, the violins are used '*divisi*' is worthy of notice. In another work of Monteverdi, '*Combattimento di Tancredi e Clorinda*,' di Claudio Monteverde. Venezia, 1624,² we find modern violin effects introduced in a still more remark-

¹ These expressions are exactly equivalent to the words so often found on the title-pages of English madrigals of the 17th century — 'Apt for viols and voices.'

² See MONTVERDI, Vol. III, p. 505.

able way. Here we have recitatives accompanied by *tremolì* for violins and bass, *pizzicati* marked thus, 'Qui si lascia l' arco, e si strappano le corde con duoi diti'; and afterwards, 'Qui si ripiglia l' arco.' That violinists were even at that time expected to produce gradations of tone with the bow is proved by the direction given respecting the final pause of the same work: 'Questa ultima nota va in arcata morendo.'

The earliest known solo composition for the violin is contained in a work of Biagio MARINI, published in 1620. It is a 'Romanesca per Violino Solo e Basso se piaci' (*ad lib.*) and some dances. The Romanesca¹ is musically poor and clumsy, and, except that in it we meet with the shake for the first time, uninteresting. The demands it makes on the executant are very small. The same may be said of another very early composition for violin solo, 'La sfera armoniosa da Paolo Quagliati' (Rome, 1623).

Of far greater importance, and showing a great advance in execution, are the compositions of Carlo FARINA, who has justly been termed the founder of the race of violin virtuosi. He published in 1627, at Dresden, a collection of violin pieces, dances, French airs, 'Quodlibets,' etc., among which a 'capriccio stravagante' is of the utmost interest, both musically and technically. Musically it represents one of the first attempts at tone-picturing (*Klangmalerei*), and, however crude and even childish, the composer evidently was well aware of the powers of expression and character pertaining to his instrument. He employs a considerable variety of bowing, double-stopping and chords. The third position, however, is not exceeded, and the fourth string not yet used. Tarquinio MERULA (about 1640) shows a technical advance in frequent change of position, and especially in introducing octave passages. Paolo UCCELLINI, in his canzoni (1649), goes up to the sixth position, and has a great variety of bowing.

Hitherto (the middle of the 17th century) the violin plays but an unimportant part as a solo instrument, and it is only with the development of the sonata-form (in the old sense of the term) that it assumes a position of importance in the history of music. (See SONATA.) Towards the year 1630 we find the first compositions containing rudimentally the form of the classical violin sonata. Among the earliest specimens may be counted the sonatas of Giov. Battista Fontana (published about 1630), a *sinfonia* by Mont' Albano (1629), canzoni by Tarquinio Merula (1639), canzoni and a sonata by Massimiliano Neri (1644 and 1651). From about 1650, the name Canzone falls out of use, and Sonata is the universally accepted term for

violin compositions. Massimiliano NERI appears to have been the first to have made the distinction between 'sonata da chiesa' (church sonata) and 'sonata da camera' (chamber sonata).² The first great master of the Violin Sonata is Giovanni Battista VITALI (1644-92). He cultivated chiefly the Chamber Sonata, and his publications bear the title of 'balletti, balli, correnti, etc., da camera,' but in some of his works the transition from the suite-form to the later sonata da camera, so closely allied to the church sonata, is already clearly marked. In musical interest Vitali's compositions are greatly superior to those of his predecessors and contemporaries. His dances are concise in form, vigorous in character, and occasionally he shows remarkable powers as a composer. (See VITALI.) His demands on execution are in some instances not inconsiderable, but on the whole he does not represent in this respect any material progress. The Ciaccona, with variations for violin solo by his son T. Antonio VITALI, is justly famous.

The first beginnings of violin-playing in an artistic sense in Germany were doubtless owing to Italian influence. As early as 1626 Carlo Farina was attached to the court of Dresden. About the middle of the century a certain Johann Wilhelm FÜRCHHEIM is mentioned in the list of members of the Dresden orchestra, under the title of 'Deutscher Konzertmeister,' implying the presence of an Italian leader by his side. Gerber, in his Dictionary, mentions two publications of his for the violin: (1) 'Violin-Exercitium aus verschiedenen Sonaten, nebst ihren Arien, Balladen, Allemanden, Couranten, Sarabanden und Giguen, von 5 Partien bestehend, Dresden, 1687'; and (2) 'Musikalische Tafelbedienung (dinner-service), Dresden, 1674.'

Thomas BALTZAR was, according to Burney,³ 'the first great violinist we had ever heard in England.' He appears to have greatly astonished his audiences, especially by his then unknown efficiency in the shift, in which, however, he did not exceed the third position. Of far greater importance than Baltzar are two German violinists, Johann Jacob WALTHER (b. 1650), and Franz Heinrich BIBER (d. 1698). WALTHER appears to have been a sort of German Farina, with a technique much farther developed; he ascends to the sixth position and writes difficult double-stops, arpeggios and chords. His compositions are, however, clumsy and poor in the extreme, and if we consider that he was a contemporary of Corelli, we cannot fail to notice the much lower level of German art as compared with that of Italy. Biber was no doubt an artist of great talent and achievement. (See SONATA, Vol. IV. p. 810). His technique was in some respects in advance of that of the best Italian violinists

¹ Reprinted in the Appendix of Wsielewski's *Die Violine im XVII. Jahrhundert*.

² *Gen. Hist. of Music*, iii. 579.

of the period, and from the character of his compositions we are justified in assuming that his style of playing combined with the pathos and nobility of the Italian style that warmth of feeling which has ever been one of the main characteristics of the great musical art of Germany.

In tracing the further progress of violin-playing we must return to Italy. After Vitali it is TORELLI (1657-1716) who chiefly deserves our attention. In his *concerti da camera* and *concerti grossi* we find the form of the *sonata da chiesa* preserved, but the solo violins (one or two) are accompanied not only by a bass, as in the *sonata*, but by a stringed band (two orchestral or ripieno violins, viola and bass), to which a lute or organ part is sometimes added, an arrangement which on the whole was followed by Vivaldi, Corelli and Handel. If no remarkable progress in the technique of the instrument was effected by the introduction of the concerto, it is all the more striking to notice how henceforth the best composers for the Church contribute to the literature of the violin. We have, in fact, arrived at a period in which the most talented musicians, almost as a matter of course, were violinists. The most eminent representative of this type of composer violinist is Arcangelo CORELLI (1653-1713). His works, though in the main laid out in the forms of his predecessors, and, as far as technique goes, keeping within modest limits, yet mark an era both in musical composition and in violin-playing. He was one of those men who seem to sum up in themselves the achievements of their best predecessors. Corelli's place in the history of instrumental music is fully discussed elsewhere. (See CORELLI; SONATA, Vol. IV. p. 811.) The technical difficulties contained in his works are not great, and in this respect Corelli's merit does not lie in the direction of innovation, but rather of limitation and reform. We have seen how the violin at the beginning of its career simply adopted the style of the vocal music of the period, how later on it took in the orchestra the place of the cornetto, and how, though very gradually, a special violin style began to be formed. Now followed a period of experiments—all more or less tending towards the same end—a style which should correspond to the nature, ideal and mechanical, of the instrument. In both respects, as we have seen, remarkable progress was made; although exaggeration was not always avoided. The virtuoso *par excellence* made his appearance even at this early period. Corelli, by talent and character, had gained a position of authority with his contemporaries, which has but few parallels in the history of music. This authority he used to give an example of artistic purity and simplicity, to found a norm and model of violin-playing which forms the basis of all succeeding legiti-

mate development of this important branch of music.

Before mentioning the most important of Corelli's pupils we have to consider the influence exercised on violin-playing by the Venetian VIVALDI (d. 1743). Though by no means an artist of the exalted type of Corelli, his extraordinary fertility as a composer for the violin, his ingenuity in making new combinations and devising new effects, and especially his undoubted influence on the further development of the concerto-form, give him an important position in the history of violin-playing. While in the *concerti grossi* of Torelli and Corelli the solo violins are treated very much in the same manner as the orchestral violins—the solo passages being usually accompanied by the bass alone—Vivaldi not only gives to the solo violins entirely distinct passages of a much more brilliant character, but he also adds to his orchestra oboes and horns, which not merely double other parts, but have independent phrases and passages to perform—thereby giving the earliest instance of orchestration as applied to the concerto.

As an executant the Florentine Francesco Maria VERACINI exercised a greater influence than Vivaldi. Veracini, a man of passionate temperament, threw into his performances and compositions an amount of personal feeling and life, which in his own day brought on him the charge of eccentricity, but which to us appears as one of the earliest manifestations of a style which has made the violin, next to the human voice, the most powerful exponent of musical feeling. His violin sonatas are remarkable for boldness of harmonic and melodic treatment, and of masterly construction. The demands he makes on execution, especially in the matter of double stops and variety of bowing, are considerable. His influence on Tartini—after Corelli the greatest representative of the Italian school—we know to have been paramount. TARTINI (1692-1770) by a rare combination of artistic qualities of the highest order, wielded for more than half a century an undisputed authority in all matters of violin-playing, not only in Italy, but in Germany and France also. He was equally eminent as a performer, teacher and composer for the violin. Standing, as it were, on the threshold of the modern world of music, he combines with the best characteristics of the old school some of the fundamental elements of modern music. Himself endowed with a powerful individuality, he was one of the first to assert the right of individualism in music. At the same time we must not look in his works for any material change of the traditional forms. His concertos are laid out on the plan of those of Corelli and Vivaldi, while his sonatas, whether he calls them 'da chiesa' or 'da camera,' are invariably in the accepted form of the 'sonata da

chiesa.' The sonata da camera in the proper sense, with its dance forms, he almost entirely abandons. The difference between Tartini's style and Corelli's is not so much one of form as of substance. Many of Tartini's works bear a highly poetical and even dramatic character, qualities which, on the whole, are alien to the beautiful but colder and more formal style of Corelli. His melodies often have a peculiar charm of dreaminess and melancholy, but a vigorous and manly tone is equally at his command. His subjects, though not inferior to Corelli's in conciseness and clear logical structure, have on the whole more breadth and development. His quick passages are freer from the somewhat exercise-like, dry character of the older school; they appear to be organically connected with the musical context, and to grow out of it. As an executant Tartini marks a great advance in the use of the bow.

While no material change has been made in the construction of the violin since the beginning of the 16th century, the bow has undergone a series of modifications, and only toward the end of the 18th century attained its present form, which combines in such a remarkable degree elasticity with firmness. (See BOW; TOURTE.) Whether Tartini himself did anything to perfect the bow, we are not aware, but the fact that old writers on musical matters frequently speak of 'Tartini's bow,' seems to point that way. At any rate, we know that in his time the bow gained considerably in elasticity, and in some letters and other writings of Tartini's we have direct evidence that he made a more systematic study of bowing than any one before him. If we consider the character of Tartini's compositions, we cannot but see what great and new claims on expression, and consequently on bowing, are made in them. That these claims were fulfilled by Tartini in an extraordinary degree is the unanimous opinion of his contemporaries: in the production of a fine tone in all its gradations, as well as in perfect management of a great variety of bowing, he had no rival.

He appears to have adhered to the holding of the violin on the right side of the string-holder, a method which was a barrier to further development of the technique of the left hand. With him the exclusive classical Italian school of violin-playing reached its culminating point, and the pupils of Corelli and Tartini form the connecting links between that school and the schools of France and Germany. In this respect the Piedmontese SOMIS (1676-1763) must be considered the most important of Corelli's pupils. We do not know much of him as a player or composer, but as the teacher of GIARDINI (1716-96), and of PUGNANI (1727-1803), the teacher of VIOTTI (1753-1824), his influence reaches down to SPOHR, and thence to our own day. The most brilliant representa-

tives of Italian violin-playing after Tartini were GEMINIANI and NARDINI. The former was a pupil of Corelli, the latter of Tartini. Their style is decidedly more modern and more brilliant than are those of their great masters. Nardini's influence in Germany—where he passed many years—contributed much towards the progress of violin-playing in that country. Geminiani (1680-1761), who for a long time resided in London, was the first to publish a violin-school of any importance. Compared with that of Leopold MOZART which appeared a few years later, and is on the whole a work of much higher merit, Geminiani's 'school' shows an advance in some important points of technique. Here for the first time the holding of the violin on the left side of the string-holder is recommended—an innovation of the greatest importance, by which alone the high development of modern technique was made possible. He goes up to the seventh position. As affording the only direct evidence of Corelli's method and principles (which in all main respects have remained ever since the basis of all legitimate and correct treatment of the instrument), Geminiani's book is still of the greatest interest. In LOCATELLI (1693-1764), another pupil of Tartini, a curious instance is afforded of how, in spite of the strongest school-influence, a powerful individuality will now and then, for better or worse, strike out a path for itself. While some of Locatelli's compositions afford clear evidence of his sound musicianship and genuine musical feeling, he shows himself in others, especially in a set of Caprices, to have been, to say the least, an experimentalist of the boldest type. In overstepping to an astonishing degree the natural resources and limits of the instrument, these caprices afford one of the earliest instances of charlatanism in violin-playing.

The beginnings of violin-playing in France date from a very early period. Yet to judge from the extreme simplicity of the violin parts in the scores of Lully, who in 1652 was appointed Director of the Royal Chapel (see VINGT-QUATRE VIOLONS), the general level of skill in performance was not great. As late as 1753 a certain Paris musician, Corrette, writes that when Corelli's violin sonatas came to Paris, no violinist was to be found who could play them. The violin compositions of Frenchmen of the same period, among which the suites of REBEL (1687), a pupil of Lully, were counted the best, are in every respect inferior to the average of Italian and even of German productions of the same period. François FRANCEUR, in his sonatas (1715), shows decided progress in both respects. (As a curiosity it may be noticed that Franceur, in order to produce certain chords, adopted the strange expedient of placing the thumb on the strings.) As was the case in Germany, it was

owing to the influence of the Italian school that violin-playing in France was raised to real excellence. The first French violinist of note who made his studies in Italy under Corelli was Baptiste ANET (about 1700). Of much greater importance, however, was Jean Marie LECLAIR (1697-1764), a pupil of Somis, who again was a direct pupil of Corelli. As composer for the violin Leclair has hardly a rival among Frenchmen down to Rode. If most of his works are characterised by vivacity, piquancy and grace, he also shows in some instances a remarkable depth of feeling. His technique shows itself, within certain limits—he does not go beyond the third position—to be quite as developed as that of his Italian contemporaries. By the frequent employment of double-stops a remarkable richness of sound is produced, and the bow is used in a manner requiring that agility and lightness of management for which at a later period the French school gained a special reputation.

Among other French violinists, directly or indirectly formed by the Italian school, may be mentioned PAGIN (b. 1721), TOUCHEMOULIN (1727-1801), LAHOUSAYE (1735-1818), BARTHÉLEMON (d. 1808), and BERTHAUME (1752-1828). Meanwhile an independent French school began to be formed, of which Pierre GAVINIÉS (1728-1800) was the most eminent representative. Of his numerous compositions, 'Les Vingt-quatre Matinées'—a set of studies of unusual difficulty—have alone survived. Without partaking of the eccentricity of Locatelli's Caprices, these studies show a tendency towards exaggeration in technique. Beauty of sound is frequently sacrificed—difficulty is heaped on difficulty for its own sake, and not with the intention of producing new effects. At the same time, so competent a judge as Fétis ascribes to Gaviniés a style of playing both imposing and graceful.

Not directly connected with any school, but in the main self-taught, was Alexandre Jean BOUCHER (1770-1861). He was no doubt a player of extraordinary talent and exceptional technical proficiency, but devoid of all artistic earnestness, and was one of the race of charlatan violinists which has had representatives from the days of Farina down to our own time. If they have done harm by their example, and by the success they have gained from the masses, it must not be overlooked that, in not a few respects, they have advanced the technique of the violin. The advent of VIOTTI (1753-1824) marks a new era in French violin-playing. His enormous success, both as player and composer, gave him an influence over his contemporaries which has no parallel, except in the cases of Corelli and Tartini before him, and in that of Spohr at a later period.

In Germany the art of Corelli and Tartini was spread by numerous pupils of their school,

who entered the service of German princes. In Berlin we find J. G. GRAUN (1698-1771), a direct pupil of Tartini, and F. BENDA (1709-1786), both excellent players and eminent musicians. In the south, the school of Mannheim numbered among its representatives Johann Carl STAMITZ (1719-61), and his two sons Carl and Anton (the latter settled in Paris, and was the teacher of R. Kreutzer); Chr. CANNABICH (1731-98), well known as the intimate friend of Mozart; Wilhelm CRAMER (1745-99), member of a very distinguished musical family, and for many years the leading violinist in London; Ignaz FRÄNZL (b. 1736) and his son Ferdinand (1770-1833). The Mannheim masters, however, did not contribute anything lasting to the solo literature of the violin. On the whole, the sonata, as cultivated by Tartini, remained the favourite form of violin composition. At the same time the concerto (in the modern sense) came more and more into prominence. The fact that W. A. Mozart, who from early childhood practised almost every form of composition then in use, wrote so many concertos for violin and orchestra, is a clear indication of the growing popularity of the new form. Mozart in his younger years was hardly less great as a violinist than at the keyboard, and his violin concertos are the most valuable compositions in that form anterior to Beethoven and Spohr. Mozart, however, in his later years gave up violin-playing altogether, and although, like Haydn, he has shown in his chamber music how thoroughly in sympathy he was with the nature of the violin, he did not contribute to the literature of the instrument any works wherein he availed himself of the technical proficiency attained by the best violinists of his time. In this respect it is significant that Spohr, whose unbounded admiration for Mozart is well known, seems never to have played his violin concertos in public. Viotti and Rode were Spohr's models for his earlier concertos.

Towards the end of the 17th century Paris became the undisputed centre of violin-playing, and the Paris school—represented by Viotti as depository of the traditions of the classical Italian school, by KREUTZER (1766-1831), who, though born at Versailles, was of German parentage, and a pupil of Anton Stamitz, and by RODE (1774-1830) and BAILLOT (1771-1842), both Frenchmen—assumed a truly international character. The single circumstance that four violinists of such eminence lived and worked together at the same place, and nearly the same time, would be sufficient to account for their essential influence on the taste and style of this period. Differing much in artistic temperament, they all took the same serious view of their art, and shared that musical earnestness which is averse to mere technical display for its own sake, and looks on execution

as the means of interpreting musical ideas and emotions. As teachers at the newly founded Conservatoire, Rode, Kreutzer and Baillot formally laid down the principles of violin-playing as they prevail to this day. It is to Germany that we have to look for their true successors, apparently because their style, founded on a broad and truly musical basis, irrespective of national peculiarities, found its most congenial soil in the country of the great composers, who in their works are truly international, as all art of the very first rank must be; while the strongly pronounced national character of French violinists was bound sooner or later to assert itself, and to return to a characteristically French style of playing. Baillot, in his *L'Art du violon*, points out as the chief distinction between the old and the modern style of violin-playing, the absence of the dramatic element in the former, and its predominance in the latter. In so far as this means that the modern style better enables the player to bring out those powerful contrasts, and to do justice to the enlarged horizon of ideas and emotions in modern musical compositions, it merely states that executive art has followed the progress, and shared in the characteristic qualities of the creative art of the period. A comparison of Mozart's string quartets with those of Beethoven illustrates to a certain extent this difference. The style of playing which was admirably adapted for the interpretation of the works not only of Corelli and Tartini, but also of Handel, and even Mozart, could not cope with Haydn, and still less with Beethoven. The great merit of the masters of the Paris school was that they recognised this call for a freer and bolder treatment of the instrument, and approached their task in a truly musical and artistic spirit.

The manner and style of the Paris school were brought to Germany by Viotti and Rode, who both travelled a great deal, and by their performances effected a considerable modification in the somewhat antiquated style then prevailing in that country. The Mannheim school, as already mentioned, was the most important centre of violin-playing in Germany during the second half of the 18th century. It produced a number of excellent players, such as the Stamitz family, Chr. Cannabich, Ferd. Fränzl. They had adhered more closely than the French players to Tartini's method and manner, and not only Spohr, but before him Mozart, speaks of their style as old-fashioned, when compared with that of their French contemporaries. The fact that the last and final improvements in the bow, as made by TOURTE of Paris, were probably unknown to them would account for this. Another remarkable player belonging to this school was J. F. ECK (b. 1766), whose brother and pupil Franz Eck (1774-1809) was the teacher of Spohr. Both

the Ecks appear to some extent to have been under the influence of the French school. Spohr in his Autobiography speaks of Franz Eck as a French violinist. Spohr therefore can hardly be reckoned as of the Mannheim school, and we know that later on he was greatly impressed by Rode, and for a considerable time studied to imitate him. His earlier concertos are evidently worked after the model of Rode. Thus—granting the enormous difference of artistic temperament—Spohr must be considered as the direct heir of the art of Viotti and Rode. At the same time, his individuality was so peculiar that he very soon formed a style of his own as a player no less than as a composer. As a composer he probably influenced the style of modern violin-playing even more than as a player. His concertos were, with the single exception of Beethoven's concerto, by far the most valuable contributions to the literature of the violin, as a solo instrument, hitherto made. Compared even with the best of Viotti's, Rode's or Kreutzer's concertos they are not merely improvements, but in them the violin concerto itself is lifted into a higher sphere, and from being more or less a show-piece, rises to the dignity of a work of art, to be judged as much on its own merits as a musical composition as by its effectiveness as a solo-piece. Without detracting from the merits of the works of the older masters, it is not too much to say that there is hardly enough musical stuff in them to have resisted the stream of superficial virtuoso music which more than ever before flooded the concert-rooms during the first half of the 19th century. We believe that it was mainly owing to the sterling musical worth of Spohr's violin compositions that the great qualities of the classical Italian and the Paris schools have been preserved to the present day, and have prevented the degeneration of violin-playing. Spohr had great powers of execution, but he used them in a manner not wholly free from one-sidedness, and it cannot be said that he made any addition to the technique of the instrument. He set a great example of purity of style and legitimate treatment of the instrument.

Next to Spohr no one had a greater influence on the style of modern violin-playing than PAGANINI (1784-1840). The sensation he created wherever he appeared was unprecedented. By his marvellous execution, and his thoroughly original and eccentric personality and style, he for a time held Europe spell-bound. His influence on the younger violinists of the period could not fail to be considerable—more so in France than in Germany, where the more serious spirit prevailing among musicians and the presence of such a master as Spohr, were powerful enough to keep the influence within bounds. The growing importance and popularity of chamber music for the violin,

especially of the string quartet, since Haydn, Mozart and Beethoven were another barrier against the predominance of an exclusive virtuosic style of violin-playing in Germany. French violinists, especially Baillot, were certainly anxious enough to attack these highest tasks of the violinist, but there can be no doubt that in their hands the works of the German classics assumed an aspect which was too frequently more in accordance with the French character of the performers than with the intentions of the composers. In this respect the minute directions which Baillot gives for the performance of a great number of passages extracted from the works of most eminent composers is extremely curious and instructive. It was but natural that Paganini should have a number of imitators, who copied with more or less success his harmonies and double-harmonics, his long and quick staccatos, *pizzicati* with the left hand—in fact, all those technical feats which, though not invented by him, he brought to perfection. The style of the man, which had its source in his genius and originality, was inimitable. He could not, and did not start a school. SIVORI (b. 1817) claimed to be his only actual pupil. But, pupils or no pupils, Paganini caused nothing short of a revolution in the technique of the French school. The striking change which the general style of violin-playing underwent in France during the third decade of the 19th century has, however, other and deeper causes, and finds its explanation in the complete revolution in musical taste which took place at that period. The classical Paris school was in reality the school of Italy, which for the time being had made Paris, as it were, its headquarters. Founded by Viotti, the Italian, at a time when German instrumental music, in the persons of Haydn and Mozart, was occupying the attention of the whole musical world, this school hardly reflected the salient points of the French national character, although it harmonised well with the classical tendencies of the sister arts in that country. In Baillot's *L'Art du violon* we cannot fail to recognise already a leaning towards a style which was more in harmony with the genius of the French nation—a style, brilliant, showy, full of shrewdly calculated effects, elegant and graceful, aiming chiefly at a highly polished execution, and distinguished by what they themselves untranslatably call *élan*. At the same time, the French school gained, in what might be termed its classical period, a basis and a systematic method for the technical training of violinists, the advantages of which are still so apparent in the highly finished technique of a large number of French violin-players of the present day.

Two most eminent representatives of the French school, DE BÉRIOT (1802–70) and H. VIEUXTEMPS (1820–81), were of Belgian

nationality. The Belgian school of violin-playing is, however, in reality but a branch, though a most important one, of the Paris school. De Bériot's style as a composer for the violin seems to have been formed under the influence of the modern Italian opera composers, especially of Rossini, Donizetti and Bellini; and his concertos and 'Airs variés,' which attained an immense popularity all over the world, share the strong and weak points of contemporary Italian music. They have plenty of melody, though of a somewhat sentimental kind, and their general style, without affording much difficulty to the player, is most brilliant and effective. If De Bériot's ideas are on the whole superficial and often not free from triviality, they are also unpretentious and unaffected. The same can hardly be said of Vieuxtemps. He certainly was a great violinist, and as a musician decidedly superior to De Bériot. His compositions contain ideas of great beauty and are often cleverly worked out, but at the same time there is in them too frequently an element of theatrical bombast and pretension which is analogous to Meyerbeer's grand-opera style, just as De Bériot's is to the spontaneous melody of Italian opera. De Bériot's treatment of the instrument, though often commonplace, does not go against its nature, while Vieuxtemps not unfrequently seems to do violence to it, and in some of his *tours de force* oversteps the boundaries of the beautiful. Both these great artists travelled much, and gained by the great excellence of their performances universal success in almost every European country. Vieuxtemps was also the first violinist, of the highest rank, who visited America. De Bériot, as leader at the Brussels Conservatoire, formed a great number of excellent violinists, the best known of whom are the Spaniard MONASTERIO (b. 1836), SAURET (b. 1852), SCHRADIECK (b. 1846) and HEERMAN (b. 1844). Jean BECKER (b. 1833) and LAUTERBACH (b. 1832) also studied for some time under him.

Among Baillot's pupils F. A. HABENECK (1781–1849) attained a great reputation as conductor and as teacher. He counts among his pupils SAINTON (b. 1813), PRUME (1816–49), ALARD (1815–88) and LÉONARD (b. 1819). The two last, with MASSART (b. 1811), a pupil of Kreutzer, headed the Franco-Belgian school as teachers at the Paris Conservatoire. Alard's most eminent pupil was SARASATE (1844–1908). MARSICK and DENGREMENT (b. 1866) studied under Léonard; WIENIAWSKI, LOTTO and TERESINA TUA were pupils of Massart.

In Germany we find the schools of Cassel, Leipzig and Vienna taking the lead. Spohr at Cassel had a great number of pupils, but his manner and style were too exclusively individual to form a school. His most eminent pupil was Ferdinand DAVID (1810–73), who as

founder of the Leipzig school exercised great influence on violin-playing in Germany. It can hardly be said that he perpetuated in his pupils Spohr's method and style. Entirely differing from his great master in musical temperament, enjoying from his early youth close intercourse with Mendelssohn, and strongly imbued with the spirit of Beethoven's music, he represented a more modern phase in German violin-playing and an eclecticism which has avoided one-sidedness not less in matters of technique than in musical taste and judgment generally. He was the first who played Bach's violin solos, and all the last quartets of Beethoven (not even excepting the fugue) in public. Schubert's quartets and quintet were on the programmes of his chamber concerts at the time when they had not yet been heard in public, except perhaps at Vienna. As a teacher his chief aim was to give to his pupils a thorough command of the technique of the violin, and to arouse and develop their musical intelligence. There as elsewhere the classical works of violin literature naturally formed the main stock of teaching material. At the same time David laid great stress on the study of the French masters, maintaining that, irrespective of musical value, their works, being as a rule written with the aim of bringing out the capabilities of the violin, contain a large amount of useful material for technical training, which in the end must benefit and improve the execution of music of any style. The correctness of this theory was strikingly proved by JOACHIM, who, as Boehm's pupil at Vienna, was made thoroughly familiar with the technique of the French school, while he studied most of his classical repertory at Leipzig under David's guidance, and in what we may term Mendelssohn's musical atmosphere. Joachim's unlimited command over technical difficulties in music of any style, which enabled him to do equal justice to Paganini and Bach, was undoubtedly largely owing to the fact that his early training was free from one-sidedness, and that he gained through the study of brilliant music the highest finish as well as the completest mastery. David trained a large number of good violinists: Japha (Cologne), Röntgen (Leipzig), Jacobsohn (Bremen), Schradieck (who succeeded him at Leipzig), F. Hegar (Zürich) and many more. By far the most eminent of his pupils was WILHELMJ (1845-1908), a virtuoso of the very first rank, who combined a fine broad tone with a technique of the left hand unrivalled by any contemporary violinist.

A most powerful influence on the style of the German violinists was exercised by the Vienna school, more especially by the pupils of BOEHM (1798-1876). Although it is difficult to trace any direct connexion between the Viennese violin-players of the 18th century and the

school of Italy, Italian violinists came very early to Vienna, and the local players adopted their method and style. We know that Tartini was for three years in the service of Count Kinsky, a Bohemian noble, and also that Trani, Ferrari and other Italian virtuosi came to Vienna. It is remarkable that the leading Viennese composers of the 18th century, down to Haydn, were almost without exception violinists. Some of them, like Anton Wranitzky and Dittersdorf, were virtuosi of high rank, but most of them were in the first place composers and leaders, and in the second place only violinists. Naturally they excelled less as solo-players than in the performance of chamber music, which at that period hardly enjoyed anywhere so much popularity as at Vienna. It was the time of preparation for the great classical period which opened with Haydn, and the circumstance that the violin was even then cultivated in Vienna far more in connexion with good and serious music than merely as a solo instrument, has undoubtedly contributed much towards giving to the later representatives of that school their thoroughly musical character, and towards making Vienna the earliest home of quartet-playing. As a quartet-player SCHUPPANZIGH (1776-1830), a pupil of Wranitzky, attained great reputation, and may be regarded as standing first on the roll of great quartet-players. For many years in close intercourse with Haydn and Beethoven, enjoying the advice and guidance of these great masters in the production of their quartets, he established the style of quartet-playing which has been handed down by the most eminent Vienna violinists to our days. His greatest pupil was MAYSEDER (1789-1863), a brilliant solo-player, of a style more elegant than powerful. Among his pupils the best known are MISKA HAUSER (1822-87) and DE AHNA (1835-92). (See JOACHIM QUARTET.)

ERNST (1814-65), G. HELLMESBERGER, sen., DONT, sen. (1815-88), JOACHIM, LUDWIG STRAUS, RAPPOLDI and GRÜN all studied under Boehm. Boehm himself can hardly be reckoned as belonging to the old Vienna school, since he made his studies under Rode, and no doubt was also influenced by Spohr, who resided at Vienna in 1813, 1814 and 1815. The Vienna school, therefore, though certainly not uninfluenced by the musical traditions of Vienna, appears in reference to technique and specific violin-style to be based on the principles of the classical French school. Counting among its representatives players of a great diversity of talent and artistic temperament, who afterwards formed more or less a style of their own, the Vienna school, or, strictly speaking, Boehm's school, can hardly be said to have been directly continued at Vienna. Boehm, although a thoroughly competent violinist, was not a player of great genius, but he was

possessed of an eminently sound and correct taste and judgment in musical and technical matters, and had a rare talent for teaching. Ernst, next to Joachim the most famous of his pupils, came largely under the influence of Paganini, whose style he for some time closely imitated. Undoubtedly a violinist of the first rank, and by no means exclusively a bravura-player, he did not to any extent affect the prevailing style of violin-playing, nor did he train pupils. An enormous influence on modern violin-playing, and on the general musical life of Germany and England, was exercised by Joachim.¹ He combined in a unique degree the highest executive powers with the most excellent musicianship; and while through his brilliant example he may truly be said to have given to modern German violin-playing a peculiar character, it has not been without effect even on the style of the French school. Unsurpassed as a master of the instrument, he used his powers of execution exclusively in the service of art. First musician, then violinist, seemed the motto of his life and the gist of his teaching. His performances undoubtedly derived their charm and supreme merit from the strength of his talent and of his artistic character, and were stamped with a striking originality of conception; at the same time fidelity to the text, and careful endeavour to enter into the spirit and feeling of the composer, were the principles of executive art which Joachim through his long career invariably practised. With Ernst, and still more with Joachim, an element derived from the national Hungarian, and from Hungarian gipsy music, came into prominence. It is fiddle music *par excellence*, and if introduced into serious music with such judgment and discretion as in Joachim's Hungarian concerto and transcriptions of Brahms's Hungarian Dances, it opens a field for telling and beautiful violin effects. It evinces the same desire to make the resources of popular national music available for artistic purposes, which showed itself in Chopin's idealisations of the Polish element, and later in Sarasate's adaptations of Spanish melodies and dances.²

In addition to Boehm's pupils, the Vienna school produced a number of eminent violinists, such as Joseph HELLMESBERGER,³ a pupil of his father, who was for a great many years the leading violinist at Vienna, enjoying a special reputation for quartet-playing; Leopold AUER (b. 1845), pupil of Dont, jun., and others. Leopold JANSÁ (1797-1875) deserves to be specially mentioned as the teacher of Wilma Norman NERUDA (b. 1840). Madame Neruda (Lady Hallé), possessing a highly finished technique, was not merely a brilliant soloist but

a thorough musician, versed in the whole range of musical literature, an admirable quartet-player and the first woman to attain front rank as a violinist.

The school of Prague—started by F. W. PIXIS (1786-1842), a pupil of Fränzl at Mannheim, and of Viotti—has produced several violinists of note: J. W. KALLIWODA (1800-66), M. MILDNER (1812-65), who succeeded Pixis as professor of the violin at the Prague Conservatoire, and FERDINAND LAUB (1832-75) a violinist of the very first rank. For the later development of this school see ŠEVČÍK.

P. D., with addns.

The attempt to continue further the history of violin-playing by reference to its famous exponents leads inevitably to a digression in which testimonials to the personal powers of great artists obscure the view of the art. Rather than perpetuate the digression of former editions of this Dictionary and intensify it by a fruitless effort to keep pace with time, a summary of facts, including some recorded by previous contributors, must be made here.

In the first place it must be pointed out that all the circumstances of artistic life have so changed that the differentiation of 'schools' which served for classification from the birth of the violin until the middle of the 19th century no longer has the same historical significance. The schools of the past were sharply distinguished by the fact that their members were trained for the performance of particular kinds of music in local conditions and before certain kinds of audience. Members of a school, therefore, grew up sharing views in common, and they devised technical methods to suit their requirements. Even the enumerations given above show the lines of demarcation crossed and recrossed as history approaches modern times. The nationality of the individual and of his school are increasingly at variance, and the distinctions of national schools become more nominal than real. They may be traced in the Berlin school of Joachim and the Brussels school of Eugene YSAÏE, which towards the end of the 19th century were regarded as rivals; these represented contrasted ideals to a certain extent based on national conceptions of music and its interpretation. But when we come to AUER⁴ and ŠEVČÍK,⁵ who number among their pupils a large proportion of the violinists who made great personal reputations in the first quarter of the 20th century, it is quite evident that we are dealing with methods which may be regarded as personal or as cosmopolitan but in no sense as national. In fact national schools have given way to the training of international artists on personal methods.

Violin technique has made no perceptible

¹ Among many pupils of repute trained by Joachim were J. Ludwig, Johann Kruse, Willy Hess, R. Gompertz, Marie Soldat, Halir, Adela d'Aranyi.

² Compare also the Boemian Dances of Ševčík. It is a curious fact that composers have tended to stress national characteristics the more while performance has become increasingly cosmopolitan.

³ Helmesberger was the teacher of KREISLER (q.v.).

⁴ Representative pupils of Auer are Mischa ELMAN, Ephraim ZIMBALIST, Kathleen PARLOW, Jascha HEIFETZ, Toscha SEIDEL.

⁵ Representative pupils of Ševčík are KUBELIK, KOČIAN, Marie HALL, Daisy KENNEDY.

advance (that was scarcely possible) after Paganini. What has advanced is its diffusion among the enlarged ranks of the artists who lay no claim to virtuosity. The gap between the solo-player and the orchestral player no longer exists. Every musical college in Europe and America turns out annually pupils trained in the highest branches of solo work but who have to be content to fill places at the last desks of good orchestras. The supply of excellent players exceeds the demand for their services. The virtuosi and able executants are separated by their personal qualities as interpreters rather than by any sharply drawn line of technical accomplishment. So widely spread is the latter that it is no longer asked what a new-comer can do but how he does it. Though certain details of his style in bowing and phrasing may be traceable to the traditions of the school in which he was trained, the question is answered far more by the evidences of his or her own artistic disposition.

The literature of 'methods' and instructional works generally is enormous. The following are named as illustrative of points touched on above:

- SPORR, *Violin School* (Eng. ed. by Henry Holmes).
 BAILLOT, KREUZER and RODE, *Méthode du violon*. (Officially issued by the Paris Conservatoire.)
 BAILLOT, *L'Art du violon*. (1834.)
 DE BERNER, *École transcendente de violon*. *Grande Méthode*. (Paris, 1855.)
 JOACHIM and MOSER, *Methodik des Violinspiels*. 2 parts. (Berlin, 1920.)
 ŠEVČÍK, *Škule von Violintechnik*. 4 parts. (Prague, 1883.)
Škule von Bogentechnik (including 4000 exercises, in 6 books. (Prague, 1903.)
 AUBÉ, *Violin Playing as I Teach It*. (New York, 1921.)
 RIVARDE, *The Violin and its Technique*. (London, 1921.)

VIOLONCELLO, see VIOLIN FAMILY (3).

VIOLONCELLO PICCOLO, see VIOLIN FAMILY (12).

VIOLONCELLO-PLAYING. Though the manufacture of the bass violin or violoncello followed closely on the invention of the tenor and treble violins, nearly a century elapsed before the violoncello took its proper rank in the family of stringed instruments. This is due to the fact that the six-stringed viola da gamba (see VIOL), the established chamber and orchestral bass of the 17th century, was a very popular instrument, and more easily handled than the violoncello, though inferior to it in power and quality of tone. The larger and more thickly strung violoncello was at first employed to strengthen the bass part in vocal music, particularly in the music of the Church.

It was in Italy that the instrument first took a higher position. The stepping-stone appears to have been the basso continuo which formed the usual accompaniment to solos for the violin. The ringing tones of the violin demanded a more powerful accompaniment than the viola da gamba could give; and with many violin solos of the latter part of the century we find bass parts of some difficulty, which were played on the violoncello by accompanists who made this department of music a

special study. Corelli is said to have had a violoncello accompaniment to his solo performances, though his basso continuo is obviously written in the first instance for the viola da gamba; but it is not until after the death of Corelli that we hear of the first solo violoncello-player. This was one FRANCESCO (1713-1740), of whom little is known except that he played solos in the principal European capitals. The name of Vandini has also come down to us as the violoncello accompanist of the solos of Tartini, and it may be assumed that it was from its association with the violin as a bass that the violoncello itself became a model instrument, and that the methods of violin-playing came to be applied to it.

Among the earliest compositions for the violoncello may be mentioned the sonatas of ANTONIOTTO of Milan, an Amsterdam edition of which is dated 1736, and of Salvatore LANZETTI, violoncellist to the King of Sardinia (1730-50). According to Vidal¹ we trace in these masters the first decided recognition of the capacities of the instrument. The left hand stops an octave and a half (upper E) on the first string, necessitating the use of the thumb, which is the special characteristic of the higher positions of the violoncello (see FINGERING). Canavasso and Ferrari, two other Italian players, appeared in Paris between 1750 and 1760. There already lived in Paris a player whose name stands by tradition at the head of the French school. This was the famous BERTEAU (d. 1756). He is always recognised as the first of the French school of violoncello-players. Cupis, Tillière, the two Jansons, and the elder Duport were among his pupils. Among the classical composers, Handel and Bach first employed the instrument in its wider range; it is only necessary to mention the famous six suites of the latter, while well-known instances of its use by the former are the obligato parts to 'O Liberty' ('Judas'), 'What passion cannot music raise' ('St. Cecilia's Day'), and 'But O! sad virgin' ('L'Allegro'). Pepusch's 'Alexis' was for long a favourite.

With the creation of the stringed quartet the violoncello gained the greater prominence, which is exemplified in the chamber music of Haydn and Boccherini. The latter master was himself a soloist of considerable ability; he played at the Concert Spirituel in Paris in 1768. Gluck is said to have been a violoncellist, but no predilection for the instrument appears in his works.

The true method of violoncello-playing was first worked out by the younger DUPORT (q.v.), and laid down in his famous *Essai sur le doigtier du violoncelle, et la conduite de l'archet*. Before Duport much confusion had existed in fingering and bowing the instrument; many players, it

¹ *Les Instruments à Archet*, vol. I. p. 327.

appears, endeavoured to get over the difficulties of the scales by fingering the violoncello like the violin, *i.e.* stopping whole tones with successive fingers, thus throwing the hand into a false position, and losing that *aplomb* which is indispensable alike to certainty of fingering and solidity of tone. Duport, recurring to the practice of the old viola da gamba players, laid down the principle that the true fingering was by semitones, only the first and second fingers being as a rule allowed to stretch a whole tone where necessary; and he overcame the inherent difficulties of the scales by dividing the positions into four so-called 'Fractions,' and by adopting a methodical system of shifting, the violin fingering being only retained in the higher 'thumb' positions, where the fingering is similar to the first position of the violin, the thumb acting as a movable nut. The *Essai* of Duport formed an epoch in violoncello-playing. The compliment of Voltaire to Duport, who visited him when at Geneva on a musical tour, aptly illustrates the change which was taking place in the treatment of the instrument. 'Monsieur,' he is reported to have said, 'vous me faites croire aux miracles: vous savez faire d'un bœuf un rossignol!'

In Germany Bernhard ROMBERG and STASŃŃY, contemporaries of Duport, worked upon his method, while Levasseur, Lamare, Norblin, Platel, Baudiot and others represented the school in France. The Italians were slower in the cultivation of the violoncello, and Burney in his *Tour* remarks that the Italian players retained the underhand grasp of the bow while elsewhere the overhand grasp, founded on that of the violin, was generally adopted. Since the time of Duport, the tendency of players and composers has been to make the violoncello more and more a bass violin, *i.e.* to assimilate its treatment more and more closely to that of the treble instrument. Merk, Franchomme, Kummer, and Dotzauer ranked among the best bravura players of their times, but the greatest master of the mid-nineteenth century was undoubtedly A. F. SERVais (*d.* 1866), under whose large and vigorous hand, says a critic, the violoncello vibrated with the facility of a kit: the staccato in single notes, in thirds, in octaves, all over the finger-board, even to the most acute tones, came out with irreproachable purity; there was never a hesitation or a doubtful note. He was an innovator in every sense of the word; never, before him, had the violoncello yielded such effects. His compositions will remain as one of the most marvellous monuments of the instrumental art of his time.¹ It is needless to catalogue here the names of the numerous fine players of the latter part of the century whose personal attainments are chronicled under their own names. That of Alfredo PIATTI (*q.v.*) must

be mentioned, since by his playing and his teaching he did a peculiar work for the propagation of the art in this country.

The violoncello affords less scope than the violin for displaying skill in bowing, the bow being shorter than that of the violin, though the instrument itself is very much larger; while the bowing is to some extent reversed, because in the violin the bow points in the downward direction of the scales, *i.e.* towards the lowest string, while in the violoncello, which is held in a reversed position, the bow points in the upward direction, towards the highest string. The rule of the old viola da gamba players, however—to bow strictly the reverse way to the violin, *i.e.* to begin the bar with an up-bow—is not applicable to the violoncello.

One small mechanical invention, the 'tail pin' now universally used to support the instrument, has had a far-reaching effect in the spread of violoncello-playing, particularly by making the instrument available for women. It is scarcely too much to say that without the aid of this simple appliance we should have been deprived of the many fine performances by women violoncellists which to-day are everywhere admired. May MUKLE (*q.v.*) was a pioneer of a movement in this country. Others who must be named are Beatrice HARRISON, and, perhaps most conspicuously, Guilhermina SUGGIA, who has inherited the traditions of her teacher, Casals. The adjustable 'tail pin' itself seems to have been first used by Servais as an aid, when age and physique made difficult the old method of holding the violoncello between the knees. Hausmann and some of his pupils refused its use, but the manifest freedom and ease of position which it secured for the player quickly assured its general adoption.

E. J. P.; REV. I. J.

With the advent of Pablo CASALS (*q.v.*) a new era may be said to have begun, and the violoncello took quite a different position among solo instruments. His art was such that the six suites for violoncello by Bach were revived and made to live—those who have had the privilege of hearing them played by him have realised at once not only what beauty there is in these works, and how wonderfully they are written for the instrument, but also what beauty there is in the instrument itself. The importance of Casals's art cannot perhaps yet be adequately gauged. In addition to the suites of Bach he revived the Haydn concerto, the Schumann concerto, the Dvořák concerto—(to mention only three important works) and a violoncellist aspiring to reach the front rank must now have all these works in his repertory—yet it is only as recently as the beginning of the 20th century that such things as fantasias on opera tunes were the chief resource in the repertory of the solo violoncellist. Again, what must be

¹ Vidal, *Instrumenta à archet*, vol. I. p. 371.

attributed to Casals's influence is evident in the interest contemporary composers are taking in this instrument, as many new works are being written—chiefly duet sonatas with piano, showing a greatly advanced knowledge of the possibilities of the violoncello in every register.

It is of interest to trace the evolution of modern violoncello-playing as shown by the influence of Casals. There are many good methods for beginners to study, such as those by Kummer, Lee, Piatti, etc., but in the more advanced stages it is undoubtedly from Duport and his school of technique that Casals has evolved the wonderful beauty of his art. Duport's *Essai* and his manner of fingering the violoncello are the germs from which the present-day players derive their inspiration, and it is through the Latin school rather than through the Teutonic that the violoncello has travelled to its present state.

Besides the *Essai* by Duport, there exists a very exhaustive technical treatise by Massau and more recently an exposition by Diran Alexanian of the principles which Casals not only revived, but to a great extent created.

The concertos of Romberg still serve their purpose, but apart from their usefulness as a means of study in giving extra technical control, the technique he invented was actually a *cul de sac*, and no musical progress has been made along those lines; other violoncellist composers, such as Davidoff, Goltermann and Klengel, have also written concertos and pieces which are important as a means of gaining more control in technique and tone, but of no musical value whatever. Popper was a violoncellist who wrote many light pieces which have served a useful purpose in helping players to acquire facility. The studies of Dotzauer are of the first importance, and he may be called the Czerny of the violoncello; excellent studies are also those by Franchomme, Kummer, Grutzmacher, de Swert and Piatti.

Piatti set in motion a valuable movement (which has resulted in a good deal of research into the work of the old virtuosi composers) by editing many of the works of Boccherini, Porpora, Valentini, Marcello; and this has been continued more recently by others, bringing within the reach of violoncellists many ancient solo sonatas, prominent among which are those by Sammartini, Eccles, Vivaldi, Marais and many more. This research has enriched the repertory of the violoncellist, and has provided at least the beginning of a musical library which has taken the place of the wretched operatic fantasias and other worthless arrangements so much the vogue in the latter part of the nineteenth century.

The first sonatas for piano and violoncello of any musical importance were those by Beethoven, who wrote five. Schumann, Chopin and Mendelssohn wrote sonatas or

pieces of fair interest; but the two sonatas of Brahms are next in musical importance to those of Beethoven. Effective sonatas have also been written by Rubinstein, Grieg, Saint-Saëns and Strauss, but their value musically is not great.

Recently many important contributions of the kind have come from such composers as Dohnányi, Hurlstone, Tovey, Emmanuel Moor, Ropartz, Huré, Debussy, Delius, Frank Bridge, John Ireland, Arnold Bax, and the concerto literature has been enriched by Delius and Elgar. A few works have also appeared for violoncello alone, such as the sonata in D major of Donald F. Tovey, three unaccompanied suites by Max Reger, and a sonata by Kodály.

A number of works have been written for more than one violoncello; Popper wrote a suite for two and a 'Requiem' for three violoncellos and piano; Emmanuel Moor has written a concerto for two violoncellos and orchestra, a suite for two and a quartet for four violoncellos, while Thomas F. Dunhill has written a suite for six violoncellos.

VIOLONE (1) See DOUBLE BASS. (2) An organ stop of 16-ft. pitch, with open pipes of smaller scale than those of the Open Diapason. Generally in the Pedal organ. W. P⁴.

VIOLONTA, see VIOLIN FAMILY (11).

VIOTTI, JEAN BAPTISTE (GIOVANNI BATTISTA) (b. Fontanetto, near Crescentino, Canton of Piedmont, May 23, 1753; d. London, Mar. 3, 1824), founder of the modern school of violin-playing. The baptismal certificate states that he was the 'legitimate son of Antonio Viotti and his wife Maria Magdalena, Milano,' and that he was baptized by Johannes Domenico Roseno, on June 25, 1753. Alphonso Barberis, a lawyer, was the godfather, and Antonia Maria, his wife, godmother. Viotti's father, says Fétis, was a blacksmith, who played the horn and taught his son the elements of music. In Viotti's autograph MS. summary of his life, entitled *Précis de la vie de J. B. Viotti, depuis son entrée dans le monde jusqu'au 6 mars, 1789* (a kind of *apologia pro vita sua*, written at Schönfeldz for the information of the British Consul at Teneriffe after his banishment from England in 1798, and now in the possession of the present writer), he refers to Lombardy as the 'home of his birth.' This bears out the statement of Viotti's biographers, Miel, Fétis and others, that he showed his aptitude for music at an early age, and at the age of 8 years took pleasure in playing on a small violin that had been purchased for him at a fair held at Crescentino.

When he was 11 years old, a roving lute-player named Giovannini, who was a good all-round musician, established himself at Fontanetto, and from him the boy received instruction. Unfortunately, this Giovannini was called away

at the end of a year's residence in Fontanetto, to take up a professorship at the Ivree Academy of Music. In the MS. autobiography (to which we shall have frequent recourse for the purposes of this article) Viotti makes no mention of any of his masters, but he confirms the statement that in 1766 he went to Turin for his studies and lodged at the house of the Prince of Cisterna. This happy aid to the development of Viotti's talent was really brought about by Francisco Rora, Bishop of Strambo, who afterwards became Bishop of Turin. The story goes that a flautist named Jean Pavia introduced the talented child to this patron, who took such a fancy to him that he gave him an introduction to the Marquis de Vogliera in Turin, who was seeking a *compagnon d'étude* for his son Alphonso del Pozzo, Prince of Cisterna, then 18 years of age. It seems that Viotti's youth went so much against him with the Prince when they met, that it was at first decided that the lad should return from whence he came. Fortunately Colognetti, a distinguished musician of the Chapel Royal, chanced to hear Viotti play a sonata of Besozzi at sight in a manner worthy of a professor. He complimented the lad, who replied simply that it was a small thing to do. This remark induced the Prince to set a difficult sonata by Ferrari before the intrepid young violinist, who executed it with such skill that Colognetti was charmed, and persuaded the Prince to reconsider his unfavourable decision. He lodged Viotti in his palace, sent him to study with Pugnani, who was then in his prime, and, according to Viotti's own statement, paid for 'an education that cost twenty thousand francs before it was completed.' No one knows who taught Viotti composition, but at the age of 14, whether with or without theoretical knowledge, he wrote his first concerto for the violin; the one in A minor, now published as No. 3. As soon as Viotti was sufficiently advanced to be heard in public Pugnani showed his affection for his pupil by taking him on tour with him. In his Autobiography Viotti himself makes no mention of his master being with him on this early tour. According to his own account the first place he visited was Geneva, in 1780. 'The encouragement I received,' says he,

'made me resolve to pursue my route. Already a little celebrity had preceded me at Berne; I did not retard my arrival there. I was received with all the kindness that I could desire, and the love of voyaging grew more and more upon me.'

It is of the period of this Geneva visit that most biographers recount the doubtful anecdote of Voltaire and Viotti. It seems that Voltaire, on hearing Viotti and Pugnani play together, was so struck with the contrast the elegant young man made standing by his grotesque-looking master (Pugnani had a huge nose, and was of an ungainly habit), that he

purposely mistook the pupil for the teacher and addressed all his eulogies to the former, calling him 'célèbre Pugnani.' From Switzerland Viotti states that he went to Dresden, where he was presented to the Elector, and thence to Berlin. Frederick the Great honoured Viotti with a hearing, and himself frequently played in concerted music with the violinist. In the same year (1780) Viotti left Germany and arrived at Warsaw, loaded with letters of introduction, and from thence to St. Petersburg, where the Prince Potemkin presented him to the Empress Catherine. About 1781 Viotti states that he left Russia, and after again visiting some of the northern cities, where he had been successful, he finally arrived in Paris, where he intended to pass a few months to allow himself to be heard in that great city. 'I delayed my departure from month to month, and year to year, and remained ten years.' He was first heard in Paris at a small private concert, and those who were present placed his playing above anything they had previously heard. It was on Mar. 15, 1782, that Viotti made his public début in the French capital at the Concert Spirituel. 'A true execution, a precise finish and an admirable quality of tone in the Adagio, have placed this artist amongst the greatest masters,' says the writer of the *Mémoires secrets pour servir à l'Histoire de la République*, under the date Mar. 13, 1782. On Mar. 24 the same authority announces that 'Viotti in a concerto on Sunday sustained the high reputation he had previously acquired in France.' According to an anecdote quoted in Ginguené's *Notice sur Piccini* (Paris, 1800, p. 144), Viotti was at one time leader of Prince Guéméné's band, and later 1st violin in the band of the Prince de Soubise. On Apr. 29, 1783, Viotti had a benefit concert at which he was assisted by Mlle. Buret and Mons. Legros. Madame Mara was announced to sing, but it is said that being jealous of the success Viotti had previously gained at her own benefit, she refused to appear at the last moment. In the following year (1783) Viotti's reputation as the greatest violinist of his day in France was firmly established. The *Mercure de France* became entirely convinced of the value of the artist, and records with unstinting praise how Viotti was received 'with triumphs of delight.' Yet the highest fee he received was 100 francs per concert, a sum that appears still more ridiculously small when contrasted with the 15,000 francs that Paganini was paid for each appearance but twenty years or so later. Curiously enough, Viotti, in the midst of adulation and success, suddenly ceased to appear at the Concert Spirituel. The precise reasons that decided Viotti to take this step have never been really discovered. Eymar (author of *Anecdotes sur Viotti*), who was his contem-

porary, and witnessed his triumphs, says that Viotti disdained public applause on account of its indiscriminate character. He refused the solicitations of people who moved in the highest society, and who wished to hear him, because he found so few among them who could see anything deeper than an artist's superficial qualities. Miel¹ says that Viotti's retirement was caused by the appearance of an inferior violinist who was applauded while Viotti was neglected. But this seems a doubtful solution of the mystery, as Pougin, after diligent research, has failed to find any account of this supposed rival. It was in 1784 that Marie Antoinette requested Viotti to play to her, 'and when I had determined,' says Viotti,

'to play no longer in public, and consecrate myself entirely to the service of this Sovereign, she in recompense obtained for me, during the time that Mons. de Calonne was Minister, a pension of 150 pounds sterling, though I had given up playing for some time.'

This consecration of his service to the Queen may perhaps explain Viotti's true motive in relinquishing his public appearances; in any case, it is certain that Viotti was very proud of his own talents, and much sickened by the artistic and social superficiality by which he was surrounded. But, for those who understood and loved true art, he was ever ready to play. When he was living with his great friend Cherubini, in 1785, at No. 8 Rue de la Michodière, all the musicians and violinists in Paris went to the musical auditions which were held at his house entirely on their behalf. In 1787 Viotti's 'Symphonies concertantes' for two violins were performed at the Concert Spirituel by his friends, Guerillot and Imbault, amidst great enthusiasm, and on Dec. 24 of the same year, his concerto for piano was played at these concerts by Mlle. Davion.

Although Viotti gave up his concert appearances, his name was ever before the public as an active factor in the world of music. In 1788 he was induced to join the Gascon, Léonard—Queen Marie Antoinette's skilful hairdresser, whose real name was Autier—in the management of the Théâtre de Monsieur, patronised by Monsieur le Comte de Provence, the King's brother. It was then ten years since Italian opera had been heard in Paris. Viotti with his high art ideals immediately conceived the plan of organising a superlative company of artists. Many celebrated names figured on the opera programmes, and the venture might have proved a success if it had not been for the Revolution. He writes:

'Having placed almost all I possessed in an enterprise for an Italian Theatre, what terrible fears assailed me at the approach of the terrible flood; what cares I had, and what arrangements I had to enter into before I could pull myself out of the difficulty.'

Yet in spite of the ominous atmosphere around

him Viotti refused to emigrate as others were doing, because he considered that

'A man should die at his post; for good sense always taught me that if honest men quitted their posts, the wicked gained an immense triumph.'

He donned the uniform of the National Guard, and followed the fortunes of the Théâtre de Monsieur, until 1791, when it was removed to the Rue Feydeau.

At last, on the eve of the arrest of the King and Queen, Viotti left Paris, and arrived in London on July 21 or 22, 1792. A year later, in July 1793, he revisited his native country on the death of his mother, so as to put in order his own affairs and those of his brothers, who were still children, and then turned his face towards Switzerland, Germany and Flanders, arriving in London once more at the end of December, firmly resolved never to leave it again. The decision against playing in public, to which Viotti had previously adhered so strictly, was broken in London. He was heard at nearly all Salomon's concerts in 1794 and in 1795, and began to take part in the direction of the King's Theatre, where Italian opera was being played; in addition, he came under the most beneficial influence that ever affected his life, the sincere friendship of Mr. and Mrs. Chinnery. On the retirement of Cramer, Viotti succeeded him as leader at the King's Theatre, and life for a few years flowed peacefully and evenly with the great violinist until 1798, when the King's officers informed him one evening, as he sat with his cherished friends, that he must at once leave England. He had fallen under suspicion of being in league with some of the Revolutionary leaders in Paris. He was accused of encouraging hostile schemes against the Directory, and was even publicly charged with using 'heinous and sanguinary expressions against the King.' No accusation could have been more ill-founded or unjust. The general trend of Viotti's life and habits gave the most unequivocal contradiction to his accusers. In reality the suspicions of his enemies rested on some letters Viotti had written to France 'in innocence, and freedom from any thought of harm.' He was compelled to leave England and remain in obscurity at a small place near Hamburg, named Schönfeldz, for nearly three years. During this period of enforced loneliness he spent much time in composition, wrote many letters to Mrs. Chinnery and her children, many of which are in the possession of the writer, and composed small pianoforte pieces for her daughter Caroline Chinnery. One of the great pleasures he had while in exile was in teaching the young violinist François Guillaume Pixis, who came and resided near him, entreating him to complete his education.

At length, in 1801, Viotti was allowed to

¹ *Bio. Michaud.*

return to England, where he found himself once again surrounded by friends. There is a certain amount of obscurity enveloping Viotti's doings at this period. He seems to have found difficulty in taking up his former position as an artist, and consequently, on the recommendation of Mrs. Chinnery, established himself as a wine merchant, a business in which he lost heavily. In 1802 Viotti revisited Paris, and allowed his fellow-artists there to hear the latest duos and trios he had written at Schönfeldz. Baillot, who heard him, speaks of him in terms of generous admiration, saying expressively that he had 'un archet de coton, dirigé par le bras de Hercule.' Before the end of the same year Viotti was back in London among his friends, and it was in the following year (1803) that Mme. Lebrun mentions in her *Mémoires* the delight she had experienced during a visit to Gilwell, in hearing the beautiful Mrs. Chinnery and Viotti play. It was at this time that she painted the celebrated portrait of Viotti now in the possession of the Greene family, who are descended from Mrs. Chinnery. From 1803, and many years following, Viotti's ever-increasing financial difficulties, in which his wine business had involved him, seem to have drawn him farther and farther away from his public career. In 1813 he, however, began to identify himself with musical enterprise once again. He was then living at 10 Charles Street, Mortimer Square,¹ and with all his fine instinct for the greatest aim in art, he took an active interest in the formation of the Philharmonic Society, which gave its first concert on Mar. 8, 1813. Viotti took a modest part in the orchestra (Salomon was leader), but that did not prevent him from conducting occasionally, and giving a quartet of his own composition at one of the concerts of the first year.

Still, his love of travel caused him to take frequent journeys to Paris. In 1814 he paid a visit there which was so hasty that the members of the Conservatoire never knew he was in the city until just upon the eve of his departure, yet, in spite of the short space of time left, Viotti's passionate admirer, Baillot, assembled a number of artists to hear his idol. Viotti appeared among the great musicians of the day 'like a father among his children.' At the end of a scene of great enthusiasm the climax was reached when Viotti embraced his close friend Cherubini before the assemblage. Four years later, at the moment when he was doubtless completely ruined by his unfortunate commercial enterprise, he grew anxious to remedy his fortunes in Paris, the scene of his former triumphs. Again he was the recipient of a touching artistic reception organised by Baillot, who states that Viotti's playing reduced many

of those present to tears. Aided by his old patron the Comte de Provence, who had mounted the throne of France as Louis XVIII., Viotti was at length appointed Director of the opera, but misfortune still dogged his efforts. A year after his nomination, the opera-house became the scene of the assassination of the King's nephew, the Duc de Berry, on Feb. 13, 1820, and in consequence closed its doors to a public that ever after shunned the ill-starred building. Consequently, Italian opera was forced to find a new home at the Théâtre Favart, and, as these premises proved unsatisfactory, changed its quarters again to the Théâtre Louvois. All these changes were a most serious misfortune to the manager, whose financial position, according to a letter written by Viotti to the Baron de Ferté, was far from satisfactory. In this letter, dated Jan. 27, 1821, poor Viotti pleads for some furniture to be sent him—as after an absence of twenty-nine years—he finds himself without household effects, and without the means of obtaining any. Viotti's connexion with the opera was a period of disenchantment and mortification. All Viotti's great gifts were powerless against the blows of adverse fate. At last, in the spring of 1822, Viotti, worn out with the failure of his theatrical enterprises, returned to London. His health began to fail seriously. Year by year he grew feebler, until at last he fell into a decline and died on Mar. 3, 1824, at Mrs. Caroline Chinnery's house, No. 5 Berkeley Street, Portman Square, at 7 o'clock in the morning.² A great deal of painstaking research has failed to elucidate the mystery of his burial-place, but it is believed to have been St. Pancras cemetery. In Viotti's will (now in the possession of the present writer) dated Paris, Mar. 13, 1822, the story of his losses is pathetically unfolded. In it he states that he dies without fortune. He dedicates his last wishes to his friends Gustave Gasslar, living at 17 Boulevard Poissonnière; and Guillaume Chinnery, living at Havre, and in default of him to George Fobert Chinnery. He cries out that his soul is torn to pieces in the agony of feeling that he dies in debt to Madame Chinnery née Tresilian, to the amount of twenty-four thousand francs, which she lent him to assist him in his wine business.

'If I die before I can pay off this debt, I pray that everything I have in the world may be sold off, realised, and sent to Madame Chinnery, or her heirs, praying only that they shall pay to my brother, André Viotti, the sum of 800 francs, that I owe him.'

He desired that his friends should reserve nothing for his burial; 'a little earth will suffice for such a miserable creature as myself.' He mentions two manuscript concertos among his belongings, and two violins; a 'Clotz' belonging to Mrs. Chinnery, and a Stradivarius,³ which

² *Vide Viotti*, by Van der Straeten, in *Die Musik*, June 1902.

¹ *Vide* seven letters from H.R.H. Adolphus Frederick, Duke of Cambridge, to Viotti, in the possession of the present writer.

³ An interesting account of Viotti's most celebrated instrument, a superb Stradivarius (but whether the one referred to in his will we do not know), now in the possession of W. E. Hill & Sons, is to be found in their monumental work upon Stradivari.

he considered should realise a large sum. Two gold snuff-boxes, and a gold watch—all of which are bequeathed to Mrs. Chinnery—complete his list of valuable possessions.

Physically and mentally, nature was bountiful to Viotti. His head was grand and powerful, his face—though lacking in perfect regularity of feature—was expressive, amiable and radiant; his figure was well-proportioned and graceful; his manners were distinguished, his conversation animated and polished, and he had a wonderful knack of telling a story so that the incident lived again in the telling. In spite of the decadent atmosphere in which he lived at the court of France, Viotti never lost his fresh kindness, or frank fearlessness of disposition.

As a violinist, Viotti was undoubtedly not only the greatest classical player of his day, but the founder and originator of the modern school of classical violin-playing. Pugnani instilled into his pupil the traditions of the grand Italian school founded by Corelli, but, outside of his teaching, the classic style was inbred in Viotti. He played with a simple dignity that commanded instant attention. There was something so grand, so inspiring, in his playing, says Miel, that even the cleverest artists shrank in his presence, and became mediocre. The same nobility reveals itself in Viotti's compositions, which, if they lack striking originality, are filled with the dignity of fine ideals; in them he shows how thoroughly Tartini's maxim, *Per ben suonare, bisogna ben cantare*, appealed to him. Finally, Viotti was one of the first to compose violin concertos that drew fully upon the resources of the accompanying orchestra. The following were among his pupils: Rode, Pixis, Alday, Vacher, Cartier, Labarre, Libon, Mori, Pinto and Roberrechts.

COMPOSITIONS.—Twenty-nine concertos for violin and orchestra. Two sets of six Sonatas for violin and piano; two *Symphonies Concertantes* for two principal violins, two violas, alto, bass, horn and handbells ad lib.; three *Diverissemens*, for violin alone, dedicated to his friend L. Dupot; three popular airs for violin and piano, *Les Trois Fermiers*, *Au bord d'une fontaine*, and *Marlbrough*; Four books, each containing six duos for two violins; Ten books, each containing three duos for two violins. Six Serenades for two violins. One book containing six trios for two violins and bass. Ten books of three trios for two violins and bass. Seven books of string quartets. A set of six string quartets founded on popular airs. Ten concertos for the pianoforte. Three books containing three sonatas each for the pianoforte. Three *Diverissemens* for the violoncello with pianoforte accompaniment. Three duos for two violoncellos (transcription of violin duets, op. 6). Two books of duos for two violoncellos. Songs: *La Polacca de Viotti*, *Air de la Casa Rara*, with accompaniment for pianoforte or harp. (This was sung in Martini's Opera of that name at the Théâtre Feytaud, 1791.) *Air de la Paroissienne en Espagne* (this, according to M. Pougin, was another air of Viotti's that was inserted in a dramatic composition of that name).

BIBLIOGRAPHY.—MSS. Documents relating to Viotti in the author's possession: *Précis de la Vie de J. B. Viotti*, depuis son entrée dans le monde jusqu'en 6 mars, 1798. Donné à Hambourg à Mons. Coleman Macgregor, Consul Britannique à Ténériffe. Viotti's will, dated Paris, Dec. 13, 1822. Letters from Viotti to Miss Caroline Chinnery, Walter Chinnery, Monsieur le Baron de Ferté, and Mons. L. Jadin. The description by himself of the origin of the "Ranz des Vaches" written out by him for Mrs. Chinnery. Seven letters from H.R.H. Adolphus Frederick, Duke of Cambridge, to Viotti.

PORTRAITS OF VIOTTI.—A portrait of Viotti painted by Trossarelli in London and engraved by Meyer is considered by Miel to be the best likeness. This was also lithographed by Peyre and published in 1843 by Mme. Yeuve Lanner. A portrait by Mme. Lebrun. A portrait of Viotti engraved by Lambert from the original of P. Guérin which formerly belonged to M. Cartier faces the title-page of Fayolle's *Notices sur Tartini*, and a bust portrait lithographed by Maurin appeared in the *Galerie des Musiciens célèbres*, published by Fétis. An excellent portrait faces the six duos concertantes pour deux violins, composed by Viotti, and dedicated to Mr. and Madame Chinnery, written and published during his exile. The sculptor Platters executed a bust of Viotti in 1813. The writer possesses a series of seven small portraits of Viotti sent to him by Mr. Julian Marshall, drawn from life by a member of his orchestra in Paris.

E. H.-A.

VIRCHI, PAOLO (b. Brescia; d. ? Mantua, c. 1610), organist at Brescia, 1570; at the courts of Modena and Ferrara from about 1584-1591, and finally at Mantua, where he was appointed to the church of S. Barbara. He was also a famous chitarrone player, for which instrument he wrote a book of *ricercari*, madrigali, etc., in tablature (1584), and composed 2 books of madrigals 5 v. (1584, 1588), and 1 book of madrigals 6 v. (1591).

VIRDUNG, SEBASTIAN, author of the oldest work describing the precursors of modern musical instruments. It is entitled

'Musica getutscht und ausgezogen durch Sebastianum Virdung Pfisters von Amberg und alles gesang aus den noten in die tablaturen dieser benannten dryer instrumenten der Orgeln: der Lauten: und den Flöten transferieren zu lernen. Künzlich gemacht zu eren dem hochwürldigen hoch gebornen fürsten und herren: herr Wihlhelm Blischevo zum Straszburg seynem gnädigen herren.'

We read in the dedication that the Bishop in 1510 had required of Virdung that he should send to him the 'Gedicht der deutschen Musica.' Virdung replied that on account of the great cost he had decided to postpone printing the great work, but to pacify the Bishop and his own friend Andreas Sylvanus, he sends this present extract, in which the latter appears as the interlocutor. The place of publication is Basle; the date 1511. The work, which is written in dialogue, begins with a description of the keyboard instruments; then follow the others in use at the time. He describes the keyboard, the organ and clavichord, concluding with the tablature of those instruments and of the lute and flute.

The woodcuts, taken in their order, will best briefly indicate the nature of the book. The clavichordium is the clavichord 'gebunden,' or fretted, as is obvious from the twisted keys, and he explains this peculiarity in the text. It shows its monochord origin by the strings being all of the same length. The sound-board is very narrow. The virginal is an instrument of the same oblong form, but has a triangular scale of stringing, by an error of the engraver turned the wrong way (an error repeated by Agricola, Luscinius and Rimbault). The sound-board, psaltery-wise, covers the interior. The compass of keyboard of both these instruments is three octaves and a note from the bass clef-note *f* to *g'''*, the lowest *f* being omitted; but

Virdung goes on to say that the compass had already, in 1511, been extended by repeating the lowest octave, that is, descending to F below the bass clef. The clavicimbalum is like the virginal, but with different compass (the organ short octave), apparently from B \flat in the bass clef to d''' ; but the B, we believe, sounded G. (See SHORT OCTAVE; SPINET; VIRGINAL.) This is the 'clavicimbanum' of Sagudino, on which he tells us little Mary Tudor played: the Italian *spinetta*; French *espinette*. The claviciterium is figured as an upright virginal, with the same keyboard; but the keyboards of all these instruments and the organs also are inverted in the printing. Virdung says it has jacks ('federkille') like a virginal, but catgut strings. It was, he says, newly invented; he had only seen one. This is the only early reference we have anywhere met with to the clavicitherium. Rimbault's early dates for it in his *History of Music* and the chronological order of keyboard instruments, are alike without foundation and misleading; and further to confuse matters, he has been deceived by a blunder in Luscinius, the Latin translator (1536) of Virdung, by which the horizontal clavicimbalum appears as the claviciterium, and *vice versa*. Count Correr's interesting upright virginal, or spinetta, to be ascribed to the last years of the 15th century, shown in the Loan Collection of the International Inventions Exhibition, 1885, and now in the Victoria and Albert Museum, has Virdung's compass, but adds the bass E and F \sharp , which we assume to represent C and D short octave. Virdung appears to know nothing about the harpsichord or later clavicembalo, yet there is a fine and authentic specimen of this two-unisons instrument, dated 1521, of Roman make, in South Kensington Museum. Virdung's lyra is the hurdy gurdy. His lute has 11 strings, 5 pairs and chanterelle, 6 notes; his quintern, or treble lute, 10 strings, or 5 notes. The Gross Geigen is a bass viol with the bridge omitted by the draughtsman. The Harffen is the regular mediæval David's harp, such as John Egan was still making in Dublin as a revival or fancy instrument from 1803 to 1839. The Psalterium is a triangular small harp strung across. The Hackbrett shows the common dulcimer. The 'Clein' Geigen is a small viol; the Trumscheit, or Tromba Marina a kind of bowed monochord. The last-named instruments being without frets Virdung regards as useless. The wind instruments follow: — Schalmei, Bombardt (oboes), Schwegel, Zwerchpfeiff (German flute), Flöten (set of flauti dolci or recorders), Ruspzpeiff, Krumhorn, Hemsen horn, Zincken (ancient cornets), Platerspil, Krumhörner (set of Cromones, the origin of the 'Cremona' in the modern organ), Sackpfeiff (bag-pipes), Busaun (trombone), Felttrunet (cavalry trumpet), Clareta (clarion), Thurner horn (a kind of French horn). The

organs are Orgel (with 3 divisions of pipes), Positive (a chamber organ), Regale (a reed organ) and Portative (pipe regal), with, as we have said, short-octave compass like the clavicimbalum, the keyboards being reversed in the printing. The organ and portative end at g' instead of d''' . Lastly are Ampos, Zymeln und Glocken (anvil and various bells, Virdung appearing to believe in the anvil myth). He has trusted to his own or another's imagination in reproducing St. Jerome's instruments, only the drums and perhaps psalteries being feasible. His keyboards come next, and are evidently trustworthy. His diagram of the diatonic keyboard, with two Bys only, agreeing with Guido's hand, is the only evidence we are acquainted with for this disposition of the clavicord with twenty natural and two raised keys, which Virdung says lasted long. The latter part of the book is occupied with the Tablatures. His lute rules meet with objections from Arnold Schlick the younger, *Tabulatur etlicher Lobgesänge* (Mentz, 1512). Mendel's *Lexicon* says that copies of Virdung's book are only to be found in the Berlin and Vienna Libraries. However, the late Alfred Littleton owned an original copy, and another is in the library of J. C. Matthew. A facsimile reproduction of 200 copies was brought out in 1882 at Berlin, edited by Robert Eitner, being the eleventh volume published for the Gesellschaft für Musikforschung, who had previously published Arnold Schlick's 'Spiegel der Orgelmacher,' also of 1511, and referred to by Virdung.

Mendel further says there are at Munich four 4-part German songs by Virdung in the rare collection of Peter Schoeffer (Mentz, 1513). They are numbered 48, 49, 52 and 54.

A. J. H.

VIRGIL PRACTICE CLAVIER, THE, an American invention, produced in a rudimentary form in 1872, under the name of 'Techniphone.' It was patented by Almon Kincaid Virgil in 1892, as the 'Practice Clavier,' and was brought to England in 1895, when the inventor gave a practical demonstration, on May 25, in the small Queen's Hall. A 'Virgil Clavier School' was subsequently established in London at 12 Princes Street, Hanover Square. The instrument is in the form of a small piano, having nearly the full compass of the keyboard. The keys are dumb (the pressure being regulated as in the DIGITORIUM (*q.v.*)), but the special property of the contrivance is that any inequality of touch in legato playing can be easily corrected. The key can be made to produce a little 'click' as it descends, and another 'click' as it ascends (both sets of clicks can be used, or caused to cease, at discretion), so that a perfect legato touch can be produced by almost mechanical means, for when the click of the rising key coincides exactly with that of the falling key

it is manifest that on an ordinary piano the passage from one note to the other would be perfectly smooth.

M.

VIRGINAL or VIRGINALS (Fr. *clavecin rectangulaire*). Virdung (*Musica getuscht und ausgezogen*; Basel, 1511) is the oldest authority we can cite who describes this keyboard instrument. His woodcut of it shows a rectangular or oblong spinet, which agrees in form with what we are told of the spinetta of 1503, said by Banchieri (*Conclusione nel suono dell' organo*; Bologna, 1608) to have been the invention of the Venetian Spinetti. Banchieri derives the name 'spinetta' from this maker; in later Italian the oblong SPINET (*q.v.*), which is the same as Virdung's virginal, is called 'spinetta tavola.' Virdung's virginal is, in fact, of the same shape as his clavichord, and has the same arrangement of keyboard (from the bass clef note F), but the sound-board of the virginal is derived from the psaltery plectrum, while the tangent of the clavichord comes from the monochord bridge. Virdung confesses he knows nothing of the invention of either, by whom or where. The 'proverb' quoted by Rimbault,¹ as formerly inscribed on a wall of the Manor House of Leckington, Yorkshire, is of the time of Henry VIII. (c. 1518), and contains a reference to the virginal of the period. This proverb reads:

'A slac stryng in a Virginal soundithe not aright,
It doth abide no wrestinge it is so loose and light;
The sound-borde crasede, forsoith the instrumente,
Throw misgovernance, to make notes which was not
his intente.'

According to Praetorius, who wrote early in the 17th century, virginal was then the name of the quadrangular spinet in England and in the Netherlands. In John Minshen's *Ductor in Linguas*, 1617, against 'Virginals' we read,

'Instrumentum Musicum propriè Virginum . . . so called because virgins and maidens play on them. Latin, Clavicymbalum, Cymbaleum Virgineum.'

Other lexicographers follow. Most to the purpose is Blount, *Glossographia*, 1656:

'Virginal (virginalis), maidenly, virginlike, hence the name of that musical instrument called Virginals, because maids and virgins do most commonly play on them.'

But another reason may be given for the name; that keyed stringed instruments were used to accompany the hymn 'Angelus ad Virginem,' as similar instruments without keys, the psaltery, for instance, had been before them. (See Chaucer's *Miller's Tale*.) From Henry VII.'s time to nearly the close of the 17th century, 'Virginal' in England included all quilled keyboard instruments, the harpsichord and trapeze-shaped spinet, as well as the rectangular virginal of Virdung and Praetorius.

¹ Rimbault's *History of the Pianoforte*. The house is destroyed, but the inscriptions are preserved in a MS. at the British Museum.

For instance, in the *Privy Purse Expenses of Henry the Eighth*² there is an entry:

'1580 (April) Item the vii dayes paid to William Lewes for ii payer of Virginals in one coffer with liii stoppes, brought to Grenwiche iii li . . . and for a little payer of Virginals brought to the More, etc.'

This two pair of virginals in one case with four stops looks very like a double harpsichord. Again, in the inventory³ of the same king's musical instruments, compiled by Philip Van Wilder (*q.v.*), 'a payre of new long virginals made harp fashion of Cipres,⁴ with keys of Ivory, etc.' Still later, in 1638, from 'Original unpublished papers illustrative of the life of Sir Peter Rubens' (London, 1859), we find a correspondence between Sir F. Windebanck, private secretary to Charles I., and the painter Gerbier, relating to a Ruckers 'virginal' the latter had undertaken to procure:

'C'est une double queue ainsi nommée [i.e. 'virginal'] ayant quatre registres et le clavier placé au bout.'

There can be no doubt about either of these; although called virginals, they were at the same time also harpsichords. Huyghens⁵ shows how invariably the clavicimbal or espinette was 'virginal' in England. Henry VIII. played well, according to contemporary authority, on the virginal, and he had a virginal player attached to the court, one John Heywood, who died at Mechlin about 1565.⁶ The same Heywood was one of Edward VI.'s three virginals players. Mary, Elizabeth, and James I. retained as many. Queen Mary is said to have equalled, if not surpassed, Queen Elizabeth in music, playing the regals and lute, as well as the virginals. One Cowts used to repair her virginals.⁷ The first engraved music for this tribe of instruments, including harpsichords, was 'PARTHENIA, the first musick that ever was printed for the Virginals'; London, 1611. After the restoration of the Stuarts, we find, in different publications for the harpsichord and virginal, the instruments clearly separated.

John Playford, in *Musick's Handmaid*, distinguishes them, and in 1672, *Introduction to the skill of Musick*, names Mr. Stephen Keen as a maker of 'Harpsycons and Virginals.' John Loosemore, Adam Leversidge, and Thomas White appear to have been at that time foremost English makers; they adopted the Italian coffer-shaped instrument, combining with it Flemish fashions in painting.

² Sir N. H. Nicholas, editor; London, 1827.

³ MS. in the British Museum.

⁴ A fine virginal in Cipres temp. Henry VIII. is in the possession of Miss Margaret Glynn. E. J. H.

⁵ *Correspondance*, Jonkbloet et Land; Leyden, 1882.

⁶ W. H. J. Weale owns a medal struck for Michael Mercator of Venloo in 1589. An engraving of this medal is to be seen in the index to *Musical Instruments, Historic, Rare and Unique*, by A. J. Hipkins. The virginal referred to—now in the Victoria and Albert Museum—is shown in the same book. Mercator (b. 1491; d. 1544) was maker of virginals to Floris d'Emont, Cardinal Wolsey, and Henry VIII.

⁷ *Privy Purse Expenses of the Princess Mary*, ed. Sir F. Madden; London, 1831.

Pepys, describing (Sept. 2, 1666) the flight of the citizens at the time of the Great Fire, says:

'I observed that hardly one lighter or boat in three that had the goods of a house in, but there was a pair of virginals in it.'

The plural, or rather dual, in organs, regals, virginals, with the following 'pair,' signifies a graduation or sequence, as nowadays 'a pair of stairs.' In spite of the interesting statement of Pepys the destruction of virginals by this terrible catastrophe must have been very great, for very few musical instruments are found in this country anterior in date to the Great Fire. In Queen Anne's reign we hear no more of the virginal; the 'spinet' is the favourite domestic instrument.

'Queen Elizabeth's Virginal,' which bears her royal arms and was the property of the Gresley family,¹ is really a pentagonal spinet, evidently of Italian make.

Notwithstanding the statement of Prætorius, we have not found the name virginal common

in the Netherlands. The 'Clavecin Rectangulaire' is 'Vierkante Clavisimbal.' The RUCKERS (*q.v.*), as well as other Antwerp makers, made these oblong instruments and so called them.²

A. J. H.

A LIST OF ENGLISH VIRGINALS OF THE 17TH CENTURY KNOWN AS STILL EXISTING (1926)

The instruments are all of rectangular coffer-shape and, except in one instance (No. 3), with domed or slightly convex lids, painted within. The case is of oak, decorated with embossed pasteboard gilt, and is one with the instrument: the sound-board generally has as sound-holes one or more ornamental 'roses' and is painted in tempera with designs of flowers, fruits, birds, etc., after the style of the Flemish harpsichords. The fronts of the natural keys are usually gilded. In several examples the original stand of oak, on which the instrument rests, is preserved, and the brass strapwork of the hinges in the later specimens is very fine.

No.	Date.	Maker's Name.	Length and Width of Case.	Compass.	Details.	Present Owner.
1	1641	GABRIELL TOWNSEND .	5' 9½" × 1' 9½"	C-e''' (53 keys)	No stand: boxwood naturals, ebony sharps. Lid painting: Orpheus and the animals: bears the Plantagenet Royal Arms with E.R., having probably been made for Elizabeth, Queen of Bohemia and daughter of James I. Illustrated in the Dictionary of English Furniture (<i>Country Life</i>), 1927.	Conservatoire de Musique, Brussels.
2	1651	THOMAS WHITE .	5' 6" × 1' 8"	B-a''' (52 keys)	No stand: boxwood naturals, ebony sharps. The monograms of the clavier signs are marked on the F, C and G keys: also G gamut. Short octave from G. Lid painting: landscape with river and castle. Illustrated in <i>Old English Instruments of Music</i> (Galigni), 1911. (See note (a).)	The York Philosophical Society.
3	1653	THOMAS WHITE .	5' 6" × 1' 8½"	C-e''' (49 keys)	Stand not original: boxwood naturals, brown wood sharps inlaid with ivory. Flat lid with painting: Orpheus and the animals. Over the keyboard 'Mary Byard' a former owner's name. Exhibited at South Kensington, 1872, by the late Mr. S. H. Gell of Nottingham.	The Duke of Devonshire at Hardwick Hall.
4	1655	JOHN LOOSEMORE .	5' 8½" × 1' 8½"	C-a''' (51 keys)	Original stand: boxwood naturals, ebony sharps. Lid painting: Adam and Eve with a hunting scene and sea fight. Illustrated on <i>PLATE LXXXIX</i> . (See note (b).)	Victoria and Albert Museum, South Kensington.
5	1658	JAMES WHITE .	5' 5½" × 1' 8½"	B-e''' (50 keys)	Stand not original: boxwood naturals, light wood sharps inlaid with ivory. Short octave from G. The embossed pasteboard has the Plantagenet Royal Arms frequently repeated in its designs. Lid painting: hunting scene. Exhibited at the Inventions Exhibition, South Kensington, 1885.	Mr. R. Temple Bourne, Clifton.
6	1664	THOMAS WHITE .	5' 6" × 1' 9½"	B-f''' (55 keys)	Original stand with four turned legs: boxwood naturals, ebony sharps inlaid with ivory. Short octave from G. Lid painting: Orpheus and the animals (see No. 3). Once the property of G. Kendrick Pyne and illustrated in the Bodding Collection Catalogue, 1888.	The Hon. F. G. Wynn, Llanwnda, North Wales.
7	1666	ADAM LEVERIDGE .	5' 2" × 1' 8"	B-g''' (52 keys)	Original stand with turned legs and stretchers: boxwood naturals, ebony sharps. Short octave from G. Lid painting: The Mall, St. James's Park. Said to have belonged to Nell Gwyn. Illustrated in the Catalogue of the Musicians Company's Exhibition, Fishmonger's Hall (Novello), 1909. Former owners: Dr. Rimbault, Messrs. Chappell, W. A. F. Hill. (See note (c).)	Miss B. Skinner, Springfield, Mass., U.S.A.

(a) Rimbault (*The Piano-forte*, p. 397) gives the following details of this maker from the obituary of Richard Smyth (Camden Society, 1848): 1660, Janus. 5. Tho. White, virginal maker in Old Jury, buried.

1665, Septem. 2. Mary White, ye relict of Thom. White, virginal maker, my late tenant in Old Jury, buried *ex pestis*. From the inscription on No. 6 of the above list it is evident that the widow continued the business in her husband's name after his death. James White may have been a son or brother, but the virginal No. 5 came from Teesdale. It is possible that he succeeded Townsend and used his embossed pasteboard, omitting E.R.

(b) John Loosemore (1618-81) was also an eminent organ-builder: In 1695 he erected the famous organ at Exeter Cathedral. See Hopkins and Rimbault (*The Organ*, p. 61). A large Regal, probably by him, is figured on *PLATE LXV*.

(c) Adam Leversidge was a London maker as shown by the choice of his lid paintings.

¹ Now in Victoria and Albert Museum, South Kensington. The badge or arms of the Queen Mother (Anne Boleyn), a dove holding a sceptre, is found on the right-hand side.

B. J. H.

ENGLISH VIRGINAL BY JOHN LOOSEMORE, 1655
Victoria and Albert Museum, South Kensington.

No.	Date.	Maker's Name.	Length and Width of Case.	Compass.	Details.	Present Owner.
8	1668	STEPHEN KEENE	5' 11 $\frac{1}{2}$ " x 1' 9 $\frac{1}{2}$ "	F-a''' (57 keys)	No stand: dark redwood naturals, ivory sharps with ebony slip. Lowest F# key omitted. Lid painting: park scene with house and lake, probably St. James's Park. (See note (d).)	Mr. H. C. Moffatt, Goodrich Court, Ross.
9	1670	ADAM LEVERSIDGE	5' 7 $\frac{1}{2}$ " x 1' 9 $\frac{1}{2}$ "	B-f''' (55 keys)	Stand as in No. 7: boxwood naturals, ebony sharps. Short octave from G.. Lid painting: The Mall. Illustrated in the Dictionary of English Furniture (<i>Country Life</i>), 1927.	Mr. Arthur F. Hill, London.
10	1671	PHILIP JONES	5' 9" x 1' 10"	B-f''' (55 keys)	No stand: dark redwood naturals, ebony sharps. Short octave from G.. Lid painting: park scene with house and lake (St. James's Park?). Exhibited at the Inventions Exhibition, 1885, by Lord de Tabley. Illustrated in a painting by J. Fulleylove, 'A 17th Century Virginal.'	Mr. Leicester Warren, Tabley Hall, Knutsford.
11	1675	CHARLES REWALLIN	5' 4 $\frac{1}{2}$ " x 1' 9"	B-d''' (52 keys)	Original stand: boxwood naturals, black walnut sharps. Short octave from G.. Lid painting: landscape with tower and bridge. Formerly belonged to Arthur Hull, Chard: illustrated in the <i>Connoisseur</i> 1916. (See note (e).)	Somerset County Museum, Taunton.
12	—	[CHARLES HAWARD?]	5' 9 $\frac{1}{2}$ " x 1' 7 $\frac{1}{2}$ "	B-f''' (55 keys)	No stand, and name and date board missing: ebony naturals, ivory sharps: the keys alphabetically lettered in accordance with Haward's custom (see <i>Spinet</i>). Lid painting: a garden scene with musicians. Motto upon the jack rail, 'Musica dei donum.' (See note (f).)	Municipal Museum, Warrington.

(d) The name of Stephen Keene—possibly father and son—was from 1668–1719. Playford (*Introduction to the Skill of Music*, 1671) informs us 'Mr. Stephen Keen, maker of harpaycons and virginals, dwelleth now in Threadneedle Street at the sign of the Virginal, who maketh them exactly good, both for sound and substance.' The compass of this virginal is unusual, but the keyboard appears to be original.

(e) Charles Rewallin was married in Exeter Cathedral, 1657, and died in that city in 1697. See Art. G. H. St. George Gray in *The Connoisseur*, Oct. 1916.

(f) Charles Haward (Hayward) lived in Aldgate Street, London, and was patronised by Samuel Pepys, who bought of him a small spinet in 1668.

In addition to the names of 17th-century makers above mentioned the writer has been informed by Mr. Arthur Hill—to whom, as to his many other correspondents, he is much indebted—that in 1906 Mr. Hill inspected a coffer-shaped virginal in poor condition bearing the name Roberthus Hatley. At that time it apparently belonged to a Mr. Parkyn, a dealer in Cromer Street, Gray's Inn Road, London. About the year 1915 a similar instrument—also in poor condition—was seen at Bushey, being the property of a lady. In both cases the writer has failed to discover their present existence or ownership. In Scotland John Davidson and Alexander ADAM appear as virginal makers in 1652 and 1659: possibly their instruments were similar to those then made in England, but the name was often loosely applied to harpsichord and spinets.

F. W. G.

VIRGINAL MUSIC, COLLECTIONS OF.

(1) FITZWILLIAM VIRGINAL BOOK.—The most remarkable, and in many respects the most valuable collection of English 17th-century instrumental music is that contained in the volume known in the 19th century by the misleading name of 'Queen Elizabeth's Virginal Book,' and now called the 'Fitzwilliam Virginal Book.' This book, which is preserved in the Fitzwilliam Museum at Cambridge, is a small folio volume containing 220 folios of paper ruled by hand for music in 6-line staves, 209 of which are filled with music written in a small but distinct handwriting. The volume measures 33 $\frac{3}{8}$ centimetres in height by 22 centimetres in breadth, and the binding (a

fine specimen of English 17th-century workmanship) is of crimson morocco, enriched with beautiful gold tooling, the sides being sprinkled with fleurs-de-lis. The water-mark on the paper is a crozier-case, measuring 4 $\frac{1}{2}$ inches in height and 2 $\frac{1}{2}$ inches in its widest part. It is possible that this mark indicates that the paper was manufactured at Basle, as the arms of that town are similar to it. The manuscript has in places been cut by the binder, but the binding is probably not of later date than the bulk of the book. Nothing is known of the history of the volume before the early part of the 18th century, when it was first noticed as being in the possession of Dr. Pepusch, but there is sufficient evidence to prove that it can never have belonged, as was generally supposed, to Queen Elizabeth, a statement for which Hawkins seems to be responsible. The whole of the manuscript is in one handwriting; in many cases the compositions it contains bear the dates at which they were composed, and these dates (as will be seen from the list printed below) are in no sort of chronological order. The latest dated composition contained in the collection is an 'Ut, re, mi, fa, sol, la, a 4 voci,' by the Amsterdam organist Jehan Peterson Sweelinck (1562–1621), which occurs on page 216 [ii. p. 26],¹ and bears the date 1612, nine years after the death of Queen Elizabeth, to whom the book is said to have belonged. But there is another piece in the volume which was held to prove that the collection must have been written even later

¹ The references in square brackets are to the printed edition of the 'Fitzwilliam Virginal Book,' edited by J. A. Fuller Maitland and W. Barclay Squire.

than this. At page 255 [ii. p. 128] is a short composition by Dr. John Bull, entitled 'D. Bull's Juell' (i.e. 'Dr. Bull's Jewel'). Another setting of the same tune occurs on folio 49b of a manuscript collection of Bull's instrumental music in B.M. Add. MSS. 23,623, which is particularly valuable as containing the dates at which most of the compositions were written, and this copy bears the inscription 'Het Juwel van Doctor Jan Bull quod fecit anno 1621. December.'

Chappell, at the beginning of his work on the *Popular Music of the Olden Time*¹ (p. xv) surmises that this collection may have been made for, or by, an English resident in the Netherlands, and that Dr. Pepusch obtained it in that country. This conjecture he founds upon the fact that the only name which occurs in an abbreviated form throughout the book is that of Tregian, and that a sonnet signed 'Fr. Tregian' is prefixed to Verstegan's *Restitution of Decayed Intelligence*, which was published at Antwerp in 1605. The abbreviated name occurs as follows: at p. 111 [i. p. 226] is a composition of William Byrd's headed 'Treg. Ground'; at p. 152 [i. p. 321] is a 'Pavana Dolorosa. Treg.,' set by Peter Philips and dated 1593; at p. 196 [i. p. 415] is a short piece entitled 'Heaven and Earth,' to which no composer's name is given besides the syllable 'Tre' (possibly a contraction of 'F. Tregian'); and at p. 297 [ii. p. 237] in the margin, the initials 'F. Tr.' are written against the first line of a jig by William Byrd; on p. 315 [ii. p. 278] 'Mrs. Katherin Tregian's Pauen' is written in the margin against a Pavana Chromatica by William Tisdall. These few clues certainly point to some connexion of the volume with the Tregian family, and it so happens that the history of at least two individuals of the name of F. Tregian is known with a considerable degree of certainty.²

It is now known that the connexion of the Tregian family with the Netherlands was even closer than Chappell suspected, but it was impossible that the Virginal book could have been written by the elder Francis Tregian, who

(according to Oliver) was the author of the sonnet prefixed to Verstegan's work. Whoever the actual scribe was, the series of dated pieces by Peter Philips (pp. 134-165 [i. 280-346]), who was an English Catholic ecclesiastic settled in the Netherlands, and possibly a connexion of Morgan Philips, one of the first Professors of the Douay College, the note (p. 284 [ii. 204]) to the Pavana of Byrd's (who was all his life a Catholic),³ the heading of the jig (p. 306 [ii. 257]), 'Doctor Bull's myself' (Bull went to Holland in 1613), all point to the conclusion that the collection was formed by some one who was intimate with the Roman Catholic refugees of the period, while the probable connexion of the book with the Tregian family lends to it a value beyond that of its musical contents.

The earliest account of this collection of virginal music occurs in the Life of Dr. John Bull in Ward's *Lives of the Gresham Professors* (1740), in which is printed a list of Bull's compositions contained in it. Ward states that his information was derived from Dr. Pepusch, who communicated the contents of the volume to him, describing it as 'a large folio neatly written, bound in red Turkey leather, and gilt.' In this no mention is made of the book having belonged to Queen Elizabeth. In 1762 it was bought for 10 guineas at the sale of Dr. Pepusch's collection by R. Bremner, who gave it to Lord Fitzwilliam, in whose possession it was in 1783. It is next noticed in Hawkins's *History* (1776), where it is first stated to have been in Queen Elizabeth's possession. Hawkins also tells the story (repeated by Burney) of Pepusch's wife, Margherita de l'Épine, having attempted to play the music it contained, but although an excellent harpsichord player, never having been able to master the first piece, Bull's variations on 'Walsingham.' Burney (1789) adds the well-known account of Elizabeth's playing to Sir James Melvil, with the remark that if she could execute any of the pieces in the Virginal Book, she must have been a very great player, as some are so difficult that it would be hard to find a master in Europe who would play them without a month's practice. Burney's remarks have been repeated by several writers, amongst others by Stevens, in his notes to *A Winter's Tale* (1803), but with the exception of Chappell's conjecture nothing further has been discovered with regard to the origin or history of the book. A MS. index of its contents was in the possession of Bartleman, and from this a copy was made in 1816 by Henry Smith,

³ This much may be said with certainty. The question of Byrd's religion presents difficulties only to those who do not realise that it was possible for Englishmen, whose personal preferences were for the old order and the Latin ritual, to serve the Church of England loyally throughout the reigns of Elizabeth and James I. The trivial fees incurred by Byrd and his family probably show where their preferences lay (see vol. I. p. 511). The fact of his holding the lease of Stonden, sequestrated on account of its owner's complicity in a Popish plot, sufficiently attests his political loyalty, and his continued service in the Chapel Royal shows him to have been in communion with the national Church.

¹ The edition of this work referred to in this article is that published by Chappell & Co. in two volumes, without a date. The full title-page runs as follows: 'The Ballad Literature and Popular Music of the Olden Time: a History of the Ancient Songs, Ballads, and the Dance Tunes of England, with numerous Anecdotes and entire Ballads. Also a Short Account of the Minstrels. By W. Chappell, F.R.S. The whole of the Airs harmonised by G. A. Macfarren.'

² The Tregians were a rich and powerful Roman Catholic family whose seat was at Golden or Volveden near Trewethan in Cornwall. The elder Francis Tregian suffered depopulation and imprisonment. After his release he visited Spain, taking Douay on his way (1606) and died at Lisbon, Sept. 25, 1608. The younger Francis (eldest son) was educated at Eu and entered Douay, Sept. 29, 1688. The story of the sufferings of the family was recorded at some length in former editions of this Dictionary. Further information as to the Tregian family may be found in the following works: Oliver's *Catholic Religion in Cornwall*; Polwhele's *History of Cornwall*, vols. iv. and v.; *Catholic Miscellany* for June 1823; Morris, *Troubles of our Catholic Forefathers* (1872-77); Knox, *Records of the English Catholics* (1878-82); Gilbert, *Historical Survey of Cornwall* (1817); *The Economy of the Fleet* (Camden Soc., 1879); also in Add. MSS. 21,203, and in the *State Papers*, particularly Domestic Series, James I., 1619, vol. xli. and 1620, vol. cxxv. Historical MSS. Commission, House of Lords, Sup. Cal. Report IV. (1874), p. 120. Ditto, Marquis of Salisbury's papers, Report VI. Appendix (1877), p. 272a. Report VII. (1879), p. 180b.

and inserted at the end of the original volume. In Warren's edition of Boyce's 'Cathedral Music' (1849), a list of its contents was printed in the notes to the Life of Byrd, but this is in many respects inaccurate. In framing the following list some attempt has been made to give a few references to similar collections in which other copies of the compositions indexed may be found. The compositions mostly consist of airs and variations, the different sections of which are numbered consecutively. Thus the first piece in the book consists of twenty-nine variations on the air 'Walsingham,' but as in the MS. the air itself is numbered '1,' the number of sections is stated in the index to be thirty. The references to Chappell's work are to the edition already mentioned. The spelling of the MS. is generally retained, but in a few instances abbreviations have been omitted.

¹⁷ Also in 'Parthenia.'

¹⁸ In Ward's List this is called 'Fantasia upon a Plain Song.'

¹⁹ Only one bar of the fifth section has been written in, the rest of the page is left blank. Chappell, p. 66. A copy of this is in Add. MSS. 31,403, which gives the name of Orlando Gibbons as the composer. See also Forster's *Virginal Book*, p. 118; Lady Nevell's *Virginal Book*, fol. 109; and Add. MSS. 30,485, fol. 67; also *infra*, No. 67.

²⁰ Vide the Galliard to this Pauen, pag. 27 (note in the MS.). In Cosyn's *Virginal Book*, p. 15, this Pavan and its Galliard have Cosyn's initials to them. It is mentioned in Ward's List.

²¹ Vide p. 21. This is the same composition as that on p. 21, attributed to Morley, but the copy on p. 21 wants the final section. Another setting (by Byrd) is in Forster's *Book*, p. 324, and in Cosyn's *Book*, p. 157.

²² Ward calls this 'Praeludium to Gloria Tibi Trinitas.'

²³ This and the following three pieces are in Ward's List.

²⁴ There are two similarly named compositions by Bull in Add. MSS. 23,623, fol. 19, and 31,403 respectively, but all three are different.

²⁵ This composer is totally unknown.

²⁶ Written on the same plain-song as In Nomines by Blythman in Add. MSS. 31,403 and 30,485.

²⁷ In Ward's List.

²⁸ Chappell, p. 60. See also Cosyn's *Book*, p. 75.

²⁹ A curious little piece of eight bars for two Virginals.

³⁰ This Pavan and the following Galliard also occur in Lady Nevell's *Book*, fol. 92, and Will Forster's *Book*, p. 217. See also p. 142, No. 76.

³¹ This celebrated piece has been often printed. Copies of it are in Lady Nevell's *Book*, fol. 149, and in Add. MSS. 31,403 and 30,485, and Forster's *Book*, p. 130. Chappell, pp. 137-140, 428.

³² Chappell, pp. 63 60-62, 196; a copy is in Lady Nevell's *Book*, fol. 46. Another setting by Byrd is No. 276 (l. 430), where it is called 'Pescod Time.'

³³ A copy of this is in Lady Nevell's *Book*, fol. 153b, where it is called 'Hughe Astons grownde.'

³⁴ A copy of this is in Forster's *Book*, p. 244. A different setting is in Lady Nevell's *Book*, fol. 173b, of which a copy is also in Forster's *Virginal Book*, p. 366.

³⁵ Chappell, p. 69, where the melody is printed in Byrd's arrangement. A copy is in Lady Nevell's *Book*, fol. 166b.

³⁶ Chappell, p. 162.

³⁷ *Ibid.*, p. 269.

³⁸ A different setting from that contained in p. 74, *v. supra*. Copies in Lady Nevell's *Book*, fol. 109 and Add. MSS. 30,485 and 31,403. See also Will Forster's *Virginal Book*, p. 118.

³⁹ See No. 1. Other copies of this setting are in Lady Nevell's *Book*, fol. 31, and Will Forster's *Book*, p. 74.

222	121	42	Pauana Lachrymae . . .	John Dowland, sett fourth by Wm. Byrd. 54
223	122	47	Gallarda . . .	James Harding, sett fourth by Wm. Byrd. 55

49 See vol. III, p. 664. 41 i.e. Caccini.
 42 In the margin the following note (part of which has been cut by the binder): 'The first one Philips made.'
 43 Part of p. 176, and pp. 177, 178, 179, and 180 are blank. The numeration of the pieces leaves off here.
 44 i.e. No. 52.
 45 This piece consists of seventeen quite short sections. At the foot of p. 189 is written 'Perge'.
 46 Chappell, p. 110. Occurs in Lady Nevill's Book, fol. 1426.
 47 In Ward's List.
 48 In Add. MSS. 30,485, a collection of Virginal Music headed 'Extracts from Lady Nevill's Music Book,' but containing much besides, is a 'Felix Namque' by Tallis, against which (in a later hand) is written '1662. In the Virginal Book,' but this is a different composition from either this or the following.
 49 A copy of this entitled 'Felix Namque,' is in Forster's Virginal Book (p. 24) with no composer's name to it. Another 'Felix Namque' is in Benjamin Cosyn's Book (p. 100); this is different from any of the above, bringing up the number of Tallis's settings to four. (See ante, p. 13a.)
 50 No. 4 of Giles Farnaby's 'Canzonets to Four Voyces' (1598) is 'Daphne on the Rainbow.' 51 Chappell, pp. 456, 782, 794.
 52 In Ward's List. 53 Ibid.
 54 Add. MSS. 31,392 (fol. 35) has 'Dowland's Lachrymae' in lute tablature. The tune is to be found in nearly every Elizabethan collection, and is frequently alluded to by writers. It occurs at fol. 71a of Add. MS. 30,485, and a setting by Cosyn is in his Virginal Book, p. 8. See Chappell, p. 92, and infra. Morley's setting is No. 153, and Farnaby's is No. 290.
 55 Occurs as 'Hardings Galliard,' without Byrd's name in Forster's Book, p. 380. Two fancies by James Harding are in Add. MSS. 30,485, ff. 47 and 50.

* The numbers from * to * are wrongly noted in the printed edition. There is there no number 171, and two numbers 162.

56 In Ward's List.
 57 Occurs at fol. 113s of Lady Nevill's Book. A copy is in Add. MS. 31,403.
 58 Chappell, p. 223. In Add. MSS. 23,623 is (fol. 136) 'Bonn well Robin van Doct. Jan Bull,' dated Jan. 18, 1627. A setting by Munday is No. 15.
 59 Vide supra, No. 35; this is a different setting.
 60 Vide supra, No. 31. A copy is in Forster's Book, p. 288.
 61 A copy is in Forster's Book, p. 302.
 62 This and the following four pieces are in Ward's List.
 63 This occurs in Add. MSS. 23,623 (fol. 49b), where it is entitled 'Het Juwel van Doctor Jan Bull quod auct anno 1621. December.' Ward, who prints a list of the contents of this MS., inserts the date 12, before the name of the month. A slightly different version occurs at p. 124 of Cosyn's Virginal Book.
 64 Chappell, pp. 240, 776.
 65 'Parsons' in Nomine by Byrd in Forster's Book, 46.
 66 In Ward's List.
 67 In Chappell, p. 793.
 68 At fol. 17b of Add. MSS. 23,623 is a different setting of this air entitled 'Rose a solis van Joan (sic) Bull Doct.' The sections of this piece are termed 'variations.'
 69 The theme of this occurs in Hilton's 'Catch that cat can,' as a catch 'Slaves to the World,' ascribed to Edmund Nelham.
 70 Chappell, p. 74.
 71 Occurs under the name 'Lenuito' at p. 20 of Forster's Virginal Book.
 72 Chappell, p. 86. See Forster's Book (p. 70).
 73 Chappell, p. 793. This tune, the Irish origin of which is denoted by its name ('Colleen oge ashoire'), is referred to in Shakespeare's Henry V. Another copy is at fol. 96b of Add. MSS. 30,485.
 74 Chappell, pp. 114 and 770. Occurs under the name 'Lord Willobies welcome home,' at fol. 46b of Lady Nevill's Virginal Book and at p. 22 of Forster's Book. Against the bass lute is written in the margin '300 to S. T. by Tom.'
 75 Vide supra, No. 286.
 76 In the margin is written 'the first that euer hee m(ade)'. The letters in brackets have been cut by the binder.

⁷⁷ Chappell, pp. 123 and 771. Another copy is at p. 46 of Coeyn's Virginall Book, where it is signed with his initials.

⁷⁸ Virginal, p. 793.

⁷⁹ *Ibid.* p. 136. Occurs at p. 460 of Forster's Book.

⁸⁰ Against the first line in the margin is written "F. Tr."

⁸¹ This and the four following pieces are in Ward's List.

⁸² In Ward's List.

⁸³ Undoubtedly William Byrd.

⁸⁴ In Ward's List.

⁸⁵ Virtually identical with No. 199.

⁸⁶ See No. 193.

⁸⁷ The melody is thus given as "Pulcina" in Giles Earle's Song-book, 1625: see Woolridge's "Old English Popular Music," I. 160.

⁸⁸ In the margin are some words which Chappell reads "B. Ryssd alias."

⁸⁹ In Ward's List.

⁹⁰ Chappell, p. 76.

⁹¹ In the margin is written "Mrs. Katherine Tregian's Paven."

⁹² Ward calls this "Fantasia with 23 Variations upon Ut, re, mi, fa, sol, la."

⁹³ Chappell, pp. 171, 772.

⁹⁴ The melody is the well-known "Belle qui tient ma vie."

⁹⁵ Chappell, pp. 173, 708, 772.

⁹⁶ *Ibid.* pp. 196, 773.

The complete contents of the MS. were published by B. & H. in monthly instalments, between 1894 and 1899. They occupy two folio volumes, and were edited by J. A. Fuller Maitland and W. Barclay Squire. A description of the MS., with analysis of its contents, by Dr. E. W. Naylor, was published by Dent & Co.

The music ends on p. 418. At the end of the volume is an index of the contents signed 'Henry Smith Richmond, scripsit, from a MS. Index in the possession of Mr. Bartleman. 24 March, 1816.' In this, pieces, of which copies occur in Lady Nevell's book, are marked with an asterisk.

⁹⁷ Burney says this is the same as 'The Marche before the Batell' at fol. 136 of Lady Nevell's Book.

⁹⁸ In the margin is written 'Vide P. Philippi sopr. la medesima fuga, pag. 158.' The subject is the same as that of Philips' Fantasia (No. 84). Against the third line is written '... (illegible) is fuga e fugra.'

⁹⁹ In Ward's List. A copy is in Coeyn's Book, p. 199.

¹⁰⁰ Chappell, p. 196. Same air as No. 59. See Lady Nevell's Book, fol. 46.

¹⁰¹ In Ward's List.

¹⁰² *Ibid.* pp. 177, 789.

¹⁰³ Rosseter published a volume of 'Consort Lessons' in 1609.

¹⁰⁴ In the margin is written 'Vedi Mor. 287.' This refers to a curious piece of plagiarism, section 3 of Morley's Pavan, on p. 287 (l. 212) being nearly identical with section 3 of Farnaby's on p. 400.

¹⁰⁵ At p. 89 of Coeyn's MS. is a setting of this air signed 'B. U.' and at fol. 95b of Add. MS. 30,485 is another by Bull. *Vide supra* No. 161.

¹⁰⁶ I.e. John Dowland.

¹⁰⁷ The air of this is the same as that of No. 19.

¹⁰⁸ Chappell, p. 23.

(2) *MY LADYE-NEVELLS BOOKE*.—This valuable collection of Byrd's virginal music belongs to the Marquess of Abergavenny. It was published by permission of Lord Henry Nevill and edited by Miss Hilda Andrews (Curwen, 1926). It formerly belonged to Dr. Burney, and was sold at his sale for £11:0:6 to T. Jones, at whose sale it was lot 342 (Feb. 13, 1826). It is an oblong folio volume, beautifully bound in morocco enriched with gold, green and red, and lined with blue watered silk. On the title-page is an illuminated coat of arms and the monogram 'H. N.' The music is written on a 6-line staff in square-headed notes, and was copied by John Baldwin of Windsor, a fine volume of whose transcribing is preserved in the Royal Library, British Museum. Hawkins¹ states that the book was given by Byrd to his scholar, Lady Nevill, but there is no evidence in support of this assertion. The MS. was examined by Chappell when writing *Popular Music of the Olden Time*, in which volumes it is frequently referred to. The following is a list of its contents:

No.	Name.	Folio.	Composer.
1	My Ladye Nevel's grownde	1	Mr. W. Birde.
2	Qui passe: for my Ladye Nevel	8	"
3	The Marche before the battel. ³	13b	"

41	A Fancie	188b	"
42	A Voluntarie	191	Finis Mr. "W. Birde. Gentleman of the Queen's Chappell.

At the end of the volume is 'The Table for this booke,' after which is the following colophon:

'Finished and ended the leventh of September in the yeare of our Lorde God 1591 and in the 33 yeare of the raigne of our soveraigne ladie Elizabeth by the grace of God queene of Englande, etc. By me Jo. Baldwine of Windsore. Laudes Deo.'

(3) *WILL. FORSTER'S VIRGINAL BOOK*.—This volume, which belongs to His Majesty the King, is preserved in the Royal Library, British Museum, and consists of 238 octavo folios ruled in 6-line staves. The water-marks are a shield surmounted by a coronet, bearing a fleur-de-lis on the escutcheon, and a pot with the initials 'E. O. R.' The book probably belonged to Sir John Hawkins, and has been bound in modern times in half red morocco and paper boards. At the beginning is a 'Table of the Lessons,' written in the same hand as the rest of the book, and signed '31 Januarie 1624. Will. Forster.' The following is a list of the contents of the volume:

No.	Name	Page.	Composer.

(4) BENJAMIN COSYN'S VIRGINAL BOOK.—

This fine folio volume, like the last-mentioned collection, is the property of His Majesty, and is preserved at Roy. Lib. B.M. The binding is of English workmanship, and contemporary with the MS. It consists of calf with gold tooling. The letters 'B. C.' are stamped both on the front and the back, and part of the tooling has been stamped above the letters 'M. O.'—probably the initials of an earlier owner. The book has been shut by brass clasps, but these are now broken off. At the beginning is an index, divided into 'A Table of these Lessons followinge made and sett forth

¹ A mistake is made in the pagination here. Pages 118 and 119 are the same.

² In the Table this is called 'Ground.' It is the well-known 'Carman's Whistle.'

³ 'The 5th and last of the 103 Psalme.'

⁴ 'The 1 of the 51 Psalme.'

⁵ 'The last of the 51 Psalme.'

⁶ 'Marchant's Dreame' (Table).

⁷ 'Byrd' (Table).

⁸ 'The Galliard to it' (Table).

⁹ 'Lachramey' (Table).

⁹ A Pavan.

by Ben Cos., 'A Table of these Lessons followinge made by Mr. Docter Bull,' 'A Table of these Lessons followinge made by Mr. Or. Gibbons,' 'These lessons followinge are made by Tallis and Byrd,' after which comes a list of six services contained in the same volume, at the end of which is written 'These are y^e six services for the Kings Royall Chappell.' The same page also contains 'A Catch of 9 parts in one,' 'Let us goe pray for John Cook's soul,' and 'A Table of all these Lessons generally contained in this Booke are in Number: 96. By me Benjamin Cosyn Right owner of this Booke.' Hawkins¹² says that Cosyn was 'a famous composer of lessons for the harpsichord, and probably an excellent performer on that instrument,' that he flourished about the year 1600, and that 'there are many of his lessons extant that seem in no respect inferior to those of Bull.' The last statement looks as if Hawkins had been acquainted with the Virginal Book. Researches¹³ have shown that Benjamin Cosyn was organist of Dulwich College from 1622-24, and the first organist of the Charterhouse in 1626-43.

The following is a complete list of the contents of the volume: as the old pagination is in places irregular, the pages have been numbered freshly. The titles of the index are sometimes different from those in the body of the book; when these variations occur, they have been noted in the last column.

No.	Name	Page.	Composer.	Title in Index.
1	A Prelude	1	Benj. Cosyn	
2	A Pavin	2	"	In F, La, MI.

W. B. S.

VIRTUOSO (from Lat. *virtus*), one who has attained the highest mastery over the technical side of his art, whether of singing, playing an instrument or in modern times of conducting an orchestra. In England especially the term has

¹ Cosyn's name does not occur in the Index; No. 96 consists of a T.D., B., K., C., M. and N.D., and the whole service is attributed to Gibbons.

acquired a depreciatory meaning as suggesting the display of such a mastery for its own sake.

VISCONTI, GASPARO (b. Cremona), a 17th-18th century violinist who lived in London in the early 18th century, and wrote a book of violin sonatas with violoncello or harpsichord op. 1, dedicated to the Duke of Devonshire (Amsterdam, 1703). Three violin concertos with string orchestra and some solos and sonatas in MS. are in the libraries of Dresden and Schwerin (Q.-L.; E. v. d. Straeten, 18th century *Violin Sonatas: The Strad.*)

VISÉE, (1) ROBERT DE, French lutenist, player on the guitar and theorbo to the Dauphin (1680), chamber musician to the King (1686?), held this post until 1721; his son, François, succeeding him. In 1709 he was appointed 'chantre ordinaire de la musique du roi.' He published a 'livre de guitare,' dedicated to the King (1682); another book with the same title (1686); some 'Pièces de théorbe et de luth, mises en partition' (1716); these are really trios. These three works are in ordinary notation. Some 'airs' by him were published between 1731 and 1732 in the 'Concerts parodiques divisés en 6 suites.'

(2) FRANÇOIS, his son, succeeded him as singer to Jean-Louis Marais on Oct. 25, 1733.

J. G. P.

VISETTI, ALBERT ANTHONY (b. Salona, Dalmatia, May 13, 1846), teacher of singing. His mother was English; he studied composition under Alberto Mazzucato at the Conservatorio of Milan, where he gained two scholarships. His exercise for his degree was a cantata to words by his friend Arrigo Boito. His first engagement was as conductor at Nice. He then went to Paris, where A. Dumas prepared specially for him a libretto for an opera from his 'Trois Mousquetaires.' The score was hardly completed when it was burnt in the siege of the Commune. Visetti then came to London, where he has since resided, and has devoted himself chiefly to teaching singing. He joined the first Board of Professors at the R.C.M., and also taught at the G.S.M., the Watford School and various other institutions. He was also, in 1878-90, director and conductor of the Bath Philharmonic Society, to which he devoted an immensity of time, money and ability. Visetti has published Italian translations of Hullah's *History of Modern Music*, of Hueffer's *Musical Studies*, Parry's 'Blest pair of Sirens' and of other works. The King of Italy in 1880 conferred on him the order of the Corona d'Italia.

G., addns.

VITALI, ANGELO. This name is known in connexion with the following work, of which only the libretto seems to have survived:

'Tomiri, drama per musica, da rappresentarsi nel Teatro di S. Casciano, l' anno M.DC.LXXX., di

Antonio Medolago, Consecrato all' illustriss. et eccell. Sig. Gio: Francesco Morosini, dignissimo e meritissimo Cavalier, e Procurator di S. Marco. In Venetia, M.DC.LXXX. Per Francesco Nicolini.'

In the prefatory letter occurs the statement

'La musica è del S.D. Angelo Vitale, nelle noti del cui bizzarro contrapunto conoscerai, che non ha degradato da gli altri suoi spiritosi talenti,' etc.

A copy of this work is in the British Museum; a later edition was published in Venice by Francesco Batti. Music is not mentioned in the play itself, probably only the songs were set to music.

From a passage in a letter in Angelo Berardi's *Il perche musicale*, 1693, p. 15, addressed to Signor Angelo Vitale, Orvieto, it appears that he was maestro di cappella there:

'Havendo V.S. biasimato quel suo Anversario con taccia d' ignorante nel segnare le sue proportioni con un numero solo, ha dimostrato l' ottima intelligenza, che deve avere il perito Maestro di cappella ne' fondamentali armonici.'

C. S.

VITALI, FILIPPO (b. Florence, end of 16th century), a priest and an esteemed composer. His first volume of madrigals appeared in 1616, and with the exception of short visits to Venice and Rome he remained at Florence, working at composition. He had already published eight volumes of vocal music when he was called to Rome, being nominated a tenor singer in the Papal Choir on June 10, 1631.¹ During his residence in Rome, where he was attached to the household of Cardinal Francesco Barberini as musician and composer, he wrote two sacred works, his Hymni in 1636, and the Salmi a 5 voci in 1641. He was recalled to Florence in Feb. 1642, to succeed Marco da Gagliano as maestro di cappella to the Duke, and at the Cathedral of S. Lorenzo.² On Apr. 1, 1653, he was presented to a canonry of the Cathedral, and entitled S. Ambrogio.³

Among Vitali's works, the 'favola in musica,' 'L' Aretusa,' attracts attention, for its performance at the palace of Monsignor Ottavio Corsini in the presence of nine Cardinals and the principal ladies of Rome, was practically the first appearance in Rome of a definite attempt at lyrical drama.⁴ The publication was dedicated to Cardinal Borghese:

'L' Aretusa, favola in musica di Filippo Vitali, rappresentata in Roma in casa di Monsignor Corsini. Dedicata all' Illmo. et Rmo. Sig. Card. Borghese. In Roma. Luca Ant. soldi. 1620.'

In the preface⁵ Vitali states that the libretto was written, the music composed, the parts distributed and learnt, and the first performance given, all in forty-four days, for on Dec. 26, 1619, he began the work, and on Feb. 8, 1620, it was performed. The instruments he used were two cembali, two theorbos, two violins, one lute and one viola da gamba, and he declares

that in his music he was a humble follower of Peri and Caccini of Florence.

Hugo Goldschmidt⁶ points out that in the employment of two violins instead of viols, for the Discant or treble parts in 'Aretusa,' Vitali was distinctly in advance of his time; in other respects the music is poor and shows signs of the haste with which it had been written.

A less important work opening with thirty-two bars of a sinfonia in five-part writing is the following:

'Intermedi di Filippo Vitali. Fatti per la commedia degli' Accademici Incontinenti recitata nel palazzo del Casino, dell' Illmo. e revmo. S. Cardinale de Medici l' anno 1623. In Firenze. Pietro Cecconcelli, 1623.'

Other publications were:

Il primo libro de madrigali a cinque voci. Venezia. Bartolomeo Magni, 1616.
Musiche a due, tre e sei voci. Firenze. Zanobi Pignoni, 1617. Some of these compositions contain Ritornelli for instruments alone; and one introduces, with a sinfonia for five instruments, an unaccompanied madrigal for six voices.
Musiche a una e due voci. Libro secondo. Roma. G. B. Robiotti, 1618.

F. H. Gevaert, Les Gloires d'Italie, No. 23, reprints a Canzonetta for solo voice with basso continuo from this work.

Musiche a una, due e tre voci per cantare nel cimballo à in altri stromenti simili con l' alfabeto per la chitarra in quelle più a proposito per tale stromento. Libro terzo. Roma. L. A. soldi. 1620.
Arie a 1, 2, 3 voci. Da cantarsi nel chitarone chitarra spagnuola & altri stromenti. Libro quarto. Venetia, 1622. Gardano. In the dedication, dated from Venice, Vitali says he composed the work during his brief stay in Venice.

Varie musiche. Libro quinto. Stampo del Gardano. In Venetia, 1625. Bartolomeo Magni.

Italian and Latin compositions for 1 to 4 voices.

Il terzo libro de madrigali a cinque voci. Opus quarta decima. Venetia, 1629. Bartolomeo Magni.

Concerto di Filippo Vitali, madrigali et altri generi di canta a 1, 2, 3, 4, 5 & 6 voci. Libro primo. In Venetia, 1629. Bartolomeo Magni. Copies of this work in the Bologna and in the Breslau libraries have the dedication to Gio. Romanini by F. V. dated from Florence, Apr. 1, 1629. The Canto and Quinto partbooks in the British Museum are dedicated to Gio. Giorgio Costanti by F. V. and dated from Venice, July 1, 1629.

Arie a una, due e tre voci, di Filippo Vitali musico della cappella di Sua Santità. In Orvieto. Ad istantia di G. B. Robiotti, 1632.

Arie a tre voci, etc. In Roma. Paolo Masotti, 1635.

Arie a tre voci, etc. In Roma. Vincenzo Bianchi, 1639.

Libro quinto di arie a tre voci. Firenze. Landi, 1647.

Sacrae cantiones a sex vocibus. Cum basso ad organum, Liber 1, Venetia, 1629.

Hymnos Urbani VIII. Pont. Max. Iusui editos; in muscos modos ad templorum usum digestos; a Philippo Vitali Florentino Pontifici Sacelli musico; ejusdemq. S. D. N. addictos, dicatos. Romae, ex typographia R.C. Apostolicae. An. 1636.

Psalmi ad vesperas quos vocibus cum basso ad organum et placet. Autore Philippo Vitalio, Capellae Pontificiae Musico. Romae apud Vincentum Blancum. 1641.

C. S.

VITALI (1), GIOVANNI BATTISTA (b. Cremona, c. 1644 or earlier; d. Modena, Oct. 12, 1692⁷), a musician and composer, who produced an extraordinary amount of dance music, balletti and sonatas. He was a pupil of Maurizio Cazzati for counterpoint (as Gaspari gathers from Vitali's earliest work, published in 1666). Cazzati was maestro di cappella at the church of S. Petronio in Bologna from 1658-71, and Vitali himself was sonatore or 'musico di violone da braccio' at the same church from 1666, probably until he became 'maestro di cappella del santissimo Rosario di Bologna,' a title he is given on the title pages of his works in 1673 and 1674. Marino Silvani in the eulogistic preface he wrote to Vitali's 'Balletti, correnti, gighe,' etc., 1671, alludes to his violin-playing, 'eccellente nell' arte del suono,' and adds that it is not only those who hear him who admire 'le sue prodigiose virtu,' but also those who

⁷ Either states that the date given in a manuscript in the Biblioteca Estense, Modena, had a note appended to the effect that he died at an advanced age.

examine his compositions, worthy of the highest praise. From 1667 Vitali was a member of the Bologna Accademia de' Filaschisi and Accademia de' Filarmonici.

On Dec. 1, 1674, he was appointed vice-maestro di cappella to the Duke Francesco II. of Modena, and ten years later was able to call himself maestro di cappella to the Duke, a post he was only to occupy for a short time. Among Vitali's published works, the sonatas naturally arouse most interest, both those contained in opus 2, dated 1667, and the more elaborate compositions in opus 5, first printed in 1669. They show in fact the first hesitating footsteps on the long road that eventually led to the present perfection of form. (See SONATA.) Constant and rapid changes from quick to slow movement mark the various sections. For instance 'La Campori,' sonata for two violins, passes in quick succession from allegro to grave, grave to vivace, and a sonata, 'La Guidoni,' is marked allegro, grave, allegro, grave, allegro.

Moreover, there is another point of interest to be considered: it is quite possible that these sonatas were the compositions on which Purcell modelled his sonatas 'in imitation of the Italian Masters' which were published in 1683, for Nicola Matteis, the violin-player, may have introduced his compatriot's music into England. (See PURCELL.)

An extensive collection of Vitali's compositions, printed and in manuscript, is in the Biblioteca Estense, Modena; the Bologna Library also possesses a large number of the following works:

Correnti e balletti da camera a due violini col suo basso continuo per spinetta o violone da G. B. Vitali, sonatore di violone da braccio in S. Petronio di Bologna & Accademico filaschese. Opera prima. In Bologna, per Marino Silvani. 1668.

Two editions were published in Venice in 1670 and in 1677, and another in Bologna by Giacomo Monti in 1680.

Wasielowski ('Instrumentalsätze,' 1874, No. 25) reprinted a balletto from this work.

Sonate a due violini col suo basso per l'organo, di G. B. V. musico di violone da Braccio . . . & accademico filaschese. Opera seconda. In Bologna, per Giacomo Monti. 1667. Gratefully dedicated by Vitali to Vincenzo Maria Carrati, from whom he had received so many benefits, and who had admitted him to the Accademia of which he was the founder. (The Accademia dei Filarmonici was inaugurated at Carrati's house in Bologna, 1666.) Later editions were published at Venice in 1668, 1671 and 1682.

Wasielowski included a sonata from this work in the 'Instrumentalsätze,' 1874, No. 26. Another was published by Hugo Riemann in 'Alte Kammermusik,' 1898, vol. iv.

Balletti, correnti alla francese, gagliarde e brando per ballare. In Bologna, correnti e sinfonie da camera a quattro stromenti di G. B. V., musico di violone da braccio, etc. Opera terza. In Bologna, per Giacomo Monti. 1667.

An edition of 1674 entitled Vitali 'maestro di cappella del Santissimo Rosario di Bologna & Accademico filaschese.' Another edition published 1680.

Balletti, correnti, gigue, allemande e sarabande a violino e violone, 6 spinetta con il secondo violino a beneplecto. Del G. B. V., musico di violone da braccio, etc. Opera quarta. In Bologna, per Giacomo Monti. 1668. Other editions published in 1671, 1673, 1677 and 1678.

Un livre cinquième du recueil des dances, ballets, allemandes, brandes, courantes, etc. des divers auteurs de ce temps, à deux parties. Et aucunes à deux violons avecq. la basse continue pour les spinettes ou basse violon, du Gio. Battista Vitali. Anvers, chez les héritiers de P. Thalse, 1668.

Sonate a due, tre, quattro e cinque stromenti di G. B. V., musico di violone da braccio, etc. Opera quinta. Bologna, per Giacomo Monti. 1669. Other editions in 1677 and 1688. Wasielowski ('Instrumentalsätze,' 1874, Nos 27 and 28) reprinted the Sonata 'La Graziani' and the Capriccio 'Il Moiso' from this work. Salmi concertati a due, tre, quattro e cinque voci, con stromenti consecrati all' A. S. Francesco II. Duca di Modena, etc. Da G. B. V., vice maestro di cappella di S.A.S. & accademico filaschese. Opera sesta. Bologna. Giacomo Monti. 1677. Ten partbooks as well as a MS. score by G. Busi are in the Bologna Library.

Varie partite del passo a mezzo, claccona capricci e passagalli a 3: due violini, e violone, 6 spinetta. Opera settima. Modena, 1682. Gasparo Ferri.

Balletti, correnti e capricci per camera a due violini e violone del Sig. G. B. V., vice maestro di cappella, etc. & accademico filaschese e filarmonico. Opera ottava. In Venetia, 1683. Stampa del Gardano.

Some authors mention as opus 9: 'Sonate a due violini e basso per l'organo,' published at Amsterdam.

Fétis also records opus 10: 'Inni sacri per tutto l'anno, a voce sola con cinque stromenti.' Modena, 1681.

Varie sonate alla francese e all' Ingliana a sei stromenti da G. B. V., maestro di cappella dell' A.S. di Sig. duca di Modena & accademico filaschese. Opera undecima. In Modena, per Gio. Gasparo Ferri. 1684.

Balli in stile francese a cinque stromenti consecrati alla sacra real maestà di Maria Beatrice d' Este Stuarta, regina della Gran Bretagna. Da G. B. V. maestro di cappella, etc. Opera duodecima. In Modena, per Antonio Vitaliani. 1685.

Artificii musicali ne quali si contengono canon in diverse maniere, contrapunti doppi, inventioni curiose, capricci e sonate di G. B. V. Opera decimaterza. In Modena, per gli eredi Cassiani stampatori episcopali. 1680.

Sonate da camera a tre, due violini e violone di G. B. V. Opera decimaquarta. In Modena, 1692, per Christoforo Canobi, stampatore di musica ducale. The dedication, dated Dec. 1692, is written by Tommaso Antonio Vitali, son of Gio. Battista, who states that owing to the death of his father he had undertaken the publication of this work.

Twelve MS. 'Sonate a due violini del Vitali' are in the Bodleian Library: MS. Mus. Sch. d. 257. Torchi ('L'arte musicale in Italia,' 1908, vol. 7), reprinted nine short movements for two violins and viola.

Two oratorios, 'Agar' and 'Gefte,' composed in 1671 and 1672 (C. Ricci, *I teatri di Bologna*, p. 349).

In his catalogue of the opera in the Brussels Conservatoire Library, Wotquenne gives the following:

Olocausto d' enormi offerto da sign. Accademici Unanimi al loro gran protettore San Nicolo il Magno nell' Accademia di Belle Lettere e Musica, fatti la sera dell' 17 Marzo, 1672. In Bologna, per Gio. Recalchini, 1672. The sinfonie preceding an oratorio, 'Il trionfo della fede,' was composed by G. B. Vitali.

Il ambizioso debellata overo la caduta di Monmouth, oratorio per musica, di G. A. Canal, Venetiano, posto in musica dal sig. Gio. Battista Vitali, v. maestro di cappella di S.A.S. In Modena per gli eredi Silvani stampatori ducale. 1686.

A MS. score of the music is in Bibl. Estense, Modena. Fétis also states that 'Il Glona,' oratorio for seven voices, chorus and instruments, the music by G. B. V., was performed in Modena in 1689.

MS score in Modena. C. S.

(2) TOMMASO ANTONIO (b. Bologna, c. mid. 17th cent.), a son of Gio. Battista, was a fine violin-player, and when his father moved to Modena in 1674, Tommaso became a member of the court cappella, and eventually its director under the Dukes Francesco II. and Rinaldo I. He calls himself their 'servitore attuale' in his works published 1693-1701. He was a member of the Accademia de' filarmonici di Bologna from 1706. He is said to have had many distinguished violin pupils, but the name of only one is known, that of Girolamo Nicolò Laurenti.

Copies of his three known published volumes of sonatas are in the library of the Liceo musicale, Bologna. (Gaspari's Catalogue, vol. iv.):

Sonate a tre, dol violini e violoncello col basso per l'organo consecrate all' Altezza Serenissima di Francesco II. Duca di Modena, Reggio, etc., da Tomaso Antonio Vitali, bolognese servitore attuale della medema Altezza. In Modena, 1693, per Antonio Ricci, stampatore di musica ducale.

The dedication shows that this was his first work.

Sonati a doi violini, col basso per l'organo, consecrate all' Altezza serenissima di Gio. Prencipe de Parma Odoardo Farnese, da T. A. V. etc., as above. Opera seconda. In Modena, 1693. Per Christoforo Canobi, stampatore di musica ducale.

Concerto di sonate a violino, violoncello e cembalo consecrate all' emmentissimo e rever. Sig. Cardinale Ottoboni da T. A. V. etc., as above. Opera quarta. In Modena, 1701. Nella stampa di Fortuniano Rosati, stampatore ducale di musica.

Tommaso also edited a volume of his father's sonatas in 1692.

A sonata by Tommaso for two violins and basso was included in the *Corona di dodici fiori armonici tessuta da altissimi ingegni sonori a tre stromenti*. Bologna, 1706.

His best-known work at the present time is the characteristic 'Ciaccona' for violin solo, with figured bass, edited by Ferdinand David ('Die hohe Schule,' 1867, No. 13), which has been

much played at concerts by eminent violinists. One of the rare autographs included in the International Musical Exhibition at Bologna in 1888 (Succi's Catalogue, p. 174) was a letter from Tommaso to Count Pirro Albergati, of Bologna, dated Mar. 17, 1711. C. S.

VITOLS, J., see LATVIAN MUSIC.

VITRY, PHILIPPE DE (b. Champagne, c. 1285–1295; d. Paris, 1361), author of the earliest treatises expounding the *Ars nova*, was born of a noble family in Champagne. He was secretary to two kings of France, Charles IV. and Philip VI., and to the latter's son John, Duke of Normandy, afterwards King John II. He took part in various diplomatic missions, and in 1350 negotiated a meeting between the French king and the Pope at Avignon. It is supposed that he remained at the Papal Court and received holy orders there, as he was shortly afterwards nominated Bishop of Meaux.

Philippe de Vitry was celebrated in his own day not only as a theorist but also as a poet and composer. Petrarch, in a letter addressed to him in 1350, preserved at the Bibliothèque Nationale in Paris, calls him 'poeta nunc unicus Galliarum.' Very little of his verse has survived to our own day, and his musical compositions are lost. It is believed that a MS. formerly at Strassburg, which was destroyed in a fire during the Prussian bombardment of the city in 1870, contained music by him.

Four musical treatises attributed to Philippe de Vitry (Philippus de Vitriaco) are extant: *Ars nova*, *Ars perfecta*, *Liber musicalium* and *Ars contrapunctus*. They are contained in de Coussemaker's *Scriptorum de musica mediæ ævi novam seriem*, etc., vol. iii. According to J. Wolf, *Geschichte der Mensural-Notation*, vol. i. part ii., the *Ars perfecta* is probably not by him, but Wolf admits the genuineness of the *Ars nova* and *Liber musicalium*. Although the 'New Art' in music was, as Wolf says, less an invention than a development of the older art (*ars antiqua*), the innovations introduced by Philippe de Vitry are of considerable importance in the history of music. They concern rhythm and the method of representing it in notation, and may be summarised as follows:

1. Recognition of the independence of the *minima* as a note form.

2. Extension of the principle of the *Ars antiqua* by which a *longa* might be 'imperfected' by a *brevis*, i.e. one *longa* followed by one *brevis* loses one-third of its value—normally $\text{H} = \text{H H H}$, but $\text{H H} = \text{H H H}$ —to the smaller note values, so that a semi-*brevis* might now imperfect a *brevis*, and a *minima* a semi-*brevis*.

3. Introduction from Italian usage of the rhythms known as quaternaria ($\text{H} = \text{O O}$

$= \text{d d d d}$) and senaria perfecta ($\text{H} = \text{O O O}$
 $= \text{d d d d d d}$).

4. Introduction, in addition to the ideas of *modus perfectus* (*longa*=three *breves*) and *imperfectus* (*longa*=two *breves*), and *tempus perfectum* (*brevis*=three semi-*breves*) and *imperfectum* (*brevis*=two semi-*breves*), of the idea of *prolatio maior* (semi-*brevis*=three *minimæ*) and *minor* (semi-*brevis*=two *minimæ*).

The *Ars antiqua* recognised only perfect, i.e. triple, rhythm, and demanded that all music should be written in one of the six RHYTHMIC MODES (*q.v.*). When the art-music invented in France was first introduced into Italy, the influence of native Italian folk-music upon it was so strong that duple as well as triple rhythms were allowed. The idea of binary rhythm, originated in Italy, was probably introduced into France at the time of the transference of the Papal See from Rome to Avignon (1309). The importance of Philippe de Vitry's work lies in the fact that he recognised and adopted the principle of binary rhythm and was the earliest theorist to expound and develop that principle in his treatises, thus helping his contemporaries to free themselves from the restrictions of the earlier methods of composition, and especially from the rhythmic modes.

His method of notation is very fully treated of in Wolf, *op. cit.* vol. i. part ii. His contribution to the history of harmony is less important. A good summary of the principles of composition advocated by him and his contemporaries is given in J. Combarieu's *Histoire de la musique*, vol. i. chapter xxiv. p. 390. As stated above, his own compositions have been lost, but his theories are well illustrated in the works of his contemporary, Guillaume de MACHAUT (*q.v.*). B. S.

VITTORIA, TOMASO DE, see VICTORIA.

VITZTHUMB (WITZTHUMB) IGNACE (b. Baden, near Vienna, July 20, 1723; d. Brussels, Mar. 23, 1816), studied at the school of the Scottish Oratorians at Vienna, and served during the Seven Years' War as kettledrummer in a regiment of Prince Charles of Lorraine, to whose chapel in Brussels he went. In 1771 he became joint manager with Louis Compain of the Théâtre de la Monnaie, which, under him, experienced a period of splendour and prosperity; but he failed in 1777. After a short period of conductorship at the Ghent theatre, c. 1780, where his daughter, Mme. Mees, appeared as singer, he was appointed Kapellmeister at the Théâtre de la Monnaie, Brussels, in 1786. The French Revolution deprived him of his position as well as of his pension from the Austrian court. After some years of activity as Kapellmeister and stage manager at the Amsterdam theatre, he returned to Brussels

where he died in straitened circumstances. Among his pupils he counted the Flemish composer Verheyen. He composed a number of masses, motets and other church music, symphonies, and opéras-comiques, some of which were very successful. E. van der Straeten gives his portrait in *La Musique aux Pays-Bas*. (See also E. G. Grégoir, *Les Artistes musiciens, etc.*, and Q.-L.)

VIVACE (Vivo, VIVACISSIMO), 'Lively, in the liveliest manner possible.' A direction used either alone, and indicating a rate of speed between *Allegro* and *Presto*, or as qualifying some other direction, as *Allegro* or *Allegretto*. *Allegro vivace* will be taken quicker than *ALLEGRO* (q.v.) by itself, but not so quick as *Allegro assai*.

VIVALDI, ANTONIO (b. Venice, latter half of 17th cent.), surnamed 'Il prete rosso,' was the son of Giovanni Battista Vivaldi, a violinist in St. Mark's at Venice. There is no evidence in support of the statement that he went to Germany. He entered the service of the landgrave of Hesse-Darmstadt,¹ who was then resident in Italy. On his return to his native city in 1713 Vivaldi was appointed maestro de' concerti at the Ospedale della Pietà, a post which he held until his death in 1743. The institution, which was a foundling-hospital for girls, possessed a choir and a good orchestra composed entirely of females. (See VENICE.) Vivaldi's own instrument was the violin, for which he wrote very largely; he is stated also to have contributed something to the development of its technical manipulation. The publications on which his fame rests are all works in which the violin takes the principal part. Fétis² enumerates the following:

- | | |
|---|--|
| Op. | Op. |
| 1. 12 trios for 2 violins and violoncello. Paris, 1737. | 8. 'Le quattro stagioni, ovvero il cimento dell' armonia e dell' invenzione, in 12 concerti a quattro e cinque.' |
| 2. 12 sonatas for violin solo with bass. | 9. 'La cetra, ossia 6 concerti' for the same. |
| 3. 'Estrò armonico, ossia 12 concerti a 4 violini, 2 viole, violoncello e basso continuo per l'organo.' | 10. 6 concerti for flute, violin, viola, violoncello and organ. |
| 4. '12 concerti a violino solo, 2 violini ripieni, viola e basso per l'organo.' | 11, 12. Each consisting of 6 concerti for the same instruments, with the addition of the violoncello. |
| 5. Sonatas for the same. | |
| 6, 7. Each consisting of 6 concerti for the same instruments. | |

Besides these works,³ twenty-eight operas by Vivaldi are named (he was in Rome in 1735 for the performance of one of them), and a few cantatas and even motets will be found scattered in various manuscript collections.

As a writer for the violin Vivaldi held apart from the classical Roman school lately founded by Corelli. He sought and won the popularity of a virtuoso; and a good part of his writings is vitiated by an excessive striving after display, and effects which are striking simply in

¹ Riemann describes him as Kapellmeister to the Duke Philipp von Hessen, and concludes therefore that he was at Mantua from 1707-13.

² Fétis, vol. viii. p. 369a.

³ A concerto and a sinfonia in 3-5 parts for viola d' amore and lute also exist in manuscript. A transcript is in the British Museum Add. MS. 31,305, f. 10.

so far as they are novel. His 'stravaganze' for the violin solo, which were much played in England during the 18th century, are, according to Dr. Burney,⁴ nothing better than show-pieces. The 'Cimento' (op. 8) illustrates another fault of the composer: 'The first four concertos,' says Sir John Hawkins,⁵

'are a pretended paraphrase in musical notes of so many sonnets on the four seasons, wherein the author endeavours, by the force of harmony and particular modifications of air and measure, to excite ideas correspondent with the sentiments of the several poems.'

Vivaldi in fact mistook the facility of an expert performer (and as such he had few rivals among contemporaries) for the creative faculty, which he possessed but in a limited degree. His real distinction lies in his mastery of form, and in his application of this mastery to the development of the concerto. It is thus that we find his violin concertos constantly studied in Germany, for instance by Benda and Quantz⁶; and the best proof of their sterling merits is given by the attraction which they exercised upon Sebastian Bach, who arranged sixteen⁷ of them for the clavier and four for the organ, and developed one into a colossal concerto for four claviers and a quartet of strings.⁸ (See ARRANGEMENT.)

A portrait of Vivaldi is in Hawkins's *History*.

BIBL.—W. ALTSMANN, *Thematischer Katalog der gedruckten Werke Antonio Vivaldis nebst Angabe der Neuauflagen und Bearbeitungen*. A.M.S. Apr. 1922, pp. 262-73.

VIVANDIERE, LA, opéra-comique in 3 acts; text by Henri Cain; music by Benjamin Godard. Produced, Opéra-Comique, Paris, Apr. 1, 1895; in England by the Carl Rosa Company, Court Theatre, Liverpool, Mar. 10, 1896; Garrick Theatre, London, Jan. 20, 1897.

VIVES, AMADEO (b. Catalonia), Spanish composer of light opera; teacher of composition at the Conservatoire, Madrid. Besides his comic operas (which are good), he has attempted more serious work in 'Maruxa,' and in a set of songs ('Canciones epigramáticas') to words from some of the greatest Spanish poets. His lyric comedy 'Doña Francisquita' was inspired by Lope de Vega's play, *La discreta enamorada*. A book of essays, *Sofia* (Madrid, 1923), shows that his capacity for clear thinking is not confined to his music.

J. B. T.

VIVIANI, GIOVANNI BONAVENTURA, of Florence. In 1688 and 1690 he calls himself

⁴ *History*, II. 561; 1789.

⁵ *History*, etc., II. 837; ed. 1875.

⁶ Burney, *Present State of Music in Germany*, II. 134, 166; 2nd ed., 1775.

⁷ Modern criticism has assigned many of the originals to other composers: Prince Ernst of Saxe-Weimar, Telemann, Marcello, See A. Schering, *Zur Bachforschung*, *Sammelb. Int. Mus. Ges.* IV. and V. No. 4 is an arrangement of the same work as the clavier concerto, No. 13.

⁸ This has commonly been mistaken for an original work of Bach: see Forkel, *Life of Bach*, p. 99. English translation, 1820. Fétis says that he possessed the manuscripts of two other arrangements by Bach, namely, of two concerti in the 'Estrò armonico,' for clavier, 2 violins, alto and bass. These do not appear in the catalogue of the Fétis Library.

maestro di cappella of Pistoja Cathedral and *Nobile del sacro Romano Impero*. He had previously been in the emperor's service at Toscana. Fétis, who differs from the above, says that he lived for some time at Innsbruck about 1680. He wrote an oratorio (1690), psalms, motets, solfeggi and several operas, including 'Scipione Africano,' in collaboration with Cavalli (1678) (*Fétis*; *Q.-L.*).

VIVIER, EUGÈNE LÉON (b. Ajaccio, 1821; d. Nice, Mar. 4, 1900), a remarkable horn-player. His father was a tax-collector, and intended him for a similar career, but his passion for music made him throw aside all restraints and go to Paris. He knew enough of the horn to gain admittance to the orchestra of the Italiens, and then of the Opéra, and after some instruction from Gallay appeared at concerts as a solo-player. His extraordinary humour and imagination soon showed themselves, and endeared him to society, in the best circles of which he mixed largely. He was also master of a curious discovery or trick upon the horn, the secret of which he never divulged, by which he could produce three and even four notes at once, so as to play pieces for three horns, with full, sonorous triads, and chords of the 6 and 6-4 from the one instrument. Vivier soon made his entrance at court, and his horn in E, with which he used to play before Louis Philippe at the Château d'Eu, is still preserved at the Conservatoire. From this time forward his fame steadily increased at home and abroad. Among other artistic *tournées* he came several times to England after 1844, and was a great favourite in London for his drollery as much as his music. Philippe Gille wrote the preface for Vivier's pamphlet, *Un peu de ce qui se dit tous les jours* (Mottetoz), printed in green and black, and now extremely scarce. It was a collection of the ready-made phrases which it is so difficult to avoid, and which are the bane of ordinary conversation. G. C.

VIVO, see VIVACE.

VOCAL ASSOCIATION, THE, established in 1856 at a meeting at Store Street Music Hall, attended by about 300 amateurs, with the view of founding in England an association answering to the German 'Gesangverein.' Benedict was elected conductor; Chas. E. Horsley subsequently shared the duties. In 1857 the Society gave a series of concerts at the Crystal Palace, including Mendelssohn's 'First Walpurgis Night,' and it subsequently gave performances at St. James's Hall, at one of which the conductor's opera, 'The Lily of Killarney,' was sung. The concerts included vocal and instrumental solos, and occasionally there was an orchestra, the choir usually numbering 200 voices. The Association has ceased to exist for many years. C. M.

VOCAL CONCERTS, THE (1792-1822). These concerts, the first of which was given on

Feb. 11, 1792, originated in the secession of HARRISON from the ANCIENT CONCERTS (*q.v.*) in 1789. Harrison was joined by Miss Cantelo, whom he subsequently married, and in 1791 by Bartleman, and at the close of that year they circulated proposals for the new concerts, which were begun at Willis's Rooms under the management of Harrison and Knyvett senior. The accompaniments at first were furnished by the pianoforte, at which the elder Knyvett presided as conductor, and a quartet of two violins, viola and violoncello, led by François Cramer. Mr. and Mrs. Harrison and Bartleman were the principal singers, and were assisted in the glees, which formed the principal feature of the concerts, by the Knyvetts and others. Calcott, Crotch, Spofforth, Dr. Clarke and Stevenson contributed new works to the programmes, and Italian music was added. In 1793 Mme. Dussek and Miss Poole (afterwards Mrs. Dickens) joined the vocalists, and the brothers Leander, then the most celebrated horn-players in Europe, were added to the little band. The concerts, ten of which were given each season, were abandoned at the end of 1794, the subscriptions (of three guineas) having fallen off, and Harrison and his wife and Bartleman returned to the Ancient Concerts, the cause of their failure being the competition of Salomon's concerts (with Haydn's music and Mme. Mara among the singers), the Professional Concerts (with Pleyl and Billington) and the Ancient Concerts. In 1801 the Vocal Concerts were revived with the additional attractions of a complete orchestra and chorus. The band was led by Cramer; Grotorex was organist and general conductor; and among the principal singers, besides the two directors, Harrison and Bartleman, were Mrs. Harrison, Mrs. Bianchi, Miss Parke, Miss Tennant and W. Knyvett. The programmes provided a wider variety of excellent music than was ever before given in a single series of concerts. As an episode in their history it may be mentioned that an opposition series, under the name of 'Messrs. Knyvett and Vaughan's Vocal Subscription Concerts,' was begun in 1811 with six or seven hundred subscribers, including the Dukes of Kent, Sussex and Cambridge; the programmes of 1812 included the first acts of 'Don Juan' and 'Figaro,' the finale to the second act of 'Don Juan' and other pieces from Mozart's operas; but in 1812 the death of Harrison led to a union of the two schemes, which was accomplished in 1813. C. M.

VOCALION; an 'organ' or instrument of the free-reed kind, exhibited by James Baillie Hamilton in the International Inventions Exhibition, London, 1885. The first patent was taken out Nov. 13, 1872, by John Farmer (of Harrow) for a combination of reed with string or wire—either as a continuation of the reed or as a coil fastened to the back thereof—

and was succeeded by many more, taken out in the names of Hamilton and others. The first attempts gave a beautiful and very peculiar quality of sound, but by degrees the combination of reed and string from which this proceeded had to be given up, for practical and commercial reasons, and the instrument as exhibited was virtually a harmonium with broad reeds, giving great rigidity of action and therefore purity of tone, and large channels, and acted on by high pressure of wind—not suction. A main peculiarity of the vocalion is that the reeds are placed above the pallets and below the slides, and that though the sliding ‘plug’ of three reeds is only of the width of the groove, the cavities are more than twice as wide. (See AMERICAN ORGAN.) This is expressed in one of Hamilton’s patents (U.S.A., Mar. 25, 1884) as

‘the combination of pallets, soundboard and reeds with cavity-boards, one above the other, the lower one containing the nostrils and the upper one the mouths, and an intermediate controlling slide.’

The vocalion exhibited was 6 ft. square, and stood on a somewhat larger pedestal containing the bellows, wind-chest, etc. It had three manuals, denominated choir, great and swell; two stops in the pedals and three in each manual, as well as three extra ones of lighter quality called ‘complementary.’ In the successive steps of the invention since 1874, it is understood that Baillie Hamilton was much assisted by the practical knowledge and skill of Hermann Smith. (See *Mus. Assoc. Proc.*, 1882-83, p. 59.) G.

VOCALISE (Fr.), VOCALIZZO (Ital.), see SOLFEGGIO.

VOCAL SOCIETY, THE, established 1832 ‘to present the vocal music of the English school, both ancient and modern, including that of the church, the chamber and the theatre, with the addition of foreign compositions of excellence.’

Its first programme at the King’s Concert Rooms, Hanover Square, on Monday, Jan. 7, 1833, included the sestet and chorus from Webbe’s ‘Ode to St. Cecilia’; Bennet’s madrigal, ‘All creatures now’; Attwood’s glee, ‘In this fair vale’; Cooke’s glee, ‘Deh dove’; Bishop’s serenade, ‘Sleep, gentle lady’; Webbe’s catch, ‘Would you know’; solos from Haydn, Hummel, Mozart and Purcell, and an instrumental quintet of Beethoven. T. Cooke was leader; at the organ and pianoforte were Turler, Goss and Horncastle; and the vocalists included Miss Clara Novello, Mrs. Bishop, Miss George, and Bennett, Parry, Phillips, Hobbs and Braham. The original intention of presenting mainly English music was departed from in the first year of the Society’s existence, for we find in its programmes the names of Palestrina, Pergolesi, Bononcini, Beethoven, Mozart and other foreign composers, and from a notice of the last concert given in 1833 we learn that, ‘with the exception of three glees and a madrigal, the performance consisted entirely of

the works of foreign artists.’ (See HANOVER SQUARE ROOMS.) C. M.

VOCE DI PETTO, CHEST-VOICE (Ger. *Bruststimme*); VOCE DI TESTA, HEAD-VOICE (Ger. *Kopfstimme*); see SINGING, subsection REGISTER.

VOGEL, CHARLES LOUIS ADOLPHE (b. Lille, May 17, 1808; d. Paris, Sept. 1892), though of German origin, is accounted a Franco-Belgian composer. He studied at the Paris Conservatoire. His opera, ‘Le Podestat,’ was produced at the Opéra-Comique in Paris in 1833, and a grand oratorio, ‘Le Jugement dernier,’ represented with costumes and scenery, had a good deal of success. ‘La Siège de Leyde’ came out at the Hague in 1847; ‘La Moissonneuse’ at the Théâtre Lyrique in 1853; ‘Rompons,’ a piece in one act, at the Bouffes-Parisiens in 1857; ‘Le Nid de cigognes’ at Baden-Baden in 1858; ‘Gredin de Pigoche’ at the Folies-Marigny, Paris, 1866; and ‘La Filleule du Roi’ first in Brussels and afterwards in Paris in 1875. He wrote numerous songs, of which one of his earliest, ‘Les Trois Couleurs,’¹ celebrating the return of the tricolour after the revolution of 1830, had a peculiar fame. He also wrote several symphonies, quartets and quintets for strings which gained the Prix Trémont at the Académie, and other things. M., addns.

VOGEL, JOHANN CHRISTIAN (b. Nuremberg, c. 1756; d. Paris, June 28, 1788), studied at Ratisbon under Riepel, who made him familiar with the works of Graun and Hasse. In 1776 he entered the service of the Duke of Montmorency at Paris, and afterwards of the Count of Valentinois. He became an enthusiastic admirer of Gluck, whom he took for his model, and imitated with such skill that Gluck even admitted his dramatic talent, and accepted the dedication of his opera, ‘Le Toison d’Or,’ which was not performed, however, until 1786, when it went through a number of performances, and was afterwards revived as ‘Medea in Colchis.’ Before its first appearance he had already started on another opera, ‘Démophon,’ but his irregular habits retarded the progress of the work, which was not finished until shortly before his death, and was first performed in 1789. Fétis speaks of the overture as one of the finest works of its kind. He composed also symphonies, concertos for various instruments, quartets, trios, duos, etc. (Mendel; Fétis; Q.-L.).

VOGL, (1) HEINRICH (b. Au, near Munich, Jan. 15, 1845; d. Munich, Apr. 21, 1900), began life as a schoolmaster, and received instruction in singing from Franz Lachner, and in acting from Jenk, stage manager of the Royal Theatre, Munich, where he made his début on Nov. 5, 1865, as Max, in ‘Der Freischütz.’ His success was immediate, and he remained at Munich

¹ Words by Adolphe Blanc, sung by Chollet at the Théâtre des Nouveautés (Place de la Bourse, Paris).

throughout his career, making the usual tours in Germany and Austria in company with his wife, whom he married in 1868. He excelled pre-eminently in the operas of Wagner, and played Loge and Siegmund on the production respectively of 'Rheingold' (Sept. 22, 1869) and 'Walküre' (June 26, 1870) at Munich. He sang at the Beethoven Centenary Festival at Bonn in 1871. He was the first Tristan (after the four performances by Schnorr von Carlsfeld), and for some years the only representative of the part. On the production of the trilogy at Bayreuth in 1876 he again played the part of Loge, and made a great hit by his fine declamation and admirable acting. On May 5, 1882, he made his first appearance in England at Her Majesty's in the same part, and subsequently in Siegfried, and on May 18 was heard with pleasure in Handel's 'Total Eclipse' and songs by Franz, etc., at a symphony concert at St. James's Hall. He composed many songs, and an opera, 'Der Fremdling,' was produced at Munich, May 7, 1899, with himself and Terina in the chief parts. A biographical sketch, by Baron Hermann von Pfordten, appeared in the same year.

His wife, (2) THERESE, whose maiden name was THOMA (*b.* Tutzing, Lake Starnberg, Bavaria, Nov. 12, 1845; *d.* Munich, Sept. 29, 1921), learnt singing from Hauser at the Munich Conservatorium, and in 1865 first appeared in opera at Carlsruhe. In Dec. 1866 she made her début at Munich as Casilda (Auber's 'Part du Diable'), became very popular as a dramatic soprano, and remained there until her retirement in 1892. She was for some years the only Isolde, and was the original Sieglinde at Munich. On May 6, 1882, she made her first appearance in England at Her Majesty's, as Brünnhilde, and played the part throughout the trilogy with great success. In the second 'cycle' of performances she played with equal success her old part of Sieglinde, having resigned Brünnhilde to Mme. Reicher-Kindermann (since deceased), who had been the Fricka in the first cycle. A. O.

VOGL, JOHANN MICHAEL (*b.* Steyer, Upper Austria, Aug. 10, 1768; *d.* Vienna, Nov. 19, 1840), distinguished opera-singer, and, with Baron von Schönstein, one of the principal interpreters of Schubert's songs. He had his general education in the monastery of Kremsmünster, and took part there in little Singspiele by Süssmayer, giving considerable promise both as singer and actor. He next went to the University of Vienna, and was about to take a permanent post in the magistracy of the city when Süssmayer engaged him for the court opera. He played with the German opera company formed by Süssmayer in the summer of 1794, and made his début as a regular member of the court opera in the following May. From that period till his retirement in 1822 (his last appearance was in Grétry's 'Barbe-bleue,'

1821) he was a great favourite, and held an important position as a singer and an actor in both German and Italian opera. Gifted with a baritone voice of sympathetic quality, his method was excellent, and his phrasing marked by breadth, intelligence and great dramatic expression. Such parts as Oreste ('Iphigénie en Tauride'), Jakob ('Schweizerfamilie'), Count Almaviva ('Le Nozze di Figaro'), Micheli ('Deux Journées'), Kreon ('Médée'), Telasco ('Ferdinand and Cortez') and Jacob (Méhul's 'Joseph'), show the range of his powers.

He became acquainted with Schubert somewhere about 1816, through the latter's friend Schober. Vogl recognised Schubert's genius, urged him to produce, and did his best to make him known by singing his songs both in public and private. The 'Erl-König' was first introduced by him to the general public at a musical entertainment at the Kärnthnerthor Theatre (Mar. 7, 1821), though it had been sung before at a soirée of the Gesellschaft der Musikfreunde (Jan. 25) by von Gymnich, an excellent amateur. Vogl in his diary calls Schubert's compositions 'truly divine inspirations, utterances of a musical clairvoyance,' and Schubert, writing to his brother Ferdinand, says, 'when Vogl sings and I accompany him we seem for the moment to be one, which strikes the good people here as something quite unheard of.' In the summer of 1825 the two friends met at Steyer, and made a walking tour through Upper Austria and Styria, singing Schubert's songs like a couple of wandering minstrels at all their resting-places, whether monasteries or private houses. Schubert publicly testified his esteem by dedicating to Vogl three Lieder (op. 6), published in 1821.

Vogl's early conventual education left its traces in his fondness for serious study, to which all his spare time was devoted, his favourite authors being Goethe and the Greek classics. In 1823 he went to Italy, and on his return in the following spring astonished his friends by announcing his marriage with the daughter of the former director of the Belvedere, whom he had long treated as a sort of pupil. One of his last appearances in public was at a soirée of the Gesellschaft der Musikfreunde in 1833, when he sang the 'Wanderer.' He died in 1840, Nov. 19, on the same day on which his friend Schubert had departed twelve years before, and was buried in the churchyard of Matzleinsdorf, where rest Gluck and his wife (1787), Salieri (1825), and the eminent singers Forti (1859), Staudigl (1861), and Ander (1864). C. F. P.

VOGLER, GEORG JOSEPH, the Abbé (*b.* Würzburg, June 15, 1749; *d.* Darmstadt, May 6, 1814), is one of the most curious figures in the annals of music. He evinced from an early age a religious cast of mind and an aptitude for music, and his attachment to the organ dated from his tenth year. Both his father and his

step-father, one Wenceslaus Stautinger, were violin-makers. While learning the organ his stepfather let him have pedals attached to his harpsichord, and Vogler practised with such determination all night that no one would live on the floor below.

At the same time his independent turn of mind exhibited itself. He elaborated a new system of fingering, and contrived to learn the violin and other instruments without a teacher; and even while a pupil at the Jesuits' College he played much in the churches, and made a name for himself in the contrapuntal preludes which were regarded as the test of an organist's skill.¹ How long this sort of life lasted is not very clear, but Vogler himself declares that he was at Würzburg as late as 1769.

STUDIES.—His departure must have taken place very shortly after this. He proceeded in the first place to Bamberg to study law. In 1771 he went from Bamberg to Mannheim, then one of the chief musical centres of Germany, and obtained permission to compose a ballet for the Court Theatre, which produced such an impression that the Elector, Karl Theodor, was led to provide him with funds to go to Bologna and study counterpoint under Padre Martini. Starting about the beginning of 1773 Vogler travelled by way of Venice. He there met Hasse, and also a pupil of VALLOTTI (*q.v.*), from whom he first heard of the system of harmony that he subsequently advocated with such vehemence.² The original object of his journey was not achieved, for, though kindly received by Martini, they speedily conceived a repugnance for each other. Vogler could not tolerate a slow and graduated course of counterpoint; and Martini complained that his pupil had neither perseverance nor aptitude. Vogler soon abandoned the trial, and repaired to Padua with a view of studying for Orders, and learning composition from Vallotti, who had been for nearly fifty years musical director of San Antonio. But the old organist's method of teaching was wholly distasteful to his disciple, and in five months Vogler went on to Rome, where he was ordained priest at the end of 1773.³ In the Papal city he was made Apostolic Prototary and Chamberlain to the Pope, knight of the Order of the Golden Spur, and member of the Academy of the Arcadians. He also found time to gain some instruction from the Bohemian musician Mysliweczek, and armed with these ecclesiastical credentials and musical experience he returned in 1775 to Mannheim.⁴ The Elector at once appointed him court chaplain, and he proceeded forthwith to compose a 'Miserere'

with orchestral accompaniments, and was made second Kapellmeister, a result partly owing to the influence of some ladies of the court, if Mozart may be trusted.⁵

It was at Mannheim that he first put himself forward as a teacher, and established the first of his three schools. He maintained that most previous teachers had pursued erroneous methods, and promised to make his pupils composers by a quicker system. All this naturally provoked much opposition, but his school must have had some merits, for amongst those who were actually students or came directly under its influence were Winter, Ritter, Kraus, Danzi and Knecht—an ardent disciple. At Mannheim Vogler made enemies as well as friends, and it is probable that when Mozart visited Mannheim in the winter of 1777 he fell into that section of the musical world there. On no other supposition can we fully explain the tone in which he speaks of Vogler in his letters, which will not allow the Abbé a single redeeming feature. Vogler at any rate was studiously attentive to Mozart, and after having several times in vain invited Mozart to call on him, put his pride in his pocket, and went to call on the newcomer.⁶ During Mozart's visit the Elector-Palatine became Elector of Bavaria, and in the same year (1778) removed the court to Munich. Vogler's devotion to his school kept him at Mannheim, and he did not, in all probability, go to Munich till 1780. His five years at Mannheim are marked by other achievements than the Tonschule. At the end of 1777 we find him opening a new organ built after his design at Frankfort. The next year, in all likelihood, he was summoned to Darmstadt by the heir-apparent—the Prince who provided him with a home in his last years—to compose the music for a melodrama called 'Lampedo' (or 'Lampredo').⁷ Another work was the overture and *entr'actes* to 'Hamlet,' brought out at Mannheim in 1779. These were succeeded by an operetta, 'Der Kaufmann von Smirna,' written about 1780 for the theatre at Mainz.

TRAVELS.—The next twenty years of Vogler's life present great difficulties to his biographer. Although nominally settled at Stockholm from 1786 or 1787–99, he was really constantly travelling, and the records of his journeys are so fragmentary and contradictory, that it is impossible to construct a complete narrative. Thus, though he undoubtedly extended his travels to Spain, Portugal, Greece and Africa, nay, even to Armenia and Greenland,⁸ the authorities are by no means agreed as to when he went. One writer⁹ gives it in 1783–86, another¹⁰ in 1792, while the dates at which he appears in other distant spots make it difficult

¹ See also the *Graduale (De Profundis)* of the *Missæ Pastorica*.

² The account in the text follows the statements usually made with reference to Vogler's proceedings at Bologna and Padua. But in the *Musikalische Correspondenz* of Spire for 1790, No. 15, Professor Christmann asserts that the Elector Palatine himself directly recommended Vogler to Vallotti.

³ *A.M.Z.*, vol. vi, p. 250.

⁴ According to a statement in his *Choral System* (p. 6), it was in this year that he learnt the basis for his system from Vallotti.

⁵ Letter, Nov. 13, 1777.

to understand how such an extensive tour could have been managed at all.

About 1780 Vogler followed the Electoral court to Munich. He there employed himself in perfecting the education of the celebrated singer Madame Lange, in teaching composition to B. A. Weber, and in composing an opera in five acts entitled 'Albert III. von Baiern,' which was represented at the Court Theatre in 1781. It did not prove successful, and disgust at the want of appreciation that he found in Germany seems to have induced him to appeal to foreign musicians. With this view he submitted an exposition of his system to the Académie Royale des Sciences, probably in 1781, and to the Royal Society in 1783.¹ In 1782 he was in Paris² and the next year perhaps crossed the Channel to England.³ Returning from England, if indeed he really visited it at this time, he again attempted to obtain success as an opera composer. But his comic opera 'La Kermesse,' produced at the Théâtre de la Comédie Italienne on Nov. 15, 1783, proved a dead failure, and could not even be finished. Another effort in Germany was crowned with success. 'Castor and Pollux,' produced at Munich in 1784, was not only received with applause but continued a favourite for years.⁴ The close of 1784 and beginning of 1785 appear to have been occupied with the journey to Africa, Greece and the East. At all events the next definite trace of him is on Nov. 22, 1785, at a great organ recital in Amsterdam, for which no fewer than 7000 tickets were sold.⁵ In the next year he entered the service of the King of Sweden as Kapellmeister, resigning his posts at Munich, where he had become chief Kapellmeister on the death of Holzbauer in 1783.⁶ At Stockholm he established his second Tonschule, but neither that nor his official duties put much check on his roving propensities. He signalled his arrival with a French opera, 'Eglé,' produced in 1787, but the next year he is at St. Petersburg,⁷ and in Nov. 1789 at Amsterdam.

ENGLAND.—He arrived in London at the beginning of 1790, and was very successful. His performances were applauded and he was entrusted with the reconstruction of the organ in the Pantheon. According to Gerber⁸ he intro-

duced organ pedals into this country, and their introduction by the organ-builder, England, certainly belongs to the year of his visit. (See ORGAN, Vol. III. p. 753.) His last performance at the Pantheon took place on May 31, and the proceeds of his visit amounted to £1000 or £1200. One of his most admired performances was 'The pastoral festival interrupted by a storm,' which seems to be the piece by Knecht which was the precursor of Beethoven's Pastoral Symphony. (See KNECHT.) He went to the Handel Festival in Westminster Abbey,⁹ but was not much impressed. The Festival ended on June 3, and he next appeared at Warsaw. In the early part of September he was giving concerts at Coblenz, Mainz and Frankfort. From thence he journeyed on, through Worms, Carlsruhe, Durlach and Pforzheim, to Esslingen, where the enthusiastic inhabitants presented him with the 'wine of honour' usually reserved for sovereigns.¹⁰ Rackwitz remained at Frankfort, making a free-reed stop for the Carmelite church,¹¹ but Vogler probably rejoined him in time for the coronation of Leopold II. on Oct. 9. The Abbé now began to be held in honour in his own country. At Frankfort his 'Hallelujah' fugue fairly astonished both friends and enemies.¹² It was at this time he projected a return to London with the view of establishing a manufactory of free reeds.¹³ This intention was not carried out: he returned to Stockholm, and was followed by B. A. Weber, who gave up his position as conductor at Hanover to obtain further instruction from his old master. The early part of 1791 was employed in the composition of 'Athalie' and 'Gustav Adolf,' and in September he was giving organ recitals in Hamburg. The assassination of Gustavus Adolphus III., whom he liked and respected,¹⁴ on Mar. 16, 1792, only a few days after the production of his opera, started him off with Weber on another long tour through Sweden, Norway, Denmark and the Netherlands.¹⁵ In the next year¹⁶ he undertook a course of lectures on harmony, and in 1794 betook himself to Paris to hear the choruses accompanied by wind instruments with which the new-born republic solemnised its fêtes, and to add the result of his observations to his 'Polymelos or characteristic music of divers nations.' At St. Sulpice he gave an organ performance for the poor, the receipts of which were 15,000 livres. On his return he gave a second course of lectures in 1795,¹⁷ and in 1796¹⁸ erected his

¹ *Choral System*, pp. 1-5. The records of the Royal Society afford no trace of communication from Vogler or anything else bearing on the question. The *Journal des Savans* for 1782 has an anonymous article comparing the Tonometers of Pythagoras, the Greeks, and the Abbé Vogler, which states that his instrument had been presented to the Académie Royale des Sciences together with the inventor's new musical system, which he proposed to publish shortly.

² So at least we may infer from the date of his *Essai de diriger le goût*, etc., published in Paris.

³ *Choral System*, p. 5.

⁴ Pétis assumes that 'Castor and Pollux' was produced at Mannheim in 1791, but contradicts himself elsewhere (see his account of Mlle. Kreiner). For the date here given see *A.M.Z.* vol. viii. p. 318.

⁵ *A.M.Z.* vol. i. p. 575.

⁶ Pétis speaks as if Vogler resigned his Bavarian appointments in 1782. This is at variance with the title page of Knecht's *Portrait Musical* (for which see PROGRAMME-MUSIC), published in 1784 (see KNECHT). Moreover Winter, who succeeded Vogler as Kapellmeister, obtained the post in 1788. (*A.M.Z.* vol. xxviii. p. 368.)

⁷ *A.M.Z.* vol. xxv. p. 152.

⁸ *Lexicon der Tonkünstler*. The Lutheran Chapel had an organ with pedals in 1772. W. E. G. T.

⁹ On Vogler's performances in London see *The Gazetteer and New Daily Advertiser*, for May 8, 22 and 29, 1790.

¹¹ Compare with the authorities just quoted, *A.M.Z.* vol. xxv. p. 153.

¹² Christmann and Schubart, *l.c.*, give several instances.

¹³ Christmann.

¹⁴ To this date some assign his travels in the East.

¹⁵ Pétis says 1792.

¹⁶ This is explicitly stated by himself. See *Intelligenz-Blatt* attached to *A.M.Z.* of June 25, 1800.

¹⁷ *A.M.Z.* vol. xxv. p. 153.

orchestration at Stockholm. About this time his ten years' engagement as royal music-director came to an end, and he proposed to leave Sweden. But his school was considered so successful¹ that the Regent prevailed on him to prolong his stay till the spring of 1799.² In that year he received from the Swedish court an annual pension of 500 dollars, departed for Denmark, and made an unusually protracted stay in the Danish capital, during which he brought out an important work for the church, and another for the stage.

The former was his *Choral-System*, in which he reviewed Fux, Kirnberger and Rameau, and professed to demonstrate that all the Protestant Choral-melodies were written in the Greek modes. Of this work the Danish government ordered 100 copies for distribution gratis to organists. The latter was the music to 'Hermann von Unna.' This, though originally written to a Swedish libretto by Spöldebrand, had not been performed in Sweden. It now proved a great success. Though the ticket office did not open till 4 in the afternoon, people began to assemble round it at 6 A.M.

VIENNA AND GERMANY.—After these achievements Vogler proceeded, in the summer of 1800, to Berlin. There he gave 'Hermann' several times in German by way of attracting the general public, appealed to the *savants* by his 'Data zur Akustik,' and to the religious world by his proposals to reduce the cost of organ-building. He was entrusted with the reconstruction of the organ in St. Mary's,³ and gave a performance on it on Nov. 28, 1800. The King of Prussia commissioned him to build an organ at Neu-Ruppin. But this did not keep him in Prussia. He set off to Leipzig, gave three organ recitals in the spring of 1801, and then went on about June to Prague. At Prague he was received with great honour, and made governor of a musical school. It was perhaps in consequence of the failure of his orchestration that he left Prague for Vienna, arriving about the end of 1802.⁴ He was reported to be invited to Vienna to write an opera, and rumours of the forthcoming work were constant throughout 1803. 'Samori,' however, did not actually appear till May 17, 1804, at the Theatre an-der-Wien, after more than fifty rehearsals. It enjoyed a moderate success, but on the course of operatic history at Vienna it exercised no influence at all. Two

other of Vogler's works were given there, 'Castor and Pollux' (with additions and alterations), in a concert-room on Dec. 22 and 23, 1803, and 'Athalie' at the Redoutensaal in Nov. 1804. Neither made much impression. While at Vienna, Vogler celebrated the thirtieth anniversary of his ordination. An interesting circumstance connected with his stay there is his meeting with Beethoven, and their extemporising in turn on the piano. (See BEETHOVEN, Vol. I. p. 282.) Another is that here Gänsbacher, and, through him, C. M. von Weber,⁵ became his pupils. Weber made the PF. arrangement of 'Samori.' Vogler had now been more than two years in Vienna, and his wandering instincts revived. He spent the summer of 1805 at Salzburg, *en route* for Munich.⁶ There he gave organ recitals, and at Christmas had his Pastoral Mass performed in the Court Chapel. When Napoleon, on his return from Austerlitz, paused at Munich to celebrate the marriage of Eugène Beauharnais with the Princess Augusta of Bavaria, the Abbé was the musical hero of the hour, and 'Castor and Pollux' was performed on the wedding day, Jan. 14, 1806.⁷ He made some little stay in Munich, occupying himself as usual in simplifying organs and publishing theoretical works. In Sept. 1807 he turns up at Frankfort, and shortly afterwards⁸ received an invitation from the Grand Duke of Darmstadt, Louis I., for whom he had written 'Lampedo' nearly thirty years before, to settle in that town. The Duke gave him a salary of 3000 florins, a house, with dinner and supper every day from his own kitchen, four wax candles a day and firewood *ad libitum*, the titles of Kapellmeister, and Privy Councillor for Ecclesiastical Affairs, and the Order of Merit of the first class. In return for these honours and emoluments he was not expected to perform any duties, or to take part in the opera unless at the performance of one of his own works. The Duke thought himself well repaid by the mere presence of such a celebrity.

Here he opened his last and most successful Tonschule; and in the remaining six and a half years of his life became very fond of the dull old town. It contained, in fact, everything necessary to make it a haven of rest. The accusations of charlatanism that he had so often combated down to 1802,⁹ at any rate did not penetrate to Darmstadt. In 1810 he visited Frankfort, Mainz, Hanau and Offenbach, with Weber, and made another visit to Frankfort for the production of his pupil's opera 'Silvana' on Sept. 17. Two years later he journeyed through Munich to Vienna,

¹ B. A. Weber is the only musician of note who studied under Vogler at Stockholm. The School in 1796 consisted of seventeen pupils, while the orchestra of the Academy consisted of twenty-eight Swedes. Four of these Swedes, whose total ages did not exceed thirty-six years, executed one of Vogler's quartets in public, while mere children of the singing school performed several entire operas! Perhaps Vogler did more real service to Swedish music by giving excellent performances of Gluck's music. (*A.M.Z.* vol. xlii. p. 257.)

² He was at Stockholm, Apr. 28, 1799 (*A.M.Z.* vol. i. p. 592). In July he was travelling between Copenhagen and Hamburg (see his attack on Müller in *A.M.Z.* vol. i., *Intell.-Blatt*, xviii. p. 26), and was at Copenhagen on Nov. 17, 1799 (*A.M.Z.* vol. ii., *Intell.-Blatt*, vii.).

³ The specification of this organ may be found in the *Intelligenz-Blatt* attached to the *A.M.Z.* for Feb. 4, 1801.

⁴ This date is taken from *A.M.Z.* vol. v. p. 374. The *Biographie Gänsbacher* states that Vogler came to Vienna about the end of 1803.

⁵ *Life of C. M. v. Weber*, by his son. Gänsbacher (*Biographie*) says that he first made acquaintance with Weber at Vogler's house.

⁶ Fétis's statement that Vogler left Vienna in consequence of the war is refuted by dates.

⁷ One of the pieces in 'Polymelos' is written in commemoration of this marriage.

⁸ Vogler is found in Darmstadt in 1806. (*A.M.Z.* vol. xxv. p. 153.)

⁹ See the Preface to the *Handbuch zur Harmonielehre*.

where it was noticed that he 'preserved his long acknowledged mastery' of the organ. He employed himself in composing for stage, concert-room and church, and his best work, the Requiem, was the occupation of his last days. On May 4, 1814, his friend Gottfried Weber visited him on passing through Darmstadt and remained till mid-day on the 5th. The following day (May 6), at half-past four in the morning, the old musician died of apoplexy. He was buried on the evening of the 7th, quietly, amid tokens of respect and grief from those who knew him, from his old scholar, the Grand Duchess, downwards. Wherever one of his numerous pupils was to be found, the intelligence came like a heavy blow, for it announced the loss of a musician zealous for his art and of a man devoted to his friends.¹

PERSONALIA.—Vogler was short in stature, and latterly became corpulent. His arms were of great length, his hands enormous, and his general aspect has been described as that of a large fat ape. His singular character was strongly tinged with vanity, and not without a touch of arrogance. He delighted to array himself in his purple stockings and gold buckles, with his black silk ecclesiastical mantle and the grand cross of the Order of Merit given him by the Grand Duke of Hesse.² He would take his prayer-book with him into society, and often kept his visitors waiting while he finished his devotions. Beneath his quaint exterior lay remarkable mental gifts, a great insight into character, and a powerful memory. Nor were his egotism and affectation without counterbalancing excellences. He was always anxious to avoid a quarrel, ready to acknowledge the merits of brother artists,³ and to defend them, even if they had opposed him, provided their music was good. The civility which he showed to Mozart is in marked contrast to Mozart's behaviour towards him. Moreover, his vanity did not blind him to his own defects. He was well aware that harmony, not melody, was the department in which he excelled. 'Had I your flow of melody,' he said to Sterkel, 'and you my science, we should be both great men.'

An enthusiastic contemporary⁴ calls him 'an epoch-making man.' The expression is too strong, but as a musical iconoclast Vogler certainly did excellent service. His incessant attacks on the pedantic methods of musical instruction and systems of harmony in vogue, and on the old methods of organ-building, were often extravagant and untrue. His attacks

on rooted prejudices stimulated not only his pupils Weber and Meyerbeer, but acted indirectly on a wide circle.

COMPOSITIONS.—As a composer it was his aim to retain the simple and severe beauty of the old church music and yet enrich it with the wealth of harmony at the command of modern music. He was thus most happy in his treatment of a canto fermo. He brought to this task a facility in vocal counterpoint gained in the ecclesiastical schools of Italy, and an intimate acquaintance with the resources and effects of an orchestra acquired as Kapellmeister at Mannheim. His Symphony in C and his Requiem are his best works, and contain original and striking music. The former was played at the Gewandhaus under Mendelssohn in 1838 and 1839, and by the Euterpe in the season 1844–45. The overture to 'Samori,' whose insignificant themes and fine development make it a type of its composer, was performed later still, in 1847, and the characteristic Pastoral Mass was both popular and impressive. A striking success was achieved by the Psalm 'Ecce quam bonum' at Choron's first Sacred Concert at Paris in 1827, and though the programme included works by Scarlatti, Marcello, Handel, Haydn and Mozart, we are told that the honours rested with Vogler.⁵

INNOVATIONS IN THE ORGAN.—But it was as an organist and theorist that Vogler made most stir. He would travel about playing in the most *ad captandum* style such things as 'Chentew, a Chinese song,' a 'Hottentot melody in three notes,' 'The Fall of the walls of Jericho,' 'Thunder-storms,' and the like,⁶ as if with the design of concealing his complete command of the highest ranges of organ-playing. His extempore playing never failed to create an impression, and in the elevated fugal style he easily distanced all rivals. 'One was amazed at his performance in the severe style,' says Rink; and his study of the construction of the organ gave him an unerring instinct in the selection of stops. The ill-natured criticism of Mozart in his letter to his father of Jan. 17, 1778, is by no means generally endorsed by other contemporary writers. They declare that in transposing and accompanying, Vogler had remarkable readiness and skill, and that as a reader at sight he 'was perhaps unsurpassed and unique.'⁷

In organ-building,⁸ his first practical efforts were made in 1784. Five years later he completed an instrument which he called the Orchestron, and gave performances on it at

¹ A.M.Z. vol. xlix. p. 558.

² Christmann mentions a performance intended to represent 'The Last Judgment according to Rubens.' Pictorial music has perhaps never been pushed beyond this.

³ Once at least, Vogler met Beethoven, viz. at Sonnleithner's house in the winter of 1803–04. (See BEETHOVEN.) Gänsbacher, who then heard both extempore for the first time, admired Beethoven, but was perfectly enchanted with the adagio and fugue thrown off by Vogler. So excited was he that he could not go to bed after it, and knocked up his friends at unseasonable hours to quiet his excitement by describing what he had heard (*Biographie*).

⁴ *Dat. zur Akustik*.

¹ See the touching letters of Gottfried and C. M. v. Weber on receiving the news of Vogler's death. In the former, by the way, Vogler's age seems wrongly given. In 1845 the Historical Society of Würzburg placed a tablet in the house in which Vogler was born, with the inscription 'Geburtsort des Tonkünstlers Georg Joseph Vogler, geboren den 16. Juni 1749, gestorben den 6. Mai 1814.'

² The analysis prefixed to 'Die Scala' has a sort of facsimile of Vogler's signature attached to it. The autograph is as eccentric as the man, being encircled with the most comical flourishes.

³ See Christmann's report of a conversation with Vogler.

⁴ Schubart, *Ästhetik*.

various dates at Amsterdam, London, Stockholm and Prague. It is described as being 9 feet square, 6 feet high on each side, and 9 in the centre. This box contained about 900 pipes, and had shutters for *crescendos* and *diminuendos*. The reed-stops were free reeds, and variety of power in their case was gained by three canvas screens in the wind-trunk. As to the effect produced, opinions were much divided. At Amsterdam it was asserted to be the *non plus ultra* of organ-building, at Prague it was declared a failure. Vogler was also prepared to 'simplify' old organs. He claimed to work such a metamorphosis in an instrument in three weeks that its effect would be largely enhanced, though many of the old pipes were removed. The cost of an organ on his system was alleged to be a third of that of one built in the old way. Such pretensions were sure to provoke keen opposition. At Berlin he was charged with stealing the pipes removed in 'simplifying' the organ in St. Mary's Church. The falsity of the charge was demonstrated, but it shows the feeling against him.

His proposals were fourfold: viz. (1) to avoid the use of expensive large pipes; (2) to introduce free reeds; (3) to arrange the pipes in a different order on the wind-chest, and (4) to remove mutation stops.

(1) The means by which the cost of organs was diminished without depriving them of their resources lay in Tartini's theory that just as a note gives certain harmonics, so the harmonics of a note if combined give the fundamental note. The first harmonics of a pipe of 32 feet would be represented by pipes of 16 feet and of $10\frac{2}{3}$ feet. It was therefore possible by employing a pipe of 16 feet and a pipe of $10\frac{2}{3}$ feet together to obtain a 32-foot sound without having to use a 32-foot pipe. Time appears, on the whole, to have decided in favour of Tartini and Vogler on this point. It is true that some organ-builders and organists still hold that the 'third sound' is but a poor apology for the real pipe-produced sound, and that every organ of any pretensions still contains large pipes. On the other hand, a quint on the pedal organ undoubtedly enjoys great favour as an adjunct to or substitute for the 32-foot stop.

(2) The free reed was derived from a Chinese organ, and was applied about 1780 to organ reed-stops by a Copenhagen organ-builder named Kirsnick, who had settled at St. Petersburg. Vogler was so impressed with Kirsnick's experiment that he induced Rackwitz, Kirsnick's assistant, to follow him to Stockholm, and make several stops on this principle. When Vogler returned to Germany in 1799 he carried the invention with him wherever he went, and it was through his advocacy that people first realised its capabilities. To this initiative must be attributed not only the free-reed stops in

organs, but also the HARMONIUM (*q.v.*) and its varieties.

(3) Vogler arranged the pipes of an organ in semitonal order—the large pipes at the left end of the sound-board, and the small pipes at the right end. Most organ-builders adhere to the old system; but Vogler's arrangement has found adherents.

(4) On the fourth point Vogler has achieved an undoubted success. The mixtures still found in organs are not the overwhelming ones that he assailed. Outside the particular questions raised by Vogler, his influence on organ-building was considerable, and much of the improvement therein in the last hundred years may be ascribed to his attacks.

THEORETIC TEACHING.—As a theorist Vogler developed the tenets of Vallotti. His system of harmony was founded on acoustics, and its fundamental principle was that not only the triad (common chord), but also the discords of the seventh, ninth and eleventh could be introduced on any degree of the scale without involving modulation. He went even beyond this, and allowed chromatically altered forms of these chords and inversions of them. But his system never took much root. According to Knecht, its most ardent advocate, it was full of practical advantages, placed in a clear light the formation of the scales, simplified figuring and thorough-bass, and got rid of all sorts of meaningless and confusing terms, 'dominants that do not dominate, Vorschlags, Nachschlags, etc.' Two other writers have founded their systems on that of Vogler, F. J. C. Schneider and Jelensperger; but it has passed into oblivion.

It is as a teacher that Vogler has most claims on posterity, for no musician has ever had so many remarkable pupils. As a teacher of singing he was in great request, and the celebrated Madame Lange (Aloysia Weber) owed almost everything that was admirable in her singing to his instruction.¹ It was, however, to the teaching of composition that he directed his greatest efforts; and from his Schools at Mannheim, Stockholm and Darmstadt came forth Winter,² Ritter, Kraus, Danzi, Kornacher, B. A. Weber, Baron von Poisel, Gänsbacher, C. M. von Weber and Meyerbeer. Sterkel also received lessons from Vogler, and Knecht the organist and Gottfried Weber were very directly influenced by him. His pupils conceived the deepest regard for him. 'Mere association with him,' says Gänsbacher, 'was a kind of school.' Vogler was not only a most judicious and sagacious teacher,³ he was also the kindest and most generous of friends, and he reaped the reward of his kindness by finding that his old pupils

¹ Schubart, *Ästhetik*, p. 135.

² Winter afterwards objected to be called a pupil of Vogler, apparently without good reason. Compositions of his appear in the *Mannheimer Tonschule*.

³ As for instance when he made C. M. v. Weber go back to the study of the great old masters in 1803.

after passing into the world were ever ready to return to his side.¹ Few scenes of artistic life are more charming than the picture of the details of Vogler's last Tonachule at Darmstadt. After the Abbé had said Mass, at which one of his scholars played the organ, all met for a lesson in counterpoint. Then subjects for composition were given out, and finally each pupil brought up his piece to receive the criticism of his master and fellow-pupils.² Every day a work of some great composer was analysed. Sometimes the Abbé would propound a theme for improvisation. Not unfrequently he would play himself, as he never played except when alone with his 'three dear boys,' in the empty church. From the mind of one of these 'boys' the impression of these performances was never effaced, for Weber always described them as a thing not to be forgotten. Anon we get glimpses of Weber at work on 'Abu Hassan' or on 'Papa's' biography, while the 'old gentleman' looks on, and advises or composes, consuming 'enormous quantities of snuff.' By way of varying the regular routine the master would take his scholars with him to organ recitals in neighbouring towns. The pupils, in their turn, would diversify the common round by writing an ode to celebrate 'Papa's' birthday.³ A happier household can hardly be imagined. When the master died, his pupils felt as if they had lost a father. 'Reiner . . . announced to me yesterday,' wrote Weber to Gänsbacher (May 13, 1814), 'that on the 6th our beloved master Vogler was suddenly snatched from us by death. . . . He will ever live in our hearts.'

A list of Vogler's works in various departments is appended.

OPERATIC WORKS

(Arranged as far as possible in chronological order, with the places where they were first performed.)

- Ino, cantata by Ramler. Darmstadt, 1779.
 Lampedo (or Lampredo), a melodrama. Darmstadt, about 1779.
 Hamlet, overture and entr'actes for the play of. At Mannheim, 1779.
 Der Kaufmann von Smirna, operetta. At Mannheim, 1771.
 Albert III. von Bayern, opera in 5 acts. At Munich, 1780.
 Le Kermesse, opera. At the Comédie Italienne in Paris, Nov. 15, 1783.
 Le Patriotisme, opera. Versailles, 'on occasion of Siege of Gibraltar.' 1783.
 Castor and Pollux, opera in 3 acts. At the Italian Opera in Munich, during the Carnival of 1784.
 Eglé, French opera. At Stockholm, 1787.
 Le Patriotisme, opera. Written for the Paris Académie in 1788, but rejected, or, at all events, not performed.
 Athalia, choruses in Racine's play of. At Stockholm, 1791.
 Gustav Adolf, Swedish opera. At Stockholm, Mar. 1792.
 Hermann von Unna, overture, choruses, dances and one song. At Copenhagen, in the early part of 1800.
 Die Hussiten vor Naumburg im Jahr 1492. 'Schluss-Chor' to Kotzebue's drama. At Leipzig, Sept. 1802.
 Samori, opera in 2 acts, words by F. X. Huber. At the Theatre and-der-Wien, Vienna, May 17, 1804.
 Der Admiral, comic opera. Darmstadt, 1810.

¹ E.g. Kraus in 1779, B. A. Weber in 1790, C. M. von Weber in 1809, Gänsbacher in 1810.

² Gänsbacher tells us that Moses Mendelssohn's Translation of the Psalms was a favourite text-book for the daily exercise at Darmstadt.

³ At first, he adds, 'we took the exercises in the afternoon, but the Abbé, who almost daily dined with the Grand Duke, used to go to sleep, pencil in hand. We therefore agreed to take our exercises to him henceforward in the morning.'

⁴ This was one of Vogler's most successful works. The chorus of Furies was sufficiently popular in 1821 to lead an unemployed manager at Munich to introduce it into the finale of the second act of 'Don Giovanni'!

Epimenides.—Erwin und Elmira.—Der gewonnene Prozess.—Les Rendezvous de Chasse.—Die Kreuzfahrer; overture.—Der Eremit auf Formentarra, ditto.—Prolog, Comédie—Scena de Fulvia.—Jägerballet.—Schmied-ballet.

Also probably a number of similar works, of which particulars are not now attainable. Certainly an overture for a play called 'Die Kreuzfahrer,' and either an opera called 'Agnes Bernauerin' or incidental music to a play of that name. A letter of Weber, Jan. 1811, says 'Papa is composing a little opera . . . it will be ready in a few days.'

CHURCH MUSIC

1. MASSES

No. 1, Missa solennis in D min., for 4 Voices, Orchestra and Organ.
 No. 2, Missa pastoralis in E, for 4 Voices, Orchestra and Organ.
 Missa de Quadragesima in F, for 4 Voices and Organ *ad lib.*
 Missa pro Defunctis (Requiem) in E♭, for 4 Voices and Orchestra.⁵
 Missa Aquas Del.
 German Mass, for 4 Voices and Organ (about 1778).
 German Mass, for 4 Voices and Orchestra.

2. PSALMS AND MOTETS

Psalms.—Psalms Miserere decantandus a quatuor vocibus cum Organo et basis, S. D. Pio VI. Pontifici composuit (about 1777).
 Miserere in E♭, for 4 Voices, Orchestra and Organ.
 Miserere, Ps. 4.—In exitu. Ps. 5.
 Memento Domine, orch.—Psalm, 'Jehova's Mälestät.'
 David Buss-Psalm, nach Moses Mendelssohns Übersetzung im Choral-Styl. For 4 real parts, one, the Tenor, *ad lib.* (about 1807).
 Ecce quam bonum (133rd Psalm), for 4 Men's Voices with PF. *ad lib.*
Motets.—Suscepit Israel (composed for Concert Spirituel at Paris apparently before 1780).
 Rorate Coeli, for 4 Voices with PF. (ed. by G. Weber, with German words; with English and Latin words in Vocal Anthology).
 Ave Regina, for 4 Voices with Org. or PF. (Latin and German words).
 Cantate Domino, for 4 Voices with Org. or PF. (Ditto).
 Laudate, for Soprano solo, chorus, Organ obligato and Orchestra.
 Postquam impleti (Serenade. Puerperae sacrum), 4 Voices and Orch.

3. HYMNS, ETC.

Te Deum in D, for 4 Voices and Orchestra
 Kyrie, with Orch. (Oct. 1776).
 Magnificat, with Orch. (1777).
 Stabat Mater, with Orch. acc.
 Ecce panis angelorum (about 1777).
 Ave Maria Stella, and Cruetels Herodes, for 2 Choirs with Org. or PF.⁶
 Veni Sancte Spiritus, Graduale in B♭, for 4 Voices, Orchestra and Organ.
 Beatae me dicent, Orch.
 Alma Redemptoris, Orch.
 Jesu Redemptor, Orch.
 Regina coeli and Laudate Dominum, Orch.
 Ave Regina, Org.
 Salve Regina in F, for 4 Voices with Org. or PF. *ad lib.*
 Salve Regina, Ave Regina, and Alma Redemptoris, for 4 Voices with Org. or PF. *ad lib.*
 Cantus processionalis pro festo corporis Christi.
 Vesperae de Paschale (14 Apr. 1805).
 Vesperae chorales modulis munitis ornatæ, with Orch. acc. (These Vespers may be identical with the work next mentioned.)
 Vesperae chorales, 4 Vocum cum Organo.
 4 Latin Hymns, for 4 Voices with Org. or PF. *ad lib.* (Latin and German words, ed. by Gottfr. Weber.)
 12 Church Hymns, for 3, 4, or 8 Voices unacc. (First Series).
 6 " " " " (Second Series).
 6 " " " " (Third Series).
 6 " " " " (Fourth Series).
 6 " " " " (Fifth Series).
 3 Hymns, for 4 Voices with PF. *ad lib.* Defectio tenui (F min.);
 Deus caritas est (A); O Salutaris (C).
 Hellig (1809).—Chorale (1813).—O God vi love's dig, Orch.—
 Hessische Vater unser, Orch.

4. MISCELLANEOUS

Die Auferstehung Jesu.
 Paradigma, modorum ecclesiasticorum (about 1777).
 Fugues a 4, on themes of Pergolesi's Stabat Mater (about 1777).
 S. Killan's Lied (for 2 Choirs)?

INSTRUMENTAL MUSIC

- Op. 1. 6 Trios, PF., Violin and Bass.—Dues for Flute and Violin.
 Op. 2. 6 easy Sonatas, PF.
 Op. 3. 6 easy Sonatas PF. and Violin.
 Op. 4. 6 Sonatas, in the form of Duets, Trios and Quartets, PF.
 Violin, Viola and Bass.

⁵ The composition of this Requiem for himself occupied most of Vogler's later years. It was esteemed his finest work, and is a very striking composition. Besides the ordinary constituents of a Requiem, it contains Agnus (2 settings), a 'Libera me, Domine,' in 4 movements and an 'Absolutio ad Tumbam.'

⁶ In the library at Darmstadt is a 'Cruetels Herodes,' with orch., dated Jan. 1776, and also a 'Hymnus Ave Maria stellas, 4 voices senza istrumenti,' possibly identical with the works in the text.

⁷ A.M.Z. 1820, Beylage V. June 21.

Op. 5. 6 Concertos, FF. (in two books, each containing 3 pieces).
 Op. 6. 6 Trios, FF. Violin and Bass.
 Op. 7. 8 Trios, FF. Violin and Bass.
 Op. 8. 12 easy Diversissements of national character, FF. (two books, six in each).—Concerto, FF. (played before the Queen of France).
 Op. 9. 113 easy Preludes for Organ or FF. (about 1804).
 Concerto, FF., printed with a Concerto by Kornacher about 1784.—Nocturne, FF. and Strings.—Quatuor Concertante, FF., Violin, Viola and Bass.—6 Sonatas for 2 FF. (1794).—Sonata, FF. (4 hands).—Sonata. (Der sheiliche Zwielt). FF. with Strings (C).—Pleces. FF.—Air de Marlborough, var. FF. March with Var. FF. 15 Var. (Lied aus dem Jünger) FF.—16 Var. FF. (F).—Pastorella, FF. (about 1807).—Canzonetta. Veneziana varié (about 1807).—Var. (March aus Swedish Air) FF. (about 1812).—Polonaise favorite, FF. (D) (about 1812).—3 Var. on March from 'Samori', FF., Viol. and Violoncello (F).—6 Var. Duo (Was brauchen wir in 'Samori', FF., Viol. and Violoncello (G)).—6 Var. on Duo in 'Samori', FF., Viol. and Violoncello (G).—6 Var. on Trio (Sanfte Hoffnung in 'Samori', FF., Viol. and Violoncello (A)).—7 Var. on Theme from the Overture to 'Samori', FF., Viol. and Violoncello (C).
 Polymelos, or characteristic music of different nations, FF. and Strings (1793).—Polymelos, a characteristic organ-concert, arranged for FF. with Violin and Violoncello *ad lib.* (1806).
 Var. FF., with Orch. acc.—Var. on 'Ah que dirai-je Maman', FF. with Orch. acc.—Symphony in G (1779).—Do. in D min.—Do. in C.4.—Bälerische Nationalsymphonie.—L'Invocation, for Guitar.
 (See *D.D.P.* Second Ser. xv and xvi., Mannheim Chamber Music, ed. Riemann.)

THEORETICAL WORKS

Tonwissenschaft und Tonsetzkunst. Mannheim, 1776.
Stimmbildungslehre. Mannheim, 1776.
Churpfälzische Tonschule. Mannheim, 1778.
Mannheimer Tonschule. Offenbach.
Betrachtungen der Mannheimer Tonschule. Spire.⁸ (1778-80).
Essai de diriger le goût des amateurs en musique. Paris 1784.
Introduction to the Theory of Harmony (Swedish). Stockholm, 1795.
Method of Clavier and Thorough Bass (Swedish). Stockholm, 1797.
Organ School (Swedish). Stockholm, 1797.
Choral System. Copenhagen, 1800.
Data zur Akustik. Offenbach, 1800.
Handbuch zur Harmonie Lehre, und General-Bass. Prague, 1802.
Aussetzung über Hrn. Knechts Harmonik. Prague, 1802.
Erklärung der Buchstaben die in Grundriss der . . . neu zu erbauenden S. Peters Orgel in München vorkommen. Munich, 1806.
Vergleichungsplan der vorigen mit der nun umgesetzten Orgel in Hoftheatru zu München. Munich, 1807.
Über die harmonische Akustik. Munich, Offenbach, 1807.
Grundliche Anleitung zum Clavierspielen. Stuttgart, Vienna, 1807.
Deutsche Kirchenmusik die vor 30 Jahren zu Singtönen und der Orgel herauskamen, und mit einer modernen Instrumentalbegleitung bereichert. Munich, 1807.
System für den Fugenbau. Offenbach, 1811.
Über Chorale und Kirchengesänge. Ein Beitrag zur Geschichte der Tonkunst in Bayern. Offenbach, 1814.
 To this class of works the following may also be fairly assigned:
 Verbesserung der Fokelschen Veränderungen (of 'God save the King'), 1793.
 32 Preludes for Organ in every key, with an analysis. Munich, 1806.
 12 Chorals of J. B. Bach (arranged by Vogler and analysed by C. M. v. Weber). Leipzig, about 1810.

Amongst Vogler's contributions to current musical literature may be noticed, besides those

¹ Gänsbacher says that 'Vogler's Quintet' was played at the soirée in Sonnleithner's house at which Vogler and Reethoven met. (See Vol. 1. p. 282.) This Nocturne is perhaps meant.

² The march is described as 'd. l'ordre d. Seraphins,' but this appears to be only a short way of putting 'marche des Chevaliers de l'ordre des Seraphins.' The Seraphin is the oldest Swedish Order.

³ It is quite possible that the staple, at any rate, of the two works styled Polymelos is the same. The latter originated from and is practically the substance of an organ recital given by Vogler at Munich on Mar. 29 and 31, 1806. Its contents consist of sixteen numbers, viz. No. 1, Volkssied; No. 2, Swedish Air; No. 3, Bavarian Vater Unser; No. 4, Venetian Barcarolle; No. 5, Volkssied; No. 6, Swiss Ranz des Vaches; No. 7, An African Air; No. 8; No. 9, Bavarian Volkssied; No. 10, Scotch Air; No. 11, Jan. 14—A British Song; No. 12, A Scotch Air; No. 13, The Veteran; No. 14, Wounded Bavarian Knight; No. 14, Moorish Air; No. 15, Greenland Air; No. 16, Chinese Air. Each of these appears to have had variations appended, and the variations on Nos. 2 and 15 were published separately. The 'Greenland Air' is said to have been noted down by Vogler in that country while the seven Bavarian Volkssieds were the Abbé's own composition; No. 11 is a piece commemorative of the marriage of Eugène Beauharnais with the Princess of Bavaria on Jan. 14, 1805, and No. 13 was published separately as an 'Ode.'

⁴ The last movement in this Symphony is called 'The Scale.' The Symphony was not published till after Yngve's death. At Knyvett's concert in Willis's Rooms on Feb. 25, 1811, the Second Part opened with a 'New Symphony for 2 clarinets, 2 oboes, 2 flutes, 2 horns and trumpet (obligato)' never performed in this country '—by Vogler, but what this was it seems impossible to ascertain.

⁵ This may be the work of some musician of like name. Christmann also speaks of a Sonata for Harp, with accompaniment for Flutes and Violoncello. Rink, in his Autobiography, mentions Variations for Clavier on a Swedish March in E major.

⁶ This embodies the last named work.

⁷ This embodies the three preceding works.

⁸ A magazine recording the progress of the school, 1776-79.

⁹ A translation from the Swedish.

¹⁰ Péris declares that this work was not published till after the author's death. The preface, however, is dated Darmstadt, 1811. It seems to have been written for the instruction of Meyerbeer.

which were reprinted separately, and have been already mentioned:

Several short notices in the *Wetzlarische Concertanzeiger* (1779-1780).
Von der Musik in Frankreich, in Kramer's *Magazin der Musik*.
Antwort auf verschiedene sein System betreffende Fragen in Musik.
Korrespondenz No. 3, 1790.

Bemerkungen über die der Musik vortheilhafteste Bauart eines Musikchors, in *Journal von und für Deutschland*, No. 2, 1792.

The following treatise not improbably belongs to this class:

Ästhetisch-kritische Zergliederung des wesentlich vierstimmigen Gesanges des vom Knecht in Musik gesetzten ersten Psalmes.

Lichtenthal also ascribes to Vogler the article *Über den Choralgesang der Böhmisches Kirche zu Johann Hussens Zeiten*, in the *A.M.Z.* for Apr. 6, 1803.

MISCELLANEOUS WORKS

Die Scala oder personifizierte Stimmbildungs- und Singkunst, for Soprano Solo, Chorus and Orchestra.
 Der Rheinberg der Allerten an Neujahrstag, 1814. Cantata with accompaniment for full Orchestra.
 Teutonia oder Kriegsalte, 1814, with Orch. acc.
 Tricordium und Trias Harmonica oder Lob der Harmonie.
 Frohe Empfindungen bei der Zurückkunft eines Vielgelebten. Chorus with Orch. acc.
 Wielands Grab, gedichtet von Ch. Westphalen. Chorus for 4 voices. Empfindungen des Hesses an 14 Juni. Chorus for 4 Voices.
 Der Altarberg. For 4 Voices, with FF. acc.
 Sangtücke für d. 19 Augusti. Drottingham, 1786.
 Sangtücke.
 L'Invocation du Sole alla mezza notte in Laponia.
 Friedensal (about 1807)—Der schöne Morgen; Die volle Mondnacht. Two songs with FF. accompaniment.
 Hessescher Kriegertraum. Song with FF. accompaniment.
 'Declamatorium'—'Tulskien ist erwacht.'¹⁵

BIBL., consulted by the writer: The monograph on Vogler by Th. Nisard (the Abbé Normand), and the *Life of C. M. v. Weber* by his son; the vast mass of information relating to Vogler and his views contained in the *A.M.Z.*; the articles in Nos. 15 and 16 of the *Musikalische Correspondenz* for 1790 by Christmann and Schubart; the MS. *Biographie Gänsbacher* in the possession of Dr. Gänsbacher of Vienna; letters of Vogler belonging to the same. In one of Weber's letters to Gänsbacher he states that he was working hard at Vogler's biography, but the result of his work seems to have completely disappeared. All these are superseded by Prof. Schafhäutl's monograph, *Abt Georg Joseph Vogler* (Augsburg, 1888). J. H. M.

VOGLER, JOHN and GERARD, possibly brothers of the Abbé Vogler, came to London, and about 1770 were established as music-sellers and music-publishers in Glasshouse Street, near Burlington Gardens. Gerard was composer of a once popular song, 'Tell me, babbling Echo.' Robert Wornum succeeded to their business probably about 1775. F. K.

VOGRICH, MAX WILHELM KARL (b. Szeben, Austria, Jan. 24, 1852; d. New York, June 10, 1916), Austrian pianist and composer. Having

¹¹ The analysis prefixed to this work, after stating that it was finished at Darmstadt on Aug. 25, 1810, declares that the author had in 1777 offered a prize of 100 louis d'or for the discovery of a device by which 4 voices should each sing a scale up and down in only 16 chords, and that no one had been able to find out the secret. The solution given in 'Die Scala' is certainly ingenious.

¹² A Cantata for Voices and Full Orchestra to words by Professor Melsner. Rousseau's air of three notes is used as the foundation of the whole composition, which extends to eleven numbers. Vogler made use of this air as the theme of a piece of considerable dimensions at a concert in Stockholm, Apr. 28, 1799, and published it in five real parts in the *A.M.Z.* for June 12 in the same year.

¹³ A terzetto published in the *A.M.Z.* for June 12, 1799.

¹⁴ The publisher's advertisement gives 'Treue' for 'Traum.'

¹⁵ This piece, an orchestral accompaniment to a declaimed poem, was probably one of Vogler's last works, as it was brought out at Mannheim early in 1814. The poem was by Madame Bürger.

made his début as pianist at the age of 7, he later studied at the Leipzig Conservatory, and toured as a pianist. The latter part of his life was chiefly devoted to composition; he lived successively in New York, Weimar, London and again in New York.

W. S. S.

VOGT, AUGUSTUS STEPHEN (*b.* Washington, Ontario, Aug 14, 1861; *d.* Toronto, Sept. 17, 1926), studied music at the New England Conservatory, Boston, and at the Leipzig Conservatorium under Reinecke and Jadassohn. Returning to Canada he held an organistship in Toronto and particularly interested himself in the practice of a *cappella* choral music. In 1894 he founded the Mendelssohn Choir in Toronto, beginning with 180 singers, all carefully chosen for vocal ability and musicianship, and conducted it from its foundation until 1917, when he resigned and was succeeded by H. A. FRICKER (*q.v.*).

From the first, VOGT set the highest standard before his singers, and the high reputation of the Mendelssohn Choir was the result of his brilliant abilities as a choral trainer. Under him the Choir not only performed a wide repertory at home, but made many highly successful appearances in the principal cities of the United States.

C.

VOGT, GUSTAVE (*b.* Strassburg, Mar. 18, 1781; *d.* Paris, May 30, 1879), French oboe-player, studied at the Paris Conservatoire under Sallantin, and took the first oboe-prize in 1799. While in Rey's class he began to play in public, and was appointed oboe-solo at the Opéra Italien in 1801, and co-professor at the Conservatoire in 1802. In 1805 he entered the band of the Imperial Guard, was present at Austerlitz, and during the occupation of Vienna made the acquaintance of Haydn and Beethoven. After the peace of Tilsit he returned to Paris, and never left it again for any distance. After some time at the Théâtre Feydeau, he succeeded his friend and master Sallantin as first oboe at the Opéra (1814), and professor at the Conservatoire, where he taught with marked success from Apr. 1, 1816, to Nov. 1, 1853. His fame spread, and in 1825 the Philharmonic Society invited him to London, and he played in their concerts. His tone was thought to be thin, harsh and forced, but his execution was astonishing,¹ and he was engaged again in 1828. He was an original member of the Société des Concerts du Conservatoire, and played there regularly till his resignation in 1844, often producing with success compositions of his own. As first oboe in the Chapelle du Roi from 1815-30 he received the Legion of Honour in 1829. He formed many talented pupils, including Brod,² Vinit, Verroust, Barré, Lavigne, Delabarre,

Cras, Colin, Berthélemy and Bruyant. Vogt left a considerable number of pieces for the oboe. The library of the Conservatoire has the MS. of his *Method for the Oboe*, and the Museum contains his oboe, cor anglais and baryton.

G. C.

VOICES. (1) For classification according to compass see table given under singing, Vol. IV. p. 763.

(2) For notes on the several types of voice see SOPRANO; MEZZO-SOPRANO; CONTRALTO, ALTO (countertenor); TENOR; BARITONE; BASS-BARITONE; BASS. Also FALSETTO; CASTRATO. (3) For ancient classification of voices in composition see POLYPHONY; MOTET; PART-BOOKS.

VOICING, a term used in organ-building to express the method of obtaining a particular quality of tone in an organ pipe, and of regulating a series of pipes so that their tone shall be uniform throughout.

The quality of the tone of flue-pipes is mainly dependent on (1) their general shape, (2) their scale; but, after the pipe-maker has turned out a set of pipes of true proportion, the voicer can produce a great variety of qualities by regulating (1) the quantity of wind admitted to the pipe, (2) the thickness of the 'sheet of wind,' (3) the angle at which it impinges on the upper lip, (4) by imparting a special surface to the edge of the lip itself or by cutting it higher; and in other ways.

The voicing of reed-pipes is dependent chiefly on (1) the quantity of air admitted, (2) the shape, curve and thickness of the tongue, (3) its position, (4) the relation between the length of tube and the pitch of the note produced.

Voicing thus requires both a delicate ear and skilful hand; it is, in fact, the most artistic part of an organ-builder's work. But few are equally good voicers both of reed- and flue-pipes, and better voicing is obtained from a specialist than from a general hand. In testing the voicing of an organ-stop, an opinion should first be formed as to the merit of the particular quality selected by the voicer; next, the pipes should be consecutively sounded in order to ascertain whether the quality of tone is uniform. This applies both to flue- and reed-pipes.

J. S.

VOIGT, (1) HENRIETTE, *née* KUNZE (*b.* 1809; *d.* Oct. 15, 1839), a distinguished German amateur musician, and prominent figure in the musical life of Leipzig.

She was the pupil of L. Berger, and became a remarkable performer, and the warm friend of her teacher.³ Schumann was introduced to her by Ludwig Schunke, who almost lived in the Voigts' house, and their intimacy became very close. A characteristic story illustrating this is told in the article on SCHUMANN (*q.v.*).

³ See his letter of 1836, given by Schumann, *N.Z.M.* xi. 159.

¹ *Harmonicon*, 1825.

² Henri Brod, a great French oboe-player (*b.* 1799; *d.* 1839).
³ "Maire, Brod est mort," said a pupil to Cherubini. "Ah," replied the stern old Italian, "petit son, petit son."

and we may here quote Schumann's own expression—'Ich dichte, wenn ich an Sie denke,' which may be rendered, 'The thought of you inspires me.' He alludes¹ to her occasionally in his 'Davidsbündler' articles under the name of 'Eleonore'; and his entry in her album was very characteristic, consisting only of a huge crescendo mark $\text{—} \text{—} \text{—}$ reaching across the whole page, with his name below it. This, on inquiry, he explained to predict the continual increase of their friendship. Mendelssohn's contribution to her album was the first sketch of the Gondellied in F# minor (op. 30, No. 6); and though there is no mention of her either in his collected Letters or in the *Familie Mendelssohn* there is ample testimony to his esteem for her talents and her person in his *Eight Letters* to her, published in 1871.² Hauptmann³ and C. Löwe have also left the most appreciative references to her ability and taste: indeed she was, with Madame Frege, at the head of the amateurs of Leipzig in that brilliant time.

Her husband, (2) CARL (d. June 15, 1881), to whom she was married in Nov. 1830, was a Leipzig merchant, and as great an enthusiast for music as herself. He died in his seventy-sixth year, leaving £300 to the Gewandhaus Concerts for a performance of Beethoven's Ninth Symphony every year, or at the least every two years. A few words about that Symphony, attributed to him, will be found in Schumann's *Ges. Schriften*, 1st ed. i. 27.

(3) WOLDEMAR (b. Leipzig, Sept. 2, 1850), son of Carl by his second wife, became professor of physics at Göttingen, formed a Bach choir at Göttingen and wrote on the music of Bach. (*Riemann*.)

VOIGTLÄNDER, GABRIEL (b. circa 1580; d. ? Sorø, Jan. 1643, court field-trumpeter and chamber musician to Prince Christian of Denmark. He arranged and edited a collection of odes and songs to melodies and airs of the best Italian, French, English and German composers. An important collection of 93 melodies with bass appeared in five editions between 1642 and 1664. A 4-part St. Matthew Passion and songs remained in MS.

E. v. d. s.

VOIX CÉLESTES,⁴ Vox Cælestis, Vox Angelica, UNDA MARIS; an organ stop with two ranks of pipes, one tuned about three beats a second sharper than the other. The pipes are sometimes of the Dulciana type; sometimes (generally in the case of French organ-builders) two small Gambas, and occasionally the ranks are dissimilar, one a Keraulophon, and one a Dulciana. The custom is to tune one rank with the organ and one sharper,

but this has the effect of making the organ sound disagreeably flat after using the stop, and the plan advocated by Sedley Taylor of tuning one rank slightly above and one below the general pitch of the organ is no doubt preferable, though it precludes the use of either alone, or in combination with the other stops. The Voix Célestes has its proper place in the swell organ, and in large buildings its wavy floating effect is not unpleasant. Like other 'fancy' stops it should be used with great reserve. The name Vox Angelica is ambiguous, some builders making it a synonym for Voix Célestes, and others for the rank of pipes which is tuned to the rest of the organ. It often refers to a stop of two ranks, of which the 'beating' rank is tuned flat, the 'beating' rank of the Voix Célestes being tuned sharp. w. P.^{A.}; addns. T. E.

VOLBACH, FRITZ (b. Wippelfirst, Rhineland, Dec. 17, 1861), studied at the Cologne Conservatorium and elsewhere, and in 1886 joined the Royal Institute of Church-music at Berlin. Here he remained until 1892, when he accepted the responsible post of music-director at Mainz, where he conducted several choral societies, removing to Tübingen to take up professional work in 1907. During the war (1914–18) he conducted symphony concerts at rest camps, and in 1919 became professor in the University of Münster. He has done much editorial work and published many educational books, notably on orchestration. (See *Riemann*.)

Volbach's style in composition is distinguished for melody, a warm expression, pleasant fancy, and clear individuality. He brings to bear upon his work a full knowledge of vocal and orchestral effects, and a power of embodying his thoughts in scoring which is both effective and artistic.

In England he became known by the symphonic poem, op. 21, played in London at a Promenade Concert in 1901: 'Easter,' for organ and orchestra, was given at the Sheffield Festival of 1902, and in a revised form at a Promenade Concert in 1904, in which season 'Alt Heidelberg' was also played. The frequent hearing of 'Easter' since established it as a popular work. A set of three 'Stimmungsbilder' for choir and orchestra was heard under the composer's direction at the R.C.M. in Dec. 1904. His chief works are as follows:

Symphonic poems: 'Easter,' organ and orchestra; 'Es waren zwei Königskinder'; 'Alt Heidelberg, du feine.'
Symphony in B minor.
Quintet for wind and PF, in E flat.
" for strings and PF, in D minor.
Comedy opera, 'Die Kunst zu Lieben.' (Düsseldorf, 1910.)
Choral ballad, 'Der Troubadour,' male ch. and orch.
" 'Am Siegfrieds Brunnen,' male ch. and orch.
" 'König Laurins Rosengarten,' baritone, male ch. and orch.
'Hymne an Maria' (Dante), ch., solo instruments and organ.
'Raffael,' ch., orch. and organ.
Ballad cycle, 'Vom Fagen und der Königstöchter.'

D. H., addns.

¹ A sketch of her by Schumann appeared in the *Neue Zeitschrift*, Nov. 15, 1839, reprinted in *Ges. Schriften*.

² *Acht Briefe und ein Facsimile*, etc. Leipzig, Grunow, 1871. Translated by M. E. von G. in *Macmillan's Magazine*, No. 140.

³ *Letters to Hauser*, No. 43.

⁴ The final s is sometimes omitted, but the original French name is undoubtedly in the plural.

RUBL.—GREGOR SCHWAKE, *Fritz Volbachs Werke*. (Münster, I. W., 1921.)

VOLKERT, FRANZ (b. Friedland, near Bunzlau, Feb. 2, 1767; d. Vienna, Mar. 22, 1845), organist and Kapellmeister at the Theater an-der-Wien, wrote graduals, 4 v., organ pieces and about 150 singspiele, musical farces, melodramas, pantomimes, etc., which were very popular in their time; also pianoforte trios, variations, songs, etc. (*Riemann*).

VOLKMANN, (1) FRIEDRICH ROBERT (b. Lommatzsch, Saxony, Apr. 6, 1815; d. Pest, Oct. 30, 1883). His father, cantor and schoolmaster of the town, taught the boy music, with such effect that by the time he was twelve he took the services in church. He then had instruction from Friebe, the 'Town musician,' in violin and violoncello, and later from A. F. Anacker, music-director of the Seminary at Freiberg. In 1836 he went to Leipzig to study systematically, and made the acquaintance of C. F. Becker, and also of Schumann, who exercised great influence on him; in 1837 he published his first work, 'Phantasiebilder,' in Leipzig. His next step was to visit Prague as teacher in the family of Countess Stainlein-Saalenstein, where he remained from 1839-41. He afterwards went to Pest, where he set up as a teacher and composer, holding various offices from 1841-54. From 1854-58 he resided at Vienna, producing many compositions. He was appointed professor of composition in the Landes-musik-akademie of Buda-Pest in 1878. In spite of its great popularity on the Continent for many years, Volkmann's music has not obtained a permanent place in the estimation of musicians. Fluent, graceful, clever, and not without originality, it yet misses the qualities that make music immortal. A complete list of works follows:

LIST OF VOLKMANN'S COMPOSITIONS

- Op. 1. Six Phantasiebilder, pf.
2. Five Songs.
3. First Trio in F for pf. and strings.
4. Dithyrambe und Toccata for pf.
5. Second Trio in B flat minor, for pf. and strings.
6. 'Souvenir de Marth,' for pf.
7. Romance for violoncello and pf.
8. Nocturne for pf.
9. First String Quartet, A minor.
10. Chant du troubadour for vin. and pf.
11. Musikalisches Bilderbuch, pf. 4 hands.
12. Sonata, pf.
13. Three Songs.
14. Second String Quartet, G minor.
15. Allegretto capriccioso, vin. and pf.
16. Three Songs.
17. Buch der Lieder, for pf.
18. Deutsche Tanzweisen, pf.
19. Cavatins and Barcarole for pf.
20. Hungarian Songs for pf.
21. 'Viergräd,' for pf.
22. Four Marches, pf.
23. Wanderskizzen, pf.
24. Seven Hungarian Sketches, pf.
25. Phantasia und Intermezzo, pf.
26. Variations on a theme of Handel, pf.
27. Lieder der Grossmutter, pf.
28. First Mass for male voices. D major.
29. Second Mass for male voices. A flat.
30. Six Songs for male choir.
31. Rhapsodie for vin. and pf.
32. Three Songs.
33. Violoncello Concerto.
34. Third String Quartet, G.
35. Fourth String Quartet, E minor.
36. Three Improvisationen, pf.
37. Fifth String Quartet, F minor.
38. Three Geistliche Chöre, with pf. acct.
39. 'Die Tageszeiten,' for pf. 4 hands.
40. Three Marches, for pf. 4 hands.
41. 'An Tombeau du Comte Széchenyi,' pf.

Op.

42. Concertstück, pf.
43. Sixth String Quartet, E flat.
44. First Symphony, D minor.
45. 'An die Nacht,' alto solo and orch.
46. Liederkreis, for alto.
47. Offertorium, sopr. solo, choir and orch.
48. Three Songs for male choir.
49. 'Sappho,' for sopr. and orch.
50. Fest ouverture.
51. Ballade und Scherzetto, pf.
52. Three Lieder for soprano or tenor.
53. Second Symphony, B flat.
54. 'Die Bekehrte,' for sopr.
55. Rondino und Marsch-Caprice, for pf. 4 hands.
56. Two Songs for mezzo-sopr., v'cl. and pf.
57. Sonatina for pf. 4 hands.
58. Two Songs for male choir.
59. Weihnachtslied, for choir and soli.
60. First Sonatina, vin. and pf., A minor.
61. Second Sonatina, vin. and pf.
62. First Serenade for string orchestra, C.
63. Second Serenade for string orchestra, F.
64. Altddeutscher Hymnus for male voices, double choir.
65. Kirchenarie for high bass and orchestra.
66. Three Songs, sopr.
67. Six Duets for sopr. and tenor.
68. Overture to Richard III.
69. Third Serenade for string orchestra and v'cl. solo, D minor.
70. Two Geistliche Lieder for choir.
71. Three Hochzeitlieder for choir.
72. Three Songs for tenor.
73. Entr'actes for Richard III.
74. Capriccio, v'cl. and pf.
75. Two Songs for choir.
76. Schlummerlied for harp, clarinet, and horn.

WITHOUT OPUS NUMBERS

Two Songs.
Variations on the Rheinweinflied for pf.
Capriccioletto for pf.
Concert-overture, C.
Four Songs for male choir.
Weihnacht for three-part children's choir.

G.

BIBL.—HANS VOLKMANN, *Robert Volkmann* (1903); a smaller work (1929); Letters edited by the same.

(2) HANS (b. Apr. 29, 1875), grand-nephew of the above, and his biographer, studied art and musical history at Munich and Berlin. His researches with regard to ASTORGA (*q.v.*) have cleared away the legends which surrounded the career of that composer.

C.

VOLKSLIED, see SONG, subsection GERMANY.

VOLKSTÜMLICHES LIED, see SONG, subsection GERMANY.

VOLLWEILER, (1) JOHANN GEORG, (b. 1770; d. Frankfurt, Nov. 17, 1847), an esteemed professor of music in Frankfurt. He was the author of two instruction-books, one in PF-playing, and one in singing for schools; both published by Schott. Vollweiler was the teacher of two renowned musicians, Aloys Schmitt and Ferdinand Hiller.

His son, (2) CARL (b. 1813; d. Heidelberg, Jan. 27, 1848), had a varied musical career in Germany, Austria and Russia. A MS. symphony, two trios, and many pianoforte pieces are mentioned in *Riemann*.

G.

VOLTA, PRIMA, SECONDA—First, or second time; more commonly seen in the abbreviated forms, '1ma,' '2da,' or with the numerals alone—an indication that the portion of an instrumental movement which is to be repeated is to undergo certain modifications at the close of its repetition, instead of being repeated exactly. The words 'Prima volta,' or the figure 1, are placed over the first version, and 'Seconda volta,' or simply 2, over the second. At first the player goes straight on to the repeat, but the second time he passes from the beginning of the line where 'Prima

volta' stands, to the double bar, so that the portion after the double bar is played instead of that before it. M.

VOLTE, a kind of ancient dance, in three-time, so called from the figure containing many turns (*volts*). Thoinot Arbeau, in his 'Orchésographie,' gives the following air of a Volte :

The pieces called 'La Volta,' 'Lavolta,' and sometimes 'Levalto' in collections of Virginal Music, derive their name from this word. G.

VOLTI (VOLTI SUBITO)—'Turn over,' 'Turn over quickly.' This direction, or the initials V.S., is used in manuscript and old printed music, at the bottom of a page where, without it, it might be supposed, for one cause or another, that the piece had come to an end. In the appendix to vol. i. of C. H. Bitter's *Life of J. S. Bach*, part of a song, 'Bist du bei mir,' from the music-book of Anna Magdalena, Bach's second wife, is given in facsimile of the composer's writing. A double bar closes the page, but evidently the song does not end there; the composer, to prevent any mistake, has added the words 'Volti cito,' the meaning of which is precisely the same as the more usual version of the direction. M.

VOLUMIER,¹ JEAN BAPTISTE (b. 1677; d. Dresden, Oct. 7, 1728), a musician of Belgian extraction, chiefly remembered for his accidental connexion with John Sebastian Bach, said to have been born in Spain, and brought up at the French court.² He entered the Electoral Chapel of Prussia, Nov. 22, 1692, and soon became *Maitre de Concert* and Director of the dance music at the Berlin court, and was renowned for his Ballets. On June 28, 1709, he was appointed *Konzertmeister* to the court of Dresden. Here he kept up his former reputation for dance music and divertissements, but was also celebrated as a violin-player, especially of French compositions, and a performer on an instrument of the Hackbrett kind, of his own invention. He was on friendly terms with Bach and an enthusiastic admirer of his genius, and it was during his residence at Dresden, and also at his instigation, that the famous match was arranged between Bach and Marchand the French player, which resulted in the flight of the latter.

BIBL.—FÜRSTENAU, *Zur Geschichte Musik . . . am Hofe Dresdens*; MATTHESON, *Ehrenpforte*; FORKEEL, *J. S. Bach*. G.

VOLUNTARY, an organ solo played in connexion with a church service. To-day it is so regular a feature that the term has little meaning; but originally, no doubt, the

voluntary was so called because it was merely a casual adjunct to a service, limited to special occasions or dictated by convenience. The use of the word as a musical term seems to have been confined to this country, and its significance in the matter of form was extremely vague. At the hands of its chief exponents, e.g. Benjamin Cooke, Thomas Adams, William Russell, the Wesleys, etc., the voluntary took on a variety of shapes, comprising the prelude and fugue, the hymn tune varied, a group of movements suggestive of the suite or sonata, etc. It is worth noting that when the music publishers, Coventry and Hollier, asked Mendelssohn to write some organ music, their request was for 'three Voluntaries.' The change of title was due to the composer, who wrote (Aug. 29, 1844):

'I have been busy about the organ pieces which you wanted me to write for you, and they are nearly finished. I should like you to call them, "Three Sonatas for the Organ" instead of "Voluntaries." Tell me if you like this title as well; if not, I think the name of "Voluntaries" will suit the pieces also, the more so as I do not know what it means precisely.'

Though the term apparently did not come into general use until the 18th century, many of the pieces by Byrd, Gibbons and other early keyboard writers were obviously designed for use as voluntaries. As English organs at that time had no pedal board, composers often wrote indiscriminately for organ and virginal; and there is little difference in style between pieces called 'Voluntary,' 'Fancy,' 'In Nomine,' Fantasia and Prelude. Two of the earliest accessible examples of English organ music of the voluntary type are a 'Glorificamus' (in which a plain-song theme occurs in the alto) by John REDFORD (c. 1486-1540) and a Voluntary by Richard ALWOOD (q.v.), both issued in John E. West's series of 'Old English Organ Music.'

The voluntary is now used only at the beginning and end of a service. For a long period, however, it was a prominent feature during the service, being called the 'Middle Voluntary.' An entry in a 'Vestry Book,' Boston (Lincs.), under date Apr. 29, 1717, is of interest as showing that the voluntary has long had a recognised place in the musical arrangements of a parish church:

'Ye organist who shall be chosen to serve in ye Parish Church of Boston shall play :—Upon Sundays, Holy Daies, and as often as there shall happen to be a Sermon or Homily, One short Voluntary before ye service begins, and another immediately after ye First Lesson . . . and a Voluntary immediately ye service is finished. Also on Communion Daies, a Voluntary between ye Sermon and ye beginning of ye Communion Service, a Short Voluntary at ye finishing of ye Communion.'

Austere in its early days, the voluntary fell from grace during the 18th century, when, despite some admirable examples that are still well worth playing, the general style was superficial. As evidence of its triviality

¹ The name is said to have been originally Woulmyer.

² Mendel.

during this period may be cited the well-known essay in the *Spectator* of Mar. 28, 1712, on 'Merry Epilogues after Tragedies, and Jigging Voluntaries.' Similar complaints may be found in periodicals as late as the middle of the 19th century, at which time the custom arose of using transcriptions from all kinds of sources, often inappropriate. There is now a better and rapidly improving standard, owing to the general recognition of the principle that a voluntary should justify itself on the grounds of (a) musical quality, and (b) fitness for use in connexion with divine service. The ideal is reached when the principle of fitness is developed from the general to the particular, and voluntaries are chosen to suit the liturgical season—and even a given Sunday or holy day. This may be done without great difficulty, as there is now a large repertory of admirable English, German and French organ music based on liturgical themes from plain-song and chorales to modern hymn tunes and carols. Thanks to this wide field of choice, a service may now open and close with organ music not less appropriate than the hymns and anthems. Thus used, the voluntary amply justifies itself, both as a decorative accessory and an aid to devotion.

For examples of the 17th and 18th century 'Voluntary' at its best, see the large collection of John E. West alluded to above (Novello).

H. G.

VOMÁČKA, BOLESLAV (b. Mlada Boleslav, 1887), Czechoslovak composer and writer. He is a doctor of law and practised as a solicitor until he entered the civil service in 1919 (the Ministry of Social Welfare). He studied music at the Prague Conservatoire under Vít. Novák (g.v.), and acted as musical critic to the journals *Čas* and *Lidové Noviny*. At present he edits the *Listy Hudební Matice*, the monthly journal of the musical section of Umělecká Beseda (the Society of Arts). He composes at infrequent intervals, and his works accord with the views which he advocates strongly as regards modern music—that it must now avoid the excessive subjectivity and personal lyricism too freely exploited by the earlier generation, and adapt itself to a more detached and universal expression. He began as a disciple of Schönberg, but soon formed an individual style; a little harsh, as might be expected from his reluctance to show the least sign of sentimentality, but full of vitality, courage, and robust independence. His workmanship is too firmly based on a sound traditional culture to degenerate into merely freakish experimentalism. His fine pianoforte sonata, introduced to Paris by Mlle. Blanche Selva, has made its way on the Continent. His chief compositions are:

Symphonic Poem 'Mlada' (Youth); Pianoforte Sonata; Violin and Pianoforte Sonata; Cycle for Pianoforte, 'Hledání' (The

Quest); Song Cycle, '1914'; short Choral Works; all published by Hudební Matice, Prague.

R. N.

VOPELIUS, GOTTFRIED (b. Herwigsdorf, near Zittau, Jan. 28, 1645; d. Leipzig, Feb. 3, 1715), became cantor at St. Nicholas, Leipzig, in 1675. He wrote some original tunes to hymns previously set to other music, but is chiefly known as a harmoniser of older melodies in four voice-parts. He adopts the more modern form of regular rhythm (generally 3-2), and freely uses the subdominant and major dominant even in minor keys, and the accidental ♯ and ♮. He published in 1682 the 'Neu Leipziger Gesangbuch,' which contains besides other tunes 100 hymns from Schein's Cantional oder Gesangbuch of 1627. R. M.

VORHALT, see APOGGIATURA.

VORSCHLAG, see APOGGIATURA; ORNAMENTS, GERMAN.

VORSPIEL (Ger.), see PRELUDE.

VORTRAG (Ger., lit. a drawing-out), a term used purely in reference to the performance or interpretation of a musical work. The best English equivalent is perhaps 'interpretation' or 'reading.' Vortrag embraces not only all that belongs to differences of rates of speed and force, but all that lies beyond the mere execution of the written notes in the proper rhythm. 'Vortragsbezeichnungen' are the directions for the various shades of force and kinds of expression. M.

VOSS, CHARLES (b. Schmarsow, near Demmin, Sept. 20, 1815; d. Aug. 29, 1882), received his musical education at Berlin, and settled in Paris in 1846, where he had a successful career as pianist and teacher, turning out a great number of pianoforte pieces to suit the taste of the day. He also wrote a concerto in F minor which was highly praised by Mendelssohn. (Riemann and Baker.) M.

VOSS (VOSSIUS), (1) GERHARD JOHANN (b. in or near Heidelberg, c. 1577; d. Amsterdam, Mar. 19, 1649), was professor of rhetoric at Leyden in 1618. He was presented by Laud to a canonry at Canterbury in 1629, and became professor of history at Amsterdam in 1633. His works bearing on music are: *De artis poeticae natura ac constitutione*, 1647, and *De quatuor artibus popularibus grammatica, gymnastica, musica et graphica liber*, 1650.

His seventh child, (2) ISAAC (b. Leyden, 1618; d. Windsor, Feb. 21, 1688-89), was in 1649-52 at the court of Christina of Sweden, was given the degree of D.C.L. at Oxford in 1670, and was presented by Charles II. to a vacant prebend in the royal chapel of Windsor on May 12, 1673. In the same year appeared, anonymously, his important contribution to musical literature, *De poematum cantu et viribus rythmi*, a treatise on the alliance of poetry with music. There are some curious criticisms on the work by Roger North in the B.M. Add. MSS. 32,531,

fol. 53. For the details of his career, and the list of his works, see *D.N.B.* M.

VOWEL SOUNDS. In speaking and singing there is an essential difference between consonants and vowels. A vowel is a continuous sound which can be sustained for as long as may be desired, and will retain throughout the characteristics by which it is distinguished from another vowel. A consonant is in general merely a method of beginning or ending a vowel and cannot be maintained. Consider, for instance, such a word as *book*. The letter *b* represents a particular kind of explosion at the beginning of the vowel sound, and the letter *k* represents another kind of explosion at the end of the vowel. Both these are momentary, whilst the vowel sound can be prolonged indefinitely, and is recognised as *oo* whether the beginning and end are heard or not. Each vowel sound has a characteristic similar to what is called tone or quality in the case of musical notes. We distinguish between *a* and *o*, for instance, in the same way as we distinguish between the note of a violin and that of a flute.

There are certain consonants, such as *s, f, v, m*, etc., sometimes called semi-vowels, which can be maintained, though not in singing, as most of them are merely hisses. What is said below does not apply to these.

It has been shown by Helmholtz that the tone of a musical instrument is dependent on the relative strengths of such harmonic overtones as may be present along with the fundamental (see *ACOUSTICS*), and it must be some similar feature that gives its special character to any one vowel. The cavity of the mouth serves as a resonator, which intensifies one or more of the constituents of the complex note produced by the vocal cords. The pitch of the note strengthened can be varied by altering the position of the tongue or by varying the extent to which the lips and teeth are separated. Further, by raising the centre of the tongue the cavity of the mouth can be converted into two connected chambers, whereby two distinct notes can be strengthened.

Helmholtz maintained that each vowel is characterised by the presence of overtones strengthened by the mouth resonance. He believed that some vowels have only one such resonance tone, whilst others have two, and that these tones have a definite fixed pitch for any one vowel whatever may be the pitch of the larynx note on which the vowel is sung. His theory is known as the Fixed Pitch Theory.

Other physicists maintain that the overtones which give the vowel its character rise and fall with the larynx note, always remaining at the same intervals above it. This is known as the Variable Pitch Theory and makes the difference between two vowels result from the same cause as gives rise to the differences of quality of the same note played on different instruments.

The exact cause of vowel differences cannot be said to be settled. The majority of physicists, however, regard Helmholtz's Fixed Pitch Theory as being correct as a first approximation, but the matter is probably not quite so simple as Helmholtz imagined it to be.

J. W. C.

VOX HUMANA (*VOIX HUMAINE*), an organ stop of 8-feet tone and of the reed family, but with very short capped pipes, which therefore reinforce only the overtones of the fundamental. The pipe for the CC note, which would in the case of an ordinary reed-stop be nearly 8 feet in length, is here often only 13 inches. The pipes vary little in length, and there are perceptible breaks in the timbre.

As its name implies, the stop is supposed to resemble the human voice. Burney,¹ speaking of the specimen in the Haarlem organ, says:

'It does not at all resemble a human voice, though a very good stop of the kind: but the world is very apt to be imposed upon by names; the instant a common hearer is told that an organist is playing upon a stop which resembles the human voice, he supposes it to be very fine, and never inquires into the propriety of the name or the exactness of the imitation. However, I must confess, that of all the stops I have yet heard which have been honoured by the appellation of Vox humana, no one, in the treble part, has ever yet reminded me of anything human so much as of the cracked voice of an old woman of ninety, or, in the lower parts, of Punch singing through a comb.'

This description is by no means out of date. In acoustically favourable buildings, and when only just audible, the stop has sometimes a weird effect which is not unimpressive, but distinctness is quite fatal. The Vox humana should be placed in a box of its own inside the swell box. It is nearly always used with the tremulant. Opinions differ as to its capacity for combining pleasantly with other registers, and this depends upon the kind of stop. There are instances where it gives a piquant quality to other light stops. Its voicing is very delicate and it is liable to get soon out of tune, but a great improvement in this respect can be made by careful scaling, and by giving attention to the consonance of the tube. (See *ORGAN: VOCABULARY OF STOPS.*) W. P.

VOZ, LAURENT DE (*b.* Antwerp, 1533; *d.* Cambrai, Jan. 1580), brother of the painter Martin de Vos. After having been engaged for some years as a musician at Antwerp Cathedral, Laurent de Voz was appointed master of the children and director of music at Cambrai Cathedral by Archbishop Louis de Berlaymont. His attachment to the latter caused him, during the troublous times which followed, to compose a motet, in which the text was compiled from the Psalms in such a manner as to describe the banishment of Berlaymont, the usurpation of Inchy, his iniquities, the murder of citizens, the vain hope of release

¹ *Present State, Germany*, vol. II. p. 303.

through the Duc d'Alençon and the probable short duration of the reign of the wicked. The motet, written for a large choir, was performed after vespers in the presence of the usurper, who had him seized and hanged without trial. Lacroix du Maine (*Bibliothèque Française*) mentions de Voz as composer of published motets and chansons, but only one motet, a 5 v., published by Phalèse in 'Concentum sacrorum,' etc. (1591), has been discovered so far (*Fétis*; *Mendel*).

VOZIKA, a 17th-18th century chamber musician at the Court of Württemberg, whence he was dismissed 'on account of his cynical character,'¹ and was appointed to the chapel of the Archbishop of Trèves at Coblenz. He is described as the first soloist on the contrabass, for which he composed some soli. He was still living in 1750. E. v. d. s.

VRECHLICKY, JAROSLAV (b. 1853; d. 1912), the initiating spirit in modern Czech poetry whose writings have inspired a great number of musical works, and who, in turn, has been inspired by music. He was a remarkable linguist and a felicitous translator. The following are a few of the more important compositions which owe to Vrchlicky their literary idea—Dvořák: the opera 'Armida,' based on the poet's translation of Tasso's *Jerusalem Delivered*; the oratorio 'St. Ludmila.' Fibich: the melodramas 'Hakon,' 'Queen Emma,' the trilogy 'Hippodameia'; comedy overture, 'A Night at Karlstein'; incidental music to the poet's 'Pietro Aretino.' J. B. Foerster: the opera 'Jessica' (founded on Vrchlicky's translation of Shakespeare's *The Merchant of Venice*); melodramas, 'The Three Riders,' 'The Legend of St. Julia.' Karel Bendl: opera, 'Švanda Dudák' (The Merry Piper). Vít. Novák: opera, 'A Night in Karlstein'; symphonic overture, 'Lady Godiva.' Janáček: 'Amarus,' solo, orchestra and mixed chorus. Many lyrics and brief choral works. B. N.

VREDEMAN, JACOB, teacher of music at Leuwarden from about 1600-40. He wrote a book of madrigals, canzonis and villanelle a 4 v. (1603), and a musical instruction book, 'Isagoge musicae' (1618) (*Riemann*).

VREDEMAN, SEBASTIAN, of Malines, was appointed, May 12, 1589, composer at Brussels for the carillons of the corporation. He wrote two books of dance tunes for the cither, published by Phalèse in 1568 and 1569 (*Q.-L.*).

VRÉULS, VICTOR (b. Verviers, Belgium, Feb. 4, 1876), viola-player, composer and conductor, studied music at the École de Musique in his native town; then at the Conservatoire at Liège; then in Paris with Vincent d'Indy. For seven years he was professor of the viola and of harmony at the Schola Cantorum in Paris. From 1906 he was director at the Luxembourg

Conservatoire. His production is already considerable, his chief works being:

An overture; a prelude; 3 symphonic poems; a symphony with violin solo (Eugene Ysaÿe prize, 1904); pieces for various instruments with orchestral accompaniment; an adagio, and 2 pieces for str. orch. For voice: a cantata, a 'Tryptique,' 2 songs with orch.; a number of songs with PF.; a quartet with PF.; a str. quartet; 2 trios; 2 sonatas for vin. and PF.; one for v'cl. For the theatre he has produced a lyric drama in 3 acts, 'Olivier le Simple' (La Monnaie, Mar. 9, 1923), 'Un Songe de nuit d'été,' a fairy comedy in 3 acts (La Monnaie, Dec. 17, 1926).

BRILL—VICTOR VRÉULS, *Revue musicale Belge*, I. Dec. 8, 1925. S.J.M., May 1911.

M. P.

VROYE, THÉODORE JOSEPH DE (b. Villers-la-ville, Belgium, Aug. 19, 1804; d. Liège, July 19, 1873), Belgian writer on music, was ordained priest in 1828, and devoted all his spare time to the study of plain-song and the liturgical singing of the church. In 1835 he was appointed canon and precentor of the Cathedral of Liège, and conducted the services with a care and taste which produced remarkable results. He published a 'Vespéral' (1829), a 'Graduel' (1831), and a 'Processionale' (1849) which passed through many editions in Belgium; also, a 'Traité du Plain-Chant' (1839), a 'Manuale Cantorum' (1849) and a 'Rituale Romanum' (1862). His last work, 'De la musique religieuse' (1866), written in conjunction with the Chevalier Van Elewyck, was a collection of documents and observations relating to the Congresses of Paris (1860) and Mechlin (1863-64) on service music.

VUELTA, see SONG, subsection SPAIN (2).

VUILLAUME, (1) JEAN BAPTISTE (b. Mirecourt, Vosges, Oct. 7, 1798; d. Paris, Feb. 19,² 1875), violin-maker, learnt his craft from his father, Claude Vuillaume (b. 1772; d. Mirecourt, 1834), a descendant of Claude Vuillaume of Mirecourt (1625), who had married a daughter of the old violin-maker, François Médard, of Nancy, and was the founder of the business.

At the age of 19, Jean Baptiste went to Paris, where he worked with François Chanot, and in 1821 joined Lété, the organ-builder. Lété had been a member of the firm Chanot-Lété—Simon aîné et Payonne, and besides his organ-building dabbled in fiddle-making with Vuillaume, at 20 Rue Pavée St. Sauveur, where his business was known as Lété et Vuillaume. In 1828 Vuillaume ended this association, establishing himself at 46 Rue Croix des Petits Champs, and in the same year he married Adèle Guesnet, of Clermont. The frequent intercourse which Vuillaume had with such men as Pique and Savart, during his partnership with Lété, familiarised him with the methods and styles of the old Italian luthiers to an extent that eventually made him one of the most expert connoisseurs of his time. As soon as he left Lété, Vuillaume attempted to put his knowledge and technical skill to practical use. But there being then a

¹ Schubart.

² The date, Mar. 19, given by Vidal, Pougin and others, is incorrect.

demand for old Italian instruments, his own original work was at a discount. Instead, however, of fighting against the prevailing demands, Vuillaume turned them to good account by placing on the market a Stradivarius-model violin of extraordinary merit, bearing the master's label within, in facsimile. For this instrument he charged 300 frs. This speculation proved a complete success. Orders poured in, and there is little doubt that in the desire to meet his clients' demands he adopted the practice of baking the wood from which he made some of his fiddles, improving their immediate appearance, but proving fatal to them as time went on. So brilliant was the success of Vuillaume's venture that he was soon able to put a 500 frs. violoncello on the market, which found equal favour, and this was the foundation of his fortunes. The fidelity of his copies increased, so that even experts found it difficult to distinguish between the copy and the original when they were placed side by side. Vuillaume was an inventor as well as a dealer and maker. A ponderous and eccentric steel bow, of which apparently but a solitary specimen survives, is in the Victoria and Albert Museum. In 1885 he introduced a new model for the tenor, constructed on the scientific principles of Dr. Felix Savart, so built that the mass of air contained within gave the note F 341.33 vibrations to the second. But the instruments hardly recommended themselves to players on account of their bulk. His mute, patented under the name of the *sourdisse pédale* (Paris Exhibition, 1867), was an ingenious combination of mute and tail-piece, allowing the player to mute the instrument by a push with the chin, without ceasing from playing. A copy of his huge double-bass, known as the octobasse, the large proportions of which necessitated a complicated but ingenious invention of machinery for tuning, is in the Musée of the Paris Conservatoire. He also invented a machine for regulating the manufacture of gut-strings in such a manner that false strings should be entirely done away with. In 1827 Vuillaume was awarded a silver medal at the Paris Exhibition; he obtained another in 1834 and in 1839, and in 1844 two gold medals. At the London Exhibition of 1851 he obtained the 'Council medal,' for his perfected octobasse and a magnificent quartet of stringed instruments, receiving in the same year the cross of the Legion of Honour. Finally in 1855 at the Exposition Universelle in Paris, Vuillaume carried off the 'grand médaille d'honneur,' and from that moment he was pronounced *hors concours*. During the latter part of his career Vuillaume established himself in the Rue Demours No. 3, aux Thermes. Here many violins were made by his workmen which passed through his hands for supervision only. These bear the label 'St. Cécile des

Thermes,' with the date and number. Vuillaume is said to have issued from his workshops no less than 3000 instruments before his death, which took place at Rue Demours. One of his daughters married Delphin Alard. Vuillaume's brothers, Nicolas, Nicolas François, and Claude François, all became luthiers.

The first of these three—(2) NICOLAS (b. Mirecourt, 1800; d. 1871)—worked with Jean Baptiste for ten years, but returned to Mirecourt in 1824, establishing a successful business there in cheap violins. (3) NICOLAS FRANÇOIS (b. May 13, 1812; d. Brussels, Jan. 14, 1876) likewise served an apprenticeship in his brother's workshop, and eventually settled in Brussels at No. 30 Rue de l'Évêque. He was appointed luthier to the Conservatoire, and several medals were awarded him. He was made Chevalier of the Order of Leopold. (4) CLAUDE FRANÇOIS VUILLAUME (b. Mirecourt, 1807; d. 1862) was a pupil of his father. He made fiddles for some years, but finally gave himself up entirely to organ-making. His son, (5) SEBASTIAN (b. Paris, 1835; d. Nov. 17, 1875), was an excellent violin-maker, who had a workshop for many years at No. 27 Boulevard Bonne Nouvelle in Paris. He also gained several medals, and was the possessor of the unique machine for bending bows invented by his uncle Jean Baptiste Vuillaume. (See TARISIO.)

VULPIUS, MELCHIOR (b. Wasungen, Henneberg territory, c. 1560; d. Weimar, Aug. 7, 1615), became cantor at Weimar from 1602–15, and held this position till his death (he was buried on Aug. 7, 1615). He composed some Chorals, notably 'Jesu Leiden, Pein und Tod,' 'Christus der ist mein Leben,' and 'Weltlich Ehr und zeitlich Gut,' (see CHORALE); but accomplished much more in harmonising tunes for many voices, in which he showed himself a sound contrapuntist. His chief works are 'Cantiones Sacrae cum 6, 7 et 8 vocibus,' Jena, 1602; 'Cantiones Sacrae 5, 6 et 8 vocum,' 2 pts., Jena, 1603–04; 'Kirchengesänge und geistliche Lieder D. Lutheri und Anderer mit 4 und 5 Stimmen,' Leipzig, 1604, of which the second enlarged edition bears the title 'Ein schön geistlich Gesangbuch,' Jena, 1609, and has the melody in the discant, whereas most of his settings have it in the tenor; 'Canticum B.V. Mariae 4, 5, 6 et pluribus vocibus,' Jena, 1605; wedding hymns to Latin words, 1608, 1609 and 1614; 'Opusculum novum,' 1610; two books of 'Deutsche Sontägliche Evangelische Sprüche,' for the whole year (1612 and 1614), and a Passion oratorio (St. Matthew) (1613), in which the narrator has a tenor voice.

His *Musicae compendium* (1610) went through many editions. (For details of printed and MS. music see Q.-L.) It is interesting to note that Goethe's wife was 'née Vulpus of Weimar.'

R. M.; addns. E. v. d. S.

VYCPÁLEK, LADISLAV (b. Vršovice, near Prague, 1882), one of the most original of contemporary Czech composers; doctor of philosophy, and secretary of the University Library, Prague. Vycpálek studied music at the Prague Conservatoire, where his master for composition was Vít. NOVÁK (q.v.). A mystic and earnest thinker, his development has been deep and slow, and his output comparatively small. A fleeting attraction to impressionism soon gave way to independent and settled convictions, the outcome of his profound sympathy with suffering humanity and his sane democratic outlook. The quality of his art is somewhat ascetic; and although it is based on the folk spirit it makes no compromise with superficial popular taste. The essence of Vycpálek's style is polyphony; a rigorous and logical adherence to contrapuntal writing which, when the parts move at his volition without regard to accepted principles, sometimes involves him in a certain harmonic harshness. His methods reflect himself. Colour is a secondary consideration; orchestral opulence and glitter are voluntarily abnegated. In his music—which has a serious ethical relation to life—the chief values are spiritual. Vycpálek, in fact, may be called a spiritual descendant of the Unity of Bohemian

Brethren. Therefore it is not surprising that the operatic traditions of the Czechs have taken no root in him, and that his best work—by no means lacking in dramatic significance—is a devout cantata: 'Of the Last Things of Man' ('O posledních věcech člověka'). It was written in 1920, and is the outcome of that inevitable reaction after the victory when, in his own words:

'The seeds of war were still putting forth strong growths—the greed of humanity for money, the inconsiderate impatience for the fulfilment of individual interests, all the brutal materialism born of war, still threatened to choke everything higher and less aggressive. The cantata, which originated like a secret thing, came forth as an ardent and poignant protest against materialism.'

The text is based upon several Moravian folk-songs. The cantata is a continuous work, which falls, however, into three sections: the Triumph of Materialism, the Triumph of Death, the Triumph of Faith. The music is chiefly built upon two main subjects: the theme of Death and the Soul's theme. It is written for mixed chorus, alternating with solos for soprano and baritone. Besides this cantata, Vycpálek has composed several Song-cycles:

'Ticha Usmírení' (Quiet Reconciliation); 'Tuchy Vidlay' (Visions), op. 5; 'V Boží Dlaní' (In God's Hand), words by the Russian poet, V. Brussov, op. 14; five Moravian Ballads, op. 12; ten Moravian Folk-songs (descriptive of the soldier's fate), op. 13; Pianoforte Pieces, op. 3; choruses for mixed and male voice choir; 'Tuláci' (Traips); 'Sirotek' (The Orphan); 'Naše Jaro' (Our Springtide), op. 15, No. 1; 'Boj nyníšší' (The Conflict of To-day), op. 15, No. 2; mostly published by Hudební Matice, Prague.

R. N.

¹ For a full account of this cantata see R. Newmarch, *Some Czechoslovak Choral Works* (11) *Mus. T.*, Mar. 1 1923

WACHTEL, (1) THEODOR (b. Hamburg, Mar. 10, 1823/24; d. Nov. 14, 1893), opera singer. He was the son of a stable-keeper, and began life by driving his father's cabs. He learnt to sing from Mme. Grandjean, and obtained operatic engagements at Schwerin, Dresden, Hanover (1854), Berlin, Darmstadt, Vienna, etc. On June 7, 1862, he made his début in England at the Royal Italian Opera as Edgardo in 'Lucia,' and failed completely. He sang there again in the seasons of 1864 and 1865 with better results; and indeed obtained a certain popularity, more on account of his fine and powerful voice than from any artistic use he made of it. His principal attraction was the way he produced a C in alt direct from the chest instead of by the customary falsetto; he brought out the note with stentorian vigour and great success, especially when he played Manrico or Arnold. Of his other parts may be named Stradella on the production of Flotow's opera of that name at the Royal Italian Opera, June 4, 1864, and Vasco da Gama on the production of 'L'Africaine' in England, July 22, 1865. He reappeared in 1870, and again in 1877, at Her Majesty's. In 1869 he sang in Paris with very indifferent results, but was successful in America both in German and Italian opera.

His son, (2) THEODOR (b. 1841; d. Jan. 1871), began life as a clockmaker, and at one period of his life was a tenor singer of the same calibre as his father. He died of consumption. A. c.

WADDINGTON, SIDNEY PEINE (b. Lincoln, July 23, 1869), studied at the R.C.M. (where he won a scholarship) from 1883-88. In 1889 the College sent him for a time to Germany, and he stayed two months in Frankfurt and six in Vienna. In 1890 he was elected to the Mendelssohn Scholarship, which he held until 1893. He was choirmaster of St. Mary of the Angels, Bayswater, from 1894-1905. He conducted an amateur operatic society about 1896, and some years before that date had been chosen to complete the score of Goring Thomas's 'Golden Web.' He holds the appointment of teacher of harmony and counterpoint at the R.C.M., where latterly he has been also master of the opera class. From about 1896 he was *maestro al pianoforte* to the Royal Opera, Covent Garden. He is a member of the Associated Board of the R.A.M. and R.C.M., and one of the most experienced of the Board's examiners. His clever setting of 'John Gilpin' for chorus and orchestra was heard at a R.C.M. concert in Nov. 1894. He has written violin and violoncello sonatas, a string trio and quartet, a quintet for PF. and wind, a fantasia for piano solo, a beautiful suite for PF. duet, a concerto for PF. and orchestra, an

overture and an 'Ode to Musio' for soprano solo, choir and orchestra. M., with addns.

WADE, JOSEPH AUGUSTINE (b. Dublin, end of 18th or beginning of 19th cent.¹; d. London, July 15, 1845). Having published songs in 1813-14 and collaborated with Dr. Smith in an opera (Dec. 4, 1820), he migrated to London (1821), where his talents soon brought him into notice. From intercourse with orchestral performers he acquired sufficient confidence to undertake to conduct the opera during Monck Mason's regime, a position he did not long retain. He had been engaged by the firm of Chappell, at a salary of £300 a year, to make himself generally useful; but he made no use of his gifts as poet, musician and scholar, and the house reaped little advantage from him. He once returned to his native city—in Dec. 1840—travelling with Lavenue's touring party. It included Liszt, Richardson the flautist, the Misses Steele and Bassano, John Parry and J. P. Knight; two or three of Wade's concerted pieces were included in the concerts, at which, however, he did not appear, even as accompanist. He returned to London, where he died, at 350 Strand,² in destitution.

There is little doubt that Wade was a man of remarkable gifts and acquirements. His personal appearance was much in his favour; he was witty and quick in perception, and had acquired some knowledge of the Latin classics, as well as of one or two modern languages, and also had a smattering of anatomy. His memory was retentive in the extreme, and he possessed a gift for creating melody. The following is a list of his chief works, with their approximate dates:

'A Series of Select Airs,' etc., c. 1818; 'The Prophecy,' an oratorio (Drury Lane, 1824); 'The Two Houses of Granada,' (b. 1826); 'The Pupil of Da Vinci' (operetta by Mark Lemon), 1831; 'Polish Melodies' (words and music), 1831; 'Convent Belles' (with Hawes), 1833; 'A woodland life' (polacces interpolated in 'Der Freischütz' and sung by Braham); 'Meet me by moonlight alone' (sung by Vestris and published 1826); the duet 'I've wandered in dreams.'

This last obtained a popularity equalling the preceding ballad, which enjoyed an extraordinary vogue for many years. He wrote a *Handbook to the Pianoforte* which was dedicated to Liszt, whose portrait figured in the frontispiece. A new issue, edited by John Barnett, appeared in 1850. As early as 1831 he projected a *History of Music*, but it was never printed. He contributed to *Bentley's Miscellany*, the *Illustrated London News* and other periodicals. He was associated with Dr. Crotch and G. A. Macfarren in the pianoforte arrangement of the earlier issues of Chappell's 'National English Airs,' 1838. He appears to have occasionally signed his first name as

¹ About 1796 is the usual date given, but the register of death at Somerset House goes to support the theory that 1801 is the year of birth. See *Mus. T.* 1898, p. 597.

² *Musical World*, 1846, p. 501.

John, but there is no reason to doubt that it was really Joseph.

D.N.B., etc.

WAEFELGHEM, LOUIS VAN (b. Bruges, Jan. 13, 1840; d. Paris, June 19, 1908), Belgian violinist, viola and viole d'amour player (see VIOL. (6)). He was educated at the Athénée of Bruges and entered the Conservatoire of Brussels at the age of 17, studying the violin under Meerts and composition under Fétis. In 1860 he appeared successfully at Weimar, after which he settled in Dresden, attracted thither by his friend C. J. Lipinski. He was offered the professorship of the violin at Lemberg, in the Conservatoire, but refused the post to become solo-violinist at the Opera in Budapest. He left this post on the death of his father, but in 1863 he went to Paris, where he abandoned the violin for the viola. He played the viola in the Opéra orchestra in 1868, and at the Padeloup concerts, and finally settled down as examiner for the viola in the Conservatoire. After the Franco-German war Van Waefelghem came to London, where he played in the Opera orchestra, and in chamber concerts of the Musical Union with Joachim, Auer, Vieuxtemps, Sivori and Sarasate. In 1875 he was a member of a quartet society with Marsick, Rémé and Delsart. He also played the viola in Ovide Musin's quartet, with Metzger and Van der Gucht. He was in London every season for many years until 1895, when he resigned his position in Lamoureux's orchestra and devoted himself exclusively to the revival and study of the viole d'amour.

He speedily became probably the greatest artist of the 19th century upon this instrument, and being highly endowed with the enthusiasm of research, restored to the world a complete library of music for the instrument which had sunk into oblivion. He played upon a superb instrument dated 1720, made by Paul Aletzie, a Munich maker who settled in Venice. A minute description of this instrument is to be found in L. Grillet's *Les Ancêtres du violon*. Grillet was to the vielle (or hurdy-gurdy) what Van Waefelghem was to the viole d'amour, and played it to perfection. (His father was vielle-player to Louis XVI., and a pupil of Naudot, the great vielle-player of the time of Louis XV.) Van Waefelghem, Grillet, Diémer (harpisichord) and Delsart (viola da gamba) founded the Société des Instruments Anciens, and toured the whole of Europe with great success. On May 2, 1895, they made their début at the Salle Pleyel in Paris; in the summer of 1897 they gave concerts at the Salle Erard in London. A number of Van Waefelghem's viole d'amour solos have been published in Paris, and a Romance and a Melody of his ('Soir d'automne') for viole d'amour or viola are published by Durand. Schott published a 'pas-

torale' and 'rêverie' of his for violin and pianoforte. He was a Knight of the Legion of Honour, and of the Order of Leopold. The writer is indebted to Van Waefelghem's life-long friend, E. van der Straeten, for the information contained in this article, as also to his personal reminiscences of its subject. (See also E. G. Grégoire, *Les Artistes musiciens belges*.)

E. H.-A.

WAE LRANT, HUBERT (b. Tongerlo,¹ Kempenland, North Brabant, c. 1518; d. Antwerp, Nov. 19, 1595²), one of the most distinguished of the second generation of the great Flemish masters. An old tradition relates that he went in his youth to Venice, and there studied under the guidance of his great fellow-countryman Adrian Willaert; but this lacks confirmation, and may very possibly be as apocryphal as the similar story usually told with reference to Sweelinck's sojourn at Venice, and the lessons he had from Zarlino later on in the century. Be this as it may, Waelrant is found in the year 1544 established in Antwerp, as a singer in the choir of the chapel of the Virgin at Notre-Dame. Three years later he had a school of music there, where he introduced a new method of solmisation, that known as *bocedisation* or the *voces Belicae*.³ (See SOLMISATION.) He is said now to have entered partnership with J. de Laet as a publisher of music; but this was more probably not until 1554.⁴ The association lasted until 1558, when he retired. Waelrant was twice married—first in 1551, and again before 1568; by his first wife he had six children.

Among contemporaries Waelrant was held in very high repute, not only as a teacher of music but more especially as a composer, chiefly of madrigals and motets. Guicciardini, in his *Descrittione di tutti i Paesi bassi*,⁵ includes him in a list of the greatest living musicians of his time. His first musical works were: 'Chansons,' published by Phalesius at Louvain, 1553-54, and 'Il primo libro de madrigali e canzoni francezi (sic) a cinque voci; Anversa, Huberto Waelrant e J. Latio, 1558.' It is remarkable, however, that of the numerous volumes of music which he published—Psalms, 'Cantiones sacrae,' 'Jardin musical,' etc.—only two (of the 'Jardin') include compositions by himself. He seems in fact to have preferred to publish either by Tytman Susato or Phalesius. Seven of the collections of the latter contain works by Waelrant. One of these was also edited by him under the following title, 'Symphonia angelica di diversi

¹ The discovery of Waelrant's birthplace is due to the researches of A. Goovaerts, *Histoire et bibliographie de la typographie musicale dans les Pays-bas*, pp. 38-40, Antwerp, 1880. A confusion with a namesake had led to the opinion previously universally accepted, that the musician was a native of Antwerp (see Fétis, s.v.; Mendel and Reissmann; *Musikalisches Conversations-Lexikon*, xi, 293, 2nd ed. 1880; and also E. van der Straeten, *La Musique aux Pays-bas*, iii, 201-4, 1875.

eccellentissimi Musici, a quattro, cinque e sei voci; Nuovamente raccolta per Uberto Waelrant, 1585.'¹

B. L. P.

WAERT, DE, see WERT, DE.

WAGENAAR, JOHAN (b. Utrecht, Nov. 1, 1862), composer. He was a pupil of Richard Hol, and as Hol's successor remained a long time in Utrecht as a conductor, organist and teacher. In 1918 he was invited to The Hague as director of the Royal Conservatoire. Wagenaar's cantatas and humorous-burlesque operas show originality, while his virtuoso orchestral works are under the influence of Berlioz, Strauss and Mahler—the best known of these is the overture to 'Cyrano de Bergerac.' Wagenaar is an Hon. Doctor of Utrecht University, in acknowledgment of which honour he dedicated a sinfonietta to the faculty of philosophy.

R. M^c.

WAGENSEIL, GEORG CHRISTOPH (b. Vienna, Jan. 15, 1715; d. Mar. 1, 1777²). He studied the clavier and organ with Wöger, and the science of composition with Fux and Palotta, the former of whom recommended him for a court scholarship in 1736, and as court composer in 1739, a post which he retained till his death. He was also organist to the Dowager Empress Elizabeth Christine from 1741 to her death in 1750, and music-master to the Empress Maria Theresa and the Imperial princesses, with a life salary of 1500 florins. Among his pupils were Steffan, then court Kapellmeister, and Leopold Hoffmann, afterwards Kapellmeister of the cathedral. When Mozart, a little boy of 6, was playing before the court in 1762, he inquired, 'Is not Herr Wagenseil here? he knows all about it'; and when the latter came forward, he said, 'I am playing a concerto of yours; you must turn over for me.' In old age Wagenseil suffered from sciatica, which confined him to his room, and nearly lost the use of his left hand from gout. Nevertheless when Burney visited him he managed to play several of his compositions 'in a masterly manner, and with great fire.'³ In his day he was a favourite composer for the clavier with both amateurs and artists. He modelled his church music after Hasse and Scarlatti, his dramatic music after Leo and his instrumental after Rameau. Of the latter many pieces were engraved in Paris, London, Amsterdam and Vienna. There are several MS. works of his in the court library and in the archives of the Gesellschaft der Musikfreunde in Vienna, both vocal (cantatas, Italian arias, etc.) and instrumental (trios, quartets, divertimenti, symphonies, etc.). Two oratorios, 'La Redenzione,' 1755, and 'Gioas, rè di Giuda,' are in the court library at Vienna; a Requiem and two

masses are at Berlin, and many MSS. of psalms, motets, etc., are mentioned in *Q.-L.*, where fifteen operas are enumerated. Examples of his instrumental works are published in *D.D.T.*, 2nd series, xv. Of permanent value are 'Suavis artificiose elaboratus,' etc., in six parts (Bamberg, 1740); 'Tre divertimenti per cembalo' (Vienna, 1761); 'Divertissement musical,' six sonatas for harpsichord, op. 1 (Nuremberg, Haffner); and four numbers, each containing 'VI divertimenti da cembalo,' dedicated to his pupils the Archduchesses Mariana, Marie Cristina, Elizabeth and Amalia (all 1760), finely engraved on copper by Giorgio Nicolai for Agostino Bernardi the Viennese publisher. (See list in *Q.-L.*) The claim that Wagenseil wrote the theme of the 'Harmonious Blacksmith' is disposed of by the dates.

BIBL.—R. SONDHEIMER, *Die formale Entwicklung der vor-klassischen Sinfonie*. A.M.Z., Jan. 1922, pp. 91, 92.

WAGENSEIL, JOHANN CHRISTOPH (b. Nuremberg, Nov. 26, 1633; d. Altdorf, Oct. 9, 1708), historian and librarian, is noteworthy for his *Buch von der Meistersinger holdseligen Kunst* (1697). The work, containing the melodies of Frauenlob, Müglin, Murner and Regenbogen, is important as one of the chief sources of information on the methods of the Meistersinger (see SONG: GERMANY).

BIBL.—H. THOMPSON, *Wagner and Wagenseil* (London, 1927).

WAGNER, GEORG GOTTFRIED (b. Mühlberg, Saxony, Apr. 5, 1698; d. Plauen i. V., Mar. 23, 1756), pupil of Kuhnau at the school of St. Thomas, Leipzig, from 1712–19, studying theology there until 1726. In the latter year he became cantor at Plauen i. V. at the recommendation of J. S. Bach, in whose orchestra he had been principal violin. His motet 'Lob und Ehre' was published by Breitkopf & Härtel in 1819 as J. S. Bach's work. He also composed cantatas, oratorios, overtures, concertos, trios, solos, etc., which were held in high esteem, but remained in MS. (*Riemann; Q.-L.*).

WAGNER, GOTTHARD (b. Erding, 1679; d. Tegernsee, 1739), Benedictine monk at the monastery of Tegernsee from 1700, wrote several collections of sacred songs with instrumental accompaniment, viz.: 'Cygnus Marianus' (1710), 86 German airs; 'Musikalischer Hofgarten' (1717), 100 airs, 2 v. and basso continuo; 'Der Marianische Springbrunnen' (1720), 31 airs; 'Das Marianische Immelein' (1730), 52 airs, 4 v., with instruments; also a cantata, 4 v., with instruments, of which the MS. is in the Brussels Conservatoire Library (Lipowsky; *Q.-L.*).

WAGNER, JACOB KARL (b. Darmstadt, Feb. 22, 1772; d. Nov. 24, 1822), son of a Darmstadt court musician. He was apprenticed in the court chapel at Darmstadt in 1788, joined

¹ For the complete bibliography see *Q.-L.*

² He was thus in his 63rd year at the time of his death, and not 92 as Gerber states (vol. 1.), and after him Fétis. Neither was he 58, as Burney supposed when he visited him in 1772. (*Present State . . . Germany*, 1. 326.)

³ *Present State . . . Germany*, vol. 1. p. 326, etc.

the orchestra as oboist, became music-master and accompanist for the vocal music at the court in 1800, and court Kapellmeister in 1811. In 1820 he was pensioned. He composed operas, Singspiele, melodramas, music to Goethe's 'Götz von Berlichingen,' overture to *As You Like It*, and a large number of vocal and instrumental works, including symphonies, concertos, concertantes, overtures, pianoforte pieces, etc. (*Q.-L.*; *Riemann*).

WAGNER, PETER JOSEF (b. Trèves, Aug. 19, 1865), writer on musical subjects, more particularly ancient ecclesiastical music, was educated at the University of Strassburg and pursued his studies further at Berlin under Bellermann and Spitta. He became professor in the University of Freiburg (Switzerland) in 1897, and founded there (1901) a Gregorian academy for research and practical study. His publications include important works on Gregorian and mediæval music, together with *Geschichte der Messe* (part i., 1914).

WAGNER, (1) WILHELM RICHARD (b. Leipzig, May 22, 1813; d. Venice, Feb. 13, 1883).

The materials of the following article have been thus arranged: I. Biographical, personal. II. Literary. III. Musical. IV. Chronological and Bibliographical Lists.

I. Wagner's ancestors were natives of Saxony,¹ fairly well educated and fairly well-to-do. The grandfather, Gottlob Friedrich Wagner (d. 1795), was *Accisassistent*, and later on *Kurfürstlich Sächsischer Generalacciseinnehmer* (Receiver-General of Excise), in plain words *Thorschreiber* (clerk at the town gates of Leipzig); he married in 1769 Johanna Sophia Eichel, daughter of Gottlob Friedrich Eichel, *Schulhalter* (keeper of a school). Of their children, two sons and a daughter, the eldest son, Carl Friedrich Wilhelm Wagner (b. Leipzig, 1770), was the father of the poet-composer. He is described as *Actuarius bei den Stadtgerichten* (clerk to the city police courts); a ready linguist, whose command of French stood him in good stead during the occupation of Leipzig, when Davoust made him chief of police; fond of poetry and of theatricals, in which he occasionally took an active part—as, for instance, in the private performance of Goethe's 'Die Mitschuldigen,' given by Leipzig dilettanti in Thomé's house, near the famous Auerbach's Keller, facing the Marktplatz. He married in 1798 Johanna Rosina Pätz² (b. Weissenfels; d. Feb. 1848), by whom, between 1799 and 1813, he had nine children:

1. Carl Albert Wagner, 1799–1874, studied medicine at the University of Leipzig; actor and singer

¹ See *Richard Wagner und seine erste 'Elisabeth' Johanna Jachmann-Wagner. Ein neuer Beitrag zur Wagnerforschung*, edited by Dr. Julius Kapp and Hans Jachmann, Berlin, 1927, which contains a genealogical table of the Wagner family from Samuel Wagner, 1643–1705.

² All Wagner's biographers have followed one another in giving this name as Bertz: Mrs. Burrell has shown that the above is the correct version. (See her *Life of Wagner*, p. 13.) Wagner himself, in the autobiography, gives it as Bertz.

at Würzburg and Dresden; finally stage manager at Berlin; father of Johanna Jachmann-Wagner, the well-known singer.

2. Carl Gustav Wagner, 1801, died early.
3. Johanna Rosalie Wagner, distinguished actress (Frau Dr. Gotthard Oswald Marbach), 1803–37.
4. Carl Julius Wagner, 1804, became a goldsmith; died at Dresden, 1862.
5. Lulse Constanze Wagner (Frau Friedrich Brockhaus), 1805–71.
6. Clara Wilhelmine Wagner (Frau Wolfram), a singer, 1807–75.
7. Maria Theresia Wagner, 1809, died 1814.
8. Wilhelmine Ottilie Wagner (Frau Professor Hermann Brockhaus ?), 1811–83.
9. WILHELM RICHARD WAGNER, May 22, 1813.

The last of these dates⁴ is inscribed on a white marble slab between the first and second stories of a quaint old house *Der rothe und weisse Löwe*⁵ in the Brühl at Leipzig, No. 88, where the poet-composer was born. After the battle of Leipzig, Oct. 16, 18 and 19, 1813, an epidemic fever, attributed to the carnage, fell upon the town, and just six months after Richard's birth, on Nov. 22, the 'Herr Actuarius' died of it. His widow was left in sad straits. The eldest son was but 14; she had no private means, and her pension was small. In 1814 she became the wife of Ludwig Geyer (b. Eisleben, Jan. 21, 1780), actor, playwright and amateur portrait-painter. He had formerly been a member of 'Seconda's troupe,' which used to give theatrical performances alternately at Dresden and Leipzig. At the time of the marriage he was a member of the Königl.-Sächs.-Hoftheater, and accordingly the family removed to Dresden.⁶ Richard Wagner frequently spoke of him with affectionate reverence, treasured his portrait by the side of that of his mother, and was delighted at the surprise performance of one of Geyer's little plays, 'Der Bethlehemitische Kindermord,' which was privately got up at Bayreuth in celebration of his sixtieth birthday, 1873. 'My school-books at the Dresden Kreuzschule,' Wagner said to the writer, 'were marked Richard Geyer, and I was entered under that name.'⁷

³ Hermann Brockhaus, the well-known Orientalist and translator of Somadeva, etc.

⁴ At Wagner's birth Beethoven was 49 years old, Spohr 29, Weber 27, Marschner 17, Spontini 38, Rossini 31, Auber 29, Meyerbeer 22, Bellini 11, Berlioz 10, Mendelssohn and Chopin 4, Schumann 3, Liszt 2.

⁵ In 1886 the house in the Brühl was condemned as unsafe and pulled down; a tablet has been placed in the building which has been erected on or near the same spot.

⁶ There was also a child of the second marriage, Cæcillie Geyer (b. 1816), who appears as Frau Avenarius in Wagner's correspondence.

⁷ It was no uncommon occurrence for a boy to be thus entered under the name of his stepfather, and the circumstance gives no support to the theory that Wagner was in reality the son of the clever actor. Mrs. Burrell's book gives ocular demonstration, by a very remarkable similarity between the composer and a portrait of a Wagner uncle, that the boy was actually the son of the 'Actuarius.' The whole question of Wagner's paternity has been dealt with by Ernest Newman in *Wagner as Man and Artist* (London, 1914), and still more fully in the second edition (1926). It is also dealt with in Wallace's *Richard Wagner* (London, 1925), Appx. B. The question depends entirely upon surmise, and direct evidence is at this time obviously impossible. The assertion, said to have originated with Nietzsche (or, according to some, Motz), that Wagner in his autobiography described himself as the son of Geyer, has been proved false, for a comparison made by Fuller Maitland between a copy of the privately printed edition of 1870 and the edition published in 1911, showed that the passage in question had not been altered. The point would have no real importance but for the suggestion that the Geyer parentage brought a strain of Jewish blood into the composer, but Bourne, in his book on Geyer, has traced his family back to 1700, and shown that throughout that time the Geysers were all of the Evangelical faith, married Germans, and had 'Christian' as a favourite family name.

'Geyer¹ wanted to make a painter of me, but I was very unhandy at drawing; I had learnt to play "Ueb' Immer Treu und Redlichkeit" and the "Jungfernkranz" ("Freischütz"), which was then quite new. The day before his death (30th Sept. 1821) I had to play these to him in an adjoining room, and I heard him faintly saying to my mother, "Do you think he might have a gift for music?"'

In Dec. 1822 (aet. 9) Richard had begun to attend the Kreuzschule, a 'classical school.' He did well there, and became the favourite of Herr Silig, the professor of Greek, to whose delight (aet. 13) he translated the first twelve books of the *Odyssey* out of school hours.² His progress in Latin seems to have been comparatively slow, still his gifts attracted attention. 'I was considered good in *litteris*.' At German verses he was unusually quick. The boys were asked to write commemorative verses on the death of a schoolfellow, and after the removal of much bombast Richard's were printed (aet. 11). 'I was now bent upon becoming a poet; I sketched tragedies in Greek form in imitation of Apel's "Polyeidos," "Die Aetolier," etc. I attempted a metrical translation of Romeo's monologue, by way of learning English, etc.' German versions of Shakespeare were then, as now, much read. The boy's fancy was excited, and he secretly began a grand tragedy (aet. 14). It was made up of Hamlet and Lear; forty-two men died in the course of it, and some of them had to return as ghosts so as to keep the fifth act going.³ Weber's music also took hold of him. He knew the airs from 'Der Freischütz' by heart, and played the overture 'with atrocious fingering.'

'When Weber passed our house on his way to the theatre, I used to watch him with something akin to religious awe.'⁴

It appears that Weber now and then stepped in to have a chat with the delicate-featured and intelligent Frau Geyer. 'Her sweet ways and lively disposition had a special charm for artists.' But the pleasant life at Dresden was not to last long. Geyer's salary had been a small one, and soon after his decease pecuniary troubles arose. Three of the grown-up children took to the theatre, and when the elder sister Rosalie got a good engagement as 'erste Liebhaberin' at Leipzig, the mother followed with the younger members of the family. Richard attended the Kreuzschule till the autumn of 1827, and entered the Nicolaischule at Leipzig early in the following year (aet. 15). The change proved unfortunate. He had sat in 'Secunda' at Dresden, and was now put back to 'Tertia'; his feelings were hurt, and he came to dislike the school and the masters.

'I grew negligent, and scamped the work; nothing interested me except my big tragedy.'

¹ Autobiographische Skizze, 1842.

² The autobiography mentions 12 books, the school archives give the number as 3. After over forty years Wagner's memory may have played him false, and it seems unnecessary to convict him of dishonesty on the strength of this slip. But see Wallace (*supra*), at p. 13 and Appx. A, in which he deals at great length with Wagner's knowledge of the Classics.

³ It was called 'Leubold, ein Trauerspiel' (Mrs. Burrell, p. 83).

⁴ For Wagner's early years see A. Schilling's *Aus R. W.'s Jugendzeit* (Bibliography below).

At the Gewandhaus Concerts he first heard Beethoven's symphonies, and the impression upon him 'was overwhelming.' Music such as that to 'Egmont' appeared to be the very thing needful for the tragedy. He found a copy of Logier's 'Thorough-bass' at a circulating library, and studied it assiduously; but somehow the 'System' could not be turned to account. At length a master was engaged, Gottlieb Müller, subsequently organist at Altenburg; Richard composed a quartet, a sonata and an aria, under his guidance: but it does not appear how far Müller was really responsible for these pieces. The lessons did not last long. Müller thought his pupil wilful and eccentric, and in return was accounted a stupid pedant. The ferment in Richard's mind now took a literary direction. The writings of E. T. A. Hoffmann engrossed his attention, and it is curious to note that so early as in his 16th year he became acquainted with some of the subjects which he treated later on. Thus, Hoffmann's 'Serapions Brüder,' in vol. ii., contains a story about the legendary contest of 'Meistersinger' (Hoffmann's misnomer for 'Minnesinger') at Wartburg (2nd act of 'Tannhäuser'); and sundry germs of Wagner's 'Meistersinger' are to be found in Hoffmann's 'Meister Martin der Küfer von Nürnberg.'—Ludwig Tieck's narrative poem 'Tannhäuser' was read at the same time.—A performance of Beethoven's Pastoral Symphony led to an attempt at a music pastoral, the dramatic aspect of which was suggested by Goethe's 'Laune des Verliebten.' In 1830 Richard attended the 'Thomasschule' with results little more satisfactory than at the 'Nicolai.' Practically his philological studies went no further; 'I chose to write overtures for grand orchestra, and to bluster about politics with young literati like Heinrich Laube.' An overture (in B♭, 6-8) was performed under H. Dorn at the theatre in a Christmas Day concert⁵ (1830, aet. 17).

'This was the culminating point of my absurdities. The public was fairly puzzled by the persistence of the drum-player, who had to give a *tap fortissimo* every four bars from beginning to end; people grew impatient, and finally thought the thing a joke.'

When he matriculated at the University of Leipzig (Feb. 23, 1831),⁶ Wagner had the good luck to find a proper master, Theodor Weinlig, cantor at the Thomasschule, an admirable musician and a kindly intelligent man, who at once gained his pupil's confidence and led him in the right direction. Wagner felt deeply indebted to Weinlig, and held his memory in great esteem. In 1877 he spoke at length about the lessons:

'Weinlig had no special method, but he was clear-headed and practical. Indeed you cannot *teach* composition, you may show how music gradually came to be what it is, and thus guide a young man's judgment,

⁵ See Mrs. Burrell, p. 99.

⁶ Autobiographische Skizze.

⁷ This is shown to be the true date, notwithstanding the statement in Wagner's *Mein Leben*, as Mrs. Burrell gives facsimiles from the University books, p. 109, etc.

but this is historical criticism, and cannot directly result in practice. All you can do is, to point to some working example, some particular piece, set a task in that direction, and correct the pupil's work. This is what Weinlig did with me. He chose a piece, generally something of Mozart's, drew attention to its construction, relative length and balance of sections, principal modulations, number and quality of themes, and general character of the movement. Then he set the task—you shall write about so many bars, divide into so many sections with modulations to correspond so and so, the themes shall be so many, and of such and such a character. Similarly he would set contrapuntal exercises, canons, fugues—he analysed an example minutely and then gave simple directions how I was to go to work. But the true lesson consisted in his patient and careful inspection of what had been written. With infinite kindness he would put his finger on some defective bit and explain the why and wherefore of the alterations he thought desirable. I readily saw what he was aiming at, and soon managed to please him. He dismissed me, saying, you have learnt to stand on your own legs. My experience of young musicians these forty years has led me to think that music should be taught all round on such a simple plan. With singing, playing, composing, take it at whatever stage you like, there is nothing so good as a proper example, and careful correction of the pupil's attempts to follow that example. I made this the basis of my plan for the reorganisation of the Music-school at Munich, etc.¹

The course with Weinlig lasted barely six months. A sonata in four movements B \flat , op. 1, and a polonaise for four hands in D, op. 2, were printed at Breitkopf & Härtel's—straight-forward music, solid school-work, without a trace of Wagner. A fantasia in F \sharp minor, where Weinlig's controlling hand is less visible, remains in MS.

Whilst this musical work was going on, philology and aesthetics, for which his name was set down at the University, were neglected. He plunged into the gulf of German students' dissipation (curious details are given in *Mein Leben*), but soon felt disgusted, and worked all the more steadily at music. In the course of 1830 he made a pianoforte transcription of Beethoven's ninth symphony, which was offered to Messrs. Schott in a letter dated Oct. 6. In 1831, feeling sure of his competence to do such work, he addressed a letter in very modest terms to the Bureau de Musique (Peters) offering his services as 'corrector for the press and arranger.'² Dorn³ gives a pleasant account of his enthusiasm for Beethoven in those early days.

'I doubt whether there ever was a young musician who knew Beethoven's works more thoroughly than Wagner in his 18th year. The master's overtures and larger instrumental compositions he had copied for himself in score. He went to sleep with the quartets, he sang the songs and whistled the concertos (for his pianoforte-playing was never of the best); in short, he was possessed with a *furor teutonicus*, which, added to a good education and a rare mental activity, promised to bring forth rich fruit.'

A 'Concert-overture mit Fug.' in C (MS.) was written in 1831; and another MS. overture in D minor (Sept. 26, amended Nov. 4) was performed Dec. 25, 1831.

In 1832 (aet. 19) he wrote a symphony in

¹ These and other words of Wagner's not otherwise authenticated, were uttered in conversation with the writer in the spring and summer of 1877, and are here first made public.

² Herr Tappert, in his admirable brochure *Richard Wagner, sein Leben und seine Werke*, gives the entire letter (Aug. 6, 1831).

³ In a contribution to Schumann's *Neue Zeitschrift*, 1838, No. 7.

four movements (C major).⁴ 'Beethoven,' he says of it, 'and particular sections of Mozart's C major symphony were my models, and in spite of sundry aberrations, I strove for clearness and power.' In the summer of this year he took the scores of the symphony and the overture in C to the 'Music-town,' Vienna—probably with a view to some small post. He found Herold's 'Zampa' and Strauss's pot-pourris upon it rampant there, and beat a hasty retreat. On the way home he stopped at Prague, and made the acquaintance of Dionys WEBER (q.v.), director of the Conservatorium, whose pupils rehearsed the symphony. The score was then submitted to the directors of the Gewandhaus Concerts at Leipzig. The managing director, Hofrath Rochlitz, editor of the *Allgemeine Musikalische Zeitung*, an authority in musical matters, invited the composer to call.

'When I presented myself to him, the stately old gentleman raised his spectacles, saying, "You are a young man indeed! I expected an older and experienced composer." He proposed a trial performance at the meetings of a junior institution, the "Euterpe," and a fortnight afterwards (Jan. 10, 1833) my Symphony figured in the programme of a Gewandhaus Concert.'

The sequel of the story of the work is as follows. In 1834–35 Wagner, being on a visit to Leipzig, presented the score to Mendelssohn, who was then conducting the Gewandhaus Concerts; or rather, he forced it upon him in the hope of getting a critical opinion, and perhaps another performance. Mendelssohn, though repeatedly meeting Wagner later on, never mentioned the score and Wagner did not care to ask him about it. After Mendelssohn's decease the MS. appears to have been lost, and inquiries proved fruitless. In 1872 an old trunk was discovered at Dresden which had been left by Wagner during the disturbances of 1849. It contained musical odds and ends, together with a set of orchestral parts almost complete, which proved to be those of the missing symphony in the handwriting of a Prague copyist of 1832. A new score was compiled from these parts, and after nearly half a century a private performance of the work was given by the orchestra of the Liceo Marcello at Venice on Christmas Eve, 1882, Wagner conducting. Apart from its biographical interest the symphony has few claims to attention. In 1883, 'for the benefit of the curious,' Wagner quoted a fragment of the andante, and then dismissed the whole as 'an old-fashioned *ouvrage de jeunesse*.'⁵

Whilst at Prague (summer of 1832) he wrote his first libretto for an opera, 'Die Hochzeit.'

'It was of tragic import. An infuriated lover climbs to the window of the bedroom of his beloved, who is his friend's bride. She is awaiting the arrival of the bridegroom. The bride wrestles with the

⁴ As to the 'Polonia' overture, written about this time, see the *Mus. T.* 1905, p. 117. It was performed with the 'Columbus' and 'Rule, Britannia' overtures at the Queen's Hall, Jan. 2, 1905.

⁵ Details in *Ges. Schriften*, vol. x., *Bericht über die Wiederauf-führung eines Jugendwerkes*, pp. 399–405 (*Prose Works*, vi. 313).

madman, and precipitates him into the courtyard below. At the funeral rites the bride, with a wild cry, falls dead over the corpse.¹

On his return to Leipzig he began writing the music. There was a grand septet, which pleased Weinlig; but Wagner's sister Rosalie disapproved of the story, and the verses were destroyed. An autograph presentation copy to the Würzburger Musikverein, consisting of the introduction, chorus and septet (not sextet), 36 pages, is extant.

With the year 1833 (æet. 20) begins Wagner's career as a professional musician. The elder brother Albert, who had a high tenor voice, was engaged at the theatre of Würzburg as actor, singer and stage manager. Richard paid him a visit² lasting from February until January 1834, and was glad to take the place of chorus-master with a pittance of 10 florins per month. Albert's experience of theatrical matters proved useful; the Musikverein performed several of Richard's compositions; his duties at the theatre were light, and he had ample leisure to write the words and music to an opera in three acts, 'Die Feen.' The plot of this opera is constructed on the lines of Gozzi's 'La donna serpente, Fiaba teatrale in tre atti,' with a characteristic change in the *dénouement*. In Gozzi's play, as in the Scottish ballad *The Laidly Worm*, a fairy is ready to forgo her immortality for a mortal lover, but she can do so only under certain conditions. The lover shall not disown her, no matter how unworthy she may happen to appear. The fairy is turned into a snake, which the lover courageously kisses. Wagner alters this; the fairy is not changed into a snake but into a stone, and she is disenchanted by the power of music.

'Beethoven, Weber and Marschner were my models. The ensemble pieces contained a good deal that seemed satisfactory, and the finale of the second act especially promised to be effective.'

Excerpts were tried at Würzburg in 1834. On his return to Leipzig Wagner offered the opera to Ringelhardt, the director of the theatre, who accepted but never performed it. The autograph score was in the possession of the King of Bavaria. 'Die Feen' was produced at Munich in 1888.

In the spring of 1834 Wilhelmine Schröder-Devrient appeared at Leipzig. Her performances, both as actress and as singer, gave a powerful impulse to Wagner's talents. He had seen her as Fidelio in 1832.³ Her rare gifts appear to have suggested to him that intimate union of music with the drama which he afterwards achieved. During six important years (1842-48 and 1849), when she was engaged as principal singer and he as Kapellmeister at Dresden, he was in almost daily communication with her. As late as 1872 he stated that her example had constantly been before him:

'Whenever I conceived a character I saw her.' In 1834 she sang the part of Romeo in Bellini's 'Montecchi e Capuletti.' The young enthusiast for Beethoven perceived the weakness of Bellini's music clearly enough, yet the impression Mme. Devrient made upon him was powerful and artistic. The Leipzig theatre next brought out Auber's 'La Muette de Portici' (Masaniello). To his astonishment Wagner found that the striking scenes and rapid action of this opera proved effective and entertaining from beginning to end, even without the aid of a great artist like Mme. Devrient. This set him thinking. He was ambitious, and longed for an immediate and palpable success;—could he not take hints from Bellini and Auber, and endeavour to combine the merits of their work? Heroic music in Beethoven's manner was the true ideal; but it seemed doubtful whether anything approaching it could be attained in connexion with the stage. The cases before him showed that effective music can certainly be produced on different lines and on a lower level; the desiderata, as far as he then saw them, were: to contrive a play with rapid and animated action; to compose music that would not be difficult to sing and would be likely to catch the ear of the public. His sole attempt in such a direction—'Das Liebesverbot,' an opera in two acts after Shakespeare's 'Measure for Measure' (the part of Isabella intended for Mme. Devrient)—has not had a fair chance before the footlights. He sketched the libretto during the summer holidays, and worked at the score in 1835 and 1836. Details of the plot and the rather licentious tendency of the whole are described in his *Ges. Schriften*, vol. i. (*Prose Works*, vii. 5). The music is curiously unlike his former models, and it is easy to trace the influence of 'La Muette,' and even of 'Il pirata' and 'Norma.'⁴

In the autumn of 1834 Wagner undertook the duties of Musikdirektor at the Magdeburg theatre. The troupe of actors and singers, mostly young people, was not a bad one; they liked him, and the curious life behind and before the scenes afforded interest and amusement. At concerts under his direction the overture to 'Die Feen' and a new overture to Apel's play, 'Columbus' (1835), were performed⁵; he wrote music for the celebration of New Year's Day, 1835, songs to a fantastic farce, 'Der Berggeist,' etc., and came to be liked by the public as well as the artists. In the summer of 1835 he went on a tour to find new singers, and was promised 'a benefit performance' as a set-off against expenses. During this tour he again met Mme. Schröder-Devrient when she appeared at Nuremberg as Fidelio, and as Emmeline in Weigl's 'Schweizerfamilie.' The theatre at Magdeburg was supported by a small subven-

¹ In Mrs. Burrell's collection was the MS of a septet written at Würzburg. A tablet was affixed in 1890 to the house where he lived.

³ See *Int. Mus. Ges. Quarterly*, Jan. 1912, p. 348.

⁴ On this overture see *Mus. Z.*, 1906, p. 117. It was played at the Queen's Hall, Jan. 2, 1905.

tion from the court of Saxony and managed by a committee. But in spite of such assistance and supervision the worthy director, Bethmann, was ever on the brink of bankruptcy. He had a habit of disappearing when pay-day came round, and the troupe was in a bad plight during the spring season of 1836. 'We meant to close,' writes Wagner,

'towards the end of April with my opera, and I worked hard to get score and parts finished in good time. But as early as March the leading members threatened to leave; for my sake they agreed to remain till the end of the month and to study my work. This, however, was not an easy task. No *Singspiel*, but music after the manner of *La Muette*! Herr Bethmann represented that he would be put to sundry expenses for stage properties, etc., and claimed the first night for *his* benefit. I was to profit by the second.'

There were twelve days left, and the preparations went on incessantly; rehearsals at the theatre, rehearsals at every private lodging; all Magdeburg excited; yet no man knew his part, and the ensembles were hopeless. At the general rehearsal Wagner's conducting, gesticulating and prompting kept things together somehow. Not so at the performance (Mar. 29, 1836)—a crowded house, and utter chaos. The repetition for the composer's benefit was duly announced, but collapsed ere the curtain could rise—few people in the auditorium, and a free fight behind the scenes!¹

Wagner had many debts and no means to pay. He repaired to Leipzig, hoping that the long connexion of members of his family with the theatre there would smooth the way for 'Das Liebesverbot.' He was advised to offer the part of Marianne to the daughter of the director; but Ringelhardt, after perusing the libretto, stated that his paternal conscience would not permit him to sanction the appearance of his daughter 'in a piece of such frivolous tendency.' Wagner next applied to the Königstädter Theater at Berlin—equally in vain. Penniless, he left Berlin for the Prussian town of Königsberg, where colleagues from Magdeburg—Frau Pollert the prima donna, and his special friend Wilhelmina or 'Minna' Planer the actress (erste Liebhaberin)—had found engagements. With a view to the conductorship he arranged concerts at the Schauspielhaus, at one of which an overture of his, presumably 'Columbus,' was performed. At length the appointment as conductor was promised, and he forthwith married Fräulein Planer² (Nov. 24, 1836), the third daughter of the 'Mechanicus' Gothilf Planer of Dresden. 'I wasted a year at Königsberg amid petty cares, worrying myself and others. An overture, "Rule, Britannia,"³ is the only thing I wrote.'

How to get out of this groove of mediocrity? He longed for Paris. In those days success in the operatic world began in France. Had not Meyerbeer recently cleared 300,000 francs by 'Les Huguenots'? Wagner sent sketches for an opera in four acts—'Die hohe Braut,' after a novel of Heinrich König's—to Scribe the librettist, hoping thus to approach the Parisian Opéra.⁴ Of course Scribe took no notice. About Michaelmas the director at Königsberg followed Herr Bethmann's example and declared himself bankrupt.

Wagner eagerly grasped at a chance which presented itself from the Russian side of the Baltic. A theatre was about to be started under Karl v. Holtei at Riga. On the recommendation of Dorn, who had gone thither some years before, Wagner was chosen First Musikdirektor, and his wife and her sister, Therese Planer, were engaged for the 'Schauspiel.' As compared with Magdeburg or Königsberg, Riga was a wealthy place, and the salaries were liberal. Wagner found all that was needful to attain good performances, and set to work energetically. During the winter season he conducted orchestral concerts⁵; his overtures 'Columbus' and 'Rule, Britannia' were played; he wrote various arias for the vocalists; and the text to a comic opera in two acts, 'Die glückliche Bärenfamilie.'⁶ Dec. 11 is the date of a 'Benefizvorstellung von Bellinis Norma, für Herrn Musikdirector Wagner.' During the summer of 1838 he rehearsed Méhul's 'Joseph' 'with great love and enthusiasm for the work'—and completed the book of 'Rienzi.'

'When in the autumn I began the music to "Rienzi," my sole care was to do justice to the subject. I had so laid it out that a first performance would be impossible at a second-rate theatre. I had Paris in view. The thought of conscious triviality, even for a single bar, was intolerable. The character of Rienzi, ardent, aspiring, amid barbarous surroundings, interested me. I approached it by way of the grand opera; still my first care was to depict it in accordance with my feelings.'

In the spring of 1839, at the termination of his contract, the first two acts were finished. He returned to Königsberg (July 1839), repaired to the port of Pillau, and took berths, on board a sailing vessel⁷ bound for London, for himself, his little wife, and a huge Newfoundland dog, en route for Paris.

'I shall never forget the voyage: it lasted three weeks and a half, and was rich in disasters. Three times we suffered from the effects of heavy storms. The passage through the Narrows made a wondrous impression on my fancy. The legend of the "Flying Dutchman" [he had read it in Heine's *Salon*] was

¹ In 1849 these sketches were carried out in light verse to oblige Kapellmeister Reissiger, Wagner's colleague at Dresden. In 1848 the opera, entitled ('Bianca und Giuseppe,' or 'Die Franzosen in Nizza,' in four acts, and with sundry alterations enforced by the Austrian censorship, music by Kapellmeister J. F. Kittl, was performed at Prague with considerable and lasting success.

² As to Wagner's orchestration of a Rossini duet for a concert in Mar. 1838 see Int. Mus. Ges. Monthly Journal, June 1912, p. 309, art. by Einstein.

³ L. Nohl found the MS. at Riga in 1872, together with sketches for bits of the music—'à la Adam.' These are quoted in *Neue Zeitschrift* (1894, p. 244).

⁴ See *Eine Mittheilung an meine Freunde*.

⁵ The *Thetis*, an English vessel.

confirmed by the sailors, and the circumstances gave it a distinct and characteristic colour in my mind. We stopped eight days in London to recover from the trying effects of the voyage. I was interested above all things in the aspect of the town and the Houses of Parliament; of the theatres I saw nothing.¹

At Boulogne he made the acquaintance of Meyerbeer, and remained four weeks to cultivate it. How far the music to 'Rienzi' pleased Meyerbeer does not appear, and the saying attributed to him that 'Rienzi' is the best opera-book extant is not sufficiently authenticated. Meyerbeer provided Wagner with letters of introduction to the directors of the Opéra and the Théâtre de la Renaissance, to Schlesinger the music publisher and proprietor of the *Revue et Gazette musicale*, and to M. Gouin his agent, 'l'alter ego du grand maître.' Assertions in German journals that Wagner was then or at a later period under pecuniary obligations to Meyerbeer are groundless, and have been publicly contradicted. The true relations of the two men will be described farther on.

PARIS.—Wagner arrived in Paris in Sept. 1839 and remained till Apr. 7, 1842 (aet. 26-29). His hopes and plans were not realised; yet, for the growth of his power as an artist this was an important and eventful time.

'Except for the sake of my poor wife, whose patience was sorely tried, I have no reason to regret the adventure. At two distinct periods we felt the pinch of poverty severely—actually suffered from cold and hunger. I did a good deal of work, mere drudgery for the most part, but I also studied and wrote assiduously, and the performances of Beethoven at the Conservatoire were invaluable to me.'

They found lodgings in an out-of-the-way quarter, Rue de la Tonnellerie, 'au fond d'un appartement garni d'assez triste apparence,' in an old house which claims to have been the birthplace of Molière. Patronised and introduced by Meyerbeer, Wagner was received with marked politeness.

'Léon Pillet [director of the Opéra, at that time called ACADEMIE ROYALE DE MUSIQUE, &c.] lui tend les bras, Schlesinger lui fait mille offres de service, Habeneck [conductor at the Opéra and the Conservatoire] le traite d'égal à égal.'

But he soon found that fine speeches meant anything rather than help or goodwill. In fact Meyerbeer's intervention seems to have told against, rather than for him. 'Do you know what makes me suspicious of this young man?' said Heine: 'it is that Meyerbeer recommends him.'² When told of Wagner's antecedents and his sanguine hopes of success, Heine devoutly

folded his hands in admiration of a German's faith. There was no chance whatever for 'Rienzi' at the Opéra.

'Quand il lui détaille les merveilles de son *Rienzi*, le directeur de l'académie enveloppe sa phrase laudative d'épithètes plus réservées: quand il insiste et demande une audition à jour fixe, son interlocuteur recule visiblement, et redouble d'amenités oratoires pour éviter un engagement formel.'

A writer for the *Variétés* undertook a translation of the libretto of 'Das Liebesverbot' for the Théâtre de la Renaissance. Three numbers were tried and found acceptable.

'Wagner quitte à la hâte la rue de la Tonnellerie, trop éloignée de ce monde d'artistes avec lequel il va se trouver journellement en contact. Il achète des meubles et s'établit triomphalement rue du Helder.'

On the very day of his removal M. Joli the director failed, and the doors of the theatre were closed. Wagner attempted to gain a footing at one of the Boulevard theatres. There was a talk of his setting a vaudeville of Dumas's, 'La Descente de la Courtille,' and a beginning was made.

'Malheureusement, les choristes du théâtre ne s'étaient pas aguerris encore à cette époque avec la musique de *La Belle Hélène*, et après quelques répétitions dérisoires, on déclara celle du jeune Allemand parfaitement inexécutable. On en conserva seulement une chanson: "Allons à la Courtille!" qui eut son heure de célébrité.'

Wagner offered himself as a 'choriste' at a still smaller Boulevard theatre.

'I came off worse than Berlioz when he was in a similar predicament. The conductor who tested my capabilities discovered that I could not sing at all, and pronounced me a hopeless case all round.'

He tried song-writing with a view to the Salons. A French version of Heine's 'Die beiden Grenadiere' was made for him, and he set it, in 1839, introducing the 'Marseillaise' at the close—a rather difficult and not altogether satisfactory composition, refused by professional singers with sufficient reason. It appears strange, however, that neither singers nor publishers would have anything to do with three other simple and lovely songs to French words: the delicious little *Berceuse* 'Dors, mon enfant,' Ronsard's 'Mignonne' and Victor Hugo's 'Attente.' These were, literally, too good for the market. For 'Mignonne' Wagner in the end got a few francs when the song was printed in the music pages of a French periodical. Subsequently (1841-42) it appeared, together with 'Attente' and 'Dors, mon enfant,' in the 'Beilagen' to Lewald's *Europa*. Apr. 1, 1841, is the date of a touching letter to the editor of *Europa*, to whom Wagner submits the three songs, requesting speedy payment of the 'maximum' fee paid for such contributions, since prices are known to vary from 5 to 9 florins (about 10s. to 18s.), 'Ein Schelm, wenn sich besser giebt, als er ist: mich hat man hier so zugerichtet!'

On Feb. 4, 1840, the score of a superb orches-

² Gasperini, *R. Wagner*, p. 27. The chanson has not been traced.

¹ They lodged for a night at the Hoop and Horseshoe, 10 Queen Street, Tower Hill, still existing; then stayed at the King's Arms boarding-house, Old Compton Street, Soho, from which place the dog disappeared, and turned up again after a couple of days, to his master's frantic joy. Wagner's accurate memory for localities was puzzled when he wandered about Soho with the writer in 1877 and failed to find the old house. Mr. J. Cyriax, who has zealously traced every step of Wagner in London 1839, 1855 and 1877, states that the premises have been pulled down. (See F. G. Edwards, *Musical Haunts in London*, p. 50; *Mein Leben*, p. 199.)

² On the authority of Theodor Hagen, late editor of the *New York Musikzeitung*. No other well-authenticated utterance of Heine regarding Wagner has come to light. The so-called letter to Laube which appeared in *Das Orchester* (Dresden), and was reprinted by Herr Kastner in *Parsifal*, is not a letter at all, but a concoction made up of Laube's words.

tral piece, published 15 years later as 'Eine Faust Ouvertüre,' was finished. This is the first work that has the true stamp of Wagner. It was conceived after a rehearsal of Beethoven's ninth symphony at the Conservatoire in the winter of 1839 (aet. 26), and is in some sense a piece of autobiography written in music. As originally planned it was to form the first movement of a Faust symphony. After a trial performance at Dresden, July 22, 1844, it was laid aside till 1855, when a revised version was published bearing a motto from Goethe's 'Faust'—

'Und so ist mir das Dasein eine Last,
Der Tod erwünscht, das Leben mir verhasst!'

It is a masterpiece of construction and instrumentation. The influence of Beethoven is apparent in the concise power of the themes and the plain direct manner in which they are set forth, yet the work is Wagner's own from beginning to end.

Performances in Paris were not so good as he had anticipated :

'The Académie savours of mediocrity; the *mise en scène* and decorations are better than the singing. At the Opéra-Comique the representations have a completeness and a physiognomy of their own such as we know nothing of in Germany, but the music written for that theatre is perhaps the worst that has yet been produced in these days of decadence. The miserable quadrille rhythms which now (1842) rattle across the stage have banished the grace of Méhul, Isouard, Boieldieu and young Auber. For a musician there is but one thing worth attention—the orchestral concerts at the Conservatoire; but these stand alone, and nothing springs from them.'

His remarks about the stars at the Opéra—Duprez, Dorus-Gras, Rubini 'with his sempiternal shake'—are rarely without a sting. The facile success of virtuosos annoyed him. Liszt, with whom he was to be so closely connected in after days, and who was then at the height of his fame as a virtuoso, appeared quite antipathetic. Wagner called once only at Liszt's lodgings, and left them in a state of irritation. 'Take Liszt to a better world and he will treat the assembly of angels to a *Fantaisie sur le Diable*.' Paris at the time harboured many Germans—artists, savants, literati—in needy circumstances for the most part, but warm-hearted and impulsive. In such circles Wagner found congenial associates.¹ 'I met with many proofs of true friendship in Paris'—and the words may be taken to explain how it was that he and his 'bildhübsche kleine Frau'² did not actually starve during that first winter. The dog was stolen before they left the Rue de la Tonnellerie.³

Having no immediate prospects, he set to work to complete the music to 'Rienzi,' and for its ultimate performance cast his eye on Dresden, where his name might be supposed to

have some little weight. On Nov. 19 the score was completed, and on Dec. 4 he despatched it to Herr v. Lüttichau, the Intendant. In the meantime, to keep the wolf from the door, he did all manner of odd work for Schlesinger, reading proofs, arranging rubbish for various instruments—the cornet-à-piston among the number—making *partitions de piano* of operas, etc. In 1841 he began to write for the *Gazette musicale* a clever novelette, *Une visite à Beethoven*, 'fut très remarqué par Berlioz, qui en parla avec éloge dans le *Journal des débats*.' Such things improved his position in the estimation of musicians, and preserved his self-respect. But the pay was small and partly absorbed by the expenses of translation; for Wagner, like most Germans, knew enough French for everyday purposes, but could not write the language effectively. His contributions to the *Gazette* were—to give their German titles: 'Der Virtuos und der Künstler,' 'Der Künstler und die Öffentlichkeit,' 'Ein glücklicher Abend,' 'Der Freischütz,' 'Eine Pilgerfahrt zu Beethoven,' 'Das Ende eines deutschen Musikers in Paris.' The original German of the two latter has been preserved in the *Dresdener Abendzeitung* of Theodor Hell (Hofrath Winkler) for 1841; the other articles have been translated back into German by Frau Cosima Wagner. Further articles written in Paris which the author thought worth reprinting are: Rossini's 'Stabat Mater,' dated Dec. 15, 1841, and signed H. Valentino (Schumann's *Neue Zeitschrift für Musik*), 'Le Freischütz,' 'Bericht nach Deutschland' (*Ges. Schrift*. vol. i. P.W. vii.),⁴ 'Über die Ouvertüre' (ditto, do.). A series of gossiping articles in Lewald's *Europa* signed V. Freudenfeuer, and styled 'Pariser Amusements' and 'Pariser Fatalitäten für Deutsche,' also the correspondence written for the *Dresdener Abendzeitung*—'Nachrichten aus dem Gebiete der Künste und Wissenschaften,' have been cancelled⁵—with the one exception of an article on Halévy's 'Reine de Chypre,' Dec. 31, 1841 (*Ges. Schrift*. vol. i. P.W. vii. 205).

On Feb. 4, 1841, Wagner's overture 'Columbus' was performed at the annual concert to which the publisher Schlesinger used to invite the subscribers to the *Gazette musicale*.⁶ This, by the way, was the only performance of one of Wagner's works at Paris during his first residence there. Score and parts disappeared at that time, and were discovered in Paris about 1880.

When Meyerbeer returned in the summer of 1840, Wagner was in great distress. Meyerbeer again introduced him to the director of the Opéra, Pillet. This time it was a personal intro-

¹ Hallé, who was one of these associates, has recorded his recollections of Wagner: see *Life and Letters of Sir Charles Hallé*, 1896, p. 69.

² So described by Friedrich Pecht, the painter.

³ See *Richard Wagner von Theodor Apel*, p. 72, for a letter describing Wagner's sufferings in Paris.

⁴ According to Kastner, this was a contribution to the *Augsburger Abendzeitung*—on Wolzogen's authority it should be *Dresdener Abendzeitung*, 1841.

⁵ They are translated in P.W. vii.

⁶ Pillet's account of the fiasco is in W. A. Ellis's *Life of Wagner*, i. 311.

duction; and the reception accordingly was still more polite and encouraging. On Meyerbeer's advice Wagner submitted detailed sketches for the libretto to an opera, 'Der fliegende Holländer,' with the proposal that a French text-book should be prepared for him to set to music. Wagner had come to an understanding about the treatment of the story with Heine, who had a claim to be consulted, inasmuch as it was Heine who had recently related it and had suggested a new and touching *dénouement* which Wagner wished to adopt. In Heine's *Memoiren des Herrn von Schnabelewopski* the imaginary hero witnesses the beginning and end of a play about the 'Ahasuerus of the ocean' at some theatre at Amsterdam, and reports that in the course of that performance the salvation of the doomed captain was brought about by the devotion of a woman 'faithful unto death.'¹ Matters at the Opéra apparently progressed just as Wagner desired. His sketches were accepted, and the names of various *arrangeurs* were mentioned. Meyerbeer again left Paris, and soon after his departure Pillet astonished Wagner by telling him that he had taken a liking to 'Le Vaisseau-fantôme,' and was therefore anxious to dispose of it in favour of a composer to whom he had long ago promised a good libretto. Wagner refused to listen to any such proposition, and demanded his manuscript back. But this again did not suit Pillet, and so the matter remained in abeyance, Wagner consoling himself with the hope that Meyerbeer would ultimately set it straight. In the spring of 1841 Wagner, pressed by creditors, sub-let his rooms in the Rue du Helder, and took lodgings in the suburbs, at Meudon. Accidentally he heard that the plans for the 'Holländer' had been handed to Paul Foucher for versification, and that if he did not choose to give his consent to what was going on, he might be left in the cold altogether. Protests proved useless, and in the end Pillet paid £20 by way of compensation!

Wagner lost no time in completing his own poem and setting it to music. In seven weeks the score of the entire opera, except the overture, was finished. But £20, even at Meudon, cannot last for ever. Before Wagner could find leisure to write the overture he had to do two months more of journeyman work (*partitions de piano* of Halévy's 'Guitarrero,' 'La Reine de Chypre,' etc.).

'I did it all cheerfully enough, corresponded with the artists at Dresden, and looked forward to my deliverance. I offered the book of the "Holländer" to the managers at Munich and Leipzig; they refused it as unfit for Germany. I had fondly hoped it would touch chords that respond quickest with Germans!'

At Berlin a word from Meyerbeer sufficed to

get it 'accepted,' but without prospect of immediate performance.

After the composition of the 'Holländer' he cast about for other subjects. During a course of historical reading he met with the story of the conquest of Apulia and Sicily by Manfred, son of the Emperor Frederick II. The picturesque semi-Oriental circumstances of the story attracted him, and he sketched a libretto, 'Die Sarazener,' in which a prophetess, Manfred's half-sister by an Arabian mother, kindles the enthusiasm of the Saracens and leads to victory and to Manfred's coronation. Mme. Devrient, to whom some years later he submitted the fully developed plan, objected to the *dénouement*, and it was dropped altogether.

By a lucky chance the popular version (Volksbuch) of the story of 'Tannhäuser' now came into his hands and took possession of his fancy. It has already been said that he was familiar with the subject; in early youth he had read Tieck's rhymed 'Erzählung' of Tannhäuser, and Hoffmann's novel 'Der Sängerkrieg'; he was also aware that Weber had planned an opera on the legend of Tannhäuser.

'When I re-read Tieck's altogether modern poem, I saw clearly why its mystical coquetry and frivolous catholicism had formerly repelled me. The Volksbuch and the plain Tannhäuserlied² present the figure of Tannhäuser in far clearer and simpler outlines.'

He was especially struck by the connexion of Tannhäuser with the contest of Minnesänger at Wartburg, which the Volksbuch establishes in a loose sort of way. Thereupon he endeavoured to trace the story of the 'Sängerkrieg' to its source. A German philologist of his acquaintance happened to possess a copy of the mediæval German poem. It interested him greatly, and he was tempted to pursue the subject further. One of the MS. copies of the 'Wartburgkrieg'³ introduces the poem of 'Loherangrin.'⁴ Wagner was led to the study of Wolfram von Eschenbach's 'Parzival' and 'Titurel'; 'and thus an entirely new world of poetical matter suddenly opened before me.'⁵

DRESDEN (1842-49, act. 29-36).—Before the ensemble rehearsals for 'Rienzi' began in July, Wagner made an excursion to the Bohemian hills, and at Teplitz completed the sketches for the book of 'Tannhäuser.' 'Rienzi' had found friends in the person of Herr Fischer the chorus-master, and of Josef Tichatschek the tenor, who felt sure that his 'trumpet tones' would tell in the title-rôle. Mme. Schröder-Devrient, in spite of her 'contours tant soit peu maternels,'⁶ would make the most of Adriano. There was ample opportunity for novel scenic effects, dumb show and the display of choral masses.

² For the original 'Tannhäuserlied' see Uhland's *Alle hoch- und nieder-deutsche Volkslieder*, bk. v. p. 297.

³ See Simrock's edition of *Der Wartburgkrieg* (1858) and his version into modern German of Wolfram von Eschenbach's *Parzival und Titurel* (rev. 'Loherangrin,' 3rd ed. 1857).

⁴ Printed by Göttes in 1813, and in 1858 again edited by Rückert.

⁵ As to the sources of these dramas, see *The Legends of the Wagner Drama; Studies in Mythology and Romance*, by Jessie L. Weston, 1896.

⁶ Berlioz, *Mémoires*, p. 274.

¹ It was, however, not a Dutch play at Amsterdam, but, as Heffner has shown, an English play of Fitzball's at the Adelphi in London which Heine witnessed in 1827, and which furnished him with the outlines of the story. Still the ingenious *dénouement* is Heine's own. But see an article, *From Fitzball to Wagner*, by W. A. Ellis, in *The Meister*, Feb. 1892, p. 4.

The chorus-master and the stage manager were ready to make special efforts; Reissiger, the conductor, was well disposed, and had a good orchestra; in short, the night of Oct. 20, 1842, proved a memorable one. The performance began at 6, and came to an end just before midnight, amid immense applause. 'We ought all to have gone to bed,' relates a witness, 'but we did nothing of the kind.' Early next morning Wagner appeared in the band-room to make excisions. In the afternoon he reappeared to see whether they had been properly indicated in the parts; the copyist excused himself on the plea that the singers objected! 'Ich lasse mir nichts streichen,' said Tichatschek, 'es war zu himmlisch!' During the next ten days two repetitions were given to crowded houses at increased prices. When Reissiger, after the fifth¹ performance, offered Wagner the baton, the enthusiasm redoubled. Wagner was the hero of the day. By and by 'Rienzi' came to occupy two evenings: acts 1 and 2—and 3, 4, 5. The attraction at Dresden has continued more or less ever since. But it was five years before the work was performed at Berlin, Oct. 26, 1847; it was produced at Hamburg, 1844; at Königsberg, 1845; at Munich and Cassel, 1870; at Vienna, 1871.²

Nov. 26, 1842, a soirée³ was given at the Gewandhaus, Leipzig, by Sophie Schröder the tragedian (Mme. Devrient's mother), at which Tichatschek sang Rienzi's prayer and Mme. Devrient the air of Adriano. Wagner's literary friend Laube ('Der sich gar nichts daraus machte wie etwas klang') mistook a duet from Marschner's 'Templer und Jüdin' for another extract from 'Rienzi,' and reported that the three pieces 'were rather dry and poor in thought.' Laube was about to assume the editorship of the *Zeitung für die elegante Welt*, and asked Wagner for materials towards a biographical article. This was the origin of the *Autobiographische Skizze*, repeatedly quoted above and reprinted in vol. i. of Wagner's collected writings. It was printed verbatim in the 5th and 6th numbers of that journal, Feb. 1 and 8, 1843, and was accompanied by a portrait 'after Kietz.'

The managers of the Dresden theatre were now eager to bring out 'Der fliegende Holländer.' The opera was hastily prepared, and Wagner conducted the first performance on Jan. 2, 1843 (Senta, Mme. Schröder-Devrient).

'I had aimed at presenting the action in its simplest traits, and at avoiding needless details and everything that might flavour of intrigue; the incidents of the story were to tell their own tale.'

The public had expected a second 'Rienzi,' and were disappointed. It was by no means a

failure, nor was it a *succès d'estime*: some were deeply touched, others simply astonished. Schumann's paper reported that Mme. Devrient's Senta 'was the most original representation she has perhaps ever given.' Wagner's own words tend to show that she made too much of her part; the rest, especially the representative of the Holländer, Wächter, too little, and that in spite of applause and recalls the performance was unsatisfactory. The work was repeated in due course, and never quite disappeared from the repertory.⁴ The poem was submitted to Spohr, who pronounced it 'a little masterpiece,' and asked for the music, which he conducted at Cassel, June 5, 1843. Wagner wrote a warm letter of thanks, and a pleasant correspondence ensued. Altogether Spohr appears to have been the only eminent musician of an earlier generation who cordially held out his hand to young Wagner. Spohr's *Selbstbiographie* (ii. 272, Eng. trans. ii. 245) contains extracts from a letter to his friend Lüder, written whilst the rehearsals were going on:

"'Der fliegende Holländer' interests me in the highest degree. The opera is imaginative, of noble invention, well written for the voices, immensely difficult, rather overdone as regards instrumentation, but full of novel effects; at the theatre it is sure to prove clear and intelligible. . . . I have come to the conclusion that among composers for the stage *pro tem*, Wagner is the most gifted.'

The 'Holländer' was originally meant to be performed in one act⁵ as a 'dramatic Ballade.' A reference to the score will show that the division into three acts is made by means of crude cuts, and new starts equally crude.

When 'Rienzi' was produced, the death of Kapellmeister Morlacchi (1841) and of Musikdirector Rastrelli (1842) had left two vacancies at Dresden. The names of Schindemeisser, Gläser and Wagner were put forward as candidates. Wagner appears at first to have tried for the lesser post of Musikdirektor, with a salary of 1200 thalers (£180). But von Lüttichau the Intendant supported him, and in the end he was appointed Hofkapellmeister with a salary of 1500 thalers (£225).⁶ On Jan. 10, 1843, he gave the customary 'trial performance' by rehearsing and conducting Weber's 'Euryanthe'; and, whilst the rival candidate, Schindemeisser, was busy with Spontini's 'La Vestale,' he repaired to Berlin to press forward 'Rienzi' and the 'Holländer.' But it appeared that the managers of the Royal Prussian Opera did not care to risk a performance of either work just then, their acceptance of Wagner's libretti having been a mere act of politeness towards Meyerbeer. Before the end of Jan.

¹ The performance conducted by Wagner was the sixth. See Ellis's *Life*, i. 351, and the *Familien Briefe*, p. 86.

² For the further history of 'Rienzi' see an article by O. Eichberg in the *Bayreuther Taschenbuch* for 1892, p. 5.

³ Mendelssohn (who conducted his overture to 'Ruy Blas') wrote about it to his mother, Nov. 28.

⁴ On May 22, 1843, it was given at Riga; in 1844 at Berlin. As to its further history, see Eichberg's article in *Bayreuther Taschenbuch*, 1893, p. 139.

⁵ The first reading was restored in Dec. 1898 at the Lyceum Theatre, at a students' performance of the B.C.M.; and the same admirable arrangement was carried out at Bayreuth in 1901, 1902 and 1914.

⁶ At court theatres in Germany the title Hofkapellmeister usually implied an appointment for life, with a retiring pension in proportion to salary and duration of service.

Wagner's appointment at Dresden was ratified by the authorities. The ceremony of installation took place on Feb. 2—the day after Berlioz's arrival—and it was the first of Wagner's official acts to assist Berlioz at the rehearsals for his concerts.¹

Wagner had scruples as to whether he would prove the right man for the place. With every appearance of reason his wife and friends urged that no one in his circumstances could afford to slight a permanent appointment with a fixed salary. No doubt he would have been the right man if the *Königliche sächsische Hofopertheater* had in reality been what it professed to be—an institution subsidised for the sake of art. But the words 'Operatic Theatre, Royal and subsidised' or otherwise, and 'Art for Art's sake,' convey widely divergent notions. Wagner had experience enough to know as much. He held his peace, however, and accepted—'froh und freudig ward ich königlicher Kapellmeister.' The duties were heavy; performances every evening all the year round—at least three plays, and generally three, sometimes four, operas per week—besides the music at the Hofkirche and occasional concerts at court. The Musik-director led at the plays, and looked after the church music on week-days; the two Kapellmeister conducted at church on Sundays and festivals, and each was responsible for certain operas. During his seven years' service Wagner rehearsed and conducted 'Euryanthe,' 'Freischütz,' 'Don Juan,' 'Zauberflöte,' 'Clemenza di Tito,' 'Fidelio,' Spontini's 'La Vestale,' Spohr's 'Jessonda,' Marschner's 'Hans Heiling' and 'Adolf von Nassau,' Winter's 'Unterbrochenes Opferfest,' Mendelssohn's 'Sommernachtstraum' and 'Antigone,' Gluck's 'Armida,' etc. He made a special arrangement of 'Iphigenia in Aulis,' performed Feb. 22, 1847, in which he revised the text, retouched the instrumentation, condensed certain bits, added sundry connecting-links and changed the close. The arrangement has been published and generally adopted. At the Pensionskonzerte given by the Hofkapelle his reading of Beethoven's symphonies—'Eroica,' C minor, A major and F major, and particularly of the Choral Symphony—attracted much attention. 'It was worth while to make the journey from Leipzig merely to hear the recitative of the contrabasses,' said Niels Gade concerning the last.²

Wagner had not much to do with the music at the Hofkirche, but he detested the routine work there. The Catholic court chose to have none but Catholics in the choir, women's voices were excluded, and the soprano and alto parts were taken by boys. All told, the choir con-

sisted of 24 or 26—14 men and 10 or 12 boys. The accompaniments were played by a full orchestra—on festive occasions as many as 50 performers, including trumpets and trombones!

'The echoes and reverberations in the building were deafening. I wanted to relieve the hard-worked members of the orchestra, add female voices, and introduce true Catholic church music a *cappella*. As a specimen I prepared Palestrina's *Stabat Mater*, and suggested other pieces, but my efforts failed.'

'There was an odd relic of bygone days there, a *musico*, a great fat *soprano*. I used to delight in his extreme conceit and silliness. On holidays and festivals he refused to sing unless some aria was especially set apart for him. It was quite wonderful to hear the ancient colossus trill that florid stuff of Hasse's: a huge pudding, with a voice like a cracked cornet-a-piston. But he had a virtue for which we may well envy him; he could sing as much in one breath as any normal singer I ever met with in two.'

Wagner became leader of the Liedertafel (a choir of male voices established 1839) and was chosen conductor of the Männergesangsfest, which took place in July 1843, and for which he wrote 'Das Liebesmahl der Apostel—eine biblische Scene.' This work requires three separate choirs of male voices, which begin a *cappella* and are ultimately supported by the full orchestra. It is dedicated to Frau Charlotte Weinlig, 'der Wittwe seines unvergesslichen Lehrers.'

In 1844 the remains of C. M. von Weber were exhumed and brought from London to Dresden. Wagner had taken an active part in the movement, and the musical arrangements for the solemn reception of the body and the interment, Dec. 14, were carried out under his direction.

Meantime 'Tannhäuser' was completed (Apr. 13, 1844; first revision, Dec. 23; further revision of close, Sept. 4, 1846). He had worked at it arduously and finished it with the greatest care; so much so that he ventured to have the full score lithographed from his manuscript. In July 1845 he forwarded a copy to Carl Gaillard at Berlin, with a long and interesting letter³:

'Pianoforte arrangement, etc., has already been prepared, so that on the day after the first performance I shall be quite free. I mean to be lazy for a year or so, to make use of my library and produce nothing. . . . If a dramatic work is to be significant and original it must result from a step in advance in the life and culture of the artist; but such a step cannot be made every few months!'

He desired to rest and read; but he returned from Teplitz after the summer holidays with sketches for 'Die Meistersinger' and 'Lohengrin.' The first performance of 'Tannhäuser' took place at Dresden, Oct. 19, 1845. It was not an unqualified success—even the executants confessed themselves bewildered. Tichatschek

¹ See Berlioz's letter to D'Ortigue, Feb. 28, 1843 (*Correspondance and Mémoires*), Lettre à Ernst. Translated in K. F. Boult's *Life of Hector Berlioz*, 1903, p. 182.

² Some interesting particulars of the rehearsal, etc., of this performance are given in Kietz's *Reminiscences*, p. 45 f.

³ In conversation with the writer. The German translation of the *Stabat Mater* given in Wagner's edition is by the late C. Riedel.

⁴ Inquiries at Dresden show that this *Soprano*, Mose Tarquinio, was a member of the Königl. Sächs. musical. Kapelle till Apr. 30, 1846; also that Angelo Ciccarelli, another *musico*, acted as instructor to the choir-boys, under Wagner. This is due to the kindness of Herr Moritz Fürstenau, custos of the Royal Library of Music at Dresden.

⁵ See *Mus. T.*, 1899, p. 165.

⁶ Quoted by Tappert in *Musicalisches Wochenblatt*, 1877, p. 411.

sang the part of Tannhäuser, Mme. Devrient that of Venus, Johanna Wagner (Richard Wagner's niece) that of Elisabeth, Mitterwurzer that of Wolfram. The scene in the Venusberg fell flat. 'You are a man of genius,' said Mme. Devrient, 'but you write such eccentric stuff, it is hardly possible to sing it.' The second act, with the march, fared best; the third act, with the 'pointless and empty recitation of Tannhäuser' (i.e. the story of the pilgrimage to Rome, which now holds people spellbound), was pronounced a bore. Critics discovered that Wagner had no melody, no form; 'this sort of music acts on the nerves.' 'A distressing, harassing subject'—'art ought to be cheerful and consoling'—'why should not Tannhäuser marry Elisabeth?' The Intendant explained to Wagner that his predecessor, 'the late Kapellmeister' Weber, had managed matters better, 'since he understood how to let his operas end satisfactorily!' The public was fairly puzzled. 'A feeling of complete isolation overcame me,' writes Wagner. 'It was not my vanity—I had knowingly deceived myself, and now I felt numbed. I saw a single possibility before me: *induce the public to understand and participate in my aims as an artist.*' And this is the root of his subsequent literary and theoretical efforts.

Liszt conducted the overture to 'Tannhäuser' at Weimar, Nov. 12, 1848, and produced the entire work Feb. 16, 1849. Other leading theatres followed at intervals—Wiesbaden, 1852; Munich, 1855; Berlin, 1856; Vienna (Thalia Theater and Theater in der Josefstadt, 1857), Hofopertheater, Nov. 19, 1859; Paris, Mar. 13, 1861.¹

Spohr brought out 'Tannhäuser' in 1853.² 'The opera,' he wrote, 'contains much that is new and beautiful, also several ugly attacks on one's ears. . . .³ A good deal that I disliked at first I have got accustomed to on repeated hearing—only the absence of definite rhythms (das Rhythmuslose) and the frequent lack of rounded periods (Mangel an abgerundeten Perioden) continue to disturb me,' etc. Mendelssohn witnessed a performance, and said to Wagner 'that a canonical answer in the adagio of the second finale had given him pleasure.' Moritz Hauptmann (Weinlig's successor at the Thomasschule) pronounced the overture 'quite atrocious (ganz grässlich), incredibly awkward, long and tedious.'⁴ Schumann (who settled in Dresden in the autumn of 1844) wrote to Heinrich Dorn, Jan. 7, 1846:

'I wish you could see "Tannhäuser"; it contains deeper, more original and altogether an hundredfold better things than his previous operas—at the same time a good deal that is musically trivial. On the whole, Wagner may become of great importance and significance to the stage, and I am sure he is possessed

of the needed courage. Technical matters, instrumentation, I find altogether remarkable, beyond comparison better than formerly. Already he has finished a new text-book, "Lohengrin."'⁵

About 1845–46 pecuniary troubles again began to press upon Wagner. The success of 'Rienzi'⁶ had naturally led him to hope that his operas would soon find their way to the leading theatres. To facilitate this he had entered into an agreement with a firm of music publishers (C. F. Meser, Dresden) to print the pianoforte scores of 'Rienzi' and the 'Holländer.' The pianoforte arrangement and the full score of 'Tannhäuser' were now added to these. The conditions of the contract have not been made public; the results, however, proved disastrous. Issued at high prices, and by publishers whose business relations were not very extensive, the editions did not sell well, and Wagner became liable for a considerable sum. His professional duties, too, began to grow irksome. He had gradually drifted into the position of an agitator and a party leader. The more gifted among his musical colleagues admired and liked him, but to the majority his excitable temperament was antipathetic and his restless activity was found inconvenient. No one disputed his personal ascendancy, yet he was made to feel the effects of jealousy and ill-will. The press did its best to confuse matters, and to spread damaging gossip. The accredited critic at Dresden, Reissiger's friend J. Schladebach, was the champion of existing usages, which he chose to call classical traditions. A person of some education and an experienced writer, Schladebach cannot be accused of having treated Wagner unfairly, as journalism goes. At first he was inclined to be rather patronising; in course of time he took care to minimise whatever might tell in Wagner's favour and to accentuate everything that looked like a departure from the beaten tracks. Unfortunately he was the principal Dresden correspondent of the musical and literary journals of Leipzig, Berlin, etc. Thus the effect of his reports was more detrimental to Wagner's prospects than perhaps he intended it to be. Managers of theatres and German musicians generally took their cue from the journals, and in the end Wagner came to be regarded as an eccentric and unruly personage difficult to deal with. The libretti and scores he submitted were hardly glanced at; in sundry cases indeed the parcels were returned unopened!

Except the performance of Gluck's 'Iphigenia in Aulis,'⁷ arranged by Wagner, and of

¹ It is curious to compare with these just and generous words the following extracts from a letter of Schumann written some years later (1853) and quoted by Herr Kasner (*Richard Wagner Katalog*): 'Wagner is, if I am to put it concisely, not a good musician (kein guter Musiker); he is wanting in the proper sense for form and for beauty of sound. . . . Apart from the performance the music is poor (gering), quite amateurish, empty and repelling (gehallos und widerwärtig),' etc.

² For details concerning Wagner's reading of the overture, and for a description of his 'arrangement' of the entire opera, see *Ges. Schriften*, v. 143 (P.W. III. 153), and Glasenapp, p. 226.

³ The *Bayreuther Taschenkalender*, 1891, contains a monograph on 'Tannhäuser' and a chronological table of events relating to the history of the work.

⁵ Letter to Hauptmann, 1844.

⁶ Letter to Spohr, Apr. 23, 1846.

Beethoven's Choral Symphony, which was repeated at the Pensionskonzert, there was nothing remarkable in the musical doings of 1847. Wagner led a more retired life than heretofore, and worked steadily at 'Lohengrin.' On Aug. 28 the introduction was written, and the instrumentation of the entire work completed during the winter and early spring. He knew that he had made a considerable step in advance since 'Tannhäuser,' but he was also conscious of having moved still further away from the standards of contemporary taste. It is enough to state that, whilst he was writing 'Lohengrin,' the repertory at Dresden consisted in a large measure of Donizetti. A letter written early in 1847 exhibits an almost apologetic tone:

'I am inclined rather to doubt my powers than to overrate them, and I must look upon my present undertakings as experiments towards determining whether or not the opera is possible.'

The management at Dresden did not care for such experiments, and indefinitely put off the production of 'Lohengrin'; so that the finale to the first act, which was performed on the 300th anniversary of the Kapelle, Sept. 22, 1848, was all he heard of the work.

At Berlin 'Tannhäuser' had been refused as 'too epic,' whatever that may mean. After six years' delay preparations were begun there for 'Rienzi,' and the King of Prussia's birthday, Oct. 5, 1847, was fixed for the first performance. When Wagner arrived to superintend rehearsals he was received in a singularly lukewarm manner; personal attacks and injurious insinuations appeared in the local journals, and it soon became evident that 'Rienzi' was foredoomed. The management discovered that political catchwords—'liberty,' 'fraternity' and the like—could be culled from the libretto; another opera was chosen for the royal fête, and 'Rienzi' postponed till Oct. 26, when the court did not attend and 'General-Musikdirector Meyerbeer thought fit to leave town.' A large miscellaneous audience applauded vigorously, but the success proved ephemeral and Wagner's hopes of bettering his pecuniary position were disappointed.

In 1848 the universal distress and political discontent told upon musical matters at Dresden as it did elsewhere. The repertory showed signs of rapid deterioration. Flotow's 'Martha' attracted the public. With the exception of three subscription concerts given by the orchestra, at the first of which, in January, Wagner conducted Bach's 8-part motet 'Singet dem Herrn ein neues Lied,' nothing of interest was performed. Towards the end of March, when the instrumentation of 'Lohengrin' was finished, his restless mind had already begun to brood upon new subjects. Sketches for 'Jesus von Nazareth'¹—a tentative effort in the direction

of 'Parsifal'—were laid aside, as he failed to find a satisfactory mode of treating the subject. For the last time the conflicting claims of history and of legend presented themselves—Frederick Barbarossa on the one side and Siegfried on the other. The former subject would have been particularly opportune at a time when the name of the great emperor was in everybody's mouth; but Wagner's historical studies regarding Barbarossa had no other result than a curious essay treating of that vague borderland which separates historical fact from mythical tradition, entitled *Die Wibelungen, Weltgeschichte aus der Sage*. It was written in 1848 and printed in 1850.² To students for whom the growth of a great man's mind is almost as interesting as the ultimate result, this essay presents many points of interest; to others it cannot be attractive, except as evidence of Wagner's peculiar earnestness of purpose and his delight in hard work.

He decided to dramatise the myths of the Nibelungen, and made his first grip at the subject in a prose version (1848), 'Der Nibelungen-Mythus als Entwurf zu einem Drama.'³ This was immediately followed by 'Siegfrieds Tod,'⁴ in three acts and a prologue (autumn, 1848), written in alliterative verse, and subsequently incorporated with many additions and emendations in 'Götterdämmerung.' Sundry germs of the music, too, were conceived at this early period.

Wagner entertained hopes that the general desire for political reform might lead to a better state of things in musical and theatrical matters. Accordingly he wrote out an elaborate plan for the organisation of a 'national theatre.' His objects were: thorough reform of the theatre at Dresden; amalgamation of the existing art institutions of Saxony, with headquarters at Dresden; increase of efficiency and reduction of expenditure. Supported throughout by detailed statements of facts and figures, his proposals appear eminently practical, and might have been carried out entire or in part with obvious advantage. The new liberal Minister of the Interior, Herr Oberländer, sympathised with Wagner, but had little hope of surmounting the initial difficulty, viz. to detach the finances of the theatre from those of the court and get an annual grant of public money in place of the subsidies from the King's privy purse. Derisory pencil notes on the margin of the manuscript showed that it had been read by certain people at court, but no action was taken by the Ministry, and the political catastrophe of May 1849 ere long put an end to all projects of reform, social or artistic.⁵

⁵ Extracts, *Sittliche Stellung des Musik zum Staat. Zahl der Theatervorstellungen, Die katholische Kirchenmusik*, were communicated by Theod. Uhlig to the *Neue Zeitschrift für Musik*, vol. xxxiv., and the entire document is given in *Ges. Schriften*, vol. ii. (P.W. vii. 319).

¹ Published in 1867 and translated in P.W. viii. 283.

Wagner was less concerned with politics proper than is generally supposed.¹ The speech—one of two—which he delivered in the Vaterlandsverein, a political club, June 14, 1848, and which was then reported in full in the *Dresden Anzeiger*, has been unearthed and reprinted by Herr Tappert (*R. W.* pp. 33-42).² Its tone is moderate enough, and it had no further consequences than a reprimand from the police authorities, who thought it undesirable that a 'königlicher Kapellmeister' should speak in such a place. In May 1849, when the court of Saxony fled and Prussian troops were despatched to coerce the rioters at Dresden, Wagner was much excited; but the tale of his having carried a red flag and fought on the barricades is not corroborated by the 'acts of accusation' preserved in the Saxon police records. Alarming rumours, however, reached him that a warrant for his arrest was being prepared, and he thought it prudent to get out of the way and await the turn of events. He went quietly to Weimar, where Liszt was busy with 'Tannhäuser.' On the 19th May, in course of a rehearsal, news came from Dresden that orders for Wagner's arrest as a 'politically dangerous individual' had been issued. There was no time to lose; Liszt procured a passport and escorted Wagner as far as Eisenach on the way to Paris.³

EXILE (1849-61, act. 36-48).—'It is impossible to describe my delight, after I had got over the immediate painful impressions, when I felt free at last—free from the world of torturing and ever-unsatisfied wishes, free from the annoying surroundings that had called forth such wishes.'

The hopes which Liszt indulged, that Wagner might now be able to gain a footing in Paris, proved futile. Wagner's desire to publish a series of articles in a French periodical 'on the prospects of art under the Revolution' met with no response. Paris, said the editor of the *Journal des débats*, would laugh at any attempt to discuss the notions of a German musician about the relation of art to politics. Music altogether was at a low ebb in France, and no one cared to risk the production of a tragic opera.

In June 1849 Wagner went to Zürich, where several of his Dresden friends had found refuge, and where his wife joined him. In Oct. 1849 he became a citizen of Zürich. The first years of his residence there are marked by a long spell of literary work: *Die Kunst und die Revolution*, 1849; *Das Kunstwerk der Zukunft*, *Kunst und Klima*, *Das Judenthum in der*

Musik, 1850; *Über die Goethe Stiftung, Ein Theater in Zürich, Erinnerungen an Spontini*, 1851; *Über die Aufführung des Tannhäuser, Bemerkungen zur Aufführung der Oper Der fliegende Holländer, Oper und Drama*, 1852. 'My mental state,' writes Wagner, looking back upon these books and essays,

'resembled a struggle. I tried to express, theoretically, that which under the incongruity of my artistic aims as contrasted with the tendencies of public art, especially of the opera, I could not properly put forward by means of direct artistic production.'

An account of the main contents of these writings belongs to Part II. of this article, and it will suffice here to touch upon a few minor points which are of biographical interest.

Too many side-issues have been raised with regard to *Das Judenthum in der Musik*, an article which first appeared in the *Neue Zeitschrift* under the pseudonym K. Freigedank. It is a far less intemperate and injudicious production than might be supposed from the *succès de scandale* it met with when Wagner signed and republished it with additions nineteen years later. In spite of his belief to the contrary, it did not at first attract much attention; the *Zeitschrift*, then edited by Franz Brendel, had only a few hundred subscribers, and no other German journal, as far as the writer is aware, reproduced it. The only immediate effect was a vindictive feeling in musical circles against Brendel. Eleven masters at the Leipzig Conservatorium, where Brendel was engaged as lecturer on the History of Music, signed a letter⁴ requesting him either to give up his post or to divulge the name of the writer. Brendel refused to accept either alternative. Wagner's authorship, however, was suspected, and the attitude of many professional journalists towards him grew bitterly hostile. When he issued the augmented edition in 1869 dozens of articles and pamphlets appeared in reply; yet none of these attempted to deal with the artistic questions he had raised. The actual contents of the article were ignored; but Wagner was persistently reproached with having attempted a disgraceful defamation of rival composers 'because of their Hebrew origin'! It remains significant that amongst his staunchest and most intelligent friends there were many of Jewish descent, who may have wished he had let the subject alone, but who nevertheless saw no reason to disagree with him in the main. The noise in the newspapers had an odd result: other writings of his, hitherto a drug on the market, suddenly began to sell, and continued to do so.

With regard to the fierce attack upon Meyerbeer in *Oper und Drama*, it should not be overlooked that Wagner's strictures concern Meyerbeer the musician, not Meyerbeer the man. The following extracts from a private letter of 1847

¹ See Ellis's *Wagner Sketches*, 1849: a Vindication, London, 1892; the same writer's *Life*, iv. 236, for a detailed account of Wagner's association with the Dresden riots; also the Wagner-Liszt Correspondence, Letter 20 (Eng. trans. i. 31).

² Translated in *P. W.* iv. 136, together with a letter written four days later to Von Lütichau, the director of the court theatre. See also Frazer's *Wagner as I knew him*, p. 156.

³ Some particulars of Wagner's flight are given in Kietz's *Reminiscences*, p. 172.

⁴ *The Music of the Future*, p. 32.

⁵ Written by Julius Kietz and printed in *Moscheles Leben*, ii. 217 (trans. ii. 214).

comprise everything Wagner thought fit to state publicly later on :

'I am on a pleasant footing with Meyerbeer, and have every reason to value him as a kind and amiable man. But if I attempt to express all that is repellent in the incoherency and empty striving after outward effect in the operatic music of the day, I arrive at the conception "Meyerbeer."

'Whoever mistakes his way in the direction of triviality has to do penance towards his better self, but whoever consciously seeks triviality is lost.'

Did Wagner really act as an ungrateful and ill-conditioned person towards Meyerbeer ? The two men never were friends in the true sense of the word. The time they actually spent together can hardly amount to a hundred hours. In 1839-42 at Boulogne and Paris, Meyerbeer, the senior by twenty-two years, was the patron and Wagner the client ; and for the next decade this state of things apparently continued. Meyerbeer had spoken well of Wagner, and in return it was expected that Wagner should make himself useful as a partisan. But this Wagner would not and could not do ; the broadest hints produced no effect upon him. When Wagner sought Meyerbeer's acquaintance the latter was surrounded by a host of literary adherents, willing champions in the press, with whom his agent and his publisher could manœuvre as they pleased. But the support of real musicians was wanting. Masters like Spohr and Marschner, Mendelssohn and Schumann, pronounced Meyerbeer's music an ingeniously contrived sham, and would have nothing to do with it ; they attributed a good deal of the success of 'Robert,' etc., to Meyerbeer's business talents and to the exertions of his literary 'bureau'.¹ Thus to secure the services of a promising young musician was a matter of some moment, and Wagner was regarded as the right sort of man to enlist. What did Meyerbeer do by way of patronage ? He wrote a letter introducing Wagner to Pillet, fully aware that there was not a ghost of a chance for an unknown German at the Opéra. To foist Wagner, with his 'Liebesverbot,' upon Antenor Joly and the Théâtre de la Renaissance, was, in the eyes of Parisians, little better than a practical joke ; twice or thrice in the year that rotten concern had failed and risen again : 'mon théâtre est mort, vive mon théâtre,' was Joly's motto. Meyerbeer introduced Wagner to his publisher, Schlesinger. And this is all that came to pass at Paris—unless the fact be taken into account that Scribe imitated an important scene from 'Rienzi' in 'Le Prophète'² without acknowledgment. At Dresden a letter from Meyerbeer to Herr v. Lüttichau, dated Mar. 18, 1841,³ turned the scales in favour of 'Rienzi,' and both 'Rienzi' and the 'Holländer' were accepted (but not performed) on his recommendation at

Berlin. After the surprising success of 'Rienzi,' open hostility was shown by certain sections of the press. As time went on, Wagner traced some queer attacks to their source, and came upon members of Meyerbeer's 'bureau' ! No one who is aware of the large and complicated interests at stake with regard to the success or failure of a grand opera will be surprised at the existence of press scandals, and it is of course impossible to say at present whether or not Meyerbeer was personally concerned. Wagner certainly thought he was, but chose to remain silent. It was not until 1850-1852 that Meyerbeer's people came to know in their turn whom they were dealing with. By this time, when 'Le Prophète' was pitted in Germany against 'Lohengrin,' the words 'friendship' or 'personal obligation' cannot have conveyed the usual meaning to Wagner's mind ; yet there is little that savours of revenge or recrimination in *Oper und Drama* and *Das Judenthum*. Serious questions of art are treated, and Meyerbeer's works are quoted as glaring examples of operatic good and evil.

Besides the vast mass of theoretical and critical writing, Wagner got through much other work during the first two years at Zürich. He completed the prose version of a drama in three acts, 'Wieland der Schmidt' (meant to be carried out in French verse with a view to performance in Paris), conducted orchestral concerts, superintended the performances at the Stadttheater (where his young disciples, Carl Ritter and H. von Bülow, acted as conductors), lectured on the musical drama (reading the poem of 'Siegfrieds Tod' by way of illustration), and kept up a lively correspondence with German friends.

The first performance of 'Lohengrin' took place under Liszt at Weimar, Aug. 28, 1850. The date chosen was that of Goethe's birth and of the inauguration of the statue to Herder ; Liszt had invited musical and literary friends from all parts of Europe, and the work, performed (for once) without cuts, made a powerful impression. From that memorable night dates the success of the Wagner movement in Germany.⁴ The reception of 'Lohengrin' by the musical profession, the press and the general public resembled that of 'Tannhäuser,' described above. It is not worth while to give details here. The following words of Wagner are strictly applicable, not only to 'Lohengrin' but to the first performances of every subsequent work of his :

'Musicians had no objection to my dabbling in poetry, poets admitted my musical attainments ; I have frequently been able to rouse the public ; professional critics have always disparaged me.'

'Lohengrin' was given at Wiesbaden, 1853 ; at Leipzig, Schwerin, Frankfurt, Darmstadt, Breslau, Stettin, 1854 ; at Cologne, Hamburg,

¹ Concerning the 'bureau' see H. Laube's *Erinnerungen*.

⁴ On Liszt's relations to Wagner see *Liszt*, Vol. III. p. 209.

Riga, Prague, 1855; Munich, Vienna, 1858; Berlin, Dresden, 1859. The full score and the piano score (by Th. Uhlig) were sold for a few hundred thalers to Breitkopf & Härtel, and published in 1852.

Wagner fitly closed the literary work of this period with the publication of a letter to the editor of the *Neue Zeitschrift*,—*Über musikalische Kritik*, and of *Eine Mitteilung an meine Freunde* (1852).¹ Written simultaneously with *Oper und Drama*, the latter production forms the preface to three operatic poems—'Holländer,' 'Tannhäuser' and 'Lohengrin'; it is a fascinating piece of psychological autobiography, indispensable for a right knowledge of his character.

His magnum opus, 'Der Ring des Nibelungen,' now occupied him entirely.

'When I tried to dramatise the most important moment of the mythos of the Nibelungen in "Siegfrieds Tod," I found it necessary to indicate a vast number of antecedent facts so as to put the main incidents in the proper light. But I could only narrate these subordinate matters—whereas I felt it imperative that they should be embodied in the action. Thus I came to write "Siegfried." But here again the same difficulty troubled me. Finally I wrote "Die Walküre" and "Das Rheingold," and thus contrived to incorporate all that was needful to make the action tell its own tale.'²

The poem was privately printed early in 1853. 'During a sleepless night at an inn at Spezia the music to "Das Rheingold" occurred to me; straightway I turned homeward and set to work.'³ He advanced with astonishing rapidity. In May 1854 the score of 'Das Rheingold' was finished. In June he began 'Die Walküre,' and completed the composition, all but the instrumentation, during the winter 1854–55. The full score was finished in 1856. The first sketches of the music to 'Siegfried' belong to the autumn of 1854. In the spring of 1857 the full score of Act I. of 'Siegfried,' and of the larger part of Act II., was finished.

Up to this point there have been but few interruptions to the work, viz. rehearsals and performances of 'Tannhäuser' at Zürich, Feb. 1855; an attack of erysipelas,⁴ May 1856; a prolonged visit from Liszt⁵ (at St. Gallen, Nov. 3, 1856, Wagner conducted the 'Eroica' and Liszt his 'Poèmes symphoniques,' 'Orphée' and 'Les Préludes'); and the eight concerts of the Philharmonic Society in London, Mar.–June 1855.

In Jan. 1855 Mr. Anderson, one of the

directors of the London Philharmonic Society, arrived at Zürich to invite Wagner to conduct the coming season's concerts. The Society, it appeared, was at its wits' end for a conductor of reputation—Spohr could not come, Berlioz was re-engaged by the New Philharmonic, and it had occurred to the directors that Wagner might possibly be the man they were in want of. Davison, of *The Times* and the *Musical World*, and Chorley, of the *Athenæum*, thought otherwise. Wagner arrived in London towards the end of Feb. The dates of the concerts he conducted are: Mar. 12 and 26, Apr. 16 and 30, May 14 and 28, June 11 and 25, 1855.⁶

'A magnificent orchestra as far as the principal members go. Superb tone—the leaders had the finest instruments I ever heard—a strong *esprit de corps*—but no distinct style. The fact is the Philharmonic people—orchestra and audience—consumed more music than they could possibly digest. As a rule an hour's music takes several hours' rehearsal—how can any conductor with a few morning hours at his disposal be supposed to do justice to monster programmes such as the Directors put before me? two symphonies, two overtures, a concerto and two or three vocal pieces at each concert! The Directors continuously referred me to what they chose to call the Mendelssohn traditions. But I suspect Mendelssohn had simply acquiesced in the traditional ways of the Society. One morning when we began to rehearse the "Leonora" overture I was surprised; everything appeared dull, slovenly, inaccurate, as though the players were weary and had not slept for a week. Was this to be tolerated from the famous Philharmonic Orchestra? I stopped and addressed them in French, saying I knew what they could do and I expected them to do it. Some understood and translated—they were taken aback, but they knew I was right and took it good-humouredly. We began again and the rehearsal passed off well. I have every reason to believe that the majority of the artists really got to like me before I left London.'

Among the pieces he conducted were Beethoven's 3rd, 4th, 5th, 6th, 7th, 8th and 9th symphonies; overture 'Leonora,' No. 3, the 2nd P.F. concerto in B_♭ and violin concerto; Mozart's symphonies in E_♭ and C, and overture 'Zauberflöte'; Weber's overtures 'Oberon,' 'Freischütz,' 'Euryanthe,' 'Ruler of the Spirits' and 'Preciosa'; Mendelssohn's Italian and Scotch symphonies, the overtures 'Isles of Fingal' and 'A Midsummer Night's Dream' and the violin concerto; Spohr's symphony in C minor; Potter's in G minor⁷; the overture to 'Tannhäuser' (twice) and a selection from 'Lohengrin' (Introduction, Bridal Procession, Wedding Music and Epithalamium).⁸ He occupied rooms at 31 Milton Street, Dorset Square, and at 22 Portland Terrace, Regent's Park, at which latter address a large portion of the instrumentation of 'Die Walküre' was completed. Karl KLINDWORTH (q.v.),

¹ Vol. v. of Ellis's *Life* is practically given up entirely to a detailed account of the London visit. In *Richard Wagner to Minna Wagner* (the letters written to his wife from London are Nos. 76 to 102) are many interesting details. Hueffer's *Half a Century of Music in England*, 1888, chap. II., may be consulted. See also *Mus. Z.*, 1877, p. 162; *Studies in Music*, p. 188; and *Richard Wagner*, by W. Wallace, 1925, p. 164. From the last-named it appears that Wagner's fee was £200, the highest paid by the Society till then.

² Chas. Lucas conducted his own symphony at the fourth concert.

³ He conducted also Macfarren's 'Cherry Chase' overture, to which he refers in complimentary terms in the autobiography.

⁴ P.W. I. 267.

⁵ The same thing is said more explicitly in *Eine Mitteilung an meine Freunde*.

⁶ Letter to Arrigo Boito, Nov. 7, 1871.

⁷ As to Wagner's health and the ill-effects of eye-strain see Ellis's *Life*, vi. 41 f., also p. 423, note. At pp. 53–4 is an account of a visit to Messrs. Critchett in 1877, when Wagner was found to be suffering from astigmatism.

⁸ In a private letter to Dr. Gille of Jena referring to a subsequent visit (Lucerne, 1857), Liszt writes: 'I am with Wagner all day long—his Nibelungen music is a glorious new world which I have long wanted to know. Some day the coolest persons will grow enthusiastic about it.' And again (1875, letter to Herr Gobbi of Pest): 'The Ring of the Nibelungen' rises above and dominates our entire art-epoch, as Mont Blanc dominates the surrounding mountains.'

who had settled in London the previous year and with whom Wagner became intimate, now began his pianoforte scores of the 'Nibelungen'.¹

Whilst at work upon 'Die Walküre' (1854) the stories of 'Tristan und Isolde' and 'Parsifal' had already taken possession of Wagner's mind, and the plan for 'Tristan' was sketched. In the summer of 1857 he resolved to put aside 'Die Nibelungen' and to proceed with 'Tristan.' Various causes contributed to this resolution.² He was tired 'of heaping one silent score upon the other,' tired of the monotony of the task too—if he lived to finish it, how should his colossal work ever be performed? He longed to hear something of his own; he had, moreover, pecuniary needs, which made it desirable that he should again write something that stood a chance of performance. Finally, a curious incident concluded the matter. A *soi-disant* agent of the Emperor of Brazil called: would Wagner compose an opera for an Italian troupe at Rio Janeiro? would he state his own terms and promise to conduct the work himself? Much astonished, Wagner hesitated to give a decisive answer; but he forthwith began the poem to 'Tristan'.³

Wagner looked upon 'Tristan' as an accessary to the 'Nibelungen,' inasmuch as it presents certain aspects of the mythical matter for which in the main work there was no room. He was proud of the poem, proud of the music:

'I readily submit this work to the severest test based on my theoretical principles. Not that I constructed it after a system—for I entirely forgot all theory—but because I here moved with entire freedom, independent of theoretical misgivings, so that even whilst I was writing I became conscious how far I had gone beyond my system.⁴ There can be no greater pleasure than an artist's perfect abandonment whilst composing—I have admitted no repetition of words in the music of "Tristan"—the entire extent of the music is as it were prescribed in the tissue of the verse—that is to say, the melody (i.e. the vocal melody) is already contained in the poem, of which again the symphonic music forms the substratum.'⁵

The poem was finished early in 1857; in the winter of the same year the full score of the first act was forwarded to Breitkopf & Härtel to be engraved. The second act was written at Venice, where Wagner, with the permission of the Austrian authorities, had taken up his residence, and is dated Venice, Mar. 2, 1859; the third, Lucerne, Aug. 1859.

In connexion with 'Tristan,' attention must be called to the strong and lasting impression made upon Wagner's mind by the philosophical writings of Schopenhauer. 'Tristan' represents the emotional kernel of Schopenhauer's view of life as reflected in the mind of a poet

and a musician. Even in 'Die Meistersinger' (Hans Sachs's monologue, Act III.) there are traces of Schopenhauer, and the spirit of his Buddhist quietism pervades 'Parsifal.' The publication of Schopenhauer's *Parerga und Paralipomena* in 1851 took the intellectual public of Germany by surprise, and roused a spirit of indignation against the official representatives of 'Philosophy' at the universities and their journals, who had secreted Schopenhauer's *Die Welt als Wille und Vorstellung* (1818 and 1844). The little colony of refugees at Zürich was among the first to hail Schopenhauer's genius as a moralist. Wagner accepted his metaphysical doctrine, and in 1854 forwarded to Schopenhauer at Frankfurt a copy of 'Der Ring des Nibelungen' as a token of 'thanks and veneration.' Wagner adhered to Schopenhauer's teaching to the end, and has even further developed some of its most characteristic and perhaps questionable phases.⁶ It will be seen in the sequel that Wagner had more trouble in connexion with the performance of 'Tristan' than with any other of his works. At first the difficulty was to get permission to return to Germany; even the solicitations of the Grand Dukes of Weimar and of Baden in his favour had no effect upon the court of Dresden. Projects for producing 'Tristan' at Strassburg and Carlsruhe came to nothing.

PARIS.—In Sept. 1859 (act. 46) Wagner again went to Paris, with a faint hope of producing his new work there with the help of German artists, or perhaps getting 'Tannhäuser' or 'Lohengrin' performed in French. M. Carvalho, director of the Théâtre Lyrique, seemed inclined to risk 'Tannhäuser':

'Il avait témoigné à Wagner le désir de connaître sa partition.' Un soir, en arrivant chez lui Rue Matignon j'entends un vacarme inusité. Wagner était au piano; il se débattait avec le formidable finale du second acte; il chantait, il criait, il se démenait, il jouait des mains, des poignets, du coude. M. Carvalho restait impassible, attendant avec une patience digne de l'antique que le sabbat fût fini. La partition achevée, M. Carvalho balbutia quelques paroles de politesse, tourna les talons et disparut.

Determined to bring some of his music forward, Wagner made arrangements for three orchestral and choral concerts at the Théâtre Impérial Italien.⁷ Jan. 25, Feb. 1 and 8, 1860. The programme, consisting of the overture to 'Der Holländer,' four pieces from 'Tannhäuser,' the prelude to 'Tristan' and three numbers from 'Lohengrin,' was thrice repeated:

'De nombreuses répétitions furent faites à la salle Herz, à la salle Beethoven, où H. de Bülow conduisait les chœurs.

'Un parti très-ardent, très-actif, s'était formé autour de Wagner; les ennemis ne s'endormaient pas d'avantage, et il était évident que la bataille serait acharnée.'

The performances conducted by Wagner

¹ See *Mus. T.*, 1898, p. 513.

² As to the chief cause, the personal influence of Frau Wesendonck, see *Richard Wagner to Mathilde Wesendonck*, London, 1905; also *Ellis's Life*, vi. 315, etc.

³ The offer from Rio appears to have been genuine; the Emperor of Brazil subsequently became a patron of the theatre at Bayreuth and witnessed a performance of the 'Ring' there.

⁵ *Ibid.* (*P.W.* III. 331).

⁶ See *Beethoven*, particularly the supplement to the English translation (by E. Dannreuther, 1880; also *Religion und Kunst*), 1880-81 (*P.W.* vi. 211).

⁷ This was the old Salle Ventadour, at which, as the Théâtre de la Renaissance, 'Das Liebesverbot' was to have been given twenty years previously. It is now a Bureau d'escompte. (See VENTADOUR.)

made a great sensation—'Wagner avait réussi à passionner Paris, à déchaîner la presse'—but the expenses had been inordinate and there was a deficit of something like £400, which he had to meet with part of the honorarium paid by Messrs. Schott for the copyright of 'Der Ring des Nibelungen.' Two similar programmes were conducted by him at the Brussels Opera House in Mar. 1860—also, it would seem, with unsatisfactory results.

Unexpected events, however, sprang from the exertions at Paris. 'Sur les instances pressantes de Mme. de Metternich, l'empereur avait ordonné la mise à l'étude de "Tannhäuser" à l'Opéra.'¹ A substantial success seemed at last within Wagner's reach. Preparations on a vast scale were begun. Edmond Roche and Ch. Nuitter translated the text; the management met every wish of Wagner; sumptuous scenery and stage properties were prepared; Wagner was invited to choose his own singers, and to have as many rehearsals as he might think fit. He chose Niemann for Tannhäuser, Mlle. Saxe for Elisabeth, Mlle. Tedesco for Venus, Mlle. Reboux for the shepherd, Cazaux for the Landgraf and Morelli for Wolfram. The number of rehearsals, according to the official record, was 164: 73 at the pianoforte, 46 choral, 27 with the vocalists on the stage but without orchestra, 4 for scenic changes and 14 full, with orchestra.² The total costs appear to have amounted to something like £8000. Wagner entirely rewrote the opening scene in the Venusberg, and made a number of minor changes. On the advice of M. Villot (curateur des musées impériaux) he also published *Quatre poèmes d'opéras traduits en prose française, précédés d'une lettre sur la musique*, giving a résumé of his aims and opinions.³ After numerous interruptions, misunderstandings and quarrels, including a complete rupture with the conductor Dietsch—the quondam chorus-master and composer of 'Le Vaisseau-fantôme,' who proved incompetent, and whom Wagner could not get rid of—the performances began Mar. 13, 1861. 'Une cabale très-active, très-puissante, très-déterminée, s'était organisée de bonne heure. Un certain nombre d'abonnés de l'opéra qui savaient que la pièce n'avait pas de ballet,' etc. The scandal need not be repeated here. After the third performance Wagner withdrew his work.

'The less said the better as to the complicated causes of the disaster. But it was a blow to me: everybody concerned had been paid per month; my share was to consist in the usual honorarium after each performance, and this was now cut short.'⁴ So I left Paris

with a load of debt, not knowing where to turn. Apart from such things, however, my recollections of this distracting year are by no means unpleasant.'

On Wednesday evenings the little house⁵ he inhabited with his wife in the Rue Newton, near the Arc-de-Triomphe, welcomed many remarkable Parisians,—'c'est ainsi,' reports Gasperini, 'que j'ai vue M. Villot [to whom Wagner dedicated his *Music of the Future*], Émile Ollivier, Mme. Ollivier [Liszt's daughter], Jules Ferry, Léon Leroy; et Berlioz, et Champfleury, et Lorbac, et Baudelaire,' etc.⁶

Princess Metternich's enthusiasm had a further result: whilst at work upon the additions to 'Tannhäuser,' permission arrived for Wagner 'to re-enter German states other than Saxony.' It was not till Mar. 1862 (i.e. after thirteen years) that the ban was completely raised and he got leave, in truly paternal phrase, 'to return to the kingdom of Saxony without fear of punishment.'

RETURN TO GERMANY, 1861 (act. 48).—The disaster in Paris produced a strong reaction. Wagner was received with enthusiasm wherever he appeared. Yet the three years to come until 1864, when he was suddenly called to Munich, must be counted among the most distressing of his entire career. His hopes and prospects lay in a successful performance of 'Tristan,' and all his efforts to bring about such a performance failed. At Vienna, after fifty-seven rehearsals, 'Tristan' was physically shelved, owing to the incompetence, physical or otherwise, of the tenor Ander; at Karlsruhe, Prague and Weimar the negotiations did not even lead to rehearsals. He found it impossible to make both ends meet, and had to seek a precarious subsistence by giving concerts. A few words will explain this strange state of things at a time when his works were so unmistakably popular. The customary honorarium on the first performance of an opera in Germany varied from 10 to 50 or 60 louis-d'or (£8 to £48), according to the rank and size of the theatre. On every subsequent repetition the author's share consisted either of some little sum agreed upon or of a small percentage on the receipts—generally five per cent, occasionally seven—never more than ten per cent. As most German towns possess a theatre, a successful opera on its first round may produce a considerable amount; but afterwards the yield is small. It is impossible to run the same piece night after night at a court or town theatre; the prices of admission are always low, and the system of subscription per season or per annum tends to reduce the number of performances allowed to any single work.

⁵ Now demolished.

⁶ Ch. Baudelaire's article in the *Revue européenne*, augmented and reprinted as a pamphlet, Apr. 1861. *Richard Wagner et Tannhäuser*, is a masterpiece. One very interesting episode of his sojourn in Paris is told at length in E. Michotte's *Souvenirs personnels, La Visite de Richard Wagner à Rossini* (Paris, 1906). In the *Zeitsch. der Int. Mus. Ges.*, 1907 (ix. 71), are two letters written by Wagner in Paris a few days after the fiasco.

¹ See Princess Pauline Metternich's *The Days that are no more. Some Reminiscences* (London, 1921). Ch. iv. gives her own account of the event.

² 'Les 164 répétitions et les 3 représentations du "Tannhäuser" à Paris,' par Ch. Nuitter. (See *Bayreuther Festblätter* for 1884.)

³ See Dannreuther's English translation: *The Music of the Future*.

⁴ The customary remuneration for each performance of a new opera at Paris was 500 francs, so that 1500 francs would have been Wagner's share for the three evenings; but it had been arranged that for the first twenty performances half of the remuneration was to be paid to the translators of the libretto: thus 750 francs was the sum Wagner received for something like a year's work.

'My operas were to be heard right and left; but I could not live on the proceeds. At Dresden 'Tannhäuser' and the "Holländer" had grown into favour; yet I was told that I had no claim with regard to them, since they were produced during my Kapellmeistership, and a Hofkapellmeister in Saxony is bound to furnish an opera once a year! When the Dresden people wanted "Tristan" I refused to let them have it unless they agreed to pay for "Tannhäuser." Accordingly they thought they could dispense with "Tristan." Afterwards, when the public insisted upon "Die Meistersinger," I got the better of them.'

On May 15, 1861, Wagner heard 'Lohengrin' for the first time at Vienna. Liszt and a large circle of musicians welcomed him at the Tonkünstler Versammlung at Weimar in August.¹ His long-cherished plan of writing a comic opera was now taken up. He elaborated the sketch for 'Die Meistersinger von Nürnberg,' which dates from 1845, and was intended to be a comic pendant to the contest of Minnesinger in 'Tannhäuser.' The poem was finished during a temporary stay at Paris in the winter of 1861-62. Messrs. Schott of Mayence secured the copyright, and the poem was printed in 1862 for private circulation.² Wagner settled opposite Mainz at Biebrich-am-Rhein to proceed with the music.³ On Nov. 1 of the same year (1862) he appeared at a concert given by Wendelin Weissheimer in the Gewandhaus at Leipzig, to conduct the overture to 'Die Meistersinger.' The writer, who was present, distinctly remembers the half-empty room, the almost complete absence of professional musicians, the wonderful performance, and the enthusiastic demand for a repetition, in which the members of the orchestra took part as much as the audience.

'That curious concert at Leipzig was the first of a long series of such absurd undertakings to which my straitened means led me. At other towns the public at least appeared *en masse*, and I could record an artistic success; but it was not till I went to Russia that the pecuniary results were worth mentioning.'

Dates of such concerts, at which he conducted Beethoven symphonies, fragments of the 'Nibelungen' and 'Die Meistersinger,' etc., are Dec. 26, 1862, and first weeks in Jan. 1863, Vienna; Feb. 8, Prague; Feb. 19, Mar. 6,⁴ 8, St. Petersburg; March, Moscow; July 23, 28, Pest; Nov. 14, 19, Carlsruhe, and a few days later Löwenberg; Dec. 7, Breslau. Towards the end of Dec. 1863, at a concert of Carl Tausig's, he astonished the Viennese public with the true traditional reading of the overture to 'Der Freischütz.'⁵

In his fiftieth year (whilst living at Penzing, near Vienna, at work upon 'Die Meistersinger')

¹ See Weissheimer, *Erlebnisse mit Richard Wagner*, etc. (Stuttgart and Leipzig, 1898), p. 72.

² The final version differs considerably from this. Messrs. Schott have published a facsimile of Wagner's autograph of the poem. See Zadernack, *Die Meistersinger von Nürnberg: R. Wagner's Dichtung und ihre Quellen*, Berlin, 1921, and H. Thompson, *Wagner and Wagnerism* (London, 1927).

³ See Weissheimer, *Erlebnisse mit Richard Wagner*, etc., p. 94 f., and as to the Leipzig concert, p. 194.

⁴ A facsimile programme of this concert, with particulars of the Russian vjelt, is given in *Mus. Z.*, 1901, p. 594.

⁵ See *Über das Dirigiren* (P.W. iv, 289), and Glasenapp, II, p. 119.

Wagner published the poem to 'Der Ring des Nibelungen,' 'as a literary product.'

'I can hardly expect to find leisure to complete the music, and I have dismissed all hope that I may live to see it performed.'

His private affairs went from bad to worse. In the spring of 1864 his power of resistance was almost broken; he determined to give up his public career, and accepted an invitation to a country home in Switzerland.

MUNICH and LUCERNE, 1864-72 (act. 51-59).

—The poem of 'Der Ring des Nibelungen,' with its preface, must have got into the hands of the young King Ludwig II. of Bavaria. The King was acquainted with Beethoven's symphonies, and in his sixteenth year had heard 'Lohengrin.' One of the first acts of his reign was to despatch a private secretary to find Wagner, with the message, 'Come here and finish your work.' Wagner had already left Vienna in despair—had passed through Munich on his way to Zürich—and for some reason had turned about to Stuttgart. The secretary tracked and there found him.⁶ In May the *Augsburger allgemeine Zeitung* brought the news that King Ludwig had allowed to the composer Richard Wagner a 'Sustentationsgehalt von 1200 Gulden aus der Kabinetscasse' (a stipend of about £100, from the privy purse). Here was relief at last. Wagner's hopes revived; his enthusiasm returned and redoubled.

'My creditors were quieted, I could go on with my work,—and this noble young man's trust made me happy. There have been many troubles since—not of my making nor of his—but in spite of them I am free to this day—and by his grace. (1877.)'

Cabals without end were speedily formed against Wagner—some indeed of a singularly disgraceful character; and he found it impossible to reside at Munich, although the King's favour and protection remained unaltered.⁷ There can be no doubt that the 'Nibelungen Ring' would not have been completed, and that the idea of Bayreuth would not have come to any practical result (the exertions of the Wagner Societies notwithstanding), if it had not been for the steady support of the royal good wishes and the royal purse. It must suffice here to indicate the dates and events which are biographically interesting.

Wagner was naturalised as a Bavarian subject in 1864. He settled in Munich, and composed the 'Huldigungsmarsch,' for a military band⁸; at the King's request he wrote an essay, *Über Staat und Religion*,⁹ and the report concerning a 'German music school to be established at Munich' (Mar. 31, 1865). In the autumn of 1864 he was formally commissioned to com-

⁶ The circumstances of this meeting are detailed in Weissheimer's *Erlebnisse*, p. 235 f. Another version may be found in Angelo Neumann's *Erinnerungen*, p. 6.

⁷ See Glasenapp, II, ch. 3, for true details regarding the extraordinary means employed to oust Wagner.

⁸ Not published in that form.

⁹ P.W. iv. 3.

plete the 'Nibelungen'; and, further to ease his pecuniary affairs, the stipend was increased,¹ and a little house in the outskirts of Munich, 'bevor den Propyläen,' was placed at his disposal.² Dec. 4, 1864, the 'Holländer' was given for the first time at Munich; Dec. 11, Jan. 1, and Feb. 1, 1865, Wagner conducted concerts there. In Jan. 1865 his friend Semper the architect was consulted by the King about a theatre to be erected for the 'Nibelungen.'³ With a view to the performance of 'Tristan,' von Bülow was called to Munich, and under his direction, Wagner supervising, the work was performed, exactly as Wagner wrote it, on June 10, 1865, and repeated June 13 and 19 and July 1—Tristan, Ludwig Schnorr v. Carolsfeld⁴; Isolde, Frau Schnorr. In July 1865 the old Conservatorium was closed by the King's orders, and a commission began to deliberate as to the means of carrying out Wagner's proposals for a new 'music school.' But nothing tangible came of this; owing, it would seem, to ill-will on the part of Franz Lachner and other Munich musicians, and also, as was alleged, to the insufficiency of the available funds.⁵ In Dec. 1865 Wagner left Munich and settled, after a short stay at Vevey and Geneva, at Triebtschen, near Lucerne, where he remained with little change until he removed to Bayreuth in Apr. 1872. At Triebtschen the 'Meistersinger' was completed (full score finished Oct. 20, 1867), twenty-two years after the first sketches! (see ante). Hans Richter⁶ arrived there in Oct. 1866 to copy the score, and the sheets were at once sent off to Mainz to be engraved.

The 'Meistersinger' was performed at Munich under von Bülow (H. Richter chorus-master), Wagner personally supervising everything, on June 21, 1868—

'Eva, Frä. Mallinger; Magdalena, Frau Dietz; Hans Sachs, Betz; Walther, Nachbauer; David, Schlosser; Beckmesser, Hölzel,'

a perfect performance; the best that has hitherto been given of any work of the master's, 'Parsifal' at Bayreuth not excepted.

Before Wagner had quite done with the 'Meistersinger' he published a series of articles in the *Süddeutsche Presse* (one of the chief editors of which was his former Dresden colleague Musikdirektor Aug. Roeckel) entitled *Deutsche Kunst und deutsche Politik* (P.W. iv. 35).

¹ The exact amount has not been made public.

² It was returned to the K. Kabinetscassa in 1866.

³ The model of the proposed theatre is now in the National Museum, Munich (see Semper, *M., Das Münchener Festspielhaus. Gottfried Semper und Richard Wagner*, Hamburg, 1906). The Prinz-Regenten Theater, the first to be erected after the Bayreuth plan, was opened in 1901, and is not far from the site originally chosen by King Ludwig II.

⁴ Schnorr died suddenly at Dresden on July 21, 1865, and 'Tristan' was again 'impossible' until Herr and Frau Vogl sang it in June 1869.

⁵ The present Conservatorium, opened under von Bülow in 1867, is practically the old institution, and does not carry out Wagner's ideas.

⁶ In the *Mus. Z.*, 1899, p. 443, are some of Richter's recollections of his stay at Triebtschen.

⁷ This refers to 1889, when Dannreuther's article was first published in this Dictionary.

During the quiet residence at Triebtschen, the unfinished portion of 'The Ring' progressed steadily. Early in 1869 the instrumentation of the third act of 'Siegfried' was completed, and the composition of the 'Vorspiel' and first act of 'Götterdämmerung' finished, June 1870.

Aug. 25, 1870, is the date of Wagner's marriage to Cosima von Bülow, *née* Liszt (b. Dec. 25, 1837), his first wife, Minna Wagner, having died Jan. 25, 1866; after close upon twenty-five years of married life she had retired to Dresden in 1861.⁸

In 1869 he published *Über das Dirigiren*⁹ in the *Neue Zeitschrift für Musik*. Beethoven¹⁰ appeared in Sept. 1870, during the Franco-Prussian War. The King's plan to build a special theatre for the 'Nibelungen Ring' at Munich being abandoned,¹¹ Wagner fixed upon Bayreuth.

BAYREUTH (1872–83).—The municipality of this little Franconian town did its best to further Wagner's objects; he left Triebtschen and settled there in April, and on his sixtieth birthday, May 22, 1872, he was able to celebrate the foundation of his theatre with a magnificent performance of Beethoven's Choral Symphony and his own 'Kaisermarsch.'¹² A large portion of the funds for the theatre was got together by private subscription. The sum originally estimated, 300,000 thalers (£45,000), was to be raised in accordance with Carl Tausig's plan upon 1000 'Patronatscheine,' i.e. 1000 certificates of patronage, each entitling the holder to a seat at the three complete performances contemplated. A considerable number of these were taken up before Tausig's death; then Emil Heckel of Mannheim suggested 'Wagner Societies,' and started one himself.¹³ It appeared at once that all over Germany there were numbers of people who were ready to contribute their share of work and money, but to whom individually the 300 thalers asked for by Tausig would have been impossible. Societies sprang up on all sides—not only in German towns, but in the most unexpected quarters—St. Petersburg, Warsaw, New York, Amsterdam, Brussels, Paris, Stockholm, Cairo, Milan, London,¹⁴ etc.

In connexion with the efforts of the societies, Wagner conducted concerts at Mannheim, Vienna, Hamburg, Schwerin, Berlin, Cologne,

⁸ Dannreuther's extreme reticence may be supplemented by a statement of the facts as related by Ernest Newman, *Wagner as Man and Artist*, p. 118: 'On the 10th April, 1866, a daughter, Isolde, was born to Cosima. Bülow believed the child to be his own (see *Hans von Bülow*; *Briefe*, iv. 24), and Wagner became its godfather. In reality the child was Wagner's own. (A second child, Eva, was born to them 18th February, 1867, at Triebtschen; Siegfried was born 6th June, 1869.)' 10 *Ibid.* v. 87. G.

¹¹ 'Rheingold' and 'Walküre' were performed at the Munich Hoftheater in 1869 and 1870 respectively.

¹² In 1874 Wagner took up his abode in 'Wahnfried,' the house he built in the Hofgarten at Bayreuth.

¹³ See Wagner's *Letters to Heckel, with a Brief History of the Bayreuth Festival* (London, 1899).

¹⁴ The London Wagner Society's Orchestral Concerts (conducted by E. Dannreuther) took place Feb. 19, 27, May 3, Nov. 14, Dec. 12, 1873; and Jan. 23, Feb. 13, Mar. 13, May 13, 1874.

etc. In Nov. 1874 the instrumentation of 'Götterdämmerung' was completed; and preliminary rehearsals with the vocalists had already produced satisfactory results. The ensemble rehearsals, with full orchestra, in the summer of 1875 under Hans Richter (Wagner always present) left no doubt as to the possibility of a performance in exact accordance with the master's intentions. The scenery and stage machinery promised well, and the effects of sonority in the auditorium proved excellent.¹

It had at first been a matter of some doubt whether the invisible orchestra would answer for the more subtle effects of orchestration; but it turned out eventually that all details were perfectly audible; and, moreover, that certain shortcomings of customary orchestra arrangements had been removed. Flutes, oboes, clarinets and bassoons were heard more distinctly, and the explosive blare which ordinarily seems inseparable from a sudden *forte* of trumpets and trombones, was less apparent. It may be well here to record the disposition of the 'Nibelungen' orchestra: conductor (quite invisible from the auditorium) facing the orchestra and the stage; to left of him, 1st violins; to right, 2nd violins; violas near violins; violoncellos and basses flanking to left and right; in the middle of the orchestra, somewhat nearer the stage, the wood-wind; behind these again, partially under the stage, the brass and percussion instruments. Total, exclusive of conductor, 114.²

A notion of the auditorium may be gained by fancying a wedge, the thin end of which is supposed to touch the front of the stage, the thick end the back of the auditorium; the seats arranged in a slight curve, each row farther from the stage raised a little above the one in front of it, and the several seats so placed that every person seated can look at the stage between the heads of two persons before him; all seats directly facing the stage; no side boxes or side galleries, no prompter's box. Total number of seats, 1500; a little over 1200 for the patrons, the rest, about 300, for distribution gratis to young musicians, etc.

In Nov. and Dec. 1875 Wagner superintended rehearsals of 'Tannhäuser' and 'Lohengrin' at Vienna, which were performed, without cuts, on Nov. 22 and Dec. 15. 'Tristan,' also under his supervision, was given at Berlin on Mar. 20, 1876.

At last, twenty-eight years after its first conception—on Aug. 13, 14, 16, 17, again from 20 to 23 and from 27 to 30, 1876—'Der Ring des Nibelungen' was performed entire at Bayreuth.

'Wotan, Betz; Loge, Vogl; Alberich, Hill; Mime, Schlosser; Fricka, Frau Grün; Donner and Gunther,

Gura; Erda and Waltraute, Frau Jäde; Siegmund, Niemann; Sieglinde, Frä. Scheffky; Brünnhilde, Frau Materna; Siegfried, Unger; Hagen, Siehr; Gutrune, Frä. Weckerlin; Rheintöchter, Frä. Lill and Marie Lehmann and Frä. Lammer; Norns, Fr. Johanna Jachmann-Wagner, Frä. Scheffky, Fr. Grün. Leader of strings, Wilhelmj; Conductor, Hans. Richter.'

From a musical point of view the performances were correct throughout—in many instances of surpassing excellence; sundry shortcomings on the stage were owing more to want of money than to anything else. In spite of the sacrifices readily made by each and all of the artists concerned, there was a heavy deficit, £7500, the responsibility for which passed upon Wagner. He had hoped to be able to repeat the performances in the following summer; this proved impossible, and his efforts to discharge the debts of the theatre failed for the most part. The largest of these efforts, the so-called Wagner Festival at the Albert Hall in London, 1877, came near to involving him in further difficulties.

LONDON, May 1877.—Herr Wilhelmj believed that a series of concerts on a large scale under Wagner's personal supervision would pay; but the sequel proved all too clearly that his acquaintance with the ins and outs of musical matters in London was superficial.³ Messrs. Hodge and Essex of Argyll Street acted as entrepreneurs. The Albert Hall was chosen, and six prodigious programmes were advertised for the 7th, 9th, 12th, 14th, 16th and 19th May. Copious extracts, of his own making, from all his works were to represent and illustrate Wagner as poet and composer: selections from 'Rienzi,' the 'Holländer,' 'Tannhäuser,' 'Lohengrin,' 'Meistersinger,' 'Tristan,' in the first part of the programmes; and from 'Der Ring des Nibelungen' in the second part. An orchestra of 170 (wood-wind double) and several of the singers who had taken leading parts at Bayreuth (Frau Materna, Frau Grün, Herren Hill, Schlosser, Unger), besides sundry subordinates, were engaged; Wagner himself was to conduct the first half of each programme, and Hans Richter the second. The expenditure for advertisements and salaries to vocalists was lavish; the attendance, though always large, nothing like what had been anticipated; the result of the six concerts, a difficulty in making both ends meet. Thereupon the promoters were persuaded to try again: that is, to give two further concerts (May 28 and 29) with a minimum of expenditure all round, reduced prices, and programmes made up of the most telling pieces. This saved the venture, and enabled Wagner to forward a little over £700 to Bayreuth. After his departure, and without his knowledge, an attempt was made to get up

¹ As to the Bayreuth rehearsals in 1875-76 see Fricke's *Bayreuth vor 30 Jahren* (Dresden, 1906), Kietz's *Richard Wagner in der Jahren 1842-9 und 1873-5* (Dresden, 1905), and Julius Hey's *Richard Wagner als Vortragmeister* (Leipzig, 1911).

² Interesting plans may be seen in Adolphe Jullien's *Wagner*.

³ The writer, whose name has been mentioned in Glasenapp's Biography and elsewhere in connexion with this 'London episode,' desires to state that he had *nothing whatever* to do with the planning of the 'festival,' nor with the business arrangements. All he did was to attend to the completion of the orchestra with regard to the 'extra' wind instruments, and at Wagner's request to conduct the preliminary rehearsals.

a testimonial. A considerable sum was speedily subscribed, but before it reached him 'another way out of the difficulty had been found'—viz. that the honorarium and *tantièmes* to come from performances of the 'Ring' at Munich should be set aside to cover the debt of the Bayreuth theatre—and the promoters of the testimonial had the satisfaction of returning the contributions with a warm letter of thanks from Wagner 'to his English friends.'¹ During this third residence in London (Apr. 30 to June 4) Wagner resided at 12 Orme Square, Bayswater.²

'Erinnerungen,' he wrote from Ems on June 29, 'so weit sie sich nicht auf die Ausübung meiner kleinen Kunstfertigkeiten beziehen, herrlich.' The expression 'kleine Kunstfertigkeiten' (little artistic attainments) was a hint at his conducting at the Albert Hall, which had been a good deal commented upon. Was Wagner really a great conductor? There can be no doubt that he was; particularly with regard to the works of Weber and Beethoven. His perfect sympathy with these led him to find the true tempi as it were by intuition.³ He was thoroughly at home in the orchestra, though he had never learnt to play upon any orchestral instrument. He had an exquisite sense for beauty of tone, nuances of tempo, precision and proportion of rhythm. His beat was distinct, and his extraordinary power of communicating his enthusiasm to the executants never failed. The writer was present at one of the great occasions when he appeared as conductor—the rehearsals and performance of the Ninth Symphony at Bayreuth, May 22, 1872—and felt that for spirit, and perfection of phrasing, it was the finest musical performance within the whole range of his experience.⁴ But at the Albert Hall Wagner did not do himself justice. His strength was already on the wane. The rehearsals fatigued him, and he was frequently faint in the evening. His memory played him tricks, and his beat was nervous. Still there were moments when his great gifts appeared as of old. Those who witnessed his conducting of the 'Kaisermarsch' at the first rehearsal he attended (May 5) will never forget the superb effect.

Wagner brought the manuscript of the poem of 'Parsifal' with him to London and read it for the first time entire to a circle of friends at Orme Square (May 17). It was published in Dec. 1877.

A plan for a sort of school for the performance of classical orchestral music, together with classical operas, and ultimately of his own

works at Bayreuth, came to nothing. Greatly against his wish he was obliged to permit 'Der Ring des Nibelungen' to take its chance at the German theatres.⁵ The first number of *Bayreuther Blätter*, a monthly periodical edited by von Wolzogen and published by and for the Wagner Verein, appeared in Jan. 1878. Wagner, whilst at work upon 'Parsifal,' found time to contribute a delightful series of essays: *Was ist Deutsch? Modern; Publikum und Popularität; Das Publikum in Zeit und Raum*, 1878; *Wollen wir hoffen? Über das Dichten und Komponiren; Über das Opern-Dichten und Komponiren im besonderen; Über die Anwendung der Musik auf das Drama*, 1879.⁶—A more elaborate work, a sort of comment upon the ethical and religious doctrine of 'Parsifal,' *Religion und Kunst*, with its sequel, *Was nützt diese Erkenntnis? Erkenne dich selbst, and Heldenethum und Christenthum* (1880–81), he did not live to finish—a fragment only of the concluding part was written in 1883. It is given under the heading *Über das Weibliche im Menschlichen*, in a posthumous publication, *Entwürfe, Gedanken, Fragmente, aus nachgelassene Papiere zusammengestellt*⁷ (Leipzig, Sept. 1885), pp. 125–9.

Wagner began the music to 'Parsifal' in his sixty-fifth year. The sketch of the first act was completed early in the spring of 1878, and the greater part of the second act by the middle of June (completed on Oct. 11); the third act was begun after Christmas, and completed Apr. 1879. Towards the end of the year his old enemy erysipelas reappeared in a severe form, and he sought relief in Southern Italy. The instrumentation to 'Parsifal' was continued (the Vorspiel had already been performed privately by the Meiningen orchestra under Wagner, at Bayreuth, Christmas 1878), and was finished during the next winter's sojourn in the south, at Palermo, Jan. 13, 1882.

In July and Aug. 1882—six years after 'Der Ring des Nibelungen'—sixteen performances of 'Parsifal,' everything under Wagner's supervision, were given; the artists alternating:

'Parsifal, Winkelmann, Gudehus, Jäger; Kundry, Frau Materna, Fr. Brandt, Fr. Maiten; Gurnemanz, Scaria, Siehr; Amfortas, Reichmann, Fuchs; Klingsor, Hill, Degele, Plank. Conductors, H. Levi and Franz Fischer.'

(For the dates of the repetition of the work at Bayreuth, see *BAYREUTH*, Vol. I. p. 250; see also *PARSIFAL*, Vol. IV. p. 65.)

During the residence at Venice (Palazzo Vendramini on the Grand Canal) in the autumn and winter of 1882–83, the state of Wagner's health was not satisfactory, though no unusual symptoms appeared. He wrote for the *Bayreuther Blätter*, and was strong enough to

¹ (Aug. 22, 1877.) 'Strange things happen in the realms of music,' wrote a surprised subscriber.

² The residence of E. Dannreuther, the writer of the article. In the *Mus. T.*, 1899, p. 651. Dannreuther gives some of his recollections of the visit. See also *Briefe an Hans Richter* (1924), p. 151 et seq.

³ See the striking testimony of the veteran violoncellist Dotzauer and of Weber's widow as to 'Der Freischütz,' in *Über das Dirigiren*.

⁴ For interesting particulars concerning it see H. Forges' *Über die Aufführung der neunten Symphonie unter E. Wagner in Bayreuth*.

⁵ A full account of the introduction of the 'Ring' in Leipzig, Berlin, London and other cities may be read in Angelo Neumann's *Erinnerungen* (Leipzig, 1907).

⁶ P.W. vi.

⁷ *Ibid.* vi. 335.

rehearse and conduct a private performance of his symphony in C (mentioned above, p. 581) at the Liceo Marcello on Christmas Eve. Late in the afternoon of Feb. 13, 1883, the great heart suddenly ceased to beat.¹ On Feb. 18 the body was laid in the little ivy-covered vault he had built long ago at Bayreuth in a retired spot of the garden at the rear of his house 'Wahnfried.'

Apart from a host of letters, and the *Lebenserinnerungen*, an autobiography covering fully two-thirds of his life,² there are no MS. literary remains of importance. Reports of his having read or recited scenes from the poem to a Buddhistic drama 'Die Sieger,' or 'Die Büsser,' intended to follow 'Parsifal,' rest upon vague hearsay. The fact is simply that in 1856-57 he came across a story in Burnouf's *Introduction à l'histoire du Bouddhisme* which interested him, and that he took note of the leading incidents with a view to dramatic treatment; but the plan was never matured, and what little of it had taken shape in his mind was incorporated in 'Parsifal.' For a short sketch of 'Die Sieger,' dated 'Zürich, 16 Mai, 1856,' see *Entwürfe, Gedanken, Fragmente* (Leipzig, 1885), pp. 97, 98.³ Cancelled articles and unpublished musical works of early date will be found enumerated in the Chronological Lists, pp. 607-10.

Wagner disliked sitting for his portrait, so that of the numerous likenesses current few are at first hand. Two excellent paintings exist: one, by Lenbach (with the old German cap), is now at Bayreuth (see *PLATE XCI*); the other, by Herkomer (1877), is (or was) at the German Athenæum, London (replica at Bayreuth). A bust (aet. 28) by Kietz, of Dresden (a pupil of Delaroche whom Wagner met in Paris in 1840-41), is also of interest (at Bayreuth); the portrait sketch for it was reproduced in the *Zeitung für die elegante Welt*, 1842, where it accompanied the *Autobiographische Skizze* (see ante, p. 587).⁴ The best photographs are (1) a large half-length published in the revised edition of the *Clavierauszug* of 'Tannhäuser' (Berlin, Fürstner); (2) full-length profile (rare), aet. 52, seated at a table reading, a dog at his feet (Munich, Hanfstängl); (3) carte and cabinet sizes, aet. 64 (Elliot & Fry, London, 1877); and the last of all, aet. 69 (A. V. Gross, Bayreuth, 1882).⁵

Like Beethoven, Wagner was slightly under middle height, well built, quick in movement, speech and gesture. His carriage was usually erect, his aspect commanding, and he made the impression of being somewhat taller than he actually was. After the political disturbances

of 1849, when he was 'wanted' by the Saxon police, the following 'Signalement' was issued.

'Wagner is 37 to 38 years old, of middle height, has brown hair, wears glasses; open forehead; eyebrows brown; eyes grey-blue; nose and mouth well proportioned; chin round. Particulars: in moving and speaking he is hasty. Clothing: surcoat of dark-green buckskin, trousers of black cloth, velvet waistcoat, silk neckerchief, the usual felt hat and boots.'

Like Beethoven, too, he at once made the impression of an original and powerful individuality. The fascination of his talk and his ways increased on acquaintance. When roused to speak of something that interested him he looked what he meant, and his rich voice gave a musical effect to his words. His presence in any circle apparently dwarfed the surroundings. His instinctive irrepressible energy, self-assertion and incessant productivity went hand in hand with simple kindness, sympathy and extreme sensitiveness. Children liked to be near him. He had no pronounced manners, in the sense of anything that can be taught or acquired by imitation. Always unconventional, his demeanour showed great refinement. His habits in private life are best described as those of a gentleman. He liked domestic comforts, had an artist's fondness for rich colour, harmonious decoration, out-of-the-way furniture, well-bound books and music, etc.⁶ The good things of this world distinctly attracted him, but nothing could be farther from the truth than the reports about his ways and tastes current in German newspapers. The noble and kindly man as his friends knew him, and the aggressive critic and reformer addressing the public, were as two distinct individuals. Towards the public and the world of actors, singers, musicians, his habitual attitude was one of defiance. He appeared on the point of losing his temper, showed impatience and irritation, and seemed to delight in tearing men and things to pieces. His violence often stood in the way of his being heard; indeed he has not yet been heard properly, either on questions of art so near and dear to him, or on questions farther off regarding things political, social or religious. It has been said with much truth that wherever Wagner was brought to a stand a social problem lies buried; hitherto, however, it is only his vehement protestations that have attracted attention, whilst most of the problems, social or religious, remain unsolved. Regarding the state of music and the theatre in Germany, those who have access to the facts can account for a large part of his excitement and irritation. One has but to remember that from his eighteenth year onwards his life was mixed up with that most equivocal institution the German *Operntheater*. As a professional conductor, and

¹ The immediate cause of death seems to have been an attack of angina pectoris. For a minute account of the last days see Wallace's *Richard Wagner* (1925), at p. 253 et seq.

² See Bibliography, infra.

³ P. W. vii. 385.

⁴ As to Renold's sketch see *Mus. T.*, 1921, p. 570.

⁵ Thirty-four reproductions of photographs are in *Richard Wagners photographische Bildnisse mit Vorwort von A. Vanselow* (Munich, 1908).

⁶ Amusing examples of his love for fine clothing and bright colours are to be found in *Briefe Richard Wagners an eine Putz-mäckerin* (Vienna, 1906). Autographs of the letters on this subject have been acquired by the Library of Congress, Washington, U.S.A.

WAGNER

From the painting by F. von Lenbach, in the possession of the Wagner family

subsequently as the recipient of *tantièmes* (percentage on the receipts)—for a long time his sole source of income—he could not afford to break the connexion. Here the idealist, the passionate poet, there the opera and the operetta. How could the most disastrous misunderstandings fail to arise? The composer of 'Tristan' confronted by the Intendant of some Hoftheater, fresh from a performance of Flotow's 'Martha'! A comic picture, but unfortunately a typical one, implying untold suffering on Wagner's part. Moreover he, the most irritable of men, impatient and fretting in his false position, was for years the object of personal attacks in the press, the 'best abused' man in Europe, the object of wilful misrepresentation and calumny—'it was like having to walk against the wind with sand and grit and foul odours blowing in one's face.'¹

All his life long Wagner was a great reader. 'Whatever is worth reading is worth re-reading,' he said. Thus, though never a systematic student or even a good linguist (which as regards Greek he greatly regretted),² he nevertheless became thoroughly familiar with all he cared for, and his range was a very wide one. He retained whatever touched him sympathetically, and could depend upon his memory. The classics he habitually read in translations. With Shakespeare (in German, of course) he was as familiar as with Beethoven. To hear him read an act or a scene was a delight never to be forgotten. The effect, to use his own words about Shakespeare, was that of 'an improvisation of the highest poetical value.' When in particularly good spirits he would take up a comic scene and render it with the exuberant merriment of a child. A list of the principal books in the expensive and very choice library at Bayreuth would give a fair idea of his literary tastes, for he kept nothing by him that was not in some way connected with his intellectual existence. The handiest shelves held Sanskrit, Greek and Roman classics; Italian writers, from Dante to Leopardi; Spanish, English, French dramatists; philosophers from Plato to Kant and Schopenhauer. A remarkably complete collection of French and German mediæval poems and stories, Norse sagas, etc., together with the labours of German and French philologists in those departments, occupied a conspicuous position; history and fiction old and new were well represented; translations of Scott, Carlyle, etc.

In a Dictionary of Music it would be out of place to speak of Wagner's power as a poet or as a writer on matters foreign to music. All that can be done is to point out the leading features of his practice and theory as a musical dramatist. We may begin with his theoretical pro-

ductions, premising merely that in his case, as in that of other men who have had new things to say and found new ways of saying them, Practice goes before Theory; artistic instincts lead the way, and criticism acts in support and defence.

II. Broadly stated, Wagner's aim is *Reform of the Opera from the standpoint of Beethoven's music*.³

Can the modern spirit produce a theatre that shall stand in relation to modern culture as the theatre of Athens stood to the culture of Greece? This is the central question, the multifaced problem he set himself to solve. Whether he touches upon minor points connected with it; speaks of the mode of performance of a play or an opera; proposes measures of reform in the organisation of existing theatres; discusses the growth of operatic music up to Mozart and Weber, or of instrumental music up to Beethoven; treats of the efforts of Schiller and Goethe to discover an ideal form for their dramatic poems: whether he sweeps round the problem in wide circles, comparing modern, social and religious institutions with ancient, and seeking free breathing-space for his artistic ideals, he arrives at results tending in the same direction—his final answer is in the affirmative. Starting from the vantage of symphonic music, he asserts that we may hope to rise to the level of Greek tragedy: 'our theatre can be made to embody our ideal of life. From the opera at its best a drama can be evolved that shall express the vast issues and complex relations of modern life and thought, as the Greek stage expressed the life and thought of Greece.'

The theatre is the centre of popular culture. For good or for evil it exerts the chief influence—from it the arts, as far as they affect the people, take their cue. Practically its power is unlimited. But who wields this power? for what ends and for whom is it wielded? Wagner's experience in Germany and in Paris furnished an answer. He had found corruption in every direction. In front of the scenes, the stolid German Philistine, or the bored Parisian roué clamouring for novelty, athirst for excitement; behind the scenes, confusion and anarchy, sham enthusiasm, labour without aim or faith—the pretence, art; the true end, money. Looking from the German stage to the German public, from the public to the nation, the case appeared hopeless, unless some violent change should upset the social fabric. A hasty and, as it proved, mistaken diagnosis of the political situation in Germany in 1849 led Wagner to become a revolutionary for art's sake. Leaving the politics of the day to take care of themselves, he endeavoured to set forth his artistic ideals. In *Die Kunst und die Revolution* he points to the theatre of Aeschylus

¹ Consult Herr Tappert's *Ein Wagner Lexikon: Wörterbuch der Unzufriedenheit*, etc. (Leipzig, 1877), for an astonishing record of the length to which such things can go in Germany.

² See 'Brief an Fr. Nietzsche,' *Ges. Schriften*, vol. ix. (P. W., v. 292).

and Sophocles, searches for the causes of its decline, and finds them identical with the causes that led to the decline of the ancient state itself. An attempt is then made to discover the principles of a new social organisation that might bring about a condition of things in which proper relations between art and public life might be expected to revive.

This pamphlet was followed by an elaborate treatise, *Das Kunstwerk der Zukunft* (The Art-work of the Future), which occupied him for several months. The first edition (1850) begins with a dedicatory letter to Ludwig Feuerbach (since cancelled), in which the author returns enthusiastic thanks for the instruction afforded by that philosopher's works.¹ Unfortunately Wagner was tempted to adopt Feuerbach's terminology, and to use it in a sense of his own. The result is bewildering, and the book, though rich in matter, warm in style and well worth reading, is in every respect difficult. The main argument, as far as art is concerned, might be sketched as follows: Poetry, mimetics and music were united in the drama of the Greeks; the drama disappeared with the downfall of the Athenian State; the union of the arts was dissolved, each had an existence of its own, and at times sank to the level of a mere pastime. Attempts made during the Renaissance, and since, to reunite the arts, were more or less abortive, though the technique and the width of range of most of the arts increased. In our day each 'separate branch of art' has reached its limits of growth, and cannot overstep them without incurring the risk of becoming incomprehensible, fantastic, absurd. At this point each art demands to be joined to a sister art—poetry to music, mimetics to both; each will be ready to forgo egotistical pretensions for the sake of an 'artistic whole,' and the musical drama may become for future generations what the drama of Greece was to the Greeks.

Wagner's next work, *Oper und Drama* (his principal critical and theoretical production), contains little of the revolutionary and pseudo-philosophical ferment. It was originally issued in three parts: containing (1) a quasi-historical criticism of the opera; (2) a survey of the spoken drama; (3) an attempt to unite the results obtained, and to construct the theory of the musical drama. To us who have witnessed the 'Nibelungen' and 'Tristan,' the entire book is easy reading; even the third and concluding part is readily intelligible and of very great interest. A generation ago, however, the case was different; especially with regard to the third and, in the author's eyes, the most important part, which consists in the main of abstract statements about the new departure in art, the relation of verse to music, the func-

tion of the orchestra, etc. Wagner could not illustrate and support his assertions by concrete examples; he thus laid himself open to mis-understanding, and was misunderstood indeed! Part the Second abounds in acute observations on the elements of the dramatist's art, with copious references to Shakespeare, Schiller and Goethe. It seems to have attracted the attention of students of literature here and there, but on the whole it fell flat. The First Part, however, caused a disturbance in the musical world such as had not occurred since the paper war between the Gluckists and Piccinnists. It is sufficiently evident now that it was not the propositions seriously put forward, nor the brilliant literary powers displayed, that attracted attention. People were, or pretended to be, scandalised by the references to living composers, the biting satire, the fierce attack on Meyerbeer, etc. But Wagner's name was henceforth in everybody's mouth.

The course of musical history has already in so large a measure confirmed and endorsed Wagner's opinions regarding the opera that a short résumé will answer the present purpose. The *thesis* of *Oper und Drama* is as follows:—In the opera the means of expression (*music*) has been taken for the sole aim and end, while the true aim (*the drama*) has been neglected for the sake of particular musical forms. The dramatic cantata of Italy is the root of the opera. The scenic arrangements and the action formed the pretext for the singing of arias, i.e. people's songs artistically arranged. The composer's task consisted in writing arias of the accepted type to suit his subject or to suit this or that vocalist. When the ballet was added to the conglomerate of arias, it was the composer's business to reproduce the popular dance forms. The arias were strung together by means of recitatives, mostly conventional. The ballet tunes were simply placed side by side. Gluck's reform in the main consisted in his energetic efforts to place his music in more direct *rapport* with the action. He modified the melody in accordance with the inflections and accents of the language employed. He put a stop to the exhibition of mere vocal dexterity, and forced his singers to become the spokesmen of his dramatic intentions. But as regards the *form* of his musical pieces (and this is the cardinal point) he left the opera as he found it. The entire work remains a congeries of recitatives, arias, choruses, dance tunes, just as before. Gluck's librettists furnished words for arias, etc., in which the action was not lost sight of; but it was considered to be of secondary importance. Gluck's great successors, Méhul, Cherubini, Spontini, cultivated the dramatic musical ensemble, and thus got rid of the incessant monologue which the arias of the elder opera had necessitated. This was an important step forward, and in essential

¹ Wagner came across a copy of Feuerbach's *Das Wesen der Religion* in the writer's library: 'Solch confuses Zeug liest sich leicht in jüngeren Jahren—ist an- und aufregend—ich habe lang daran gezehrt; jetzt [1877] war' mir's aber unverdaulich.'

matters the development of the opera is there-with at an end. For, although Mozart produced richer and more beautiful music than Gluck, there can be no doubt that the factors of Mozart's opera are essentially those of Gluck's. Subsequently, in the hands of Weber and Spohr, Rossini, Bellini, Auber, Meyerbeer, etc., the history of the opera is the history of the transformation of 'operatic melody.'

Subject and form in the spoken drama are investigated in the Second Part. With regard to subject Wagner traces two distinct factors; first the mediæval romance and its offspring the modern novel; secondly the Greek drama, or rather the formal essence thereof as given by Aristotle in his *Poetics*. He points to the plays of Shakespeare as being for the most part dramatised stories, and to those of Racine as constructed on the lines of Aristotle. In the course of the argument the works of Schiller and Goethe are examined, and the conclusion is arrived at that historical subjects present special difficulties to the dramatist. 'The modern stage appeals to our sensuous perceptions rather than to the imagination.' Thus Schiller was over-burdened with the mass of historical facts in his 'Wallenstein'; whereas 'Shakespeare, appealing to the spectator's imagination, would have represented the entire Thirty Years War in the time occupied by Schiller's trilogy.' An interesting parallel is drawn between the rhetorical art of Racine and Gluck's opera. Racine puts forward the motives for action, and the effects of it, without the action proper. 'Gluck's instincts prompted him to translate Racine's *tirade* into the *aria*.' In view of the difficulties experienced by Goethe and Schiller in their efforts to fuse historical matter and poetic form, Wagner asserts that mythical subjects are best for an ideal drama, and that music is the ideal language in which such subjects are best presented. In the Third Part he shows that it is only the wonderfully rich development of music in our time, totally unknown to earlier centuries, which could have brought about the possibility of a musical drama such as he has in view. The conclusions arrived at in *Oper und Drama* are again discussed in his lecture 'On the Destiny of the Opera,' where particular stress is laid on the fact that music is the informing element of the new drama. Further statements regarding the main heads of the argument of the concluding part of *Oper und Drama*, and of the lecture 'Über die Bestimmung der Oper,' will be found incorporated later on in this article, where details as to Wagner's method and practice as playwright and musician are given.

Nineteen years after his *Oper und Drama* Wagner published *Beethoven* (1870). This work contains his contributions towards the metaphysics of music, if indeed such can be said

to exist. It is based on Schopenhauer's view of music,¹ which that philosopher candidly admitted to be incapable of proof, though it satisfied him. Wagner accepts it and supplements it with quotations from Schopenhauer's *Essay on Visions and Matters connected therewith*,² which contains equally problematic matter. Apart, however, from metaphysics, the work is an 'exposition of the author's thoughts on the significance of Beethoven's music.' It should be read attentively.

One of the finest of his minor publications, and to a professional musician perhaps the most instructive, is *Über das Dirigiren*, a treatise on style; giving his views as to the true way of rendering classical music, with minute directions how to do it and how not to do it, together with many examples in music type from the instrumental works of Beethoven, Weber, Mozart, etc.³

Zum Vortrag der 9ten Symphonie (P.W. v. 231) is of great interest to students of instrumentation.

The general reader will be interested in Wagner's smaller essays and articles: *Zukunftsmusik*, *Über die Bestimmung der Oper*, *Über das Dichten und Komponiren*, *Über das Opern-Dichten und Komponiren im besonderen*—and especially in his graphic *Erinnerungen*, recollections of contemporaries, Spohr, Spontini, Rossini, Auber. Three of the latter are excerpts from his *Lebenserinnerungen*—apparently improvisations, showing the master-hand in every touch, valuable for their width of range and exquisite fidelity. Intending readers had better begin with these and *Über das Dirigiren*.

III. Regarding Wagner's weight and value as a musician, it is enough to state that his technical powers, in every direction in which a dramatic composer can have occasion to show them, were stupendous. He does not make use of Bach's forms nor of Beethoven's; but this has little if anything to do with the matter. Surely Bach would salute the composer of 'Die Meistersinger' as a contrapuntist, and the poet-composer of the 'Eroica' and the 'Pastoral' would greet the author of 'Siegfried' and of 'Siegfrieds Tod.' Wagner is best compared with Beethoven. Take Schumann's saying, 'You must produce bold, original and beautiful melodies' as a starting-point, and supplement it with 'You must also produce bold and beautiful harmonies, modulations, contrapuntal combinations, effects of instrumentation.' Let excerpts be made under these heads from Beethoven's mature works, and a similar number of examples be culled from 'Die Meistersinger,' 'Tristan' and the 'Nibelungen'

¹ *Die Welt als Wille und Vorstellung* (1818), vol. I. §2 (*ibid.* vol. II. chap. 39).

² *Parerga und Paralipomena*, Berlin, 1851. (See the Appendix to the English translation of *Beethoven* by E. Dannreuther, 1874.)

³ See the English translation, *On Conducting* (London, 1889); also P.W. iv. 289.

—could it be doubtful that the aspect of such lists would be that of a series of equivalents? and as for originality, who can study the score of 'Tristan' and find it other than original from the first bar to the last?

Wagner's musical predilections may perhaps be best shown by a reference to the works that were his constant companions, and by a record of a few of his private sayings. Everyday friends, household words with him, were Beethoven's quartets, sonatas and symphonies; Bach's 'Wohltemperirtes Clavier'; Mozart's 'Zauberflöte', 'Entführung', 'Figaro' and 'Don Juan'; Weber's 'Freischütz' and 'Euryanthe'; and Mozart's symphonies in E \flat , G minor and C. He was always ready to point out the beauties of these works, and inexhaustible in supporting his assertions with quotations from them¹:

'Give me Beethoven's quartets and sonatas for intimate communion, his overtures and symphonies for public performance. I look for homogeneity of materials, and equipoise of means and ends. Mozart's music and Mozart's orchestra are a perfect match; an equally perfect balance exists between Palestrina's choir and Palestrina's counterpoint; and I find a similar correspondence between Chopin's piano and some of his Etudes and Preludes. I do not care for the "Ladies-Chopin," there is too much of the Parisian salon in that; but he has given us many things which are above the salon.

'Schumann's peculiar treatment of the pianoforte grates on my ear; there is too much blur; you cannot produce his pieces unless it be *mit obligatem Pedal*. What a relief to hear a sonata of Beethoven's. In early days I thought more would come of Schumann. His *Zeitschrift* was brilliant, and his pianoforte works showed great originality. There was much ferment, but also much real power, and many bits are quite unique and perfect. I think highly, too, of many of his songs, though they are not as great as Schubert's. He took pains with his declamation—no small merit a generation ago. Later on I saw a good deal of him at Dresden; but then already his head was tired, his powers on the wane. He consulted me about the text to "Genoveva," which he was arranging from Tieck's and Hebbel's plays, yet he would not take my advice—he seemed to fear some trick.'

Mendelssohn's overture 'The Hebrides' was a prime favourite of Wagner's, and he often asked for it at the piano.²

'Mendelssohn was a landscape-painter of the first order, and the "Hebriden" overture is his masterpiece. Wonderful imagination and delicate feeling are here presented with consummate art. Note the extraordinary beauty of the passage where the oboes rise above the other instruments with a plaintive wail like sea-winds over the seas. "Meeresstille und glückliche Fahrt" also is beautiful; and I am very fond of the first movement of the Scotch symphony. No one can blame a composer for using national melodies when he treats them so artistically as Mendelssohn has done in the scherzo of this symphony. His second themes, his slow movements generally, where the human element comes in, are weaker. As regards the overture to "A Midsummer Night's Dream," it must be taken into account that he wrote it at seventeen; and how finished the form is already! etc.

¹ Schubert has produced model songs, but that is no

¹ See *Die Musik und ihre Klassiker in Aussprüchen Richard Wagners* (Leipzig, n.d.), 1378.

² Herr v. Wolzogen (*Erinnerungen an Richard Wagner*) gives a capital résumé of his sayings on such occasions. (An appreciative notice of 'St. Paul,' written by Wagner on its performance at Dresden in 1843, is given in *P.W.* viii. 279; also in *Mus. T.*, 1899, p. 171.)

reason for us to accept his pianoforte sonatas or his ensemble pieces as really solid work, no more than we need accept Weber's songs, his pianoforte quartet or the trio with a flute because of his wonderful operas. Schumann's enthusiasm for Schubert's trios and the like was a mystery to Mendelssohn. I remember Mendelssohn speaking to me of the note of Viennese bonhomie (*bürgerliche Behäbigkeit*) which runs through those things of Schubert's. Curiously enough Liszt still likes to play Schubert. I cannot account for it; that *Divertissement à la Héroïse* verges on triviality, no matter how it is played.

'I am not a learned musician; I never had occasion to pursue antiquarian researches; and periods of transition did not interest me much. I went straight from Palestrina to Bach, from Bach to Gluck and Mozart—or, if you choose, along the same path backwards. It suited me personally to rest content with the acquaintance of the principal men, the heroes and their main works. For aught I know this may have had its drawbacks; any way, my mind has never been stuffed with "music in general." Being no learned person I have not been able to write to order. Unless the subject absorbs me completely I cannot produce twenty bars worth listening to.'

The latter part of this was said after a performance of the 'Centennial, Philadelphia, March,' at the Albert Hall (1877), and that March was the case in point.

'In instrumental music I am a *réactionnaire*, a conservative. I dislike everything that requires a verbal explanation beyond the actual sounds. For instance, the middle of Berlioz's touching *scène d'amour* in his "Romeo and Juliet" is meant by him to reproduce in musical phrases the lines about the lark and the nightingale in Shakespeare's balcony scene, but it does nothing of the sort—it is not intelligible as music. Berlioz added to, altered and spoilt his work. This so-called *Symphonie dramatique* of Berlioz's as it now stands is neither fish nor flesh—strictly speaking it is no symphony at all. There is no unity of matter, no unity of style. The choral recitatives, the songs and other vocal pieces have little to do with the instrumental movements. The operatic finale, *Père Laurent* especially, is a failure. Yet there are beautiful things right and left. The *convoy funèbre* is very touching and a masterly piece. So, by the way, is the offertoire of the Requiem. The opening theme of the *scène d'amour* is heavenly; the garden scene and fête at the Capulets enormously clever: indeed Berlioz was diabolically clever (*verflucht pfiffig*). I made a minute study of his instrumentation as early as 1840, at Paris, and have often taken up his scores since. I profited greatly, both as regards what to do and what to leave undone.'

'Whenever a composer of instrumental music loses touch of tonality he is lost.' To illustrate this (*Bayreuther Blätter*, 1879³), Wagner quotes a dozen bars from 'Lohengrin,' Scene 2, bars 9 to 12, and then eight bars, 'mit züchtigem Gebahren' to 'Er soll mein Streiter sein,' as an example of very far-fetched modulation, which in conjunction with the dramatic situation is readily intelligible, whereas in a work of pure instrumental music it might appear as a blemish.

'When occasion offered I could venture to depict strange, and even terrible things in music, because the action rendered such things comprehensible; but music apart from the drama cannot risk this, for fear of becoming grotesque. I am afraid my scores will be of little use to composers of instrumental music; they cannot bear condensation, still less dilution; they are likely to prove misleading, and had better be left alone. I would say to young people who wish to write for the stage, "Do not, as long as you are young, attempt dramas—write "Singspiele."'

³ *Ges. Schriften*, vol. x. p. 248 (*P.W.* vi. 189).

It has already been said that Wagner looks at the drama from the standpoint of Beethoven's music. Bearing this in mind it is easy to see where and how he would apply his lever to lift and upset the opera, and what his ideal of a musical drama would be. In early days the choice of subject troubled him much. Eventually he decided that mythical and legendary matter was better for music than historical; because the emotional elements of a mythical story are always of a simple nature and can be readily detached from any side issue; and because it is only the heart of a story, its emotional essence, that is suggestive to a musician. The mythical subject chosen (say the story of Volungs and Niblungs, or Tristan and Isolde), the first and hardest thing to do is to condense the story, disentangle its threads and weave them up anew. None but those who are familiar with the sources of Wagner's dramas can have any idea of the amount of work and wisdom that goes to the fusing and welding of the materials. When this formidable preliminary task is finished, the *dramatis personae* stand forth clearly, and the playwright's task begins. In planning acts and scenes, Wagner never for a moment loses sight of the stage; the actual performance is always present to his mind. No walking gentlemen shall explain matters in general, nothing shall be done in the background and subsequently accounted for across the footlights. Whatever happens during the progress of the play shall be intelligible then and there. The dialogue in each scene shall exhibit the inner motives of the characters. Scene by scene the progress of the story shall be shown to be the result of these motives; and a decisive event, a turning-point in the story, shall mark the close of each act. The play being sketched, the leading motives of the dialogue fixed, Wagner turns to the verse. Here the full extent of the divergence of his drama from the paths of the opera becomes apparent. He takes no account of musical forms as the opera has them—recitative, aria, duet, ensemble, etc. If only the verse be emotional and strongly rhythmical, music can be trusted to absorb and glorify it. With Wagner as with Aeschylus, the verse is conceived and executed in the orgiastic spirit of musical sound. There is no need of, indeed there is no room for, subtleties of diction, intricate correspondence of rhyme and metre; music can supply all that and much more. Whilst working on the 'Ring' he found that alliterative verse as it exists in the poems of the elder Edda, in Beowulf, etc., was best suited to his subject, and that such verse could be written in German without offering violence to the language. In 'Tristan' and 'Parsifal' he makes use of a combination of alliteration, assonance and rhyme. Firm and concise, abounding in strong accents, the lines seem to demand music; indeed musical em-

phasis and prolongation of sound render them more readily intelligible and more impressive.

The poem finished, Wagner began the music, or rather began to write the music, for it is obvious that whereas in his case playwright and musician are one, the musical conception will go hand in hand with the poetic, will perhaps even precede it. Together with the first conception of the characters and situations at a very early stage in the growth of the work, certain musical phrases suggest themselves. These phrases, themes, 'Leitmotive,'¹ are the musician's equivalents for the dominant emotions or characteristics of the *dramatis personae*. Together with other musical germs of kindred origin they are the *subjects*—in a technical sense the themes—whilst the dramatic symphonist manipulates, using the full resources of Beethoven's orchestra, and adding thereto whatever the dramatic action may suggest. The pictures and actions on the stage are as visions induced by the symphonic music. The orchestra prepares for and floats the action, enforces details, recalls by-gones, is, as it were, the artistic conscience of the whole performance.

Wagner's treatment of the voice, his vocal melody, has undergone many a change. First he tried to find melodies effective from a vocalist's point of view; then, in the 'Holländer,' and more consciously in 'Tannhäuser,' the melodic ebb and flow is regulated by the action; in 'Lohengrin' the emotions expressed, as much as any peculiarity of melody, attract attention, whilst characteristic harmony and instrumentation enforce the melodic outlines. In the later works the vocal melody often springs direct from the words; it is frequently independent of the orchestra; in some cases indeed it is but an intensified version of the actual sounds of the German language.

From the blatant and at times almost vulgar style of 'Rienzi' there is a steady and truly astonishing increase in power and concentration, subtlety and delicacy. The 'Nibelungen,' 'Tristan' and subsequent works abound in harmonic, melodic and rhythmical combinations of great beauty and striking originality. The innovations in harmony and melody peculiar to Wagner are mainly due to the free use of chromatics. Besides bold chromatic and enharmonic progressions, he constantly employs chromatic anticipatory, changing and passing notes, which have a melodic significance only. For purposes of analysis such chromatic notes should be eliminated—the harmonic framework

¹ See the article *LEIT-MOTIF*, Vol. III, p 134. The term is v. Wolzogen's, not Wagner's, and should be used cautiously. At Bayreuth, in the summer of 1877, after warmly praising v. Wolzogen's *Thematische Leitfäden* for the interesting information they afford, and for the patience displayed in the attempts at thematic analysis, Wagner added: 'To a musician this naming and tracing of themes is not particularly significant. If dilettanti are thus induced to study a pianoforte arrangement a little more attentively, I can have no objection, but that does not concern us musicians (*für uns Musiker ist das aber nichts*). It may be worth while to look at the complex combinations of themes in some of my scores, to see how music can be applied to the drama;—this, however, is a matter for private study.'

will then stand forth clearly and prove perfectly consistent (see HARMONY). The greater part of Wagner's chromatic or enharmonic progressions will be found to be based upon correct diatonic progressions in minor or major. Exceptionally, the chromatic progression of parts upwards or downwards, or in contrary motion ('Tristan,' PF. arrt. p. 25, lines 1, 2, etc.), forms a sufficient link between apparently contradictory chords. The exigencies and suggestions of the dramatic action fully account for sudden and far-fetched modulations, enharmonic changes, rhythmical elisions (as when a beat or a chord is dropped, the phrase being intelligible though not logically complete, 'Tristan,' p. 150, bars 3 to 4 *et seq.*), interrupted cadences, expansion or condensation of time ('Tristan,' PF. arrt. pp. 210-12 and 226-8), sequences of chromatically altered chords and other peculiarities ('Siegfried,' PF. arrt. p. 65 *et seq.*). In pure instrumental music such eccentric and apparently extravagant things would not have sufficient *raison d'être*; but in their right place they require no apology, nor do they present special difficulties from the point of view of musical grammar. Indeed Wagner as he advanced grew more and more careful with regard to diction, and it is not too much to say that among the hundreds of unusual and complex combinations in 'Tristan,' 'Siegfried,' 'Götterdämmerung' and 'Parsifal' it would be difficult to point to a single crude one.

Wagner is a supreme master of instrumentation, of orchestral colour. His orchestra differs from Beethoven's in the quality of tone emitted; over and above effects of richness obtained by the more elaborate treatment of the inner part of the string quartet, the frequent subdivision of violins, violas, violoncellos, the use of chromatics in horn and trumpet parts, etc., there is a peculiar charm in the very sound of Wagner's wood-wind and brass. It is fuller than Beethoven's, yet singularly pure. And the reason for this is not far to seek. Wagner rarely employed instruments unknown to Beethoven, but he completed each group or family of wind instruments with a view to getting full chords from each group. Thus the two clarinets of Beethoven's orchestra are supplemented by a third clarinet and a bass clarinet if need be; the two oboes by a third oboe or a corno-inglese (alto oboe); the two bassoons by a third bassoon and a contra-fagotto; the two trumpets by a third trumpet and a bass trumpet, etc. The results got by the use of these additional instruments are of greater significance than at first appears, since each set of instruments can thus produce complete chords and can be employed in full harmony without mixture of *timbre* unless the composer so chooses.

To account for the exceptional array of extra instruments in the scores of the 'Nibelungen' it is enough to say that they are used as special

means for special ends. Thus at the opening of the 'Rheingold' the question is what sound will best prepare for and accord with dim twilight and waves of moving water? The soft notes of horns might be a musician's answer; but to produce the full smooth wave-like motion upon the notes of a single chord, the usual two or four horns are not sufficient. Wagner takes eight, and a unique and beautiful effect is secured. Again, in the next scene, the waves change to clouds; from misty mountain heights the gods behold Walhall in the glow of the morning sun. Here subdued solemn sound is required. How to get it? Use brass instruments *piano*. But the trumpets, trombones and tuba of Wagner's usual orchestra cannot produce enough of it; he therefore supplements them by other instruments of their family; a bass trumpet, two tenor and two bass tubas, a contrabass trombone and contrabass tuba; then the full band of thirteen brass instruments is ready for one of the simplest and noblest effects of sonority in existence. At the close of 'Rheingold' Donner with his thunder-hammer clears the air of mist and storm-clouds; a rainbow spans the valley of the Rhine, and over the glistening bridge the gods pass to Walhall. What additional sounds shall accompany the glimmer and glitter of this scene? The silvery notes of harps might do it: but the sounds of a single harp would appear trivial, or would hardly be audible against the full chant of the orchestra. Wagner takes six harps, writes a separate part for each, and the desired effect is attained.

In the 'Ring,' in 'Tristan,' the 'Meistersinger' and 'Parsifal' the notation of all that pertains to execution, tempi, gradations of sonority, etc., has been carried out in the most complete manner possible. The composer's care and patience are truly extraordinary. Nothing is left to chance. If the conductor and the executants strictly follow the indications given in the scores, a correct performance cannot fail to ensue. The tempo and the character of each movement, and every modification of tempo or character, are indicated in unmistakable German (for instance, in 'Rheingold,' p. 1, 'Ruhig heitere Bewegung,' which in the conventional Italian terms would have been 'Allegretto piacevole,' or something equally misleading); doubtful changes of time; cases where the notation would seem to suggest a change of tempo—whereas only a change of metre occurs, while the musical pulsation, the actual beat, remains the same—are indicated by equivalents in notes and elucidatory words. Thus in 'Tristan,' p. 69, where 2-2 changes to 6-8, the latter is marked $\text{♩} = \text{♩}$; that is to say, the dotted crotchets shall now be taken at the rate of the preceding minims.¹ The number of

¹ Many a disastrous *quid pro quo* might be avoided if this simple method of noting the relation of one tempo to another were universally adopted.

strings necessary to balance the wind instruments employed is given—in the 'Nibelungen' it is 16 first violins, 16 seconds, 12 violas, 12 violoncellos and 8 contrabasses. When the violins or other strings are divided, the number of desks that shall take each part is shown. To secure specially delicate effects the number of single instruments required out of the total is indicated, etc. etc.

'If I had a chance,' said Wagner in 1877, 'to get up the "Meistersinger" with an intelligent company of young people, I would first ask them to read and act the play; then only would I proceed with the music in the usual way. I am certain we should thus arrive at a satisfactory performance in a very short time.' The desiderata are simple enough. Keep the work apart from the ordinary repertory, clear the stage for at least a week, and during that time let every one concerned give his attention to the task in hand and to nothing else; give the work entire, and aim at reproducing the score exactly as it stands.¹

IV. CHRONOLOGICAL LISTS

FOR THE STAGE

Die Hochzeit: fragment of an opera; introduction, chorus and septet.² Unpublished; autograph copy of the score, 96 pages, dated Mar. 1, 1835, was presented by Wagner to the Musikverein of Würzburg.

Die Feen: romantic opera, in 3 acts; 1833. Never performed; the overture only was played at Magdeburg, 1834. Unpublished; original score in possession of the King of Bavaria. Produced in Munich, June 29, 1888; published by Breitkopf.

Das Liebesverbot: sketched in the summer of 1834, music composed 1835 and 1836. Performed once only, at Magdeburg, Mar. 29, 1836. Original score in the possession of the King of Bavaria. A song from the opera, 'Carnevalis', was printed in *Lewald's Europa*, 1837, p. 240, and pirated at Brunswick and Hanover. Published by Breitkopf.

Rienzi, der letzte der Tribunen, grosse tragische Oper, in 5 acts. Music begun at Riga, July 26, 1838. Acts 1 and 2 finished 1839 at Riga and Mitau; Acts 3, 4 and 5 at Paris, Nov. 19, 1840. First performed at Dresden, Oct. 20, 1842.

Der fliegende Holländer: romanische Oper, in 3 acts. Original sketch, 1 act, May 1840; poem, May 1841; completed, Meudon, Paris, Sept. 13, 1841. First performed at Dresden, Jan. 2, 1843. Published in lith., Dresden, 1844, and by Meier, Dresden, in 1861.

Tannhäuser, und der Sängerkrieg auf Wartburg: romanische Oper, in 3 acts. First sketches in summer of 1842; poem finished May 22, 1843; score completed Apr. 13, 1845. First performed at Dresden, Oct. 19, 1845. Pub. 1845 in lith.; the Venusberg scene written in Paris, Jan. 1861.

Lohengrin, romanische Oper, in 3 acts. Poem written at Dresden, 1845; music begun Sept. 9, 1846. Introduction written Aug. 28, 1847; instrumentation of the entire work completed during the ensuing winter and spring. First performed Aug. 28, 1850, at Weimar, under Liszt. Score published by Breitkopf, 1866.

Das Rheingold. Part I. of 'Der Ring des Nibelungen.' Poem of 'Der Ring' begun at Dresden, 1848, executed in reverse order ('Siegfried's Tod,' 'Siegfried,' 'Walküre,' 'Rheingold') finished at Zürich, 1851-62. Music to 'Das Rheingold' begun in the autumn of 1853 at Spezia; score finished in May 1854. First performed at Munich, Sept. 22, 1869. FF. score published 1861; full do. 1873.

Die Walküre. Part II. of 'Der Ring des Nibelungen,' in 3 acts. Score begun in June 1854; finished at Zürich, 1856. First performed June 25, 1870, at Munich. FF. score published 1868; full do. 1873.

Tristan und Isolde: in 3 acts. Poem written at Zürich, 1857; music begun 1857. Score of Act 1 finished in the autumn of 1857 at Zürich; Act 2, Mar. 1859 at Venice; Act 3, Aug. 1859 at Lucerne. First performed June 10, 1865, at Munich, under von Bülow. FF. and full score published 1860.

Siegfried. Part III. of 'Der Ring des Nibelungen,' in 3 acts. Music begun at Zürich, before 'Tristan.' Act 1 finished Apr. 1857; part of Act 2, up to the 'Waldweben,' written in 1857; laid aside in June; Act 2 completed at Munich, June 21, 1859; sketch of Act 3 finished in 1859, score completed Feb. 5, 1871. First performed Aug. 16, 1876, at Bayreuth, under Richter. FF. score published 1871; full do. 1876.

Die Meistersinger von Nürnberg: in 3 acts. Sketch 1845; poem begun winter 1861-62 at Paris, printed as MS. 1862; music begun 1862; score finished Oct. 24, 1867. First performed

June 21, 1868, at Munich, under von Bülow. FF. score published 1867; full do. 1868.

Götterdämmerung. Part IV. of 'Der Ring des Nibelungen.' (The first sketches to 'Siegfried's Tod' dated June 1848.) Music begun 1870 at Lucerne. Sketch of introduction and Act 1 completed Jan. 20, 1871. Sketch of full score finished at Bayreuth, June 22, 1872. Instrumentation completed Nov. 21, 1874. First performed Aug. 17, 1876, at Bayreuth, under Richter. FF. score published 1875; full do. 1876.

Parifal: Ein Bühnenwehstückerl, in 3 acts (the first sketches of Charfreitagszauber belong to the year 1857, Zürich). Poem written at Bayreuth, 1876-77; sketch of music begun at Bayreuth, 1877; completed Apr. 25, 1879. Instrumentation finished Jan. 13, 1882, at Palermo. First performed July 26, 1882, at Bayreuth, under Levi. FF. score published 1882; full do. 1884.

ORCHESTRAL AND CHORAL WORKS³

Overture Bp (6-8). ('Paukenschlagouvertüre.') Unpublished. Performed 1880 at Leipzig. Score apparently lost.

Overture D minor (4-4). Unpublished. Performed Feb. 23, 1832, at the Gewandhaus, at Leipzig. Score at Bayreuth.

Overture to Raupach's drama: 'Der König Enzo.' Finished Feb. 3, 1832; performed in the Royal Theatre, Leipzig, Mar. 16, 1832. Score published by Breitkopf, 1907.

Overture in C (Konzert-Overture—ziemlich fugirt'). Unpublished. Written 1831; performed for the first time at a Euterpe concert at Leipzig, then at the Gewandhaus, Apr. 30, 1832, and May 22, 1873, at Bayreuth.

Overture 'Polonia.' C major (4-4). Not published until 1904, when it was brought forward with two other overtures. (See *Mus. Z.* 1905, p. 117.) Written 1832 at Leipzig (qu. 1836 at Riga). Score at Bayreuth.

Symphony in C. Unpublished. Written 1832 at Leipzig, and performed at Prague, summer 1832; Dec. 1832 at the Euterpe; and Jan. 10, 1833, at the Gewandhaus, Leipzig; Dec. 24, 1832, at Venice.

New Year's Cantata. Introduction and two choral pieces. Unpublished. Performed at Magdeburg on New Year's Eve, 1834-35, and at Bayreuth, May 22, 1873.

Overture 'Columbus.' Unpublished. Written early in 1835 and performed at Leipzig, Apr. 2, 1835; at Magdeburg, May 2, 1835; Leipzig, May 25, 1835; Riga, 1838; and Paris, Feb. 4, 1841. After the last performance score and parts disappeared and were eventually discovered in Paris. Now published by Metzler & Co. (See *Mus. Z.* 1894, p. 50.)

Incidental music—songs—to a 'Zauberoper,' by Gleich, 'Der Berggeist, oder Die drei Wünsche.' Magdeburg, 1836. (See *Ellis's Life*, l. 196, where he suggests 1835 as the more likely date.)

Overture 'Rule, Britannia.' Written at Königsberg and finished Mar. 15, 1837. Performed there in Mar. 1837. Sent to the London Philharmonic Society in 1840; subsequently lost until the parts were discovered among the papers of C. B. Williams of Leicester. It was published in 1904. See *The Times* of May 16, 1904; *Mus. Z.* for 1904, p. 372. The Hon. Mrs. Burrell possessed another set of parts, and a third, with the score, is at Bayreuth.

'Eine Faust Ouverture.' Written in Paris, 1839-40; first performed July 29, 1844, at Dresden; rewritten 1855 in Zürich, and performed there Jan. 23. Published by Breitkopf, 1855.

Huldigungsmarsch. Written 1864 at Starnberg. Published 1869 (7/1871). The original score, for a military band, remains in MS. The published version was used by the orchestra was begun by Wagner and finished by Raff in 1871.

Siegfried Idyll. Written 1870 at Triebchen. First performed there Dec. 25, 1870. Published 1877.

Kaisermarsch. 1871 at Triebchen. First performed at Berlin, Apr. 14, 1871.

Grosser Festmarsch (Centennial Exhibition, Philadelphia). Sketched at Bayreuth; finished at Berlin, Mar. 17, 1876. First performed at Philadelphia, May 10, 1876.

Das Liebesmahl der Apostel. Eine biblische Scene für Männerchor und grosses Orchester. First performed, Dresden, July 6, 1843, at a festival of the male voice choirs of Saxony. (See *P.W. viii.* 277 for sketch of libretto.)

Gelegenheits Cantate. For unveiling of bronze statue representing King Friedrich August at Dresden, June 7, 1843. Unpublished. Gruss an den König, 1844. Published (a) for four male voices; (b) as a song with FF. Performed at Dresden, Aug. 12, 1844, on the King of Saxony's return from England.

An Webers Grabe. (a) Trauermarsch for wind instruments on motives from 'Euryanthe'; (b) double quartet for voices, 1844. Score of (b) published 1872. Performed Dec. 15, 1844.

PIANOFORTE PIECES

Sonata, Bp. Written 1831. Published 1832.

Polonaise, D. Four hands. Written 1831. Published 1832.

Fantasia, F# minor. Unpublished. Written 1831. Albumblatt for Frau Mathilde Wesendonck, in Ep. Written 1853. Albumblatt, 'Ankunft bei den schwarzen Schwänen,' for Countess Pourtales, in Ap. Published 1877.

Ein Albumblatt, für Fürstin Metternich, in C. Written 1861. Published 1871.

Albumblatt für Frau Betty Schott, in Ep. Written Jan. 1, 1875. Published 1876.

SONGS

'Carnevalis,' from 'Das Liebesverbot,' 1835-36. Reprinted at Brunswick, 1885.

'Dois, mon enfant,' 'Mignonne,' 'Attente.' Paris, 1839-40.

Appeared as Musikbeilagen to *Lewald's Europa*, 1841 and 1842. Republished with a German translation, 1871.

'Les deux Grenadiers.' (Heine's *Die beiden Grenadiers*.) Paris, 1839. Dedicated to Heine. Music fits the French version.

Der Tannenbaum 1838. See *Ellis's Life*, l. 253. Published 1871.

Kraft-Liedchen (1871), a little humorous vote of thanks to Herr Kraft of Leipzig. Printed in Müller v. der Werra's *Reichscom-*

³ For details concerning the orchestral works see Müller-Reuter, *Leitikon der deutschen Konzertliteratur*, 1909, p. 455 et seq.

¹ It is perhaps worth while to point out that public taste has decreed the restoration of every note in special performances of the 'Ring,' etc. A new method of bringing the 'Ring' within ordinary theatre hours was tried by the British National Opera Company in 1925, by giving it in six sections instead of four.

² Not sextet.

Fünf Gedichte. 1. Der Engel; 2. Stehe still; 3. Im Treibhaus (Studie zu Tristan und Isolde); 4. Schmerzen; 5. Träume (Studie zu Tristan und Isolde). 1862. English by Francis Hueffer.

ARRANGEMENTS, ETC.

Gluck. *Iphigénie en Aulide*. 1846. 'Nach der Bearbeitung von Richard Wagner.' FF. arr. by H. von Bülow. (Published 1859).

Score of close to overture published 1859.
Mozart. Don Juan—revised dialogue and recitatives—performed at Zürich, 1850. Unpublished.

Palestrina. *Stabat Mater*, mit Vortragsbezeichnungen eingerichtet. 1848. Score published 1877.

Allegro zu der Arie des Aubrey, in dem Vampyr von Marschner (in F min.). Score, 142 bars of additional text and music, instead of the 53 bars of the original, dated Wzburg, Sept. 23, 1853, in the possession of Herr W. Tappert, Berlin.

Beethoven. Ninth Symphony, Clavierauszug. 1830. Unpublished.

Donizetti. La Favorite. FF. score, Paris.

Elisir d'amore. FF. score.

Halévy. La Reine de Chypre. FF. score, Paris, 1841.

La gultiarero. FF. score, Paris, 1841.

ARTICLES, LIBRETTI, ETC., NOT CONTAINED IN THE GERMAN COLLECTED WRITINGS, OR CANCELLED

 Parsifal.
 (Lebenserinnerungen. This is the privately printed autobiography from which the extracts in vols. I, II, and IX mentioned above are taken.)
 An English translation by W. Ashton Ellis of the *Gesammelte Schriften*, excluding, with some minor exceptions, the poems, but including some additional essays, was published in 1892-99. The eight volumes appear under the general title *Richard Wagner's Prose Works* and have the following subtitles:
 Vol. I (1892). The Art-work of the Future, etc.
 Vol. II (1893). Opera and Drama.
 Vol. III (1894). The Theatre.
 Vol. IV (1895). Art and Politics.
 Vol. V (1896). Actors and Singers.
 Vol. VI (1897). Religion and Art.
 Vol. VII (1898). In Paris and Dresden.
 Vol. VIII (1899). Posthumous, etc.

Richard Wagner und das Musikdrama. 1861.
Der Ring des Nibelungen. 1862.
Tristan und Isolde. 1865.
Lohengrin und die Meisteringer von Nürnberg. Munich, 1869.
 RUEFFER, F. *Richard Wagner and the Music of the Future*. London, 1874. (Translated into German as *Die Poesie in der Musik*. Leipzig, 1874.)
 Richard Wagner. London, 1881.
 Parsifal: An Attempt at Analysis. London, 1884.

1 It is founded on, or identical with, the brochure *Mein Leben*, of which only three copies were supposed to exist. Mrs. Burrell proves that there were many more (one in her possession), and that it is in many details untrustworthy. *Mein Leben* was published in 1911, see infra.

- Richard Wagner's Letter on Liszt's Symphonic Poems*. Translated by F. Hueffer. London, 1881.
 WAGNER, R. *The Music of the Future*. Translated by E. Dannreuther. London, 1873.
 Beethoven. Translated by E. Dannreuther. London, 1880.
 On Conducting. Translated by E. Dannreuther. London, 1885.

Since the above article was written the mass of Wagner literature has increased enormously. From it a few of the more important works may be selected, with a preference for those in the English language.

(a) BIOGRAPHIES

- WAGNER, R. *Mein Leben*. 2 vols. Munich, 1911.
My Life. 2 vols. London, 1911.
 This is the autobiography up to the year 1864, dictated by Wagner to his wife, and privately printed in 1870. The English translation is not satisfactory, and a carefully revised edition is much to be desired. See Irvine's *Two Essays on Wagner*. London, 1912.
 JULIEN, ADOLPHE. *Richard Wagner, as vie et ses œuvres*. Paris, 1899. (Profusely illustrated; original lithographs by Fantin Latour.)
 FINCK, H. T. *Wagner and his Works. The Story of his Life with Critical Comments*. 2 vols. New York, 1893.
 CHAMBERLAIN, H. S. *Richard Wagner*. Munich, 1896. English translation. London and Philadelphia, 1900. (From the standpoint of a thorough-going disciple, in close touch with the Bayreuth traditions; not judicial, but accurate. Profusely illustrated: fine reproductions of Lenbach's portraits.)
 ELLIS, W. ASHTON. *Life of Richard Wagner*. London, 1902-08. (This most exhaustive biography began as 'an authorized English version of C. F. Glasenapp's *Das Leben Richard Wagners*', but as the original plan was widened in scope Glasenapp's name was, from the 4th volume onwards, omitted from the title-page. With the 6th volume, the last to be published, the biography is brought down to the year 1899, from which some idea of the scale on which it was planned may be obtained. Though enthusiastic in tone, and very diffuse, it is generally accurate in all matters of fact.)
 BURELL, the Hon. Mrs. *Richard Wagner's Life and Works*. 1874-34. In 1893 a sumptuous book, the first portion of a projected life of the master, was issued (100 copies only), as a memorial of the author, who had devoted many years and much money to obtaining authoritative materials. A second instalment is promised, and a reprint of the first at an ordinary price is to be desired. The volume is engraved throughout, and every statement made is fully substantiated by facsimiles of the documents referred to. Many mistakes, copied from one book to another, have been finally corrected.
 HIGGIN, GEORGE ALBERT. *Richard Wagner: a Critical Biography*. London, 1925. 2 vols. (The fullest completed biography as yet published in English.)
 RUNDMAN, J. F. *Richard Wagner, Composer of Operas*. London, 1913. (A highly individualised view of Wagner's art.)
 NEWMAN, ERNEST. *Wagner as Man and Artist*. London, 1914. A second (revised) edition was published in New York in 1924; in London, 1926. (A brilliant appreciation of Wagner's art; a less enthusiastic appreciation of his personal character.)
 WALSH, WILIAM. *Richard Wagner as he lived*. London, 1925. (A valuable contribution, though not exhaustive: following on Newman's lines, but containing the results of much careful research and correcting a good many errors in earlier writers.)
 KAPP, JULIUS. *Richard Wagner und die Frauen. Eine erotische Biographie*. Berlin, 1912.
 ESSEL, ERICH W. *Richard Wagners Leben und Werke im Bilde*. 2 vols. Vienna and Leipzig, 1913. 2nd ed. 1922. (A collection of over 500 illustrations: portraits, places, opera bills, autographs, scenes, costumes, etc.)

(b) CORRESPONDENCE

(English translations are given when such exist.)

- Correspondence of Wagner and Liszt*. Translated by Francis Hueffer. 2 vols. London, 1888.
Richard Wagner's Letters to his Dresden Friends, Theodor Uhlig, Wilhelm Fischer and Ferdinand Heine. Translated by J. S. Shedlock. London, 1890.
Richard Wagner's Letters to August Roeckel. Translated by Eleanor C. Soltau. Bristol, n.d.
Richard Wagner: Letters to Wesendonck et al. Translated by W. Ashton Ellis. London, 1899.
Letters of Richard Wagner to Emil Heckel, with a brief history of the Bayreuth Festivals. Translated by W. Ashton Ellis. London, 1899.
Richard Wagner to Mathilde Wesendonck. Translated by W. Ashton Ellis. London, 1906.
Familienbriefe von Richard Wagner, 1822-74. Berlin, 1907.
 C. F. Glasenapp. *Transl.* by W. Ashton Ellis. London, 1911.
Bayreuther Briefe von Richard Wagner, 1871-83. Berlin and Leipzig, 1907. C. F. Glasenapp. *Transl.* by C. V. Kerr. London, n.d. (1913).
Richard Wagner an Minna Wagner. 2 vols. Berlin and Leipzig, 1908. N. von Wolzogen. English translation by W. A. Ellis. London, 1909.
Richard Wagner an seine Künstler. Erich Kloss. Berlin, 1908.
Richard Wagner an Eliza Wille. Berlin: new ed., 1908. W. Gothard.
Richard Wagner an Freunde und Zeitgenossen. Berlin: 2nd ed., 1909. Erich Kloss.
Richard Wagner an Theodor Apel. Leipzig, 1910.
Die Nietzsche-Wagner Correspondence. London, 1922. Elizabeth Foerster-Nietzsche. Translated by C. V. Kerr.
Richard Wagner an Hans Richter (1868-89). Berlin and Vienna, 1925. Ludwig Karpath.
Richard Wagner an Julie Ritter.
Richard Wagner and Albert Niemann. (Berlin, 1924. W. Altmann.)
Richard Wagner and seine erste 'Elisabeth' Johanna Jachmann-Wagner. Ein neuer Beitrag zur Wagnerforschung: edited by

Dr. Julius Kapp and Hans Jachmann (Don-Verlag, Berlin, 1927). In 2 parts: (1) Richard Wagner's relations with his brother Albert's family, by Dr. Kapp; (2) Johanna Jachmann-Wagner, a biography by H. Jachmann. Contains many letters of Wagner hitherto unpublished, several illustrations, and a genealogical table of the Wagner family from Samuel Wagner, 1643-1706.

A chronological summary of Wagner's letters may be found in W. Aitmann's *Richard Wagner Briefe nach Zeitfolge und Inhalt*. See also Kastner's *Briefe Richard Wagners* (supra). A complete edition of all Wagner's letters is promised by Breitkopf & Härtel.

(c) PERSONAL RECOLLECTIONS

- FRICKER, R. *Bayreuth vor dreissig Jahren. Erinnerungen an Weinfried und aus dem Festspielhaus*. (Includes 10 letters from Wagner.) Dresden, 1906.
- GAUTHIER, JUDITH. *Wagner at Home*. Translated by E. D. Massie. (London, 1910.)
- HEY, HANS. *Richard Wagner als Vortragsmeister*. (Leipzig, 1911.)
- KIEZY, G. A. *Richard Wagner in den Jahren 1842-49 und 1873-1875*. Dresden, 1905.
- METTERNICH, PRINCESS PAULINE. *The Days that are no more. Some Reminiscences*. London, 1921. Ch. iv. contains an account of the Paris production of 'Tannhäuser' in 1861.
- MICHOFFER, B. *Souvenir personnel. La Visite de R. Wagner à Rosini* (Paris, 1860), Paris, 1906.
- NEUMANN, A. *Erinnerungen an Richard Wagner*. Leipzig, 1907. (Deals more particularly with the introduction of the 'Ring' in various cities after the first Bayreuth performances of 1876, including the introduction of that work to London in 1882. Many of Wagner's letters are given.) Published in an English translation in 1909.
- PERL, HENRY. *Richard Wagner in Venedig. Mosaikbilder aus seinen letzten Lebensjahren*. Augsburg, 1884.
- PRÄGER, F. *Wagner. I knew him*. London, 1892. (The accuracy of this book has been seriously called in question, and the German version was on this account withdrawn by the publishers. See H. S. Chamberlain, 'Echte Briefe an Ferdinand Praeger' Bayreuth, 1894.)
- SCHILLING, A. *Aus Richard Wagners Jugendzeit*. Berlin, n.d. 1893. (Derived chiefly from the recollections of Wagner's step-sister, Caelelle Avenarius.)
- STEINER, A. *Richard Wagner in Zürich*. (New Year's publications of the Allgemeine Gesellschaft in Zürich, 1901, 1902, 1903; Zürich, Orell Füssli.)
- WEISSEMEIER, W. *Erlebnisse mit Richard Wagner, Franz List und vielen anderen Zeitgenossen, nebst deren Briefen*. Stuttgart and Leipzig, 1888.
- WILLE, ELIZA. *Richard Wagner und Eliza Wille. Fünfzehn Briefe des Meisters nebst Erinnerungen und Erläuterungen*. Wölzogen, H. von. *Recollections of Richard Wagner*. Translated by A. and C. Simpson. Bayreuth, 1894.

(d) MISCELLANEOUS

- BOUNOT, OTTO. *Ludwig Heinrich Christian Geyer, der Stiefvater Richard Wagners*. Leipzig, 1913. (Already referred to as demonstrating the German antecedents of the Geyer family.)
- GRAND-CARRÉ, J. *Richard Wagner en caricatures. 130 Reproductions de caricatures, etc.* Paris, n.d.
- KREHBIEL, H. E. *Studies in the Wagnerian Drama*. London, 1891.
- KROWSKI, E. and FOONIS, E. *Richard Wagner in der Karikatur*. Berlin, 1907. (230 reproductions.)
- NEWMAN, E. *Study of Wagner*. London, 1899. (Appreciative but critical.)
- The Music of the Masters. Wagner*. London, n.d. 1904. (A concise critical survey.)
- SHAW, G. B. *The Festival of Wagnerite: a Commentary on the Nibelung's Ring*. London, 1898; 2nd edition, 1903. (A very individual interpretation.)
- VANBELOW, A. *Richard Wagners photographische Bildnisse*. Munich, 1908. (A collection of 34 photographic portraits of Wagner.)
- WEINGARTNER, F. *Bayreuth (1876-96)*. 2nd ed. Leipzig, 1904.
- DANNEBROTHER, E. *Oxford History of Music*, vol. vi. ch. xiv, on Wagner's earlier operas.
- BUTCHAUER, H. *Dramaturgie der Oper*. 1902; vol. ii. *The Meister*, the Quarterly Journal of the London Branch of the Wagner Society, first appeared in 1888 and ended with the 8th volume in 1895. It contains, in addition to sundry Wagneriana, some translations which afterwards appeared in the 'Prose Works'. Of commentaries on the music drama there is no end, but these do not come within the scope of the present article.
- For exact details of composition, first performances, publication and orchestration of the purely orchestral works (including the overtures to the operas) see Müller-Reuter, *Lexikon der deutschen Konzert-Literatur*, vol. 1, 1899, pp. 440 et seq.
- Mention should be made of some carefully produced facsimiles of Wagner's autograph scores, issued by the Drei Masken Verlag, Munich. 'Tristan,' 'Meistersinger' and the 'Siegfried Idyll' have thus appeared.
- For a fuller bibliography see G. A. HEHT's *Richard Wagner, a Critical Biography*.

SOME FRENCH PUBLICATIONS

- Among the more important publications which have appeared in France may be mentioned the following:
- SILÈGE, HENRI. *Bibliographie Wagnérienne française*. 1902. Includes all French works from 1851-1902.
- PROD'HOMME J. G., HOLZ, CALLE and VAN VASSENHOVE. *Œuvres en prose*. 1908-26, 13 vols. (Transl. of the *Gesammelte Schriften*.)
- VALENTIN, N., and SOHNEN, A. *Ma Vie*. 1911. 3 vols. (Translation of 'Mein Leben'.)
- PROD'HOMME, J. G. *Richard Wagner et la France* (1920).
- CURZON, H. DE. *L'Œuvre de Richard Wagner à Paris et ses interprètes (1850-1914)*. Paris, n.d. (1920).
- DAUMAL, J. *Le Musicien-païse Richard Wagner. Étude de psychologie suivie d'une bibliographie raisonnée* (1908).
- MARNOLD, J. *Le Cas Wagner* (1917).
- E. D.; with addns. and corrs. by H. T.

(2) JOHANNA (b. Hanover, Oct. 13, 1826; d. Würzburg, Oct. 16, 1894), niece of Richard Wagner and daughter of Albert Wagner, a dramatic tenor. He married Elise Gollmann, who had a voice of the abnormal compass of three octaves and two notes, and who in her very short career is said to have sung the parts of Tancredi and of the Queen of Night with equal fullness of tone.

Johanna appeared at the age of 6 as Salome in the 'Donauweibchen.' In 1843 her uncle heard her sing the part of Myrrha in Winter's 'Unterbrochenes Opferfest,' and in May 1844 obtained a temporary engagement for her at the Royal Opera at Dresden.¹ Though but 18 she had such success as Irma in 'Maurer und Schlosser,' and Agathe in 'Der Freischütz,' that she was not only engaged for three years, but the management paid the fine necessary to release her from her contract at the Ducal Theatre at Bernburg. She spent the summer with her uncle near Dresden, studying his 'Tannhäuser' scene by scene, as he composed it, and had the honour of creating the part of Elisabeth when only 19. Her uncle had intended the first performance to take place on her nineteenth birthday, but the illness of a singer postponed it until Oct. 21, 1845. However, when his friends assembled at his house for supper that night, Johanna found, hidden under her napkin, a little gold bracelet engraved with her name and the date, a proof of his satisfaction with her performance, which was always her greatest treasure.

Such hopes were founded upon the talents of the young singer that the King of Saxony sent her to Paris to study under Garcia. She left Dresden, Feb. 1, 1847, accompanied by her father, who until then had been her instructor. Returning in six months she appeared as Norma, singing in Italian, her uncle conducting. She now added to her repertory Fidelio, Valentine, Adriano, Susanna, Reiza, Favorita, Donna Anna, Recha, Euryanthe, Ernani, Sextus, Weisses Dame, etc. Her uncle's part in the revolutionary troubles of 1849, and consequent exile, making it unpleasant for her to remain in Dresden, she accepted an engagement at Hamburg; there she sang the part of Fidès in the first German production of the 'Prophète,' and gave it fifty times in succession. In 1850 she was permanently engaged at the Royal Opera House in Berlin, with an exceptional contract giving her six months' leave each year.

In 1852 she came to England, but owing to a lawsuit concerning her contract she was precluded from singing at either of the opera houses. In 1856 she appeared at Her Majesty's Theatre as Tancredi, Lucrezia Borgia and Romeo.²

¹ See *Familien Briefe*, p. 135, where in a letter of July 28, 1844, Wagner mentions Johanna's fine singing of the part of Irene in 'Rienzi.'

² See Chorley's *Recollections*, ii. 175, 242.

In 1859 she married Landrath Jachmann, and two years later had the misfortune to lose her voice suddenly and completely. She then bravely entered upon a second artistic career, as an actress, her very exceptional gifts enabling her to do so with brilliant success. This lasted for eleven years, at the same theatre at Berlin. Meantime her voice had returned to a great extent, and on May 22, 1872, at her uncle's request, she went to Bayreuth, to take part in the performance of Beethoven's Ninth Symphony, which he gave to celebrate the laying of the first stone to his theatre there. She sang the solo alto part, as she had done on Palm Sunday twenty-six years before, at his performance of the same symphony at Dresden. In 1876, at the opening of the Festspielhaus at Bayreuth, she took the minor parts of Schwertleite and first Norn.

In 1882 Baron von Perfall, Intendant of the Royal Opera at Munich, offered her the professorship of dramatic singing, in the Royal School of Music there. This appointment she accepted (to quote her own words) 'in the hope of training young artists in the spirit and traditions of my uncle, to be worthy interpreters of his works.' In 1884 she retired from this post, and went to live in Berlin.

M. B.

(3) HELFERICH SIEGFRIED RICHARD (b. Trieb-schen, June 6, 1869), son of Richard Wagner and Cosima, was at first intended for an architect, and actually designed the monument to his grandfather, Liszt, at Bayreuth; he preferred to follow in his father's footsteps, although at a considerable distance, and after studying with Humperdinck and Kniese, acted as sub-conductor at Bayreuth in 1894 and subsequent years, directing some of the performances from 1896 onwards. The control of the theatre and its festivals naturally passed into his hands when Mme. Wagner relinquished her personal responsibility. (See BAYREUTH.) A symphonic poem, 'Sehnsucht,' was brought out in 1895, and played with fair success wherever his father's music was most ardently admired. His first opera, 'Der Bärenhäuter,' was played at Munich in 1899, a second, 'Herzog Wildfang,' at the same place in 1901, and 'Der Kobold' at Hamburg in 1904. Since then he has maintained a fairly steady output of composition, chiefly for the stage, but including a few concerted instrumental works. His later operas include:

- 'Bruder Lustig.' (Hamburg, 1905.)
- 'Sternengebot.' (Hamburg, 1908.)
- 'Barradeierich.' (Carlsruhe 1910.)
- 'Der Helden König.' (1915.)
- 'An allem ist Hütchen Schuld.' (1916.)
- 'Schwarzwaldenreich.' (Carlsruhe, 1918.)
- 'Der Schmelz von Marienberg.' (1920.)

BIBL.—CARL FRIEDRICH GLARENAPP, *Stegfried Wagner und seine Kunst*, etc., 3 series (Leipzig, 1911, 1913, 1910); PAUL PRETTYSCH, *Die Kunst Stegfried Wagners. Ein Führer durch seine Werke* (Leipzig, 1919); S. WAGNER, *Erinnerungen* (Stuttgart, 1923).

WAILLY, LOUIS AUGUSTE PAUL DE (b. Amiens, Somme, May 16, 1854), French com-

poser, studied law and was self-taught in music. He was recommended by Romain Bussine (one of the founders of the Société Nationale de Musique), at the age of 27, to César Franck, who became his only master in composition. He remained faithful all his life to the principles of the latter's school.

P. de Wailly's principal works were first performed at the Société Nationale de Musique; his début there was 'Hylas, idylle antique,' in 2 tableaux (1882), words by J. Lorrain. He has composed chamber music (sonatas, quintet, octet, etc.), 3 symphonies, church music, a few songs and a dramatic oratorio, 'L'Apôtre,' 4 acts (Paris, Eschig), performed at the Théâtre des Champs Élysées, Paris, Dec. 1924.

M. L. P.

WAINWRIGHT, HARRIET, afterwards Mrs. Colonel Stewart, composer, flourished between 1780–1840. She was probably one of the Cheshire Wainwrights (see below). She composed 'Comala,' a dramatic poem from Ossian (1803), choruses, a glee, songs, duets, trios, etc. She also wrote *Critical Remarks on the Art of Singing* (Brown and Stratton). E. v. d. s.

WAINWRIGHT, (1) JOHN (d. Jan. 1768), a native of Stockport, Cheshire, settled in Manchester about the middle of the 18th century, and on May 12, 1767, was appointed organist and singing-man of the Collegiate Church, now the cathedral. He composed anthems, chants and psalm-tunes, a collection of which he published in 1766.

His three sons were: (2) ROBERT, Mus.D. (b. Stockport, 1748; d. July 15, 1782), accumulated the degrees of Mus.B. and Mus.D. at Oxford, Apr. 29, 1774. On Mar. 1, 1775, he was appointed organist of St. Peter's, Liverpool. He succeeded his father as organist of the Collegiate Church, Manchester, in 1768. He composed services and anthems, and an oratorio, 'The Fall of Egypt,' performed at Liverpool in 1780 and 1801.

(3) RICHARD (b. Manchester, 1758; d. Aug. 20, 1825), was organist of St. Ann's, Manchester. In Sept. 1782 he was chosen to succeed his brother, Robert, as organist of St. Peter's, Liverpool, which he afterwards quitted for the organistship of St. James's, Toxteth Park, Liverpool, but in 1813 resumed his place at St. Peter's. He published a collection of hymn-tunes of his composition. His glee, 'Life's a bumper,' was very popular. His execution was remarkable—more remarkable perhaps than his taste.

(4) WILLIAM (b. Stockport; d. July 2, 1797), was a singing-man at the Collegiate Church, Manchester, and also a performer on the double bass, besides carrying on the business of music-selling in Manchester, in partnership with Sudlow.

W. H. H.

WAISSSEL (WAISSSELUS), MATTHEUS (b. Bar-tenstein), a 16th-century lutenist, at one time

pastor at Lackheim (?). In 1573 he calls himself Moderator of the School of Schippenbeil (now Schippenbeil, district of Königsberg). He wrote:

'Tabulatura continens . . . cantiones 4, 5 et 6 vocum, testudini aptatas, ut sunt Praecambula, Phantasias, Cantiones, germanicae, Italicae, gallicae et latinae, Passamesiae, Gagliardiae et Choreae' (Frankfort a/O, 1573);

'Tabulatura oder Lautenbuch allerley künstlicher Präambula, auserlesener deutscher und polnischer Tantz', etc. (1592)—according to Riemann a second edition of above);

'Lautenbuch, darinnen von der Tabulatur und Application der Lauten gründlicher und voller Unterricht: sampt auserlesenen deutschen und polnischen Tentzen'; . . . etc. (1592);

'Tabulatura Guter gemeiner Deutscher Tentze' for one and two lutes, *durch Quartzen, zusammen zu schlagen* (1592).

E. v. d. s.

WAIT (WAYTE, WAIGHT), an obsolete musical instrument of the hautboy type used by the WAITS (*q.v.*) or watchmen and identical with the earlier SHAWM. According to Henry Davey's *Hist. Eng. Mus.*, the statutes of Edward I. (before 1296) provided for the City of London that each gate shall be 'shut by the servant dwelling there and each servant shall have a wayte, at his own expense.' In a Nominale of the 15th century the low Latin word *Calamavula*, a reed-pipe—whence the word Shawm—is translated 'wayte pipe,' and in a 17th-century MS. (Harl. 2029) there is a sketch of a reed-pipe to which is appended the threefold title 'a Howboye or a Wayte or a Shawm.'

On the Minstrels' Pillar in St. Mary's Church, Beverley, is represented the figure of a minstrel with his 'wait.'

F. W. G.

WAITS, THE. (1) In early times Waits were the night guards stationed at city gates. They were provided with a reed instrument, of the hautboy kind, for the purpose of signalling, or sounding at regular intervals to proclaim 'All's Well.'

Gradually, we may assume that musical effects were produced by the original instruments and by others added to them. In the 15th and 16th centuries the Waits had developed into paid bands of musicians supported by the towns and cities for the purpose of playing at civic functions, etc. They were accustomed to welcome distinguished visitors into the towns, and many of the entries in MS. books of household expenses are donations to the Waits of different towns. This practice had not died out in the 18th century, for in *Humphrey Clinker*, Matthew Bramble is welcomed to Bath by the Town Waits calling at his lodgings and playing. At Christmas it was the custom for the Town Waits to visit the houses of notables, playing and singing suitable music, and the term 'Christmas Waits' survives as applied to these players and their imitators. In the 16th and 17th centuries it is quite evident that members of the Town

Waits were skilled musicians. William Kemp, in his account of his nine days' Morris from London to Norwich in 1599, speaks of being welcomed by the City Waits. He further says:

'Such Waytes (under Benedicte be it spoken) few citties in the Realme have the like, none better; who besides their excellency in wind instruments, their rare cunning on the Vyoll and Violin, theyre voices be admirable, euerie one of them able to serue in any Cathedral Church in Christendome for Quiresters.'

Several distinguished musicians have arisen from the ranks of the Waits. The father of Orlando Gibbons was one of the Waits at Cambridge; the father of John Banister was one of St. Giles in the Fields; and John Ravenscroft, a composer of some clever triple time hornpipes and one of the band belonging to Goodman's Fields Theatre, was a Wait of the Tower Hamlets.

In certain places silver badges bearing the town's arms were issued to the official Waits. Leeds maintained four Waits in the 17th century, and one of the silver badges is still in existence.

(2) The name was also applied to pieces of music supposed to have been played or sung by the Waits of particular towns or cities, as especially associated with these places. Thus we get 'London Waits,' 'Chester Waits,' 'Colchester Waits,' 'Worksop Waits,' 'Oxford Waits,' 'Bristol Waits,' 'York Waits' and so on. Many of these are preserved in 17th- and 18th-century country dance-books, the earliest specimen in print known to the writer being one named 'The Waits' in the 3rd edition of the *Dancing Master*, 1665, among the tunes at the end.

In the reissue of this part of the book under the title *Apollo's Banquet* the air is named 'London Waits.'

The Waits.

From 'The Dancing Master,' 1665.

A more famous air for four voices, also named 'The Waits,' is by Jeremy Savile, and is published in Playford's *Musical Companion*, 1672-73.

It is a fine melody, and is sung to the syllables 'Fa, la, la.' The meetings of the Madrigal Society maintain the custom of concluding their music with the singing of this piece four times.

F. K.

WAKE, WILLIAM, organist about 1640-50 of Exeter Cathedral, when Matthew Locke (*q.v.*)

¹ *Nine Days Wonder*, 1600.

was a choirboy there. Wake was sworn in as a gentleman of the Chapel Royal, Aug. 7, 1663. It was he who encouraged Locke to write his 'Little Consort' in three parts for viols or violins (published by Playford in 1656), as the latter tells us in the preface, where he speaks of Wake as 'an intimate friend and great Master in Musick.' E. v. d. s.

WAKEFIELD, AUGUSTA MARY (*b.* Sedgwick, near Kendal, Westmorland, Aug. 19, 1853; *d.* Grange-over-Sands, Sept. 16, 1910), studied singing under Randegger, Henschel, Blumenthal, and with Alari at Rome, where she also had piano lessons from Sgambati; she made a remarkable success as an amateur contralto singer and composer of songs, and after appearing at many charity concerts in London and elsewhere, was engaged at the Gloucester Festival of 1880, and sang at various important concerts. Her voice was of rich quality, and her artistic temperament carried conviction to all her hearers.

In 1885 she established the first of the competitive festivals with which her name is inseparably connected. The occasion was a modest competition at her home at Sedgwick, but in the following year the event was transferred to Kendal where it has flourished ever since. This Westmorland festival became the model for a far-reaching movement (see COMPETITION FESTIVALS). It grew so rapidly that in later years Mary Wakefield's energies became well-nigh exclusively devoted to it. Meantime in 1890 she had definitely adopted the profession of lecturer on music, illustrating her own lectures with great success. She edited an anthology called *Ruskin on Music*, and contributed to various periodicals. M., addns.

BIBL.—ROSA NEWMARCH, *Mary Wakefield—a Memoir*. (Kendal, 1912.)

WALD, DER, opera in one act; words and music by Ethel M. Smyth. Produced, Dresden, Sept. 1901; Covent Garden, July 18, 1902; Metropolitan Opera-House, New York, Mar. 1903.

WALDERSEE, PAUL, GRAF VON (*b.* Potsdam, Sept. 3, 1831; *d.* Königsberg, June 14, 1906), a distinguished editor of the musical classics. In 1848–71 he was an officer in the Prussian army, but after the latter date devoted himself wholly to music, taking an active part in the preparation of Breitkopf & Härtel's great editions of Mozart and Beethoven. He also edited the enlarged reprint of Köchel's Mozart-catalogue. An important publication for which he was mainly responsible was the *Sammlung musikalischer Vorträge*, which appeared from 1879–84, and included monographs by various distinguished writers on the great masters, partly biographical and partly analytical. He contributed to the most important musical periodicals of Germany. M.

WALD FLUTE, an open treble wood organ stop of 8-feet and 4-feet pitch, rather similar to the Clarabella, but having the splay of the mouth inverted, i.e. inside the pipe. T. E.

WALDHORN, the German name for the large circular hunting-horn or *cor de chasse* (see HORN). D. J. B.

WALDSTEIN, COUNT FERDINAND ERNST GABRIEL (*b.* Mar. 24, 1762; *d.* Aug. 29, 1823), one of Beethoven's earliest friends, immortalised by the dedication of the PF. Sonata in C, op. 53, now usually known as the 'Waldstein Sonata.' Ferdinand was the youngest of the four sons of Emmanuel Philipp, Graf Waldstein und Wartemberg von Dux. He was born just eight years before Beethoven, and his father died in 1775, leaving the property to the eldest son Joseph Carl Emmanuel. Ferdinand when of age (24 according to the German law) entered the 'German order' (Deutscher Orden) as a career; in 1812, however, he obtained a dispensation from his vows and married, but, like all his brothers, died without male issue, and thus with this generation the house of Waldstein von Dux became extinct. Count Ferdinand spent the year of his novitiate (1787–88) at the court of the Elector at Bonn, and it was then that he became acquainted with BEETHOVEN (*q.v.*). Vol. I. p. 261. In 1791 or 1792 Beethoven composed twelve variations for four hands on the PF. on an air of the Count's, and in 1804 or 1805 he wrote the Sonata which has made the name of Waldstein so familiar. In this splendid work (published May 1805) the well-known 'Andante Favori' in F was originally the slow movement; but Beethoven took it out, as too long, and substituted the present Adagio for it. The Adagio is in a different coloured ink from the rest of the autograph. G.

WALDTEUFEL, EMIL (*b.* Strassburg, Dec. 9, 1837; *d.* Paris, Feb. 12, 1912), a pupil of the Paris Conservatoire under Marmontel and Laurent, was afterwards employed in a piano factory, and was appointed pianist to the Empress Eugénie. His first waltzes, 'Joies et peines' and 'Manola,' were published at his own expense, and were such a success that he devoted himself exclusively to the production of similar things, which eventually reached many hundreds. M.

WALEY, SIMON WALEY (*b.* London, Aug. 23, 1827; *d.* Dec. 30, 1875), composer and pianist. He was a pupil successively of Moscheles, Bennett and G. A. Osborne for the piano, and of W. Horsley and Molique for theory and composition. He began composing very early, and wrote several elaborate PF. pieces before he was 12. His first published work, 'L'Arpeggio,' a PF. study, appeared in 1848. It was speedily followed by a number

of songs and pianoforte pieces, including a concerto with orchestral accompaniment, and two pianoforte trios, op. 15 in B \flat and op. 20 in G minor (published by Schott & Co.). Simon Waley was an accomplished pianist, and frequently performed at the concerts of the Amateur Musical Society, conducted by Henry Leslie. His compositions abound in the plaintive melody characteristic of Mendelssohn; they exhibit great finish, and a richness of detail and harmony not unworthy of the best disciples of the Leipzig school. He was a prominent member of the London Stock Exchange, and for many years took an active part on the committee. He is buried in the Jewish Cemetery at Ball's Pond. He belonged to the Jewish faith, and was a leading member of that community during the critical period of its emancipation from civil disabilities. One of his finest works is a choral setting of the 117th and 118th Psalms for the Synagogue service.

His published works, besides those already mentioned, contain a large number of pieces for piano, solo and duet; two duets for violin and piano; songs and duets, etc. etc. The choruses for the Synagogue mentioned above are published in vol. i. of the *Musical Services of the West London Synagogue*. Besides the printed works some orchestral pieces remain in MS. G.

WALKELEY, ANTONY (b. Wells, 1672; d. Jan. 16, 1717-18), was a chorister and afterwards a vicar-choral of Wells Cathedral. In 1698 he was appointed organist of Salisbury Cathedral as successor to Daniel Rosegrave. His Morning Service in E \flat is preserved in the Tudway Collection (Harl. MS. 7342), and anthems by him are in MS. at Ely Cathedral and in the R.C.M. W. H. H.

WALKER, EBERHARDT FRIEDRICH, an organ-builder at Cannstadt, Stuttgart, in the middle of the 18th century, with his son, of the same names, was one of the best builders in Germany. In 1820 he removed to Ludwigsburg. His European reputation is due to the fine organ which he built in 1833 for the church of St. Paul at Frankfurt-on-the-Main. In 1856 he completed a large organ for Ulm Cathedral of 100 stops on four manuals and two pedals, and a new movement for drawing out all the stops in succession to produce a *crescendo*. This can be reversed for a *diminuendo*. In 1863 he carried his fame to the New World by erecting a large organ in the Music Hall, Boston, U.S. v. de P.

WALKER, ERNEST, D.Mus. (b. Bombay, July 15, 1870), pianist, composer and writer on music, was educated at Balliol College, Oxford, where he graduated B.A. in *Lit. Hum.* in 1891. He took his D.Mus. in 1898 and has been closely associated with his College and University throughout his career, since from 1900-

1925 he was director of the music at Balliol and presided over the Sunday concerts of chamber music, which have been a potent factor in the musical life of Oxford. In 1926 he was elected to an honorary fellowship of Balliol. As an examiner, a member of the Board of Studies for music and a teacher in the University his academic work has been important.

Walker educated himself in music by close and practical study of the classics, and the German masters (particularly Beethoven and Brahms) and German literature formed the ground plan of his studies. But with a mind too active to be confined to one school, however great, he has extended his outlook to other methods and other times, and is a scholar alike of the new and the old. For a few years (1899-1902) he edited a quarterly periodical, the *Musical Gazette*; in 1905 he wrote *Beethoven (Music of the Masters, John Lane)*, a monograph which touches with a sure hand on the principal compositions of its subject. But his most important literary work is *A History of Music in England* (1907, second revised edition, 1923), which is a standard work of reference and deals trenchantly with every phase of musical composition from 'Sumer is i-cumen in' to modern times. He was an important contributor to the second edition of this Dictionary as also to the present one.

The greater number of Walker's compositions are in MS. He has been content to write thoughtfully and finely without care for publicity, and his chamber music compositions, heard only occasionally in London, Oxford and elsewhere, deserve a wider recognition. In such songs as 'Bluebells from the clearings' and 'Corinna going a-maying' he exhibits a vein of intimate feeling for the implications of English poetry and an instinct for apt musical expression which place him high among the song-writers of his generation. His vocal quartets (with PF. accomp.) from 'England's Helicon' are equally fascinating and have been widely sung. The following is a list of his principal compositions:

Stabat Mater for soli, chorus, and orch.
Hymn to Dionysus (Euripides), for chorus and orch. (Novello.)
Ode to a Nightingale (Keats), for baritone solo, chorus and orch. (Novello.)
Concert-Overture in F minor for orch.
Quintet in A for piano and strings.
Quintet in B flat minor for horn and strings.
Quartets in C minor and D for piano and strings.
Fantasia in D for string quartet.
Trio in C minor for piano and strings.
Sonatas in A minor and E flat for violin and PF. (Williams.)
Variations for viola and piano. (Schott.)
Variations for piano and viola.
Sonata in F minor for vcl. and piano.
Songs from 'England's Helicon' for four solo voices and piano.
Music to Euripides' *Rhesus*, for soli, chor. and orch.
'Neptune's Empire' (Campion), for chor. and orch.
Variations on a Theme of Joachim, for vln. and PF.
Album of Songs (Acott, Oxford), and many smaller instrumental and vocal works of all kinds.
(See *B.M.S. Ann.* 1920.) C.

WALKER, GEORGE. The founder of an extensive music-publishing business, established towards the end of the 18th century, at 106 Great Portland Street, and at 9 Brook

Street. The latter address only occurs on a few early imprints. He was at 106 Great Portland Street about 1790, and remained there until 1824, having, in 1822, additional premises at 64 Burlington Street. In 1824 he removed to 17 Soho Square, and as 'George Walker & Son' the firm remained here until the 'thirties and 'forties.

It is probable that he was the originator of the absurd practice of marking sheet-music at double what it was sold for; this is gathered from the statement in the London Directory that he is 'publisher of music at "half-price."' He was author of several novels, *Cinthela, The Three Spaniards, Don Raphael*, etc., and a book of *Poems on Various Occasions*. William Walker of 116 Portland Street, probably a relative, published sheet-music about 1794.

F. K.

WALKER & SONS, JOSEPH W., organ-builders in Francis Street, Tottenham Court Road, London. This business was originated by George England in 1740, who was succeeded by his son and his son-in-law, H. Nicholls, to whom J. W. Walker was apprenticed. Walker took over the business after Nicholls' death in 1820, established it in Museum Street in 1828, removed it to 166 High Holborn in 1830, and in 1838 to Francis Street, W.C. He died in 1870, and the factory was carried on by his son, James John (b. Aug. 21, 1846; d. Sept. 19, 1922). The latter, a practical scientist, who had worked his way through every stage of the business, was responsible for a very large number of famous organs and for the high position which the firm still occupies. See *Mus. T.*, Nov. 1922, p. 807.

v. de P., addns.

WALKÜRE, DIE, see RING DES NIBELUNGEN.

WALLACE (GRACE), LADY (b. Apr. 1815; d. 1878), daughter of John Stein of Edinburgh, married in 1836 Sir James Maxwell Wallace, who died 1867.

She translated the following musical works:

Two vols. of Mendelssohn's Letters: *From Italy and Switzerland* (1862); *From 1833 to 1847* (1863); *Letters of Mozart*, 2 vols. (1865); *Reminiscences of Mendelssohn*, by Elise Polko (1865); *Letters of Beethoven*, 2 vols. (1866); *Letters of distinguished Musicians*, from a collection by Ludwig Nohl (1867); *Nohl's Life of Mozart* (1877). All published by Longman & Co., London.

G.

WALLACE, WILLIAM (b. Greenock, July 3, 1860), is the son of the late James Wallace, M.D., an eminent Scottish surgeon. He was educated at Fettes College, where he gained a Trustees' Exhibition to Edinburgh University. This he resigned and entered Glasgow University, where he graduated M.B. and M.Ch. in 1886, and went to Vienna to study ophthalmic surgery. He graduated with honours in Glasgow in 1888, and was on the staff of eye hospitals both in Glasgow and London. He abandoned this profession for music, however, only resuming it temporarily during the war

(1914-18) when he served with the British Red Cross and in the R.A.M.C. (Captain) as inspector of ophthalmic centres.¹

In 1889 he entered the R.A.M. as a student, but did not long remain there. Nevertheless his connexion with the institution was maintained; he was successively elected A.R.A.M. and F.R.A.M. and is now (1927) on the professorial staff. He has also been closely associated with the ROYAL PHILHARMONIC SOCIETY (q.v.), to whose affairs he has devoted much time and energy both as Honorary Secretary and later as Trustee. Wallace's public career as a composer was begun when his scena for baritone solo and orchestra, 'Lord of Darkness,' was given at a R.A.M. students' concert, and an orchestral suite, 'The Lady from the Sea' (Ibsen), was given by the Stock Exchange Orchestra in 1892. In this year, too, his first symphonic poem, 'The Passing of Beatrice,' said to be the first British work with that generic title, was heard at the Crystal Palace. A series of orchestral works appeared on several occasions (see list below) and in 1899 the production of certain works at New Brighton (see BANTOCK) including the 'Freebooter Songs' made him famous. Of his several symphonic poems 'Villon' (1909) is generally considered to be the most representative, and has been the most widely played both in England and America. A man of many parts, Wallace has devoted his scholastic attainments and literary powers to several aspects of music in *The Threshold of Music* (1908), *The Musical Faculty* (1914), *A Study of Wagner* (1925). The following is a list of his principal compositions:

INSTRUMENTAL

Symphony, 'The Creation.' (New Brighton, 1899.)

Symphonic Poems—

1. 'The Passing of Beatrice.' Dante, *Paradiso*, canto xxxi. (Crystal Palace, 1892.)
 2. 'Anvil or Hammer.' Goethe, *Köphisches Lied*. (Crystal Palace, 1896.)
 3. 'Sister Helen.' Rossetti. (Crystal Palace, 1899.)
 4. 'To the New Country.' (London Philharmonic, 1901.)
 5. 'Wallace, A.D. 1306-1905.' (Queen's Hall Promenades, 1905.)
 6. 'Villon.' (New Symphony Orch., London, 1909.)
- Suite, 'The Lady from the Sea.' Ibsen. (London, 1892.)
- Symphonic Prelude to the *Æumenides* of Aeschylus. (Crystal Palace, 1893.)
- Overture, 'In Praise of Scottish Poesie.' (1894.)
- 2 Suites in olden style. Small orch.
- 'A Scots Fantasy,' for orch.
- Trio in A. PF. and strings. (1892.)

VOCAL

- Scena, 'Lord of Darkness.' Baritone and orch. (London, 1890.)
- 'Spanish Songs.' Vocal quartet. (1893.)
- 'My soul is an enchanted boat.' Voice, vln. and PF. (1896.)
- Scena, 'The Rhapsody of Mary Magdalene' (words from the composer's mystery play, *The Divine Surrender*). (London, 1896.)
- Song cycles—
1. 'Freebooter Songs,' originally with orch. (New Brighton, 1899.)
 2. 'Jacobite Songs.' (1900.)
 3. 'Lords of the Sea.' (Bournemouth, 1902.)
- 'The Massacre of the Macpherson.' Burlesque ballad, male ch. and orch. (Leeds Musical Union.)
- Scena, 'The Outlaw.' Male voices and orch.
- 'Brascolia.' Lyric tragedy in one act.
- Choral Symphony. 'Kohleth.' Many songs and short choral pieces. (See *B.M.S. Ann.* 1920.)

C., incorporating material from M.

¹ Wallace's ophthalmological researches are recorded in contributions to several scientific journals and in 100 water-colour sketches by him presented to the Army Medical War Museum.

WALLACE, WILLIAM VINCENT (*b.* Waterford, Ireland, Mar. 11, 1812¹; *d.* Château de Bagen, Oct. 12, 1866), was composer of 'Mariana' and other remarkably popular operas. His father, a bandmaster² and skilful bassoon-player, migrated to Dublin, and was engaged in the band of the Adelphi Theatre there, where his second son Wellington played second flute.

Vincent had displayed considerable talent as organist before quitting Waterford, and his skill and steadiness as a violinist were so appreciated in the Dublin theatre, that we find him leading the band dressed in a boy's jacket whenever the regular *chef* was belated. In June 1829 Wallace sustained the violin part in Herz and Lafont's duo on Russian airs at a public concert in Dublin, and continued to appear at concerts there, and at the festival held in 1831, when Paganini was engaged. In 1831 Wallace married Isabella Kelly,³ of Frescati, Blackrock, near Dublin, who survived him, dying in Dublin, July 25, 1900.⁴ He turned his knowledge of the violin to account by playing a concerto of his own composition at a concert in Dublin in May 1834; but Dublin offered little field for an aspiring artist, and so, wearying of such mechanical labours as adding symphonies and accompaniments to songs for the Dublin publishers, he quitted Ireland in 1835, with his wife and her sister, and transferred his household to an abode in the bush far to the west of Sydney, New South Wales. During one of his visits to Sydney, some friends accidentally hearing him play, were amazed to discover in a simple emigrant a violinist of the first rank, and Wallace was induced to give a concert, which had enormous success. He met with various romantic adventures in different parts of the world.⁵

In 1845 we find him in London, in a costume somewhat unusual for the private box of a theatre. 'It consisted,' says Heyward St. Leger, 'of a white hat with a very broad brim, a complete suit of planter's nankeen, and a thick stick in his hand.' Wallace recognised St. Leger immediately. They at once renewed their intimacy, which dated from the days when Wallace had led the Dublin orchestra. Inquiring of his friend whether he thought him capable of composing an opera, 'Certainly,' replied the other, 'twenty.' 'Then what about a libretto?' 'Come over now to Fitzball with me, and I will introduce you.' Accordingly they called on the poet at his house in Portland Road. Fitzball at once gave him the book of 'Mariana' (Drury Lane, Nov. 15, 1845), which proved a great success, and still keeps the stage. In 1847 he

produced 'Matilda of Hungary,' of which the libretto was, even for Bunn, outrageously bad. In 1849 we find him at the head of a concert party in South America. On his return he went to Germany, where he remained fourteen years. To this period belongs most of his pianoforte music, partaking of the dreamy style of Chopin, the ornate *cantabile* of Thalberg, and his own charming manner. Part of the opera, 'Lurline,' too was now written, in the romantic district it describes. An unpublished opera, 'The Maid of Zurich,' dates also from this period. The Irish composer now received a high compliment—a commission from the Opéra of Paris. He began to write, but his eyesight failing he abandoned his pen, and once more went abroad, visiting both North and South America, and giving concerts with great success. He was nearly blown up in a steamboat in 1850, and lost all his savings by the failure of a pianoforte factory in New York. His concerts there, however, proved very lucrative. He returned to London in 1853, his pianoforte music being in high repute and eagerly sought for by the publishers. In 1860 he brought forward his 'Lurline' (Covent Garden, Feb. 23); it met with even greater success than 'Mariana,' equally overflowing with melody, and being in addition a really fine piece of art-work. In 1861 appeared 'The Amber Witch' (Her Majesty's, Feb. 28); in 1862 'Love's Triumph' (Covent Garden, Nov. 3); in 1863 'The Desert Flower' (Covent Garden, Oct. 12). This was his last completed work, but of an unfinished opera, called 'Estrella,' some fragments remain. A detailed list of his pianoforte and other compositions will be found in *Brit. Mus. Biog.* His health had been breaking for some time, and he was ordered to the Pyrenees, where he died at the Château de Bagen. He was buried in Kensal Green Cemetery on Oct. 23.

BIBL.—A. POUVIN, *William Vincent Wallace* (1866); W. H. GRATTAN FLOOD, *Memoir of W. V. Wallace* (1912); W. V. WALLACE —a *Centenary Notice* (*Mus. T.*, July 1912); Correspondence arising from the last named (*Mus. T.*, Sept. 1912, p. 695); CECIL FORSYTH, *Music and Nationalism*, containing criticism of Wallace's operas.

WALLASCHEK, RICHARD (*b.* Brünn, Nov. 16, 1860; *d.* Vienna, Apr. 24, 1917), studied law and philosophy at Vienna, Heidelberg and Tübingen, took the degree of Dr. in both faculties, taught in the university of Freiburg in 1886, in which year appeared his *Ästhetik der Tonkunst*. In 1890–95 he lived in London, studying the music in the British Museum. He went to Vienna in 1896, and was for some time teacher of the aesthetics of music in the conservatorium of the Gesellschaft der Musikfreunde. His most important works on music were published in London: *On the Origin of Music* (1891), *Natural Selection and Music* (1892), *On the Difference of Time and Rhythm in Music* (1893), and *Primitive Music* (1893). Many articles of value appeared in the *Vierteljahrs-*

¹ The register of birth is quoted by W. H. G. F., *Mus. T.*, July 1912, p. 448.

² Army records show that Wallace sen. joined the 29th Regiment in 1822, was promoted sergeant 1823, and purchased his discharge 1826 (*Mus. T.*, July 1912, p. 448).

³ Their separation (1839), and Wallace's subsequent connexion with Hélène Stoepel (pianist), by whom he had two sons, has occasioned several mis-statements by his biographers.

⁴ A concert for her benefit was organised by W. H. Gregory, at the Queen's Hall, in 1896. Her son was nominated to the Charterhouse about the same time.

⁵ See Pougin's Biography.

schrift, the *Contemporary Review*, etc. In 1903 his treatise on *Primitive Music* appeared in an enlarged German edition as *Anfänge der Tonkunst*. His subsequent German works include *Geschichte der Wiener Hofoper* (1907–08), and several volumes on aesthetics and psychology as applied to music. (See *Riemann*.) M.

BIBL.—R. LACH, *Zur Erinnerung an R. Wallaschek*. 1917.

WALLERSTEIN, ANTON (b. Dresden, Sept. 28, 1813; d. Geneva, Mar. 30, 1892), began life early as a violinist, and in 1827 was much noticed during a visit to Berlin. In 1829 he entered the court band at Dresden, and in 1832 that at Hanover, but various wanderings to Hamburg, Copenhagen and other places led to the resignation of his post in 1841.

He began to write in 1830, and from that time till 1877 poured forth a constant flood of dance music, chiefly published by Schott & Co., of Mainz. His 275th opus is entitled 'Souvenir du pensionnat. Cinq petites pièces faciles en forme de danse pour piano. Leipzig, Kahnt.' With this piece his name disappears from the publishing list. His dances had a prodigious vogue during their day in Germany, France and England, in all classes of society. Among the best known are 'La Coquette,' 'Redova Parisienne,' 'Studentengalopp,' 'Erste und letzte Liebe,' etc. His songs also were popular, especially 'Das Trauerhaus' and 'Sehnsucht in die Ferne.' a.

WALLIS, DR. JOHN (b. Ashford, Kent, Nov. 23, 1616; d. Oxford, Oct. 28, 1703), professor of mathematics at Oxford University in 1649. He edited: *Tractatus elencticus adversus Marci Meibomii dialogum de proportionibus* (1657); *Claudii Ptolemaei harmonicarum libri III* (Greek 1662), with an appendix; *De veterum harmonia ad hodiernam comparata*; *Porphyrii in harmonica Ptolemaei commentarius*; *Manuelis Bryennii harmonica* (also reproduced in his collected works, 3 vols. 1699). A number of acoustical investigations in philosophical transactions (1672–98); *De loquela, seu sonorum formatione, tractatus*, Lugduni, 1740.

WALLISER, CHRISTOPH THOMAS (b. Strassburg, Apr. 17, 1568; d. there, Apr. 27, 1648), was a pupil of Melchior Vulpus and Tobias Kindler; he was a teacher in the Academy and director of music in two churches in Strassburg from 1599. It was no doubt his academic post which suggested the composition of choruses from the *Clouds* of Aristophanes, and to various other plays on the classical model, such as *Andromeda*, *Elias* and *Charicles*. His 'Teutscher Psalmen' (a 5) were published in 1602; his 'Hexastichon' (a 6) in 1610; his 'Musicae figuralis praecepta brevia,' for 2–6 voices, appeared in 1611; and his 'Sacrae modulationes' for Christmas in 1613. His chief work is:

*Ecclesiastice, das ist Kirchengesang, nemlich die gebrauchlichsten Psalmen Davids so nicht allein viva voce, sondern auch zu musikalischen Instrumenten christlich zu gebrauchen, mit 4, 5, 6 Stimmen componirt, Strassburg, 1614.

It consists of fifty German psalms set in the old contrapuntal style on the melodies to which they were sung in the protestant services in Strassburg. Two of them are republished in Schöbelflein and Riegel's 'Schatz des liturgischen Chorgesangs,' and one ('Ein' feste Burg,' Luther's version of the 46th Psalm) in Kade's *Notenbeilagen zu Ambros's Geschichte der Musik*. In 1625 Walliser published

*Ecclesiastice Novae, darin die Catechismusgesang, andere Schrift und geistliche Lieder samt dem Te Deum, und der Litania . . . mit 4, 5, 6, 7 Stimmen gesetzt.

Similar publications appeared in 1617, 1627 and 1641, and many works in MS. are extant. (See *Q.-L.*) M.

WALMISLEY, (1) THOMAS FORBES (b. Westminster, May 22, 1783; d. July 23, 1866), son of William Walmisley, Clerk of the Papers to the House of Lords, was a chorister in the Abbey and was sent to Westminster School. At 14 he began his musical education, and studied the organ, piano and counterpoint under ATTWOOD (q.v.). Walmisley achieved success as a musical teacher and glee-writer. The *Spectator* for Aug. 28, 1830, thus characterises a volume of glees published by Walmisley at that time:

'These compositions, though displaying the attainments of a skilful musician, are not the dull effusions of a pedant. Though formed upon the best models, they are no servile copies, but the effusions of good taste matured and nurtured by study.'

In 1810–14 he was assistant organist to the Female Orphan Asylum, and in the latter year he became organist at St. Martin-in-the-Fields, an appointment he held until Mar. 1854, when he retired on a pension. His name appears on the list of musicians assembled at Weber's funeral in 1826. He lived to edit his more famous son's 'Cathedral Music.' He is buried in Brompton Cemetery.

The following printed works appear in the Catalogue of the British Museum, with dates of publication:

Six glees, 1814. Round, Underneath this stone (Ben Jonson), 1815. Song, Taste life's glad moments, 1815. Trio, The fairy of the dale, 1815. Song, Sweet hope, 1817. Glee, From flower to flower, 1819. Canonet, The soldiers, 1819. Glee, Say, Myra, 1822. Song, The wild hyacinth, 1825. A collection of glees, trios, rounds and canons, 1826. Song, I turn from pleasure's witching cone, 1827. Song, Home, dearest home, 1828. By those eyes of dark beauty, 1829. Glee, Bright while smiles the sparkling wine, 1830. Six glees, 1830. Six glees, 1830. Round, O'er the glad waters, 1836. Glee, I wish to tune, 1836. Glee, Thou cheerful bee, 1836. Song, To Zulma, 1835. Three canons, 1840. Duet, Tell me, gentle hour of night, 1840. Sacred songs, poetry by E. B. Impey, 1841. Glee, To-morrow, 1845. Glee, The traveller's return (Southey), 1866.

His eldest son, (2) THOMAS ATTWOOD (b. London, Jan. 21, 1814; d. Hastings, Jan. 17, 1856), showed at an unusually early age such a rare aptitude for music that his father secured for him the advantage of studying composition under his godfather, Thomas Attwood. The lad rapidly attained proficiency as a pianist. In 1830 he became organist of Croydon Church, and attracted the notice of Thomas Miller, who encouraged his literary tastes and persuaded him to combine mathematical with musical studies. At this time an attempt was made by Monck Mason to

secure him for English opera, but Walmisley decided to try his fortune at Cambridge. In 1833 he was elected organist of Trinity and St. John's Colleges, and composed an exercise, 'Let God arise,' with full orchestra, for the degree of Mus.B. He then entered Corpus Christi College, where he distinguished himself in the mathematical examinations. He subsequently migrated to Jesus College, and though unsuccessful as a competitor for the University Prize Poem, fully justified the wisdom of Miller's advice that his love of literature should not be entirely sacrificed to professional duties. The then system concentrated the duties of several persons in one, and the young organist submitted to a slavery which it is now difficult to realise. He took without any remuneration Pratt's duties as organist in King's College Chapel and St. Mary's, and his Sunday work deserves to be recorded: St. John's at 7.15 A.M.; Trinity, 8; King's, 9.30; St. Mary's, 10.30 and 2; King's, 3.15; St. John's, 5; Trinity, 6.15. In 1834 he wrote the anthem 'O give thanks,' for the Commemoration at Trinity, and his Service in B flat. In 1835 he composed the Ode, written by the Bishop of Lincoln, for the Installation of Lord Camden as Chancellor—a serious interruption to his mathematical studies.

His election to the professorial chair of Music, vacated by the death of Dr. Clarke-Whitfield, took place in 1836; in 1838 he took his B.A. degree, and in 1841 his M.A. On two other occasions it fell to his lot to compose music for Odes written for the Installation of Chancellors of the University. In 1842, the words, in honour of the Duke of Northumberland, were written by the Rev. T. Whytehead; in 1847, for the Installation of the Prince Consort, they were by Wordsworth, then Laureate. Poetry and music written for such occasions are seldom long-lived, but a quartet from the Ode of 1842, 'Fair is the warrior's mural crown,' would certainly be an effective concert-piece at any time. In 1848 he took the degree of Mus.D., and continued working at Cambridge until within a short period of his death, which took place at Hastings, Jan. 17, 1856. He was buried at Fairlight, and a brass tablet to his memory was erected in Trinity College Chapel in 1888.

His intimacy with Mendelssohn was a source of great pride to him, though a rebuff administered by Mendelssohn weighed unduly on his mind, and deterred him from orchestral writing. Walmisley asked Mendelssohn to look at a symphony written for the Philharmonic Society. Before he would consent, Mendelssohn asked how many he had written already. On hearing that it was a first attempt: 'No. 11' exclaimed Mendelssohn, 'let us see what No. 12¹ will be first!'

¹ Mendelssohn's Symphony in C minor, with which he made his debut at the Philharmonic in 1829, though known as 'No. 1,' is really his 13th, and is so inscribed on the autograph.

Walmisley was one of the first English organists of his day, and in a period of church music made memorable by the compositions of Wesley and Goss, his best anthems and services are little, if at all, inferior to the compositions of these eminent men. As instances of fine writing we may cite the Service in B \flat , the Dublin Prize Anthem, his anthem 'If the Lord himself' and the madrigal 'Sweete Floweres,' a work which Henry Leslie's choir did much to popularise. His position at Cambridge no doubt acted prejudicially. A larger professional area, a closer neighbourhood with possible rivals, would have ensured a deeper cultivation of powers which bore fruit but promised a still richer harvest. In general cultivation and knowledge of musical history he was far in advance of most English musicians. He was one of the first to inaugurate the useful system of musical lectures illustrated by practical examples. In a series of lectures on the 'Rise and Progress of the Pianoforte,' he spoke incidentally of Bach's Mass in B minor as 'the greatest composition in the world,' and prophesied that the publication of the cantatas (then in MS.) would show that his assertion of Bach's supremacy was no paradox.

The volume of anthems and services published by his father after the son's death are a first-class certificate of sound musicianship. Amongst his unpublished manuscripts are some charming duets for pianoforte and oboe, written for Alfred Pollock, a Cambridge undergraduate, whose remarkable oboe-playing Walmisley much admired.

His published works in the Catalogue of the British Museum are as follows:

Song, When nightly my wild harp I bring, 1835 (?). Ode at the Installation of the Duke of Northumberland as Chancellor, 1842. Chants and Responses in use at King's, Trinity and St. John's Colleges, Cambridge, 1845. Three anthems arranged from Hummel's Masses, 1849. Ode at the installation of Prince Albert as Chancellor, 1849. Attwood's Cathedral Music: 4 services, 8 anthems, etc., arranged by T. A. Walmisley, 1852. Two trios for trebles—1. The approach of May; 2. The Mermaid, 1852. Choral hymn, 4 v. and organ, 1853. Madrigal, Sweete floweres. Four songs—1. Gay festive garments; 2. Sing to me then; 3. Farewell, sweet flower; 4. The sweet spring day, 1854. Cambria, 1857. Cathedral Music, edited by T. F. Walmisley, 1857. Song, There is a voice, 1858.

A. D. C.; addns. from D.N.B., etc.

WALMSLEY, P., see WAMSLEY.

WALOND, (1) WILLIAM, Mus.B. (b. 1725; d. 1770²), was admitted to the privileges of the University of Oxford, June 25, 1757, being described as 'organorum pulsator' (whence we may suppose him to have been organist or assistant organist of one of the churches or colleges at Oxford), and on July 5 following took his degree as of Christ Church. In 1758 he published his setting of Pope's 'Ode on St. Cecilia's Day,' believed to be the first setting of that poem in its original form. (See GREENE, Maurice; CECILIA, St.) Three sets of voluntaries for organ or harpsichord were also published. (2) WILLIAM (d. Chichester, Feb. 9, 1836), possibly a son of William (1),

² Dates given by W. E. O. R.

became deputy organist in 1775 and organist in 1794 of Chichester Cathedral, which post he resigned in 1801. After his resignation he resided in Chichester in extreme poverty and seclusion (subsisting upon an annuity raised by the sale of some houses, and being rarely seen abroad) until his death. Some fragments of church compositions by him remain in MS. in the choir-books of Chichester Cathedral. (3) RICHARD (b. 1754), son of William (1), matriculated from Christ Church, Oxford, July 14, 1770. He was a clerk of Magdalen College, Oxford, from Mar. 24, 1775, until 1776. On Mar. 14, 1776, he took the degree of B.A. as of New College, and was subsequently a vicar-choral of Hereford Cathedral. (4) GEORGE, another son of William (1), was a chorister of Magdalen College, Oxford, from Apr. 13, 1768, until 1778.

W. H. H.

WALPURGISNACHT, DIE ERSTE; Goethe's ballad set for chorus and orchestra by Mendelssohn, op. 60; produced Berlin, Jan. 1833; re-scored, with English words by Bartholomew, Philharmonic Society, July 8, 1844.

WALSH, (1) JOHN (d. Mar. 13, 1736), a famous London music-publisher during the first half of the 18th century. He was established at the 'Harp and Hoboy,' in Catherine Street, Strand, and was there publishing engraved music. Walsh was, in all probability, of Irish extraction, and appears to have had court favour, for he was the first, so far as the writer can ascertain, to be named 'Musical instrument-maker and music-seller to the King' (William III.).¹ The royal appointment extended to himself and his son through all succeeding reigns, including the first few years of George III. On one early imprint the name is spelled 'Welch,' but as this only occurs on one item it may be safely assumed that it is merely a misprint. On the early imprints, down to 1705, the sign stands as 'The Golden Harp and Hoboy.' John Playford was dead, and his son merely dragging on the remains of the once large business, so Walsh had no serious rival in the trade, which he pushed forward with unprecedented vigour.

He reprinted from Dutch sources popular continental music (Corelli, for example) at low prices, using, no doubt, pewter instead of the more costly copper. Hawkins states that he began stamping pewter plates in 1710, instead of engraving them, as Thomas Cross (q.v.) was then doing. The date is not confirmed, but it is quite a probable one. Walsh's shop was quite distant from St. Paul's Churchyard and Temple Bar, where the usual music-trade congregated, and no doubt this isolation enabled him to build up a business that may

be aptly compared with the largest of our modern music-publishing firms. Hawkins in his *History* has no good word for Walsh. He intimates that he was mean and illiterate, and with him he includes John Hare, who was more or less associated with Walsh. Whether Hawkins's prejudices enter into this condemnation or not it is difficult to tell.

Walsh's earliest productions are frequently adorned with elaborately engraved titles and frontispieces: many very artistic, others in the Dutch style then so popular. Some of these title-pages were used over again for different publications, the altered titles printed from smaller inserted plates. Most of Walsh's early imprints also bear the name of John Hare, and, later, John and Joseph HARE (q.v.). Afterwards these were erased from the plates. John Hare lived in Freeman's Yard, Cornhill, and had a shop in St. Paul's Churchyard, 'The Golden Viall.' He was succeeded by his son Joseph in Freeman's Yard. Walsh was thus able to get both the City as well as the West End trade. Whether the Hares were partners with Walsh is uncertain.

About 1710 Walsh associated himself with P. Randall, who, a few years before, was established at 'The Violin and Lute without Temple Bar.' There are indications that Randall married the elder Walsh's sister, leaving a son, William Randall, who ultimately succeeded to the Walsh business. P. Randall gave up his shop near Temple Bar and remained with Walsh.

In 1710 Walsh was in full trade, publishing single songs and the Italian operas, instrumental works and the whole range of current music. Handel, coming over to England, naturally turned to him as the principal publisher, and 'Rinaldo' appeared in 1711, by which it is said that Walsh made one thousand pounds. Walsh senior was intimately connected with Handel from this time to the date of the former's death. They appear to have continually squabbled, as is proved by Handel publishing by subscription, through Cluer and through Meares, being evidently dissatisfied with Walsh's treatment.

Walsh was buried in the vaults of St. Mary Le Strand. *The Gentleman's Magazine* announces that he left £30,000. F. K.

(2) JOHN (d. Jan. 15, 1766), his son, succeeded to the business left by his father, and also to the royal appointments as music-seller and instrument-maker. Although Johnson and other great rivals had sprung up there was no falling off of the business. The younger Walsh continued it on the same lines as his father. The engraving and the paper were of the best, and even after a century and a half's usage it is pleasant to turn over the clearly printed sheets on excellent paper that bear his imprints. Walsh junior continued the Handel

¹ C. H. de Lafontaine's *The King's Music* finds the earliest reference to Walsh in an entry to the effect that he was appointed musical-instrument maker to the King in place of John Shaw, surrendered on June 24, 1692. F. K.

publications. The *Public Advertiser* stated that on his death his fortune amounted to £40,000. The business was taken over by William Randall, who was, presumably, the son of P. Randall and cousin to the last Walsh. Randall went into partnership with one Abell, in 1767-68, but this lasted only for about a year. He republished from the old plates all the Walsh publications that were of marketable value, and made but few additions to the stock. On his death, before 1781, his widow, Elizabeth Randall, succeeded, and before 1784 Wright and Wilkinson were at the address, reprinting from the old plates, mainly Handel's works. Hermond Wright remained here until about 1800, when the old premises, after being a music-publishing house for over a century, knew music no more. The later imprints show the number to have been 13, which appears to have been on the right-hand side going up from the Strand. All traces of the site of Walsh's shop and of Catherine Street itself are lost. Walsh and his son had apprentices as engravers, and many of these, including William Smith and Caulfield, set up for themselves. Robert Birchall was assistant to Randall, and Samuel Chappell assistant to Birchall.

F. K.

WALSINGHAM, THOMAS DE (b. Norfolk, early 15th cent.), entered the Benedictine monastery of St. Alban about 1440 and became precentor of the Abbey Church. He is apparently identical¹ with the author of the treatise: *Regule Magistri Thome Walsingham in the Waltham Holy Cross, now Lansdowne MS. 763*, from about 1460, in which he says that the *newly introduced crotchet* would be of no use if musicians would remember that no subdivision of notes should be made beyond the minim (*Hawkins; Q.-L.*).

WALTER, ALBERT (b. Coblenz), an 18th century clarinetist-composer, occupied various positions at Paris from 1795, becoming bandmaster of the chasseurs of the Imperial Guards in 1805. He composed symphonies, concertante for 2 clarinets, quartets, trios for 2 violins and bass, duets, variations, etc. (*Fétis; Q.-L.*).

WALTER, BRUNO (b. Berlin, Sept. 15, 1876), a distinguished conductor, both of opera and the symphonic orchestra, received his musical education at the Stern Conservatorium. After a wide experience gained through appointments at several German opera-houses, including the Royal Opera at Berlin, Walter became director at the Vienna Hofoper (1901-12). In 1911 he also conducted the Singakademie there (see VIENNA). He followed Mottl as general music director at Munich (1913-22), and there his power as an organiser of operatic enterprise over and above his purely musical abilities were displayed in many festival performances.

Walter first appeared in England at a concert

of the Royal Philharmonic Society on Mar. 3, 1909, when he gained so instant a success that the Society secured him for further concerts in the autumn. In this first programme was the overture to Ethel Smyth's 'The Wreckers,' and Walter conducted when that opera was given at Covent Garden in the spring of 1910. In that season, one given by Beecham, he also conducted 'Tristan.' He was not again heard in opera in this country, however, until 1924, when he took charge of the German opera season at Covent Garden (the first since 1914) with such brilliant musical results that the newly formed London Opera Syndicate wisely secured his services for their first season in 1925 and again in 1926. In these last years he has appeared frequently in concert work with the London Symphony Orchestra.

C.

WALTER, GUSTAV (b. Bilin, Bohemia, Feb. 11, 1834; d. Vienna, Jan. 30, 1910), learned singing at the Prague Conservatorium from Franz Vogl, and made his first appearance in opera as Edgar at a private representation of 'Lucia.' He played at Brünn for a short time, and in July 1856 appeared at Vienna in Kreutzer's 'Nachtlager.' He remained there throughout his career, and attained great popularity as a lyric tenor both on the stage and in the concert-room. He came to London in 1872, and made his first appearance on May 13, at the Philharmonic, where he was favourably received in songs of Mozart, Riedel and Rubinstein. He also sang at the Crystal Palace, etc. He retired in 1887, but continued to sing in concert, and took part in a performance of Bach's 'St. Matthew Passion' by the Gesellschaft der Musikfreunde under Richter in 1890. His daughter MINNA, a pupil of Madame Marchesi, had a successful career in various cities (Vienna, Frankfurt, etc.).

A. C.

WALTER, (1) IGNAZ (b. Radowitz, Bohemia, 1759; d. Ratisbon, Apr. 1832), a famous tenor singer and composer; pupil of Starzer, Vienna. He sang at Prague (1783), Mainz (1789), and in Grossmann's Company at Hanover (1793). After the death of Grossmann he took over the company which appeared at Frankfort-on-M. and at Ratisbon. Walter wrote about a dozen Singspiele for his troupe, the first 'Faust' opera based on Goethe's drama, a memorial music for Schiller, a coronation cantata for the Emperor Leopold (1791), masses, chamber music, etc. His wife (2) JULIANE, née ROBERTS, of Brunswick, was also a noted singer, who held her own even by the side of the famous Mme. Schick at Mainz. While Walter was managing the theatre at Bremen his wife became blind, and both went to Ratisbon, where Walter was engaged with his troupe in 1804, and lived there in retirement from 1822 (Schilling; *Q.-L.*).

WALTER, JOHN, organist of Eton College at the end of the 17th century, composed an

¹ Hawkins, I. 218.

anthem in MS. at Ely, and a psalm, 'O give thanks,' in the Fitzwilliam Museum, Cambridge. He was the first music-master of John Weldon.

W. H. H.

WALTHER, JOHANN (b. Cola, Thuringia,¹ 1496; d. before Apr. 24, 1570), Luther's friend, and one of the earliest of the composers in the Lutheran Church. In 1524 he was bass singer in the choir at Torgau, and in the following year Kapellmeister, or 'Sängermeister,' to the Elector of Saxony. In 1548 he was sent to Dresden to organise and lead a choir of singers for Moritz of Saxony, and remained till 1554, when he returned with a pension to Torgau, and there lived till his death.

In 1524 he was called to Wittenberg by Luther to assist him in framing the German Mass. The result of this was his 'Geystlich Gesangk Buchleyn' for four voices (1524), the earliest Protestant hymn-book. His other works are 'Cantio septem vocum,' etc. (1544); 'Ein gar schöner geistlicher und christlicher Bergkreyen' (1552); 'Magnificat octo tonorum' (1557); 'Ein neues christliches Lied' (1561); 'Das christlich Kinderlied Dr. Martin Luthers, Erhalt uns Herr bei Deinem Wort . . . mit etlichen lateinischen und deutschen Sängen gemehret' (1566). Other pieces are included in the collections of Rhaw and Forster, 'Montan-Neubers Psalmenwerk,' 1538, and 'Motettensammlung,' 1540. Poems appeared in 1538 and 1564. (See Q.-L.) G.

Some instrumental compositions discovered (1912) in the library of the Thomasschule at Leipzig will be published in D.D.T. (Riemann).

BIBL.—ROBERT HAAS, *Zu Walthers Choralpassion nach Matthäus. A.M.Z. Jan. 1922, pp. 24-47*; ADOLF ASER, *Die Pflege der Musik unter den Wettinern*, 1922. Aber produces evidence to show that Walther was the real founder of the musical liturgy of the Lutheran church.

WALTHER, (1) JOHANN GOTTFRIED (b. Erfurt, Sept. 18, 1684; d. Weimar, Mar. 23, 1748), a very skilful contrapuntist² and famous musical lexicographer. He was a pupil of Jacob Adlung and J. Bernhard Bach in 1702; became in 1702 organist of the Thomaskirche at Erfurt, and July 29, 1707, town organist of Weimar (in succession to Heintze) and teacher of the son and daughter of the Grand Duke; and in 1720 'Hofmusicus.' Walther was a relative of J. S. Bach, and during Bach's residence in Weimar (1708-14) they became very intimate, and Bach was godfather to his eldest son. The meagre notice of Bach in Walther's *Lexicon* seems to show that the intimacy did not last. Mattheson's judgment of Walther, in his *Ehrenpforte*, is a very high one; he regards him as 'a second Pachelbel, if not in art the first.' In the arrangement and variation of chorales on the organ he certainly stands next to Bach himself. An anecdote preserved by one of Bach's sons shows that he was once able to puzzle even that great player.³

He printed the following pieces: clavier concerto without accompaniment (1741); prelude and fugue (1741); four chorales with variations; and a mass of compositions remains in MS. in the Berlin library and elsewhere. (See Q.-L.)

But Walther's most lasting work is his Dictionary—*Musicalisches Lexicon oder musicalische Bibliothek* (Leipzig, 1732), the first to combine biography and musical subjects, a work of great accuracy and merit and the ground-work to many a subsequent one. (See DICTIONARIES OF MUSIC.) This work was the production of his leisure hours only. He published a first sketch, of 68 pages, in 1728, under the title of *Alte und neue musicalische Bibliothek oder musicalisches Lexikon*. Walther had prepared elaborate corrections and additions for a second edition of his great work, and after his death they were used by GERBER (q.v.) in the preparation of his *Lexicon*. They ultimately came into the possession of the Gesellschaft der Musikfreunde at Vienna. G.

(2) JOHANN CHRISTOPH (b. Weimar, July 8, 1715; d. there, Aug. 25, 1771), son of the above, music director and organist of the cathedral at Ulm (1751-70), published three sonatas for clavier, 1766. (Riemann.)

WALTHER, JOHANN JAKOB (b. Witterda, near Erfurt, Thuringia, 1650), violinist and composer, styles himself on the title of one of his works 'Italian Secretary to the Elector of Mainz.' We find him first as a member of the band of the Elector of Saxony at Dresden, and later on attached to the court of the Elector of Mainz. The place and date of his death are unknown. Two sets of violin compositions of his have been preserved:

1. Scherz da Violino solo, con il Basso Continuo per l'Organo o Cimbalo, accompagnabile anche con una Viola o Leuto, di Giovanni Giacomo Walther, Primo Violinista di Camera di sua Altezza Eletorale di Sassonia MDCLXXVI.

2. Hortulus Chellens, unli Violino, duabus, tribus et quatuor subinde chordis simul sonantibus harmonice modulanti. Studiosa varietate consitus a Johanne Jacobo Walthero, Eminentiss. Celest. Elector. Maguntin. Secretario Italico. Maguntiae, sumptibus Lud. Bourgeat. Academi. Bibliopol. 1688.

The musical interest of these compositions is but small. They consist chiefly of short preludes, pieces in dance-forms (gavottes, sarabandes, etc.) and sets of variations. In some respects they remind us of the works of Farina, who was his predecessor at Dresden. Like Farina he appears fond of realistic tone-pictures—he imitates the cuckoo, the nightingale, the crowing of the cock and other sounds of nature. In a set of variations we meet with imitations of the guitar by pizzicatos, of pipes by passages going up to the sixth position on the first string, of the trumpet by fanfares on the fourth string; farther on he introduces echo-effects, the lyre, the harp, and winds up with a 'Coro' in full chords. Besides these childish efforts, it is true, we find some more serious pieces, which, as far as invention, harmonic and metrical treatment go, are decidedly an advance on

¹ According to his tombstone.

² See the instances given by Spitta, *Bach* (Engl. transl.), II. 384.

³ *Ibid.* II. 388.

Farina's style. Walther's importance for the history of the development of violin-playing consists exclusively in the advanced claims his writings make on execution. He ascends to the sixth position, frequently employs difficult double-stoppings and uses a variety of bowing. (See VIOLIN-PLAYING.) P. D.

WALTHER, RICHARD HENRY (b. London, Nov. 4, 1872), was for some time a pupil of the G.S.M., and in 1890 gained an open scholarship at the R.C.M., where he studied for the following four years under Parry. A setting of Browning's 'Pied Piper,' for soli, chorus and orchestra, was performed by the Highbury Philharmonic Society in 1893 with great success; it was afterwards repeated at the Crystal Palace and elsewhere. In 1894 he introduced a pianoforte concerto of his own at a concert given by the Strolling Players at Queen's Hall; various orchestral works were performed by the Stock Exchange Orchestral Society. He was musical director of the Passmore Edwards Settlement for five years (1900-04). In 1907 he was appointed music professor at Queen's College, later became conductor of the University College Musical Society, and in 1905 conductor of the Operatic Class at the G.S.M., where he raised the level of performances to a remarkable degree of efficiency. In 1909 he became conductor of the South Place Orchestra, Finsbury; and the SOUTH PLACE CONCERTS (*q.v.*), at which his chamber music, the most important class of his compositions, has been constantly played, owe much to his interest and guidance, and to his well-written programme notes. His cantatas, especially the 'Pied Piper,' have been popular with choral societies of the smaller kind. Most of his major compositions are in MS. The following is a list of the chief among them:

ORCHESTRA

Variations in B flat.
Overture, 'Friend Fritz.'
Overture and Entr'actes to 'Aladdin.'
Three 'Night Scenes.'
Concerto in E flat. PF. and orch.
Caprice Improptu. Vin. and orch.

CHAMBER MUSIC

Trio in C min. PF., vin. and clar. (or via.).
Trio in G. PF., vin., vcl.
Quintet in F min. PF. and strings.
Quartet in G min. PF. and strings.
String Quartets in E, B flat and E flat.
Six Lyrical Pieces for string quartet.
Sonata in A flat. Vin. and PF.
Prelude, Sarabande and Fugue for string trio.
Quintet. PF., vin., vcl., v'cl., double bass. (Stainer & Bell.)
Prelude and Fugue. 2 clar. and bassoon (v'cl.).
Five Diversions for string trio.
Quintet. Clar. and strings.
Sonata. V'cl. and PF.
Serenade Sonata. Vin. and PF.

VOCAL

Operettas: 'The Enchanted Island'; 'The Gardeners.'
Cantatas: 'Ode to a Nightingale' (Keats); 'The Pied Piper' (Browning); 'The Fair Maid of February'; 'John o' Dreams.'
Many songs, duets, vocal quartets and part-songs. (See *B.M.S. Ann.*, 1920.) M., with addns.

WALTON, WILLIAM TURNER (b. Oldham, Lancashire, Mar. 29, 1902), entered Christ Church Cathedral Choir School at Oxford, and subsequently became an undergraduate of Christ Church. He studied for a time with

Sir Hugh Allen, but from the age of 16 he has been self-taught, save that he received helpful advice at various times from Ansermet and from Busoni.

As a composer he first became known in 1923 through two works of very different character. The first was a string quartet, which the jury of the INTERNATIONAL SOCIETY FOR CONTEMPORARY MUSIC selected from many works submitted for the annual Festival at Salzburg in August. The other work, entitled 'Façade,' was a setting of a number of poems by Edith Sitwell. The mode of presentation was that the platform was divided from the auditorium by a curtain painted to represent a mask, the mouth of which was the orifice of a megaphone. Through this the concealed reciter (in the first instance Miss Sitwell herself) spoke the verses in a strict rhythm, the patterns of which had a close affinity with those of music. For instance, one entitled 'Hornpipe' is spoken in the rhythm of the familiar nautical type of hornpipe. To these poems Walton wrote an accompaniment to be played behind the curtain by trumpet, flute, clarinet, saxophone, violoncello and percussion. After several performances in private, 'Façade' was presented in this form at the Aeolian Hall, June 12, 1923. Since then it has been completely revised, and again performed in 1926. The composer has also arranged an orchestral suite for concert use, in which form it is in the repertory of the Diaghilev Ballet as an Interlude. In 1924 the Carnegie Trust recommended the publication of an earlier work, the quartet for strings and pianoforte written when the composer was sixteen years old, and giving little indication of the course his development would take. In 1925 Walton composed an overture, 'Portsmouth Point,' which again found favour with the jury of the International Society for Contemporary Music, and was performed at the Zürich Festival of 1926, where it met with warm appreciation. In the autumn of the same year a new composition for chamber orchestra, entitled 'Siesta,' was included in the programme of the Guy Warrack concerts at the Aeolian Hall. Of these various works it is 'Façade' which has attracted the most attention, because of its novelty. The spirit it breathes is wholly different from that of the string quartet, a work of deep seriousness, concluding with a very elaborate fugue. The thoroughness with which the ideas are worked out gives it an excessive length, but the skill displayed, and also a certain affinity with modes of thought current on the Continent obviously swayed the International Jury to a decision which caused some surprise in musical circles at home, Walton's name then being unknown. 'Portsmouth Point' was given as an interlude during the Diaghilev

season at His Majesty's Theatre in the summer of 1926.

LIST OF WORKS

1918. Quartet FF. and strings. (Carnegie Trust, 1924.)
 1920. 'The Passionate Shepherd,' tenor and small orchestra.
 1921. 'Dr. Syntax,' pedagogic overture, orchestra.
 1922. String quartet. (International Feet, Salzburg, 1923.)
 1923. 'Pagade,' declamation, fl., clar., saxophone, trumpet, v'cl. and percussion. (Rev. 1926; also orchestral suite from same.)
 1924. Toccata, vin. and PF.
 1924. Ecclési Comedies, voice and PF.
 1925. Overture 'Porthsmouth Point.' (International Feet., Zürich, 1926.)
 1926. Siesta, for chamber orchestra.
 Two songs, 'The Winds' and 'Tritons.'
 Some of the above works are in course of publication by the Oxford University Press. E. E.

WALTZ (Fr. *valse*; Ger. *Walzer*; Ital. *valzer*). The origin of the Waltz is wrapped in even more obscurity than is usually the case with the best-known dances. The immense popularity which it achieved in the 19th century—a popularity which had the effect of almost banishing every other dance—has given rise to a dispute as to the historical genesis of the waltz, into which national antipathies have to a certain extent entered. It would have been thought that French writers could not ignore the evidence of a German origin given by the name *waltz*, derived from *walzen*, to turn; but in the face of the etymology of the word an ingenious theory has been invented by which it is sought to prove that the dance and the name were originally borrowed by Germany from France, and then reintroduced, as a foreign invention, from the former to the latter country.

This theory apparently was first propounded by Castil Blaze, and was adopted by Fétis, Littré and Larousse. The French account of the origin of the waltz is that the dance is a descendant of the *VOLTA* (*q.v.*)—known to the Elizabethans as *Lavolta*—a dance described by Thoinot Arbeau in his *Orchésographie*, and said to have been a native of Provence, whence it was introduced into Paris under Louis VII. It remained in fashion up to the 16th century, at which period it was (according to Larousse) introduced into Germany, the name *Volta* being changed into *Waltzer*. The obvious Italian origin of the word 'volta' has been overlooked by the French writers. The German authorities, on the other hand, trace the waltz back to the *Drehtanz*, or turning dance, a modification of the old form of dances which (like the English country dances) were danced by couples standing face to face, or holding one another by one hand only.

Great confusion exists in the German accounts of these early dances. The *Volta*, the *Langaus* and the *Allemande* are all mentioned as being the ancestors of the waltz, but none of these seems to be satisfactorily connected with the modern dance. That the *volta* and the *spring-tanz* were identical seems pretty certain: in both the indecency of the performance seems to have been a characteristic feature, as a comparison of the descriptions in Thoinot Arbeau's *Orchésographie* and Johann von Münster's

Traktat vom ungottseligen Tanz (1594) clearly shows; but this feature is different from that which was held up to reprobation in the waltz in later days by Lord Byron and other English writers on its introduction into England. The German dances, like the French, in the 15th and 16th centuries, were either of a solemn and slow character, or consisted in unseemly leaping and jumpings; as Chapman in his *Alphonsus Emperor of Germany* makes one of his characters say:

'We Germans have no changes in our dances,
 An Almian and an upspring that is all.'

In course of time the latter became so objectionable that it was not only preached and written against, but was made the subject of local edicts, notably in the towns of Nuremberg, Amberg and Meissen. The Almian or Allemande was introduced into France after the conquest of Alsace by Louis XIV., but the dance had nothing in common with the modern waltz, and the *spring-tanz*, which, as has been mentioned, was identical with the *volta*, no longer occurs in the 17th and 18th centuries. This break in the imaginary genealogy of the waltz has not been made clear by the writers who have treated the subject.

It is generally admitted that the modern dance first made its appearance about the year 1780, and the only attempt at connecting the old and the new dances is the suggestion that because the song 'Ach du lieber Augustin' (which was one of the first tunes to which waltzes were danced) was addressed to a wandering musician who lived in 1670, therefore the modern dance was contemporary with the tune. The attempts at tracing the waltz from such a widely spread dance as the *volta* or *spring-tanz* have led to further confusion with regard to the humble Ländler or Schleifer, which is its real ancestor. That it springs from a class of country dances, and not from the ancient stock of the *volta*, must be obvious upon many grounds. The dance itself is first heard of in Bohemia, Austria and Bavaria in the latter part of the 18th century; in Bohemia it seems first to have become fashionable, since on Mar. 18, 1785, it was forbidden by an Imperial edict as 'sowohl der Gesundheit schädlich, als auch der Sünden halber sehr gefährlich,' in spite of which it found its way to Vienna, and was danced in the finale to Act ii. of Vicente Martin y Solar's 'Una cosa rara' by four of the principal characters (Lubino, Tita, Chita and Lilla). On its first appearance in Vienna the music of the waltz was played quite slowly; the tempo in Martin's opera is marked *Andante con moto*, but in Vienna the character of the dance was changed, and a *Geschwindwalzer* was introduced which finally led to a *Galoppwalzer* in 2-4 time. But in spite of the changes that the dance underwent, what it was originally like can still be seen

at any Austrian or Bavarian village festival at the present day, where it will be found, perhaps called a *Ländler* or *Schleifer*, or some other local name, but still danced to the old slow rhythms which were imitated by Mozart, Beethoven and (to a less degree) Schubert in their waltzes written for the Viennese in the early days of the dance's fashionable career. Crabb Robinson's account of the manner in which he saw it danced at Frankfort in 1800 agrees with the descriptions of the dance when it found its way to England.

'The man places the palms of his hands gently against the sides of his partner, not far from the armpits. His partner does the same, and instantly with as much velocity as possible they turn round, and at the same time gradually glide round the room.'¹

In England the name and the tune of the dance made their first appearance about the year 1791. In that year an advertisement appeared, on another piece of music, of 'Four favourite Waltzes for 1791' and 'Four favourite Schleifers for 1792.' About 1795-1800 a number of waltzes were published (a collection is in the *Brit. Mus.*, g. 231). The collection of Preston's Country Dances published in 1797 contains 'The new German Waltz' and 'The Princess of Wales's Waltz,' both of which are real waltz tunes, though how different the dances were may be gathered from the directions for dancing the former :

'Set and hands across and back again, lead down the middle up again to the top, turn your partner with the right hand quite round, then with the left, hands 4 round at bottom right and left.'

The same collection also contains a dance called 'Miss Simpson's Waltz,' the tune of which is written in common time. It was not until 1812 that the dance in its modern form made its appearance in England, when it was greeted with a storm of abuse as 'a fiend of German birth,' 'destitute of grace, delicacy and propriety,' a 'disgusting practice,' and called forth a savage attack from Lord Byron.² In spite of this reception it seems to have won a speedy victory. In France the waltz made its appearance during the war with Germany (1792-1801), which ended with the Peace of Lunéville, after which it was said that the Germans had ceded even their national dance to the French. It was first danced at the Opéra in Gardel's ballet 'La Dansomanie' (1800), for which Méhul wrote the music. Beyond the changes introduced in Vienna by Schubert, Strauss, etc., and adopted all over Europe, the form of the dance has not undergone any material alteration in France, though it was probably there that the misnamed 'Valse à deux temps' (i.e. a faster form of the dance, containing six steps to every two of the waltz 'à trois temps') was first introduced towards the middle of the century.

The music of the waltz originally consisted of

two sections, each consisting of 8 bars in 3-4 or 3-8 time. Good examples of these primitive forms will be found in Beethoven's and Mozart's *Deutsche Tänze*. The next development of the music was the stringing together of several of the 16-bar waltzes and the addition of trios and a coda. This was first effected by Hummel in a waltz in 9 numbers, which he wrote in 1808 for the opening of the Apollo Saal in Vienna, but this isolated example cannot have had much influence upon the development of the waltz, since it is not until the time of Schubert that it possesses any intrinsic musical value. The dances of this composer form really the basis of the later waltz music. Though in the main they adhere to the old 16-bar form, yet the beginnings of development are apparent in them, not only in their immense musical superiority to any of their predecessors, but also in the numerous extensions and improvements of the original form which are to be found in them, and which have since become the commonplaces of every writer of dance music. For instance, in op. 96, Waltz No. 15, instead of having an 8-bar phrase repeated in each section, has two sections of 16 bars each. The next number (16) has two introductory bars of bass solo before the 16-bar melody begins—a device which is nowadays too familiar to be noticed, though when Schubert wrote, it was probably absolutely novel. A careful analysis of these beautiful compositions would probably reveal many such points of departure; indeed, in comparing them with the works of his contemporaries, such as LANNER and the elder STRAUSS (*q.v.*), it is extraordinary to find how Schubert anticipated their effects.

But if Schubert had so great an influence on the Viennese school of dance composers, it is to Weber that the waltz owes what, musically speaking, is its most important development. The composition of the 'Auforderung zum Tanz' marks the adoption of the waltz-form into the sphere of absolute music, and prepared the way for the stream of pianoforte and vocal waltzes, not intended as accompaniments to dancing, the best examples of which are the waltzes of Chopin and Rubinstein, though this form of composition has been adopted by most writers of 'brilliant' music. The waltzes of Brahms, Kiel and other German composers of the same generation belong more to the Schubert type. Brahms indeed may be said to have introduced a new class in his 'Liebeslieder' for pianoforte duet and vocal quartet; but the original type of these is the same as Schubert's dances.

In the early part of the 19th century the composition of waltzes for dancing was almost entirely in the hands of the Viennese composers. Johann Strauss the elder introduced the habit of giving names to waltzes, and it was at Vienna,

¹ *Diary*, 1. 76.

² 'The Waltz: an apostrophic hymn,' published 1818.

under the Strauss family, Lanner, Labitzky and Gung'l, that the waltz became fixed in the form in which we now know it, i.e. an introduction generally in a slow tempo, foreshadowing the principal motive of the composition, and followed by five or six separate waltzes ending with a coda recapitulating the best numbers. Vienna has, moreover, always preserved the tradition of playing what a modern writer aptly describes as 'those irresistible waltzes that first catch the ear, and then curl round the heart, till on a sudden they invade and will have the legs.' France has produced a few good waltzes, but more for operatic or vocal purposes than for dancing, while England is very far below either country in compositions of this kind. W. B. S.

WALTZ, GUSTAVUS, a German, who seems to have acted as Handel's cook, and after some time to have come out as a singer. He appeared¹ as Polyphemus in Handel's 'Acis and Galatea,' when it was performed as an 'English Pastoral Opera,' under Arne, at the 'new English theatre in the Haymarket,' May 17, 1732, showing that his voice was a large bass. Seven years later (1739) he and Reinhold sang 'The Lord is a man of war' at the performance of 'Israel in Egypt,' their names being pencilled by Handel over the duet. He also sang Abinoam in 'Deborah,' Abner in 'Athaliah,' and Saul, on the production of those oratorios. His portrait was painted by Hauck and engraved by Müller. He is seated with a violoncello, a pipe and a pot of beer on the table beside him. It belonged to the late Mr. J. W. Taphouse, of Oxford, and was exhibited in the Loan Collection of the Inventions Exhibition, 1885.

Handel, on one occasion, speaking to Mrs. Cibber, said of Gluck: 'He knows no more of contrapunta than my cook Waltz.' This very impolite speech is often misquoted,² and given as if Handel had said 'no more music'; but its force as uttered is very much altered when we recollect that Gluck was no contrapuntist, and that Waltz must have been a considerable musician to take such parts as he did at Handel's own choice. G.

WAMSLEY (WALMSLEY; WARMSLEY), PETER, one of the best English luthiers of the 18th century. (See VIOLIN FAMILY.) He worked in London from about 1720-60, becoming renowned for his excellent violoncellos and altos, which he made upon the Stainer model. His workshop was in Piccadilly in 1727, at 'Ye Golden Harp,' a sign that was subsequently changed to 'The Harp and Hautboy.' He used a yellowish-brown varnish, and often drew lines round his instruments, after the manner of Jacobs of Amsterdam, instead of inlaying purfling. Wamsley sought

to age his instruments artificially by making the plates too thin, and the wood he employed has consequently not always lasted well.

E. H.-A.

In 1741 his business in Piccadilly was carried on by Mrs. Walmsley,³ which points to Peter being dead. His name as 'P. Warmaley at Ye Harp in Piccadilly' is on the imprint of 'The Songs in Hurlrothumbo' (1729). In 1741 De Fesch's 'Eight Concertos' are advertised as sold by him. He appears to have been in business relations with John Barrett, who worked at the Harp and Crown, also in Piccadilly, as a violin-maker and music-seller at a contemporary date; also with William Smith the music-engraver, as the three names are frequently conjoined on imprints of works issued about 1720-30.

It is stated that Walmsley was succeeded at the 'Harp and Hautboy' by Thomas Smith, a pupil, some of whose labels bear the date 1756. F. K.

WANHAL (in English publications VAN-HALL), JOHN BAPTIST (b. Nechanicz, Bohemia, May 12, 1739; d. Vienna, Aug. 26, 1813), a contemporary of Haydn, was of Dutch extraction. His instructors were two local worthies, Kozák and Erban, and his first instruments the organ and violin. His early years were passed in little Bohemian towns near the place of his birth. At one of these he met a good musician, who advised him to stick to the violin, and also to write for it; both which he did with great assiduity. In 1760 he was taken to Vienna by the Countess Schaffgotsch, and here his real progress began; he studied under Dittersdorf, read all the works he could get at, played incessantly, composed with great enthusiasm and what was then thought extravagance, and was soon taken up by many of the nobility. One of these, the Freiherr Riesch, sent him to Italy for a long journey, of which he took full advantage. On his return to Vienna he fell into a state of mental depression, which for some time affected him greatly. It was thus that Burney found him in 1772.⁴ Life in Vienna then was very much what it was fifty years later, and Wanhal's existence was passed, like Beethoven's or Schubert's, in incessant work, varied by visits to Hungary or Croatia, where the Count Erdödy, the immediate predecessor of Beethoven's friend, received him. Though somewhat younger than Haydn, his music arrived in England first. Burney mentions this fact⁵ and speaks of his symphonies as 'spirited, natural and unaffected,' and of the quartets and other music for violins of this excellent composer as 'deserving a place among the first productions in which unity of melody, pleasing harmony and a free and manly style are constantly preserved.'

¹ He had previously sung in Lampe's 'Amelia,' Mar. 13, 1732.

W. H. G. F.

² As, for instance, by Berlioz in his *Autobiography*, chap. xx.

³ Old newspaper advt.

⁴ *Present State*, etc. p. 358.

⁵ *Hist. lit.* 599.

Burney's expressions about Haydn in the next paragraph show, however, how far higher he placed him than Wanhal or any other composer of that time. It would seem, from the fact that some of his compositions were published at Cambridge, that he may have visited England. Further information concerning such a visit is not forthcoming.

The list of his works is enormous. Dlabacz, the author of the Dictionary of Bohemian Musicians, gives no less than 100 symphonies, 100 string quartets, 25 masses and 2 Requiems, 30 *Salve Reginas* and 36 offertories, 1 *Stabat Mater*, 1 oratorio, 2 operas, and many other works. (See list in *Q.-L.*) Many of the symphonies and sonatas were produced a dozen at a time, a practice to which Beethoven gave the death-blow. They must not therefore be judged of from too serious a point of view.

G.

WANLESS, (1) JOHN (late 16th and early 17th cent.), English organist and composer of church music, possibly the father of Thomas (2). He was organist of Lincoln Cathedral in 1616, and was still there in some capacity in 1625, when the Gate House Chambers in Vicar's Court were assigned to him at a rent of 10s. per annum (*West's Cath. Org.*). An anthem by him, 'Plead thou my cause,' is in Tenb. O.B./453, and he was possibly also the composer of the funeral anthem, 'I am the Resurrection.'

J. M^c.

(2) THOMAS, Mus.B. (*d.* 1721¹), English organist and composer of church music, possibly the son of John (1). If, as seems likely, he is the same as the 'Thomas Wanlesse' who was summoned to appear before the 'Corporation for regulating the Art and Science of Music' in 1663, he must have died an old man, and was probably born some time about, or most probably before, 1640. Under the date Feb. 3, 1663, there is the following reference to him in the minutes of the Corporation (Harl. MS. 1911/2):

'Ordered by the Marshall, Wardens and Assistants of the Art and Science of Musique that Joseph Gallaway, John Howard, Thomas Wanlesse and Thomas (?) be and are heareby fined for their non appearance upon sumons three pounds each person.'

(Signed) HENRY COOKE, Deputy Marshall.'

He was appointed organist of York Minster, Apr. 18, 1691, and is described in the Chapter books there as 'in musicis experium.' He held this post until 1715, when he was succeeded by Charles Murgatroyd (*West's Cath. Org.*). He graduated in 1698, and a 3-part verse anthem with instrumental accompaniment, *Awake up, my glory*, in the Tudway collection (Harl. MS. 7341/129) is described as 'compos'd by Tho. Wanless, Organist of York, for his Batchelour of Musick's Degree, in Cambridge.' The score of another anthem, 'I am the Resur-

rection,' from a Funeral Service, is also in the British Museum (Add. MSS. 17,820/107b) and is referred to simply as by 'Wanless.' This probably is by Thomas, although it may be the work of his father. In 1703 he published at York a collection of the words of anthems sung in the Minster, and the year previously had published at London a psalter as below:

¹ The Metre Psalm-tunes in 4 parts. Compos'd for the use of the Parish Church of St. Michael's of Belfrey's in York. . . . J. Heptinstall, for Thomas Baxter: London, 1702.

He was also the composer of the 4-part 'York Litany,' no two versions of which agree. Jebb printed three in his 'Choral Responses and Litanies' (1846), and there is another in R.C.M. 813/104.

J. M^c.

WANNENMACHER, JOHANNES (*d.* Interlaken, c. 1551), whose surname is also Latinised into Vannius, was of Swiss descent. In 1510 he was living in Berne, when he was elected cantor by the Canons of the Collegiate foundation of St. Vincent. His duties were to conduct the choir, to maintain and instruct the choir boys, and to provide new compositions for the church. He was then in Orders and was required to say Mass there three or four times a week. A trivial dispute induced him to leave Berne, and in 1514 he was canon and cantor of St. Nicolas at Freiburg in Breisgau. Here he joined a circle of Humanist scholars, and made the acquaintance of Glarean, who highly esteemed him as a musician. In 1519, for some reason unknown, he secretly left Freiburg to offer his services to Cardinal Schinner, Bishop of Sion (Sitten), but was persuaded to return to Freiburg. Afterwards, coming under the influence of the reformer Zwingli, with whom he entered into correspondence, he imbibed the reforming opinions, and in 1530 publicly renounced Catholicism, which led to his being imprisoned and subjected to the torture of the rack; he was ultimately banished from the place. He took refuge in Berne, which had embraced protestantism, but no longer finding there any prospect of a musical appointment, was fain to accept in 1531 the position of town clerk at Interlaken, which was offered him, where he remained till his death.

Wannenmacher was a composer of some consequence, though he has left few works behind him. Glarean in his *Dodecachordon* has inserted as a good example of polyphonic composition in the Hypomixolydian mode a considerable motet a 4 in two parts by Wannenmacher, 'Attendite, populus meus,' which he says was publicly performed in 1516 at Freiburg, and greatly pleased the cultured people of the place; meaning, no doubt, the Humanist scholars then living there and their sympathisers. He seems also to hint at the motet having had a political significance, the words selected from various Psalms being intended as a dissuasive to the Swiss from entering into any

¹ C. F. Abdy Williams, *Degrees in Music*.

alliance with Francis I. of France. A still more important work by Wannenmacher is his setting of Wolfgang Dachstein's metrical version of the 137th Psalm, 'An Wasserflüssen Babylon,' in five divisions a 3-6, which appeared in Ott's 'Liederbuch' of 1544. This piece alone enables us to form a very favourable judgment of Wannenmacher's merits as a polyphonic composer. After his death there was published a small collection of German songs, sacred and secular, a 2, under the title 'Bicinia sive duo Germanica ad aequales. . . . Berne, 1553.'

J. R. M.

WANNINGUS, JOHANN (b. Kampen, Overijssel, 16th cent.; d. c. 1604), Kapellmeister at St. Mary's church, Danzig, 1580-90; pensioned in 1602. He composed *Sacrae cantiones* 5-8 v. (1580); two books '*Sententiae insigniores*,' etc., motets on texts from the gospels, 5, 6 and 7 v. (1584 and 1590); *Sacrae cantiones*, 5 and 6 v. in MS.; a 5-part mass, 7-part Jubilate, and motets in organ-tablature; five *Sententiae* in score, edited by Eitner in *Annals of the Netherlandish Society for Musical History* (1878) (Q.-L.).

WANSKI, JEAN NÉPOMUCÈNE (b. Grand Duchy of Pœ, beginning of 19th cent.; d. ? Aix, Provence), a Polish violinist and composer, son of Jean Wanski (b. 1762; d. after 1800), also a composer and violinist, who gained a great popularity in his own country at the end of the 18th century as a writer of national songs, polonaises, mazurkas and military marches.

The younger Wanski was educated at Kalisz and Warsaw, and leaving Poland for Paris, became a pupil of Baillot. His studies completed, and being gifted with a considerable talent, he toured in Spain, France, Italy and Sicily. Extending his travels as far as Malta, he returned to France, visiting Florence and Rome on his way. At the latter place he was made a member of the Academy of St. Cecilia. He again toured in France, before visiting Switzerland. The profits accruing from Wanski's voyages were apparently small, and when a severe illness seized him at Saint Gall he was found alone and in a dying condition by a compatriot, Count Alexander Sobanski. Hearing that a fellow-countryman of his was lying in poverty and sickness, the Count sought out the unfortunate artist to render him assistance. In 1839 Wanski settled at Aix, in Provence, where he married a French woman, and gave himself up to teaching and composition. He wrote two '*Méthodes*' for the violin; one for the alto; also *Gymnastique des doigts et de l'archet*, and numerous brilliant studies and pieces for the violin. (Pougin, *Supplement to Fétis's Biog. des Mus.*)

E. H.-A.

WARD, JOHN, published in 1613

'The First Set of English Madrigals To 3. 4. 5. and 6. parts apt both for Viols and Voyces. With a Mourning Song in memory of Prince Henry. Newly

Composed by John Ward. . . . Printed by Thomas Snodham, 1613.'

The work—in six partbooks—is dedicated 'To the Honorable Gentleman, and my very good Maister, Sir Henry Fanshawe, Knight,' and in the dedication the composer tells his patron that

'These . . . are the primitiæ of my Muse, planted in your pleasure, and cherisht by the gentle calme of your Favour.'

Sir Henry Fanshawe (1569 ?-1616), Remembrancer of the Exchequer, of Ware Park, Herts, and Warwick Lane, London, was a personal friend of Prince Henry and a prominent member of the protestant party at the beginning of the 17th century. His daughter-in-law, Anne, Lady Fanshawe, says in her *Memoirs* (1830, p. 42) that he

'was a great lover of music, and kept many gentlemen that were perfectly well qualified both in that and the Italian tongue, in which he spent some time.'

John Ward was evidently one of these gentlemen of the Fanshawe household. He witnessed Sir Henry's will (dated Nov. 13, 1613), by which the testator left to his heir all his musical instruments 'except the greate Wind Instrument in my howse in Warwyck Lane'; and from Lady Fanshawe's will (dated Feb. 20, 1629) it seems that he was a trustee for her jointure, for she states that by deed dated May 20, James I. (1607), she had assigned a lease of the Dengey Hall estate to her son-in-law, her nephew, and her 'ancient servant John Ward gent,' in trust for the uses of her will. On July 8, 1619, Ward was granted the arrears of a rent of £8:6:8 payable to the King out of the Manor of Bengoe, Herts. (Cal. Dom. James I. CIX. Sign. Man. x. No. 19); according to Sir Henry Fanshawe's will this manor had been conveyed to trustees as part of his wife's jointure. Ward was a witness of Lady Fanshawe's will, among the bequests of which are sums of £10 apiece to John Ward and two others, 'three of my feoffees,' and of mourning to John Ward 'and the rest of my own servants.' Apart from his musical compositions this is all that is known of Ward's biography; he must have died before 1641, for in that year John Barnard printed an Evening Service and two Anthems by him in his collection of Church Music, which only contained music by deceased composers.

W. B. S.

The value and importance of Ward's work as a madrigal writer was not realised before the publication of his set of madrigals in *ENG. MADR. SCH.* vol. xix. It is in his writing for five and six voices more especially that he exhibits a definitely individual style, and several of these madrigals are to be placed in the very first rank. 'Die not, fond man' has long been a popular favourite, and deservedly so, but it is by no means the finest of the set. 'If the deep sighs' is a superb and very moving piece of

music; like many of Ward's madrigals it is of great length; especially beautiful is the passage, 'Nor not a river weeps not at my tale.' Another magnificent madrigal is 'I have entreated and I have complained'; the words are by Walter Davison, and the final passage is very beautiful. 'Out from the vale' and 'Upon a bank with roses set' are also first-rate madrigals. A characteristic feature of Ward's work is his use of suspensions; and he also uses passing notes sometimes in a very individual manner; an example of this is to be found at the words 'And die I shall' in 'Flora, fair nymph.' Remarkable examples of Ward's use of suspensions occur in the closing passage of 'Upon a bank'; at the words, 'her cruelty hath lost' in 'Out from the vale'; and at 'with miseries oppress' in 'If the deep sighs.' Very fine massive effects are built up in this manner, and not infrequently six different notes of the scale are simultaneously employed. But suspended discords of all kinds, simple, double and triple are found throughout Ward's madrigals. He showed great taste in selecting words, and seems to have had a special preference for the poems of Sidney and Drayton, and poems by both Walter and Francis Davison are among his madrigals.

Ward wrote a good number of Fantazias for viols, notably those in B.M. Add. MSS. 29,372-7, as well as pieces for the virginals, and a fine collection of Fancies for 4, 5 and 6 viols is at Ch. Ch.¹ Many of the string pieces are attractive, but none have been printed. Compositions by him are to be found in Foster's Virginal Book, B.M. Roy. Lib. (see VIRGINAL MUSIC). Little of Ward's church music is known to-day, yet a fair amount of it has survived. He contributed 'O let me tread' (a 4), and 'O Lord, consider' (a 5) to Leighton's 'Teares or Lamentacions,' and Barnard printed his 'First Evening Service,' and 'I will praise the Lord' and 'Let God arise' in 1641. Appended is a list of his church music in MS.

WARING, WILLIAM, translator of ROUSSEAU'S *Dictionnaire de Musique*—A Complete Dictionary of Music, consisting of a copious explanation of all the words necessary to a true knowledge and understanding of Music.

¹ See Arkwright, *Cat. of Music in Library of Ch. Ch., Oxford*, Part I. (MS. Music), pp. 119, 120, pub. by Oxford Univ. Press.

London, 1770. 8vo. In the 2nd edition (1779) Waring's name as translator was added to the title. g.

WARLOCK, PETER, see HESELTINE.

WARNER, H. WALDO (b. Northampton, Jan. 4, 1874), viola-player and composer. The family moved to London in 1880, but although the boy was passionately fond of music, his training was not seriously taken in hand until he entered the G.S.M. in 1888. He then studied the violin with Alfred Gibson, and composition with R. Orlando Morgan. He won many distinctions, including the associate-ship and gold medal, and was afterwards appointed a professor, but had to relinquish this post in 1920 owing to the touring engagements of the LONDON STRING QUARTET, in which he has played the viola since its foundation in 1907. For some years he also played as principal viola in the New Symphony and Royal Philharmonic orchestras. His first public appearances, however, were as a violinist. As a student he wrote an opera, 'The Royal Vagrants,' which was performed at the G.S.M. Since then he has become best known as a writer of chamber music. His name occurs more than once as prize-winner in the list of compositions in phantasy-form due to the initiative of W. W. COBBETT (q.v.), and as the recipient of a commission to write a specified work. His chamber works include three piano-forte trios, of which one obtained a Cobbett, and another the Coolidge prize of \$1000 in 1921; a string quartet in C minor which was awarded the first prize in the 'War Time' competition of 1916; three phantasies for string quartet, in F, D, and G minor, the third being based on folk-songs in accordance with the terms of the Cobbett competition in which it was a successful entry; a suite, 'The Pixy-Ring,' for string quartet; a rhapsody for viola solo and string quartet; a violin sonata, a viola sonata, numerous short pieces for each instrument and also for violoncello. He has also written several suites for orchestra, one of which, 'Three Elfin Dances' (Elves, Nymphs and Gnomes), has been performed at the Promenade Concerts and elsewhere; and upwards of a hundred songs and partsongs. E. E.

WARNOTS, (1) HENRY (b. Brussels, July 11, 1832; d. Mar. 3, 1893), was taught music first by his father, and in 1849 became a pupil at the Brussels Conservatoire, in harmony, piano-forte-playing and singing. In 1856 he appeared in opera at Liège as a light tenor, and was engaged for a short period at the Opéra-Comique, Paris, as the titular hero of Boieldieu's 'Jean de Paris.' He next sang at Strassburg, and on Jan. 24, 1865, an operetta of his composition, 'Une Heure du mariage,' was performed there. He also composed a patriotic cantata sung at Ghent in 1867, and in that year he was engaged at the National Theatre,

Brussels; in October he sang in Flemish the hero's part in De Miry's 'Franz Ackermann.' In December of the same year he obtained a professorship at the Conservatoire, and retired from the stage. In 1869 he was appointed director of the orchestra of the Brussels City Musical Society, and in 1870 he founded a school of music at St. Josse-ten-Noode-Schaernbeek, a suburb of Brussels. His daughter and pupil,

(2) ELLY (ELISABETH) (b. Liège, 1862) made her début, Sept. 9, 1878, as Anna ('Dame Blanche') at the Théâtre de la Monnaie, Brussels. She sang there for two seasons, and in 1881 she was engaged at the Pergola, Florence; on May 17 of the same year she made her first appearance in England at the Royal Italian Opera as Marguerite de Valois in the 'Huguenots.' During the season she also played the part of the same Queen in Hérold's 'Pré aux Clercs,' and was favourably received. After that she was frequently heard at the Promenade Concerts, at the Crystal Palace, and elsewhere. For some years she was a regular visitor to London.

A. C.

WARREN, JOSEPH (b. London, Mar. 20, 1804; d. Bexley, Kent, Mar. 8, 1881), in early life began the study of the violin, which he gave up for the pianoforte and organ. In 1834 he became organist of St. Mary's (R.C.) Chapel, Chelsea, and composed some masses for its service. He was author of *Hints to Young Composers*, *Hints to Young Organists*, *Guide to Singers*, and other similar works, and editor of Hilton's 'Ayres, or Fa las' for three voices (for the Musical Antiquarian Society), an English version of Beethoven's 'Christus am Ölberge,' Boyce's 'Cathedral Music,' for which he wrote new biographies of the composers, including, in most cases, exhaustive lists of their compositions, and many other works. He also compiled a *Biographical Dictionary of Deceased Musicians*, issued in two parts by R. Cocks & Co. in 1845.

W. H. H.; addns. F. K.

WARREN, THOMAS (d. circa 1794), the editor of a famous collection of Catches and Glees, published annually in oblong folio volumes between 1763 and 1794, in which latter year he probably died. He was Secretary to the Noblemen's and Gentlemen's CATCH CLUB (q.v.) from its foundation in 1761 to 1794, being succeeded by S. Webbe. Warren's collection of 'Catches, Canons and Glees' was begun in 1763, and the volumes were engraved and printed for the editor, by different publishers. It is a valuable work, containing 652 pieces; many of the volumes are of extreme rarity. A selection from its contents, under the title 'Vocal Harmony,' was published by Welcker, who also published Warren's 'Monthly Collection.'

F. K.

WARROCK, THOS., see WARWICK.

WARTEL, (1) PIERRE FRANÇOIS (b. Versailles, Apr. 3, 1806; d. Paris, Aug. 12, 1882). From 1823-28 he was a pupil in Choron's School of Music, and afterwards at the Conservatoire under Banderali and Nourrit, where he obtained a first prize for singing. From 1831-46 he played small tenor parts at the Opéra. He afterwards sang with success in Germany, but on his return to Paris devoted himself entirely to teaching. He was considered one of the best teachers of the day, and among his pupils must be named Christine Nilsson, Trebelli, Mlle. Hisson (Opéra), etc. Wartel has another claim to distinction, as having introduced into France and popularised Schubert's songs. Indeed it was he who drew the attention of the Viennese to them in 1842, at a time when Schubert was completely eclipsed by Proch, Hackel, etc., and an occasional performance of the 'Wanderer' was the only sign of his existence.¹ His wife,

(2) ALDA-THÉRÈSE-ANNETTE, née Adrien (b. July 2, 1814; d. Paris, Nov. 6, 1865), was the daughter of a violinist at the Opéra, and leader of the Conservatoire band. She received instruction in music at the Conservatoire, was appointed accompanist there, and in 1831 obtained a professorship, which she resigned in 1838. She was the first female instrumentalist ever engaged at the Société des Concerts. In 1859 she visited England with her husband, and gave a concert at the house of Mr. Grote, where she played Mendelssohn's Pianoforte Trio in D minor with Joachim and Piatti. She composed Studies and other works, including her Lessons on the Pianoforte Sonatas of Beethoven. Their son,

(3) LOUIS ÉMILE (b. Paris, Mar. 31, 1834), was engaged at the Théâtre Lyrique from 1858-65, and afterwards established a vocal school of his own.

A. C.

WARWICK (WARWICKE, WARROCK), THOMAS. There were probably two musicians of this name, father and son, living in the 16th and 17th centuries. They were descendants of an old Cumberland family whose seat was at Warwick Hall, some four miles from Carlisle. The elder Thomas married Elizabeth, daughter of John Somerville, of Aston Somerville, and by her was the father of Sir Philip Warwick (b. 1609) who was Secretary to the Treasury to Charles II. He succeeded John Bull as organist of Hereford Cathedral in 1586, and held this post until 1589. His name appears among the benefactors to the library of the vicars-choral at Hereford (West's *Cath. Org.*). The younger Thomas (b. beginning of 17th cent.; d. 1660) succeeded Orlando Gibbons as organist of the Chapel Royal. Gibbons died in 1625, but there is no indication of Warwick's appointment until 1630, when, on Mar. 29, he had to forfeit a month's salary

¹ Hanslick, *Concertwesen*, D. 346.

'because he presumed to play verses on the organ at service tyme, being formerly inhibited by the Deane from doinge the same, by reason of his insufficiency for that solemne service.'

In 1641, he appears as musician 'for the Virginal,' and on Nov. 17, 1660, a warrant was issued 'to admit Christopher Gibbons musician upon the virginals in place of Thomas Warwick deceased, with the yearly wages of £86 to be paid quarterly' (H. C. de Lafontaine, *The King's Music*). He contributed a 'Pavano' and 'Galiardo' to the Fitzwilliam Virginal Book, and Thomas Tomkin's madrigal, 'When I observe,' included in his 'Songs of 3, 4, 5 and 6 parts,' 1622, is dedicated to 'Mr. Thomas Warwicke.' He is said by Hawkins to have composed a song in 40 parts performed before Charles I. about 1635, and Anthony Wood refers to him as organist of Westminster Abbey, but this is unsupported by the Abbey records.

ANTHEMS

I lift mine eyes, a 5. Ch. Ch. 56-60. Bass part wanting; Harl. 6343/14. Words only.

I lift my hart up to the hills, a 5. B.M. Add. MSS. 29,366-8. Cantus, bassus and alto parts only.

O God of my salvation, a 5. P.H.; Durh.; Ch. Ch. 56-60. Bass part wanting; B.M. Add. MSS. 30,478-9. Tenor cantoris part only; Harl. 6343/13a. Words only.

J. M^{re}.

WASIELEWSKY, JOSEPH W. VON (b. Gross Leesen, near Dantzig, June 17, 1822; d. Dec. 13, 1896), author, violin-player and conductor. On Apr. 3, 1843, he entered the Conservatorium at Leipzig under Mendelssohn's personal teaching. Other branches he learned under David and Hauptmann, and remained in the Conservatorium till Easter, 1845. He acted as musical critic for the *Signale, Leipziger Zeitung, Dresdener Journale*, etc. He played in the orchestras of the theatre, the Gewandhaus and the Euterpe concerts, till 1850, when he left for Düsseldorf at the invitation of Schumann, and remained there for two years. In May 1852, he removed to Bonn, and became conductor of the Concordia, the Gesangverein and the Beethoven-Verein. After three years he exchanged this for Dresden. In 1869 he was recalled to Bonn as 'town music-director.' He withdrew from this appointment in 1884 and retired to Sondershausen. In 1858 he published his biography of Schumann (2nd and 3rd eds., 1869 and 1880); in 1869 his excellent book on *Die Violine und ihre Meister* (B. & H.), 2nd ed. considerably augmented 1883, 3rd, 1893. In 1874 appeared *Die Violine im xvii. Jahrhundert und die Anfänge der Instrumental-composition* (Bonn), with an interesting collection of 'Instrumentalsätze' by way of supplement to it; *Geschichte der Instrumentalmusik im xvi. Jahrhundert* (1878); *Musikalische Fürsten vom Mittelalter bis zu Beginn des xix. Jahrhunderts* (1879); *Schumanniana* (1883); *Beethoven* (1888); *Das Violoncell und seine Geschichte* (1889); *Karl Reinecke* (1892); *Aus siebzig Jahren* (1897). He contributed much to musical periodicals, and as a composer wrote some partsongs and a nocturne for violin and piano.

He had a decoration from the Duke of Meiningen (1871); and was a royal music-director (1873) and a member of the 'Accademia filarmonica' at Bologna.

G.

WASSERMANN, HEINRICH JOSEPH (b. Schwarzbach, near Fulda, Hesse, Apr. 3, 1791; d. Riehen near Basle, Aug. 1838), violinist-composer. He was the son of a village musician, and studied under cantor Henkel at Fulda, and Spohr at Gotha. He was violinist at the court of Hechingen, Kapellmeister at Zürich, chamber musician at Donaueschingen, Kapellmeister at Geneva, and finally at Basle. He composed three quartets, one with flute; violin duets; dances for orchestra; fantasias and variations for violin and string quartet, also with pianoforte (*Fétis; Mendel*).

WASTE VALVE, a safety valve to organ bellows.

T. E.

WATER CARRIER, THE, the English version of Cherubini's *LES DEUX JOURNÉES*.

WATER MUSIC, THE, a series of instrumental movements composed by HANDEL (*q.v.*).

The Water Music consists of twenty-one movements; the original autograph has disappeared; but two movements undated, and differing considerably from the printed copies, will be found in B.M. Add. MSS. 30,310. The earliest printed edition is that of Walsh, published in 1740.

W. S. R.

WATKIN-MILLS, ROBERT (b. Painswick, Gloucestershire, Mar. 5, 1856), was taught singing by Edwin Holland in London, by Federico Blasco in Milan, and on his return to London by Blume. On May 17, 1884, he made his début at a Crystal Palace concert, and on the 21st he made a single appearance on the stage at Birmingham with the Carl Rosa Company as Baldassare in an English version of 'La Favorita,' and was offered a permanent engagement, which he declined in favour of a concert career. On Jan. 1, 1885, he created a favourable impression at the Albert Hall in the 'Messiah.' On Feb. 14 he first appeared at the Popular Concerts. In the autumn of the same year he sang at the Birmingham Festival in the production of Stanford's 'Three Holy Children,' etc. Thenceforward he became a favourite bass-baritone singer at all the principal concerts and festivals, and after 1894 made several tours in Canada, the United States and Australasia, etc., with the greatest success. He ultimately settled at Toronto, Canada, as a teacher, and with his wife, organist of the Knox Presbyterian Church, established the Watkin-Mills Music Club.

A. C.

WATLEN, JOHN, a composer and music-publisher who proclaimed on many of his title-pages 'Late of the Royal Navy.' He was living in Edinburgh in 1788, and about and before this time was composing sonatas for the harpsichord and programme music. Some of this, of various dates of composition, include 'The Siege of

Toulon,' 'Battle of Trafalgar,' etc. In Edinburgh he was at one time an assistant to Corri & Co., music-publishers, and was a tuner and music-teacher until he opened a music-shop at 17 Princes Street. From this address he published many arrangements and selections of Scottish Songs, including his 'Circus Tunes.' He removed to 13 North Bridge, and this imprint appears on a great number of Scots Songs, either arranged or entirely composed by himself. In 1798 he failed in business and retired to Abbeyhill, a sanctuary from arrest near Holyrood. Here he taught music and issued sundry sheet songs. About 1800 he removed to London, where, in partnership with a person named Cobb, he was again publishing. Cobb and Watlen were at 19 Tavistock Street, Covent Garden, in 1805: in 1807 Watlen had set up business on his own account at 5 Leicester Place, Leicester Square. Watlen was the first secretary of the Edinburgh Musical Fund.

F. K.

WATSON, THOMAS (*d. circa 1592*), put forth in 1590

'The first sett of Italian Madrigalls Englished, not to the sense of the original dittle, but after the affection of the Noate. By Thomas Watson. There are also here inserted two excellent Madrigalls of Master William Byrd's composed after the Italian vaine at the request of the sayd Thomas Watson.'

It is dedicated in a Latin metrical epistle to Robert Devereux, Earl of Essex, and there is also a similar epistle addressed to Luca Marenzio, the celebrated Italian madrigal composer, from whose works twenty-three of the twenty-eight madrigals included in the publication were taken. Watson is conjectured to have been identical with Thomas Watson, a native of London, who after studying poetry for some time at Oxford, returned to London to study law. A collection of sonnets by him entitled *Hecatompithia*, or *Passionate Centurie of Love*, was licensed in 1581, and some poems by him were inserted in *England's Helicon*, 1614.

W. H. H.

WATTS, JOHN, a famous bookseller and printer with whom Benjamin Franklin served as a journeyman, when he was in London. Watts was established in Wild's Court, Lincoln's Inn Fields, before 1726, and in conjunction with Jacob Tonson published plays and miscellaneous works. The introduction of the ballad opera at Lincoln's Inn Fields Theatre brought Watts into brisk trade in the publication of the operas performed there. He published the first and later editions of the 'Beggar's Opera,' 1727-28 (music engraved), and after this practically the whole of the series of ballad operas as they were performed. These editions have the airs for the songs in the operas printed from engraved wood blocks, and are especially valuable for giving the old names of the tunes. They range in date from 1727-39. Another important work in six volumes is 'The Musical Miscellany,' 1729-31. After Watt's death this was reissued with different titles to the volumes ('The Harp,'

'The Spinnet,' 'The Violin,' etc.) by a person named Wren, c. 1750. Some of the operas were also reissued (1765, etc.) by J. and R. Tonson.

F. K.

WAYLETT, HARRIETT (*b. Bath, Feb. 7, 1800; d. Kensington, Apr. 26, 1851*), an actress and soprano singer, principally of ballads of the Vauxhall type. She was the daughter of an upholsterer named Cooke. She became the pupil of one of the Loder family, and made her début on the Bath stage, Mar. 16, 1816, performing in provincial theatres for the next three or four years. At this time she made considerable reputation by her playing and singing in the character of Margery, in the opera 'Love in a Village,' in which she afterwards appeared at Drury Lane. She made her first appearance on a London stage at the Adelphi in October 1820. She had previously (1819) married an actor named Waylett, who proved a very unsuitable husband, and she experienced many misfortunes through her marriage, which ended in separation. In 1826 she married George Alexander Lee, the composer. She appeared at the Dublin Theatre Royal almost every season from 1826-36. In Oct. 1835 she got £800 for a three weeks' engagement.

F. K.; addn. W. H. G. F.

WAYLETT, HENRY, a London music-publisher, established before 1740, at 'The Black Lion' in Exeter Change. He was an extensive publisher of half-sheet songs, collections of songs, tutors, etc. He had the honour of issuing the first edition of 'Rule, Britannia' which formed part of the following publication

'The music in the Judgment of Paris . . . to which (by particular desire of several encouragers of this work) are added the celebrated Ode in Honour of Great Britain, call'd Rule Britannia, and Sawney and Jenny, a favourite dialogue in the Scotch stile, the whole compos'd by Thomas Augustine Arne, opera sexta.'

folio, the patent dated Jan. 29, 1740-41. Waylett also published sets of country dances (one is for 1751), 'The Muses Choice' by Joseph Bryan, two books 1756-58, solos by Thomas Davis, etc. etc. He appears to have been succeeded by Francis Waylett, who at another address ('his music shop opposite Suffolk Street, Pall Mall') reissued publications by the elder Waylett. In 1769 (and probably long before) Richard Bride was established at The Black Lion in Exeter Change, publishing on his own account, and republishing the early Waylett publications.

F. K.

WEALE (WHEALE), WILLIAM (*d. Bedford, 1727*), was organist of St. Paul's, Bedford, from about 1715, and took the degree of Mus.B. at Cambridge in 1719. He deserves mention as the composer of the hymn-tune 'Bedford,' which seems to have equal authenticity in both its versions, in triple and duple time. (*Brit. Mus. Biog.*)

M.

WEAVER, JOHN (*b. Shrewsbury, July 21, 1673; d. there, Sept. 24, 1760*), a dancing

master. In 1706 he published in quarto a translation of Feuillet's *Chorégraphie*, under the title of *Orchesography, or the Art of Dancing by Characters and Demonstrative Figures*. This was the first attempt of the sort in England. A second edition without date appeared some ten years later. In the same year, 1706, he published *A Small Treatise of Time and Cadence in Dancing, reduc'd to an Easy and Exact Method*, consisting of eight quarto pages of text and four of choregraphic examples. He also published a number of dances in the new character with their tunes, but the only one that bears his name is

'The Union, a New Dance compos'd by Mr. Isaac, perform'd at Court on Her Majesty's Birth day, Febr. ye 6th, 1707, and writt down in Characters by John Weaver.'

This is a dance in fifteen couplets engraved on copper plates. Weaver's next literary effort was *An Essay towards an History of Dancing*, 8vo, 1712. This is largely concerned with the Pantomime of the ancient Romans. In speaking of Country Dances he describes them as 'the peculiar growth of this [English] nation; tho' now transplanted into almost all the Courts of Europe.' Before publication he had written a letter to the *Spectator* dated Mar. 19, 1711-12, describing the book, and he managed to get it noticed again on Aug. 25, as 'now ready to be published.'¹ The *History of Dancing* was followed by *Anatomical and Mechanical Lectures upon Dancing*, 8vo, 1721, and this again by

'The History of the Mimes and Pantomimes. To which will be added a List of the Modern Entertainments that have been exhibited on the English Stage, either in Imitation of the ancient Pantomimes, or after the manner of the Modern Italians; when and where first Perform'd, and by whom Compos'd,' 8vo, 1728.

This List of Entertainments is of interest, for in it Weaver claims to have been the first to introduce drama in dumb show on the English stage. He says:

'The first Entertainment that appeared on the English stage, where the Representation and Story was carried on by Dancing, Action and Motion only, was performed in Grotesque Characters, after the manner of the Modern Italians, such as Harlequin, Scaramouch, etc., and was called The Tavern Bilkers. Compos'd by Mr. Weaver, and first performed in Drury Lane Theatre, 1702. The next was many years after, and was an attempt in Imitation of the ancient Pantomimes, and the first of that kind that had appeared since the time of the Roman Emperors, and was called The Loves of Mars and Venus. Compos'd by Mr. Weaver. First perform'd on the theatre in Drury Lane, 1716.'

'The Tavern Bilkers' was played at Drury Lane with Farquhar's 'The Constant Couple' on Oct. 23, 1702. It was revived in conjunction with the same play on Mar. 8, 1715-16, when it is described as 'a mimic night scene, after the Italian manner, as it was performed 14 years ago,' and again at Goodman's Fields on Jan. 13, 1732-33, with Woodward as First Drawer.² Harlequin and Scaramouch had long been known on the English stage as speaking

characters: the novelty consisted in the representation of an entire drama in dumb show.

'The Loves of Mars and Venus' was produced with symphonies by Symonds, and the 'musical airs of the dancing parts' were composed by Firkbank. It was so well received that in the following season Weaver produced 'Orpheus and Eurydice, a Dramatick Entertainment in Dancing after the manner of the ancient Pantomimes,' and in 1719 a similar pantomime entitled 'Cupid and Bacchus.' He did not, however, entirely abandon the modern Italian style, for on Apr. 2, 1717, he produced at Drury Lane 'Perseus and Andromeda, a Burlesque Entertainment in Dancing, in Grotesque Characters,' with Mrs. Bignall as Andromeda. This was played with Beaumont and Fletcher's 'The Humorous Lieutenant.' If one may judge of the piece by a description printed about 1780 it consisted of two distinct plays, each in five interludes, the one serious, representing the classical story of Perseus and Andromeda, the other comic and modern, introducing Harlequin, Columbine, Clown and other characters. Each interlude of the serious was followed by an interlude of the comic play, and in the latter a song of Weaver's beginning 'In London town there lived, well known, a Doctor old and wary,' was sung to the tune of 'Thomas, I cannot.' 'Harlequin turned Judge' was another grotesque pantomime of Weaver's produced in 1717.

In 1719 Weaver seems to have severed his connexion with Drury Lane and to have been succeeded by another dancing master named John Thurmond, but we hear of one other pantomime of his, 'The Judgment of Paris,' produced at Drury Lane on Feb. 6, 1732-33. Pantomimic entertainments in dumb show were just then the favourite diversions of the town: see the *Gentleman's Magazine* for 1732, p. 761.

J. F. R. S.

WEBB, REV. RICHARD, M.A. (*d.* near Windsor, Apr. 13, 1829), a clergyman and musician; author of a valuable collection of 15th- and 16th-century madrigals, 3-6 v. (London, 1808), and another collection of 3, 4 and 5-part madrigals in 1814. He also composed a set of four glees for 3 voices (Brown and Stratton).

E. v. d. s.

WEBB, WILLIAM, a 17th-century English composer. His songs are in John Playford's 'Select Musical Ayres and Dialogues,' 1652; 'Select Ayres,' etc., editions of 1653 and 1659; Hilton's 'Catch that Catch Can' of 1658, and J. Playford's edition of 1667; Playford's 'The Musical Companion,' 1673 (3-part songs), and a three-part song in A.-B. *Philo-Mus. Synopsis of Vocal Musick*, 1680.

E. v. d. s.

WEBBE, (1) SAMUEL (*b.* 1740; ³ *d.* London,

³ He is generally said to have been born in Minorea, but the obituary notice in the *Gentleman's Magazine* of 1816 (quoted in *Mus. T.*, 1897, p. 678) implies that his father died after accepting a government position in Minorea, before his wife and son could join him there.

¹ See *Spectator*, Nos. 334 and 466.

² See Genest, *History of the English Stage*, ii. 254, 576, and iii. 899.

May 25, 1816), was, at 11 years of age, apprenticed to a cabinet-maker, but upon the expiration of his time quitted that calling, and copied music for a livelihood, being employed by Welcker in Soho, through whose instrumentality he had lessons from Barbandt, organist of the Bavarian ambassador's chapel. He also studied the Latin, French and Italian languages, which were afterwards supplemented by German, Greek and Hebrew. He first appeared as a composer about 1763, devoting himself chiefly to the production of unaccompanied vocal music. In 1766 the CATCH CLUB (*q.v.*) awarded him a prize medal for his canon 'O that I had wings,' and in subsequent years twenty-six other medals for the following compositions:

'The man and the woman,' catch, 1767; 'From everlasting,' canon, and 'A generous friendship,' glee, 1768; 'Alzate o porte,' canon, 1770; 'Iddio i quel che mi cingo,' canon, 1771; 'Discord, dire sister,' glee, 1772; 'To the old, long life,' catch, and 'Who can express,' canon, 1774; 'Now I'm prepared,' glee, 1775; 'You gave me your heart,' and 'Tis beauty calls,' glee, 1776; 'Glory be to the Father,' canon, and 'Rise, my joy,' glee, 1777; 'Great Bacchus,' and 'Hall, music,' glee, 1778; 'Neighbours, come,' catch, and 'O all ye works,' canon, 1781; 'My Lady Rantum,' catch, 1782; 'To These all angels,' canon, 1783; 'When youthful Harriet,' catch, and 'The fragrant painting,' glee, 1784; 'O Lord, show Thy mercy,' canon, and 'Swiftly from the mountain's brow,' glee, 1788; 'Juliet is pretty,' catch, and 'Non fidi al mar,' glee, 1790; and 'Tell me,' catch, 1794.

More than half of these compositions are catches and canons, and but three of the glees can be ranked among Webbe's best. His finest works,—his glees 'When winds breathe soft,' 'The mighty conqueror,' 'Come live with me,' 'Thy voice, O Harmony,' 'To me the wanton girls,' and 'Hence, all ye vain delights,' and his catches, 'Dear father, the girl you desire me in marriage,' and 'Would you know my Celia's charms,'—are not to be found in the list of his prize compositions.

On the death of Thomas Warren Horne in 1784 he became secretary to the Catch Club, and held the office until his death. On the establishment of the GLEE CLUB (*q.v.*) in 1787 he became its librarian and wrote and composed for it his glee 'Glorious Apollo,' which during the whole existence of the club enjoyed the distinction of being the first glee performed at every meeting. He was also organist of the chapel of the Sardinian embassy. In the *Laily's Directory* for 1793 (quoted in *The Tablet*, 1817), is an advertisement which supports this statement, and the publication of music used in this chapel, as well as of music used in the Portuguese chapel, seems to imply that he was organist of both. He published in 1792 'A Collection of Motetts or Antiphons,' and 'A Collection of Masses for small choirs,' principally composed by himself. He published at various periods, beginning 1764, nine books of glees, etc., which were subsequently republished with additions in 3 vols. folio. Twenty-five glees, thirty-six catches, and nine canons by him are included in Warren's collections. He also composed several excellent songs, of which 'The Mansion of Peace' en-

joyed a long-continued popularity. Various other publications are mentioned in *Q.-L.* He died at his chambers in Gray's Inn, and was buried in Old St. Pancras churchyard. William Linley wrote an ode upon his death, for the best setting of which a prize was offered. Seven competitors entered the lists, viz. William Beale, Lord Burghersh, James (?) Elliott, C. S. Evans, William Hawes, William Knivett and William Linley; the prize being won by Evans. Webbe stands in the foremost rank of glee-writers, and his works will maintain that position as long as a taste for that style of composition shall endure. As a man he was much beloved and respected for his social virtues.

(2) SAMUEL (*b.* London, c. 1770; *d.* Liverpool, Nov. 25, 1843), his eldest son, studied principally under his father and became a good pianist and organist. Like his father he early devoted himself to the practice of vocal composition, and in 1794 obtained from the Catch Club prizes for a catch, 'Ah Friendship,' and a canon, 'Resonate Jovem,' and in 1795 for a canon, 'Come follow me.' About 1798 he settled in Liverpool, and became organist of the Unitarian Chapel, Paradise Street. About 1817 he returned to London and joined LOGIER (*q.v.*) in teaching on the latter's system, and became organist of the Spanish ambassador's chapel. Some years afterwards he again settled in Liverpool, where he became successively organist of St. Nicholas' Church and of St. Patrick's Roman Catholic Chapel, Toxteth Park. He composed many glees possessing great merit (among which 'Come away, Death' is conspicuous), songs, motets, etc. He edited the collection of glees, etc., entitled 'Convito Armonico.' (See *Q.-L.*)

W. H. H.

WEBBER, AMHERST (*b.* Cannes, Oct. 25, 1867), was educated at Marlborough College, and New College, Oxford, where he took an ordinary and a musical degree. He then went to Dresden to study composition with J. L. Nicodé, and in the winter of 1889-90 was at the Paris Conservatoire under Guiraud. He was engaged as *maestro al piano* for several years at Covent Garden and the Metropolitan Opera-House, New York, and did valuable work in 'coaching' various eminent singers in the Wagner repertory. He composed a symphony, performed by the Philharmonic Orchestra in Warsaw in 1904, and at Boston by the Symphony Orchestra under Gericke in 1905. His one-act comic opera, 'Fiorella,' to a libretto by Sardou, was produced at the Waldorf Theatre, London, June 7, 1905. Various songs in English and French have become popular with the refined singers to whom they appeal. 'Aubade' and 'La Première' are two of the most successful as well as the best.

M.

WEBER. The several members of that family of musicians, of whom Carl Maria, the composer of 'Der Freischütz' and founder of German Romantic Opera was the most outstanding figure, are described below¹ in order according to the following table.

(1) Johann Baptist (*cr. Freiherr*)

(2) Joseph Franz Xaver

(*b. 1786; d. 1826*)

The earliest known member of the family, (1) JOHANN BAPTIST, a man of property in Lower Austria during the latter half of the 16th century, was made *Freiherr* by the Emperor Ferdinand II. in 1622. The family was, and remained, Roman Catholic. We know nothing of Johann Baptist's musical tastes or faculties, but his younger brother (2) JOSEPH FRANZ XAVER, apparently living in Upper Swabia, is said to have been a great amateur of music and the drama. The title of the elder brother was not transmitted till 1738, and of the younger one's descendants, one, (3) FRIDOLIN, was in the service of *Freiherr von Schönau-Zella*, near Freiburg im Breisgau, in the 18th century, and died in 1754. He was passionately devoted to music—sang, and played the violin and organ. Of his two sons, the elder (4) FRIDOLIN (*b. Zell, 1733*) (and also a singer and violin player) succeeded his father as manager of the *Schönau-Zella* estates, and apparently dropped the *von*, which his brother's family retained. He with his brother was a member of the Electoral chapel at Mannheim. In 1756 he married Marie Cécilie Stamm of Mannheim, by whom he had four daughters (see below), all excellent singers. The eldest,

(5) JOSEPHA (*d. 1820*) was a bravura singer with a high and flexible voice, but a poor musician. Mozart wrote for her the part of the Queen of Night in the 'Zauberflöte' and a bravura air (Köchel, No. 580). She married in 1789 Hofer, violinist at Schikaneder's theatre, and after his death Meyer, a bass-singer, who sang Pizarro in 'Fidelio.' The second,

(6) ALOYSIA (*b. 1750; d. Salzburg, 1839*), was Mozart's first love. Her voice was exceptionally high and extremely pleasant in tone, though perhaps rather weak for the stage. In 1780 she was engaged for the opera in Vienna, and married an actor at the court theatre, named Lange, who died in 1827. Mme. Lange made several professional tours before her final retirement in 1808. Mozart wrote for her the part of Constanze in the 'Entführung,' six airs (Köchel, Nos. 294, 316, 383, 418, 419, 538), and a rondo (No. 416). The third,

(7) CONSTANZE (*b. Zell, 1763; d. Salzburg, Mar. 6, 1842*), became Mozart's wife. See MOZART (4).

(8) SOPHIE (*b. 1764; d. Salzburg, 1843*), married Haibl, tenor and composer, attached to Schikaneder's theatre. During widowhood she lived

with Constanze at Salzburg. She was present at Mozart's death, and in 1825 wrote, at Nissen's request, a touching account of the last sad moments.

(9) FRANZ ANTON VON WEBER (*b. 1734; d. Mannheim, Apr. 16, 1812*), became the father of Carl Maria, who was thus connected by marriage with Mozart. Franz Anton must have been a violinist of more than common ability, as we find him included, by those qualified to speak, amongst the most distinguished viola-players of the time.² He was also a virtuoso on the double-bass. He took military service with the Elector Palatine, Karl Theodor, at Mannheim, on the understanding that he was to assist in the celebrated court band. He fought against Frederick the Great at Rosbach (1756) and was slightly wounded, after which he left the army, and entered the service of the Elector Clement Augustus at Cologne. In 1758 he became Steward to the Prince-Bishop, and Court-Councillor at Steuerwald, near Hildesheim. His devotion to music, which was such that he would even play the violin while walking in the fields with his family, caused him to neglect the duties of his office, and he was deprived of it. From 1768-73 he lived at Hildesheim as an ordinary citizen, and there decided, despite his age and numerous family, on becoming a practical musician. He appears to have started on a tour as a viola-player,³ and then settled in Lübeck, where he published 'Lieder mit Melodien fürs Clavier' (1774), compositions apparently not without talent, as they were noticed nine years after.⁴ In 1778 he was musical director of the theatre at Lübeck, and from 1779-83 Kapellmeister to the Prince-Bishop of Eutin. In 1784 he went to Vienna, made acquaintance with Joseph Haydn, and entrusted to him his two eldest sons, (10) FRITZ and (11) EDMUND,⁵ both of

³ Gerber's *Lexicon*, ii. 771.

⁴ Forkel, p. 68, and elsewhere. M. M. von Weber, in his biography of his father (*Lebensbild*), i. 13, conjectures that Franz Anton had played under an assumed name up to 1778, as no trace of him is found before. Apparently he did not know of the passage in Forkel's *Almanach*. Gerber also mentions as compositions of Franz Anton a cantata, 'Das Lob Gottes in der Natur,' and pieces for the viola, both in MS.

⁵ Haydn was specially attached to Edmund, and wrote in his album—

¹ Some details previously given by G. F. F., under separate headings, are incorporated here.

whom showed talent for music (see HAYDN, Vol. II. p. 572). In 1785 he married again in Vienna, returned to Eutin, and undertook the post of director of the town-band.

(12) CARL MARIA FRIEDRICH ERNST, VON (b. Eutin, Dec. 18, 1786; d. London, June 5, 1826), was the first child of Franz Anton's second marriage. The father had always longed to have a child that should turn out a prodigy, such as Mozart had been. All his children, daughters as well as sons, showed talent for music and the stage, and his two eldest sons became really good musicians. But Franz Anton could not disguise from himself that so far none of his children surpassed mediocrity, and he was all the more anxious to discern in Carl Maria talent of a high order. Inconstant by nature, his character was an odd mixture of vanity and a pretentious vein of comedy with the most brilliant and versatile gifts, forming a most unsatisfactory whole. Such a disposition was little adapted to the training of a gifted child.

Carl Maria was early set to learn music, principally under his father, who after all was but an amateur. The talent so ardently longed for, however, would not appear in the delicate, nervous child. There is a tradition that after taking great pains with him in vain, his elder brother Fritz exclaimed on one occasion, 'Carl, you may become anything else you like, but a musician you never will be.' The father now tried him with the plastic arts, and put him to drawing, painting in oil, pastel and engraving. Weber, in his autobiography, says that he followed this with some success,¹ but the specimens preserved in the family show nothing beyond a certain manual dexterity, with no sign of real talent.

His father had left Eutin in 1787, and was leading a restless life as director of a dramatic troupe mainly consisting of his own grown-up children. During the next few years he is to be found in Vienna, Cassel, Meiningen, Nuremberg, Erlangen and Augsburg. Bad as the influence of this roving life must have been on the whole, it had its advantages for Carl Maria in the special line to which he was to devote himself, for he may be said to have grown up behind the scenes. From his childhood he was at home in the stage-world as none of the great opera-composers have been—not even Mozart. That instinct for the stage, so obvious in all his dramatic conceptions, no doubt sprang from these early impressions. In 1794, the father being at Weimar with his family, Carl Maria's mother Genoveva, then 26, was engaged

as a singer at the theatre under Goethe's direction, and appeared, on June 16, as Constanze in Mozart's 'Entführung.' The engagement was, however, cancelled in September, and Franz Anton left Weimar, to his subsequent regret.² He went, it appears, to Erlangen, and in 1796 to Hildburghausen. There the boy of 9 found his first scientific and competent teacher in HEUSCHKE (q.v.), an eminent oboist, a solid pianist and organist, and a composer who thoroughly understood his art. An organ-piece by him on the chorale 'Vom Himmel hoch,'³ shows little fancy, but a complete mastery of the technique of composition. Carl Maria did not at first like the hard, dry studies to which his teacher inexorably bound him, but he soon found that he was making progress, and the father at last beheld with astonishment the dawn of that genuine musical talent which he had himself tried in vain to evoke. Weber never forgot what he owed to Heuschke. In his autobiographical sketch, written in 1818, he says that from him he had received the best possible, indeed the only true, foundation for a style of pianoforte playing, at once powerful, expressive, and full of character, especially the equal cultivation of the two hands. Heuschke on his part followed with justifiable pride the subsequent triumphs of his pupil, and one of his published compositions is a piece for wind instruments on themes from Rossini's 'Semiramide' and Weber's 'Eury-anthe' (Schott).

STUDY UNDER MICHAEL HAYDN.—Unfortunately this instruction lasted but a short time, as Franz Anton moved on in the autumn with his company to Salzburg. Here there was a training-school for chorister-boys, similar to St. Stephen's Cantorei in Vienna, in which the brothers Joseph and Michael Haydn were educated. Michael Haydn had been in the service of the Archbishop of Salzburg since 1762, first as Konzertmeister, and afterwards cathedral organist also. One of his duties was to teach singing to the choristers, among whom the young Weber soon found a place, speedily exciting the attention of Haydn. He asked him to his house and set him to play a concerto of Kozeluch's, which he had studied with Heuschke, and other pieces, including a recitative from Graun's 'Tod Jesu.' The upshot was that after repeated requests from the father he consented to give the boy gratuitous instruction in composition.

As a teacher, the mere fact of his sixty years put Michael Haydn at too great a distance from his eleven-year-old pupil for anything like the same results as had been obtained with Heuschke. Still, he seems to have been satisfied with six fuguetas, composed apparently under his own eye, and the proud father had them printed

in score. The dedication, showing evident traces of the father's hand, runs :

'To Herr Edmund von Weber, my beloved brother in Hessen-Cassel. To you as connoisseur, as musician, as teacher and more than all as brother, these first-fruits of his musical labours are dedicated, in the eleventh year of his age, by your tenderly loving brother, Karl Maria von Weber, Salzburg, Sept. 1, 1798.'¹

Carl Maria's mother had died on Mar. 13, of consumption, and her death perhaps occasioned a trip to Vienna in April, on which Carl Maria accompanied his father. Here they heard the 'Creation' (Apr. 29 or 30), and probably entered into personal relations with Haydn. Immediately after his return, in the beginning of July at the latest, the father began to talk of leaving Salzburg, for 'one cannot exist under this hierarchy,' and in the autumn they all moved to Munich. As the lessons in composition from Michael Haydn only began in January 1798, they cannot have lasted more than six months. Franz Anton had gradually tired of his stage-managing. 'I have bid good-bye to the good old theatre,' he writes,² 'and have returned, though without pay, to my old military life.' This consisted in his adoption of the title of Major, to which he had no sort of right. In Munich Carl Maria had two new teachers, the singer Wallishauser (Italianised into Valesi) and Johann Nepomuck Kalcher, afterwards court-organist. With the latter he made more progress in composition than with Michael Haydn, and always retained a grateful recollection of him. He soon began to play at concerts with success. Under Kalcher's eye he wrote his first opera, 'Die Macht der Liebe und des Weins,' a Mass, PF. sonatas, and variations, violin trios, and songs; but the MSS. have all disappeared³; apparently he burnt them himself. One work of his time has survived, a set of variations for PF. (op. 2), dedicated to Kalcher, and specially interesting as lithographed by himself. He had been led to this kind of work by his acquaintance with Aloys Senefelder, the inventor of lithography, in whose shop he frequently occupied himself, even imagining that he had discovered some improvements in the method of mechanical reproduction. Indeed, his interest in lithography became so keen, that for a time he neglected composition. The father, always restless and whimsical, thought of carrying out the new discovery on a large scale, and it was decided to move to Freiberg in Saxony, where the necessary materials were more easily procurable.

¹ M. M. von Weber, l. 41, and elsewhere, thinks his father made him out intentionally a year younger than he was, but of this piece of dishonesty he may be acquitted. The careless mistake of speaking of a person as of the age of the current year instead of that of the year last completed is very frequent in Germany. The expression 'in the eleventh year of his age,' may well have meant the same as eleven years old.

² Jan. 19, 1799, to Hofkammerrath Kirms at Welmars.

³ M. von Weber, l. 49, etc., says that they were accidentally destroyed in Kalcher's house. See, however, Biedenfeld's *Komische Opera*, p. 184 (Leipzig, Weigel, 1848), and E. Muziol in the *Neue Berliner Musikzeitung* for 1879, No. 1, etc.

The plan was carried into effect in 1800, Carl Maria giving concerts on the way with success at Leipzig and other towns in Central Germany. Arrived in Freiberg he speedily lost his interest in lithography, partly owing to an opening which occurred for producing a dramatic work. The large and well-selected company of Ritter von Steinsberg, whom the Webers had met before, had been playing there since the summer. Steinsberg had written an opera-book, 'Das Waldmädchen,' which he handed over to Carl Maria, then just 13, and the first performance took place on Nov. 24. Public expectation had been roused to a high pitch by Franz Anton's manœuvres, and seems to have been barely satisfied by the result. Two Freiberg musicians entered into a newspaper correspondence with the composer, whose pen was obviously guided by his father, for the intemperate, impertinent tone of the letters is wholly unlike anything in Carl Maria's character. The opera succeeded better at Chemnitz (Dec. 5, 1800), and was evidently appreciated in Vienna (Leopoldstadt Theatre, 1805), where it was given eight times during the month of December. It was also performed at Prague, and even in St. Petersburg, but negotiations with Weimar fell through. Carl Maria was quite aware afterwards of the small value of this youthful work. In his autobiographical sketches, he calls it 'a very immature production, not perhaps without occasional marks of invention, the second act of which I wrote in ten days,' adding, 'this was one of the many unfortunate consequences of the marvellous tales of the great masters, which made so great an impression on my juvenile mind, and which I tried to imitate.'

Freiberg in its turn was abandoned, possibly towards the end of 1800, certainly by the beginning of 1801. The last we hear of him there is that he wrote on Dec. 9 to Artaria of Vienna offering him his lithographic invention, the advantages of which were, in his own words,

'1. I can engrave music on stone in a manner quite equal to the finest English copper-plate engraving, as the enclosed specimens will show. 2. One workman can complete from two to three plates a day in winter, and from three to four in summer when the days are longer. 3. A plate can be used again, by which I mean entirely erased, over thirty times. 4. Two men can take as many thousand impressions a week as in common printing. 5. One hundred thalers will cover the whole outlay for machinery.'

He also offered the Viennese publishers several compositions for strings and for piano. Artaria took no notice of the letter.⁴ After this the father and son seem to have made some stay in Chemnitz, as we have letters from the former there dated Apr. 24, and May 17, 1801. By November they were again in Salzburg, where Carl Maria composed the opera 'Peter Schmöll und seine Nachbarn,' produced in Augsburg

⁴ Nohl's *Musiker-Briefe*, 2nd ed., 1777.

(probably in 1803) without any special success. In a letter of Nov. 25, 1801, Carl Maria calls himself a pupil of Michael Haydn, 'and of several other great masters in Munich, Dresden, Prague and Vienna,' but who these masters were has not been ascertained. As far as Vienna, Prague and Dresden are concerned, it can refer only to short temporary relations with musicians, as up to this time no stay had been made in any of these places. The passage, however, is fresh evidence of the continual restlessness in which Weber's youth was passed.

In the summer of 1802 he went with his father to North Germany, and in October paid a fortnight's visit to his birthplace. Here he saw much of Johann Heinrich Voss, a fact worthy of note, because of the admirable settings he afterwards composed to some of Voss's poems. On the return journey he composed at Hamburg, also in October, his two first *Lieder*—'Die Kerze,' by Matthiesson, and 'Umsonst,' of which the latter only has been printed. At Coburg, where the court was very musical, he tried to procure a hearing for his two operas, but whether successfully or not cannot be ascertained. More important than the actual musical results of this tour were the theoretical studies on which he embarked during its progress. He collected books on theory, and soon his letters are full of Emanuel Bach's *Versuch über die wahre Art das Clavier zu spielen*, of Agricola (apparently his revision of Tosi's *Opinioni*), of Kimberger, and others. Thus he began to cultivate independence of thought on matters of art. His newly acquired knowledge of theory was indeed rudely shaken in Augsburg, where he arrived November 1802, and made some stay. Here he formed a close friendship with a certain Dr. Munding, who in all their conversations on art had a disturbing habit of demanding the reason for every rule propounded, which Weber was not at that time competent to give. This, however, stimulated him to clear up his own views on the fundamental laws of art.

VOGLER AT VIENNA.—The most striking fact about him at this time was the extraordinary activity of his mind in every direction. He took great interest in musical criticism, and in December 1802 was busy with preparations for a musical dictionary. A Salzburg friend, Ignaz Susan, wrote to encourage him in a plan for a musical periodical, and was soon afterwards employed in procuring him materials for a history of music in Vienna, whither he betook himself early in 1803. The most important acquaintance he made on this visit was that of the Abbé VOGLER (*q.v.*), who was then composing his opera 'Samori.' This gifted, many-sided man, exercised a more stimulating effect than any other artist on Weber, who attached himself to him with all the enthusiasm of youth. 'By Vogler's advice,' he says,

'I gave up—and a great privation it was—working at great subjects, and for nearly two years devoted myself to diligent study of the various works of the great masters, whose method of construction, treatment of ideas, and use of means, we dissected together, while I separately made studies after them, to clear up the different points in my own mind.'

Vogler himself put great confidence in his pupil. After Weber's arrival one evening in October 1803, Vogler suddenly ran into the inner room, closed the doors, shut the shutters, and set to work at something with great secrecy. At length he brought out a bundle of music, and after Weber had promised absolute silence, played him the overture and some other pieces from his new opera. Finally he commissioned him to prepare the PF. score. 'I am now sitting down to it, studying, and enjoying myself like the devil,' Weber writes to Susan.¹

The relations with Joseph Haydn were also renewed.

'He is always cheerful and lively, likes to talk of his experiences, and particularly enjoys having rising young artists about him. He is the very model of a great man.'

These words of Weber perhaps explain the fact that neither in his letters, which often go into great detail on the state of music in Vienna, nor in his biographical sketch, does he mention Beethoven. That he was personally acquainted with him there is no manner of doubt.² But Beethoven was difficult of access, and his rough ways may have repelled the delicate, refined and graceful youth. That Vogler used underhand means to keep them asunder is probably an unfounded assumption, but a certain irritation against Beethoven clung to Weber for many a year, till it gave way in manhood to an unreserved admiration and hearty veneration. Among other musicians of note in Vienna Weber mentions Hummel, just made Kapellmeister to Prince Esterhazy, whom he calls the 'most elegant pianoforte-player in Vienna.' This opinion he modified on hearing him again in Prague in 1816. His precision and his pearly runs he still admired, but thought 'Hummel had not studied the intrinsic nature of the instrument.' Of Weber's own works during this time in Vienna but few exist, and of these few most are connected with Vogler, *e.g.* the PF. score of 'Samori'; PF. variations on themes from 'Samori,' and 'Castor and Pollux,' another opera of Vogler's.³ That he was studying hard is certain, but this was not incompatible with a youthful enjoyment both of life and natural beauty. He became acquainted with a young officer, Johann Baptist Gänsbacher, a musical amateur, also a pupil of Vogler, and the acquaintance soon ripened into an intimate and life-long friendship. Weber's son and biographer also has something to say of a 'tender connection with a lady of position' in Vienna. Possibly a song, 'Jüngst sass ich am Grab der

¹ Nohl's *Mosaik*, p. 68, etc. Leipzig: Senff, 1882.

² *Ibid.* p. 78, note.

³ See Jähns, Nos. 39, 40, 43.

Trauten allein,' composed immediately after his departure from Vienna, had something to do with this affair. Vogler had recommended him for the post of Kapellmeister of the theatre at Breslau, and by May 8, 1804, before he was quite 17½, the arrangements were concluded. He went first to Salzburg to fetch his old father, and there, in the rooms of his friend Susan, composed the song just mentioned. On June 5 he was in Augsburg, and travelled on the 14th by Carlsbad to Breslau.¹

APPOINTMENT AT BRESLAU. — If his biographer is correct in stating that Weber did not enter upon his post at Breslau before November 1804, he must either have been living there for more than three months without occupation, or have been touring about as an artist from June to October. But there is no indication of his having taken either of these courses. The Breslau theatre was kept up by a company chiefly consisting of better-class citizens. The head manager in 1804 was J. G. Rhode, Professor at the Kriegsschule. Previous to Weber's appointment, Carl Ebell had acted as director of music, but he, originally a lawyer, had returned to an official career. The orchestra and chorus were sufficient for ordinary demands. Weber, on this his first entrance on practical life, showed great talent for direction and organisation, though from over-zeal and inexperience he made many mistakes. He had from the first to contend with the prejudices of the managing committee, and with strong opposition in the chief musical circles of the town. The leader of this opposition was Joseph Schnabel, formerly first violinist, and deputy-conductor of the theatre, and appointed Cathedral-organist in 1805. Schnabel left the theatre on Weber's arrival, probably from vexation at not being Kapellmeister himself, and, as a man of 37, declining to serve under a lad of 18. The two continued on awkward terms, and some rudenesses of which Weber was guilty towards Schnabel, a respectable and much-respected man, did not raise him in the estimation of the better part of the public. Among the managing company he had roused opponents, by insisting on several expensive alterations. Rhode, indeed, was well disposed towards him, and wrote a libretto, 'Rübezahl,' on which Weber set to work at Breslau.

In spite of Rhode, however, a regular breach ensued in the spring of 1806, and Weber's resignation was accepted. With the best intentions he had done little to raise the state of music in Breslau; but the years spent there were of great importance to his own development. Not only was his great gift for conducting first made apparent to himself and others, but it was chiefly at Breslau that the original and gifted pianist and composer, whom his con-

¹ M. von Weber is incorrect here, i. 87. Also the Variations, op. 6, were completed earlier than stated by Jahns (No. 43, p. 57). They were undoubtedly finished by May 1804.

temporaries admired, and posterity venerates, was formed. Although somewhat isolated socially, his gifts and his amiable disposition attracted round him a small circle of musical people. Carl Ebell was one of the number, but his closest friends were F. W. Berner and J. W. Klingohr, both little older than himself, and both admired pianists, Berner being also chief organist of the church of St. Elizabeth, a talented composer, and in a certain sense a pupil of Vogler. The three young men formed a close bond, and endeavoured to make their intimacy mutually profitable. Klingohr's strong points were sweetness, correctness and grace; Berner's, power and depth of thought; Weber excelled in brilliancy, fascination and unexpectedness. In genius he far surpassed the others, but Berner had had the solid training which he lacked. All three exercised themselves diligently in extempore playing, then justly considered the highest qualification for a good pianoforte-player and organist. In this branch also Weber proved the most gifted; in spite of risky harmonies, and even awkward counterpoint, detected by critical hearers, he carried all before him by the charm of his melodies, and the originality of his whole musical nature. He had also acquired considerable skill on the guitar, on which he would accompany his own mellow voice in songs, mostly of a humorous character, with inimitable effect. This talent was often of great use to him in society, and he composed many Lieder with guitar accompaniment. His fine voice, however, he nearly lost in Breslau. One day, in the early part of 1806, he had invited Berner to spend the evening with him, and play over the newly completed overture to 'Rübezahl,' but on Berner's arrival he found his friend insensible on the floor. Wanting a glass of wine he had taken by mistake some nitric acid, used by his father for experiments in etching. He was with difficulty restored to consciousness, when it was found that the vocal organs were impaired, and the inside of the mouth and air-passages seriously injured. He recovered after a long illness, but his singing-voice remained weak, and even his speaking-voice never regained its full power. Beyond a few numbers of 'Rübezahl,' Weber composed little in Breslau. An 'Overtura Chinesa,' lost in its original form, was remodelled in 1809 as the overture to 'Turandot.'

After his withdrawal from the theatre he remained at Breslau without any regular employment, living on the hard-earned proceeds of music-lessons. Having his father to provide for, and encumbered with debts accumulated while he was endeavouring to live a somewhat fast life on a salary of 600 thalers a year, he found himself hard-pressed, and determined to try a concert-tour. One of his pupils, Fräulein von Belonde, was lady-in-waiting to the wife of

Duke Eugene of Württemberg, then living at Schloss Carlsruhe in Silesia, where he kept up a great deal of music. The lady's influence procured for Weber the title of Musik-Intendant, which would, it was hoped, be a help to him on his tour, but that prospect having been destroyed by the war, the Duke invited Weber to Schloss Carlsruhe. Here he found not only a refuge for himself, his father, and an aunt, but a most desirable atmosphere for the cultivation of his art. He took up his abode there about midsummer, and though the Duke was summoned to the army in September, the war was expected to be so soon over that at first no change was made in the peaceful life at the Castle.

In these few months Weber wrote a considerable number of instrumental pieces, chiefly for the excellent artists who composed the small chapel of the Duke. To Jan. 1807 belong two orchestral symphonies (his only ones, both in C major¹), and these had been preceded by some variations for viola and orchestra (Dec. 19), and a small concerto for horn and orchestra (Nov. 6, 1806). Possibly, too, the well-known variations on Bianchi's 'Vien quà, Dorina bella' belong to the last few weeks at Carlsruhe.²

SECRETARYSHIP AT STUTTGART.—This happy time came to an end in Feb. 1807, after Napoleon's decisive victory over the Prussians, when the state of universal insecurity made it necessary to dismiss the band. But the Duke, with true nobility of mind, showed himself anxious to provide for his musicians, and through his intervention Weber was installed as private secretary at Stuttgart to Duke Ludwig, brother to Duke Eugene, and to the king (Frederic) of Württemberg. As things were, he could not hesitate to accept a post which promised him, even at the cost of a temporary exile from his art, a certain income, doubly necessary now that he had his father to provide for. As he was not required at Stuttgart till Sept. 1, he made use of the interval after his departure from Carlsruhe on Feb. 23, for a concert-tour. The war made concerts a matter of great difficulty, but after several vain attempts, he succeeded at Anspach, Nuremberg, Bayreuth and Erlangen. He then turned in the direction of Stuttgart, where he arrived July 17, and entered on his new post August 1.

Duke Ludwig was a frivolous man of pleasure who habitually spent more than his income, and did not scruple to resort to underhand and desperate expedients to extricate himself from his embarrassments. The corruption of morals at the dissipated court of Stuttgart was terrible,

and Weber's position was a dangerous one from many points of view. His duties were to manage the Duke's private correspondence, keep his accounts, furnish him, sometimes by most unpleasant means, with money to satisfy or put off his numerous creditors—all things for which Weber was too ignorant and inexperienced, and which formed a ruinous exhibition of dissolute life for so young a man. His natural tendency to dissipation and gaiety was fostered by this immoral life, all the more because his title of *Freiherr* at once gained him admittance to the circles of the corrupt young nobility. Thus involved he lost sight of his own proper life-object—music,—or like a mere dilettante, treated his art as an amusement. He had besides, great social gifts, and was always a welcome guest. He ran great risk of giving up all serious effort, and yet it was indispensable to him, on account of his irregular and defective training. It is not to be wondered at that a sterling artist like Spohr, who knew him in Stuttgart, should have formed a low, or wholly unfavourable, impression of his artistic powers.

Stuttgart abounded in opportunities for improving his general cultivation, and procuring fresh nutriment for his active and receptive mind. He made acquaintance with the principal authors, artists and scientific men of the place. Haug and Reinbeck, Dannecker and Hötsch, J. C. Schwab, Spittler and Lehr, all enjoyed intercourse with so agreeable a youth. Lehr, the court-librarian, opened to him the treasures of the royal collection of books, among which Weber's preference was for philosophical works. He read Wolf, Kant and Schelling, with attention and profit, and formed on them his own modes of thinking and expressing himself.

His great gift for music naturally became known, and Duke Ludwig made him music-master to his children. The Kapellmeister of the opera (from 1807) was Franz Danzi, a melodious composer, an excellent violoncellist, and sociable, though of regular life. Though twenty-three years older than Weber, he speedily formed an intimacy with him, and tried to exercise a calming and restraining influence over him, while both by precept and example he was of great service to him in his art. His friendship with Danzi brought Weber into connexion with the company of the Stuttgart court-theatre, a circumstance which, while it stimulated him to fresh dramatic production, involved him in the loose life of a bohemian set. A violent reciprocal attachment for the singer Margarethe Lang³ led him into all sorts of follies, causing him to neglect cultivated and intellectual society, and ruining him financially. Another personage of importance in his artistic career was Franz Carl

¹ See Jähns, Nos. 50 and 51.

² Weber states in his autobiographical sketch that he composed at Schloss Carlsruhe two Symphonies, several Concertos, and 'Harmoniestücke' (pieces for wind without strings). If we include the viola variations, much in the form of a concerto, we get two concertos, but the Harmoniestücke are missing. A 'Tusch' (flourish of trumpets) of four bars, for twenty trumpets, printed by Jähns No. 47 A, p. 61, probably counted as one of them. The autograph of this is in the collection of Dr. W. H. Cummings.

³ Not the daughter, as M. M. v. Weber states (l. 159), but the sister of Theobald Lang the violinist, and in consequence aunt to Josephine Lang-Köstlin, Mendelssohn's friend, and composer of many *Lieder*.

Hiemer, the dramatic author. Both he and Weber belonged to a society of lively young men, who called themselves 'Fausts Höllenfahrt.' Each member assumed a special name; the president, a Dr. Kellin, was 'Dr. Faust,' Hiemer 'Reimwol,' Weber 'Krautsalat' and Danzi, who had been persuaded to join, 'Rapunzel.' Among Weber's papers was found a comic musical epistle, 'from Krautsalat to Rapunzel,'¹ which gives a striking picture of his irrepressible spirits in such society. Hiemer had had some previous success as a librettist, and undertook to write a romantic-comic opera for him. 'Das Waldmädchen' was the subject chosen, and Hiemer seems to have adhered pretty closely to Steinsberg's book, which Weber had set in Freiberg. The new work, 'Silvana' by name, seems to have made slow progress amid the distractions of Weber's life. It was begun, as far as can be ascertained, on July 18, 1808, and finished Feb. 23, 1810.²

Through Danzi's intervention the opera was accepted for the court theatre, and was about to be put into rehearsal, when an incident, to be related shortly, ruined all. Whilst busy with his opera, Weber composed what under the circumstances must be considered a large number of other works—a strong proof of the increasing force of his productive power. The most important was 'Der erste Ton,' a poem by Rochlitz, for declamation, with orchestra and concluding chorus. He remodelled the overture to 'Peter Schmöll,' and published it as a separate work; also the 'Overtura Chinesa,' which was made to serve as the introduction to 'Turandot,' a play by Gozzi and Schiller, for which he also wrote six short incidental pieces.³ Of PF. music, by far the most important piece is the Polonaise in E♭, op. 21, completed June 4, 1808, at Ludwigsburg, and dedicated to Margarethe Lang. With her, too, are connected the 'Variations on an original theme,' op. 9; the clever 'Momento capriccioso,' op. 12, and the charming 'Six pièces pour le pianoforte à quatre mains' (Nov. 27, 1809). His solitary PF. quartet (in B♭)⁴ was also of this period, as well as the 'Variations for PF. and violin on a Norwegian theme,' an 'Andante and Rondo Ungarese' for viola and orchestra, not published in this form, a Potpourri for violoncello and orchestra, and thirteen Lieder with accompaniment, several of which are of perfect beauty.

King Frederic lived on bad terms with his brother, Duke Ludwig, whose frivolity and extravagance were specially irritating, as the King had several times had to extricate him from his embarrassments for the sake of the family

honour. His displeasure also descended on the Duke's secretary, who generally had the unpleasant task of informing the King of his brother's difficulties. On these occasions the King would load the unfortunate Weber with most unkindly abuse. This roused Weber to revenge himself by various little spiteful tricks. On leaving the Cabinet in a great rage after one of these violent scenes, he met an old woman in the corridor who asked him for the laundress's room. 'There,' said Weber, pointing to the door of the King's apartments, 'the royal laundress lives in there,' and went off. The woman went in, and, being angrily received by the King, stammered out that a young gentleman who had just left the room had directed her there. Enraged at this affront, the King ordered him into arrest, but he was begged off by the Duke, and nothing more was done at the time. That the King did not forget his impertinence he learnt afterwards to his cost.

As Duke Ludwig's financial position became worse, he was driven to still more questionable expedients. The King having made a decree by which the only persons exempt from military service were the members of the royal household, these appointments were much sought after, and many parents were willing to pay a considerable sum for the reversion of one. It was observed that about this time there was a sudden accession to the Duke's household of young noblemen who bore official titles without any corresponding duties. Just then Weber had been endeavouring to obtain a loan from one of his acquaintances, in order to discharge a debt of his father's, who had been living with him since 1809. On the gentleman's refusal a former servant of his offered Weber to procure it for a consideration, and then assured his late employer that the Secretary, if obliged in the matter of the loan, would secure his son an appointment in the Duke's household. On this understanding the loan was effected; but when no appointment ensued, and the son was drawn for a soldier, the father in his indignation made the affair known. The King had long been dissatisfied with the state of his brother's household, and believing Weber to be the real culprit, determined to make an example of him. The preparations for 'Silvana' were in progress, and Weber was at the theatre, when, on the evening of Feb. 9, 1810, he was arrested and thrown into prison. An inquiry ensued, and Weber's innocence, of which indeed all Stuttgart had been convinced, was completely established; but the King, on Feb. 26, sentenced him and his father to perpetual banishment from Würtemberg. This hard stroke of fate might be looked upon as a punishment for so many frivolous years, and for sins committed against the guiding genius of his art; and it was in this light that Weber took it. Henceforth his

³ Three of the pieces are marches. All are founded more or less on a Chinese melody taken from Rousseau's *Dic. of Music* (vol. II. Plate N). The overture was first performed at Strassburg, Dec. 31, 1814.

⁴ Jahns, No. 76.

youthful follies were laid aside, and he settled down conscientiously and perseveringly to the life of an artist in earnest pursuit after his ideal. 'From this time forward,' he said, eight years afterwards, 'I can count pretty tolerably on having settled matters with myself; and all that time has since done or can do for me, is to rub off corners, and add clearness and comprehensibility to the principles then firmly established.'

MANNHEIM FRIENDSHIPS.—Danzi, a real friend in need, gave him introductions to Mannheim, where Peter Ritter was Kapellmeister, and Gottfried WEBER (*q.v.*, p. 673), afterwards so well known as a musical theoretician. Received in a kindly spirit by all, in Gottfried Weber he found a friend for life. Under his auspices concerts were at once arranged for Mar. 9 and Apr. 2, and at these the 'Erster Ton' was produced for the first time, the words being declaimed by the actor Esslair. His first symphony, too, was a great success, as well as his pianoforte-playing. On a trip to Heidelberg he made the acquaintance of Alexander von Dusch, a brother-in-law of Gottfried Weber, and a violoncello-player of great taste, who, after finishing his studies at Easter 1810, came to settle in Mannheim. The three friends spent a few happy weeks in lively intellectual intercourse, and in April Weber moved to Darmstadt, where Vogler had been living since 1807. Here he met his friends Gänsbacher and Meyerbeer from Berlin. Weber did not return to the old relations of master and pupil with Vogler, but sought to profit by intercourse with him. His respect for him was undiminished, though he could no longer agree with all that he practised and taught, and was quite aware of the weaknesses of his character.

'May I succeed in placing before the world a clear idea of his rare psychological development, to his honour, and the instruction of young artists!' Weber had the intention of writing a life of Vogler as far back as 1810, and the words just quoted show that he still retained the idea in 1818, though it was never carried out. (See VOGLER, p. 562 ff.)

On June 21, 1810, Weber undertook a small literary work at Vogler's instigation. Vogler had remodelled some of the Chorals in Breitkopf's second edition (1784-86) of J. S. Bach's Chorals, published under Emanuel Bach's supervision, honestly thinking that Bach was open to great improvement on the score of beauty and correctness. He now begged his former pupil to write a commentary on his revisions, and publish them for the benefit of students. That Weber embarked on the work¹ with any amount of eagerness there is no evidence to show; probably not, his mind being entirely practical and by no means

pedagogic. As a matter of fact the analyses were done very perfunctorily, nor were they all his own, for Choral VII. was done by Gottfried Weber, and part of Choral IX. and all Choral X. by Vogler himself.² Weber felt his unfitness for the task, and so expressed himself in the introduction. If any part of it interested him it was the comparison of Vogler's supposed systematic and philosophical methods with Bach's mode of proceeding by instinct. He had been long seeking for something on which to ground a system; a fact for which there is a very simple explanation in the uncertainty of his musical instincts, particularly as regards the sequence of harmonies, an uncertainty arising from his desultory early training, and never wholly overcome. That he considered Vogler's alterations improvements is not surprising; for his acquaintance with Bach, like his knowledge of history in general, was small; and he knew as little as Vogler did of the original intention of the Chorals in question.

Weber's attraction towards literary work, of which traces may be seen as far back as 1802, was very marked about this time. He came forward frequently as an author between 1809 and 1818, after that at longer intervals, and not at all after 1821. In Stuttgart he began a musical novel, *Tonkünstlers Leben*, which had been accepted by Cotta of Tübingen, and was to have been ready by Easter 1811; but the time went by, and it was never finished. A fragment published in the *Morgenblatt* for Dec. 1809 contains some severe remarks on Beethoven's third and fourth symphonies. Mozart was Weber's ideal musician, and at that time he was quite impervious to Beethoven's music. Nägeli of Zürich having pointed out a subtle resemblance between Weber and Beethoven (which really is observable, in the Momento Capriccioso for instance, and still more in his later works), Weber wrote to him from Mannheim:

'Flattering as this might appear to many, it is not agreeable to me. In the first place, I defeat everything in the shape of imitation: and in the second, my ideas are so opposite to Beethoven's that I cannot imagine it possible we should ever meet. His fervid, almost incredible, inventive powers, are accompanied by so much confusion in the arrangement of his ideas, that his early works alone interest me; the later ones are to me a bewildering chaos, an obscure straining after novelty, lit up it is true by divine flashes of genius, which only serve to show how great he might be if he would but curb his riotous imagination. I, of course, cannot lay claim to the genius of Beethoven; and I hope is . . . that each separate stroke of mine tells.'

This passage shows that Weber by no means over-appreciated himself, but was anxious to guard his own independence and uttered his opinions in a straightforward manner.

CRITICISM.—He began now to appear more frequently as a critic. All criticism on himself he paid great attention to, and was fully

¹ Published in the same year by Peters of Leipzig. 'Zwölf Choräle von Sebastian Bach, umgearbeitet von Vogler, zergliedert von Carl Maria von Weber,' etc.

³ Nohl's *Musikerbriefe*, 2nd ed. p. 178.

convinced of the value of good musical censure, so he set to work with his friends to elevate the art in general. Towards the close of 1810, he, Gottfried Weber, Alexander von Dusch and Meyerbeer founded the so-called 'Harmonischer Verein,' with the general object of furthering the cause of art, and the particular one of extending thorough and impartial criticism. The regularly constituted members were required to be both composers and literary men, but writers were admitted, if possessed of sufficient musical knowledge. The motto of the Society was 'the elevation of musical criticism by musicians themselves,' a sound principle, then promulgated for the first time in musical Germany. In this branch Weber was the direct precursor of Schumann. He and Gottfried Weber also considered the foundation of a musical journal, and though the plan was never carried out, it was long before Weber gave it up. He was still occupied with it even during the Dresden period of his life. Other members of the Society were Gänsbacher, Berger the singer, Danzi and Berner. The existence of the Society was a secret, and each member adopted a *nom de plume*. Weber signed himself Melos; Gottfried Weber, Giusto; Gänsbacher, Triole, etc. Here, again, we are reminded of Schumann and the 'Davidsbündler.' The two Webers were active in their exertions, and their efforts were undeniably successful.

Vogler was proud of his disciples, especially of Weber and Meyerbeer. 'Oh,' he is said to have exclaimed, 'how sorry I should have been if I had had to leave the world before I formed those two. There is within me a something which I have never been able to call forth, but those two will do it.' Weber, however, found existence at Darmstadt hard after the pleasant never-to-be-forgotten days at Mannheim. He got away as often as he could, gave concerts at Aschaffenburg, Mannheim, Carlsruhe and Frankfort, and found time also to compose. Ideas flowed in upon him, many to be used only in much later works. For instance, the ideas of the first chorus of fairies, and of the ballet music in the third act of 'Oberon,' and the chief subject of the 'Invitation à la valse' were in his mind at this period. While on the look-out for a subject for an opera he and Dusch hit upon 'Der Freischütz,' a story by Apel, then just published, and Dusch set to work to turn it into a libretto. For the present, however, it did not get beyond the beginning; not till seven years later did Weber begin the work which made his reputation. He succeeded in bringing out 'Silvana' at Frankfort on Sept. 16, 1810,¹ when, in spite of unpropitious circumstances, it produced a very favourable impression. The part of Silvana was taken by Caroline Brant, Weber's future wife; and Margarethe

Lang was the first soprano. Having completed by Oct. 17 six easy sonatas for piano and violin, for which André had given him a commission, Weber soon after set out for Offenbach, but had the mortification of having them refused, on the ground that they were too good for André's purpose.² At André's he saw for the first time an autograph of Mozart's, and his behaviour on the occasion touchingly expressed his unbounded veneration for Mozart's genius. He laid it carefully on the table, and on bended knees pressed his forehead and lips to it, gazed at it with tears in his eyes, and then handed it back with the words, 'Happy the paper on which his hand has rested!'

For a short time there seemed a prospect of Weber's securing a permanent appointment in his beloved Mannheim. At a concert there on Nov. 19, he produced his remodelled overture to 'Peter Schmoll,' and played for the first time his PF. Concerto in C, completed on Oct. 4. Among the audience was Princess Stephanie of Baden, whose father, the Crown Prince Ludwig of Bavaria, Weber had met a few months before at Baden-Baden. The Prince had been delighted with him, and had walked about with him all night, while he sang serenades to his guitar. The Princess also was anxious to hear him in this capacity, and after the concert he sang her a number of his best songs to the guitar, making so great an impression that she promised to procure him the post of Kapellmeister in Mannheim, or make him an allowance of 1000 gulden from her privy purse. All this, however, ended in nothing, for a few weeks later he received a message from the Princess to say that she found her promise had been made too hastily.

The cause of Weber's so soon giving up the 'Freischütz,' which Dusch was to prepare for him, was that he had been busy for some time with a new opera, or rather comic Singspiel, in one act, called 'Abu Hassan,' the libretto of which Franz Hiemer sent him, Mar. 29, 1810, from Stuttgart. He composed one number, the Creditors' chorus, at Mannheim, Aug. 11, left it untouched till Nov. 1, and completed it at Darmstadt, Jan. 12, 1811. By Vogler's advice the work was dedicated to the Grand Duke Ludwig, who, although an enthusiastic devotee and connoisseur of music (he used to conduct the rehearsals at the opera himself), had hitherto declined to have much to do with Weber, possibly because the latter had not shown sufficient deference to his authority on matters of art. Now he seemed much more kindly disposed, sent a handsome fee for the score, and gave permission for a concert at the Schloss (Feb. 6, 1811), himself taking 120 tickets. For it Weber composed an Italian duet for two altos (Mesdames Mangold and Schönberger) and small orchestra, with clarinet

¹ According to the register of the theatre. Jähns, p. 103.

² Published later by Simrock of Bonn.

obligato played by Heinrich Bärmann of Munich. The duet pleased greatly, and was encored, but all this success did not end in a permanent appointment, as Weber had at one time hoped would be the case. Meyerbeer had left on Feb. 12 for a tour; outside the court the inhabitants had little feeling for music; Weber did not care to be left wholly to Vogler; and on Feb. 14 he finally left a place where he had never felt thoroughly at home, and started on a grand concert tour.

At this period he often felt sorely the restless, uncertain conditions of his life, the inconstant nature of all human relations, and the loneliness to which he seemed doomed by the sudden snatching away of friends as soon as he became attached to them. During his last visit but one to Mannheim, he composed a song called 'Weber's Abschied'¹ (Dec. 8, 1810) to words by Dusch.

At Darmstadt, on the night of Jan. 12, 1811, he wrote down more connectedly some of the thoughts which surged through his mind. His childhood came up before him, and his life, so full of disappointments, and so near failure. 'My path in life,' says he,

'was cast from my birth in different lines from that of any other human being; I have no happy childish days to look back upon, no free open boyhood; though still a youth I am an old man in experience, learning everything through my own feelings and by myself, nothing by means of others.'²

To Gänsbacher he writes a few months later:

'You live in the midst of your own people, I stand alone; think then how much a word from you refreshes and revives me.'

His elastic temperament, however, soon recovered itself, as the smallest piece of good fortune was enough to feed his hopes, and the consciousness that he had at last laid firm hold of art—his own proper aim in life—was a constant encouragement. Nothing could distract him from this, nor from the continuous endeavour to work out his moral education. The touching tone of piety and trust which runs through his later life is now first noticeable. He closes the year 1810 with the following avowal:

'God has sent me many vexations and disappointments, but He has also thrown me with many good kind people, who have made life worth living. I can say honestly and in all quietness, that within the last ten months I have become a better man.'

CONCERT TOURS.—Weber travelled through Frankfurt to Giessen, where he gave a well-attended concert on Feb. 18, and Hanau, where he saw a 'bad play' on the 23rd; went next day to Aschaffenburg, where he stayed two days, and made acquaintance with Sterkel, an adherent of Volger's; and by Mar. 3 was at Würzburg. Thence he went to Bamberg, where he met E. T. A. Hoffmann, and Bader the tenor, both of whom reappear in the Freischütz

period; and by Nuremberg and Augsburg to Munich, arriving Mar. 14. Here he stayed nearly five months, finding powerful stimulus in the society of Bärmann, the greatest clarinet-player of his time, for whom he wrote within the next few months no fewer than three concertos. The first, in C minor and E \flat ,³ was played at his first concert (Apr. 5) as well as his PF. concerto, one of his symphonies, and the 'Erster Ton.' Bärmann played the second,⁴ in F minor, at a concert given by Kaufmann the pianoforte-maker of Dresden (June 13), and again at Weber's second (Aug. 7). These compositions procured him warm adherents, not only among the general public, but also in the Munich orchestra, celebrated for its haughty reserve. One of the band having spoken slightly of the F minor concerto at rehearsal as an 'amateur work,' the rest fell upon him, and would have turned him bodily out of the orchestra if Weber had not interposed. There was also a successful performance of 'Abu Hassan' under Winter on June 4, and during the preparations Weber learned that it was to be given before the court at Ludwigsburg in the beginning of May, but not under his name. 'Is not that miserable?' he writes to Gottfried Weber, 'and how stupid! all the papers will announce it as mine. Item, God's will be done.'

On Aug. 9 he started for a tour in Switzerland, during which he gave himself up to the enjoyment of nature rather than of music. By the beginning of November he was again in Munich and gave a brilliantly successful concert on the 11th. For it he had composed a new concert rondo, which he afterwards used for the finale to the clarinet concerto in E \flat ,⁵ and remodelled the overture to 'Räbezah!', a piece of work which he declared to be the clearest and most powerful of anything he had yet done. Besides these he composed some vocal pieces, chiefly for his patroness Queen Caroline, and a complete bassoon concerto (op. 75) for Brandt, the court player. On Dec. 1 he started again, this time in company with Bärmann, for Central and North Germany.

In Prague he met Gänsbacher, then living there, formed some ties which became of importance when he settled there later, composed variations for PF. and clarinet on a theme from 'Silvana' (op. 33), and gave with Bärmann a largely attended concert on Dec. 21. Passing through Dresden they arrived, Dec. 27, at Leipzig, where Weber met Rochlitz and other musical authors, and fostered his own inclination for literary work. Indeed, so strong was this that he seriously thought of staying in Leipzig and devoting himself exclusively to literature. His ideas, however, soon took a different turn. The Crown Prince Ludwig of

Bavaria, on whom he had evidently made a deep impression, had written about him to Duke Emil Leopold August of Saxe Gotha, and the result was an invitation for himself and Bärmann to Gotha, where they arrived Jan. 17, 1812. The Duke was devoted to the arts, a poet and composer, but whimsical and given to extremes—in fact a Jean-Paul kind of man, and a great admirer of Jean-Paul's works. Intercourse with him was exciting but very wearing, as Weber discovered, although just now it was only for a short time that he enjoyed the privilege of almost uninterrupted access to him. The Duke took great pleasure in his society, but, having at the time many claims on his time, invited Weber to return in the autumn and make a longer stay. In Gotha Weber met Spohr, who since 1805 had been Konzertmeister—the court had then no opera—and had married in 1806 Dorette Scheidler, a harpist, and daughter of Madame Scheidler, the court singer. Spohr had not retained a very favourable impression of Weber's music at Stuttgart, but received him in true brotherly fashion. On Jan. 20 they passed some pleasant hours together at Spohr's house, and on the 24th played before the court Weber's variations on a Norwegian theme (op. 22), on which Weber remarks in his diary, 'Spohr played gloriously.' From Gotha the two musicians went to Weimar, were kindly received at court, and gave a concert. If Weber had been hoping for inspiration from Weimar's great poets, his only chance was with Wieland, for Goethe behaved coldly, or rather took no notice at all of him. His diary contains an entry:

'Jan. 29. Early to the Princess [Maria Paulowna]. Goethe there and spoke. I did not like him.'

Spohr indeed had met with scarcely better treatment some little time before, but this may have arisen from Goethe's lack of interest in music. Against Weber he was personally prejudiced, possibly because of former circumstances about his father and his family, and the feeling was fostered by Zelter. Indeed, Weber never succeeded in approaching Goethe. By the beginning of February Weber and Bärmann were in Dresden, but left it with no very favourable impression; indeed, they are reported to have said, 'Dresden shall not catch us again'—very contrary to the fact, as far as Weber was concerned.

On Feb. 20 they arrived in Berlin, where Weber had hopes of producing 'Silvana.' It had been tried through some months before by Righini, but 'went so confusedly that all pronounced it perfect rubbish.'¹ He had thus to meet a prejudice against his work, and, still worse, a personal one of the Kapellmeister against himself. Bernhard Anselm Weber especially, an able and cultivated man, and

himself a pupil of Vogler, was by no means kindly disposed to his young comrade; but difficulties were gradually overcome, two arias were added, and the performance took place on July 10. Weber conducted in person, and succeeded in inspiring both band and singers, and the public gave the work a warm reception, in spite of its startling novelty. Weber had been much depressed by some sharp criticism of Herr von Driberg's and had rigidly tested his work, so he was much encouraged by its success. He writes in his diary:

'While duly acknowledging my faults, I will not in future lose confidence in myself, but bravely, prudently, and watchfully march onwards on my art-career.'

Even before this he had made many friends in Berlin, and the two concerts given by himself and Bärmann, though not well attended, had roused great interest. He was introduced to the 'Singakademie' and the 'Liedertafel,' and wrote for the latter a composition which even gained the approval of Zelter.² Meyerbeer's parents from the first treated him as a son, and he stayed in their house the whole time he was in Berlin. His most valuable acquaintance was Lichtenstein, Professor of Zoology, who was the first to recognise his genius in Berlin. As one of the foremost members of the Singakademie he had no difficulty in introducing Weber to cultivated and musical families, where he soon became a favourite for his pleasant manners, his admirable pianoforte-playing and extemporising, his inspiring way of leading concerted music, and, above all, his songs and his guitar. For these private circles he composed five charming partsongs. He used often to play to his new friends, with an almost inexhaustible variety of *nuances*, his sonata in C, composed in Berlin. He himself taught (on Aug. 26) the soldiers at the barracks near the Oranienburg gate, to sing his 'Kriegs-Eid,' a chorus for men's voices with wind instruments in unison, which he dedicated to the Brandenburg Brigade. While he was in Berlin his old father died at Mannheim (Apr. 16, 1812), an event which brought back in full force his homelessness and loneliness, and made him touchingly grateful for any proof of friendship. Bärmann had left him on Mar. 28 for Munich, and on Aug. 31 he himself also left Berlin, stayed some few days in Leipzig, where he found a publisher for some of his compositions and had a talk with Rochlitz, and then, passing through Weimar, arrived on Sept. 6 at Gotha.

The Duke's treatment was politeness itself, but instead of having, as he hoped, a quiet time for composition, Weber found the constant attendance on the Duke's inspired moments exciting and exhausting. In the midst of this he received an invitation from the Princess

¹ Weber to Gänsbacher.

² 'Das Turnierbankett,' Jähns, No. 132.

Maria Paulowna to come to Weimar and teach her some of his works, including the sonata in C, which he had dedicated to her. On this subject he writes to Lichtenstein (Nov. 1):

‘The Princess often says that she does not believe she will ever play the sonata properly as long as she lives. If she were not a Princess, I should be at liberty to tell her that I *fully agree* with her.’

He had to give her a lesson each morning for a week, and the rest of his time he spent with the company at the theatre, among whom P. A. Wolf specially attracted him, and with Wieland, who was a sympathetic listener to his playing. One of the effects which Weber carried to a pitch of excellence never heard before was a long crescendo, beginning with an almost inaudible pianissimo, and passing through every gradation of loudness up to a thundering fortissimo. The effect of this was irresistible, and Wieland, having asked for it, found himself gradually drawn off his chair as by some demoniacal agency.

In Gotha he had much stimulating intercourse with Spohr, and also with Albert Methfessel, then passing through. His diary contains some interesting remarks on Spohr's compositions. Thus the evening of Sept. 16 was passed in going with Spohr through the latter's ‘Last Judgment’ (produced at Erfurt, Aug. 15). Weber did not much like the work, and calls it ‘laboured, tedious, full of unnecessary modulations, and modelled entirely upon Mozart.’ On Sept. 27, however, he writes:

‘Spohr played his new Quartet in G minor very finely; it is well composed; much flow and unity. Afterwards a fine Sonata with his wife.’

At Spohr's he also met Hermstadt, the clarinet-player from Sondershausen, who played a concerto of Spohr's in masterly style, but seems to have been inferior to Bärmann in purity of tone and expression. As a rule, the quick-witted, far-seeing Weber was more just towards Spohr's compositions than the more ponderous and short-sighted Spohr was to his. But personal dislikes never lasted with Spohr. He could distinguish between a man and his work, and was always a loyal friend to Weber.

The Duke's younger brother, Prince Friedrich, an admirer of Italian music, had brought a singing-master back with him from Italy, and often had Weber to go through Italian operas with him. He had a good tenor voice, and for him Weber composed an Italian *scena ed aria*, with chorus, from an opera ‘Ines de Castro,’ performed at a court concert on Dec. 17. Other works written at Gotha were the celebrated PF. Variations on a theme from Méhul's ‘Joseph,’ the first two movements of the PF. concerto in E, and a hymn, ‘In seiner Ordnung schaffet der Herr,’ to Rochlitz's words. Spohr having recently started on a concert tour, Weber left Gotha, on Dec. 19, for Leipzig, where he produced this hymn at a Gewandhaus concert

(Jan. 1, 1813); and played the Eb concerto, ‘with a success,’ he writes himself, ‘such as was perhaps scarcely ever known in Leipzig before. It is pronounced to be the first of concertos for effect and novelty. Truly these people, once so cold, have quite adopted me.’ Thus the new year opened to him under happy auspices.

This year, 1813, was the greatest turning-point in Weber's short career. Hitherto his life had been that of a wandering minstrel or troubadour. Roving restlessly from place to place, winning all hearts by his sweet, insinuating, lively melodies, his eccentricities making him an imposing figure to the young of both sexes, and an annoyance to the old, exciting the attention of everybody, and then suddenly disappearing, his person uniting in the most seductive manner aristocratic bearing and tone with indolent dissipation, his moods alternating between uproarious spirits and deep depression—in all ways he resembled a figure from some romantic poem, wholly unlike anything seen before in the history of German art. In talking of Weber, people have in their minds, as a rule, only the last period of his life, beginning with ‘Der Freischütz’ and ending with ‘Oberon,’ but from that point of view the work becomes too prominent, and the man of too little importance. As a man his versatile gifts made more effect in the first half of his artistic career than in the second. The love of the antique, whether in history, the life of the people, or national melody, was then newly awakened in Germany, and gave its stamp to the period. Weber became the embodiment of the ancient troubadour who, in Eichendorff's words, went through the country singing his melodies from house to house.

APPOINTMENT AT PRAGUE.—In 1813 this roving life came to an end, and was succeeded by a settled existence, with ties of place and circumstance, and definite duties. The wandering impulse was indeed too ingrained in his nature not to have a secret influence on his after life, but henceforth it was sufficiently under control to admit of that collectedness of spirit without which the creation of great and enduring works of art is impossible. On Jan. 12, 1813, Weber arrived at Prague, intending to go on by Vienna to Venice, Milan and the rest of Italy, and then back through Switzerland and France. This tour he calculated to take fully two years, and from it he hoped for great results. At Prague, however, there was a vacancy for a Kapellmeister of the theatre, owing to Wenzel Müller's resignation. Liebich, the director, knew Weber's value, and offered him the post, with a salary of 2000 gulden (about £200), a vacation of two or three months, an annual benefit guaranteed at 1000 gulden, and absolute independence of the opera. This gave him not only a fixed income, but the prospect of paying

off the debts contracted at Breslau and Stuttgart, a decisive consideration to a man of his honourable nature. The grand tour, planned with so much expectation, was given up, and Liebhich's offer accepted.

Under Müller's direction the opera had deteriorated to such a degree that Liebhich determined to disband the company and entirely reorganise it. For this task he selected Weber, who started for Vienna on Mar. 27, furnished with full powers to engage good musicians and German singers.¹ In Vienna he met Meyerbeer, heard Hummel and Moscheles, whose playing he thought 'fine, but too smooth,' and gave a concert of his own on Apr. 25, but was principally occupied with the main object of his journey. The whole company, with the exception of three members, was new, and included Caroline Brandt, Weber's future wife. He entirely reorganised the whole system, and developed a marvellous capacity for that kind of work. It now became evident that it was not in vain that he had passed his childhood behind the scenes, and been a Kapellmeister at 18. His wide experience and energy helped him to conquer the singers and musicians, who were at first amazed by his strictness and the inflexibility of his rules. Among them were a number of Czechs, and in order to be able to grumble at him with impunity, they talked to each other at rehearsal in Czech. This Weber soon perceived, and set to work to learn the language, which in a few months he had mastered sufficiently for his purpose. Not only did he manage, arrange, and direct the music even to the smallest details, but he also superintended the administration, the scene-painting and the stage-management, and proved to demonstration that all these were really within his province. So completely were all theatrical details at his finger-ends, that on the prompter's sudden illness, Weber supplied his place. By this means he ensured an accuracy and a unity in all the dramatic representations which had never been seen before, and which the public did not fail to recognise. He was perhaps quite as great a conductor as a composer, and was the first of the great German musicians whose talent was conspicuous in this direction. In this matter also he was a virtuoso. The first opera he put on the stage at Prague was Spontini's 'Cortez' (Sept. 10, 1813), then produced for the first time there. Between that date and Dec. 19 followed seven, and between that and Mar. 27, ten, newly studied operas and Singspiele. Of each he made a *scenario*, including the smallest details.

His aim was to reinstate the Prague opera in the position it occupied between 1780 and 1790 (see MOZART, Vol. III. p. 551). He was quite the man to do it, if only the times had been the same; but unfortunately this was not the case.

¹ The Italian Opera of Prague ceased to exist in 1806.

During the war, society ceased to cultivate music, and lost its power of discrimination, and the only way of keeping up its traditional reputation for taste was to maintain a dignified reserve on all artistic productions. Weber, accustomed to more sympathy, soon discovered this, and it put him out of tune. Besides, he had not managed to form comfortable relations for himself. Gänsbacher had left, and Weber, to whom a friend was an absolute necessity, felt deserted. With the Prague musicians, KOŽELUH, Dionys (see WEBER, Friedrich Dionysus), TOMASCHEK (*q.v.*) and others, he did not hit it off. The real cause of his discomfort was that he could not at once fall into the regular ways of professional life. Passages in his letters make this clear.

'My incessant occupation, and my life of utter solitude, have made me morose, gloomy, and misanthropical. If Heaven does not soon thrust me violently back among my fellow-men, I shall become the most abominable Philistine on the face of the earth.' (Jan. 29, 1814.)

The few composers and scholars who live here groan for the most part under a yoke which has reduced them to slavery and taken away the spirit which distinguishes the true free-born artist.' (May 5.)

The outward advantages of his position he fully acknowledged.

'I reason myself by main force into a sort of contentment, but the naturally cheerful state of mind which steals all one's nerves, and sends one's spirits bubbling up of themselves, that one cannot give oneself.' (Apr. 22.)

After bringing out seven more operas between Apr. 19 and June 26 (1814), Weber, who had been out of health for some time, went on July 8 to take the baths at Liebwerda. But the impulse to join the great world was too strong to allow him to stay there, and, pushing on, he arrived in Berlin on Aug. 3, a couple of days before the King of Prussia's return from the Allied Armies' victorious expedition to Paris after the battle of Leipzig. Unlike Prague, where a few official ceremonies formed all the notice taken of the victory over Napoleon, Berlin was in a tumult of joy, and Weber had before him the spectacle of a great people hailing their reconquered freedom with transport. He was carried away like the rest, and thoroughly enjoyed it. To increase his happiness he met with an enthusiastic reception from his friends, whose circle now included Tieck and Brentano, with whom he had formed an intimacy in Prague in 1813. Brentano began to arrange a libretto on the Tannhäuser legend for him, but other things intervened, and the work was laid aside. He gave a concert on Aug. 24, and received permission to invite the King, the Crown Prince, and other princes and princesses. Several great personages were interested in him, and there was some talk of making him Kapellmeister of the Court Opera, in place of Himmel, who had just died. 'Silvana' was given again on Sept. 5, and Weber left Berlin, happy in many a proof of heart-

felt sympathy, and loaded with impressions destined to bear fruit later on.

At that period patriotic songs were naturally enough the order of the day, and in this direction Weber could hardly fail to be led. An invitation from the Duke took him to Gotha on Sept. 11, and the next day to Gräfentonna, the Duke's hunting seat. Here, finding a little repose for the first time for many months, he composed on the 13th two Lieder from Körner's 'Leyer und Schwert,' followed by eight others during the journey home and in the first few months after his return. Six of these are for four men's voices, and four for a single voice and P.F., and in them he has recorded the impressions made on his mind by the surging national movement. It was his first opportunity of showing how great a power he had of absorbing the feelings of the masses and giving them artistic expression. The effect of these songs on the whole people of Germany, and especially on the youth, was extraordinary. Wherever they were sung they roused the most fervid enthusiasm. All the other patriotic compositions, in which the time abounded, paled before the brilliancy, swing and pathos of these Songs of War and Fatherland. Weber's own cantata even yields to them in effect. The choruses from the 'Leyer und Schwert' are still among the most favourite of such works for men's voices, and are indeed so bound up with the development of the male choral societies in Germany that only with them can they cease to be heard.

Before his trip to Berlin Weber had entered into closer relations with Caroline Brandt, but there were difficulties in the way of marriage. Caroline, a talented soubrette, and a good deal spoiled by the public, was somewhat whimsical, and had imperfect views both as to the dignity of art in itself, and Weber's importance as an artist. Neither did she like his requiring her to leave the stage before they married. This uncertainty about an object he so ardently desired added to his discontent with Prague, and made him anxiously look out for some opening which should lead to his removal. In the meantime he made use of his summer holiday in 1815 for an expedition to Munich, and it was there that the news of the battle of Waterloo reached him. The outburst of joy and enthusiasm which followed incited him to a great composition in honour of the event. Gottfried Wohlbrück the actor provided him with the words, and in August, before leaving Munich, he wrote the first two numbers of 'Kampf und Sieg.' The last two days of his stay were embittered by a letter from Caroline, conveying her conviction that they had better part. This seems to justify what Weber had written to Gänsbacher:

'I see now that her views of high art are not above the usual pitiful standard—namely, that art is but a means of procuring soup, meat and shirts.'

Her 'conviction,' however, did not last long. When Weber returned to Prague her real affection for him overcame all scruples, and he was able to look forward with confidence to a time when she should be all his own.

'Lina is behaving extremely well, and honestly trying to become better. If God will only bestow on me some post without cares, and with a salary on which a man can live; and if she is as brave in a year and a day as she is at this moment, she is to leave the stage, and become my faithful *Hausfrau*. You shake your head! A year is a long time, and a person who can hold out so long is really brave.'¹

The cantata was quickly completed, and performed for the first time at Weber's benefit concert (Dec. 22). The immediate effect was very great, though, for reasons hereafter to be explained, not so lasting as that of the Körner songs. Beethoven had composed his orchestral picture in honour of the battle of Vittoria, and this had been performed shortly before in Prague. At the close of 'Kampf und Sieg,' General Nostiz went up to Weber and said, 'With you I hear nations speaking; with Beethoven, only big boys playing with rattles.' This criticism, though too severe² on Beethoven, has in it elements of justice, for in this *pièce d'occasion* Weber has in truth outdone his great contemporary.

With the completion of his cantata Weber decided to give up his post at Prague. The main object of his labours, the reorganisation of the opera on a solid basis, was accomplished. To produce first-rate results, and make it one of the chief institutions for promoting German dramatic art, was out of the question under the circumstances in which he was placed, and with the means at his disposal. But he thought that it could be maintained at its then state of efficiency without his aid; and as Prague had nothing to offer for himself and the furtherance of his own artistic life, he resigned his post on Sept. 30, 1816. Projects of a grand tour or a summons to some other great art-institution again floated through his mind. He had been again in Berlin during the summer, and had produced his cantata on the anniversary of Waterloo with such success that it was repeated on the 23rd June. Count Brühl, Iffland's successor as Intendant of the court theatres, was devoted to both Weber and his music, and tried, though vainly, to procure him the appointment of Kapellmeister *vice* Himmel. The post was occupied provisionally by Bernhard Romberg, and not even a title from the Prussian court could be had for Weber. On his return journey to Prague he made the acquaintance at Carlsbad of Count Vitzthum, Marshal to the Saxon court, and he opened to him a prospect of an invitation to Dresden. After a formal farewell to Prague he accompanied his *fiancée* to Berlin on a star engage-

ment, and remained there for the rest of the year busily engaged in composition. The PF. sonatas in A \flat and D minor, the grand duo for PF. and clarinet, and several charming songs with PF. accompaniment, belong to this time. On Dec. 21, just before starting on a *tournée* to Hamburg and Copenhagen, he received the news that the King of Saxony had appointed him Kapellmeister of the German opera at Dresden.

GERMAN OPERA AT DRESDEN. — Weber's work at Dresden, which was to last for nine years and terminate only with his premature death, is of the highest importance. Not only did he there bestow on his countrymen those works which, with Mozart's, form the main basis of German national opera, but he founded an institution for the performance of German opera at one of the most musically distinguished courts of Germany, which did not possess one before. In all the other courts where music was cultivated German opera had for long stood on an equal footing with Italian. Vienna, Berlin, Munich, Mannheim and other places had had a national opera by the end of the 18th century, and in most cases the rise of the German opera had put an end to the separate existence of its rival. In Dresden alone matters were different. From the beginning of the 18th century, when Italian opera had reached a perfection scarcely to be surpassed even in Italy, it had reigned there supreme, and by 1765 had even ceased to belong exclusively to the court.

Towards the end of the century, German Singspiele were occasionally performed in Dresden, but only by second-rate actors, at a small theatre in the so-called Linkesche Bad, the court Kapellmeister being expressly prohibited from taking part in the performance. After King Friedrich August's return from the war in 1815 his Intendant Count Heinrich Vitthum induced him to found a German opera, though only as an addition to the Italian, and it was this institution which Weber was called on to organise. Such a work naturally could not be carried out without violent opposition from the Italians, who had hitherto had it all their own way in Dresden, with the court and nobility almost exclusively on their side. The post of Kapellmeister had been filled since 1811 by a born Italian named FRANCESCO MORLACCHI (q.v.). Weber had hardly entered on his new office before he discovered that powerful foes were actively though secretly engaged against him. In accepting the post he had made it a *sine qua non* that he and his institution should be ranked on terms of perfect equality with Morlacchi and his, and had expressly stipulated for the title of Kapellmeister, which was held by the other. These conditions were agreed to, and yet when the appointment was gazetted he found himself styled 'Musikdirector,' a title which, according to general usage, made him

subordinate to Morlacchi. Weber at once stated with decision that he must decline the post. He, however, allowed himself to be persuaded, for the sake of the object, to fill the office provisionally, until either a substitute had been engaged in his place, or he himself had been formally pronounced Kapellmeister. By Feb. 10, 1817, he had the satisfaction of learning that the King had given way. His salary (1500 thalers, = about £220) had been from the first on an equality with Morlacchi's, and on Sept. 13 the appointment was confirmed for life. In Dresden he had a first-rate orchestra and a tolerable body of singers at his disposal, and found ample opportunity for turning his knowledge and experience to account.

German opera having generally had spoken dialogue, often forming a large proportion of the work, a custom had arisen of filling the parts with actors who could sing. The style was not a very perfect one, the profession of an actor being so wearing for the voice, and hence small parts alone were fit for these singing actors. Of such materials Weber's company at first exclusively consisted. He was indeed allowed, with special permission, to make use of the members of the Italian opera, but this availed him little, because the Italians could rarely speak German and were unfamiliar with German music. As for the chorus, it was at first non-existent. A few supers with voices, and two or three subordinate solo-singers, constituted the basses and tenors, while the sopranos and altos were supplied by schoolboys, as was once the custom at all German theatres. With such materials it needed all Weber's gifts of organisation and direction to produce results which might bear comparison with the far better appointed Italian theatre, and keep alive, or rather kindle, an interest in German opera among cultivated people.

The way in which he set about his task made it clear that musical life in Dresden now possessed a man of power, who would keep steadfastly in view the success of his undertaking, without concerning himself as to whether he were breaking with old traditions, abolishing old and convenient usages, or even giving personal offence. He knew that, in order to prosper, German opera must command the sympathy of the German people. The court, he was also aware, took but a languid interest in it, while the aristocracy considered foreign music more *distingué*, and had as a body no community of feeling with the people. For this reason his first step, a very startling one to Dresden society, was to publish in the *Abendzeitung*, a literary paper with a large circulation, an article addressed to the 'Amateurs of Dresden,' laying down the conditions necessary to his undertaking. Modestly bespeaking the indulgence of the public for the first attempts of a new institution, and frankly owning that real excellence

would only be attained after many failures, the whole article shows how clearly he perceived the goal at which he was aiming, and how energetically he directed his course towards it from the very first. 'The Italians and the French,' he says,

'have fashioned for themselves a distinct form of opera, with a framework which allows them to move with ease and freedom. Not so the Germans. Eager in the pursuit of knowledge, and constantly yearning after progress, they endeavour to appropriate anything which they see to be good in others. But they take it all so much more seriously. With the rest of the world the gratification of the senses is the main object; the German wants a work of art complete in itself, with each part rounded off and compacted into a perfect whole. For him, therefore, a fine *ensemble* is the prime necessity.'

It had been so much the habit hitherto in Dresden for society to look to the court, and mould its tastes in fashion in accordance with those set from above, that it was almost an impossibility for a court official to talk about his work as if he were in any sense personally responsible for it, or wished to be considered the head of his own institution. People were aware that Weber had been leading a free and restless life as an independent artist; and that his songs of war and liberty had endeared him to the heart of young Germany. Hence he was set down as a revolutionary spirit aiming at dangerous political innovations; though as a fact he was no politician, and never went beyond the general interest natural to a cultivated man in forms of government, social conditions and the universal rights of man. Another of his actions which excited remark was the giving a very gay dinner and ball to his staff, himself the life and soul of the party. How could he expect to keep up the respect of his subordinates, if he began by treating them in this way? His singers and actors were indeed very much surprised by his strictness and punctuality in all business matters. At first this aroused much dissatisfaction, but when it was found that he could make an opera go in all its parts, that at rehearsal his ears and eyes were everywhere at once, that he was as familiar with the details of acting, dressing and scenery as he was with the music, and master of all the ins and outs of the opera as a whole, then a higher ideal gradually dawned upon the company, and an immense respect for their new director.

The first opera he produced was Méhul's 'Joseph' (Jan. 13, 1817). As had been his successful habit in Prague, he published two days beforehand in the *Abendzeitung* an article giving some information about the new opera. The performance was excellent; indeed, all that could be desired, as far as the *ensemble* went, though the solo-singers were but indifferent. The engagement of competent leading artists was his next care. Here he acted upon the principle that German opera was not to be confined to native works only, but should also

produce Italian and French operas. To this end a numerous, well-trained and thoroughly cultivated body of artists was requisite, and he felt it necessary to engage at least three leading sopranos, one first-rate tenor and one first-rate bass. His Intendant sent him in Mar. 1817 on a mission to Prague, with the view of engaging Fräulein Grünbaum, then singing at the theatre there. On the 28th he conducted his 'Silvana,' and was enthusiastically received, the people of Prague taking every means of showing how much they felt his loss. Immediately after his return he went to Leipzig, and played his concerto in E_b at a Gewandhaus concert, his scena from 'Atalia' and his 'Kampf und Sieg' being also in the programme. Grünbaum sang in Dresden, but was not engaged; various other stars were unsuccessful, and the year 1817 came to a close without any real acquisition having been made. However, Weber had secured a regular chorus and chorus-master, the post being filled first by Metzner, and then towards the close of 1819 by Johannes Micksch. The latter had studied in Italy, and was considered a first-rate teacher of singing; his principal object, however, was not so much expression as the production of a full and even tone, which occasioned some differences of opinion between him and Weber. On the whole, however, he proved an excellent teacher, and was duly appreciated.

A third reform undertaken by Weber in the early part of 1818 was the re-arrangement of the orchestra. The band had been hitherto placed in the same manner as at the Italian opera, but this disposition he wished to alter for one more suited to the component parts of a modern orchestra, and to the greater importance assigned to the instrumental part of an opera. The change was at first strongly opposed, and he was obliged for the time to desist by the King's express command. Bit by bit, however, he made the changes he wanted, and his new arrangement having proved itself perfect, was permanently maintained.

Weber's work in Dresden very nearly came to an end in a few months' time, for on June 27, 1817, a post as Kapellmeister in Berlin fell vacant, and Count Brühl the Intendant at once entered into negotiations with him on the subject. It was an appointment he was strongly inclined to accept. Berlin had many attractions for him, and so far society in Dresden had done little to make his residence there agreeable. The burning of the Berlin theatre on July 31, however, put a stop to the negotiations, and though several times renewed, nothing came of them. One result at any rate was that his appointment at Dresden was made for life, and that he was also admitted to a share in the direction of the musical services at the Catholic Chapel Royal. He conducted for the first time Sept. 24, 1817, the music being a

Salve Regina by Schuster and a litany by Naumann, for whose church music Weber had a great admiration. It is an evidence of his devout turn of mind that before this his first official participation in divine service he confessed and received Communion. Now that he was often called on to compose for court festivities, the duties of his post became varied and extensive, and absorbed much time. His colleague Morlacchi had frequent leave of absence, and passed long periods of time in Italy (e.g. from Sept. 1817 to June 1818), and then all his work fell upon Weber. A man loving freedom from restraint as he did would have found it very hard to carry on his work with the cheerfulness and elasticity of spirit so remarkable in him, if he had not had a constant spring of happiness and refreshment in married life. His union with Caroline Brandt took place at Prague, Nov. 4, 1817. On their wedding tour the young couple gave concerts at Darmstadt and Giessen, appeared in Gotha before the Duke, and then went home to Dresden, which they reached Dec. 20.

To the early years of his work in Dresden belong most of Weber's *compositions d'occasion*. His sincere devotion to the royal family made him hail opportunities of showing his loyalty, so that several of these works were undertaken of his own motion, and did not always meet with proper acknowledgment. The fullest year in this respect was that of 1818, the 50th anniversary of the King's accession. Besides two or three smaller works, Weber composed a grand Mass in E \flat for the King's name-day, and for the accession-day (Sept. 20) a grand Jubel-Cantata, which the King did not allow to be performed, so he added the well-known Jubel-Ouverture.¹ The Mass in G may also be counted as belonging to this year, since it was finished on Jan. 4, 1819, for the golden wedding of the King and Queen. These official duties were not despatched perfunctorily, or as mere obligations. Into each he put his full strength, though well aware, as he wrote to Gänsbacher (Aug. 24, 1818), 'that they were but creatures of a day in the world of art, and from their ephemeral nature always disheartening.' Shortly after the performance of the Mass in G he was asked to write a festival opera for the marriage of Prince Friedrich August. He took up the idea with great earnestness, chose for his subject the tale of Alcindor in the *Arabian Nights*, and had already begun to think out the music, when he found (June 28) that his commission had been withdrawn, and Morlacchi requested to prepare an Italian piece for the ceremony (Oct. 9).

COMPOSITION OF 'DER FREISCHÜTZ.'—Had 'Alcindor' been written, Weber and Spontini might have been directly rivals, for Spontini's opera of that name, composed a few years later

at Berlin, is drawn from the same source. Perhaps also the work on which Weber's world-wide fame rests, and which was to give him a triumph over Spontini, might have taken another form, or never have been written at all. He had already been at work on it for two years. Soon after his removal to Dresden he became intimate with Friedrich Kind, who, after throwing up his employment as an advocate in Leipzig, had been living in Dresden solely by literature. Weber having proposed to him to write a libretto, Kind heartily assented, and the two agreed on Apel's novel of 'Der Freischütz,' which came out in 1810 and had excited Weber's attention. Kind wrote the play in seven days; on Feb. 21, 1817, he and Weber sketched the plan together, and by Mar. 1 the complete libretto was in Weber's hands. The composition did not proceed with equal celerity; on the contrary, Weber took longer over this than over any other of his operas. Bit by bit, and with many interruptions, it advanced to completion. The sketch of the first number—the duet between Agathe and Aennchen, with which the second act begins—was written July 2 and 3, 1817. Nothing more was done that year, except the sketch of the terzet and chorus in the first act ('O, diese Sonne') and Agathe's grand air in the second (Aug. 6 to 25). In 1818 he only worked at the opera on three days (Apr. 17, 21 and 22). On Mar. 13, 1819, he wrote the sketch of Caspar's air in D minor, which ends the first act. Then follows another six months' pause, after which he set to work continuously on Sept. 17, and the last number, the overture, was completed on May 13, 1820.

The court compositions of 1818 may have hindered his progress in that year, but in the summer of 1819, without any pressure from without, solely following the bent of his own genius, he wrote several of his finest PF. compositions for two and four hands, including the Rondo in E \flat , op. 62, the 'Auforderung zum Tanze,' op. 65, and the Polacca brillante in E, op. 72. The PF. Trio also and many charming Lieder belong to this summer, which Weber passed, like those of 1822, 1823 and 1824, in a little country place, Hosterwitz, near Pillnitz.² By the time 'Der Freischütz' was at last finished, his delight in dramatic production had reached such a pitch that he at once began and completed another dramatic work, and started at any rate on a third. Count Brühl, Intendant of the Berlin theatres, had asked him for some new music to Wolff's play of 'Preciosa,' Eberwein's not being satisfactory. Weber did as he was requested, and wrote the music—'a heavy piece of work and an important one, more than half an opera,' as he says himself—between May 25 and July 15, 1820. In the meantime he was working at a comic opera, 'Die drei

¹ Autograph dated Sept. 11, 1818.

² The house he stayed in is still standing, and bears an inscription.

Pintos,' the libretto by Theodor Hell, a Dresden poet, whose real name was Karl Winkler. This work was still progressing in the following year.

Count Brühl, who had a great esteem for Weber, informed him in the summer of 1819 that it was his intention to produce 'Der Freischütz,' at the opening of the new theatre, then in course of erection by Schinkel. The building was to have been finished in the spring of 1820, but was not ready till a year later. Weber had intended to take the opportunity of his visit to Berlin for making a professional tour, but it did not seem advisable to postpone this for so long. For the last two years he had been out of health, and disquieting symptoms of the malady which brought his life to a premature close had begun to show themselves. Relaxation and refreshment were urgently necessary. He also wished, after this interval of ten years, to appear again in public as a pianist. He started with his wife July 25, 1820, went first to Leipzig, to his intimate friend Rochlitz, then on to Halle. His settings of Körner's 'Leyer und Schwert' had made Weber the darling composer of the German student, as he discovered at Halle. The greatest enthusiasm prevailed at the concert he gave there, July 31. Among the students with whom he formed relations was J. C. G. Loewe, afterwards the greatest of German ballad-composers, who took the whole arrangements for the concert off his hands.¹ Still more enthusiastic was his reception by the students of Göttingen, where he arrived Aug. 11, and gave a concert Aug. 17. After it he was serenaded by the students, who sang his Lied 'Lützow's wilde Jagd,' and, on his coming down to talk with them, crowded round him cheering. Thence they went by Hanover to Bremen, Oldenburg and Hamburg, where he left his wife, going on to Lübeck, Eutin (his birthplace, which he had not visited since 1802) and Kiel, from whence he crossed over to Copenhagen. This was the most brilliant point of his journey. He was presented to the King and Queen, played at court on Oct. 4, and at a public concert Oct. 8, overwhelmed with applause on both occasions. After another concert at Hamburg on his way back, he reached Dresden, Nov. 4.

As a great pianist Weber was often asked to give lessons, and did so. Pupils in the higher sense of the word, that is to say, artists stamped with his own sign-manual as composers or pianists, he had none. For this his artistic

disposition was too peculiar, his character too restless and unmethodical. We find a pupil named Freytag from Berlin studying the piano and composition with him in Prague in 1816, and are told that he made his début at a concert of Weber's (Mar. 29), to his master's satisfaction, but we never hear of him again from that day forwards.² Marschner (*q.v.*) communicated with him in 1818, sending him his opera 'Heinrich IV. und D'Aubigné' from Pressburg, and coming himself, Aug. 18, 1819. Weber was much interested in the opera, and secured its performance at Dresden, where it was given for the first time, July 19, 1820.³ Marschner settled in Dresden in the beginning of Aug. 1821, and in 1824 was appointed Musik-director of the opera, a post he retained till Weber's death. The two maintained an intercourse which at times was animated, though Weber never found Marschner a congenial companion. Marschner was undoubtedly strongly influenced by Weber's music; it is evident in all his compositions during his stay in Dresden, and also in his opera 'Der Vampyr.' And yet he cannot be called a pupil of Weber. When he settled in Dresden he was 26, and a formed musician, so that after passing through the Weber period he recovered his independence in the 'Templer und Jüdin' and 'Hans Heiling,' Weber's most devoted and only real pupil was Jules Benedict of Stuttgart. He came to Weber in Feb. 1821, and his account of their first interview is so charming that we venture to transcribe it.

'I shall never forget the impression of my first meeting with him. Ascending the by no means easy staircase which led to his modest home, on the third storey of a house in the old market-place, I found him sitting at his desk, and occupied with the pianoforte arrangement of his "Freischütz." The dire disease which but too soon was to carry him off had made its mark on his noble features; the projecting cheek-bones, the general emaciation, told their own tale; but in his clear blue eyes, too often concealed by spectacles, in his mighty forehead fringed by a few straggling locks, in the sweet expression of his mouth, in the very tone of his weak but melodious voice, there was a magic power which attracted irresistibly all who approached him. He received me with the utmost kindness, and, though overwhelmed with double duties during Morlacchi's absence, found time to give me daily lessons for a considerable period.'

Benedict goes on to relate how Weber played him 'Freischütz' and 'Preciosa,' works then unknown to the world, and what a fascinating effect both he and his compositions made on him; but what impressed him even more was his 'rendering of Beethoven's sonatas, with a fire and precision and a thorough entering into the spirit of the composer, which would have given the mighty Ludwig the best proof of Weber's reverence and admiration for his genius.'

PRODUCTION OF 'DER FREISCHÜTZ.'—Benedict was fortunate enough to share the

¹ Some papers entitled *Scenes from Dr. Karl Loewe's Life* have been published by Dr. Max. Runze (from MS. notes by Loewe's daughter) in the *Musikwelt* (Berlin, 1881). No. 11 (Apr. 9, 1881) contains a charming picture of Weber's concert at Halle, and the part Loewe took in it. Unfortunately it is historically inaccurate. Dr. Runze makes Weber play in July 1820 his Concertstück in F minor, which was not written till 1821, and played in public for the first time, June 26, in Berlin. Nor is this all; Dr. Runze declares that in this his own composition Weber could not keep time with the orchestra, and says that in the fire of playing he accelerated the tempo, the band hurried after him, but by and by fell behind, and Loewe had to stop Weber and start them again. Dr. Runze's description would apply to the playing of a bad amateur, not to that of a finished Kapellmeister like Weber. All this, too, about the execution of a piece not then in existence!

² Weber's *Literarische Arbeiten*, p. 109 (*Lebensbild*, vol. III.).

³ Weber also wrote an article in its behalf: see p. 224 of the *Lebensbild*, and elsewhere.

⁴ *The Great Musicians*, edited by Francis Hueffer; Weber, by Sir Julius Benedict, p. 61 (London, 1881).

brightest and most triumphant bit of Weber's short life with him. After 'Preciosa' had been played for the first time with Weber's music (Mar. 14, 1821) at the Berlin opera-house, and very well received, the day drew near for the opening of the new theatre, in which 'Der Freischütz' was to be the first opera performed.¹ Weber had been invited to rehearse and conduct the opera himself, and for this purpose arrived in Berlin, May 4. Benedict followed two or three weeks later.

SPONTINI (*q.v.*) was at that time the ruling spirit in operatic matters at Berlin. The King was a great admirer of his music, and he had many adherents among the court and in society. In the rest of the world, however, opinions were mingled. During the war a strong feeling of nationality had developed in Germany, and there was a prejudice against foreigners, especially against foreigners hailing from Paris. Hence that a Franco-Italian should be installed, on terms of unusual liberality, in the chief musical post in the capital gave great umbrage. There is no question that Spontini, apart from his blunders, was made a scapegoat, and that the dislike of the people of Berlin was as much due to political and social as to musical reasons.

All at once Weber stepped on the scene with his new opera. We can quite understand how ardently the patriots of Berlin must have longed for a brilliant success, if only as a counterpoise to Spontini. Obviously, too, it was impossible to prevent a certain anxiety lest Weber was not man enough to sustain with honour this conflict with the foreigner. He was known as a gifted composer of songs and instrumental music, but his earlier operas had not been undisputed successes, and for the last ten years he had done nothing at all in that line. On all these grounds the first performance of 'Der Freischütz' was looked forward to with a widespread feeling of suspense and excitement.

Weber thus could not but feel that much was at stake, both for himself and for the cause of German art. As if to point the contrast still more forcibly between himself and Spontini, between native and foreign art, Spontini's 'Olympie,' entirely remodelled by the composer after its production in Paris, had been given for the first time in Berlin (May 14) only a month before 'Der Freischütz,' with a success which, though not enduring, was enormous at the time. Weber's friends were full of dismay, fearing that 'Freischütz' would not have a chance; Weber alone, as if with a true presentiment of the event, was always in good spirits. The rehearsals began on May 21, and the performance was fixed for June 18, a day hailed by Weber as of good omen, from its being that of the battle of Waterloo. So entirely was he free

from anxiety, that he employed his scanty leisure in composing one of his finest instrumental works, the Concertstück in F minor, finishing it on the morning of the day on which 'Der Freischütz' was produced. Benedict relates how he was sitting with Weber's wife when the composer came in, and played them the piece just finished, making remarks as he went, and what an indelible impression it made on him. 'He was certainly one of the greatest pianists who ever lived,' he adds.²

Weber's presentiment did not fail him. The 18th of June was as great a day of triumph as ever fell to the lot of a musician. The applause of a house filled to the very last seat was such as had never been heard before, in Germany at any rate. That this magnificent homage was no outcome of party spirit was shown by the enduring nature of the success, and by the fact that it was the same wherever 'Der Freischütz' was heard. No sooner had it been produced in Berlin than it was seized upon by nearly all the principal theatres in Germany. In Vienna it was given on Oct. 3, and, though to a certain extent mutilated and curtailed, was received with almost greater enthusiasm than in Berlin. The feeling reached its height when Weber, on a visit to Vienna, conducted the performance in person, Mar. 7, 1822. There is an entry in his diary:

'Conducted the "Freischütz" for Schröder's benefit. Greater enthusiasm there cannot be, and I tremble to think of the future, for it is scarcely possible to rise higher than this.' To God alone the praise!

Weber thought it desirable to appear in public at a concert before leaving Berlin. The second representation of 'Der Freischütz' took place on the 20th, and the third on the 22nd, of June. On the 25th he gave his concert in the hall of the new theatre, and played his Concertstück, completed that day week, for the first time in public. Others of his compositions heard on the same occasion were the Italian scena from 'Atalia,' and the Variations for PF. and violin on a Norwegian theme. His colleague in the latter piece was the eccentric violinist, Alexandre Boucher, who, having asked permission to introduce a cadenza of his own in the finale of the variations, improvised on themes from 'Der Freischütz,' but wandered off so far that he could not get back again, seeing which, he put down his violin, and throwing his arms round Weber exclaimed enthusiastically, 'Ah, grand maître! que je t'aime, que je t'admire!' The audience joined in with loud cheers for Weber.

Weber returned to Dresden, July 1, 1821. In comparison with other places in Germany, Dresden was in no special hurry to produce 'Der Freischütz,' though it had not been able altogether to shut its ears to the reports of its

¹ It was not the first actual performance. That distinction fell to Goethe's 'Iphigenia' (May 26), succeeded for the next few days by one or two other plays.

² Benedict's *Weber*, p. 65.

³ He had undertaken to write a new opera 'Euryanthe' for Vienna.

colossal success. The composer, in spite of all the pains he took to show his loyalty, was no favourite with the King and court. He was the singer *par excellence* of Körner's lyrics, and anything which called up reminiscences of the war that inspired those songs could not but be painful to the King of Saxony. He tried to be just towards Weber, and acknowledged his services in many ways, but his sentiments were well known and had their influence on the courtiers. From the time of the first appearance of 'Der Freischütz' till Weber's death, there is not a sign that at court the smallest pride was felt in the fact of Dresden possessing so great a composer. He was all but allowed to accept the post of court Kapellmeister at Cassel, with the liberal salary of 2500 thalers (£375)—1000 thalers more than he received at Dresden. The Minister at last offered him an increase of 300 thalers, calculating that with his attachment to Dresden that would be sufficient inducement to him to remain; and he was not deceived. The additional salary, however, was deprived of all value as a distinction by its being also bestowed on Morlacchi. This took place in August and September of the year in which 'Der Freischütz' saw the light, but even some years later Weber's official superiors would not see that the Kapellmeister of the Dresden German opera was a man of world-wide fame. Perhaps they really did not see it. When Weber was in Berlin, Dec. 1825, for the production of 'Euryanthe,' his Intendant, von Lüttichau, happened to be present when Weber was leaving the theatre after rehearsal, and seeing a large crowd waiting at the door, and all hats raised with the greatest respect, he turned to him and said with astonishment, 'Weber, are you then really a celebrated man?'

'Der Freischütz' was performed in Dresden for the first time, Jan. 26, 1822, and met with a more enthusiastic reception than had ever been known there before. At the close of the performance the storm of applause defied all restraint. A few isolated cases were found of people who did not like it, but their comments were unheard in the general approval. Kind, the librettist, could not bear the music, because it threw his own merits into the shade, and its ever-increasing success irritated the petty vanity of this *bel esprit* to such an extent as to end in a complete breach of his friendship with Weber. Spohr, who had moved to Dresden¹ with his family, Oct. 31, 1821, heard it there for the first time, and was not favourably impressed. His failure to understand Weber's music has been mentioned already, and this is fresh evidence of it; but, as before, it made no difference in their relations. On the contrary, Weber showed his esteem for Spohr by warmly

recommending him to Generaldirector Feige, of Cassel, for the post of Kapellmeister, which he had himself declined, but which, as is well known, Spohr accepted, and filled with credit up to a short period before his death.

Ludwig Tieck, too, then resident in Dresden, never could reconcile himself thoroughly to 'Der Freischütz,' though he heartily appreciated 'Euryanthe.' The two men, much as they differed in their views on dramatic art, formed a lasting friendship, expressed with frankness on both sides. Weber was seldom absent from Tieck's dramatic readings of great works, and was a most attentive listener. Speaking generally, he was on excellent terms with the poets of the day. With Goethe indeed he never got on, though they met several times; but with Jean Paul, and also with Achim von Arnim, he was intimate. Arnim, like Tieck, belonged to the romantic school, and it was natural that there should be sympathy between them; but Weber was also very friendly with Wilhelm Müller, author of the 'Müllerlieder' and the 'Winterreise.' Müller visited him in Dresden and dedicated a volume of poems to him in the autumn of 1824, but not one of these did Weber set. His day for writing Lieder was over. Of Tieck's poems he only composed one ('Sind es Schmerzen, sind es Freuden,' from 'Die schöne Magelone').

COMPOSITION OF 'EURYANTHE.'—During the latter half of 1821 Weber was at work upon the comic opera 'Die drei Pintos,' begun in 1820, but never to be finished by him. He was drawn off towards work of a different kind. The criticisms on 'Der Freischütz' were almost always on points of form, and mainly resolved themselves into this, that the opera did not contain enough of those larger, artistically constructed, forms which betray the hand of the master. Hence, was it certain that Weber was really master of his art, or did he not owe his great success mainly to his heaven-sent genius? Weber was very sensitive to public criticism, even when so ignorant, one-sided and absurd as this, and he determined to write a grand opera, and show the world what he was capable of. When, therefore, an invitation to write a new opera arrived (Nov. 11, 1821) from Barbaja, of the Kärnthnerthor theatre in Vienna, he seized the opportunity with avidity. The libretto was to be written by Frau Helmina von Chezy, who had been in Dresden since 1817, well received in literary circles, and not without poetical talent. She offered him several subjects, and he selected 'Euryanthe.' After several attempts, in which Weber gave her active assistance, she succeeded in putting her materials into something like the shape he desired. His idea of an opera was that the music should not be so entirely dominant as in Italian opera, but that the work should be a drama, in which the words should have a real

¹ Thus all the three representatives of German romantic opera, Weber, Spohr and Marschner, were living in the same place.

interest of their own, and in which action, scenery and decorations should all contribute to the vividness and force of the general impression: in short, that the impression made by an opera should be based on a carefully balanced combination of poetry, music and the descriptive arts. These principles he had endeavoured to carry out in 'Der Freischütz'; in 'Euryanthe' he hoped to realise them fully. The words of the first act were ready by Dec. 15, 1821, and Weber set to work with all his might.

Thinking it well to study the circumstances under which his new work was to appear, he started, Feb. 10, 1822, for Vienna, stopping on the way to conduct 'Der Freischütz' (Feb. 14) at Prague, with unmeasured success. He attended a performance of the same opera in Vienna on the 18th, but found it far from edifying. How he conducted it himself on Mar. 9, and what a reception it had, has been already mentioned. This one work gave him a popularity in Vienna that became almost burdensome. He was urged to settle there altogether, and undertake the direction of the German opera. There also he received an invitation to write a grand opera for Paris. In the midst of all this excitement he fell ill with a violent sore throat. That his disease was making progress was evident. Still he appeared in public on two occasions besides the 'Freischütz' performance, once at a concert given by Böhm the violinist, on Mar. 10—when he conducted his 'Jubel-Ouverture,' and the men's choruses from the 'Leyer und Schwert,' with enormous success—and once at a concert of his own (Mar. 19), when he played his Concertstück, which, oddly enough, was not equally appreciated. By Mar. 26 he was again at home.

All the summer he remained at Hosterwitz, and there was composed by far the greatest part of 'Euryanthe,' for he had the same house the following summer. His most important piece of official work at this time was the production of 'Fidelio.' That opera, though composed in 1805, and reduced to its final shape in 1814, had never been given in Dresden, for the simple reason that till Weber came there was no German opera. Though it was impossible for him to ignore that the music is not throughout essentially dramatic, he felt it to be a sublime creation, for which his admiration was intense, and he strained every nerve to secure a performance worthy of the work. An animated correspondence ensued between him and Beethoven. Weber's first letter was dated Jan. 28, 1823; Beethoven replied Feb. 16, and Weber rejoined on the 18th. After that there were letters from Beethoven of Apr. 9, June 5 and 9, and Aug. 11, the last enclosing a sonata and variations of his own composition. Weber was a great admirer and a remarkable exponent of Beethoven's PF. music, especially of his

sonatas, a fact which Beethoven seems to have known. The correspondence has been lost, except a fragment of a rough copy of Weber's,¹ conclusively proving his high opinion of 'Fidelio.' The score sent by Beethoven, Apr. 10, is still at the Dresden court theatre. The first performance took place Apr. 29, with Wilhelmine Schröder as Leonore.

In Sept. 1823 Weber started for Vienna to conduct the first performance of 'Euryanthe.' Benedict accompanied him. Barbaja had assembled a company of first-rate Italian singers and was giving admirable performances of Italian operas, especially Rossini's. Rossini had been in Vienna, and had rehearsed his operas himself. The public was almost intoxicated with the music, and it was performed so admirably that even Weber, who had previously been almost unjustly severe on Rossini's operas, was obliged, to his vexation, to confess that he liked what he heard there. It was unfortunate that the singers cast for 'Euryanthe,' though as a whole efficient, were stars of the second order. Still, 'Der Freischütz' had prepossessed the public, and the first performance of the new work was enthusiastically applauded. But the enthusiasm did not last. The plot was not sufficiently intelligible, people found the music long and noisy, and after the second and third representations, which Weber conducted with great success, the audiences gradually became cold and thin. After his departure Conradin Kreutzer compressed the libretto to such an extent as to make the opera a mere unintelligible conglomeration of isolated scenes, and after dragging through twenty performances, it vanished from the boards.

After the enormous success of the 'Freischütz,' 'Euryanthe' was virtually a fiasco. Neither had Weber much consolation from his fellow-artists. In many instances envy prevented their seeing the grand and beautiful ideas poured forth by Weber in such rich abundance; and there were artists above the influence of any such motive, who yet did not appreciate the work. Foremost among these was Schubert; even if his own attempts at opera had not shown the same thing before, his seeing no merit in 'Euryanthe' would prove to demonstration that a man may be a great composer of songs and yet know nothing of dramatic music. The only really satisfactory part of the visit was his intercourse with Beethoven, who welcomed him heartily.² At one time Beethoven had not valued Weber's compositions at a high rate, but his opinion of the composer of 'Der Freischütz' had risen enormously. He did not go to 'Euryanthe':

¹ Given by Max von Weber in the *Biographie*, II. 466. The dates given are not entirely in accordance with those in the biography, but I have followed Jähns's careful epitome of Weber's diary, now in the State Library of Berlin.

² See SCHUBERT, Vol. IV. p. 602.

³ See BEETHOVEN, Vol. I. p. 296.

there would have been no object in his doing so, now that his troubles with his hearing had settled down into total deafness.

Weber left Vienna Nov. 5, conducted the 50th representation of 'Der Freischütz' in Prague on the 7th, and arrived in Dresden on the 10th. By his desire Benedict remained in Vienna, to keep him informed of the progress of 'Euryanthe'; but what he heard was so far from pleasant that he did not venture to report it. Weber had put his full strength into the work, intending it as a demonstration of his power and capacity. With the keenest anxiety he followed its progress, marking the impression it produced, not only in Vienna, but in every theatre which performed it. When he found that in most places it received only a *succès d'estime*, and that opinions as to its value were divided, even amongst unbiassed connoisseurs, he fell into deep depression. Benedict, on his return from Vienna, thought him looking ten years older, and all the symptoms of his malady had increased. To illness it was undoubtedly to be attributed that all his old energy, nay, even his love of music, for the time abandoned him. His compositions seemed to recede into the far distance, and in the summer of 1824 he writes in a bitter mood to his wife from Marienbad, where he was taking the waters, 'I have not an idea, and do not believe I ever composed anything. Those operas were not mine after all.' When asked how he did, he would reply, 'I cough, and am lazy.' During fifteen months he composed absolutely nothing, except one little French romance.

Many disappointments, however, as 'Euryanthe' brought him, there were places where it was at once valued as it deserved. In Dresden the first performance took place Mar. 31, 1824, with a success that equalled Weber's highest expectations. As an instance, Tieck pronounced it to contain passages which Gluck and Mozart might have envied. And as in stage matters the first impression is apt to be the lasting one, even down to a later generation, the people of Dresden continued to understand and love 'Euryanthe.' In Leipzig it was much the same, the opera occupying a place in the repertory from May 1824. Rochlitz heard it May 24, 1825, and next day wrote Weber almost the best and most discerning criticism of the time.¹ In Berlin there was considerable delay in producing the opera, for which Spontini received more than his share of the blame. The first performance took place on Dec. 23, 1825, and in Berlin too, where Weber's most devoted adherents were to be found, the effect it produced was great and lasting. The composer conducted in person, though, suffering as he was from mortal illness, it took all his indomitable energy to make the

mind rise superior to the body. It was his last appearance in Berlin.

THE INVITATION TO LONDON.—Weber knew that his days were numbered. His great desire was to leave enough to place his family above fear of poverty. It was his love for them which roused him from the languor and depression into which he had fallen after the completion of 'Euryanthe.' The immediate impulse was a letter from Charles Kemble, then lessee of Covent Garden Theatre, inviting him to write an opera in English. London had also participated in the 'Freischütz' mania, no fewer than three theatres playing it at the same time. Kemble added a request that he would come to London to produce the new opera in person, and conduct 'Der Freischütz' and 'Preciosa.' Weber did not hesitate long, and the two soon agreed on 'Oberon' as the subject of the opera, the libretto to be drawn up by Planché. The terms took longer to arrange. Kemble's offer of £500 Weber considered too low, and Kemble thought Weber's demands much too high. At last, however, he agreed to give £1000.² Before the affair was concluded Weber consulted his physician, Dr. Hedenus, as to the possibility of the journey in his then state of health. The reply was that if he would give up conducting and composing, and take a year's complete rest in Italy, his life might be prolonged for another five or six years. If, on the other hand, he accepted the English commission, his life would be measured by months, perhaps by weeks. Weber replied by his favourite motto, 'As God will,' and settled to go.

Although he had undertaken to compose this opera from a desire to make money, he would not have been the high-minded artist he was if he had not set to work at it with all his might. So much was he in earnest that, at the age of 37, and with one foot in the grave, he began to learn English systematically, and was soon able to carry on his own correspondence in English, and when in London astonished everybody by the ease with which he spoke.

The first and second acts reached him Jan. 18, 1825, and the third on Feb. 1. He set to work Jan. 23, the first number he composed being Huon's grand air in the first act. He laid the work aside during the summer, but resumed it Sept. 19. The last number, the overture, was completed in London, Apr. 29, 1826.

By medical advice he took the waters at Ems in the summer of 1825, starting from Dresden on July 3. His route lay through Naumburg to Weimar, where he made a last unsuccessful attempt to enter into close relations with Goethe, and was warmly welcomed by Hummel and his family. Thence he went by Gotha to Frankfort, greeting his old friend Gottfried Weber for the last time, and then by

² So says Benedict, p. 106, and elsewhere. Max von Weber's account varies slightly.

¹ Jähns (p. 369) gives the most important part of his letter.

Wiesbaden to Ems. This journey must have convinced him of his extraordinary popularity. People of all ranks vied with each other in showing him kindness, respect and admiration. At Ems he was admitted into the circle of that accomplished man the Crown Prince of Prussia (afterwards Frederick William IV.), and his wife, an unusual distinction. But the musician tottering to his grave was no longer able to enjoy the sunshine which shone so brightly on his last days.

The time for Weber's departure for England drew on. On Feb. 5 he conducted 'Der Freischütz' in Dresden for the last time, and took leave of his band, all except Fürstenau, the well-known flute-player, who was to travel with him. He chose the route through Paris, and made the acquaintance of the principal musicians there, specially enjoying the attentions of Cherubini, for whom he had always had a high respect. A performance of Boieldieu's 'La Dame blanche' enchanted him. 'What grace! what wit!' he writes to Theodor Hell, at Dresden, 'no such comic opera has been written since "Figaro."'

PRODUCTION OF 'OBERON.'—On Mar. 5¹ he arrived in London, and was most hospitably received by Sir George Smart, then organist of the Chapel Royal. On the 6th he went to Covent Garden Theatre to view the scene of his future labours; he was recognised, and the cheers of the spectators must have assured him of his popularity in London. On Mar. 8 he conducted a selection from 'Der Freischütz' at one of the 'oratorio concerts,' and here his reception was even more enthusiastic, nearly every piece from the opera being encored. On the 9th the rehearsals for 'Oberon' began, and Weber perceived at once that he had at his disposal all the materials for a first-rate performance. To please Braham, who took the part of Huon, he composed two additional pieces, a grand scena and aria ('Yes, even love'), which Braham substituted for the grand air in the first act, and the prayer in the second act ('Ruler of this awful hour'). The former is never sung in Germany, being far inferior in beauty to the original air, but the prayer is retained, and is indeed one of the gems of the work. The first performance took place Apr. 12. The music went beautifully, and the composer had an even more enthusiastic reception than that bestowed on Rossini two or three years before. The aristocracy alone, with few exceptions, held aloof. Weber was not the man to show himself obsequious, and on the other hand his look and manner were too unpretending to be imposing. By May 29 'Oberon'² had reached its twenty-eighth performance, the first twelve having been conducted by himself according

to his contract. The following appeared in *The Harmonicon* in an article by Scudo on 'Oberon':

'It is impossible to quote an instance of a great man in literature or in the arts whose merit was entirely overlooked by his contemporaries. As for the death of Weber it may be explained by fatigue, by grief without doubt, but, above all, by an organic disease from which he had suffered for years.'

Nevertheless the enthusiasm exhibited by the public at the first performance of 'Oberon' was not maintained at the following representations. The masterpiece of the German composer experienced much the same fate as 'Guillaume Tell' in Paris. In a letter to his wife, written on the very first night of performance, Weber says,

'My dear Lina, Thanks to God and to His all-powerful will I obtained this evening the greatest success of my life. The emotion produced by such a triumph is more than I can describe. To God alone belongs the glory. When I entered the orchestra, the house, crammed to the roof, burst into a frenzy of applause. Hats and handkerchiefs were waved in the air. The overture had to be executed twice, as had also several pieces in the opera itself. At the end of the representation I was called on to the stage by the enthusiastic acclamations of the public; an honour which no composer had ever before obtained in England. All went excellently, and every one around me was happy.'

Though his strength was constantly declining, he was always ready to lend his name or his services when he could be of assistance to others. Thus he took part in concerts given Apr. 27, May 1, 10 and 18 by Miss Hawes, Fürstenau, Kemble and Braham, even at one of Miss Paton's on May 30, six days before his death. A concert of his own on May 26 was a failure. The day was badly chosen, and Weber in his state of utter exhaustion had omitted two or three social formalities. Among other music given at this concert was his Jubel-Cantata (1818), put to different words, and a song ('From Chindara's warbling fount') just composed for Miss Stephens, who sang it to his accompaniment. It was his last composition, and the last time his fingers touched the keyboard.³

The preparations for his journey home were made in haste, for Weber was filled with an inexpressible longing to see his family once more. But his own words to a friend before leaving Germany, that he 'was going to London to die,' were fulfilled. Far from home and kindred he sank under his sufferings during the night of June 4, 1826. The following certificate of Weber's death was among the papers of Sir Julius Benedict:

'On examining the body of Carl M. von Weber we found an ulcer on the left side of the larynx. The lungs almost universally diseased, filled with tubercles, of which many were in a state of suppuration, with two vomicae, one of them about the size of a common egg, the other smaller, which was a quite sufficient cause of death. (Signed) F. Tencken, M.D.; Chas. F. Forbes, M.D.; P. M. Kind, M.D.; Wm. Robinson, Surgeon. 91 Great Portland Street, June 5, 1826, 5 o'clock.'

¹ Benedict (p. 115) says Mar. 6, but he is wrong.

² Concerning Mrs. Kealey's appearance in the part of the Mermaid, see *Mus. T.*, 1859, p. 140.

³ See *Mus. T.*, 1901, p. 162.

His body was laid in the grave at Moorfields Chapel, to the strains of Mozart's Requiem, on June 21. The funeral ceremonies were conducted as if for a person of the highest rank, and there was an enormous crowd. In 1844 the coffin was removed to Germany, and interred in the family vault at Dresden. (See WAGNER, p. 588.) The application for this transference was made by the widow to the Home Secretary, Oct. 5, 1844. A tablet was affixed to the house in Great Portland Street.

WEBER'S OPERAS.—To form a right estimate of Weber's music it is necessary to look upon him as a dramatic composer. Not that his other compositions are of no importance—quite the contrary; but in one and all may be discerned more or less plainly that dramatic genius which was the essence of his nature, and which determined their form, and gave them that stamp whereby they differ so strikingly from the productions of other artists. Composers gifted with the true dramatic instinct have always been rare in Germany, and it was this that Weber possessed in a high degree, higher perhaps even than Mozart. Being his most prominent characteristic, we will deal with his operas first.

1. The earliest, 'Die Macht der Liebe und des Weins,' was destroyed, apparently by himself. Of the second, 'Das Waldmädchen,' composed in Freiberg, there are extant three autograph fragments, containing in all 214 bars, the originals of some and copies of others being now in the State Library at Berlin.¹ These fragments seem to bear out Weber's own verdict that the opera was an immature production, not perhaps wholly devoid of invention. Although played several times, no complete score can now be found.

2. The libretto of 'Peter Schmoll und seine Nachbarn' was adapted by a certain Joseph Türke from a novel of the same name by Carl Gottlob Cramer (2 vols., Rudolstadt, 1798–1799). The book was one of the romances of knights and robbers with which the market was flooded after the success of 'Götz von Berlichingen' and 'Die Räuber.'² Cramer's 'Peter Schmoll' has no artistic merit, but it is less crude and sensational than some others of its class. The scene is laid not in the Middle Ages, but in the period of the French Revolution. Türke arranged the plot in two acts, and treated it after the fashion of the German Singspiel, with spoken dialogue. All this part, however, has been lost, the words of the songs alone being preserved in the score. The verses are rarely Türke's own, but were taken from the novel, which was interlarded, in the then fashion, with songs. Such verses as he did write are more than commonplace,

especially when intended to be comic; refined comedy being a rarity in German drama long after Peter Schmoll's day. The music shows great talent, perhaps artificially matured, but naturally so great and so healthy that not even the hot-house treatment to which it had been subjected could injure it permanently. Weber was impelled to produce operas before he had fully developed the feeling for logical harmonic progressions, nay, before he had mastered musical orthography itself, to say nothing of the skill necessary to construct musico-dramatic forms on a large scale. 'Peter Schmoll' affords a good opportunity for comparing the unequal, unpropitious developments of Weber's powers with those of Mozart. In Mozart the mastery of external means advanced step by step with the development of mental power. From the first he always had the two. Weber, at the time he composed 'Peter Schmoll,' had much to say that was original, but was without the technical training necessary to enable him to say it. To one capable of piercing through the defective form to the thought beneath, the unmistakable features of his individuality will often be discernible. Real dramatic characterisation is not to be expected from a boy of 14; so far his music is rather stagey than dramatic, but still he had, even then, unquestionably a brilliant talent for the stage. This is mainly apparent in the treatment of general situations, such as the second scene of the first act, where Schmoll, Minette and Hans Bast play at blindman's-buff in the dark. The melodies are throughout catching, often graceful and charming, always related to the German Lied, and never reflecting the Italian style. He puts almost all he has to say into the voice parts; the accompaniments being unimportant, at least as regards polyphony. There is much originality in the harmony, and the colouring is individual and full of meaning. Now it is precisely with harmony and colouring that Weber produces his most magical effects in his later operas. In his autobiography he relates how an article he read in a musical periodical about this time suggested to him the idea of writing in a novel manner, by making use of old and obsolete instruments. The instrumentation in 'Peter Schmoll' is indeed quite peculiar, No. 14, a terzet ('Empfanget hier des Vaters Segen'), being accompanied by two *flauti dolci* (see FIDDLE FLUTE), two basset-horns, two bassoons and string-quartet. His motive was not a mere childish love of doing something different from other people, but he had an idea that these strange varieties of tone helped to characterise the situation. In the passage named the peculiar combination of wind instruments does produce a peculiarly solemn effect. Again, in certain comic, and also in some mysterious passages, he uses two piccolos with excellent effect, giving almost a forecast of the spirit of 'Der Freischütz.' Minette sings

¹ The Weber collection, amassed with so much diligence by Prof. Jahns, was purchased some years ago for the Berlin State Library.

² The best-known work of the kind was 'Rinaldo Rinaldini' by Goethe's brother-in-law Vulpius.

in the first act a mournful song of a love-lorn maiden, and as the voice ceases the last bar is re-echoed softly by a single flute, solo, a perfect stroke of genius to express desolation, loneliness and silent sorrow, and recalling the celebrated passage in the third act of 'Euryanthe,' where the desolation of the hapless Euryanthe is also depicted by a single flute. Weber adapted the music of this romance to the song 'Wird Philomele trauern' (No. 5), in 'Abu Hassan,' and used some other parts of the opera in his later works, for instance the last song in the third finale of 'Oberon.' The overture to 'Peter Schmolli' was printed, after Weber's thorough revision of it, in 1807, and also a revised form of the duet 'Dich an dies Herz zu drücken,' in 1809.¹

3. The subject of 'Rübezahl,' a two-act opera begun by Weber in Breslau, but never finished, was taken from a legend of the Riesengebirge, dramatised by J. G. Rhode. The versification is polished and harmonious, but the action drags sadly. Rübezahl, the spirit of the mountain, having fallen in love with a mortal Princess, lures her into his castle, and keeps her prisoner there, but woos her in vain. Having managed to secure his magic sceptre, she gets rid of him by bidding him count the turnips in the garden, which at her request he turns into human beings for her companions. As soon as he is gone she summons a griffin, who carries her down again to her own home, and thus outwits Rübezahl. For variety's sake the poet has introduced the father, lover and an old servant of the Princess, who penetrate in disguise to the castle, and are hired by Rübezahl as servants; but they do not influence the plot, and have to be got rid of at the close.

These weaknesses, however, are redeemed by some supernatural situations, excellent for musical treatment. Of this libretto Weber says that he had composed 'the greater part,'² though the overture and three vocal numbers alone have been preserved.³ Even of these the second vocal number is unfinished, while the overture exists complete only in a revised form of later date.⁴ Those familiar with 'Der Freischütz' and 'Oberon' know Weber's genius for dealing with the spirit-world; but the Rübezahl fragments show extraordinarily few traces of the new language he invented for the purpose. The music, indeed—always excepting the revised form of the overture—is less Weberish than a great deal in 'Peter Schmolli,' nor is there any marked advance in the technique of composition. In a quintet for four soprani and bass,⁵ the princess bewails her loneliness, and sighs for her girl-companions, when Rübezahl bids her plant three

turnips, and call them Clärohen, Kunigunde and Elsbeth; he then touches them with his wand, and her three friends rise out of the ground and rush to her amid a lively scene of mutual recognition, Rübezahl standing by and making his reflections. The manner in which he has treated this scene indicates very clearly the state of Weber's development at the time. The phantoms evoked from the turnips sing like mortals, in strains differing in no degree from those of the princess. Twenty years later such a scene would inevitably have produced a series of the most individual tone-pictures, contrasting sharply with everything of mortal interest. As it is, the future dramatist and composer is but in the chrysalis stage, and the quintet is merely a very lively and effective stage scene, with some clever passages in it (the middle subject, 'schön sind der sterblichen Gefühle,' particularly fine), but with no traces of Weber's individuality.

4. With the next opera, 'Silvana,' we take leave of boyish compositions, and reach a higher stage of development. 'Silvana' and 'Abu Hassan' form the middle group of Weber's dramatic works, while 'Freischütz,' 'Preciosa,' 'Euryanthe' and 'Oberon' constitute the third and last. We have stated already that in 'Silvana' he used some material from 'Das Waldmädchen,' the libretto of which has been lost, except the few verses preserved in the score.

This opera, with its mediæval romanticism, is the precursor of 'Euryanthe,' and therefore of great interest in Weber's development. Independent of this, however, its merit as a work of art is considerable. The story of Silvana deals with emotions which are natural, true and intelligibly expressed, and the situations are not less fitted for musical treatment because they belong to a bygone period—seen through a legendary haze, but still an heroic period of great and lasting interest. Another point in favour of Hiemer's poem is that the plot develops itself naturally and intelligibly, the interest is well kept up, and there is the necessary variety of sensation. That Weber transferred to it musical ideas from 'Das Waldmädchen' can be verified in two instances only, one being the overture, the autograph of which is docketed 'renovata il 23 Marzo, 1809,' a term which must necessarily apply to the 'Waldmädchen' overture. The 'renovation' cannot have been of a very startling nature, judging by the music, which is neither interesting nor original. The second case is the air assigned to Krips the Squire, 'Liegt so ein Unthier ausgestreckt' (No. 2), the opening of which is identical with a ritornel in one of the 'Waldmädchen' fragments. It may therefore be assumed that the adaptation of old material was of a very limited description. The fact of there having been any adaptation at all may

¹ PF. score by Jähns (Berlin, Schlesinger).

² His autograph list shows that the first act contained 15 scenes, the second 12.

³ A chorus of spirits, a recitative and arietta and a quintet. (See Jähns's list Nos. 44, 45, 46 and 122, Anhang 2, No. 27.)

⁴ 'The Ruler of the Spirits,' the original existing MS. consisting of only the last eleven bars of the violin part.

⁵ With PF. accompaniment by Jähns (Schlesinger).

partly explain the extreme inequality between the separate numbers in 'Silvana,' but we must also take into account the inevitable distractions and interruptions among which it was composed at Stuttgart. The opera undoubtedly does not give the impression of having been conceived all at once, and this damages the general effect.

The progress in dramatic characterisation made by Weber since 'Rübezahl' and 'Peter Schmoll' is obvious. The knights of the period are more or less typical personages, and do not require much individualising. A composer's chief difficulty would lie in maintaining the particular tone adapted to each character consistently throughout the drama, and in this Weber has succeeded thoroughly. Count Adelhart especially, and Krips the Squire, are drawn with a master hand. The power of indicating a character or situation by two or three broad strokes, afterwards so remarkable in Weber, is clearly seen in 'Silvana.' For instance, the very first bar of the duet between Mechthilde and Adelhart, 'Wag' es, mir zu widerstreben' (Act ii. No. 9), seems to put the violent, masterful knight bodily before us. Another crucial point is the winding up of a *dénouement*, by massing the subjects together in a general movement which shall keep the interest of the spectator at a stretch; and of this we have an excellent specimen in the finale of Act ii. Speaking of the music simply as music, though by no means perfect in form, the ideas are abundant and original. The melodies partake of the Volkslied character, there is a riotous fancy combined with the drollest comedy, and a grace peculiarly Weberish, while the instrumentation is dainty, full of colour and melodious. Good examples of the first quality are the Huntsmen's Chorus (Act i. No. 3), and the Drinking Chorus in the finale of the same act; and of comedy the whole part of the cowardly bully Krips. His Arietta in Eb, No. 14, is capital, and also interesting as a specimen of the distinction between Weber's *vis comica* and Mozart's as shown in the 'Entführung' and 'Zauberflöte.' The dances allotted to Silvana (Nos. 1, 8, 12) are most graceful and charming.

Another remarkable point in the opera is the musical illustration of pantomime, even in the vocal numbers, a device for connecting the music and the action together, which is well known to have been carried to such an extent by Wagner that he is generally considered the inventor of it. Weber, however, has in 'Silvana' turned it to account most effectively. A striking example is the scene where Rudolf meets Silvana in the forest. He addresses her in gentle tones, to which she replies only by signs, accompanied by orchestral strains of the most expressive nature, with a great deal of violoncello solo. The whole scene is full of

genius, and continually suggests a comparison with Wagner, especially where Rudolf sings, 'Wenn du mich liebtest, o welch' ein Glück! O lass mich deine Augen fragen!' while Silvana, 'to a melting strain from the violoncello, 'looks at him sweetly and tenderly,' a passage which recalls the first meeting of Siegmünde and Sieglinde in the 'Walküre.' Other passages, in which the music follows the action step by step, are to be found in Weber's great operas, especially in 'Euryanthe.' Strange to say, they seem to have attracted little attention, even in the latter case. The composer prepared two PF. editions of 'Silvana,'¹ the former of which (1812) is incomplete, and both now very rare.

5. 'Abu Hassan,' the second in the middle group of Weber's operas, was adapted by Hiemer from an Arabian fairy-tale, with occasional reminiscences of Weisse's 'Dorfbarbier.' The story of this one-act Singspiel is closely connected with certain experiences of both Weber and Hiemer in Stuttgart. It must have been easy to Weber to find appropriate melodies for a creditor dunning a light-minded impecunious debtor; and curiously enough, the first number of the opera he set was the Creditors' Chorus, 'Geld, Geld, Geld, ich will nicht länger warten' (Aug. 11, 1810). The little piece consisted originally of the overture and eight vocal numbers, the duet 'Thränen sollst du nicht vergiessen' being added in 1812, and the air 'Hier liegt, welch martervolles Loos' in 1823.

The fun in German comic opera has always been somewhat boisterous; for more refined comedy we must generally go to the French, but 'Abu Hassan' is almost the only German work which produces a hearty laugh, and at the same time charms by its grace and refinement, and by the distinction of its musical expression. Perhaps the best bit is the scene between Abu Hassan and his creditors, but the duet between Omar and Fatima (No. 6), the final terzetto (No. 7) and Fatima's additional air (No. 8) are all of great merit. The last air, it should be borne in mind, was composed twelve years after the rest, and bears the stamp of the matured composer. Various little instances of want of finish appear in the music, but defects of this kind may well be overlooked for the sake of the invention, so spontaneous and *spirituel*, and the downright hearty fun of the whole, mingled as it is with rare and touching tenderness.²

6. Between the completion of 'Abu Hassan' and the beginning of 'Der Freischütz' intervene no less than six years—a long period in so short a life—during which Weber composed no opera. Not that the dramatic impulse had abandoned him. 'I am anxiously looking

¹ Schlesinger, Berlin.

² A complete PF. score is published by Simrock.

out for another good libretto,' he writes after the production of 'Abu Hassan' at Munich, 'for I cannot get on at all without an opera in hand.' We know he had several projects, and that he had a 'Tannhäuser' in his mind in 1814; but his restless life, and the unsatisfactory nature of his position at Prague, prevented his bringing anything to maturity. Nevertheless his dramatic powers did not lie absolutely fallow. Six grand Italian arias with orchestra, some with chorus also, composed during this period, though intended for the concert-room, may be classed with his dramatic works, because they presuppose a scene or situation in which some distinct person gives expression to his or her feelings. The same is true of three Italian duets, which mark an important stage in his development, as it was through them that he gained dexterity in handling the larger forms of vocal music. As we have seen, he was somewhat clumsy at this in 'Silvana.' Several of the six concert arias are of high merit, particularly the one composed for Prince Frederic of Gotha, 'Signor, se padre sei,' the *scena ed aria* for 'Atalia,' 'Misera me,' and the *scena ed aria* for Méhul's 'Hélène,' 'Ah, se Edmundo fosse l'uccisor.' The three duets with PF. accompaniment are also worthy of notice, as showing Weber's perfect familiarity with the Italian style, while retaining intact his German individuality, a combination which gives them a special interest. One—'Si il mio ben, cor mio tu sei'—was originally composed for two altos, with clarinet obbligato, and an accompaniment of string quartet and two horns. It was performed at Weber's concert in Darmstadt in 1811, when he writes to Gottfried Weber, 'a duet so confoundedly Italian in style that it might be Farinelli's; however, it pleased them infernally.' This is, however, unjust to himself, for though here and there the Italian cast of melody is obvious, the main body is thoroughly Weberish. The allegro with its contrasting subjects, one sustained and flowing, and the other light, graceful and piquant, recalls the duet between Agathe and Aennchen in 'Freischütz.'

Besides his Italian compositions, among which we may include three canzonets for single voice and PF., Weber exercised his dramatic vein twice between 1811 and 1817, in the composition of *Lieder*, and in his cantata 'Kampf und Sieg' (1815). These important works are of course only indirectly dramatic.

7. With 'Der Freischütz' Weber laid the foundation of German romantic opera. To explain this statement we must first define precisely what we mean by the term 'romantic.' Originally borrowed from the Spanish and French mediæval chronicles of chivalry, the word primarily denoted anything marvellous, surprising, knight-errant-like or fantastic. Operas were often founded on stories of this kind

in the 18th century, the first being a libretto called 'Lisouart und Dariolette,' adapted by Schiebler from Favart, and set by J. A. Hiller (Hamburg, 1766). The French taste for fairy-tales and eastern stories penetrated to Germany, and such subjects were used in opera. Thus the story of Zemire and Azor was set in 1775, and that of Oberon's Magic Horn in 1790. The 'Zauberflöte,' too, as is well known, was founded on an eastern fairy-tale, and that *chef-d'œuvre* made fairy-operas a recognised fashion. All these, from the nature of their subjects, might be called romantic operas, and indeed were so at the time. Weber himself speaks of Mozart, Cherubini and even Beethoven as romantic composers, but this was not in the sense in which the word has been used since his time in Germany. The fairy and magic operas, of which Vienna was the headquarters, were popular because their sensational plots and elaborate scenery delighted a people as simple as a set of grown-up children. They were, in fact, pretty fantastic trifles, and Mozart, though he introduces serious tones in them, did not alter their essential character. The romantic opera, in the later restricted sense of the word, differs from these earlier fairy-operas in that whatever is introduced of the marvellous, whether narrative, legend or fairy-tale, is treated seriously, and not as a mere matter of amusement. The ultimate cause of this change of ideas was the entire transformation of the intellectual life of Germany during the end of the 18th and beginning of the 19th centuries. After its long state of dependence on foreign countries the mind of Germany awoke to consciousness, began to know something of its own history, its legends and myths, its natural language and customs, and to prize them as precious heirlooms. It again grasped the peculiar—almost pantheistic—relations with nature, which distinguished the Teutonic from the classic and Latin peoples. This change of ideas was greatly accelerated by the gradual transference of the predominating influence in music from the lively light-hearted South Germans, to the more serious and thoughtful inhabitants of North Germany. Lastly, individual composers, Weber among them, came under the influence of the poets of the romantic school. As these latter, breaking away from the classicism of Goethe and Schiller, sought their ideals of beauty in national art, history and myth, primarily German, and afterwards Indian, Italian, Spanish, French or English, so the composers of the romantic school also found an attraction in the same class of subjects partly because of their very unfamiliarity. Thus, consciously or unconsciously, they applied to music the dictum of Novalis with regard to romantic poetry—that it was the art of surprising in a pleasing manner.

Subjects for romantic opera require a certain

expansiveness of the imagination; a capacity of soaring beyond the commonplace events of daily life. Presupposing also, as they do, a healthy and not over-refined taste, they accommodate themselves with ease to the manners and speech of the people. This is how it happens that other elements of the German popular plays—the comic and amusing—which have no inherent connexion with the serious conception of a romantic subject, find a place in romantic opera. Again, in contradistinction to the antique-classical drama, which revealed to the spectators an ideal world without restrictions of time or space, romantic subjects laid the utmost stress on peculiarities of race or epoch, social relations or distinctions. Thus it followed that there were in romantic opera four principal elements—the imaginative, the national, the comic and the realistic. The fusion of these elements by means of the imagination into one whole is what constitutes German romanticism.

In 'Silvana,' Weber had already trenched upon the domain of romantic opera, in the sense in which we have just expounded it, but had not yet found adequate musical expression for German romanticism. Next came Spohr's 'Faust' in 1813, and 'Zemire und Azor' in 1818. In both these the subjects are conceived with earnestness, and a dreamy twilight tone runs through the whole, so that they undoubtedly possess some of the distinguishing marks of the romantic opera; but Spohr's music is much too rounded off in form, and too polished, and he had a positive aversion to anything popular. Nor had he sufficient versatility and flexibility, boldness or *vis comica*. Strictly speaking, therefore, he is only half a romanticist. 'Freischütz' was a revelation; from the date of its production there was no question as to what a romantic opera really was.

Kind did not draw on his own invention for the libretto. The history of the subject is still incomplete, but we know that the story can be traced back as far as the 17th century. It was published in the beginning of the 18th, in a book called *Unterredungen vom Reiche der Geister*, of which a second edition appeared in Leipzig in 1731. The statement there made, that the occurrence took place in a town of Bohemia in 1710, carries no weight. From this book Johann August Apel took the story, and published it as a narrative called 'Der Freischütz, a legend of the people' ¹ (1810), handling it so cleverly that it again became popular. In 1819 Gerle took it up and wrote 'Der braune Jäger.' ² In 1821 it was turned into a tragedy by Count von Reisch, and performed Aug. 17, 1821, at Würzburg, two months after the first performance of the opera in Berlin. Kind mainly followed Apel: his poem, with explanatory notes, ran through

two editions in 1822 and a third in 1823 (Göschel). Twenty years later he prepared the last edition for his 'Freischütz-book,' and added to it a mass of cognate matter by no means uninteresting.

Apel's story had a later revival, and finding how much Kind borrowed from it, people have been apt to disparage both him and his libretto. Ambros's ³ remarks on this point, for instance, are most unjust. Neither originality of ideas nor literary skill are so important to a librettist as the faculty of arranging his materials in a really dramatic form. This Kind had in a high degree, and it ought to be sufficient. His own alterations and additions, too, are most successful, having the threefold advantage of conducting to the musical development, suiting Weber's special gifts, and hitting the ideal of German national opera. The parts of Caspar, Aennchen and the Hermit are entirely his own, while that of Agathe is greatly strengthened, and Samiel is brought forward to meet the requirements of the music. The motives and action of the plot also diverge considerably from Apel's romance. Caspar, being jealous of Max, tries to engage him in a compact with Satan, but the Evil One is frustrated by the pure-minded and devout Agathe, and in her stead Caspar becomes the victim. Thus Kind contrived a happy termination instead of Apel's tragic one. The plot, as it now stands—its main interest centred in a couple of true-hearted lovers, living in an honest forester's cottage, on a background of German forest, with all its delights and all its weird associations, lit up now by sunbeams glinting on a frolicsome peasantry, now by lurid flashes revealing the forms of the powers of darkness—appeals with irresistible attraction to every German heart. The most important point in the opera, however, and the secret of its success, is the strongly marked religious element which at once raised it to an altogether higher level than any earlier opera, and gave it a kind of sacred character. During the war a spirit of religious enthusiasm had taken hold of the people of Germany, and become so far a ruling passion that any one who succeeded in giving expression to it in music was sure of striking home to the national heart. Looked at from this point of view, the part of the hermit, Kind's own invention, acquires considerable significance. The opening of the opera was originally intended to be quite different from what it is now. The curtain drew up on a forest scene with a hermit's cell, having close by a turf altar with a cross or image at the back, covered with white roses. The hermit praying before the altar sees in a vision the Prince of Darkness lying in wait to entrap Agathe, 'the spotless lamb,' and her Max. At this point Agathe enters, bearing bread, milk and fruit for

¹ Published in vol. I. of the *Gespenserbuch*, edited by Apel and Lann (Leipzig, Göschel, 1810).

³ See his *Bunte Blätter*, I. (Leipzig, Leuckart, 1872); also the *New Series*, 33 (*ibid.*, 1874), and Wustmann in the *Grensboten*, I., 1874, p. 414.

the hermit. After warning her that danger is near, he gives her his blessing and two or three of the roses, which have the power of working miracles. A duet between the two concludes the scene. Weber did not compose either the duet or the hermit's monologue; but, by his *fiancée's* advice, began the opera with the village fête. By this means he certainly secured a more effective introduction, though the appearance of the hermit in the last act now seems somewhat abrupt and out of place.

The religious sentiment of Weber's day was entirely of a romantic kind, made up partly of a sort of mediæval fanatical Catholicism, partly of an almost pantheistical nature-worship. What a gift he had for giving expression to this sentiment Weber perhaps scarcely knew before he wrote the 'Freischütz.' It was an advantage to him to be a member, and a conscientious one, of the Roman Catholic Church, and to have also a naturally serious and devout disposition. Hence the character of Agathe has a virgin sweetness, an unearthly purity, such as was never put on the stage before. As an interpreter of nature Weber's position in the dramatic world is like that of Beethoven in the symphony; nay, the infinite variety of nature-pictures contained in 'Der Freischütz,' 'Preciosa,' 'Euryanthe' and 'Oberon' is quite new of its kind, and each equally surpasses even the manifestations of genius of the Pastoral Symphony. Nobody had ever depicted with the same truth as he a sultry moonlight night, the stillness broken only by the nightingale's trill and the solemn murmur of the trees, as in Agathe's grand scena; or a gruesome night-scene in the gloomy forest ravine, such as that in the finale of the second act. With this descriptive faculty went hand in hand consummate skill in orchestration. There is something original and intoxicating in the sound he brings out of the orchestra, a complete simplicity, combined with perfect novelty. He was able, as it were, to transport himself into the soul of the instruments, and make them talk to us like human beings, each in its own language, each speaking when it alone has power to lay bare the very heart of the action. Orchestral colouring handled in this masterly manner naturally served principally to characterise situations, but it was also used for the personages. Nothing distinguishes Weber as a born dramatist more than the way he appropriated to a character from its first entrance upon the stage a certain mode of musical expression, which he maintained as a kind of keynote through all the varying emotions of the opera. A good example is the opening of the duet between Agathe and Aennchen. With the very first phrase each strikes a note which completely exemplifies their different characters, and to which they remain true to the end. The very first musical phrase sung by each gives a

tone perfectly in keeping with their different characters, and held firm to the end of the opera. With all this distinctness of characterisation, however, Weber's creations keep to general lines; he draws types rather than individuals. His figures have not the sharpness of outline that distinguishes Mozart's; they resemble rather the characters in Schiller's dramas, while Mozart's may be compared to Shakespeare's.

Weber had a wonderful talent for inventing popular melodies, as he has shown in many parts of 'Der Freischütz.' The Lied-form is introduced four times in the first act, and twice in the last, besides appearing as an element of a larger whole in Agathe's aria ('Leise, leise, fromme Weise') and the finale of the third act ('Die Zukunft soll mein Herz bewähren'). These are precisely the numbers which have attained the greatest popularity. We need only mention the Bridesmaids' and Huntsmen's choruses, the waltz in the first act, and the Peasants' march. This latter is taken direct from the people's music, and is an air which Weber must have heard when conducting the opera in Prague. At least, between 1816 and 1824, the musical population of Bohemia were addicted to a march, the first part of which is identical with that in 'Freischütz.'¹

Perfect as are these smaller musical forms, it must in justice be conceded that Weber did not always succeed with his larger ones, which often have a sort of piecemeal effect. The construction of a piece of music in grand, full proportions was to him a labour, and rarely a successful one. He does not so much develop from within as superimpose from without, and not unfrequently the musical flow stagnates. The finale of the third act may be cited as an instance of his way of falling short in this respect. For the most part, however, this is only true of his music when considered simply as music without regard to dramatic fitness, and such defects are therefore much less noticeable in performance, so accurately does he hit the appropriate musical development for each moment of the action. He has also a wonderful power of keeping up one prevailing idea throughout the piece, so that amid all the variety of successive emotions there is unity. A striking example of his ingenuity is the duet between Agathe and Aennchen in the beginning of the second act, where two wholly different and equally characteristic melodies are given in the most charming manner. For this, however, he had a model in the duet (*à la polonaise*) between Verbel and Florestan in 'Lodöiska,' by Cherubini, a composer to whom he looked up with great admiration.

8. The play of 'Preciosa' was adapted from a novel (1613) of Cervantes by an actor named

¹ This discovery is due to Ambros; see his *Cultur-historische Bilder aus dem Musikleben der Gegenwart*, p. 47 (Leipzig, Malthes, 1860), and *Bunte Blätter*, p. 22.

Pius Alexander Wolff, of Weimar, engaged in Berlin in 1816. Before Weber undertook, at Count Brühl's desire, to write music for it, he had several times used his pen in a similar way. Mention may be made of his music for Schiller's 'Turandot,' consisting of an overture and six smaller instrumental pieces (1809); for Müller's 'König Yngurd,' 11 Nos. (1817); and for Gehe's 'Heinrich IV.,' 9 Nos. (1818), besides many smaller works of the same kind, all bearing witness to his extraordinary talent for illustrating a dramatic situation in the clearest and most distinct manner by music. A predilection for Spanish subjects is observable in Weber about this period, and may be attributed to the influence of Tieck. Columbus, Pizarro, Don Juan of Austria and the Cid, all passed before him, as subjects for operas, and in 1820-21 he completed a sketch of the first act, and a duet out of the second, of 'Die drei Pintos,' a Spanish comic opera. This, however, he laid aside for 'Euryanthe' and 'Oberon,' and died without completing a work full of promise.¹ It was, therefore, in all probability, its Spanish local colouring which attracted him to 'Preciosa.' One of the signs of his natural gift for dramatic composition was his love for strong contrasts, not only between different parts of the same work, but between the different works he took in hand. The phrase 'local colouring' in music may be defined as that which conjures up before our mind the associations connected with certain scenes, races and epochs. Weber's unusual gift for this kind of illustration was most probably connected with the peculiar manner in which his musical faculties were set in motion. This is a point on which we are thoroughly informed by means of his own expressions preserved by his son and biographer. As a rule, it took place through external impressions, presented to his imagination as tone-pictures. As he sat in his travelling carriage, the scenery through which he passed would present itself to his inner ear as a piece of music, melodies welling up with every hill or valley, every fluttering bush, every waving field of corn. With him any external impression at once clothed itself in musical form, and this peculiarity of mental constitution undoubtedly contributed to give his music its individual character.

The music to 'Preciosa' does, no doubt, reflect the then prevailing idea of Spain, its scenery, its people and its art. In fact, he hit the keynote of Spanish nationality in a marvellous manner. The prevailing impression is heightened by the introduction of gipsy-rhythms and Spanish national airs. Instances

of the former are the march, appearing first in the overture, and then as No. 1, No. 9a and No. 10a; of the latter the three dances forming No. 9. This method of characterisation he had made use of several times before, as in 'Turandot,' which has a Chinese melody running all through, in the 'Freischütz' peasants' march, and in 'Oberon' an Arabian and a Turkish melody. We may add that the 'Preciosa' music has lately been augmented by a little dance, intended as an alternative to the first of the three contained in No. 9. True, this charming little piece does not exist in Weber's own hand, but its origin is betrayed by the resemblance to it of the first chorus in the third act of Marschner's 'Templer und Jüdin.' When writing his first great opera Marschner was strongly under the influence of Weber's music which he had been hearing in Dresden, and reminiscences from it not unfrequently cropped up in his own works. Moreover, he knew the little valse to be Weber's.²

9. The original source of the libretto of 'Euryanthe' was the *Roman de la violette*, by Gilbert de Montreuil (13th century), reprinted textually by Francisque Michel (Paris, 1834). The subject was used several times by early writers. Boccaccio borrowed from it the main incident of one of the stories of the *Decameron* (Second day, Ninth tale), and thence it found its way into Shakespeare's *Cymbeline*. Count Tressan remodelled it in 1780 for the second volume of the *Bibliothèque universelle des Romains*, and in 1804 it was published at Leipzig, under the title *Die Geschichte der tugend-samen Euryanthe von Savoyen*, in the collection of mediæval romantic poems edited by Schlegel. The translator was Helmina von Chezy, who compiled the libretto for Weber. After completing the latter she republished her translation, with many alterations.³

The libretto has been much abused, and when we consider that it was remodelled nine times, and at last brought into shape only by Weber's own vigorous exertions, it is evident that the authoress was not competent to create a dramatic masterpiece. It does not follow that with the help of Weber's ability and experience she was not able to concoct something tolerable for the purpose. The utter inadequacy of her poem having been reiterated *ad nauseam*, the time seems to have arrived for setting forth the opposite view, and maintaining that it is on the whole a good, and in some respects an excellent, libretto. It is curious to see the naïf way in which for the last hundred years German critics have been in the habit of considering the libretto and the music of an opera as two

¹ The first two editions of the score of 'Preciosa' were full of mistakes. A third, prepared with great care by Ernst Rudorff (Berlin, Schlesinger, 1872), contains this previously unknown dance in an appendix.

² The autograph sketches were in the possession of Weber's grandson, Capt. Freiherr von Weber, at Leipzig. Reissiger added an accompaniment to a duet 'So wie Blumen, so wie Blüthen,' which was published in this form in the Weber-Album edited by the Sarrische Schiller-Verein. For an exhaustive account of these interesting fragments see Jahns, Nos. 417 to 427. The opera, completed by the composer's grandson and August Mahler, was produced at Leipzig, Jan. 20, 1888.

³ *Euryanthe von Savoyen*, from a MS. in the National Library at Paris called *Histoire de Gerard de Nevers et de la belle et vertueuse Euryant de Savoye, sa mie* (Berlin, 1823). Michel's edition of the *Roman de la violette* is in verse.

distinct things, the one of which may be condemned and the other extolled, as if a composer had no sort of responsibility with regard to the words he sets. 'Do you suppose that any proper composer will allow a libretto to be put into his hand like an apple?' are Weber's own words. It is, moreover, obvious that a libretto which satisfied a man of such high culture, and a composer of so eminently dramatic organisation, could not have been utterly bad. Nevertheless, the verdict against 'Euryanthe' was all but unanimous. The first who ventured to speak a decided word in its favour is Gustav Engel. He says:

" 'Euryanthe' is an opera full of human interest. Truth and a fine sense of honour, jealousy, and envy, mortified love and ambition, above all the most intense womanly devotion—such are its leading motives. There is indeed one cardinal error, which is that when Euryanthe is accused of infidelity in the second Act, she remains silent, instead of explaining the nature of her comparatively small offence. This may, however, arise from the confusion into which so pure and maidenly a nature is thrown by the suddenness of the fate which overwhelms her. In the main, however, the story is a good one, though it starts with some rather strong assumptions."

The 'cardinal error,' however, is no error at all, but a trait in perfect keeping with Euryanthe's character. It is more difficult to understand why she does not find the opportunity to enlighten Adolar, when he has dragged her off into the wilderness in the third act. Other plausible objections are the too great intricacy of the story, and its being partly founded on events which do not come within the range of the plot, viz. the story of Emma and Udo. Weber was aware of this defect, and intended to remedy it by making the curtain rise at the slow movement of the overture, and disclose the following tableau:

'The interior of Emma's tomb; a kneeling statue is beside her coffin, which is surmounted by a 12th-century baldachino. Euryanthe prays by the coffin, while the spirit of Emma hovers overhead. Eglantine looks on.'

The opera contains four principal characters, Adolar and Lysiart, Euryanthe and Eglantine. Eglantine has most vitality, the others being types rather than individuals; but this would be no defect in Weber's eyes, being, as we have seen, in accordance with his own mode of treating his personages. The poem abounds in opportunities for the descriptive writing in which he so much delighted and excelled. The characters are not the main attraction, they seem mere condensations of the poetry of the situation, and are carried along by the scene, rather than work it out for themselves. 'Euryanthe,' like all Weber's operas, is an epic procession, an enchanted panorama, representing the life of one special period, that of mediæval chivalry. Looked at from this point of view it can be thoroughly enjoyed.¹

¹ This Goethe did not do; he says (*Gespräche mit Eckermann*, I. 148): 'Karl Maria von Weber should never have composed "Euryanthe"; he ought to have seen at once that it was a bad subject, with which nothing could be done.' After what I have

'Euryanthe' is Weber's sole grand opera, both because it is without spoken dialogue, and because it is much the fullest and longest. He meant to put his best into it, and he did. 'It is his heart's blood,' says Robert Schumann.² There is no question that 'Euryanthe' is richer, more varied, deeper, grander, than all the rest of Weber's dramatic works. All that gives distinction to 'Der Freischütz' is found here again; Lieder at once dignified and easily comprehensible, melodies genuine in feeling and full of fire, orchestral colouring as new as it is charming, instrumentation both bold and *spirituel*, an intuitive grasp of the situation and complete mastery in treating it, such as genius alone is capable of. In many passages, and particularly in the scena and cavatina in the third act, where Euryanthe is abandoned in the wilderness, the colours are used with masterly skill. The long wailing notes of the solo bassoon, and the solitary flute wandering aimlessly about, incline one to re-echo Schumann's words, 'What a sound comes from the instruments! they speak to us from the very depths of all being.' The accompaniment to 'Hier dicht am Quell,' consisting only of the string-quartet and one bassoon, but producing the most extraordinary effect of sound, is a striking example of what genius can do with small means. Quite different again is the colouring for Euryanthe's narrative in the first act; four muted solo-violins, whose long sustained notes are supported by quivering violins and violas, also muted, with stifled moans from low flutes, suggest a spectral form, only half visible in the moonlight, hovering overhead and muttering words which die away indistinctly on the breeze.

Each of the four principal characters has its own language, to which it adheres strictly throughout the opera, and which is accentuated by the orchestral colouring employed liberally, though not exclusively, for the purpose. As we have previously remarked, one prevailing tone runs through the whole opera, sharply distinguishing it from any other of Weber's.

One point in which the music of 'Euryanthe' is far superior to that of 'Der Freischütz' is in the use of the larger dramatic forms. Here we have recitative, full of expression, passion and movement, such as had come from no German pen since Gluck's; arias, duets, *ensemble* pieces, and splendidly constructed finales. The Lied- or cavatina-form is used freely for the parts of Adolar and Euryanthe; but Lysiart and Eglantine never express themselves except in the grand dramatic forms; and the higher the passion rises the more exclusively do these two characters occupy the stage. In this

said it is unnecessary to point out the injustice of this remark. Goethe had not musical insight enough to understand what it was in the libretto that attracted Weber, against whom, moreover, he had a prejudice. Still, even he allowed 'Der Freischütz' to be a good subject (Eckermann, II. 16).

² *Gesammelte Schriften*, IV. 290.

respect the second act is the climax: Lysiart's *scena ed aria*, his duet with Eglantine; Adolar's air, in such wonderful contrast, and the duet with Euryanthe; lastly the finale, in which a perfect tempest of passions seems let loose. The third act also has dramatic forms of the first order, especially Euryanthe's air, 'Zu ihm, und weilet nicht,' with the chorus ending *diminuendo* (a very striking point) and the duet and chorus with the clashing swords—'Trotze nicht, Vermessener.' Weber's large dramatic pieces are freer as regards form than Mozart's, because he follows the poet more closely, almost indeed word by word. Though it cannot be said that there are no little roughnesses, or bits of dull or unformed work, any such are completely submerged in the overwhelming flood of beauties.

10. Although Weber wrote his last opera at the request of Kemble, he chose the subject himself, and was aware how completely it suited his own individuality. Since the publication of Wieland's poem in 1780, two German operas had been composed on Oberon. The first, Wranitzky's (1790), was one of those childish fairy-pieces, whose lively music, harlequin-tricks, scene-painting and machinery were long the delight of the simple-minded people of Vienna. The other, composed for Copenhagen (1790, with the second title of 'Holger Danske') by Kunzen, Schulz's talented successor, and J. F. Reichardt's friend, was a far more serious work, and can be spoken of in connexion with Weber's, though the latter put it so completely into the background as virtually to obliterate it.

Weber's librettist, Planché, likewise worked on Wieland's 'Oberon,' or rather on Sotheby's translation. Though satisfied with the poem in detail, Weber could not reconcile himself to English opera as such.

'The cut of an English opera is certainly very different from a German one; the English is more a drama with songs.'

he writes (in English) to Planché on Jan. 6, 1825; and again on Feb. 19:

'I must repeat that the cut of the whole is very foreign to all my ideas and maxims. The inter-mixing of so many principal actors who do not sing, the omission of the music in the most important moments—all deprive our Oberon of the title of an opera, and will make him unfit for all other theatres in Europe.'

These words contain a very just criticism on the libretto. The continual change of scene, which keeps the spectator in a state of restlessness, is certainly a mistake. Weber intended to remodel the opera for Germany, when he would have put it into a form more in accordance with his own ideas, giving the music a larger share in the course of the plot, but simplifying the plot so that it should run more smoothly and consecutively. Whether he would also have endeavoured to strengthen the

dramatic interest is doubtful. As it stands it is an epic poem dramatised, rather than a drama. But no subject dealing with fairyland can admit of dramatic treatment beyond a limited extent, for the characters, instead of moving independently and of their own free will, act under the guidance of supernatural powers, who visibly interfere with their destiny on all occasions. Weber required not so much characters full of dramatic action, as suggestive situations and picturesque scenes, and these Planché's libretto supplied to the full. That he had the German form in his mind all the time he was setting the English, is evident from the fact that he had each number, as fast as he composed it, translated by Theodor Hell, of Dresden, instructing him to make the words correspond as closely as possible with the melody. Hell's workmanship was not of the best, and Weber was too much occupied to correct all his blunders. One glaring instance occurs in Reiza's grand scena ('Ocean, thou mighty monster'); a beam from the setting sun parts the storm-clouds, and she exclaims, 'And now the sun bursts forth,' which Hell translates, 'Und nun die Sonn' geht auf' (rises). Thus the astonished spectator, having been told that it is morning, shortly beholds the sun set in the same quarter from which it has just risen. Nevertheless the passage is always so sung in Germany, and the absurdity, if noticed at all, is laid at the door of the English librettist. Weber got his translator to make a reduction in the number of the personages introduced. In the quartet, 'Over the dark blue waters,' Planché gave the bass to a sea-captain, and in the duet, 'On the banks of sweet Garonne,' associated a Greek fellow-slave with Fatima, in both cases because the original Sherazmin was a poor singer. These makeshifts find no place in the German version, or in the English revival at Her Majesty's in 1860. Then again, the song 'Yes, even love to fame must yield,' composed in London for Braham in place of 'From boyhood trained in battle-field,' is omitted in the German, while another addition, the prayer in the second act, 'Ruler of this awful hour,' is retained. The first was a concession on the part of the composer, who did not care for this 'battle-picture'; but he saw that the prayer was not only a passage of great beauty, but materially strengthened the part of Huon.¹

The music to 'Oberon,' though the work of a man dying by inches, bears no traces of mental exhaustion. Indeed it is delightfully fresh and original throughout, and entirely different from all the rest of Weber's compositions. The keynote of the whole is its picture of the mysteries

¹ Hell's translation was published almost simultaneously with the original libretto, the preface to which is dated 'Brompton Crescent, Apr. 10, 1826.' The German title runs 'Oberon, King of the Elves, a romantic fairy-opera in three acts. Translated for the German stage by Theodor Hell from the English original by J. R. Planché, set to music by Capellmeister Freyherr Karl Maria von Weber' (Arnold, Dresden and Leipzig, 1826). With a long preface by the translator.

of Elf-land, and the life of the spirits of air, earth and water. True, this note is touched in 'Der Freischütz' and 'Euryanthe,' but in 'Oberon' it is struck with full force, and vibrates with an almost intoxicating sweetness. What Weber did in this direction was absolutely new, and a valuable addition to his art, and many composers have followed in the same track. His melody, the chords of his harmony, the figures employed, the effects of colour so totally unexpected—all combine to waft us with mysterious power into an unknown land. Anybody acquainted with the adagio of the overture will see what we mean. Of a charm almost unparalleled is the introduction to the first act, with the elves fitting hither and thither, softly singing as they keep watch over Oberon's slumbers. The second act is specially rich in delicious pictures of nature, now in her tender and dreamy, now in her savage and sublime, moods. Puck's invocation of the spirits, the roar of the tempest, the magnificent picture in Reiza's grand scena of the gradual calming of the waves beneath the rays of the setting sun; lastly, the finale, with the mermaids' bewitching song, and the elves dancing in the moonlight on the strand—these are musical treasures which have not yet been exhausted. Mendelssohn, Gade, Bennett, drew the inspiration for their romantic scenes of a similar kind from 'Oberon,' but none of them attained the depth or the individuality of their prototype. Even Schumann trod in his footsteps in isolated passages of 'Paradise and the Peri,' the ballad 'Vom Pagen und der Königstochter' and 'Manfred.' Of German opera composers I say nothing; their imitation of him is patent.

SONGS AND VOCAL WORKS.—Next after Weber's operas come into consideration his Lieder, the Lied-form playing, as was natural with a German, so important a part in his operas. He left seventy-eight German Lieder for single voice with PF. or guitar accompaniment, besides two or three Italian canzonets, a French romance, and a song from *Lalla Rookh*. 'From Chindara's warbling fount I come,' his last composition, with the accompaniment merely sketched in.¹ We do not include his ten Scots airs arranged with accompaniment for PF., flute, violin and violoncello. Among the part-songs should be singled out sixteen Lieder for men's voices, and three Volkslieder for two voices with accompaniment.

It was at the suggestion of Vogler that Weber first made a study of the songs of the people, and this study, added to his own intuitive perception of what was intrinsically good and individual in popular music, enabled him to hit off the characteristic tone of the Volkslied as nobody had done before. 'Mein Schatz ist

auf die Wandschaft hin,' 'Herzchen, mein Schätzchen, bist tausendmal mein,' 'Wenn ich ein Vöglein wär,' 'Ich hab' mir eins erwählt,' 'O Berlin, ich muss dich lassen,' 'Sis nichts mit den alten Weibern,' are songs in which every variety of feeling is expressed with a freshness and originality rarely met with. His musical treatment, too, of songs in dialect, especially those of a humorous or rollicking character, was excellent; instances are 'Trariro, der Sommer, der ist do,' 'Mein Schatzlerl is hübsch' and 'Ich und mein junges Weib.' The form of these songs is most simple, and generally strophical; the accompaniment frequently for the guitar.

Besides these Lieder, Weber composed other songs of a more ambitious character, with PF. accompaniment, each stanza having a different melody. Weber's vocal compositions contain the two main elements of which German opera is constituted—the Lied and the dramatic song. These, too, appear in turn in the ten splendid songs from Körner's 'Leyer und Schwert,' four of which are for single voice and PF. and six for male chorus unaccompanied. Of the single songs, 'Vater ich rufe dich' and 'Die Wunde brennt' are magnificent tone-pictures in Weber's own style. Even in the strophical choruses there are touches of great power. The beginning of 'Du Schwert am meiner Linken' rings like a sword-thrust. 'Lützow's wilde Jagd' contains a complete dramatic scene within a single stanza of twenty-one bars. The horsemen plunge forward out of the forest gloom, rush by in tearing haste, shout one wild hurrah, and are gone.

It has often been felt as a difficulty that Weber should pass straight from such operas as 'Silvana' and 'Abu Hassan' to a masterpiece like 'Der Freischütz.' One explanation of this sudden and startling progress may probably be found in the songs which were his main occupation from 1811–17. Another important landmark is the cantata 'Kampf und Sieg' (1815). This is not a cantata in the modern sense—i.e. an essentially lyric vocal piece—but one rather in the sense of the 17th and 18th centuries, when the word signified solo songs representing a specific character in a specific situation. The only difference was that Weber employed the full resources of solo-singers, chorus and orchestra. The central idea is the battle of Waterloo, with various episodes grouped round it, and a chorus, 'Herr Gott dich loben wir,' as finale. The description of the battle forms what we should now call a grand dramatic scene, an opera finale, only without action.

Between 1810 and 1815 Weber wrote six concert airs with Italian words, and these also have their share in explaining the extraordinary maturity of 'Der Freischütz.' Several are of high artistic merit, notably the fourth ('Signor,

¹ Schlesinger of Berlin published a complete edition in two vols. of Weber's songs. Two or three unimportant ones for single voice are omitted, but the two-part songs, Italian duets, numerous choruses for men's voices (arranged), part-songs for various voices with accompaniments, bring up the number to 100.

se padre sei'), composed in 1812 for Prince Frederic of Gotha.¹ It is written for tenor and double chorus, and is in fact a dramatic scena. None of these Italian airs, however, come up to a German scena written in 1818 for insertion in Cherubini's 'Lodoiska.' It was intended for Frau Milder-Hauptmann, then in Berlin, and was to be the first number in the second act. It is a work of the first rank, and of itself proves that the creator of 'Der Freischütz' had now attained his full stature. How it comes to be now wholly forgotten it is difficult to understand.

Among Weber's remaining vocal compositions we have still some cantatas and the two masses to consider. 'Der erste Ton' (1818), words by Rochlitz, must be mentioned among the cantatas, although the term scarcely applies to it. The greater part of the poem is declaimed to an orchestral accompaniment, but a four-part chorus is introduced near the end. The form is peculiar and new. It cannot be called a melodrama, because the poem is narrative and not dramatic. The nearest approach to it is in some of the descriptive recitatives in Haydn's oratorios. The descriptive part of the music shows already, though indistinctly, that plasticity which he was presently to make use of in such an incomparable way. The closing chorus does not satisfy the requirements of art, and Weber himself spoke of it as 'rough' part-writing. Another hymn of Rochlitz's, 'In seiner Ordnung schafft der Herr,' is a fine work of art. It was composed in 1812, and dedicated to the Musik-Gesellschaft of Zurich, which had elected him an honorary member. At first the composer has evidently had a difficulty in warming to his work, on account of the half-dogmatic, half-descriptive nature of the words; and the hearer, though occasionally interested, is not carried away by the earlier movements. The introduction of the chorale 'Drum lerne still dich fassen' (to the tune of 'O Haupt voll Blut und Wunden') is scarcely to be justified on æsthetic grounds. But then comes the chorus 'Gelobt sei Gott,' and all that has hitherto failed to please is forgotten, and the hearer is swept away in the rushing torrent of music. The fugue of this chorus, 'Im Wettersturm, im Wogendrang,' is a character-piece of the first rank.²

Of the six occasional cantatas composed for the court of Saxony, the Jubel-Cantata, written for the 50th anniversary of Friedrich August's accession (1818), is the most important, both in size and matter. The four choral movements, Nos. 1, 4, 7 and 9, are ripe examples of Weber's talent for delineating a specific situation, and make one regret that the work as a whole, from the circumstances of its origin, is unavailable for general use. It is essentially a Saxon, nay,

almost a Dresden composition, and no sympathy is now felt for Friedrich August. Wendt's attempt to turn it into a harvest cantata proved fairly successful in one or two cases, especially Nos. 4 and 7; but the music is, as a rule, too closely wedded to the words to be divorced from them, unless at great sacrifice.³

CHURCH MUSIC.—As to Weber's masses, those acquainted with the state of Catholic church music at the beginning of the 19th century will not expect to find them written in a pure church style. Fine music they contain in abundance. As previously mentioned, they were produced within a short time of each other, in 1818 and 1819. After Weber's fashion they contrast sharply with each other, while each has one prevailing tone running consistently through to the end. The year 1818 being the 50th of the King's reign, he gave to the E♭ Mass a tone of solemnity and splendour noticeable specially in the Sanctus. That in G, being for a family festival, is quite idyllic in character. 'I mean to keep before myself,' he wrote to Rochlitz, 'the idea of a happy family party kneeling in prayer, and rejoicing before the Lord as His children.' It is worth while to examine the Mass, and see how this idea is worked out. The Kyrie, Sanctus (with an exquisite Benedictus) and Agnus Dei are delightful music. Occasional suggestions of well-known passages in his operas jar on a modern ear, but a composer is scarcely to be blamed for retaining his identity even in a mass. His love of contrast, and habit of never remaining long occupied with one musical idea, give these pieces a somewhat restless and piecemeal effect, and for this reason those who were accustomed to Haydn's and Mozart's masses felt these too 'secular.'⁴

ORCHESTRAL AND CHAMBER MUSIC.—When a youth of 20 Weber wrote two symphonies, clever and to a certain extent interesting, but parti-coloured and without form. The indications they gave of his future position as an orchestral composer were very inadequate, and in later years they by no means satisfied himself. Of wholly different import are his ten overtures:

'Peter Schmoll' (remodelled 1807 as 'Grande Overture à plusieurs instruments'), 'Rübezahl' (remodelled 1811 as 'Overture zum Beherrscher der Geister', 'Ruler of the Spirits'), 'Overture Chinoise' (remodelled 1809 for 'Turandot'), 'Silvana', 'Abu Hassan', 'Jubel-Overture', 'Freischütz', 'Preciosa', 'Euryanthe' and 'Oberon.'

Of these, 'Peter Schmoll' and 'Silvana' are unimportant and immature. In 'Turandot' the local colouring furnished by a Chinese air is pushed into an extreme which becomes ugly. The remaining seven are very fine, and excepting perhaps 'Rübezahl' and 'Abu Hassan,' all have been most popular. They hold a middle

¹ The score, with the two sets of words, and preceded by the Jubel-Overture, is published by Schlesinger (Berlin). A full analysis with ample quotations is given in the *Monthly Musical Record*, 1873.

² The score of the E♭ Mass was published by Richault (Paris), that of the one in G by Haslinger (Vienna, *édition de l'écrit*).

¹ Op. 53, Schlesinger, Berlin, vocal score.

² Score, parts, and FF. score, published by Schlesinger of Berlin.

position between simple introductions and abstract orchestral works, sounding equally well in the concert-room and the theatre. This they share with the overtures of Mozart and Cherubini. There are, however, important differences of style between these overtures and those of Mozart and Cherubini. This is not so much because Weber constructed them out of the materials of the opera, though some have with great injustice gone so far as to maintain that they are mere elegant potpourris. Each is a complete conception, and—some unimportant passages apart—carved out of one block. That what looks like mosaic may have been constructed organically is proved by Cherubini's 'Anacreon' overture, in which—a little-known fact—there is not a single bar not contained in the opera. Weber's natural way of working was not to develop continuously, but to proceed from one strong contrast to another. His musical ideas are seldom adapted for thematic treatment, being always full of meaning, but with few capacities of development. The instant one idea is given out decisively it calls up another absolutely opposed to it. Illustrations of this may be found in the opening of the 'Rübezahl' overture, as well as in the E♭ movement of the allegro in that to 'Der Freischütz.' This method of progression by continual contrasts is undoubtedly the sign-manual of Weber's dramatic genius; and to it his works owe as much of their stimulating effect and fascination as they do to the variety, tenderness and brilliance of the instrumentation.

This explains why Weber produced so little chamber music. The quiet thoughtfulness, the refinements of instrumental polyphony, the patient development of a subject, which are the essence of this branch of art, were not congenial to one who liked to be up and away. He did not write a single string quartet; and his PF. quartet, string quintet with clarinet, and trio for PF., violoncello and flute, are, for him, unimportant compositions, and not always in the true chamber-music style. Jähns appositely observes that the trio is pastoral in character, and the last three movements almost dramatic. By this he means not so much that the composer had in his mind specific figures or scenes, but that the subjects are almost like spoken phrases, and the contrasts singularly life-like. Many movements of Beethoven's chamber music were inspired by some definite poetical idea (as the adagios of the quartets in F major (No. 1) and E minor), but these are all genuine chamber music. The third movement of the trio, headed 'Schäfers Klage' (Shepherd's Lament), is a series of clever variations on a simple melody of eight bars. The writer believes—though Jähns does not agree—that this is the air of a real Lied, and suspects it to be a setting of Goethe's 'Da droben auf jenem Berge,' but whether

Weber's or not we have at present no means of determining. Amongst his chamber music must not be forgotten six sonatas for PF. and violin, published in 1811. Though of modest dimensions, and occasionally somewhat immature, they contain a host of charming thoughts.

PIANOFORTE MUSIC.—Weber was one of the greatest and most original pianists of his day. After his thorough grounding when a boy he never became the pupil of any of the principal virtuosi, and all the finishing part of his education was his own work. He formed himself neither on Clementi nor Hummel; indeed his feeling with regard to the latter was one of decided opposition. After hearing him in Vienna in 1813, he wrote in his diary: 'Hummel improvised—dry but correct.' After a concert of Hummel's in 1816, Weber wrote that

'Hummel seemed to set the most store on plenty of runs executed with great clearness. Drawing out and developing the higher resources of the instrument, he perhaps undervalues too much.'¹

In private letters he spoke still more openly, saying plainly that 'Hummel had not made a study of the nature of the pianoforte.' This he himself had done most thoroughly, and in consequence obtained a number of effects at once new and thoroughly in accordance with the nature of the instrument. This was the principal cause of the unexpectedness which was so striking in his playing, besides its brilliancy, fire and expression. Wide stretches, easy to his long flexible fingers, bold jumps from one part of the keyboard to another, rapid passages of thirds for one hand (the E♭ concerto), or of thirds, sixths and octaves for both, runs with accompanying chords for the same hand (first movement of the sonata in C)—such are some of his technical resources, all of real value because used to express really new ideas. His pianoforte style also shows, within reasonable limits, a leaning to the orchestral. For instance, in the finale of the sonata in D minor he must certainly have had the violoncello and clarinet in mind when he wrote the *cantabile*, and the still more beautiful counter-subject. Again, in the first movement of the sonata in C his mental ear has evidently been filled with the sound of the orchestra from bar 4.

The four sonatas (in C, A♭, D minor and E minor) are pronounced by Marx to excel in some respects even the sonatas of Beethoven. This is going too far. In perfection of form Weber is always far behind Beethoven, and though his ideas may be equally original, they are far less solid and not so varied. His sonatas therefore cannot be considered models of the type, which Beethoven's are in the highest degree. They are rather fantasias in sonata-form, and their very irregularities give them a kind of air of improvisation, which is their chief charm. Each has its distinctive character,

¹ *Lebensbild*, III. 117.

consistently maintained throughout. When we say that no one of Beethoven's sonatas resembles another, we mean something quite different from this. The divergence between his various creations goes far deeper; with Weber certain favourite phrases are frequently repeated, and his sphere of ideas is far less extensive. His sonatas contrast more in form and colour than in essence; in each he gives us his whole self, but from a different point of view.

Next to the sonatas in importance are his ten sets of variations.¹ Weber did not attempt—as Bach did in the ‘Goldberg’ variations, or Beethoven in the ‘Eroica’ ones and those on Diabelli's waltz (see VARIATIONS)—to enlarge the bounds of variation, but clung to the simple old-fashioned form. This makes it all the more wonderful that he could cram so much that was new within such narrow limits. In the invention of new figures and striking harmonies he is inexhaustible, and—a main point—each has its own distinctive and sharply defined stamp. His dramatic genius never left him. His variations on ‘Vien qu'à Dorina bella,’ op. 7; on ‘A peine au sortir de l'enfance,’ op. 28; and on ‘Schöne Minka,’ op. 40, are among the finest specimens of the kind.

His talent shone most conspicuously whenever he had a poetical idea to interpret musically, and nowhere do we see this more clearly than in his two Polonaises, in E♭ and E, and above all in his ‘Invitation à la valse,’ known all over the world. The ‘Rondo brillant,’ op. 62, and the ‘Momento capriccioso,’ op. 12, though not unattractive, scarcely come up to the other three pieces. Of pianoforte music for four hands his only examples are opp. 3, 10 and 60, containing six, six and eight pieces respectively. Op. 60 is a collection of little pieces which for invention and fascination of sound do not yield to Schubert's best work of the kind.

CONCERTOS.—Finally, Weber takes high rank as a composer of concertos. As a pianist it was of course an object with him to find scope for his own instrument with an orchestra. Of his three concertos, the one in F minor, op. 79 (Concertstück), is to this day a stock-piece with virtuosos, and has left its mark on later composers. Mendelssohn would probably not have written his G minor concerto but for this predecessor. Not the least of its many attractions is its form (Larghetto, Allegro, March, Finale), diverging so materially from that of all previous concertos. Then, too, though complete in itself as a piece of music, it is prompted by a poetical idea, for a whole dramatic scene was in the composer's mind when he wrote it. What this was we are told by Benedict, who on the morning of the first performance of ‘Der Freischütz’ sat listening with Weber's wife while he played them the Concertstück, then just finished.

‘The Châtelaine sits all alone on her balcony gazing far away into the distance. Her knight has gone to the Holy Land. Years have passed by, battles have been fought. Is he still alive? will she ever see him again? Her excited imagination calls up a vision of her husband lying wounded and forsaken on the battlefield. Can she not fly to him and die by his side? She falls back unconscious. But hark! what notes are those in the distance? Over there in the forest something flashes in the sunlight—nearer and nearer. Knights and squires with the cross of the Crusaders, banners waving, acclamations of the people; and there—it is he! She sinks into his arms. Love is triumphant. Happiness without end. The very woods and waves sing the song of love; a thousand voices proclaim his victory.’²

The part which the different movements take in this programme is obvious enough. The music is quite independent of the idea which prompted it, but a knowledge of the programme adds greatly to the pleasure of listening; and the fact of his having composed in this manner is an interesting point in the study of Weber's idiosyncrasy.

The other two concertos, in C and E♭, have been unduly neglected for the ‘Concertstück.’ The former, composed in 1810, is indeed not so brilliant, but its delightfully original finale would alone make it a valuable work. The other owes its origin apparently to Beethoven's concerto in E♭. This came out in Feb. 1811, and we learn from Weber's diary that he bought a copy in Leipzig on Jan. 14, 1812. His own concerto in E♭ was finished in December of the same year at Gotha. The choice of the key, the remote key of B major for the adagio, and still closer resemblances between parts of the movements of the two, show how deep an impression Beethoven's work had made on the younger artist. Still it was only suggestion, and did not affect Weber's identity. The differences between the two will be found quite as decided as the resemblances.

When once Mozart had introduced the clarinet into the higher range of music it rapidly became a favourite solo-instrument. Germany had at the beginning of the century two pre-eminent clarinet-players—Hermstedt of Sondershausen and Bärmann of Munich. Spohr composed for the former, Weber for the latter.³ Hermstedt was an excellent player as far as technique went, but a man of limited intellect, while Bärmann, with an equally brilliant technique, was a thorough artist in temperament and a man of refined taste. Spohr's clarinet compositions are good work, but, perhaps because he was in the habit of composing for Hermstedt, he never seems to have got at the heart of the instrument. This Weber did, and to such an extent that he is still the classical composer for the clarinet. It is a remarkable instance of his power of penetrating into the nature of instruments that

² Benedict's *Weber*.

³ Of Weber's six works for clarinet solo, five are dedicated to his friend Bärmann: the sixth, op. 48, bears no dedication. It seems probable from Jahns (p. 454, No. 67) that this was composed for Hermstedt at his own request, but that Weber would not dedicate it to him out of consideration for Bärmann.

¹ I include the variations for PF, and violin, op. 22, and for PF and clarinet, op. 33.

though not able to play the clarinet himself, he should have so far developed its resources that since his day no substantial advance has been made by composers in handling the instrument. His three clarinet concertos (opp. 26, 73 and 74, the first a concertino) were all written in 1811, when he was living in Munich in constant intercourse with Bärmann. We have also two works for PF. and clarinet, *Variations on a theme from 'Silvana,'* and a fine 'Duo concertante' in three movements, op. 48. Seldom as these are heard, those he wrote for other wind instruments are never played at all. And yet the concertos for horn, bassoon and flute testify very remarkably to his wonderful gift for penetrating into the nature of an instrument.

LITERARY WORKS.—Weber's turn for literary composition, developed most strongly between the years 1809 and 1818, has been already mentioned.¹ As a rule his pen was naturally employed on musical matters, only one of his newspaper articles being on a general subject—*Über Baden-Baden*, Aug. 1, 1810. His talent for authorship was undoubtedly considerable. His narrative is clear and intelligible, his style correct, elegant and lively, with a certain freedom not at all unbecoming. Now and then, too, he wrote successful verses.

In this respect, as in so many others, Weber was the first of a new generation of artists. It pleased him to reveal the ideas with which his mind was crowded in words as well as in music. This is evident from his active correspondence. Weber's letters are more amusing and contain more information than those of any other German musician. As an author he was the precursor of Schumann and Wagner, over whose music, too, his own exercised so great an influence. But unlike them he did not concentrate his literary powers; his nature was too restless, and his life too unsettled. It is a pity that his musical novel, *Tonkünstlers Leben*, remained unfinished, for as he himself was the 'musician' whose 'life' he described, we should have gained an artistically drawn autobiography of inestimable value. What remains of the novel is interesting and tantalising, on account of its many acute and profound observations on art. Not that Weber could philosophise and systematise like Wagner; he touches lightly on subjects, sometimes indeed superficially, but in every word you see the man of intellectual cultivation capable of forming his own judgment. His literary affinity is closer to Schumann than to Wagner. The imagination, the humour, the kindness and cordiality towards his juniors, the absence of jealousy towards equals, are as characteristic of Weber as of Schumann. He helped materi-

ally to launch Meyerbeer and Marschner, exerted himself heartily to extend the knowledge of Spohr's music (a service Spohr did not return in kind), and though as a youth he passed a hasty judgment on Beethoven, he amply repaired the oversight in maturer years. When 'Fidelio' was being performed in Dresden, he wrote to Beethoven (Jan. 28, 1823):

'Each representation will be a festival to me, giving me the opportunity of offering to your noble spirit a homage springing from my inmost heart, which is filled with mingled admiration and affection for you.'

And Weber was no man to pay empty compliments. Like as he was to Schumann in many respects, they were very different in others. Besides the sense of humour characteristic of both, Weber had a strong satirical vein, a caustic wit and a love of fun, which he shared with Mozart. He was also more mercurial and brilliant than Schumann, who by his side seems almost slow. He took wider views of life, was more a man of the world, often with a kind of chivalrous gallantry; but far more fickle than his younger comrade in art. He wrote on all sorts of subjects—critical, polemical, historical, theoretical; most often perhaps to introduce new works and prepare the public mind for their reception. The mechanical construction of instruments was always an interesting subject to him, and he wrote newspaper articles on Capeller's improved flutes, on Kaufmann's² trumpets, chiming-clocks and harmonichord, and on Buschmann's 'Terpodion.' He even went so far as to compose a Concertstück (adagio and allegretto in F) for Kaufmann's harmonichord, a piece which shows very clearly his wonderful feeling for beauty of sound.

SUMMARY OF WEBER'S COMPOSITIONS³

I. OPERAS

1. Das Waldmädchen; 3 fragments only remaining. Unprinted. 1800.
2. Peter Schönnell und seine Nachbarn. Unprinted. 1801.
3. Rübezahl; only 3 numbers in existence, the last a Quintet published by Schlesinger. 1804, 1805.
4. Silvana; PF. score. Schlesinger. 1810.
5. Abu Haseen; PF. score. Simrock, Bonn. 1811.
6. Der Freischütz. 1820.
7. Die drei Pintos. Sketch only, unfinished. 1821. (See above p. 472b, note 2.)
8. Euryanthe. 1823.
9. Oberon. 1826.

II. OTHER DRAMATIC WORKS

1. Music to Schiller's 'Turandot'; overture and 6 short instrumental pieces. 1809.
2. Music to Müllner's 'König Yngurd'; 10 instrumental pieces and 1 vocal piece. 1817.
3. Music to Gehe's 'Heinrich IV., König von Frankreich'; 8 instrumental pieces. 1818.
4. Music to Rublack's play 'Lieb' um Liebe'; 4 vocal pieces, 1 march and 1 melodrama. 1818.
5. Music to Houwald's tragedy 'Der Leuchthurm'; 2 melodramas and 2 Interludes for harp, all short. 1820.
6. Music to Wolff's 'Freccia'; overture, 4 choruses, 1 song, 3 melodramas and dances. 1820.
7. Music to a Festspiel by Ludwig Robert; instrumental movement and 5 choruses. 1822.
8. Rondo alla Polacca for tenor voice; for Haydn's opera 'Freibrief'. 1809.
9. 4 Lieder for single voice and guitar. Über die Berge mit Ungestüm; Rase, Sturmwind, blase; Lass mich schlummern Herzen, schweige; Umringt vom mutherrfüllten Heere; from Kotzebue's *Der arme Mannsinger*. 1811.

¹ Weber's posthumous writings came out originally in three vols. (Arnold, Dresden and Leipzig), and were republished as vol. iii. of *Max von Weber's Lebensbild*.

² Father and son, of Dresden.

³ Based on Jähns's *O. M. von Weber in seinen Werken*. Berlin, 1871.

10. 2 Lieder, Mein Weib ist capore, and Frau Liereser guhe; from Anton Fischer's *Traveller's Aeneas*. 1815.
11. 2 Lieder, Wer stets hinte' Ofen kroch, and Wie wir voll Gult uns hier zusammenfinden; from Gubitz's *Lied und Vernehmen*. 1815.
12. Ballad for single voice and harp, Was stürmt die Halde heraus? from Reinbach's tragedy *Gordon und Montrose*. 1815.
13. Arlette to Huber's *Sternennädchen im Mäldinger Walde*. 1816.
14. Romance for single voice and guitar, Ein König einst gefangen sass; from Castelli's *Diana von Poliers*. 1816.
15. Lied, Huld ist der Cyaneenkraus; from Kind's *Weinberg an der Elbe*. 1817.
16. Chorus with wind instruments, Heil dir Sappho; from Grillparzer's tragedy *Sappho*. 1818.
17. Lied for single voices and guitar, Ein Mädchen ging die Wies' entlang; from Kind's *Der Abend am Waldbrunnen*. 1818.
18. Chorus with wind instruments, Agnus Dei; from Graf von Blankensee's tragedy *Carlo*. 1820.
19. Lied for 3 women's voices and guitar, Sagt woher stammt Liebeslust (Tell me where is fancy bred); from Shakespeare's *Merchant of Venice*.
20. Music and recitative, Doch weiche Töne steigen jetzt hernieder; for Spontini's 'Olympia'. 1825.
21. Recitative and Rondo for soprano and orchestra, Il momento s' avvicina. 1810.
22. Scene ed aria for soprano and orchestra, Misera me; from 'Atala'. 1811.
23. Scene ed aria for tenor, men's chorus and orchestra, Qual altro attendi. 1811.
24. Scene ed aria for tenor, 2 choruses and orchestra, Signor se padre sei; for 'Ines de Castro'. 1812.
25. Scene ed aria for soprano and orchestra, Ah, se Edmondo fosse l'uccisor; for Méhul's 'Héline'. 1816.
26. Scene ed aria for soprano and orchestra, Non paventar, mia vita; for 'Ines de Castro'. 1815.
27. Scene ed aria for soprano and orchestra, Was sag' ich? Schaudern macht mich der Gedanke! für Cherubini's 'Lodoiska'. 1818.
28. Three duets for 3 soprani and PF., Se il mio ben; Mille volte mio tesoro; Va, ti consola. 1811.

III. CANTATES

1. Der erste Ton; by Rochlitz; orchestral music for declamation and final chorus. 1808.
2. Hymn, In seiner Ordnung schafft der Herr; by Rochlitz: soli, chorus and orchestra. 1812.
3. Kampf und Sieg; by Wohlbrück; in commemoration of June 18, 1815: soli, chorus and orchestra. 1815.
4. L' Accoglianza; for the wedding of the Hereditary Grand Duke Leopold of Tuscany and Princess Maria Anna Carolina of Saxony, words by Ceani: 6 solo-voices, chorus and orchestra. Oct. 29, 1817.
5. Natur und Liebe; by Kind; for the name-day of King Friedrich August of Saxony: 2 sopranos, 2 tenors, 2 basses and PF. 1818.
6. Jubel-Cantata, Erhebt den Lobgesang; by Kind; for the 50th anniversary of King Friedrich August's accession: soli, chorus and orchestra. 1818.
7. Du, bekränzend unsre Laren; by Kind; for Duchess Amalia von Zweibrücken's birthday: solo and chorus, with PF. and flute. 1821.
8. Wo nehm' ich Blumen her; by Hell; for Princess Therese of Saxony's birthday: 3 solo-voices and PF. 1823.

IV. MASSES

1. In Eh; 4 solo-voices, chorus and orchestra; for the King of Saxony's name-day. 1818.
- 1a. Offertoire to the same; soprano solo, chorus and orchestra. 1818.
2. In G; 4 solo-voices, chorus and orchestra; for the golden wedding of the King and Queen of Saxony. 1818-19.
- 2a. Offertoire to the same; soprano solo, chorus and orchestra. 1818.

V. LIEDER, BALLADS AND ROMANCES FOR ONE OR TWO VOICES, WITH PIANO OR GUITAR

(Alphabetically arranged)

1. Ach war' ich doch zu dieser Stunde. 1816.
2. Ach wenn ich nur ein Liebchen hätte. 1809.
3. Ah, dove siete, oh ludi belli. Canzonet (guitar). 1811.
4. Alles in mir glühet zu lieben. 1814.
5. Auf die stürmische See hinaus (guitar). 1810.
6. Ch' io mal vi possa. Canzonet (guitar). 1811.
7. Das war ein recht abentheuerliches Gesicht. 1820.
8. Der Galschir steht am Felsenrand. 1822.
9. Der Holsdiebsel sonder Wank. 1813.
10. Der Tag hat seinen Schmuck. Volklied. 1819.
11. Die Temperamente beten Verthe der Geliebten. 1816.
12. b. Der Leichtmüthige (Lust entfoh, und hin ist hin).
13. c. Der Liebesmüthige (Vertrahen I).
14. d. Der Gleichmüthige (Nun bin ich befreit, wie behaglich I).
15. Die Wunde brennt, die bleichen Lippen beben. Sonnet from Leyer und Schwert. 1814.
16. Dost' er Harmonien hör' ich klingen. Ibid. 1816.
17. Du liebes, holdes, himmelstüßes Wesen. Sonnet. 1812.
18. Ein Echo kenn' ich. 1808.
19. Ein fromme Mard von gutem Stand. Volklied. 1818.
20. Ein König einst gefangen sass (guitar). 1816. See II. 14.
21. Ein Mädchen ging die Wies' entlang (guitar). 1818. See II. 17.
22. Ein neues Lied, ein neues Lied; MS. 1810.
23. Ein steter Kampf ist unser Leben. 1808.
24. Ein Veilchen blüht im Thale. 1817.
25. Ei, wenn ich doch ein Maler wär'. 1820.
26. Elle était simple et gentillette. 1824.
27. Endlich hatte Damon sie gefunden (guitar). 1810.
28. Entfiehlet schnell von mir. MS. 1803.
29. Es sitzt die Zeit im weissen Kleid (guitar). 1810.
30. Es stürmt auf der Flur, es brauset im Hain. 1813.
31. Frage mich immer, fragest umsonst. 1813.
32. Frei und froh mit munterm Sinnen. 1812.

33. From Chindara's warbling fount I come; MS. 1826.
34. Herzchen, mein Schätzchen, bist tausendmal mein. Volklied. 1813.
35. Herz, lass dich nicht zerpalten. Leyer und Schwert. 1814.
36. Herz, mein Herz erinne dich. 1820.
37. Horch! leise horch, Geliebte, horch! (guitar). 1809.
38. Ich denke dein, wenn durch den Hain. 1806.
39. Ich empfinde fast ein Grauen. 1818.
40. Ich hab' mir eins erwählt. Volklied. 1817.
41. Ich sah ein Röschen am Wege stehn. 1809.
42. Ich sah sie hingesunken; MS. 1804.
43. Ich tummle mich auf der Halde. 1819.
44. In der Berge Riesenschatten (guitar). 1812.
45. Judda, hochgelobtes Land. 1819.
46. I und mein junges Weib können schon tanza. Volklied (guitar). 1812.
47. Jüngst aass ich am Grabe der Trauten allein. 1804.
48. Keine Lust ohn' treues Lieben. Triolet. 1819.
49. Lass mich schlummern, Herzlein schweige (guitar). 1811. See II. 9.
50. Mädel, schau' mir ins Gesicht (guitar). 1807.
51. Malenblümen so schön. 1811.
52. Meine Lieder, meine Sänge. 1809.
53. Mein Schatz, der ist auf der Wanderschaft hin. Volkslied. 1818.
54. Mein Schatzel ist hübsch. Volklied. 1818.
55. Ninf, se l'ete. Canzonet (guitar). 1811.
56. O Bess, ich muss dich lassen. Volklied, 2-part. 1817.
57. Rase, Sturmwind, blase (guitar). 1811. MS. See II. 9.
58. Rothen im Haare, den Becher zur Hand. 1818.
59. Sagt mir an, was schmunzelt ihr. 1813.
60. Sanftes Licht, welche nicht (guitar). 1809.
61. Schlarf, Herzensschneider, Lieb hab'st du (guitar). 1810.
62. Sicch' t' inganni, o Clori. Canzonet. 1810.
63. Sind es Schmerzen, sind es Freuden. 1813.
64. Sind wir geschieden, und ich muss leben ohne dich. Volklied. See II. 9.
65. 'Sie nichts mit den alten Weibern. Volklied. 1817.
66. So geht es im Schnitzelputz-Häusel. Volklied, 2-part. 1817.
67. Süsse Ahnung deht den Busen. 1809.
68. Trarior, der Sommer der ist do. Volklied, 2-part. 1817.
69. Traurig, einsam weilst du hin. 1808.
70. Über die Berge mit Ungethüm (guitar). 1811. See II. 9.
71. Um Rettung bietet ein güldnes Geschmeide. 1812.
72. Umrirngt vom muthwilligen Heere. Lied with chorus (guitar). 1811. See II. 9.
73. Umsonst antwortet der lockenden Liebe. 1802.
74. Ungern flieht das süsse Leben; MS. 1802.
75. Vater ich rufe dich. Leyer und Schwert. 1814.
76. Vögeln, einsam in dem Bauer. 1816.
77. Vögeln hüpfet in dem Haine. 1816.
78. Was bricht hervor, was Blüten weies. 1819.
79. Was stürmet die Halde heraus (harp). 1815. See II. 12.
80. Was zieht zu deinem Zauberkreise. 1809.
81. Weile, Kind, will nicht rauben. 1816.
82. Weil es Gott also gefügt; MS. 1809.
83. Weine, weine, weine nur nicht. Volklied. 1818.
84. Wenn, Bröhr, wie mir täglich sehn. Lied with chorus. 1809.
85. Wenn die Maier grün sich kleiden. 1818.
86. Wenn ich die Blümlein schau. 1817.
87. Wenn ich die Vögeln wär'. Volklied. 1818.
88. Wenn Kleinlein süssen Schlummers Ruh. 1821.
89. Wo ist des Sängers Vaterland? Leyer und Schwert. 1814.
90. Wollt ihr sie kennen, soll ich sie nennen. 1808.

VI. PARTSONGS FOR MEN'S VOICES

1. Bald heisst es wieder: Gute Nacht. 4-part. 1819.
2. Das Volk steht auf, der Sturm bricht los. Leyer und Schwert; 4-part. 1814.
3. Du Schwert an meiner Linken. Leyer und Schwert; 4-part. 1814.
4. Ei, el, wie scheint der Mond so hell. Volklied; 3-part. 1818.
5. Ein Kind ist uns geboren. 4-part. 1819.
6. Flüstert lieblich, Sommerlüfte. 4-part, with PF. 1817.
7. Freunde, dass Gult liebend uns trage. 4-part. 1814.
8. Frisch auf, frisch auf, mit raschem Flug. Leyer und Schwert. 1814.
9. Föllet die Humpen, muthige Knappen (Turnierbankett). 1812.
10. Hinaus, hinaus, zum blut'gen Strauss. 4-part. 1825.
11. Hörschall! Überfall! 4-part. 1825.
12. Hör' uns, Allmächtiger! Leyer und Schwert; 4-part. 1814.
13. Husaren sind gar wackre Truppen. 4-part. 1821.
14. Ja freue dich, so wie du bist. 4-part. 1819.
15. Schlacht, du brichst an. Leyer und Schwert; 4-part. 1814.
16. Schöne Ahnung ist erglommen. 4-part. 1818.
17. Sohn der Ruhe, sinke nieder. 4-part. 1822.
18. Was glanz'ort vorm Walde im Sonnenschein. (Lützow). Leyer und Schwert; 4-part. 1814.
19. Wir stehn vor Gott, der Meineds Frevel rächt. Unison with wind instruments. 1812.

VII. LIEDER AND PARTSONGS FOR VARIOUS VOICES WITH AND WITHOUT ACCOMPANIMENT

1. Canons zu zwey sind nicht drey. Canon a 3 (printed by Jahns, No. 90). 1810.
2. Die Sonate soll ich spielen. Canon a 3 (Jahns, No. 89). 1810.
3. Ein Gärtchen und ein Häuschen drin. Soprano, tenor and bass, with wind accompaniment. MS. 1808.
4. Geiger und Pfeiffer. Swabian Dance-song: soprano, 2 tenors and bass. 1812.
5. Heisse, stille Liebe schwebet. Soprano, 2 tenors and bass. 1812.
6. Hörst du der Klage dumpfen Schall. Mixed chorus and wind instruments. MS. 1811.
7. Leck' mich im Angesicht. Canon a 3 (Jahns, No. 95). 1810.
8. Leis' wandeln wir, wie Gelsterhauch. Dirge: soprano, 2 tenors and bass, with wind instruments. 1803.
9. Lenz erwacht und Nachtrigalen. 2 soprani, 2 tenors and 2 basses, with PF.; MS. 1812.
10. Mädchen, ach meide Mänerschmeichelein. Canon a 3 (Jahns, No. 35). 1802.
11. Scheiden und meiden ist einetzel. Canon a 4 (Jahns, No. 167). 1814.

12. Well Maria Töne hext. Canon & 3; MS. 1816.
 13. Zu dem Reiche der Töne schweben. Canon & 4 (Jahns, No. 164). 1814.

14. Zur Fremde ward geboren. Soprano, 2 tenors and bass. 1812.

VIII. SCOTCH SONGS, ACCOMPANIMENTS TO, FOR FLUTE, VIOLIN, VIOLONCELLO AND PF., 1825

1. The soothing shades of gloaming.
2. Greeting with love, on fire for fame.
3. O poorth cauld and restless love.
4. True-hearted was he.
5. Yes thou mayst walk.
6. A soldier am I.
7. John Anderson my Jo.
8. O my Luve's like the red red rose.
9. Robin is my joy.
10. Where has ye been a' day.

IX. SYMPHONIES, OVERTURES, ORCHESTRAL DANCES AND MARCHES

1. First Symphony, C major: Allegro con fuoco; Andante; Scherzo, presto; Finale, presto. 1806-7.
2. Second Symphony, C major: Allegro; Adagio ma non troppo; Menuetto, allegro; Finale, scherzo presto. 1807.
3. Grande Overture à plusieurs instruments, B♭-E♭. 1807. See I. 2.
4. Overture, Beherrscher der Geister; D minor. 1811. See I. 3.
5. Jubel-Ouverture; E. 1818.
6. Waltz for wind instruments; E♭, MS. The trio is Weber's Lied 'Mendelbäume so schön.' 1812.
7. Deutscher for full orchestra; D. Subject same as the second of the Lieder II. 10. 1815.
8. Tedesco for full orchestra; D. Unprinted; used for the 'Preciosa' music. 1816.
9. Marcia vivace, for 10 trumpets; D. Unprinted; used for 'Euryanthe.' 1822.
10. March, for wind instruments; C. Subject partly the same as XI. 23 (5). 1826.

X. CONCERTOS AND CONCERTED PIECES WITH ORCHESTRA

1. First PF. concerto; C. Allegro; Adagio; Finale, presto. 1810.
2. Second PF. concerto; E♭. Allegro maestoso; Adagio; Rondo, presto. 1812.
3. Concertstück for PF. & F minor. Larghetto affettuoso; Allegro passionato; Marcia e Rondo gioioso. 1821.
4. Concertino for clarinet; C minor—E♭. Adagio ma non troppo; Thema (Andante) with variations, and Finale, allegro. 1811.
5. First concerto for clarinet; F minor. Allegro moderato; Adagio ma non troppo; Rondo, allegretto. 1811.
6. Second concerto for clarinet; E♭. Allegro; Romanze; Alla Polacca. 1811.
7. Quintet for clarinet and string-quartet; E♭. Allegro; Fantasia Adagio; Menuetto; Rondo, allegro gioioso. Classified here as being of the nature of a concerto. 1816.
8. Concerto for bassoon; F major. Allegro ma non troppo; Adagio; Rondo, allegro. 1811.
9. Adagio e Rondo Ungarese, for bassoon; C minor. Revision of No. 13. 1813.
10. Concertino for horn; E minor. Adagio; Andante con moto with variations; Polacca. 1815.
11. Romanza Siciliana for flute; G minor. 1805.
12. Six variations for viola on the Volkslied 'A Schüssel und a Reind'l'; C. 1805.
13. Andante and Rondo Ungarese for viola. C minor. See No. 9. 1809.
14. Polpourri for violoncello; D. Maestoso; Andante with variations; Adagio; Finale, allegro. 1808.
15. Andante and variations for violoncello; D minor, F major. 1810.
16. Adagio and Rondo for the harmon chord; F major. 1811.

XI. PIANOFORTE MUSIC

A. For two hands

1. First Sonata; C. Allegro; Adagio; Menuetto, allegro; Rondo, presto. 1812.
2. Second Sonata; A♭. Allegro moderato con spirito ed assai legato; Andante; Menuetto capriccio; Rondo, moderato e molto grazioso. 1816.
3. Third Sonata; D minor. Allegro feroco; Andante con moto; Rondo, presto. 1816.
4. Fourth Sonata; E minor. Moderato; Menuetto; Andante quasi Allegretto; Finale, La Tarantella. 1822.
5. Six variations on an original theme; C. 1804.
6. Eight variations on a theme from Vogler's 'Castor and Pollux'; F. 1804.
7. Six variations on a theme from Vogler's 'Samorl'; B♭. 1804.
8. Seven variations on Bianchi's 'Vien què Dorina bella'; C. 1807.
9. Seven variations on an original theme; F. 1808.
10. Seven variations on a theme from Méhul's 'Joseph'; C. 1812.
11. Nine variations on a Russian air, 'Schöne Minka'; C minor. 1815.
12. Seven variations on a Gipsy air; C. 1817.
13. Momento capriccioso; B♭. 1808.
14. Grande Polonaise; E♭. 1808.
15. Polacca brillante; E major. 1819.
16. Rondo brillante; E♭. 1819.
17. Aufforderung zum Tanze, Rondo brillant; D♭. 1819.
18. Six Fughetti, op. 1. 1798.
19. Twelve Allemandes (Valse, Nos. 11 and 12, for 4 hands). 1801.
20. Six Ecosaisées. 1802.
21. Eighteen Valse (Valse favorites de l'Impératrice de France). 1812.

B. For four hands

22. Six easy little pieces: (1) Sonatina, C; (2) Romanze, F; (3) Menuetto, B♭; (4) Andante con variazioni, G; (5) Marcia, maestoso, C; (6) Rondo, E♭.

23. Six pieces: (1) Moderato, E♭; (2) Andantino con moto, C minor; (3) Andante con variazioni, G; (4) Masurik, C; (5) Adagio, A; (6) Rondo, E♭. 1809.
24. Eight pieces: (1) Moderato, D; (2) Allegro, C; (3) Adagio, F; (4) Allegro, A minor; (5) Alla Siciliana, D minor; (6) Tema variato (Ich hab' mir eins erwählt, see V. 40), E; (7) Marcia, G minor; (8) Rondo, B♭. 1818-19.

XII. PIANOFORTE MUSIC WITH ACCOMPANIMENT

1. Nine variations on a Norwegian air; D minor. PF. and violin. 1808.
2. Six Sonatas for PF. and violin: (1) F. Allegro, Romanze, Rondo amabile; (2) G. Moderato, Adagio, Rondo allegro; (3) D minor, Allegretto moderato, Rondo presto; (4) E♭. Moderato, Rondo vivace; (5) A. Andante con moto with variations, Finale Siciliano; (6) C. Allegro con fuoco, Largo, Polacca. 1810.
3. Seven variations for PF. and clarinet; B♭. 1811.
4. Grand Duo concertant for PF. and clarinet; E♭. Allegro con fuoco, Andante con moto, Rondo allegro. 1816.
5. Divertimento assai facile for PF. and guitar; (1) Andante, C; (2) Valse, A minor; (3) Andante con variazioni, G; (4) Polacca, A major. 1816.

WEBER, BERNHARD ANSELM (b. Mannheim, Apr. 18, 1766; d. Berlin, Mar. 23, 1821). He was a pupil of Abbé Vogler and Holzbauer, studied theology and law at Heidelberg about 1781. After touring for some time as a virtuoso on Röllig's *Xänorphika*,¹ he became, in 1787, musical director of Grossmann's theatrical company which played alternately at Hanover, Cassels and Pymont, and it was during that time that he produced his first works for the stage. In 1790 he joined Abbé Vogler in a tour through Holland, Scandinavia and Germany, continuing at the same time, under the latter, his studies in counterpoint. After a prolonged sojourn in Stockholm they returned to Hamburg, where Weber appeared with great success as pianoforte virtuoso. Thence he went to Berlin as Kapellmeister, conjointly with Wessely of the National theatre. In 1793 he was sent to Vienna to engage singers for the Berlin theatre, and it was then that he wrote the essay on the Vienna theatre and the singers of that town, for the *Berliner Musikzeitung* (1793, p. 131). In Vienna he became acquainted with Salieri, whose experiences with regard to the theatre were of great value to him. He also heard during that time some of Gluck's operas, and on his return to Berlin he used all his influence to have them performed there. This became only possible when he succeeded in inducing the famous Mme. Schick (STRINASACCHI, q.v.) to exchange the Italian for the German Opera. She sang the title rôle in 'Iphigenia in Tauris,' the first of Gluck's operas given in Berlin under Weber's direction and conductorship, Feb. 24, 1795. In 1796 he refused an engagement for Rheinsberg, and henceforth his

¹ One of the many abortive attempts to construct a clavier instrument in which the tone is produced by friction, as in the hurdy-gurdy, of SOPHISTED PIANOFORTES.

salary in Berlin was raised to 1000 thaler. In 1800 he went on a concert tour to Breslau with the violinist Ernst SCHICK (*q.v.*) and his wife, and in 1803 he visited Paris with the famous dramatist Kotzebue. On the fusion of the Italian and the National Operas he became royal Kapellmeister, and in 1816 he was decorated with the iron cross on a white ribbon (non-combatant). In 1818 he was attacked by a serious malady which compelled him to withdraw gradually from his official duties. He was a prolific composer of operas, Singspiele, songs, etc. (List in Ledebur, *Tonkünstler Lexikon Berlins*, p. 627-28), but he lacked the qualities necessary to ensure their permanence. Some of his songs have retained their popularity, and the melodies to 'Mit dem Pfeil dem Bogen,' and 'Rasch tritt der Tod den Menschen an,' from his music to Schiller's *Tell*, first performed in Berlin, 1804, have even become folk-songs. (Ledebur, *Berliner Tonkünstler Lexikon Q.-L.*)

E. v. d. s.

WEBER, BERNHARD CHRISTIAN, organist at Tennstedt, Thuringia, at the beginning of the 18th century, deserves mention as the composer of 'Das wohltemperirte Klavier,' a set of fugues with preludes in all keys major and minor, the MS. dated 1689 in the library of the Brussels Conservatoire. See *Monatshefte für Musikgeschichte*, 1898, No. 10, and 1899, No. 8 (Riemann).

WEBER, FRANZ (*b.* Cologne, Aug. 26, 1805; *d.* there, Sept. 18, 1876), pupil of Bernhard Klein, organist of Cologne Cathedral, and conductor of the Cologne Male Choir, which he raised to a high degree of efficiency and brought over to London for a very successful series of concerts. In 1875 he received the title of professor. He composed the 57th Psalm, 4 v., and choruses for male voices. E. v. d. s.

WEBER, FRIEDRICH DIONYSUS (*b.* Velichov, Bohemia, Oct. 9, 1766; *d.* Prague, Dec. 25, 1842), a pupil of VOGLER (*q.v.*), composer and music teacher in Prague, was one of the founders and the first director of the Prague Conservatoire. When Wagner, as a young musician, visited Prague in 1832 with his symphony in C, Weber assembled the orchestra of the Conservatoire to give it a first hearing. His works include light operas, music for wind instruments, military band, etc., and several theoretic books. (See WEBER, Carl Maria 12, p. 646.)

WEBER, GEORG (*b.* Mühlhausen, Thuringia,¹ early 16th cent.), studied at Leipzig c. 1554, became cantor of Weissenfels in 1572. He was the greatest Weissenfels cantor before the Thirty Years' War, and composed German sacred songs and psalms (1588; 2nd ed., 1596); German Psalms of David, 4-6 v. (1568 and 1569).

BIBL.—A. WERNER, *Städtische und fürstliche Musikpflege in Weissenfels* (1911) (Mendel; Q.-L.).

¹ Riemann says *b.* Weissenfels.

WEBER, GEORG (*b.* Dahlen, near Meissen, 17th cent.), studied at Königsberg, Prussia, becoming vicar and successor of Magdeburg cathedral. He was an excellent poet and composer, and wrote a number of books of sacred songs, 1-5 v. The first two books, with accompaniments for several instruments, published in 1640 and 1645 at Stockholm, where also the dedications are signed, show that he was living there at the time. Four books appeared in 1648 at Danzig, 3 at Königsberg, 1649; 3 melodies from these have been republished. Two other books appeared at Leipzig, 1652 and 1653 (Q.-L.).

WEBER, GOTTFRIED (*b.* Freinsheim, near Mannheim, Mar. 1, 1779; *d.* Sept. 21, 1839), Doctor of Laws and Philosophy, composer, theorist and practical musician, studied and travelled until, in 1802, he settled in Mannheim as a lawyer and holder of a Government appointment.

It was here that his namesake, Carl Maria von Weber, sought a refuge after his banishment from Würtemberg (1810), that in the house of Gottfried's father an asylum was found for old Franz Anton until his death in 1812, and that a lasting friendship was formed between Gottfried Weber, then aged 31, and Carl Maria, eight years his junior. A year previously the lawyer, proficient on the piano, flute and violoncello, and well versed in the scientific branches of musical knowledge, had founded, out of two existing societies, the 'Museum,' a band and chorus of amateurs who, under his able direction and with some professional help, did excellent work. Gottfried's influence gained for the young composer a hearing in Mannheim, and the artists and amateurs, carried away by the spirit and fire of their conductor, did much towards establishing Carl Maria's fame in their city. For a lengthy account of the relations, both lively and severe, between these distinguished men, their influence on each other's work, their pleasant wanderings in company with other choice spirits, singing their newest songs to the guitar as serenades; their establishment of a so-called secret society (with high aims) of composer-literati, in which Gottfried adopted the pseudonym of Giusto; and of their merry meetings at the 'Drei Könige' or at Gottfried's house—the reader may be referred to Max v. Weber's life of his father (Carl Maria). Some of Gottfried's best songs had been inspired by this intercourse, and were no doubt exquisitely interpreted by his (second) wife, *née* v. Dusch. Besides these songs, strophic in form and sometimes provided with guitar accompaniment, Weber's compositions include three masses, other sacred music, sonatas and concerted pieces for various instruments. He held various legal posts at Mainz from 1814, and at Darmstadt from 1818, and in 1832 was given

the title of 'Grossherzoglicher Generalstaats-prokurator.'

In the intervals of founding the Mannheim Conservatoire, superintending the court church musical services, and doing occasional duty as conductor at Mainz, he laid the basis of his reputation by a profound study of the theory of music, the result of which appeared in the *Versuch einer geordneten Theorie* (1817-21), of which translations subsequently appeared in French, Danish and English (Warner, Boston, 1846, and J. Bishop, London, 1851); *Allgemeine Musiklehre* (1822); *Die Generalbasslehre zum Selbstunterricht* (1833); *Ergebnisse der bisherigen Forschungen über die Echtheit des Mozartschens Requiems* (1826),¹ and other volumes, and articles published in *Caecilia*, the musical periodical published by Schott in Mainz, and edited by Gottfried Weber from its beginning in 1824 until his death (1839) (see PERIODICALS). Weber's examination of musical theories led to his work on time-measurements and the 'tempo-interpreter' (*Über chronometrische Tempobezeichnung*, 1817) (see METRONOME), and his study of acoustics to certain improvements or inventions in wind-instrument making. A full list of his writings and compositions is given in *Riemann* and *Q.-L.*

L. M. M.

WEBER, JOHANNES (b. Brumath, Alsace, Sept. 6, 1818; d. Paris, Mar. 19 or 20, 1902), writer on music. He was secretary to Meyerbeer in Paris, and was musical critic of *Le Temps* from 1861-95. He wrote *Grammaire musicale*, and other theoretical books, *La Situation musicale en France* (1884); *Meyerbeer, notes et souvenirs d'un de ses secrétaires* (Paris, 1898); *Les Illusions musicales et la vérité sur l'expression* (1899, 2nd ed.).

M. L. P.

WEBER, LUDWIG (b. Nuremberg, Oct. 13, 1891), composer, largely self-taught, has brought out a symphony in B minor, 'Hymnen an die Nacht,' a large work for choir and orchestra, two string quartets, PF. music, organ music, songs and a 1-act opera, 'Midas' (*Riemann*).

WEBERN, ANTON VON (b. Vienna, Dec. 3, 1883), composer, became a research student under Guido Adler and took his degree of Ph.D. at Vienna University in 1906, the same year as Carl Horwitz and two years before Egon Wellesz. All three were pupils of Schönberg, whose influence is shown in their works at different periods, but Webern was the first, and has remained the most loyal, adherent. Berg and Webern were working with him at a critical phase, when, according to Erwin Stein, 'they actually experienced the absolute necessity that gave birth to a new music, and could therefore not help making Schönberg's style their own.' Webern was for a time a theatrical

¹ Weber's connexion with the controversy on Mozart's Requiem is fully dealt with in Dr. W. Pole's *Story of Mozart's Requiem* (1879).

conductor. Apart from his first published work, a Passacaglia for orchestra, op. 1, his compositions are mostly of small, not to say minute dimensions, within which he seeks to concentrate the utmost intensity of expression, though in subdued tones which have led the writer quoted above to describe him as the 'composer of the pianissimo espressivo.' The best-known example of this is the 'Five Movements' for string quartet, op. 5, brief spells of hypersensitive colour, which demand the most patient and thorough rehearsal and pass in a few moments. A characteristic example of his latest development is the 'Geistliche Lieder' for soprano with flute, clarinet, trumpet, harp and double bass. His works are as follows:

Orchestral.—'Passacaglia,' op. 1. Six Pieces, op. 6. Five Pieces, op. 10.

Choral.—'Entflieht auf leichten Kähnen,' a cappella, op. 2.

String Quartets.—Five Movements, op. 5. Six Bagatelles, op. 9.

Other Chamber Music.—Four pieces for vln. and PF, op. 7. Three little pieces for vcl and PF, op. 11.

Songs.—Opp. 3 and 4 with PF, opp. 8 and 13 with orch. and PF, opp. 14, 15 and 16 ('Geistliche Lieder') with various solo instr.

WECHSELNOTE, see NOTA CAMBITA.

WECKER, GEORG KASPAE (b. Nuremberg, Apr. 2, 1632; d. there, Apr. 20, 1695). His father, who had some ability as an instrumental musician, gave him his first instruction in clavier-playing. He received his further instruction in organ-playing and composition generally from Erasmus Kindermann, then organist to the Egidienkirche of Nuremberg. At the age of 19 Wecker obtained his first appointment as organist to one of the Nuremberg churches, and afterwards passing from one church to another, at last in 1686 obtained the highest post in Nuremberg, that of organist to the Sebaldkirche, where he remained till his death. He was in great request as a teacher, and numbered among his pupils Johann Krieger and Pachelbel. It was only at the urgent request of his friend and pupil, W. M. Endter, who was also his publisher, that in the last year of his life he prepared for publication a work with the following title:

XVIII Geistliche Concerten, mit 2 bis 4 Vocal-Stimmen und 5 instrumentis ad libitum zu musiciren, auf die Heiligen Festtage des ganzen Jahres gerichtet sam̃t etlichen andern, so bei vorräthigen Kirchenensolennitäten zu gebrauchē. . . Nürnberg, 1695.

The publisher introduces the work with a preface in which he gives directions as to various ways of performance. These 'Spiritual Concertos' are in reality church cantatas, and like similar works by Buxtehude and others, show the form in its intermediate stage between Heinrich Schütz and Sebastian Bach. They begin with a short instrumental prelude entitled 'Sonatina,' and have similar interludes entitled 'Ritornelli,' and short solo arias between the choruses. Two of these cantatas are given in *D.D.T.*, 2nd series, vi. i., which contain works of various Nuremberg masters of the latter part of the 17th century. Another from a MS. source on the hymn 'Allein Gott

in der Hüh'sei Ehr', with a fuller complement of instruments, though with little use of the familiar tune, and evidently designed for a great festival occasion, is also given in the modern publication. Several 'Geistliche Lieder' by Wecker for one voice with basso continuo appeared in the Nuremberg hymn-books of the time. Only one short organ fugue of his composition has come down to us in MS. It is printed in Ritter's *Geschichte des Orgelspiels*, Ex. 79.

J. R. M.

WECKERLIN, JEAN BAPTISTE THÉODORE (b. Guebwiller, Alsace, Nov. 9, 1821; d. Trottberg, near Guebwiller, May 20, 1910), son of a manufacturer. So strong were his musical instincts, that though educated for trade, he ran away to Paris in 1843, and in 1844 entered the Conservatoire, where he learned harmony under Elwart, singing under Ponchard, and composition under Halévy. Not succeeding in the Conservatoire examinations, he left the school, and took to teaching and composition. Eager to produce, and very industrious, he let slip no opportunity of making himself known, and attempted all branches of composition, though soon finding that success at the theatre was out of the question, in spite of the fact that his one-act piece, 'L'Organiste dans l'embarras,' was performed at the Théâtre Lyrique one hundred times in 1853. Musical bibliography was his main resource, and he brought to light many curious old compositions, such as the 'Ballet comique de la Royné,' which was given with others of the same class, at the concerts of the Société de Sainte Cécile, of which he was chorus-master from 1850-1855.¹ He also made a fine collection of scarce books of poetry, with airs in notation, and song-writers, which he turned to account in his collections of national airs. In 1863 he was selected to form the library of the newly-founded Société des Compositeurs de Musique, of which he became archivist, and in 1869 was placed by Auber in the Library of the Conservatoire, of which he became head-librarian Sept. 9, 1876—a post which he filled with success until 1905. His first composition of importance was performed at the Salle du Conservatoire, Paris, Dec. 5, 1847 ('Roland,' heroic scenes for solo, chorus and orchestra—not published).

His vocal and operatic works include 6 operas; 2 ode-symphonies; 2 antique dramas; a large number of choruses for female voices and for male do.; 6 'Quatuors de salon'; various extensive collections of pieces, and over 300 airs for voice and PF.; a Mass and sundry motets. His instrumental works comprise a symphony and suite, both for full orchestra; arrangements, etc.

His bibliographical works are as follows:

'Chansons populaires des provinces de la

France' (1860), with Champfleury; 'Les Échos du temps passé,' 3 vols.; 'Les Échos d'Angleterre,' 1877; 'Album de la grand-maman,' twenty old melodies; 'Chansons et rondes pour les enfants' (1885); 'Chansons de France pour les petits Français' (1885); revised editions of 'Ballet comique de la Reine'; Cambert's operas 'Pomone' and 'Les Peines et les plaisirs de l'amour'; 'Le Bourgeois gentil-homme,' divertissements par Molière and Lully. Various articles in the 'Bulletin de la Société des Compositeurs'; 'Chansons populaires de l'Alsace,' 2 vols. (1883); and 'La Bibliothèque du Conservatoire de Musique,' 1 vol. 8vo (1885), a *catalogue raisonné* of the books in the Réserve. Books on French folk-song appeared in 1886, 1887, 1904, etc., and three series of *Musiciens* were published in 1877, 1890, and 1899.

G. C., with addns.

WECKMANN, MATTHIAS (b. ? Oppershausen,² Thuringia, 1621; d. Hamburg, 1674). At an early age he was received into the Electoral Chapel at Dresden as soprano singer, and enjoyed the instruction of Heinrich Schütz. On the recommendation of Schütz he was sent in 1637, at the expense of the Elector Johann Georg I., to receive further instruction in organ-playing and composition from Jacob Praetorius in Hamburg. After his return to Dresden in 1640 he was appointed organist to the Electoral Chapel, and had the further duty of training the choir boys. A visit of the Crown Prince of Denmark to Dresden was the occasion of Weckmann's being permitted to go for a time to serve as Kapellmeister to the Crown Prince at Nykjöbing in Denmark. He returned to his Dresden duties in 1647, but in 1654 the occasional friction between Germans and Italians in the Electoral Chapel induced him to apply for the vacant organistship of St. James's, Hamburg, which in 1655 the Elector permitted him to accept. With the exception of an occasional visit to Dresden, Weckmann remained at Hamburg for the rest of his life, living an exceptionally busy musical life till his death in 1674.

In conjunction with the other organists and musicians of the town, such as Scheidemann, Praetorius, Selle, Schop and Bernhard, and with the hearty support of all the citizens of highest social standing, he founded the Collegium Musicum, a musical society which gave frequent performances of the best and newest native and foreign music, vocal and instrumental, the beginning of the system of public concerts in Hamburg. As an organist and clavier-player generally, Weckmann enjoyed great reputation in his day. Mattheson gives an account of a trial of skill which took place at Dresden between Weckmann and Froberger, who parted from each other with

¹ Some doubt is thrown on the alleged place of birth, because his father, who was a Lutheran pastor, was not appointed to Oppershausen till 1628, and his name is not found in the baptismal register.

² Seghers (1801-81) was conductor.

expressions of mutual respect, Froberger declaring his competitor to be a real virtuoso. None of Weckmann's works were printed in his lifetime, and only eight of his larger works for voices and instruments have been preserved. Five of them are due to the diligence with which Gustaf Düben, the Swedish Kapellmeister at Stockholm, collected the works of North German musicians for the use of his chapel, and these are now in the Royal library at Upsala. Düben made Weckmann's personal acquaintance at Hamburg in 1664, and was afterwards in correspondence with him. The other three works Weckmann took with him to Dresden in 1667 as a gift to the Elector Johann Georg II., and they are now in the library at Dresden. These eight works are all in the sacred concerto style of Heinrich Schütz, and have now been published in modern form in *D.D.T.* vi. Besides these, only a few choral-treatments for organ have been preserved, of which one now appears in Straube's 'Choral-Vorspiele alter Meister' (Peters). J. R. M.

WEDDING OF CAMACHO, THE, see HOCHZEIT DES CAMACHO, DIE.

WEEKLES, THOMAS (*d.* London, Nov. 30, 1623), is not heard of before 1597, when his book of 'Madrigals to 3. 4. 5. & 6. Voyces' was published. In the dedication of this book to George Phillpot (of Thruxton near Andover) Weekles describes the contents as 'the first fruits of my barren ground.' In 1598 he was in the service of Edward Darcy, Groom of the Privy Chamber, to whom he dedicated his 'Balletts and Madrigals, to five voyces.' As he speaks here of his 'yeeres yet unripened,' we may perhaps place his birth between 1570 and 1580. Two books appeared in 1600; the first, a set of 5-part madrigals, is dedicated to Henry, Lord Winsor, Baron of Bradenham. In this dedication he says, 'I confess my conscience is untoucht with any other arts,' though other musicians try to be more than musicians; 'this small faculty of mine is alone in me, and without the assistance of other more confident sciences.' The other volume of this year is a set of 6-part madrigals dedicated to George Brooke. Weekles now describes himself as 'of the Colledge at Winchester, organist.' His name occurs only once in the College books in reference to the mending of the window of his room in College; it also appears from the books that the organist's stipend in the years 1600-02 was 13s. 4d., with his daily commons and his lodging.

To 'The Triumphes of Oriana,' 1601, Weekles contributed a 6-part madrigal, 'As Vesta was from Latmos,' one of the finest madrigals in the collection. He seems to have been on terms of intimacy with Morley, the editor of the collection, for on his death he composed a setting of a verse beginning 'Death hath deprived me of my dearest friend,' published

as 'A Remembrance of his friend, Thomas Morley' in the 'Ayeres or Phantasticke Spirites' of 1608. On July 13, 1602, Weekles took his degree of Bachelor of Music at Oxford from New College. The entry in the University Register which records the granting of the grace (Feb. 12, 1601-02) mentions his sixteen years' study and practice of music. Soon afterwards he was appointed organist to Chichester Cathedral. The Chapter Records of Chichester have perished, but it is evident from the Subdeanery Registers that he was at Chichester with his family in 1603, for the baptism of Thomas Weekles is entered there on June 9; another child 'Alles' was baptized Sept. 17, 1606. In 1608 appeared his 'Ayeres or Phantasticke Spirites for three voices,' in which he describes himself as 'Gentleman of his Majesty's Chapel, Bachelor of Music, and Organist of the Cathedral Church of Chichester.' The name of Weekles, however, is not to be found in the *Old Cheque Book of the Chapel Royal* (edited by Rimbault, 1872). He contributed two pieces to Leighton's 'Teares or Lamentacions,' 1614, — 'Most mighty and all,' a 4, and 'O happy he,' a 5. Though these were his last publications it is probable that to this period of his life belong the numerous anthems which still for the most part remain in MS.; one anthem at any rate bears the date Mar. 9, 1617 ('Deliver us, O Lord,' R.C.M.). The burial of 'Eliza: Welkes, the wyfe of Mr. Tho: Welkes, organist of the Cathedrall Church,' is entered in the Subdeanery Registers, Sept. 7, 1622.

G. E. P. A.

Weekles died, while on a visit to London, at the house of his friend Henry Drinkwater, in the parish of St. Bride's, Fleet Street. His will is dated Nov. 30, 1623, and the registers of St. Bride's show that he was buried there on Dec. 1; these facts point to his having died on Nov. 30. His will was proved on Dec. 5 in the Dean's Peculiar Court at Chichester (vol. iii. fo. 174) and is printed in full in Arkwright's *OLD ENGLISH EDITION*, Part xiii., Preface. He made Drinkwater his executor, and left legacies to his children Thomas, Katherine and Alice.

On the occasion of his tercentenary commemorations in 1923 memorial tablets were placed on the walls of St. Bride's Church, the Cloisters of Winchester College, and the North Transept of Chichester Cathedral.

Weekles's Madrigals (1597) were reprinted by the Mus. Ant. Society in 1843. The Ballets and Madrigals (1598) and the 'Ayeres or Phantasticke Spirites' (1608) were reprinted in Arkwright's *OLD ENGLISH EDITION*. These three, together with the two sets of madrigals (1600), were reprinted in Fellowes's *ENG. MAD. SCH.* (vols. ix.-xiii.).¹ 'Ay me, my wonted joys,' from the 1597 set, was printed in Sessa

¹ See *Mus. Ass. Proc.*, 1916, paper by E. H. Fellowes; and *Eng. Madr. Composers*.

d'Aranda's 'Il primo libro de madrigali a quattro voci, con uno di Thomas Weelkes Inglese, Elmstat 1605.' A second edition of the ballets (1598) appeared in 1608.

As a madrigal-writer Weelkes holds very high rank; indeed, some regard him as the greatest of all madrigalists, although others would prefer the claims of the great stylist WILBYE (*q.v.*). Weelkes showed his genius especially in his daring use of what in his time were novel harmonies, as well as in the fertility of his imagination, which gave colour to the expression of ideas and even to single words and phrases. This aspect of his work is to be seen at its best in his wonderful madrigal, 'O Care, thou wilt despatch me,' or in the very expressive three-part work, 'Cease, sorrows, now.' But it is a mistake to affect to see the true Weelkes only in his more highly coloured chromatic work; he was as well able as any of his contemporaries to build up broad and massive effects with the conventional limitations of simple harmony. Examples of such writing are 'Like two proud armies' or 'Mars in a fury.' In contrast to these is the exquisite delicacy of 'On the plains fairy trains.' As a writer of ballets he was at least the equal of Morley, and no higher praise is possible, while his 'Ayres or Phantasticke Spirites' show him in yet another light, that of a witty satirist.

A few additional madrigals survive in MS. Among these the ballet 'Grace, my lovely one,' was recently printed under the editorship of W. Barclay Squire.

Weelkes wrote a large amount of church music. As many as ten of his Services have survived in fragments, but unfortunately not one of them is complete; indeed, only the simple four-voice Service, which is quite devoid of individuality, can be satisfactorily reconstructed, and the alto part of that is missing. This is the more to be regretted because the material that does exist clearly shows that Weelkes was remarkably original in developing the form of the SERVICE (*q.v.*), and in employing various devices for giving variety and interest to this class of composition. Verse passages with independent organ accompaniment are introduced, and various antiphonal effects are devised such as are found in the work of few other composers of his time.

Thomas Tomkins alone followed him in extending the conventional scope of the Cathedral service. This is all the more remarkable when it is recalled that for nearly two centuries after the death of Weelkes English church musicians, with scarcely any exception, followed the old conventional form of the 'short' service of Tudor days as defined by Cranmer.

The 'full' sections of the Service 'for two trebles' can easily be put together from the available material, and this Service would be a very valuable addition to the Cathedral

repertory if only it could be completed. One of the two treble parts and the organ part are available, but it is difficult if not impossible to surmise the composer's intention as to these sections, and the verse parts may not all have been limited to two trebles. The meaning of the term 'in medio chori' in No. 5 of these Services has been lost; the direction occurs in contrast to sections marked 'Verse' or 'Full.' Possibly it may mean the trebles alone singing in chorus, but this is a mere conjecture.

SERVICES

1. '1st Service for Verses to the organs in gam ut.' T.D., K., C.: Tenb. 791 fo. 407v (organ); M., N.D.: Tenb. 791 fo. 411 (organ).
2. '2nd Service with verses to the organs in D sol re.' T.D., B., K., C.: Tenb. 791 fo. 412v (organ); M., N.D.: Tenb. 791 fo. 134v.
3. M., N.D.: 'with verses to the organ in F fa ut': Tenb. 791 fo. 416 (organ).
4. Service of 5 parts 'for two trebles': T.D.: Tenb. 791 fo. 403v (organ); M., N.D.: Tenb. 791: Durh. A fo. 64 (organ); Durh. C1 fo. 185; PH. 34 fo. 151 (Medius); PH. 39 fo. 41v; fo. 67v (Altus); Durh. C18 fo. 104 rev (Tenor); Durh. C18 fo. 76; PH. 33 fo. 45v; 38 fo. 53 (Bass).
5. M., N.D.: 'in medio chori': Tenb. 791 fo. 400v (organ).
6. T.D., M.: 'with verses for a meane.' T.D.: Wimb. Tenor fo. 25, Tenor fo. 36, Bass fo. 11. Mag.: Wimb. Tenor fo. 90 Bass fo. 32v and fo. 39v.
7. M., N.D.: 'in verse for 2 contratenors.' Wimb. Alto fo. 63, Tenor fo. 83, Bass fo. 23.
8. V., T.D., J., M., N.D.: 'of 4 parts.' V.: B.M. Add. MSS. 29,289, T.D., J.: Durh. A6 fo. 324 (organ); B.M. Add. MSS. 29,289 (Alto); Durh. C13 fo. 145 (Tenor); M., N.D.: PH. 45 fo. 114 (Medius); Durh. C13: PH. 43 fo. R5 (Tenor); PH. 36 fo. R5 (Bass); Ch. Ch. 437 (organ). Score of V., T.D., and J.: B.M. Roy. Lib. Cosyn. MS.
9. T.D., J., M., N.D.: 'Mr. Weelkes' 5 parts': T.D., J.: Tenb. 791 fo. 336 (organ); M., N.D.: Tenb. 791 fo. 132.
10. M., N.D.: 'of 7 parts': Durh. C1 fo. 308; PH. 34 fo. 53 (Medius); PH. 39 fo. 60 (1st Alto); PH. 39 fo. 43 (2nd Alto); Durh. C15 fo. 80; PH. 38 fo. 54v (1st Bass); PH. 33 fo. 46 (2nd Bass).

Weelkes has left a large number of anthems, but as an anthem writer his work seems to show some inequality. The greater number of his anthems have not as yet been scored, and it is not possible, for this reason, to judge accurately of their value as a whole. Yet nothing could be more splendid than his noble 'Hosanna to the Son of David'; and almost equally fine is the Christmas anthem 'Gloria in excelsis . . . Sing, my soul.' In contrast to these is the tender little Collect, 'Let thy merciful ears.' The following anthems by Weelkes have been printed: 'O Lord, grant the king,' by Barnard in 1641; 'All people clap your hands' and 'When David heard' (both edited by Rimbault), by the Mus. Ant. Society; 'Hosanna,' 'Gloria in excelsis . . . Sing, my soul' and, 'Let Thy merciful ears' (ed. by Fellows) and 'Alleluia, Salvation' (ed. by S. T. Warner), in the Tudor Church Music Series.

The instrumental works of Weelkes include:

A set of pieces for 5 viols (R.C.M.). 2 Pavans and one other piece for 5 viols (B.M. Add. MSS. 17,786-91 and 17,792-6). 2 In Nomines a 5 (Bodl. MS. Mus. Sch. c64-69. These last with another In Nomine a 4 (Bodl. MS. Mus. Sch. c212-6. Lacrimae a 5 (B.M. Add. MSS. 30,480-4).

ANTHEMS

All land and praise. R.C.M.; Tenb. 791 fo. 74 and fo. 419v.
All people clap your hands. Rimbault, Mus. Ant. Soc., 1843.
Alleluia, I heard a voice. B.M. Add. MSS. 29,372-7; Ch. Ch. 56-60.
An earthly tree. Tenb. 791 fo. 421v.
Behold how good and joyful. Rimbault, Mus. Ant. Soc., 1843.
Behold, O God our defender. Durh. C7.
Behold, O Israel. Rimbault, Mus. Ant. Soc., 1843.
Blessed be the man. Tenb. 791 fo. 416.
Blessed is he. Tenb. 791 fo. 409.
Christ rising. Tenb. 791 fo. 418.
Deal bountifully. Tenb. 791 fo. 354.
Deliver us, O Lord. R.C.M.
Give ear, O Lord. Tenb. 791 fo. 54; B.M. Add. MSS. 29,372-7.
Give the King thy judgements. B.M. Add. MSS. 30,478-9; R.C.M.; Durh.; Tenb. 791 fo. 63.

Gloria in excelsis. Sing. O my soul. B.M. Add. MSS. 17,786-91; Ch. Ch. 56-60; Tenb. 807-11.
 Hosanna to the Son. B.M. Add. MSS. 17,786-91; Tenb. 807-11, 295; Ch. Ch. 56-60.
 I lift my heart. R.C.M. 1051.
 I love the Lord. Tenb. 791 fo. 424.
 If King Massena. R.C.M.; Tenb. 791 fo. 64v.
 If ye be risen again. Tenb. 791 fo. 430.
 In Thee, O Lord. Tenb. 791 fo. 427; Durh. Laborari. Tenb. 807-11.
 Let Thy merciful ears. PH. 36, 43 and 46.
 Let us lift up our eyes. Oxford, 1684 (words only).
 Lord, to Thee I make my moan. Ch. Ch. 56-60; R.C.M.
 Most mighty and all-knowing. B.M. Add. MSS. 31,418.
 O happy he. B.M. Add. MSS. 29,372-7.
 O how amiable. Durh.; PH.
 O Jonathan. B.M. Add. MSS. 29,372-7; Ch. Ch. 56-60; Tenb. 1162-7.
 O Lord, arise. B.M. Add. MSS. 17,786-91, 17,792-6; R.C.M.
 O Lord God Almighty. Ch. Ch. 1220-4, 1001.
 O Lord, grant the king. Barnard; B.M. Add. MSS. 30,478-9; R.C.M.; Ely; Ch. Ch. 1001.
 O Lord, how joyful is the King. B.M. Add. MSS. 30,478-9; Durh.
 O Lord, preserve Thee. Rimbault, Mus. Ant. Soc., 1843.
 O Lord, rebuke me not. Rimbault, Mus. Ant. Soc., 1843.
 O Lord, turn not away.
 O mortal man. R.C.M.
 Plead Thou my cause. R.C.M.
 Rejoice in the Lord (mentioned by Bumpus, organ part only).
 Sing unto the Lord. Clifford, 1683 and 1664 (words only).
 successive course. B.M. Add. MSS. 30,478-9.
 Thy mercies great. Clifford, 1664 (words only).
 What, by so true. R.C.M.; Tenb. 791 fo. 423.
 When David heard. B.M. Add. MSS. 29,372-7; Tenb. 807-11, 1162-7; Ch. Ch. 56-60.
 With all our hearts (mentioned by Bumpus), bass only.

E. H. F.

WEERBECKE (VEERBECKE DI FIANDRA; WARBECK), GASPARD (GASPARD, JASPER) (b. Audenaerde, Flanders, c. 1440), educated at the maîtrise at Audenaerde. G. Crespel, in his lament on Okeghem's death, enumerates Weerbecke among the latter's pupils. On his compositions he generally signed himself merely Gaspard. We meet him first under the name of Gaspare de Alemania as rectore de la ducale at St. Gothard, where he appears also as custodian of the watch in 1469. In 1472 and 1474 he is mentioned as maestro di cappella at Milan Cathedral, and in the former year (in letters) also as a singer at the ducal court of Milan. The letters describe him as a cleric of Tournay. He must, therefore, have taken holy orders before he went to Italy. In 1475 the duke sent him to Picardy and Flanders to engage singers for his court, and in 1480 he was prebendary of St. Donat, Bruges, probably an honorary sinecure. From Oct. 1481 to Apr. 1489 he was singer in the Papal Chapel. At the marriage of Galeas Sforza to Isabella of Arragon in 1488, allegorical-mythological plays and interludes were performed at the court of Milan, looked upon by Arteaga as the origin of musical drama. To these Weerbecke contributed at least part of the music, and probably took part in them also as organiser and singer.

In 1490 he revisited Audenaerde, where he was received on Nov. 14 with great rejoicings by the citizens and council, who presented him with four stoups of wine. On Aug. 18, 1498, he was again furnished with letters patent from the duke to engage singers from abroad for the court. Van der Straeten (*Musiciens aux Pays-Bas*, p. 36) states that on Mar. 12, 1536, he conducted a choir of 24 singers at the investiture of Pierre Aaron at Bergamo. The date appears rather late for Weerbecke. Petrucci published between 1505 and 1509 a

number of Weerbecke's masses, motets and lamentations. A Stabat Mater is contained in a magnificently decorated MS. volume of 1490. Some masses of his in MS. are in the Papal Chapel library (Motta; van der Straeten: *Q.-L.*). E. v. d. s.

WEGELER, FRANZ GERHARD (b. Bonn, Aug. 22, 1765; d. Coblenz, May 7, 1848), professor of medicine at Bonn University at the age of 19. After the dissolution of the University in 1794, he became rector, and afterwards general practitioner at Coblenz. Wegeler and Beethoven were friends from their youth. The former married Eleonore von Breuning, and published, together with Ferdinand Ries, *Biographical Notes on Ludwig van Beethoven* (1838, etc., several editions in various languages) (see BEETHOVEN, Vol. I., p. 310).

WEHLI (WEHLE), KARL (b. Mar. 17, 1825; d. Paris, June 3, 1883), a brilliant pianist, was the son of a merchant in Prague, learned the PF. under Moscheles and Kullak, composed very much, and exhibited his talent in Europe, America, Australia, India, etc. Paris was for long his headquarters. The list of his works given by Pougin comprises a Sonata (op. 38), Impromptus (10, 73), Ballades (11, 79), Nocturnes, Waltzes and Allegro hongroise (81), etc. etc. g.

WEICHENBERGER, JOHANN GEORG, of Vienna, a 17th-century lutenist, mentioned by Baron. Of two 17th-century MS. lute-books in French tablature in the Benedictine monastery of Raigern, one, containing a 'Lauthen Concert,' bears his name and place of residence, the other contains some pieces by him, and another MS. book of the same period, also in French lute-tablature, at Kremsmünster, contains pieces by Du Faut, Lauffensteiner and W . . . (Weichenberger?). Breitkopf's MS. Catalogue contains a Partita a liuto solo by him (*Q.-L.*).

WEICHMANN (WICHMANN), JOHANN (b. Wolgast, Pomerania, Jan. 9, 1620; d. Königsberg, Prussia, July 24, 1652), visited the school at Hameln, studied music and science at Danzig, and, after returning for a time to Königsberg, became cantor and organist at Wehlau, where he was in 1643. In 1647 he was appointed cantor and director of the choir at the Altstadt (old town) of Königsberg. He composed several books of motets, sacred and secular songs, two books of ballets, courants, allemands and sarabands in 2 parts (1649).

E. v. d. s.

WEICHSELL, MRS., a popular vocalist, mother of Mrs. Billington, and wife of Carl Weichsell, a German, who was principal oboist of the King's Theatre in the Haymarket, and appeared in public as a clarinet-player in 1763.¹ Mrs. Weichsell became a popular ballad-singer at Vauxhall as early as 1766, three years

¹ Pohl, II. 373.

earlier than generally supposed. She continued singing at Vauxhall until 1784. Besides her daughter Elizabeth, who became Mrs. BILLINGTON, she had a son, Charles, who was a talented violinist and led the band at the King's Theatre, occasionally conducting at Covent Garden when his sister was singing there.

F. K.

WEIDEMAN, CHARLES (or CHARLES FREDERICK), a popular composer and flute-player during the middle of the 18th century. Burney says he came over to England about 1726, and that he was long the principal solo-player on the German flute. Further, that he was a good musician, but his productions never 'rose above that mediocrity to which his instrument seems confined.' Scattered through many 18th-century works such as: 'The Delightful Pocket Companion for the German Flute' (John Simpson, circa 1740-45) are numbers of airs of the Minuet and Gavotte type of his composition. Walsh published some concertos in 7 or 8 parts for flutes and violins by him, and Bremner issued duets, trios, and quartets for flutes. There are also some vocal compositions by him.

It was Weideman who, with Festing, first conceived the idea of a musical benevolent society, which ultimately took form as the ROYAL SOCIETY OF MUSICIANS (*g.v.*). Weideman's name is on the deed of trust dated 1739. He was conductor of the King's Band of Musick in 1778 at a salary of £100 yearly. Burney and others spelt his name incorrectly. His own signature and all contemporary publications of his works spell it as in the heading of this article.

F. K.

WEIDEMANN, KARL FRIEDRICH (*d.* London, 1782), a celebrated flautist and prolific composer, came to London in 1726. He wrote 6 concertos in 7 parts, op. 2, 6 concertos in 8 parts, several books of flute sonatas, duets, solos, also some songs for Vauxhall Gardens, etc. He was for many years the greatest soloist on his instrument who appeared at the concerts at Hickford's Room and the Swan and Castle concerts in the City. Burney describes him as a good musician but a mediocre composer.

E. V. D. S.

WEIGL, JOHANN BAPTIST (*b.* Hahnenbach, Bavaria, Mar. 26, 1783), church composer and organist. He studied at Amberg, and Preising, near Ratisbon; became organist at Amberg, and in 1805 pastor and teacher at St. Ulrich, Ratisbon. Soon after, he returned to Amberg as professor at the college (gymnasium). His masses, cantatas, Te Deum, offertories and other sacred music, as well as his canons, songs, etc., are spoken of in terms of praise (Schilling; Mendel).

WEIGL, (1) JOSEPH (*b.* Bavaria, Mar. 19, 1740; *d.* Jan. 25, 1820), entered Prince Esterhazy's band at Eisenstadt as first violon-

cellist in 1761, left in 1769 for the orchestra of the Imperial Opera at Vienna, and was admitted member of the Imperial Chapel, 1792. He was a great friend of Joseph Haydn, who stood godfather to his eldest son.

(2) JOSEPH (*b.* Eisenstadt, Mar. 28, 1766; *d.* Feb. 3, 1846). Joseph's first teacher was Sebastian Witzig, choirmaster of Korneuburg, and later he studied with Albrechtsberger and Salieri. At 16 he wrote his first small opera, 'Die betrogene Arglist,' which was produced at Gluck's recommendation, and secured him the favour of the Emperor Joseph, of which he had henceforth repeated proofs, including a present of 100 ducats (about £50) for his first Italian opera 'Il pazzo per forza' (1788). A letter of congratulation written him by Haydn on the production of his 'Principessa d'Amalfi' is well known. Weigl was also fortunate enough to gain admittance to the performances of classical music under Mozart's direction, at Baron van Swieten's house. Salieri took a special interest in him, and employed him up to 1790 as assistant-conductor of the National Court Theatre. In 1792 he became composer to the Opera with a salary of 1000 florins, then Kapellmeister, finally conductor. This post he resigned in 1823, and in 1827 was appointed vice-court Kapellmeister. Before that date he had composed a series of operas, German and Italian, and ballets, many of which became exceedingly popular. Amongst these, special mention must be made of the 'Schweizerfamilie' (1809), which long kept the boards, and by its pleasing melodies won all hearts. Reichardt¹ gives a pointed description of Weigl:

'He is a really charming, affectionate, good-hearted Viennese, and his eye and whole expression are thoroughly in keeping with his tender, graceful, pleasing melodies.'

Other favourite operas were 'Das Waisenhaus,' 'Nachtigall und Rabe' (1818), 'Der Bergsturz,' 'L'Amor marinaro' (1797), and 'L'Uniforme.' Beethoven has preserved the air 'Pria ch'io impegno' in the 'Amor marinaro' from oblivion, by taking it as the theme for the finale of his clarinet trio, op. 11. (See BEETHOVEN, Vol. I. p. 277.) 'L'Uniforme' (libretto by Carpani) was composed at the request of Maria Theresa, produced at Schönbrunn (in 1798), and repeated in concert-form (1805) with the Empress in the principal part (Pauline). Treitschke translated it into German, and 'Die Uniforme' was given at both court theatres, and in many foreign towns. Weigl was a special favourite of the Empress (to whom Beethoven dedicated his Septet), and had to preside at the piano at all chamber-concerts, besides composing cantatas and small ballets for many court festivities. He had an advantageous offer for Stuttgart, but the

Empress, to retain him, made his appointment for life. Soon after her death (1807) he accepted the post of Kapellmeister at Dresden, but the negotiations were broken off, and Morlacchi was appointed in his stead.¹ Weigl was twice invited to Milan to compose for La Scala—in 1807, when he produced two operas, 'Cleopatra' and 'Il rivale di sè stesso,' and 1815, when he produced 'L'imboscata,' and a cantata, 'Il ritorno d'Astrea,' all with great success. Of his earlier cantatas, 'Minerva e Flora' was given at Prince Auersperg's in honour of a visit from the King and Queen of Sicily (1791), and 'Venere ed Adone' at Esterhazy in 1792, when the Archduke (afterwards Emperor) Joseph was staying with Prince Esterhazy at his country seat on the Neusiedlersee. Haydn was at the time in London, so Weigl was called upon to supply his place. This cantata figured several times in the programmes of the Tonkünstler-Societät concerts. Of his two oratorios, 'La Passione di Gesù Cristo' (libretto by Carpani), first produced at Court (1804), was performed at Prince Lobkowitz's, at the Burg Theatre (1811), at an extra concert of the Gesellschaft der Musikfreunde (1821), and in Prague and Milan. After 1827 he wrote only for the church, composing his last Mass in his seventy-first year. Weigl received many distinctions, amongst others the large gold Ehrenmedaille (1839) and the freedom of the city of Vienna. He was an honorary member of the Conservatoire of Milan, the St. Cecilia Academy of Rome, the Gesellschaft der Musikfreunde, and other musical societies of Austria. His works include 13 Italian and 18 German operas, 17 ballets, 2 oratorios, 12 Italian and 7 German cantatas, 9 masses, 6 graduales, 6 offertories; *scenas* in various languages; airs for insertion in operas; songs, airs and duets with P.F. accompaniment; and various instrumental pieces. (See list in *Q.-L.*) His younger brother,

(3) THADDÄUS (b. 1776), wrote a number of operas and ballets for the Leopoldstadt Theatre and the two court theatres, and was at one time Kapellmeister and director of the musical archives of the court theatre. His name lives, however, not as a musician, but as a music publisher. He set up in business in 1801, and devoted himself chiefly to supporting the Kunst- und Industrie-Comptoir in its endeavour to establish a home trade in music, for which Haydn gave him a flattering testimonial (dated Eisenstadt, 1801). After the production of his last ballet, 'Bacchus und Ariadne' (Dec. 1803), he withdrew from the theatre, and occupied himself entirely with his business till 1826, when he resigned it to his second son Peter. Later it passed into Diabelli's hands. Thaddäus Weigl published Schubert's opp. 57, 58, 88, 95 and 130.

C. F. P.

¹ A letter from Griesinger, dated Dresden, Feb. 11, 1810.

WEILAND, JOHANN JULIUS (*d.* Brunswick, Apr. 2, 1663), appointed court musician at Brunswick, Mar. 5, 1655, was vice-Kapellmeister in 1655, but in 1661 he calls himself simply musician. He wrote psalms and songs in 4 to 10 parts, with and without instruments; also 'Uns ist ein Kind geboren,' in 13 parts, divided into 3 choirs (Wolfenbüttel, 1/1/1663) (*Q.-L.*).

WEIMAR. The 'German Athens' under the patronage of its art-loving Grand Dukes of Saxe-Weimar-Eisenach, had a long musical history, the record of its court orchestra going back to the 16th century. J. S. Bach was a violinist there in 1703 and director of music in 1708. Johann Gottfried Walther was organist at the great church of Weimar from 1707-48. Hummel was Hofkapellmeister from 1819-37.

Perhaps because the greater attention was paid to poetry and the drama in the period of Weimar's greatness (the end of the 18th and beginning of the 19th centuries) its most brilliant era of music came later. This was in the years between 1847 and 1861, when Liszt settled there as chief Kapellmeister and gathered round him the group which included Hans von Bülow, Cornelius, Raff and (for a time) Joachim. Liszt had produced Berlioz's 'Benvenuto Cellini,' which apparently gave an impetus to the new German movement of which Cornelius became the leading spirit under Liszt, and the *Neue Zeitschrift für Musik* (see BRENDL) its organ of expression. Liszt produced Cornelius's 'Barbier von Bagdad' on December 15, 1858. Liszt was succeeded by Eduard Lassen, during whose term of office Saint-Saëns's 'Samson et Delila' was first produced. In more recent times the most noteworthy production has been Humperdinck's 'Hansel und Gretel,' first given on Dec. 23, 1893, at Weimar.

The present opera house, formerly Hoftheater, now Deutsches Nationaltheater, was built in 1907 from plans by M. Littmann, and was opened in the following year. The present general music director is Dr. Praetorius, with E. Latzko and Ferdinand Hertz as Kapellmeister. The theatre receives a subvention from the Thuringian state. The principal orchestra, the Weimarer Staatskapelle (Prof. R. Reitz), serves the double purpose of opera and symphony orchestra. It numbers fifty-three performers. There are two other orchestras in Weimar—the Professional Orchestra (Peters) and the Orchesterverein (B. Branco). The Gesellschaft für Musikfreunde (President Dr. Gumprecht) organises regular concerts during the season. Weimar has frequently been the scene of musical festivals, one of the more important of late years being the Tonkünstlerfest of 1921, when Schönberg's 'Four pieces for Orchestra' was produced. The Deutsche Festspiele, the purpose of which is to promote

the performance of German operas, took place at Weimar in July 1926. The principal choirs are the Volkschor (Pretorius) and the Kirchenchor St. Jakob (C. Thieme).

The Staatliche Musikschule zu Weimar (with its renowned orchestral school) is under the control of the Thuringian Ministry of Education. It was founded in 1872 and is intended to form an educational background to the Nationaltheater. The present director is Professor Bruno Hinze-Reinhold, who has a staff of about thirty teachers. The associations of Liszt with Weimar are preserved in the Liszt Museum (Prof. R. Wetz) and those of Max Reger in the Reger Archiv (F. Martin).

H. G. D.

WEIMAR, GEORG PETER (*b.* Stotternheim, Saxe Weimar, Dec. 16, 1734; *d.* Erfurt, Dec. 19, 1800), pupil of Adlung, Fasch and Höck (violin). He was chamber-musician and court cantor at Zerbst in 1758; cantor at Kaufmannskirche, Erfurt, 1763, and, in addition, music director at the *Gymnasium* in 1774, and from 1776 also at the Catholic *Gymnasium*. He wrote an operetta with pianoforte; cantatas; motets; vocal exercises for schools; a book of Chorals for the Protestant church was edited by Joh. Chr. Kittel in 1803; a number of church compositions, including a Passion, remained in MS. (*Mendel; Q.-L.*).

WEINER, LEO (*b.* Budapest, Apr. 16, 1885), has made a name for himself by the enterprising nature of his chamber music. His string quartet in F sharp minor (op. 13) won the Coolidge Prize in 1921, and has been much played abroad by the Budapest String Quartet.

Weiner studied (1901-06) at the Landesakademie in Budapest, and afterwards joined its teaching staff. Among his published works are a serenade for orchestra (op. 3), a string quartet (op. 4), 'Fasching,' humoresque for orchestra (op. 5), string trio (op. 6), piano pieces, etc. (*Riemann.*)

WEINGARTNER (PAUL), FÉLIX (Edler von Münzberg) (*b.* Zara, Dalmatia, June 2, 1863), eminent conductor, composer and writer of important literary works on musical subjects, studied composition at Graz under W. A. Remy, and entered the university of Leipzig in 1881 as a student of philosophy.

He passed over very soon to the Conservatorium, went to Liszt at Weimar in 1883, and there his first opera, 'Sakuntala,' was brought out in 1884, in which year he undertook the post of Kapellmeister at Königsberg; in 1885-87 he was in the same capacity at Danzig, in 1887-89 at Hamburg, and in 1889-91 at Mannheim. In the latter year he was appointed court Kapellmeister of the Opera at Berlin, as well as director of symphony concerts of the royal band. Here he remained until 1898, when the opposition of old-fashioned musicians to his operatic conduct-

ing induced him to give up the theatrical appointment, though he kept that of the orchestral concerts. He went to live at Munich in that year and became conductor of the Kaim concerts there. In 1907 he was appointed to succeed Mahler as conductor of the Hofoper at Vienna, and was thus compelled to give up the Berlin concerts. He entered on his duties in Jan. 1908, but retired from the Opera in 1910, retaining the conductorship of the symphony concerts of the Opera orchestra. In 1919-20 he was director of the Vienna Volksoper. Other appointments which he occupied in these years were those of Kapellmeister of the Hamburg Stadt-theatre (1912-14) and general Musik-director of the Grand Ducal concerts at Darmstadt (1914).

Meantime his international reputation as a conductor was built up by innumerable visits to other countries of Europe and to America. He first visited London in May 1898, when his quiet mastery of the orchestra and his sane readings of the classics made a profound impression. Since then he has been a frequent visitor, and his performances with the ROYAL PHILHARMONIC SOCIETY, the LONDON SYMPHONY ORCHESTRA and the SCOTTISH ORCHESTRA have confirmed the impression, especially as regards the symphonies of Beethoven. In 1905 he conducted four concerts of the New York Philharmonic Society, made a tour with the Symphony Society (see NEW YORK) in 1906, and in 1912-13 conducted opera at Boston.

Weingartner's literary works, beginning with the famous pamphlet *Über das Dirigiren* (1895) (see CONDUCTING), are largely concerned with matters of performance and artistic interpretation. His power of applying an intellectual analysis to the processes of artistic intuition has given him his commanding position among the musical interpreters of his generation. Despite the preoccupations of his busy executive life, which has included much musical editing, notably of the collected edition of Berlioz, he has continued to compose and has produced works on a large scale both for the stage and the concert room, such as the dramatic trilogy from *Æschylus* on the one hand, and five symphonies for orchestra on the other. He has been described as an eclectic¹ among composers, which means that a mind steeped in the work of all the great masters commands too many tools for its own individual work. Weingartner's compositions have every virtue comprised in the word 'musicianship,' and sometimes rise to the distinction which lies beyond technical accomplishment. His early songs, such as 'Motten' (op. 25), 'Plauderwäsche' (op. 27) and the three 'Handwerkerlieder' (op. 28) first showed his qualities to English hearers.

The following is a summary of Weingartner's principal works.

¹ *Riemann.*

STAGE WORKS

- Sakuntala. (Weimar, 1884.)
 Malawika. (Munich, 1886.)
 Genesius. (Berlin, 1892.)
 Trilogy after the *Orestea* of Aeschylus. (Athens, 1925.)
 'Agamemnon.'
 'Das Totenopfer.'
 'Die Erinyen.' (Leipzig, 1902.)
 'Kain und Abel.' (Darmstadt, 1914.)
 'Die Dame Kobold.' (Darmstadt, 1916.)
 Incidental music to the *Antigone* of Sophocles.
 " " Voss's *Frühlingsmährchen*spiel. (Weimar, 1908.)
 " " *Faust* (Pts. I. and II.). (Weimar, 1908.)

ORCHESTRA

- Symphonies: No. 1 in G (op. 23); No. 2 in E flat (op. 29); No. 3 in E (op. 49); No. 4 in F; No. 5 in C minor (op. 71).
 Symphonic Poems: 'König Lear' (op. 20); 'Das Gefilde der Seligen' (op. 21).
 Violin concerto in G (op. 53).
 'Lüstige Ouvertüre.'
 'Aus schwerer Zeit' (overture). Vienna, 1914.
 Serenade for stringed orchestra.
 Arrangement for orch. of Weber's 'Invitation à la valse.'

CHAMBER MUSIC

- String quartets: op. 24 in D minor; op. 26 in F minor; op. 34 in F.
 String quintet, op. 40 in C.
 Quintet. Clar., PF. and strings. Op. 50 in G minor.
 Sextet. PF. and strings. Op. 33 in E minor.
 Two sonatas. Violin and PF. Op. 42 in D and F sharp minor.
 Pianoforte pieces, opp. 1-6.

VOCAL

- 'Traumnacht.' 'Sturmhymnus.' 8-part choir.
 Three male choruses.
 Songs with orchestra, opp. 19, 35, 36, 39.
 Songs with PF. (in sets), opp. 13, 15, 16, 17, 18, 19, 22, 25, 27, 28, 31, 32, 37, 41, 45, 46, 47, 48, 51. (For further details see Baker.)

LITERARY WORKS

- Die Lehre von der Wiedergeburt und das musikalische Drama.* 1895.
Über das Dirigiren. 1895, fourth ed. 1913.
Bayreuth, 1876-96. 1896, rev. ed. 1904.
Die Symphonie nach Beethoven. 1897, rev. ed. 1909. (Trans. French, C. Chevillard; English, M. B. Dutton, 1904.)
Ratschläge für Aufführungen der Sinfonien Beethovens. 1906. (Trans. English, J. Crosland, 1907). 2nd ed. 1916.
Musikalische Walpurgisnacht (satirical comedy). 1907.
Golgatha (drama in 2 parts). 1908.
Akkorde (collected essays). 1912.
Erlebnisse eines K. Kapellmeisters in Berlin. 1913.
Ratschläge für Aufführungen Lutherscher Symphonien (devoted to Schubert and Schumann; published as part II. of *Ratschläge* above). 1919.
 Do. Part III. (devoted to Mozart). 1923.
Eine Künstlerfahrt nach Südamerika, Tagebuch Juni-Nov. 1920. 1921.
Lebenserinnerungen. 1923.

c., incorporating material from M.

WEINLIG, (1) CHRISTIAN EHREGOTT (b. Dresden, Sept. 30, 1743; d. there, Mar. 14, 1813), organist, was a pupil of Homilius at the Kreuzschule at Dresden, and after holding posts at Leipzig, Thorn and the Frauenkirche at Dresden, succeeded his old master as cantor of the Kreuzschule. He composed Passion music, oratorios, cantatas, etc., but only some clavier pieces and flute sonatas were published during his life. His nephew, (2) CHRISTIAN THEODOR (b. Dresden, July 25, 1780; d. Leipzig, Mar. 7, 1842), was instructed first by his uncle and then by Padre Mattei at Bologna. In 1814-17 he was cantor of the Kreuzschule at Dresden, and in 1823 he succeeded SCHIÖT as cantor of the Thomas-School at Leipzig, and remained there till his death. He published a German Magnificat for soli, chorus and orchestra, some singing exercises, and a treatise of some value, *Anleitung zur Fuge für den Selbstunterricht* (2nd ed. 1852). But it is as a teacher of theory and as the master of Wagner for six months in 1830 that his name will be remembered. Wagner has left his recollections of Weinlig's teaching on record in words which deserve to be pondered by all teachers of theory. (See WAGNER.)

G.; addns. Riemann.

WEISS (*recte* SCHNEEWEISS), AMALIE (b. Marburg, Styria, May 10, 1839; d. Berlin, Feb. 3, 1899), made her stage-début at Troppau in 1853, in 1854 was engaged at Hermannstadt, and in the same year appeared at the Kärnthnerthor Theatre, Vienna, where she assumed the name by which she was known until her marriage with JOACHIM (*q.v.*). She was engaged at the Opera at Hanover, 1862, and her betrothal to Joachim, early in the following year, was artistically celebrated by a remarkable performance of Gluck's 'Orpheus,' in which she sang the title-part, Joachim conducting. Her farewell of the stage took place on May 30, 1863, in the part of Fidelio, and on June 10 the two great artists were married. After her marriage she had a career of the utmost brilliance and usefulness as a concert-singer and teacher, obtaining world-wide fame as a singer of Schumann's songs, and later on of those of Brahms. The tragic misunderstandings which resulted in a separation of the husband and wife in 1882 may have been the cause of her not visiting England after her successful appearances here in 1870 and 1878. She went to America for a short time about 1890 and taught there, but never quitted Germany as a residence. She accepted the post of professor of singing in the Klindworth-Scharwenka Conservatorium in Berlin. Perhaps the most memorable of her performances in England was that of the air from Bach's Matthew-Passion, 'Erbarme dich,' with Joachim's violin obbligato; but her singing of Schubert's 'Tod und das Mädchen' and of Beethoven's 'Faithful Johnie' was scarcely less perfect in its interpretative and emotional power. Her voice was a contralto of singular richness; her technique left nothing to be desired.

M.

WEISS, FRANZ (b. Silesia, Jan. 18, 1788; d. Vienna, Jan. 25, 1830), a distinguished violaplayer, and long a member of the celebrated string-quartet maintained by Prince Rasoumowsky (*q.v.*) at his palace in Vienna. By these distinguished players most of Beethoven's quartets were studied for the first time, SCHUPFANZIGH (*q.v.*) taking the first violin, the Prince himself the second, and Linke the violoncello. Weiss was also a composer of merit, and published, among other works, 'Variations brillantes' for violin and orchestra, op. 13 (Vienna, Artaria), quartet (Vienna, Haslinger and Offenbach, André), duets for flutes and for violins, and PF. sonatas. A symphony of his for flute, bassoon and trumpet *concertante* with orchestra, was played with great success by the brothers Alois, Joseph and Anton Khayll.

C. F. F.

WEISS, KAREL (b. Prague, Feb. 13, 1862), composer and conductor. He studied at the Prague Conservatoire, where he took up the violin and horn. Thence he passed on to the Organ School (1878-81), where he worked under Skuherský and Fibich. After finishing

his courses, he occupied a variety of posts: organist of St. Stephen's and of the chief synagogue, teacher at the music school at Kroměříž, member of the orchestra of the National Theatre, Prague, and, from 1886-87, conductor at the National Theatre, Brno (Brünn). He also toured as accompanist with Fr. Ondříček. Weiss began to compose early in life. His choral scene 'Triumfator' led the way to his first essay in opera, 'Viola' (from Shakespeare), 1892. It is comedy opera verging on operetta, having some affinity with Nicolai's 'Merry Wives of Windsor,' and met with great success for a time. It was revised later under the title 'The Twins.' His second opera, 'The Polish Jew' (Erckmann-Chatrian), produced in 1901, became very popular at home and abroad. The musical material is strongly touched with nationalism. Smetana and Dvořák have contributed to its inspiration. It is, however, temperamental music; strong in rhythm, impulsive and effective. It has the qualities which please at first hearing. Weiss followed it up some years later by 'The Attack on the Mill' (1912), the libretto based on Zola's tale *L'Attaque du moulin*. An opera on a national subject, 'The Black Smith of Lešetin,' appeared in 1920. Weiss has neglected opera for a lighter style. His operettas 'Die Dorfmusikanten' (1904), 'Revisor' (after Gogol, 1907) are oftener heard in Germany. Apart from the stage, his compositions include: a symphonic poem, 'Helios and Selene'; a violin sonata; a string quartet; for pianoforte, Cotillon, Serenade, op. 13; four pieces, op. 15; ten pieces, op. 18; Dance Sketches, op. 21—all sparkling and rather superficial salon music; collections of folk-songs, 'Blat'áké,' opp. 31, 32 and 33; 'Prástky,' a folk-song for chorus and orchestra. E. N.

WEISS, SYLVIVS LEOPOLD (b. Breslau, Oct. 12, 1866; d. Dresden, Oct. 15, 1950), was by many, including Gerber and the sister of Frederic the Great, declared to be the greatest lutenist of all times. He accompanied the Polish Prince Alex. Sobiesky to Rome c. 1708, and remained with him until his death at the end of 1714. In 1715 he was for a short time at the court of Hesse-Cassel, whence he was invited to Düsseldorf by the Elector Johann Wilhelm. At the end of 1716 or beginning of 1717 he visited the court of Dresden, where he was induced to overstay his leave, and received from the Elector on Apr. 3, 1718, a letter of apology to Johann Wilhelm, such as the latter had given to Handel on a similar occasion. Soon afterwards we find him at the Saxon Court, where he served under Antonio Lotti, Hasse, Porpora and even Gluck. In Sept. 1718 a special band of 12, including, besides Weiss, Hebenstreit, Pisendel and Zelenka, was sent for the Crown Prince's music to Vienna, and Weiss was always in great demand for all the special

festivals of the various courts. In 1719 he was at Dresden again when Handel visited the court. Early in 1722 an enraged French violinist, to whom Weiss had shown much kindness, bit his right thumb, nearly severing the top joint, and it was not until the end of the year that he could play again on a visit to Munich. In 1723 he played with Quantz and H. Graun in Fux's opera for the Emperor's coronation as King of Bohemia at Prague. He was famous for his art of improvising, and Reichard relates that at Dresden on one occasion he even competed therein with J. S. Bach. His compositions for the lute were much sought after, but as they were mostly copied in MS., few have survived. They are mentioned in Q.-L. erroneously under two headings (Sylvius, W., and Sylvius, Leopold W.). His brother SIEGMUND was likewise an excellent lutenist, as well as viola da gambist, violinist and composer. A portrait engraving exists, made from a painting by Denner (Hans Volkmann, *Die Musik*, vol. 23, p. 273). E. v. d. s.

WEISS, (1) WILLOUGHBY HUNTER (b. Liverpool, Apr. 2, 1820; d. Oct. 24, 1867), son of Willoughby Gaspard Weiss, professor of the flute and music-publisher. He learnt singing from Sir George Smart and Balfe, and on May 5, 1842, made his first appearance in public at a concert of his own at Liverpool. He next sang in London at the concerts of Balfe, Thalberg, etc., and then joined the farewell tour of Miss Adelaide Kemble, and made a successful début on the stage at Dublin, July 2, as Oroveso in 'Norma.' On Dec. 26 he made his first London appearance in opera at the Princess's as the Count in an English version of 'Sonnambula.' He established a reputation both as an operatic and concert singer. In the former capacity he sang in the various English operatic enterprises of Bunn, Maddox, Jullien, Pyne and Harrison, and the English Opera Company, Limited, and in various operas of Auber, Balfe, Benedict, Hatton, Macfarren, etc. But he was best in oratorio, in which his rich voice and musicianly feeling showed to advantage. He made his first appearance in oratorio in 1844 at the Gloucester Festival, and was continually engaged at the London oratorio concerts and provincial festivals until close upon his death. Weiss also composed songs and ballads, of which 'The Village Blacksmith' became very popular. He also arranged a PF. edition of Weber's Mass in G. His wife,

(2) GEORGINA ANSELL (née BARRETT) (b. Gloucester, 1826; d. Brighton, Nov. 6, 1880), the daughter of a musician in Gloucester, was a pupil at the R.A.M. (1842-45), and first attracted notice at the Gloucester Festival of 1844. On Sept. 15, 1845, she married Weiss. On Dec. 20, 1847, she made her first appearance on the stage at Drury Lane as Queen Elizabeth in Balfe's 'Maid of Honour,' and later sang

with her husband at the Prince's and Covent Garden. In 1856 she sang at the Philharmonic, in the production of Schumann's 'Paradise and the Peri.' According to Chorley, who was not prejudiced in her favour, 'she had the honours of the evening' (*Athenæum*). She married again, Feb. 13, 1872, C. Davis of New Malden, Surrey.

A. C.

WEISSENBURG (WEYSENBERGH), HAINZ, see ALBICASTRO, Henrico.

WEISSENSEE, FRIEDRICH (b. Schwerstedt, Thuringia, c. 1560; d. Altenweddingen, 1622), rector of the Latin college at Gebesee c. 1590, and at Magdeburg town school, 1596. About 1601-02 he became pastor at Altenweddingen. He is one of the greatest German masters of his time, and a disciple of the great Venetians. He wrote a large number of motets, a list of which appears in *Q.-L.* (See also *Riemann*.)

WEISSHAN (WINSHEIM), ABRAHAM, a 16th-17th-century lutenist, at first at the court of Duke Frederic on the Grimmenstein, near Gotha. In a letter of Apr. 9, 1568, the Elector August of Saxony asks for his transference to his court at Dresden, where he still was in Aug. 1611. He wrote '*Silvae musicalis libri VII.*', preludes, fantasias, ballets, etc. (Cologne, 1603) (*Q.-L.*).

WEISSMANN, JULIUS (b. Freiburg, Breisgau, Dec. 26, 1879), was a pupil of Seyffart, Rheinberger and Bussmeyer in Munich; of Herzogenberg in Berlin; and finally of Thuille in Munich. Inspired by the romance of poetry and possessed of a pronounced inclination to musical absoluteness, his music is characterised by a graciously subtle rhythm. His works include:

A symphony in B min., op. 19; three pieces for orch., op. 57; a concerto for v'cl. in D min., op. 36; a concerto for FF., variations and fugue on an old 'Ave Maria,' for FF. and orch., op. 37; a sonata for v'cl. and pf.; a string quartet in F maj., op. 24; FF. trios, op. 27 and 77; v'cl. sonatas in F major, op. 28, and in F sharp min., op. 47; a solo vln. sonata in D min., op. 30; variations for oboe and FF., op. 39; songs, opp. 1, 2, 3, 4, 5, 6, 13, 15, 16, 22, 23, 29, 40, 43, 67; choral works with orch., op. 10; 'Hymne an den Mond,' op. 11; 'On a grave,' op. 12; sacred cantata, op. 34; male choir, op. 31; female choir, op. 65; pieces for FF., opp. 17, 21, 26, 27, 32, 35, 45; variations for 2 FF., in A maj., op. 64.

K. D. H.

WEIST-HILL, (1) THOMAS HENRY (b. London, Jan. 23, 1828; d. Dec. 25, 1891), was taught violin-playing by Sainton at the R.A.M., and in 1845 was elected King's Scholar. He first appeared at an Academy Concert in 1847, in Spohr's 9th Concerto, and subsequently went to America, where he introduced Mendelssohn's Violin Concerto. He afterwards undertook a professional tour in Europe, and in 1849 became a member of Costa's band at the Royal Italian Opera and elsewhere. In 1871 he followed his old conductor to Drury Lane, where he filled the post of director of the Ballet Music, and then to Her Majesty's till 1879.¹ In 1874-76 he was conductor at the Alexandra Palace, and displayed great energy in that department, giving performances of Handel's

'Esther' and 'Susanna,' Gade's 'Spring Fantasia,' Berlioz's 'Danse des sylphes,' compositions of Saint-Saëns, etc. Weist-Hill introduced to the British public important works of Bizet and Massenet. British composers were invited by the Alexandra Palace Company to compete for the composition of the two best symphonies, and the prizes were awarded to F. W. Davenport and C. V. Stanford by Joachim and G. A. Macfarren, as judges. In 1878-79 Weist-Hill was conductor of Mme. Viard-Louis's orchestral concerts, and gained much reputation for himself and his orchestra during the short life of the undertaking. In 1880 he was appointed Principal of the G.S.M. Under his energetic direction the number of pupils rose to upwards of 2500. Two sons of his, (2) FERDINAND, a violinist, pupil of the Brussels Conservatoire, and (3) THOMAS, a violoncellist, scholar of the R.C.M., have won success in London.

A. C.

WEITZMANN, KARL FRIEDRICH (b. Berlin, Aug. 10, 1808; d. there, Nov. 7, 1880), a learned and excellent writer on musical subjects, was a pupil of Henning Klein, Spohr and Hauptmann. He rose by various posts and labours, till in 1848 he established himself as a teacher and writer in Berlin, where he resided till his death. Three operas, 'Räuberliebe,' 'Walpurgisnacht,' and 'Lorbeer und Bettelstab,' were performed at Reval; he published a volume of 1800 preludes and modulations. His literary works include: *Der übermässige Dreiklang* (1853); *Der verminderte Septimenaccord und Geschichte des Septimenaccords* (1854); *Geschichte des griechischen Musik* (1855); *Geschichte der Harmonie* (1849); *Harmoniesystem* (1860); *Die neue Harmonielehre*; *Geschichte des Klavierspiels*, etc. (1863); *Der letzte der Virtuosen* (1868). A pupil, E. M. Bowman, published in 1877 in New York a work entitled *C. F. Weitzmann's Manual of Musical Theory* (*Riemann*). He contributed the fourth variation, in canon, to Liszt's 'Todtentanz.'

G.

WEKERLIN, JEAN-BAPTISTE THEODORE, see WECKERLIN.

WELCH, JOHN BACON (b. Pattishall Vicarage, Northampton, Dec. 26, 1839; d. July 1, 1887), a teacher of singing, began his musical education in London, and in 1861 went to Milan, and studied for three years under Nava. Ultimately he settled in London, where he had a large number of private pupils, and was professor of singing at the G.S.M. Among his most successful pupils may be mentioned Miss Anna Williams, Miss A. Marriott, Miss Santley (Hon. Mrs. R. Lyttelton), H. Blower, Bridson, Brereton, H. Piercy.

G.

WELCKER, a family of London music-publishers in the latter half of the 18th century.

PETER (1) was the first, and his shop was in Gerrard Street, St. Anne's, Soho; afterwards

¹ In 1878 he conducted at Her Majesty's the winter season of English opera.

numbered 17. He was established before 1764, and published much of the instrumental music of the day. He died in (or about) 1775, leaving his widow, Mary, to continue the business.

His son, (2) JOHN, about this time leaving his mother's business, probably under the management of James Blundell, who had married one of his sisters, set up as music-seller and publisher at 9 (afterwards 10) Haymarket, four doors below the Opera House. Besides the class of music which came from the Gerrard Street house, John Welcker issued the opera dances and ballets performed at the Haymarket Theatre. He also reissued (with an added volume) 'Clio and Euterpe.' In 1780-81 he removed to 18 Coventry Street, where he still was in 1785-86. The Haymarket shop was taken over by James Blundell, his brother-in-law. As the imprints of the Welcker publications frequently merely give the surname it is sometimes difficult to place their period of issue. F. K.

WELCKER VON GONTERSHAUSEN, HEINRICH (b. Gontershausen, Grand Duchy of Hesse-Darmstadt, 1811; d. there, June 15, 1873), court pianoforte-maker to the Grand Duke of Hesse, and a writer on the construction and history of musical instruments, particularly the pianoforte. His published works include:

1. Der Flügel oder die Beschaffenheit des Pianos in allen Formen. Eine umfassende Darstellung der Forte-Piano-Baukunst vom Entstehen bis zu den neuesten Verbesserungen mit spezieller Einweisung auf die rationelle Praxis für Bearbeitung und Zusammensetzung der Mechanismen, nebst gründlicher Anweisung zur Intonierung, Stimmung, und Saitenbemessung. Mit 75 Zeichnungen. Frankfurt am Main, 1853 (neue vermehrte Ausgabe, 1856).

2. Die musikalischen Tonwerkzeuge in technischen Zeichnungen aller Saiten-, Blas-, Schlag-, und Frictions-Instrumente, mit spezieller Beschreibung ihres Baues, Tönungsans, und fasslicher Angabe ihrer Behandlung und Erhaltung. Mit 160 Abbildungen. Frankfurt am Main, 1855.

3. Der Ratgeber für Ankauf, Behandlung und Erhaltung der Pianoforte (1857).

4. Die Clavierbau in seiner Theorie, Technik und Geschichte, unter Hinweisung seiner Beziehungen zu den Gesetzen der Akustik. Mit 91 Abbildungen. Frankfurt am Main (vierte mit einem Nachtrag vermehrte Ausgabe, 1870).

5. Über den Bau der Saiteninstrumente und deren Akustik, nebst Übersicht der Entstehung und Verbesserung der Orgel. Ein Anhang zum Clavierbau in seiner Theorie, Technik und Geschichte. Frankfurt am Main, 1876.

These very meritorious works bear witness to Welcker's great industry. They are not, however, to be always accepted as authorities, and a comparison of the fourth with the first shows that the earlier works, for which he had presumably his note-books at hand, are more trustworthy than the later ones. A. J. H.

WELDON, GEORGINA (b. Clapham, May 24, 1837; d. Brighton, Jan. 11, 1914). Her maiden name was Thomas, which was afterwards changed to Treherne. On Apr. 21, 1860, she married Captain Weldon, of the 18th Hussars. For many years she was known in society as the possessor of a lovely voice, and she afterwards adopted music as a profession on charitable grounds, and made her first appearance in public in 1870. She undertook a tour in Wales with her pupil, Miss Gwendoline Jones, and became a member of Leslie's choir, in which she sang the solo in Mendelssohn's

'Hear my prayer,' on Mar. 9, 1871. She afterwards sang at the Popular Concerts, the Crystal Palace, the Philharmonic, and elsewhere. In 1872 she took the solo soprano part in Gounod's 'Gallia,' at Notre Dame, the Opéra-Comique and the Conservatoire, Paris. Her romantic friendship with Gounod is well known. She assisted in training his choir in London, and established an orphanage at her residence, in order to give musical instruction to poor children, with objects and on principles which she fully described in a letter to the *Ménestrel*, and with a zeal and energy rarely equalled. She also published songs by Gounod and other composers in aid of her orphanage, among which was Clay's popular setting of 'The Sands o' Dee.' She also composed songs translated from the French by herself, viz. 'Choses du soir,' 'Le Chant du passereau,' 'Le Petit Garçon et le nid du rougegorge'; also 'The Brook' (poetry by Tennyson), etc. In 1879 she sang at Rivière's Promenade Concerts, with a female choir trained and directed by herself. This transaction gave rise to a protracted lawsuit, which was matter of considerable notoriety. Her last professional engagement was at a popular music hall in 1884. A. C.

WELDON, JOHN (b. Chichester, Jan. 19, 1676; d. London, May 7, 1736), was educated at Eton College, and whilst there studied music under John Walton, the college organist. He afterwards became a pupil of Henry Purcell. In 1694 he was appointed organist of New College, Oxford. In 1700 he gained the first of the four prizes offered for the best compositions of Congreve's masque, 'The Judgment of Paris,' the others being awarded to John Eccles, Daniel Purcell and Godfrey Finger (q.v.). Weldon's music was not printed, with the exception of Juno's song, 'Let ambition fire thy mind,' the air of which was adapted by Arne to the opening duet of 'Love in a Village.' On June 6, 1701, Weldon was sworn in a gentleman extraordinary of the Chapel Royal. In 1702 he resigned his appointment at New College. Upon the death of Dr. Blow in 1708, Weldon was appointed his successor as organist of the Chapel Royal, and on Aug. 8, 1715, upon the establishment of a second composer's place there, he was sworn into it. He was also organist of St. Bride's, Fleet Street, and in 1726 was appointed to the same office at St. Martin's-in-the-Fields. He was buried in the churchyard of St. Paul, Covent Garden. Weldon's principal compositions are for the Church; he published, under the title of 'Divine Harmony,' six solo anthems composed for Richard Elford; other anthems are printed in the collections of Boyce, Arnold and Page, and many are still in manuscript in the books of the Chapel Royal and some of the cathedrals. The two anthems printed by Boyce—'In Thee, O Lord,' and 'Hear my cry-

ing'—are admirable compositions, combining pure melody, fine harmony, and just expression. Weldon published three books of his songs, and many other songs are contained in the collections of the period. A song by him, 'From grave lessons,' is printed in Hawkins's *History*. He wrote music for four operas, besides the masque already mentioned: 'She would and she would not,' 1703; 'The Fair Unfortunate,' and 'Orpheus and Eurydice,' 1710; and 'The Agreeable Disappointment,' 1715. There is a portrait of Weldon among the Music School portraits in the Bodleian Library, Oxford.

W. H. H.

WELLESZ, EGON (*b.* Vienna, Oct. 21, 1885), composer and research student, studied musical science and history with Guido Adler at Vienna University, harmony with Carl Frühling, counterpoint with Arnold Schönberg and composition with Bruno Walter, and graduated as Ph.D. at Vienna in 1908, with a thesis 'Gius. Bonno,' which was published in the 1910 volume of the International Musical Society. In 1910 he edited, for the *D.T.Ö.*, J. J. Fux's opera 'Costanza e fortaleza.' In 1913 he became lecturer on musical history at Vienna University. He is the author of many historical essays on the baroque period, and has made a special study of old Byzantine music, on which he published an important volume in 1922. (See BYZANTINE MUSIC: BIBLIOGRAPHY.) He has played a prominent part in the musical life of Vienna, using his pen and his influence in furthering the knowledge of contemporary music generally, and he was one of the group of Viennese musicians to whose initiative was due the meeting at Salzburg in 1922, from which developed the INTERNATIONAL SOCIETY FOR CONTEMPORARY MUSIC (*q.v.*). As a composer he is usually included among those acknowledging the leadership of Schönberg, but his adoption of their creed is much looser than is the case with other Schönberg pupils. His early works reveal other influences, notably that of Mahler and occasionally of Reger. He developed an enthusiasm for Debussy and the French school, traces of which are still discernible, though less abundantly than at that time. Since then a modified form of expressionism has definitely claimed him. Parallel with this development in his methods, the predilection for sharply defined rhythmic phrases which appeared in the early works has led to the composition of several ballets and of a 'Dance-Suite' for violin solo and chamber orchestra. His most important works are:

STAGE

Operas.—'Die Prinzessin Grmara,' op. 27. 'Alkestis,' op. 35. *Ballets.*—'Das Wunder der Diana,' op. 18. Persian Ballet, op. 30. 'Achilles auf Skyros,' op. 33. 'Die Nächtlichen' (Tanz-symphonie), op. 37.

ORCHESTRA

'Gebete der Mädchen zur Maria,' sop., chor. and orch., op. 5. 'Vorfürhling,' symphonic poem, op. 12. Suite, vin., solo and chamber orch., op. 38.

CHAMBER MUSIC

Four String Quartets.
'Gelästiges Lied,' v., FF., vin. and vla., op. 23
Sonata for v. cl. solo, op. 31.
vin. solo, op. 36.
Two clar. pieces, op. 34.

Numerous FF. pieces, notably opp. 4 ('Der Abend'), 9, 11 ('Eklagen'), 17 ('Epigrams'), 21 ('Idylls'), and 26. Many songs, among which 'Wie ein Bild,' op. 3, cycle, 'Kirschblütenlieder,' op. 8, and 'Aurora,' a song without words for coloratura voice.

E. H.

WELL-TEMPERED CLAVIER, see WOHL-TEMPERIRTE KLAVIER.

WELSH, THOMAS (*b.* Wells, Somerset, c. 1780; *d.* Jan. 24, 1848), became, when 6 years old, a chorister in the cathedral there. He made such rapid progress that in the course of a few years Wells became the resort of lovers of music attracted by the beauty of his voice and excellence of his singing. His fame drew the attention of Sheridan and Linley, and he appeared in 1792 at the Bath concerts, in the concerts given at the King's Theatre during the rebuilding of Drury Lane, and also on the stage in Attwood's 'Prisoner.' He subsequently performed at Drury Lane in Attwood's 'Adopted Child,' Storace's 'Lodoiska,' and other pieces. John Kemble thought highly of his abilities as an actor, and taught him to perform the part of Prince Arthur in Shakespeare's 'King John.' After the breaking of his boyish voice Welsh pursued his studies under C. F. Horn, John Cramer and Baumgarten. In 1802, his voice having become a deep and powerful bass, he was admitted a gentleman of the Chapel Royal. A few years later he essayed dramatic composition, and produced 'Twenty Years Ago,' a melodramatic entertainment, 1810; 'The Green-eyed Monster,' musical farce, and 'Kamtschatka,' musical drama, 1811. But his greatest reputation was gained as a singing master and instructor of pupils for the stage. Foremost among those whom he taught were John Sinclair, C. E. Horn, Miss Stephens and Miss Wilson. He joined Hawes in carrying on the Royal Harmonic Institution. (See ARGYLL ROOMS.) He published some glees and pianoforte pieces and a 'Vocal Instructor.' He married Miss WILSON (*q.v.*) (*d.* 1867), who had been his pupil, and had issue an only child, who became the wife of Alfredo Piatti, the eminent violoncellist.

W. H. H.

WELSH MUSIC. There is sufficient evidence to prove that at a very early period a musical culture existed in Wales; a culture far in advance of what might have been expected in a country of rugged character, whose political conditions were continually plunging it into war. It has been asserted that this especial cultivation of scientific music was mainly due to the fact that the harp, an instrument of more capability than most primitive ones, was in popular use. Also it may be added that Wales possessed in its bards a race of men whose profession was the production of poetry and

music for the purpose of inciting their countrymen, by song and chant, to deeds of valour.

While much has been written regarding the bards, their poetry and music, in the earliest period of Welsh history, it must be confessed that we have really little evidence of the kind of music in use in these early bardic times. Notwithstanding this, several Welsh writers have freely dealt with the musical history of Wales from a very remote date, so remote, in fact, as to reach backward to Druidical times. Lengthy lists of bards dating from A.D. 60 are given in Edward Jones's *Musical and Poetical Relicks of the Welsh Bards* (1794) and elsewhere, with translations of their songs, and prose narratives, musical laws, rules for the government of their order, and many other intimate matters, with little reservation. Later writers copy these, and accept statements which more cautious antiquaries might wish to see better verified.

It is impossible here to enter into this bewildering mass of quotation and assertion, and to sift the likely from the unlikely. There is no doubt much worthy of all credence, but its absolute value can only be estimated by Welsh scholars having access to the manuscript and other real evidence that may still remain. Several points, however, stand out from the mass, such as the association of Irish with Welsh harpers, and the great interest shown by early Welsh rulers in the progress of the musical art in the country.

Prince Gruffydd ab Cynan, who lived in the 11th and 12th centuries, is credited with having put the professional music of Wales into some order, and with having made laws for the guidance and government of the bards and harpers, and others of the minstrel class. He is said to have enacted that certain 'measures' should be played to particular kinds of lyrics, and to have given names to these.

Another proof of the existence of an early Welsh school of music is found in a much-quoted passage from Giraldus Cambrensis who, at the end of the 12th century, wrote of Welsh music thus:

'The Britons do not sing in unison like the inhabitants of other countries, but in many different parts. So that when a company of singers, among the common people, meet to sing, as is usual in this country, as many different parts are heard as there are performers, who all at length unite in consonance with organic sweetness.'

(Other translations give 'unite in consonance under the softness of B flat'.)¹

Other proofs of Welsh musical activity are forthcoming in these early days, but space will not permit an entry into the difficult question, particularly where no example can be found that will give the modern musician authentic and tangible evidence of the class of music

cultivated. The reader who wishes to examine such details as are available is referred to the *Historical Dissertation* prefixed to John Parry's 'Antient British Music' (1742), to Edward Jones's *Relicks* (1794), and *Bardic Museum* (1802), Bunting's 'Ancient Music of Ireland' (1809 and 1840), and to other works contemporary with these. The more modern essays on the subject are mainly based upon the statements made in one or the other of these books, and much appears to be accepted without further independent research.

Of Welsh musical instruments we have better knowledge. The harp was pre-eminent, although it must not be forgotten that this instrument was equally in evidence among the Anglo-Saxons and among the Scots and Irish. The other musical instruments of Wales were much the same as those in use at contemporary periods in England, Ireland and Scotland. There was, however, one exception, the *CRWTH* (*q.v.*), a stringed instrument played with a bow, although it had become practically obsolete at the end of the 18th century. Jones, in 1794, mentioned that he had possessed one, which was accidentally destroyed by fire; and the Rev. William Bingley, in his *North Wales* (1804), tells us that he found an old man who played one, and describes its tone as harsh and disagreeable. It had six strings, two of which were off the finger-board, but its flat bridge scarcely allowed any string to be touched singly by the bow, and the whole appears to have been chiefly played as an accompaniment for the harp, or for the voice.

The rest of the Welsh instruments, so far as we know, were the pibgorn or hornpipe (see PIBGORN; STOCKHORN), the bagpipe, the bugle horn, and the tabret, a small drum. The harps were of different sizes, some being three or four feet long, though the usual size was large, six or seven feet high, and all had a varying number of strings.

In Queen Elizabeth's reign some of the single harps had twenty-nine strings. There were also double harps with two sets of strings, as well as the triple harp (see HARP) having three sets of strings; this seems to have been in use among the more skilful performers only. According to early laws certain kinds of harps were confined to learners, and one of these kinds was made of hardened leather. Jones gives a translation of a poem, said to belong to the 14th century, which condemns the leathern harps, and suggests that they bent while being played upon; they were, the poem indicates, made of horse skin. A more credible reference is to be found in the remembrance of a person who told Jones that he used as a boy to play on a harp which was covered with ox skin. It is quite evident that the leathern harp, with the other instruments named (excepting the correct forms of harp) could not make very satisfactory music.

In furtherance of musical culture Welsh

¹ Woolbridge, *Oxf. Hist. Mus.* i. 162, quotes this passage from *Cambriae Descriptio*, cap. xiii. in Latin and English, and comments on its interpretation.

musicians have, from early times, held musical meetings at which harpers and other performers from different parts of the country attended. Here they played in competitions, and settled the affairs of the profession. The modern revival of these meetings is the *Eisteddfod (q.v.)*, which is so prominent a feature of musical life in Wales at the present day.

While in bardic times the office of the harper was to inspire the onslaught and to sing the deeds of valour done, as times grew more tranquil the professional harper wandered abroad and either took service with some wealthy family as domestic harper, or went from one country seat to another or to various fairs, markets or gatherings, picking up his living by such donations as might come in his way. It is important to remember this when considering the airs which now constitute Welsh national music.

Many of the harpers were blind, as in Scotland and Ireland, and indeed the affliction seemed to fix the calling of the man. Among others, two blind harpers may be mentioned as connected with the issue of important collections of Welsh airs, viz., John PARRY (*q.v.*) of Ruabon (*d.* 1782), and Richard Roberts of Carnarvon (*d.* 1855, aged 86).

Regarding the profession of a harper at a comparatively early date a curious commission may be quoted which was given by Queen Elizabeth to certain Welsh gentlemen in 1567. By it, it appears that

'vagrant and idle persons naming themselves Minstrels, Rythmers, and Bards are lately grown into such intolerable multitude within the principality of North Wales, that not only gentlemen and others by their shameless disorders are often disquieted in their habitations, but also the expert minstrels and musicians in tongue and cunynge thereby much discouraged to travaile in the exercise and practice of their knowledge'; etc.

It was therefore enacted that the silver harp, which had been bestowed by Sir William Mostyn and his ancestors upon the best minstrel at the assemblies held at 'Cayroes in the county of Flynt,' should be given annually at the said town of Cayroes on the Monday after Trinity, beginning in 1568, upon the advice of 'expert men in the faculty of Welsh music,' and that all who were considered unfit should be compelled to 'return to honest labour,' upon pain of being taken as sturdy and idle vagabonds.¹

It may be now asked what authentic remnants of ancient Welsh music exist. In the 18th century there were several libraries of old Welsh manuscripts which, in at least two instances, suffered greatly by fires; it does not, however, appear that among those destroyed were any manuscript musical collections which (as among English manuscripts) gave indication of the vocal or instrumental music of Wales at an early date, with the exception of two MSS. to

be presently dealt with. The most famous of these manuscripts is a volume, formerly in the possession of Lewis Morris and afterwards in that of the Welsh School, whence it passed to the British Museum in 1844. By an inscription it is judged to have been written about the middle of the 17th century. An early entry in the MS. states that 'this book was wrote by Robert ap Huw of Bodwigan in Anglesey in Charles ye First's time, some part of it copied out of William Penllyn's book.' William Penllyn was a harper who was one of the chief bards of North Wales in the ninth year of Elizabeth.² It purports to contain

'the music of the ancient Britons as settled by a congress of masters of music by order of Gruffydd ap Cynan about the year 1100, with some of the most ancient pieces of the Britons, supposed to have been handed down to us from the British Bards.'

However this may be, there are twenty-four lessons, or 'measures,' followed by twelve variations on a ground-bass. The whole is in a tablature used for organ music in the 16th and 17th centuries, though, in ignorance of this fact, John Parry in the 'Welsh Harper,' vol. i., refers to it as 'the most ancient specimen of Welsh musical notation extant,' and that 'the characters used are those of the ancient bardic alphabet.' He also mentions an article by Sir Samuel Meyrick, *On the Musical Notation of the Ancient Britons*, in a Welsh antiquarian journal, evidently founded upon the same MS. and tablature. There is a description of the manuscript in Dr. Burney's *History of Music* (vol. ii., 1782, pp. 110-14) with facsimiles and translations. It is, however, transcribed in full, in the third volume of *Myvyrian Archaeology of Wales* (1807), and again reprinted with a full translation in the 1870 edition. The most recent consideration of the MS. is in Miss M. H. Glyn's *Evolution of Musical Form*, 1909, where an independent translation of 'The Prelude to the Salt' is given. She happily describes the whole of the music in the MS. as

'ceaseless reiteration of equal beat figures of a few notes, [which] suggest five-finger exercises rather than variation. Monotony pervades the whole range of the music, a fact which goes far to prove its authenticity.'

Burney, however, says of it: 'This counterpoint, artless as it may seem, is too modern for such remote antiquity as is given to it.' In the present article the age of the MS. need not be discussed, and the series of chords which make up the bulk of the music does not in any way resemble the popular Welsh airs. It has been suggested that the pieces contained in the MS. are for performance on the crwth, but this opinion is scarcely tenable; it appears quite evident that it is harp music. Regarding this manuscript, Brinley Richards, in the 1884 edition of 'Songs of Wales,' says that he

¹ See the whole quoted in Evans's *Specimens of the Poetry of the Ancient Welsh Bards*, 1760.

² See note by Burney, *History of Music*, vol. II. p. 110.

'feels obliged to modify his former statements concerning the so-called 11th-century MSS., and he now believes that they are of more recent date, as the accounts of the congress of Prince Gruffydd ab Cynan, at which they are said to have been written, are unsupported by any authentic evidence.'

In the *Myvyrian Archaeology of Wales* also appear a transcript and a translation of another early musical MS., that of Rhys Jones, but the character of the music resembles that of the manuscript previously described.

Besides these MSS. there does not appear to be preserved any collections of Welsh music (save one or more general treatises on the art of music written in Welsh) before the early part of the 18th century. We are thus, unfortunately, in the dark as to the character of Welsh music before the harpers were influenced by the art of other countries. It is much to be regretted that we cannot trace, step by step, as we can in the music of England, by the aid of MSS. or printed books, the evolution of Welsh melody. Nevertheless, from a cause not now easy to discover, Welsh historians have claimed for Welsh melodies an antiquity far greater than that of any music current in the British Isles. So far as the present writer has been able to ascertain, this claim first made its appearance shortly before the middle of the 18th century. If Lewis Morris, the Welsh antiquary then living in London, did not first broach this theory he certainly did much to foster it. How much or how little truth there may be in the statement, for instance, that certain now popular Welsh airs have come down traditionally from Druidical times and are coeval with the Roman occupation of Britain, will always remain a matter of personal opinion. While not in any way disputing the fact that cultured music was commonly performed in Wales, it must be remembered that many of the old harpers were blind, and that therefore, to such, musical notation would be useless, also that it would require a very ample system and great skill to put down upon paper the florid music of which the harp, in the hands of a clever harper, is capable. There can be but little doubt that the music of Wales would be played entirely by ear, and subject to extemporaneous adornment or alteration by each player.

It is not very clear when Welsh music, considered as national music, began to have attention paid to it. Towards the end of the 17th century stress began to be laid upon the fact that certain tunes were of Scotch origin, and that others were in the 'Scotch taste,' but the present writer cannot find (save in one minor instance) that any attempt was made before 1742 to offer to the public a collection of melodies professedly of Welsh birth, although some Welsh tunes, indicated as such, occur at earlier date in certain London country dance books.

Blind John Parry of Ruabon, assisted by

one Evan Williams, issued his 'Antient British Music' in London in 1742. Lewis Morris, who, it is stated, first put the harp into the hands of Parry, had some share in this work, for he contributed an anonymous *Historical Dissertation*, and probably concocted the title which speaks of the melodies as 'supposed by the learned to be the remains of the music of the Antient Druids.' The airs (twenty-four in number) are unnamed, and were probably the general tunes then played by the harpers of North Wales.

Parry in London got some degree of fame, fostered by the belief that the tunes he played were of the highest antiquity. He was appointed harper to the king, and fired the poet Gray to write 'The Bard.' Gray, writing to a friend, says: 'Mr. Parry has been here and scratched out such ravishing blind harmony, such tunes of a thousand years old, with names enough to choke you.' No other musician after Parry's first volume ventured on a Welsh collection, but in 1781 (the year before he died) Parry issued a further collection, this time introducing a large number of variations for the harp. Edward Jones followed in 1784, 1794 and 1802, still claiming the melodies as 'Bardic tunes from very remote antiquity' and 'Ancient war tunes of the Bards,' also that they were 'never before published.'

This insistence on the great age of the Welsh airs continued throughout all later collections. Richard Roberts in 'Cambrian Harmony' (1829), speaks of his tunes as 'never before published, arranged as they were originally performed by the Ancient Britons.' The book, however, opens with 'The King's Joy,' which proves to be the well-known cavalier song 'When the King shall enjoy his own again,' and this is reprinted without remark in Parry's 'Welsh Harper' (1848).

In 'Cambrian Minstrelsie' (1893) (see BIBLIOGRAPHY below), great age for known Welsh melodies is asserted. For example, the note appended to 'Nos Galen' is,

'This melody is of very great antiquity, dating, as some maintain, from the days of the Druids. It must, therefore, be at least between 2000 and 3000 years old.'

Many other quotations might be given from this and other works of a similar character.

With no wish to belittle either the beauty or the antiquity of the many charming Welsh melodies which the older collectors have placed before us, one is tempted to inquire more closely into the history of them, and here it becomes evident that there are many difficulties in reconciling these statements with facts. It is also quite clear that the earlier editors of Welsh collectors did not approach their subject with open minds, or with the method now expected in dealing with antiquarian subjects.

Structure of melody was not considered; prior published collections of airs were not examined; and the sources of their own airs not given. Edward Jones was the most laborious of these editors, and while his books are full of interesting material, this is badly arranged and difficult to sift. He gives many quotations from MSS. having reference to the musical affairs of Wales, yet neither here nor elsewhere have we any tangible evidence of the early existence of the present-known Welsh melodies, either in notation or as definitely named by title.

The earliest Welsh tunes that exist (apart from the Rhys Jones and the Penllyn MSS. referred to above, and these can scarcely be claimed as melodies) are found in Playford's 'Dancing Master,' from 1665 to 1718, a half dozen or so, and some few others in the London dance books. These, with the five in 'Aria di Camera' (c. 1727), are the only ones before John Parry's Collection of 1742. We are thus more severely handicapped in our study of Welsh national music than in that of English, which possesses the advantage of being traceable, step by step, from the 13th century onward by ancient noted examples.

The tunes Jones and the two Parrys give have evidently been taken down from the playing of harpers in North Wales, where the harp seems to have been in greatest favour. They appear to have considered that this instrument was the sole one worthy of attention (this may be due to the fact that they were themselves skilled performers on it), and that Welsh vocal music was of but little interest. They filled their books with pages of variations, and one frequently wonders what is claimed as genuinely old and what is admittedly modern. Also, sometimes a suspicion arises, as no sources are named, whether every tune inserted is purely traditional or whether the editors have been tempted silently to include compositions of their own.

In the early years of the 19th century it seems to have been recognised that, apart from the published Welsh tunes, a number of traditional Welsh melodies yet existed among the people, and at local eisteddfodau prizes were offered for MS. collections of these. Though no attempt at publication was made, one or two of these MS. collections fortunately still exist; John Parry, the later, having used one for material for his 'Welsh Harper.' Miss Maria Jane WILLIAMS (q.v.) collected folk-tunes in South Wales, and in 1838 submitted her collection at an eisteddfod. She, however, did more, and a selection of forty-three of them was published in 1844. Her collection is now extremely rare, and only a small number of copies can have been issued. She noted a number of modal tunes, and had the true instinct of a modern folk-song collector, being distinctly in advance of her time in the appreciation of pure

folk melody. Her collecting was done in Glamorganshire. It was not until 1896 that a further book of traditional Welsh folk melodies was published. Nicholas Bennett in that year issued 'Alawon fy Ngwled, or Lays of my Land.' This has over 400 melodies, without words, from traditional sources, though, as might be expected, there are in it a number of English folk-tunes, and some published English and other airs not folk tunes; it is, however, an honest attempt at a much-needed work. Carl Engel, in his *Literature of National Music* (1879), drew attention to the desirability of searching Wales for traditional melodies, and he prints an air, 'Dixon's Hornpipe,' noted by himself at Llangollen, claiming it to be 'as fine as any of the finest Welsh tunes in popular favour.'

A 'Welsh Folk-song Society' was subsequently formed with the object of collecting and publishing this class of music. In the collection of 'Welsh Melodies,' edited by Lloyd Williams and Arthur Somervell (Boosey & Co.), are some examples of genuine old tunes of fine quality.

Consideration may now be given to the sources of many of the fine tunes which make up the national music of Wales. Among these there are a great number of fine bold melodies of which any nation might be proud. The first printed sacred music of Welsh origin, or usage, occurs in Thomas Ravenscroft's 'Whole Booke of Psalmes,' etc., 1621 and 1633. Among the tunes marked as Welsh is 'Wrexham.' (See PSALTER.)

As before mentioned, Welsh secular airs began to be first printed in London books of country dances, and the earliest that may be referred to Wales that the present writer has discovered, is the tune 'Abergenie' in the 1665 and later editions of Playford's 'Dancing Master.' 'Abergenie' is probably Abergavenny in Monmouth, which is a sufficiently Welsh county in manner and customs to be musically included. Singularly enough, this air bears a strong resemblance to 'Cold and Raw.' 'The Bishop of Bangor's jig,' 'Lord of Carnarvon's jig,' 'St. David's Day,' and 'Welch Whim' are all in different editions of the 'Dancing Master,' and may, from their titles, be presumed to be of Welsh origin, although not reprinted in any Welsh collection. The fine melody 'Morva Ryddlan' (The Marsh of Rhuddlan) is in 'Aria di Camera' (c. 1727), which also includes the characteristic 'Meillionen'; this latter occurs also in several country dance books about 1735-40.

As 'Aria di Camera' is a book of extreme rarity,¹ the earliest version of the first-named famous Welsh melody may be given from it; it will be seen to have some difference from later copies.

¹ A copy was in the library of the writer.

Morva Ryddlan.

From 'Aria di Camera,' cir. 1727.

Another early version of it named 'An old Welsh Tune,' again having a difference, is printed in Francis Peacock's 'Fifty Scotch Airs' (1762).

The striking tune named 'Of noble race was Shenkin' first occurs in connexion with

Of Noble Race was Shenkin.

From 'Dancing Master,' 1703.

D'Urfe's comedy 'The Richmond Heiress,' acted 1693, where the song, in broken English, sung by Bowman, is put into the mouth of a comic Welshman, Rice ap Shenkin. The song is printed in Playford's 'Thesaurus Musicus,' book i. 1693, in different editions of 'Pills to Purge Melancholy' and 'The Dancing Master,' as well as on half-sheets of the period. In 'Pills' there is also another song to the same air. Henry Purcell and John Eccles wrote the music for 'The Richmond Heiress,' but whether a genuine Welsh air was employed for Shenkin's song is by no means certain. The tune, after being immensely popular in England, was first included in a Welsh collection in 1794 (Jones's), and named 'The Camp.' It is rather strange that John Parry (Bardd Alaw), in including it in his 'Two Thousand Melodies' (1841), No. 1980, names it, without further comment, 'Danish Air.' Parry had inserted it in his first Welsh collection, 1809, and there states that he is unable to trace its origin.

Blind Parry's first collection of twenty-four 'Arias,' unnamed, includes 'Lady Owen's Delight,' which is again repeated without name in his later collection of 'Twelve Airs for one and two Guitars' (c. 1760-65). In his 1781

edition it first bears the name 'Difyswch Arglwyddes Owen's.'

Lady Owen's Delight.

From Parry's 'Twelve Airs for one and two Guitars,' cir. 1760-65.

'The Mock Nightingale' is also in the 1742 edition, repeated in the 1781, and 'Glân Meddwod Mwyn' ('Good humoured and fairly tipsy'), after being in the 'Twelve Airs' (1760-1765), occurs in the 1781 edition.

Others in this last-named work of Parry's printed for the first time are 'Nos Galen,' 'Sir Harry Ddù,' 'Mentra Gwen,' 'Merch Megan,' and other familiar airs, comprising forty-two in all.

In Jones's first edition of *Musical and Poetical Relicks of the Welsh Bards* (1784) is included 'Captain Morgan's March,' 'The Dimpled Cheek,' 'The Bend of the Little Horseshoe,' 'Winifreda,' 'Ar hyd y nos,' 'Dafydd Garreg Wen,' 'Pen Rhaw,' etc. In the 1794 edition the whole plates are reprinted, with additions, and for the first time. 'Men of Harlech,' with

Gorhoffedd Gwyr Harlech.

(The March of the Men of Harlech.)

Jones's 'Welsh Bards,' 1794.

other now popular airs, sees the light for the first time. Among these is the following 'Eryri Wen' ('White Snowdon') from Jones's 'Welsh Bards' (1794).

In Jones's *Bardic Museum* (1802) the pretty air 'Ash Grove' is first printed. In later works by different editors many fresh Welsh tunes find place; those of Parry (Bardd Alaw)

and Miss Williams especially contributing largely.

It is not necessary to reprint here the well-

DOUBTFUL MELODIES.—It now becomes necessary to consider the great number of tunes which have been classed as Welsh upon insufficient grounds. As a preliminary it must be recollected that Wales has at all times produced a large number of skilful performers on

the harp, who were accustomed to pick up a livelihood by travelling about the country in the exercise of their profession. It was from this class of men that the earlier collectors noted the melodies they published. It is impossible to assume that these wandering minstrels played nothing but Welsh tunes; they would, without doubt, please their audience or themselves with such airs as took their fancy. Those remaining among the mental stock in trade of harpers would become traditional and subject to such changes as affect traditional melody.

In a lengthy list of 'songs and melodies commonly used by the poets and harpers, in Wales, collected by Richard Morris, 1779' (B.M. Add. MSS. 14,939), are many titles of English melodies evidently, as the compiler of the list states, commonly used in Wales. Blind Parry, Jones and others, without inquiring into this matter, noted down numbers of English and Irish airs, apparently without the knowledge that they were merely traditional Welsh forms of such airs. The inclusion in these early Welsh works, especially with the words on their title-pages 'Never before published,' has caused them to be ranked among genuine Welsh music. A few of these cases may be here named, though the list could be largely extended did space permit.

'Pen Rhaw,' first published as Welsh in 1784, has considerable affinity to 'John, come kiss me now,' a tune common in England and Scotland in the 16th and 17th centuries. 'Torried y dydd' ('The dawning of the day'), 1781, is a well-known air, 'Windsor Tarras' (or Terrace), printed with the song in 'Pills,' vol. i., in Walsh's Dances for 1714, and elsewhere. 'Brenhines Dido' ('Queen Dido'), 1781, is a very imperfect remembrance of the ballad air 'Queen Dido,' or 'Troy Town,' as it is sometimes named; this was printed as early as 1660. 'Margaret that lost her garter' (1781) has great likeness to 'Franklin has fled away' of 1669. 'Good humoured and fairly tipsy,' which occurs in John Parry's 'Twelve Airs for one and two Guitars,' circa 1760, and again in his 1781 edition, is a slight deviation from a once favourite song, 'The women all tell me I'm false to my lass,' sung originally at Vauxhall in 1750 and printed with the song and air in the June supplement of the *Universal Magazine* for 1751. 'Hunting the Hare' (1794) has no Welsh claim; it is 'The Green Gown,' printed as early as 1652 in 'Musick's Recreation on the Viol,' and later, in a great number of other places.

'The Rising Sun' was published by Jones in 1794, with the note 'The subject of this air Mr. Handel has borrowed and introduced into the duet "Happy We" in his oratorio of "Acis and Galatea."' The duet is said to have been added by Handel to his pastoral in 1739; 'The Rising Sun' was printed in country dance-books

about 1735, but it was not considered as Welsh before Jones published it in 1794. In any case the phrase is unimportant and probably had long been common property.

In a similar way an illogical proposition is made to the effect that the tune, 'Cease your funning,' in the 'Beggar's Opera' (1727-28), is stolen from the air 'Llwyn Onn,' or 'Ash Grove,' which first appeared in the 'Bardic Museum' (1802), without any account of its source, except that it was named after 'Mr. Jones's mansion near Wrexham.' The original of 'Cease your funning' has been traced from the contemporary air 'Constant Billy' or 'Lofty Mountains'; but while the resemblance to the Welsh tune is of the slightest, it is inconceivable that it can be founded on one of which no trace appears until over seventy years have passed. The error has been persistently repeated, down to the date of Brinley Richards. 'Drive the world before me' (1794) is an Irish jig which is printed in Oswald's 'Caledonian Pocket Companion' and elsewhere about the middle of the 18th century as 'Kick the world before you.' 'The First of August' (1802) is a tune which figures in the 'Dancing Master' as 'Frisky Jenny,' and under other titles has long been a favourite in England. The title 'The First of August' was given to it by reason of its being sung to a song, so named, in commemoration of the Hanoverian succession, and not, as Jones suggests, in connexion with Lammas Day, or the payment of Welsh tithes. The air is probably Swedish.¹

'Flaunting Two' (1794) is the 17th-century country dance 'The Hemp Dresser,' and 'The Monks' March,' conjectured to be so named as one sung by the monks of Bangor who were massacred in 613, is really one named after General Monk, which occurs in the 'Dancing Master' of 1665 as 'The [ord] Monks March.'

The Melody of 'Cynwyd' (1794) is 'Dargason,' a tune of great antiquity, printed in the 'Dancing Master' (1651, etc.). 'The Delight of the Men of Dovey' (1781) is the Irish air 'Dear Catholic Brother,' and the list might be considerably prolonged. These tunes have, without evidence or comment, been included among Welsh national music at the dates above given. Succeeding editors have accepted the position, and where they have found them among earlier English music, have illogically suggested that they have been stolen from the Welsh. In one recent collection the editor has included 'The Princess Royal' ('the Arethusa') without offering an explanation. Another illogical claim is for 'The Bells of Aberdovey' (1844), which has long been included in Welsh collections as native of the soil, but is really the composition of Charles Dibdin, who, writing a song for it in broken Welsh, used it in his opera

'Liberty Hall' (1785). Miss Williams, hearing it traditionally, published a version of it in her collection of 1844, and from that time onward it has been accepted as genuine Welsh. There is certainly no evidence to show that Dibdin used an existing tune (it was quite opposed to his practice), and no copy can be found except Dibdin's of a date before 1844.

A good example of the way in which great age is ascribed to tunes whose internal structure proclaims them of late date is seen in the air 'Captain Morgan's March,' included in every Welsh collection, and deservedly a great favourite. It was originally published by Jones in his 1784 edition, again repeated in that of 1794, while its terminal notes were altered to its present form in Parry's 'Welsh Melodies' of 1809. The Welsh account of its origin, as given by Jane Williams, *History of Wales*, 1869, in mentioning the rising of Rhys ap Morgan, in Glamorganshire, in 1294, is that it 'was probably composed, or selected by this Prince to animate the march of his followers.' This early Morgan's connexion with the air is more or less suggested by all writers on the subject from Jones onward, and the passage from Williams's *History* is quoted by the editor of 'Cambrian Minstrelsie' as late as 1893. It is somewhat strange that these historians skip all the Captain Morgans for five hundred years to fix upon this particular one renowned in Welsh history. The present writer makes the suggestion that the tune offers no structural evidence of an earlier date than the middle of the 18th century, and that it is most likely the composition of a regimental band-master, who has named it after some Captain Morgan associated with the regiment. Collectors of musical works do not need to be told that from about 1745-90 there was quite a run on military music, and that great numbers of marches of a similar character, named after military personages, were included in the flute and violin collections of the period.

Even if documentary evidence of a more trustworthy kind should be found in support of the theory that these tunes were of great antiquity, their internal evidence remains as a strong proof of their being, for the most part, of comparatively recent origin. In the two books of 'Welsh Melodies,' edited by Dr. J. Lloyd Williams² and Dr. Somervell (1907 and 1909), there are some fine tunes which are evidently old; the lullaby, 'Suo-Gan' and 'The Shepherd of Hafod' ('Bugail yr Hafod') are clearly older than any of the usually recognised Welsh airs; and 'The Bard's Dream' ('Brenddwyd y Bardd') is so purely Dorian in character that it must date from a time when the modes were in practical use.

¹ See article by the present writer in the *Mus. T.*, Sept. 1895, p. 503, and in the *Proceedings of the Musical Association*, 54th session, p. 89.

² See also a paper on 'Welsh National Melodies and Folk-Songs,' read by Dr. J. Lloyd Williams before the Honourable Society of Cymmrodorion on Jan. 22, 1908.

- c. 1800. *Six Welsh Airs with English words* . . . by Mrs. Opie, harmonised for 2, 3 and 4 voices . . . by Ed. Smith Biggs. London, Birchall. Fol. 3 sets.
1804. *North Wales, including its Scenery, Antiquities, Customs, and some sketches of its Natural History*, by the Rev. W. Bingley. London. 2 vols. 8vo.
Contains, in the 2nd volume, 16 Welsh airs mainly from Jones.
1807. *Myvrian Archeology of Wales*, vol. III. 1807.
This contains transcripts of the Rhys Jones, and Penlllyn MSS. The 1870 edition reprints the transcripts and gives translations and an article on the MSS, by John Thomas.
- c. 1806-07. *Specimens of various styles of music referred to in a course of lectures at Oxford and London* . . . by W. Crotch, vol. I. Folio.
Contains 42 tunes, some noted by Malchair, others principally from Jones and Parry of Rhuaabon.
- c. 1809. *A Selection of Welsh melodies with appropriate English words* . . . with symphonies and accompaniments . . . by John Parry. London, Bland & Weller. Folio.
This was reprinted 1817-20 by Goulding and D'Almaine. This John Parry's 'British Harmony' (1779-1851). In addition to those enumerated in this bibliography he issued many minor arrangements of Welsh melodies.
- 1809 1811-1814. *A Select Collection of Original Welsh Airs adapted for the voice, united to characteristic English Poetry, never before published*. Edited by Joseph Haydn. Vol. I. (II. and III.) London, Preston, and by G. Thomson, the editor and proprietor, Edinburgh. Folio.
George Thomson's collection in 3 vols., bearing the above dates respectively; practically all the airs are from printed sources.
- c. 1810. *Cambrian Harmony, being a Collection of ancient Welsh airs, the traditional remains of those originally sung by the Bards of Wales* . . . by John Parry (of Rhuaabon). London, Preston. Folio.
A reprint of Parry's 'British Harmony' 1781.
1810. *Sixty of the most admired Welsh airs collected principally during his excursion into Wales*, by the Rev. W. Bingley . . . the basses and variations arranged . . . by William Russell, junior, organist of the Foundling Hospital. London. Folio, 1810.
- c. 1813-14. *Twelve Favourite Welsh Airs and melodies, arranged with variations as solos for the German Flute* by Louis Jansen. London, G. Walker. Folio.
- 1817-20. *A Selection of British Melodies with symphonies and accompaniments* by Clifton, and appropriate words by John F. M. Dovaston [1817]. Dublin, W. Power. Folio.
Second book, published by Clement. London, dated (on cover only), 1820.
1822. *A Selection of Welsh Melodies, with symphonies and accompaniments*, by John Parry, and characteristic words by Mrs. Hemans. London, J. Power. Folio.
1829. *A Third Volume of Welsh Melodies. The poetry by Mrs. Cornwall, Baroness, and the symphonies and accompaniments by John Parry* London, Goulding and D'Almaine.
The first of this series was published 1809, see above, and reprinted.
- c. 1825. *A Collection of Welsh Airs arranged on a plan never before attempted* . . . also notes and observations on the mode of playing and singing the Welsh music . . . by John Parry. London, Goulding and D'Almaine. Folio.
1828. *Cambrian Wreath, a selection of English poems on Welsh subjects* . . . including Welsh melodies, illustrated by T. J. Lewis. Printed by A. Aberystwyth, 1828.
The book contains no music; it is a collection of songs and poems in English, many being adapted to the Welsh melodies. The verses are by different authors.
1829. *Cambrian Harmony, being a collection of Welsh airs never before published, arranged as they were originally performed by the Ancient Britons* . . . by Richard Roberts, Dublin, for the author, and to be had at his residence, Carnarvon. Folio.
1839. *British Melodies, the composition of Master Hughes from the fourth to the ninth year of his age, with variations for the pianoforte, etc.* and a collection of Cambrian Melodies. Folio.
- 1839 and 1848. *The Welsh Harper, being an extensive collection of Welsh music, including most of the contents of the three volumes published by the late Edward Jones* . . . Also several airs from the publications of the late Mr. Parry of Rhuaabon . . . with many others never before published . . . by John Parry (Bardd Alaw). London, D'Almaine & Co. Folio, 2 vols.
The first volume, issued 1839, is a reprint from many of Jones's plates; the 2nd, issued 1848, is a miscellaneous collection from various sources.
1844. *Ancient National Airs of Gwent and Morgauwg, being a collection of original Welsh melodies hitherto unpublished, which obtained the prize at the Eisteddfod held . . . Oct. 1838. To which are added the words usually sung thereto. Collected and arranged . . . by M. Jane Williams, Llandovery. London, 1844. Folio.*
A valuable collection, independent of the earlier works; it contains forty-three airs which Miss Maria Jane Williams obtained from direct oral tradition.
1845. *The Cambrian Minstrel, being a collection of the melodies of Cambria with original words in English and Welsh, together with several original airs by John Thomas. Merthyr Tydfil, for the author, 1845. 4to.*
The preface gives a list of some forty songs noted by himself from four people.
- c. 1850-55. *A Choice Collection of Welsh Airs* by Edward Jones, Harper to his late Majesty King George IV. when Prince of Wales. Carnarvon. 4to.
Two editions; one contains twenty-five tunes, a later, forty-four taken from the original edition.
- 1850-64. *Gems of Welsh Melody. A selection of Popular Welsh Songs with English and Welsh words. Specimens of Penillion singing after the manner of North Wales and Welsh National Airs, ancient and modern, arranged by*

John Owen (Owain Alaw). London, large 4to. First series 1850, second series 1861, third series 1862, fourth series 1864.

A later edition, 1873.

1862-74. *Welsh Melodies with Welsh and English Poetry* . . . harmonised by John Thomas. Folio, 4 vols. First and second vols. 1862, third 1870, fourth 1874.

1873. *The Songs of Wales*, edited by Brinley Richards. London, Boosey & Co. 8vo. [Fourth edition, 1879; a later, 1884.]

1893. *Cambrian Minstrel*, edited by Dr. Joseph Parry. Edinburgh, 6 vols., large 4to.

1896. *Alawon y Ngwlad; Lays of My Land*, collected by N. Bennett of Llanvynafon. Folio.
A collection of traditional melodies.

1906. *The Minstrelsy of Wales, a collection of Welsh Songs, adapted to their traditional airs arranged . . . by Alfred Moffat. London, 8vo. Augener.*

1907, 1909. *Welsh Melodies*, edited by J. Lloyd Williams and Arthur Somervell (two books, Boosey & Co.), contains many of the best Welsh tunes, and several that have not previously been included in collections.

1908. *Welsh National Songs and Folk-Song*: a paper read before the Society of Cymrodorion, Jan. 22, 1908, by J. Lloyd Williams, D.Sc., Director of Music, University College of North Wales.

1909. *The publications of the Welsh Folk-Song Society.*
To the above list might be added many collections of Welsh airs compiled from the books above named; also many other publications by John Parry (Bardd Alaw), among which is his early work 'The British Piper,' two parts, circa 1800. Also his musical plays, 'A Trip to Wales' 1828, and 'The Welsh Girl,' 1833. In these some Welsh airs were used, as also in Attwood's opera, 'St. David's Day,' 1801.

F. K.

WELSH TRIPLE HARP, see HARP.

WENDLING, JOHANN BAPTIST (*b.* Alsace, c. 1720; *d.* Munich, Nov. 27, 1797), an excellent flautist, was first in the court chapel at Zweibrücken, and from 1754 in that at Mannheim. On the dissolution of the latter he followed the Elector to Munich. In 1771 he toured in Western Europe and also visited London. In Paris he appeared at the Concert Spirituel with his wife in 1751, 1752, 1780, and alone in 1778. He composed concertos, a trio, duets and sonatas for his instrument (list in *Q.-L.*). His wife, DOROTHEA SPOURN (b. Stuttgart, 1737; *d.* Munich, Aug. 20, 1811), was a great operatic soprano and a successful teacher. Her sister, AUGUSTE ELISABETH (*d.* Mannheim, 1794), wife of the violinist Karl Wendling, was likewise an excellent singer, engaged at the Mannheim Opera. She died at the early age of 34 from consumption. Her husband remained at Mannheim when the electoral chapel was transferred to Munich in 1778, but Johann Franz, a brother of Joh. Baptist, violinist in the chapel since 1747, remained in it on its removal (*Riemann; Q.-L.*).

WENNERBERG, GUNNAR (*b.* Lidköping, Oct. 2, 1817; *d.* Leckö, Aug. 22, 1901), a Swedish poet and composer, educated at the Upsala university. For many years he was a member of the Swedish legislature. As a musician he was entirely self-taught, and he published his first composition 'Frihetssånger' ('Songs of Freedom'), in 1847. This was followed by several works of which the best known is 'Gluntarne' (duets for male voices, descriptive of student life in Upsala). He subsequently wrote an oratorio entitled 'The Birth of Christ' and a Stabat Mater; and set the Psalms of David in a simple and melodious form for soli and chorus with accompaniment. These Psalms are universally popular in Sweden, and they are sung both in North Germany and Sootland. In 1867 he became a

member of the Swedish Academy. His collected writings appeared in four volumes, 1881-1885.

WERCKMEISTER, ANDREAS (b. Benneckenstein, Nov. 30, 1645; d. Halberstadt, Oct. 26, 1706), a clever organist and sound musician, devoted his energies to elucidating the difficult problem of the correct tuning of organs and claviers.

His *Musicae mathematicae Hodegus curiosus* in 1686 deals mathematically with everything used in the construction of music, with intervals, beats and temperament. This was followed by another mathematical work *Musikalische Temperatur*, in 1691. The comprehensive survey of Werckmeister's theories given in Mattheson's *Das forschende Orchestre*, 1721, shows the influence they exercised on his contemporaries.

As a composer Werckmeister is practically unknown, for although in the catalogues of new books published at Leipzig by Gross and at Frankfurt by Latomi in 1686, a volume of his compositions is announced: 'Andrea Werckmeister's musikalische Privatkunst, bestehend in Sonatinen, Allemanden, Cour, etc. Quedlinburg, Th. Ph. Calvisius,' no copy of it seems to be now in existence.

He was the son of Joachim Werckmeister. In 1658 he went to school at Benningen, his uncle Christian, the organist there, teaching him music. On Aug. 15, 1660, he joined the school at Nordhausen under the Rector Hildebrand, and at the end of two years entered the Gymnasium at Quedlinburg, where his uncle Victor Werckmeister occupied the position of cantor. On Dec. 24, 1664, he was appointed organist at Hasselfelde, Brunswick, where he remained for ten years. He refused posts offered to him at Elirich in 1670, and at Elbingen in 1674, but accepted one as Hoforganist at Quedlinburg in 1675.

He was twice married, first on July 16, 1667, to a wife who died in 1680, and again on Feb. 14, 1682; he had a family of two sons and four daughters. It was not until 1696 that he received his most important appointment, as organist at St. Martin's Church at Halberstadt, and as Inspector of all organs constructed in the principality of Halberstadt.

A detailed account of his life is to be found in the funeral oration given by Johann Melchior Goetzen, which was published in 1707 under the title *Der weitberühmte Musicus und Organista*, etc.

Hawkins says of Werckmeister in his *History of Music*:

'Mr. Handel, who was well acquainted with him, was used to speak of him in terms of great respect, and he was doubtless a learned and very skilful musician.'

Werckmeister published in 1699-1700 at Quedlinburg, a German translation of Agostino

Steffani's *Quanta certezza habbia da suoi principii la musica, et in qual pregio fosse perciò presso gli antichi* (Amsterdam, 1695). Under the title of D. A. Steffani . . . *Sendschreiben*, it was reissued with additions by J. L. Albrecht at Mühlhausen in 1760.

The list of his published works opens with the well-known *Orgelprobe*, on the construction, testing, and tuning of organs, of which there were several editions.

(1) *Orgelprobe oder kurze Beschreibung wie und welcher Gestalt man die Orgel-Werke von den Orgelmachern annehmen, probiren, unterrichten, und der Kirchen liefern könne und solle, benebenst einer kurzen jedoch gründlichen Unterricht wie durch Anweisung und Hülffe des Monochordi, ein Clavier wohl zu temperiren und zu stimmen sei*, etc. Frankfurt and Leipzig, 1681, 12mo.

Second edition: Andreas Werckmeisters Benck, Cheruscl, p.t. Musici und Organ, zu S. Martini in Halberstadt, erweiterte und verbesserte Orgel-Probe, oder: Eigentliche Beschreibung, etc. Jetzt von dem Autore selbst übersehen, etc. Quedlinburg. In Verlegung Th. Ph. Calvisii, 1698. 4to, 32 chapters, pp. 82.

Third edition: Quedlinburg und Aschersleben. In Verlegung G. E. Struntz, 1712, 4to, Gedruckt bey J. Th. Heinso, Waldenburg, 32 chapters, pp. 82.

Fourth edition: Leipzig, J. M. Teubner, 1754. 8vo, 32 chapters, pp. 110.

Another edition: Augsburg, J. J. Lotter, 1783. 32 chapters, pp. 112.

A Dutch translation was also published: *Orgel-Proof of nauwkeurige beschrijving, etc. uit het Hoogduitsche vertaald door Jacob Wilhelm Lustig*. T'Amsterdam, A. Olofsen, 1755. 12mo, pp. 151. Another edition, 1775.

(2) *Musicae mathematicae Hodegus curiosus, oder richtiger musikalischer Weg-Weiser, das ist, wie man nicht alleine die natürlichen Eigenschaften der musikalischen Proportionen, durch das Monochordum, und Ausrechnung erlangen, sondern auch vermittelst derselben, natürliche und richtige Rationes über eine musikalische Composition vorbringen könne*, etc. Von J. W. H. Zitziger Zeit Hof-Organisten zu Quedlinburg. Frankfurt und Leipzig. In Verlegung Th. Ph. Calvisii. Merseburg, gedruckt bey Christian Gottschicken, 1686. 4to, pp. 160. Another edition, 1698.

(3) *Der edlen Music-Kunst Würde, Gebrauch und Misbrauch, so wohl aus der Heiligen Schrift, als auch aus etlichen alten und neubewährten reinen Kirchen-Lehrern, und dann aus den Music-Gründen selbst eröffnet und vorgestellet von A. W. Stiffts-Hof-Organisten in Quedlinburg*. Frankfurt und Leipzig. Th. Ph. Calvisius 1691. 4to, 12 chapters, pp. 41.

Musikalische Temperatur, oder deutlicher und warer mathematischer Unterricht, wie man durch Anweisung des Monochordi ein Clavier, sonderlich die Orgel-Werke, Positive, Regale, Spinneten, und dergleichen wohl temperirt stimmen könne, etc. Frankfurt und Leipzig. Th. Ph. Calvisii, 1691. 4to, 34 chapters, pp. 121.

(4) *Hypomnemata musica oder musikalischen Memorien, welches bestehet in kurzer Erinnerung dessen, so bihero unter guten Freunden discurs-wise, insonderheit von der Composition und Temperatur möchte vorgangen seyn*, etc. Von A. W. Benicosteinelen Chorus; Jetziger Zeit bey der Haupt-Pfarr Kirche St. Martini in Halberstadt, bestallten Musico-Organisten. Quedlinburg, Th. Ph. Calvisius, 1697. 4to, 12 chapters, pp. 44.

Die notwendigen Anmerkungen, und Regeln wie der Bassus continuus, oder General-Bass wohl könne tractirt werden, und ein jeder, so nur ein wenig Wissenschaft von der Music und Clavier hat, denselben von sich selbst erlernen könne, etc. Aschersleben, 1698, 4to.

Another edition: Aschersleben, G. E. Struntz, Buchhändler, Waldenburg druckte Joh. Th. Heinso, 1715, pp. 75. *The Catalogue universel*, published at Leipzig, 1714-1715, calls this the second edition.

An undated edition: 'anlezoo merklich vermehret . . . durch Andreas Werckmeistern, M.u.O.z. S.M.I.H. Aschersleben, Verlegt G. E. Struntz.'

(5) A. W. Benck, Cheruscl, p.t. Musici und Organ, zu S. Martini in Halberstadt Cribrum musicum oder musikalischen Sieb, darinnen einige Mängel eines halb gelehrten Componisten vorgestellet, und das Böse von dem Guten gleichsam ausgesiebet und abgesondert wird, etc. Durch Johann Georg Carl, bestallten Stadt-Musicum in Halberstadt. Quedlinburg und Leipzig. Th. Ph. Calvisius, 1700. Jena, gedruckt bey Paul Ehrichen, 4to, 16 chapters, pp. 60.

Harmonologia musica oder kurze Anleitung zur musikalischen Composition, wie man vermittelst der Regeln und Anmerkungen bey den General-Bass einen Contrapunctum simplicem mit sonderbarem Vortheil durch drey Sätze oder Griffe componiren, und extempore spielen, etc.: wie man einen gedoppelten Contrapunct und mancherley Canones oder Fugas Ligatas, durch sonderbare Griffe und Vortheile setzten und einrichten möge, aus denen mathematischen und musikalischen Gründen aufgesetzt, etc. Durch A. W. Bencksteinelen Chorus, p.t. Organisten in der Haupt-Pfarr Kirche zu S. Martini in Halberstadt, Frankfurt und Leipzig, Th. Ph. Calvisius, 1702. Jena, gedruckt bey Paul Ehrichen, 4to, pp. 142.

Dietrich Buchtehde, the celebrated organist at Lübeck, a friend of Werckmeister greatly esteemed this work. (*Vierteljahrsschrift*, v. 673.)

(6) *Organum Gruningeense reditivum, oder kurze Beschreibung des in der Grünigischen Schloss-Kirchen berühmten Orgel-Werks, wie dasselbe anfangs erbauet und beschaffen gewesen: und wie es seitdem auf allergnädigsten Befehl Sr. Kön. Preussis. Majestät, renovirt und merklich verbessert worden*. Von A. W. Quedlinburg und Aschersleben. G. E. Struntz, 4to. The dedication is dated: 'Halberstadt, den 16 Augusti, 1705.'

(7) *Musikalische Paradoxal-Discourse, oder ungemeine Vorstellungen, wie die Musica einen hohen und göttlichen Ursprung*

habe, und wie hingegen dieselbe so sehr gemisbraucht wird, etc.: von A. W. musico und organ. zu S. Martini in Halberstadt, Quedlinburg. Th. Ph. Calvisius, 1707. 4to, pp. 130. Published after Werkmeister's death.

C. S.

WERNER, GREGOR JOSEPH (*d. Eisenstadt*, Mar. 3, 1766),¹ was Haydn's immediate predecessor as Kapellmeister to Prince Esterhazy, his appointment dating from May 10, 1728. In 1761 Haydn became vice-Kapellmeister, but Werner retained his place to the time of his death. He was a prolific and talented composer, who wrote 18 oratorios, over 40 masses, 3 Requiems and a large quantity of other church music, symphonies and sonatas for 2 violins and bass, a string quartet, 2 pastorellas for 2 violins, harpsichord and organ, etc. Haydn arranged six of his fugues for string quartet, adding an introduction to each, and published them through Artaria (*Mendel; Riemann; Q.-L.*).

WERNER, JOHANN GOTTLÖB (*b. Hayn*, near Leipzig, 1777; *d. Chemnitz*, July 19, 1822), was organist at Froburg, near Leipzig, 1798; deputy of Cantor Tag at Hohenstein, near Chemnitz, 1804, and from about 1819 cathedral organist and music-director at Merseburg. On account of the gout he retired with a pension, and lived the last years of his life with a married daughter at Chemnitz. He wrote a number of successful Tutors for the organ and the pianoforte, harmony and accompaniment, and several books of organ pieces (*Riemann; Q.-L.*).

WERRECORE (VERECOREN), HERMANN MATTHIAS (1523-55). One of the puzzling cases in which it is difficult to decide if there is more than one composer in question, and if so, how many. The above is a different person from Mattheus Le MAISTRE (*q.v.*), first heard of in 1554; but his identity with the 'Matthias Hermannus,' the 'Hermannus' and 'Matthias,' whose compositions appear in various collections between 1538 and 1569, although probable, remains undecided.

In the British Museum are the four part-books of Wolfgang Schmeltzel's collection of songs:

'Guter seltzamer, vñ künstreicher teutcher Gesang, sonderlich etliche künliche Quodlibet, Schlacht, vñ der gleichen, mit vier oder fünf Stimmen, blos her, im Truck nicht gesehen. Nürnberg J. Petreus, 1544.'

This contains the earliest known copy of Werrecore's descriptive composition, celebrating Francesco Sforza's victory in the struggle as to the fate of Milan. The music is simply written for four voices, soprano, alto, tenor and bass, without instrumental accompaniment, and is in three movements.

The appearance of Werrecore's composition in this work seems to require some explanation, for Schmeltzel was cantor or schulmeister in the Schottenkloster at Vienna; how did he hear of this piece of music, which could hardly have travelled so far afield?

¹ At the age of 66 according to his tombstone, but 71 according to the parish register.

Dr. Elsa Bienenfeld answers this question in her able paper² on Schmeltzel's Liederbuch; the connecting link is formed by Conrad Weichselbaum, a keen fighter, who had been through the campaign which culminated in the battles of Biococca and Pavia. He was afterwards, 1528-42, Abbot of the Schottenkloster in Vienna, and would come into touch with Schmeltzel, who was certainly working there before 1540. In all probability Werrecore composed the music soon after his return from the war; it is here called 'Die Schlacht vor Pavia.' In each of the partbooks this is followed by the words, 'Matthias Herman Vereciensis, qui et ipse in acie quaeque miserrima vidit, me obiter composuit' (Matthias Herman of Vereco, who was himself in the ranks and witnessed the utmost of the disaster, composed this on his way). The term Vereciensis led Eitner to assume that Verecore or Werrecore was the composer's native place, and that either Matthias or Hermann was his surname,³ but it will be seen that in every other instance the word Verecore is used as a surname, and though this of course does not prevent its being derived from the name of a birthplace, it is a curious thing that in spite of many plausible suggestions no town with a similar name has yet been discovered.

In 1549 the same composition was published under the title:

'La Battaglia Italiana composta da M. Mathias Flamengo maestro di capella del domo di Milano, con alcune Villotte piacevole novamente con ogni diligenza stampate e corrette. A quatro voci. In Venetia apresso Antonio Gardane, 1549.'

The four partbooks are in the Wolfenbüttel herzogl. Bibl. Gardane in writing the dedication says:

'Hora ho deliberato meco stesso d' indirizzare a lei una battaglia Italiana, composta dall' eccellente M. Mathias e ho voluto aggiungere alcune altre compositioni,' etc.⁴

A second edition ('ristampate & corrette. Aggiuntovi anchora una Villotta alla Padoana con quatro parte. A quatro voci') was published by Gardane in 1552; there is a complete copy in the Munich Library. An anonymous composition⁵ in three movements for four voices, found in a manuscript Cantional of the year 1558, and inscribed 'Confictus ad Ticinium,' was probably Werrecore's *Battaglia Italiana*; it began with the same words 'Signori e cavalieri,' etc. Muoni, in his list of *Maestri di cappella del duomo di Milano* (1883), states that, Jan. 5, 1523, 'Armanno Verecore detto Maestro Matthias fiammingo' was elected with a monthly salary of 12 lire, that he reorganised the cappella, which started on its new footing on Dec. 9, 1534. The next maestro is not mentioned before 1558, in that year,

² See *Sammelbände* of the Int. Mus. Ges. vi. 1904-05.

³ As evidence that the family name existed, Van der Straeten (*Pays-Bas*, vii. 148) refers to a Pieter Werrecoren, printer at Sint-Martensdijk, Zealand, in 1478.

⁴ Parisini, *Cat. Bibl. Liceo Musicale*, Bologna, iii. 243.

⁵ See Becker's *Hausmusik in Deutschland*, 1840, p. 14.

therefore, Werrecore was no longer in possession of the post.

His only other complete work was published in 1555:

'Cantuum quinque vocum (quos motetta vocant) Hermann Matthiae Werrecoren musici excellentissimi liber primus. Nunc primum in lucem editus. Mediolani apud Franciscum et Simonem Moschenios.'

The five partbooks are in the Hamburg Stadtbibliothek. Haberl (*M.f.M.*, 1871-72) described them and their contents in his excellent article on 'Matthias Hermann Werrecorensis' and gave Werrecore's dedication in full, also the score of the two movements of the motet 'Popule meus' (see the *Musikbeilage*). He states that the work is a most beautiful specimen of 16th-century music-printing. Two of the motets, 'O altitudo divitiarum' and 'Veni sancte spiritus,' are in manuscripts dated respectively 1573 and 1571, in the Proske Library. It will be noticed that this work was published at Milan. This alone would make one hesitate as to the identity of Le Maistre and Mathias Fiammengo, which was assumed by Fétis (*Biog. univ.*) and by Otto Kade (*Matheus Le Maistre*, 1862) and leads to the theory that Mathias left Milan in 1554 to fill the post of Kapellmeister at Dresden. For nearly all Le Maistre's works were published at Dresden; and Kade, after giving a facsimile of a receipt for the 'Gesangbücher meines gnädigsten Herrn Hertzogen Augusts,' signed Matheus Le Maistre and written after his appointment as Kapellmeister at Dresden on Oct. 7, 1554, adds that Le Maistre never varied from this signature; in no case had he found in his writing or in his printed works anything signed by his Christian name only. From this it seems justifiable to conclude that the single compositions by 'Matthias' already alluded to were by Werrecore and not by Le Maistre. Kade in his work published the first part, in score, of 'La Bataglia,' assuming that Matthias, the composer, was Le Maistre; although, in his admirable account of the music, he repeatedly accentuates the difference in quality between this and everything else afterwards composed by Le Maistre, and also notices that the three Villotte included are totally different from his later style.

There is an interesting little allusion to Werrecore in Petrus Schoeffer's edition of *Cantiones quinque vocum selectissimae*, Argentorati, 1539. In the dedication Schoeffer mentions the valuable thesaurus of songs sent to him from Italy by Hermann Matthias Verrecoren, the learned master of music in the Cathedral of Milan:

'Jam vero tandem praeter spem quidem, ut non sine felici quodam auspicio thesaurus cantionum summi pretij ex Italia ad me perlatus est, quem D. Hermannus Mathias Verrecoren negocij musici primariae Ecclesiae Mediolani magister, vir, praeter alias virtutes, in ea arte maximopere doctus, nuper ad me misit,' etc.¹

¹ See Parisini's *Catalogo*, II. 359.

The following works are those containing compositions under Werrecore's name:

1. 'Selectissimae neonon familiarissimae Cantiones. Augsburg, Kriesteln. 1540.' No. 1, Sex vocum: 'Congregati sunt.' Ad aequales voces. By 'Hermann Matthias Verrecoren.'
2. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
3. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
4. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
5. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
6. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
7. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
8. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
9. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
10. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
11. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
12. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
13. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
14. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
15. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
16. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
17. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
18. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
19. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
20. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
21. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
22. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
23. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
24. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
25. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
26. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
27. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
28. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
29. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
30. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
31. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
32. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.

69. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
70. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
71. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
72. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
73. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
74. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
75. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
76. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
77. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
78. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
79. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
80. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
81. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
82. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
83. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
84. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
85. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
86. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
87. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
88. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
89. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
90. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
91. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
92. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
93. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
94. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
95. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
96. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
97. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
98. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
99. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.
100. 'Her. Math. Wer.' No. 47, Quinque vocum, 'Ne vous chaille.' Ad aequales voces.

Compositions by 'Matthias' will be found in the second and fourth book of motets published by Attaignant in Paris, 1534; in the third book of motets, 'Motetti del fiore' (Lugduni, Modernus, 1538 and 1542); and in the third book, 'Selectissimarum sacrarum cantionum' (Lovanii, Phalesius, 1569). Also in 'Il primo libro dei madrigali di Maistre Jhan,' 1541, and in 'Il primo libro di madrigali d' Archadelt,' 1559, but it is doubtful if this Matthias is to be identified with Werrecore. A Motet for five voices, 'Surrexit pastor bonus,' by 'Hermannus,' is in the 'Secundus tomus novi operis musici, 6, 5 et 4 vocum' (Noribergae, J. Otto, 1538), and this might possibly be Werrecore's work. Manuscript copies of it are in the Breslau Library, dated 1573.

It is generally thought that the two settings of 'Mein hertz und gmüt' for five voices, by Mathias Hermanus in G. Forster's work, 'Der fünfte Theil schöner, frölicher, frischer, alter und neuer deutscher Liedlein,' Nürnberg, 1556, were composed by Werrecore. C. S.

WERT, GIACHES DE (JACHES WERT), or as he more usually signs himself in his works, Giaches Vuert (b. ? Antwerp c. 1536; d. Mantua, May 23, 1596), madrigal composer, was sent to Italy at a very early age as a chorister in the house of Maria di Cardona, Marchese della Padulla, and when 9 years old became a member of the Novellara choir formed by Alfonso Gonzaga of Reggio.

Thirteen years later he published the first of his long series of volumes of madrigals, and must have taken up his residence in Mantua very shortly afterwards. His musical work in Mantua was principally in connexion with the church of Santa Barbara; he is known to have composed music for the celebration of a church festival in Oct. 1564, and in 1565 he succeeded Giovanni Contino as maestro di cappella there; to this was added the position of composer and maestro di cappella to the Duke Guglielmo Gonzaga, a post he retained until his death.

Canal's work, *Della musica in Mantova*, 1881 (see also Haberl's paper in the *Kirchenmusikalisches Jahrbuch*, 1886), throws a good deal of light on the details of Wert's life in Mantua, and on the various small journeys that he made.

From July 3 to Sept. 19, 1565, he obtained leave of absence in order to visit 'la casa sua' at Novellara, where his wife was still living. In the spring of 1566 he accompanied the Duke of Mantua to Augsburg, where the Italian and German princes had been convoked by the Emperor Maximilian II. to decide on defensive measures against Soliman and the Turks. Wert's musical gifts received general recognition, and the Emperor wished him to remain in his service, but Wert declined the offer and returned to Mantua in the autumn. On Feb. 3, 1567, another journey was made in the company of the Duke and other personages to Venice. Wert also passed some time at the court of Ferrara; he makes reference to this in dedicating the eighth volume of his madrigals (1586) to Alfonso II. of Ferrara.

Wert's residence at Mantua does not appear to have been altogether peaceful, although on July 1, 1580, his long and faithful services were recognised by the presentation of the freedom of the city to him and his heirs for ever, and by the gift of a large sum of money. A letter of his, written from Novellara, on Aug. 27, 1567, contains bitter complaints of the intrigues and annoyance to which he was subjected by Italian musicians owing to his being a foreigner; and another, addressed to the Duke, dated Mar. 27, 1570, makes a more specific complaint as to the relations of one Agostino Bonvicino with Wert's wife; Bonvicino eventually was dismissed from the ducal capella. Another letter, quoted by Haberl, was written by Alfonso of Novellara, on Jan. 3, 1568, and asked for the loan of Wert for a few days to prepare singers and players for the performance of the *Intermedii* in a *Commedia* he had just written.

Duke Guglielmo Gonzaga, a great lover of music, was a personal friend of Palestrina, whom he met in Rome in 1572, and with whom he had been previously in correspondence. This probably brought Palestrina into touch with Wert, with whose music he was at any rate familiar, for in writing to the Duke in Feb. 1568, he referred to Wert as 'un virtuoso veramente raro.'

Theoretical writers contemporary with Wert and those writing early in the following century, find nothing but praise for his musicianship and especially for his skill in counterpoint. Under the name of Jacques de Vert he appears in Thomas Morley's *Plaine and Easie Introduction*, 1597, among the 'Practitioners, the moste parte of whose works we have diligently perused, for finding the true use of the Moods.' Artusi mentions Wert in his treatise *Delle imperfettioni della moderna musica*, 1600, p. 42; and Zacconi (*Prattica di musica*, 1622, p. 130) writes:

'To ho cognosciuto quatro musici singolarissimi ne contrapunti, Costanza Porta, Jaches Vuert, . . . Jaches Vuert venne anch' egli in detta professione altro tanto singolare; perche essendo egli maestro di cappella di Guglielmo, serenissimo duca di Mantova,

facendo detto duca professione di musico, e componendo molte cose, lo tenea sguagliato sì, nelle cose de sudetti contrapunti, che bene spesso come dire il proverbio li faceva sudar il fronte,' etc.

Again G. B. Doni (*Annotationi*, 1640, p. 141) refers to Wert's madrigal for three voices 'Qual dall' usato,' 'il quale è mirabilmente soave.' Another interesting reference to Wert is to be found in the preface to the fine volume of sacred music by Francisco Sale, of which a copy is in the British Museum, the 'Tomus I. Missarum solenniorum,' published by Adam Berg at Munich in 1589. The passage is as follows:

'Aut aliquo intervallo, ad quintam puta, vel altiore vel demissiore, qua in re doctissimum nostram aetate musicum D. Jacobum Werthium, Belgam, utrumque imitari libuit, qui jam olim in comitiis Augustanis, coram divi Maximiliani Caesaris, et aliorum principum musicis, cum summa omnium admiratione ejus artis specimen ex tempore dedit.'

Nearly every collection of either sacred or secular music from 1564 up to the middle of the 17th century contained compositions by Wert. Although the earliest known edition of Wert's madrigals for four voices, of which there is a copy in the Munich Library, is dated 1561, one of the most popular madrigals in it had already been included in the 'Secondo libro delle muse a quattro voci,' Roma, 1558, 'Chi salira.'¹ In the same way, although Wert did not publish his first book of motets for five voices till 1566, the 'Motetta de Cipriani de Rore et aliorum auctorum quatuor vocibus,' Venice, 1563, contained 'Diligite justiciam' by Jaches de Vuerth. The fine motets 'Egressus Jesus' for seven voices, and 'Transeunte Domino' for five voices, were published in Joannellus's 'Novi thesauri musici,' 1568; these have been reprinted by Commer ('Collectio operum mus.,' vols. ii. and iv.), but with the composer's name given as Jaches Vaet. In Stafford Smith's 'Musica antiqua,' i. p. 92, will be found 'Virgo Maria hodie,' scored from Wert's first book of motets for six voices, 1581, and in S. W. Dehn's 'Sammlung älterer Musik,' vi. Lieferung, 1836, the six-part motet 'Quiescat vox tua a ploratu.'

LIST OF WORKS

1558. Il primo libro de madrigali a cinque voci. Venetia, Scotto. Dedicated to Alfonso Gonzaga. Other editions were published by Gardane at Venice in 1564, 1571, and 1583.
1561. Il primo libro de madrigali a quattro voci di Jaches de Wert. Venetia, Scotto. Dedicated to the Marchese di Pescara. Other editions were published by Gardane in 1562, 1564, 1570 and 1583.
1561. Il secondo libro de madrigali a cinque voci. Venetia, Scotto. Dedicated to Ottavio Farnese, Duca di Parma e Piacenza. Reissued by Gardane in 1564, 1571, 1575 and 1596. Scotto also published both this and the first book with the title of 'Madrigali del fiore,' in 1561.
1563. Il terzo libro. Published by Gardane, and again in 1572 and 1592. The dedication to Consalvo Fernandez di Cordova, Duca di Sessa, states: 'havendomi V. E. degnata del governo di sua cappella e del nome di suo creato,' etc.
1567. Il quarto libro. Gardane, and in 1568 and 1583. Dedicated to Guglielmo Gonzaga, Duca di Mantova.
1571. Il quinto libro de madrigali a cinque, sei et sette voci. Gardane, and in 1580. Dedicated to the 'Signori academici di Verona detti Filharmonici . . . protettrici et amichi della musica.'
1577. Il sesto libro. Scotto, and in 1584 and 1592. Dedicated to the 'Principe di Mantova et Monferatto, mio signore.'
1581. Il settimo libro. Gardano. Dedicated to Margherita Farnese Gonzaga, Principessa di Mantova, with the date 'Di Mantova il 10 di Aprile, 1581. Jaches Vuert.'
1586. L'ottavo libro. Gardano, and in 1596. The dedication to

¹ Republished by W. Barclay Squire as No. 19 of 'Ausgewählte madrigale,' No. 40 of the same series is 'Un jour je m'en allai' from Wert's 'Primo libro delle canzonette' (1559).

the Duca di Ferrara states that many of these madrigals were composed in Ferrara, and mentions 'Tanti altri eccellenti & musici & cantori, che sono nella sua numerosissima & perfettissima cappella' and the 'Si rare qualità della tre nobilissime giovanotte della sereniss. Signora Duchessa di Ferrara.

1588. Il nono libro. Gardano. Dedicated to Vincenzo Gonzaga, Duca di Mantova & Monferrato.
1591. Il decimo libro. Gardano. Dedicated to Donna Ines d'Argotti Caretta, Marchessa di Grana, dated from Venice, Sept. 10, 1591, signed Glaches Vuert.
1595. L' undecimo libro. Gardano, and in 1600. The dedication to Francesco Gonzaga, Principe di Mantova, has the following passage referring to Wert's age: 'Vecchio però tanto che non isperi di poter consacrare a suo tempo qualche nuovo lavoro anche ad un figlio di Francesco, come n' ha consacrato all' avo, al padre, e alla madre; sicche ad ogni modo non doveva essere più là dal sessant' anni, perchè al principio non ne aveva che nove.'
1596. Jaches Wert musici & livellissimi ac chori illustres, et excellentes. Duca Mantuae magistri musices, vel ut dicunt motetorum quingue vocum liber primus. Venetis, 1596, apud Claudium Coreglatium et Faustum Bethanum Socios. The dedication to Guglielmo, Duca di Mantova, is signed Glaches de Vuerst. A later edition was published at 'Noribergae apud Theodoricum Gerlatzenum, 1599. This work with the two books following was included in the collected edition of 1593.
1581. Modulatum cum sex vocibus liber primus. Venetis apud haerodem Hieronymi Scotti, 1581. Dedicated to the Prince Cardinal Alessandro Farnese.
1581. Di Jaches de Wert il secondo libro de motetti a cinque voci. In Vinegia appresso l' herede di Gir. Scotti. 1581.
1583. Jaches Wert musici & livellissimi modulatum sacrum quingue et sex vocum libri tres, in unum volumen redacti. Noribergae excudebant Catharina Gerlachin & haeredes Johannis Montani, 1583. In six separate part-books.
1589. Il primo libro delle canzoni, Villanelle a cinque voci. Venezia, 1589. Dedicated to Leonard Medici Gonzaga, Duchessa di Mantova, and dated from 'Venetia il 20 Genaro, 1589.' This work includes three French, two Spanish compositions and one Greek.
1552. Janna musci beatissimi quam vocibus quator decantavit Glaches de Wert. Typis reuclit Joannes Reunerus acad. Regimontanae typogr. anno 1653. 'Sunt summe beati,' in four separate part-books in the Königsberg Library.

MANUSCRIPTS

- Augsburg Library.—Seven motets.
- British Museum.—Add. MS. 12,532, madrigals for five and six voices. Add. MSS. 31,407 and 31,412, 'Io non son pero' for five voices. Add. MS. 31,992, i. 67b, in lute tablature 'Speremus meliora.'
- Basil Library.—'Egressus Jesus,' in German organ tablature, written about 1593.
- Breslau Stadtbibliothek.—Motets for five, six and seven voices, including 'Egressus Jesus' and 'Transiente Domino.'
- Brief Library.—MS. 49, dated 1579, 'Egressus Jesus'; MS. 28, 'Speremus meliora' for five voices.
- Dresden State Library.—'Angelus domini' for five voices.
- Frankfurt Gymnasium-Bibliothek.—'Egressus Jesus.'
- Grimma Library.—Four motets.
- Leipziger Literatur-Anstalt.—Motets for five and seven voices.
- Milan Conservatory Library.—A. M. for five voices, and another for six voices, inscribed with Wert's name.
- Modena Bibl. palatina.—Some of Wert's compositions arranged for one or two voices with lute accompaniment.
- Munich State Library.—Motets, some in organ tablature, and two madrigals.
- New York Library.—'Ninfe' madrigal for six voices, by Glaches de Vuert.
- Nuremberg Lorenzskirche Bibliothek.—In MSS. dated 1582, three motets for five voices.
- Prose Library.—Fifteen motets.
- Vienna Royal Library.—MS. 16,704, 'Transiente Domino,' and in MS. 16,705, 'O sacrum convivium,' motets for five voices.
- Zwickau Library.—Five motets for five voices. C. S.

WERTHER, lyric drama in 4 acts (after Goethe), text by Edouard Blau, Paul Milliet and Georges Hartmann; music by Massenett. Produced Imperial Opera, Vienna, Feb. 16, 1892; Paris, Opéra-Comique, Jan. 16, 1893; New York, Apr. 19, 1894; Covent Garden, June 11, 1894; in English, His Majesty's Theatre (Beecham), May 27, 1910.

WESLEY, (1) CHARLES (b. Bristol, Dec. 11, 1757; d. May 23, 1834), son of the Rev. Charles Wesley and nephew of the celebrated Rev. John Wesley. His musical instinct displayed itself in early infancy, and at 2½ years old he could play 'a tune on the harpsichord readily and in just time,' and 'always put a true bass to it.' He was taken to London, and Beard offered to get him admitted as a child of the Chapel Royal, but his father declined it, having then no intention of educating him as a musician. He

was also introduced to Stanley and Worgan, who expressed themselves very strongly as to his abilities. After receiving instruction from Kelway and Boyce, to the latter of whom he dedicated a set of string quartets and upon whose death he wrote a hymn, beginning 'Father of heroes,' he embraced music as his profession, and became an excellent performer on both organ and harpsichord. He held at various times the appointment of organist at South Street Chapel, Welbeck Chapel, Chelsea Hospital and St. Marylebone Church. Having attained to a certain degree of excellence as a performer he made no further progress. He composed a set of 'Six Concertos for the Organ or Harpsichord, op. 1,' a set of Eight Songs, a Concerto grosso, 1784, some anthems (one printed in Page's 'Harmonia Sacra'), music for 'Caractacus,' a drama, and other pieces.

His younger brother (2) SAMUEL (b. Bristol, Feb. 24, 1766; d. London, Oct. 11, 1837), although also a precocious performer, did not develop his faculties quite so early, for he was 3 years old before he played a tune, and did not attempt to put a bass to one until he had learned his notes. He proved to be, notwithstanding, the more gifted of the two brothers. (See *Mus. T.*, 1902, p. 524.) From his cradle he had the advantage of hearing his brother's performances upon the organ, to which, perhaps, his superiority might be partly ascribed. Before he was 5 years old he learned to read words by poring over Handel's oratorio, 'Samson,' and soon afterwards learned, without instruction, to write. When between 6 and 7 years of age he was taught to play by note by David Williams, a young organist of Bath. Before then (Sept. and Oct. 1774) he had composed some parts of an oratorio, 'Ruth' (now in B.M. Add. MSS. 34,997), which he completed and penned down when about 8 years old, and which was highly commended by Dr. Boyce. About the same time he learned to play the violin, of which he became a master, but his chief delight was in the organ. He was now introduced into company as a prodigy, and excited general admiration.¹ The brothers gave concerts in their house in London from 1779.² In 1777 he published 'Eight Lessons for the Harpsichord,' and about the same time appeared an engraved portrait of him when 8 years old. Before he attained his majority he had become a good classical scholar, acquired some knowledge of modern languages, successfully cultivated a taste for literature, and obtained distinction as an extemporaneous performer upon the organ and pianoforte.

In 1784 he joined the Roman Catholic Church. In 1787 an accident befell him, the consequences of which more or less affected him during the remainder of his life, and from which

¹ See the Hon. Daines Barrington's *Miscellanies*, 1781, p. 291.

S. S. WESLEY

From a painting by W. R. Briggs, R.A., in the Royal College of Music

undoubtedly sprang those erratic and eccentric habits for which he became remarkable. Passing along Snow Hill one evening, he fell into a deep excavation prepared for the foundation of a new building, and severely injured his skull. He refused to undergo the operation of trepanning, and suffered for seven years from despondency and nervous irritability, which occasioned him to lay aside all his pursuits, even his favourite music. On his recovery he resumed his usual avocations, and became acquainted with the works of John Sebastian Bach, the study of which he pursued with enthusiasm, and to propagate a knowledge of which among English musicians he laboured assiduously. (See *BACH GESELLSCHAFT*.) During 1808 and 1809 he addressed a remarkable series of letters to Benjamin JACOB (*q.v.*) upon the subject of the works of his favourite author, which was edited by his daughter, and published in 1875.¹ In 1810 he put forward, in conjunction with C. F. Horn, an arrangement of Bach's organ trios, and in 1813 an edition of the 'Wohltemperirtes Clavier,' and promoted the publication of an English translation of Forkel's *Life of Bach* (1820). (See *FORKEL*.)

In 1811 he was engaged as conductor and solo organist at Birmingham Festival, and lectured at the Royal Institution and elsewhere. In 1816 he suffered a relapse of his malady, and was compelled to abandon the exercise of his profession until 1823, when he resumed his pursuits until 1830, becoming in 1824 organist of Camden Chapel, Camden Town; but a further attack again disabled him, and he was afterwards unable to do more than make occasional appearances. One of his latest public performances was at the concert of the Sacred Harmonic Society on Aug. 7, 1834, when at the organ he accompanied the anthem, 'All go unto one place,' which he had composed upon the death of his brother Charles. His actual last appearance was at Christ Church, Newgate Street, on Sept. 12, 1837. He had gone there to hear Mendelssohn play upon the organ, and was himself prevailed upon to perform. He died within a month afterwards, and was buried Oct. 17, in the vault in the graveyard of Old St. Marylebone Church, in which the remains of his father, mother, sister and brother had been previously deposited.

Wesley was indisputably the greatest English organist of his day, and both in his extemporaneous playing and in his performance of the fugues of Bach and Handel he was unrivalled. His compositions were numerous and varied, and some are of the highest excellence. His instrumental music shows that he was to a certain extent a pioneer of the symphonic style in England, but it has sunk into oblivion. He is remembered by a few of his choral works, notably the motets, of which one, the noble

eight part 'In exitu Israel,' still receives fairly frequent performance in English cathedrals and elsewhere even in the 20th century. S. Wesley's religious tenets have been matter of doubt. At a late period of his life he disclaimed having ever been a convert to Rome, observing that 'although the Gregorian music had seduced him to their chapels, the tenets of the Romanists never obtained any influence over his mind.' But the letter from Pope Pius VI. in acknowledgment of a Mass (now in B.M. Add. MSS. 35,000) is direct evidence that he had joined that Church. He left several children; his eldest son, Rev. Charles Wesley, D.D. (b. 1795; d. Sept. 14, 1859), was sub-dean of the Chapel Royal, and editor of a collection of words of anthems. An obituary notice appeared in the *Gentleman's Magazine* of Nov. 1837; see also *D.N.B.* and *Mus. T.*, 1902, pp. 524 ff. and 798. A list of the MSS. in the B.M. relating to him and containing his works is given in *D.N.B.* The following list of his compositions was compiled with the assistance of his daughter, Miss Wesley.

Those marked with * are published.

Oratorios. Ruth (composed at 8 years old). Death of Abel. Parts 2 and 3 complete.

Masses. Missa solemnis (Gregorian) for voices only; Missa, Kyrie eleison; Missa de S. Trinitate; Missa pro Angelis.

Motets. *In exitu Israel c. 8; *Exultate Deo, a 5; *Dixit Dominus; *Omnia Vanitas; Tu es Sacerdos; Te decet hymnus; Hosanna in excelsis; Domine saluum fac (org. oblig.), all a 4; Confitebor for soli, chorus, and orchestra; *IV. in Nativitate Domini; V. VI. VII.; VIII.; IX.; X. in Epiphania; XI.; XII. in Festo Corporis Christi; XIV. in Epiphania; XVI. Ad Benedictum, for Corpus Christi; XVII. XVIII. in Festo Corp. Christi; Dixit Dominus; Salve Regina; Ad Magnificat; Qualem sinistrum; Agnus Dei, in D (1813); Agnus Dei (1812); Hymnus in Festo Ascensionis, Versus 3 de 2a, cxxvii. Ave Maria Stella (1786); Salve Regina; Magna opera; Omnes gentes. Deus Majestatis for double choir with accompaniment of strings and organ, dated Sept. 26, 1799; autograph in the collection of Dr. W. H. Cummings.

Services. *Morning and Evening Church Service in F a 4; also Te Deum, Sanctus, Kyrie, Nunc Dimittis and Burial Service a 4; Jubilate Deo; Sanctus in F.

Anthems. *All go unto one place, Funeral Anthem for Charles Wesley; *I am well pleased; Behold how good (org. oblig.); *Thou O God, art praised; Who can tell? (July 4, 1823); Hear, O Thou Shepherd; Be pleased, O Lord; I will take heed.

Choruses. My delight (Apr. 11, 1816); *Thus through successive ages; On the death of W. Kingsbury (1782); Why should we shrink? (Orch. May 1818).

Parochial Psalm-tunes, with Interludes, *Bk. I. only; Chorals or Psalm-tunes, 600 or more.

Ode on S. Cecilia's Day, for soli, chorus and orch. Words by Rev. S. Wesley.

Glees. For 4 voices—Circle the bowl; *O sing unto my roundell (Madr.); No more to earth; Now the trumpet's (1815); While every short-lived (1822); *Father of Light; Here shall the morn; Join with thee. For 3 voices: Thou happy wretch; These are by fond mama (1778); Harsh and unkind (1783); *Goosey, goosey, gander (1811); Adieu, ye sea; When Orpheus went down; When first thy soft lips (1783); What bliss to live (1807); When Friendship; On the Salt Wave, (1793); Roses their sharp spines (1822); Say can power (1791); The rights of man; Elusethi mio (est. dated Jan. 17, 1807. Autograph in the collection of Dr. W. H. Cummings).

Duets. Beneath a sleeping infant lies; Belle Gabrielle (1792); Since powerful love (1783); Sweet constellations (1782).

Songs. *True Blue; Within a covenant; England, the spell; Gentle warbling (1798); What shaft of Fate's relentless power; In gentle slumbers; Farewell, if ever fondest prayer; Think of me; Behold where Dryden; Louisa, view; *Come all my brave boys; Election squire; *The House that Jack built; *Love and Folly; *The Antophagos; Adieu, ye jovial youths (1783); The world, my dear Mira (1784); Yes, Daphne! (1781); When we see a lover languish (1783); Too late for redress (1783); Pale mirror of resplendent night; Love's but the frailty; Oh, how to bid; Parting to death (1783); The white-robed hours (1783); Armin's lamentation (1784); Flitting spread (1789); Might I in Thy sight appear (1807).

Symphonies. in D (1784); in E \flat (1784); in B \flat (1802); in A; in D, unfinished.

Overtures. in D (1778); in C (1780); in D; *to the 2nd Act, unfinished.

Organ Concertos. in E \flat (1776); in D (1781); in G (1782); in B \flat (1785), on Rule Britannia; in G; in B \flat ; in E \flat ; in G; in C; in D (hornpipe).

Grand Duets. *No. 1; Do. No. 2; *Do. in 3 movements, insc. to F. Marshall.

¹ See *Mus. T.*, 1902, pp. 798 ff.

Voluntaries. In D, in C, in C minor, in C, in E \flat , in G minor, in F, in C (all in * op. 6); *Do, in G, in D, in D, in A, in F; *3 Voluntaries ded. to W. Harding; a 2nd set of do.; *6 Voluntaries for young Organists; *One do. insc. to Thos. Atwood; *Do, in G minor insc. to W. Linley; *Do, in G, insc. to H. J. Gauntlett; *One do. insc. to W. Drummer, Esq.; *A 2nd in D, insc. to the same; *Easy Voluntaries; *6 do.; *A short and familiar Voluntary in A; *12 short pieces with full Voluntary added; *12 short pieces with Grand Fugue; *A Book of Interludes; *Fugue in D; *Preludes and Fugues or Exercises; *6 Introductory movements, and Fugue in D; *Characteristic airs for the Seraphine; Concerto in D for Organ and Violin (1800). Many of these have been reprinted, some adapted for pedal organ.

Piano-forte. *Eight lessons (1777); *Duet March in D, No. 25; 3 Sonatas, op. 3; 4 Sonatas and 2 Duets, op. 5; Sonata with fugue on subject of Solomon's; 2 Sonatas for P.F. or Harpsichord with acc. for Violin, op. 7; *Sonatas, ded. to Miss Meeke; *Do, on air in Tekeli, in G; Rondo in D, Of she goes; *Do, in D, Lady Mary Douglas; Do, Fly not yet; Orphan Mary; Patty Kavanagh; The young May moon; *Do, in G minor, Kitty alone and I; *Do, in A, I attempt from Love's sickness; Do, Will Putty; *Bellissima Signora; *Pastorella Polacca; *Do, the Lass of Richmond Hill; Do, in D, Old Towler; *Do, from an Organ Concerto; *Do, on Polish Air, in D minor; *Do, in G; *Bay of Biscay (B \flat); *Christmas Carol (E min.); *Moll Pately (in F); *Widow Waddle (in A); *La Mèlange; *Coats who has; *The Deserter's Meditations; *A favourite Air from 'Der Freischütz'; *Jacky Horner, with Flute; Adagio, March, and Waltz; *Duet in 'La cosa rara'; Divertimento, ded. to Miss Walker; *Siege of Badajoz, with March in D; Rondo in A (1778); Waltz, the Skyrocket; *Do, the Coburg; Intro. and Air, insc. to Mrs. Stirling; Sweet Evening, with Violin; *Horripant and variations with Intro.; *Variations on a fav. Italian air, in F; *Grand Fugue with March from Ode on S. Cecilia's Day; Grand Coronation March; *Do, in D; New March as performed on Parade; Preludes throughout the 8ve both major and minor; *Fugue, insc. to J. B. Logier.

Singing Quintet, in D, Fugue in B \flat (1800). *Quartet* (1780); Do. (1799). *Trio*, Aria for Strings, for Oboe, Violin and Violoncello; for P.F. and 2 Flutes; for 3 P.F.s. *Duet*, Violin and Violoncello. *Sonata* a Violino Solo, in A. *Solo* per Violino e Basso. *March*, Corni, Oboi, Bassoni, Serpent (1777).

W. H. H., adms.

(3) SAMUEL SEBASTIAN, Mus.D. (b. Aug. 14, 1810; d. Gloucester, Apr. 19, 1876), natural son of the above, whose genius he inherited. In his 10th year he was elected chorister of the Chapel Royal, St. James's; in 1826 organist at St. James's, Hampstead Road; in 1829 organist of St. Giles's, Camberwell, of St. John's, Waterloo Road, and in 1830 of Hampton-on-Thames, holding three of these appointments simultaneously. During these early years he had some experience as a theatrical conductor¹ and purveyor of incidental music.

In 1832 he became organist of Hereford Cathedral, conducting the festival there in 1834 (see THREE CHOIRS FESTIVALS), and a year later marrying the sister of Dean Merewether, when he migrated to Exeter, and remained at that cathedral for six years, during which period his reputation as the first English church composer and organist of his country became established. In 1839 he accumulated the degrees of Mus.B. and Mus.D. at Oxford. In 1842 he was induced by a good offer from Dr. Hook to accept the organistship of Leeds Parish Church. He had played at the opening of the organ in Oct. 1841; according to the Parish Church records he was engaged in 1839, but the *Leeds Intelligencer* of Oct. 16, 1841, speaks of the post as then vacant. During his tenure of the post he delivered lectures at the Liverpool Collegiate Institution. He wrote his famous service in E, and sold it in 1845 to Martin Cawood, an ironmaster, to whose wife he dedicated a set of satirical 'Jeux d'Esprit: Quadrilles à la Herz' in 1846. In 1844 he was a candidate for the professorship of music in the University of Edinburgh, then vacant by the resignation of Sir Henry Bishop.

¹ See *Mus. T.*, 1900, pp. 298-99.

Among Wesley's testimonials on that occasion was the following from Spohr:

'His works show, without exception, that he is master of both style and form of the different species of composition, and keeps himself closely to the boundaries which the several kinds demand, not only in sacred art, but also in glees, and in music for the pianoforte. His sacred music is chiefly distinguished by a noble, often even an antique style, and by rich harmonies as well as by surprisingly beautiful modulations.'

On leaving Leeds in 1849 he entered into a contract with R. S. Burton, to sell the 'good-will' of his Leeds practice for 500 guineas.²

In 1849 he was appointed to Winchester Cathedral, where the school offered facilities for the education of his sons. On Aug. 10, 1850, he was appointed professor of the organ at the R.A.M. After fifteen years in Cathedral and School Chapel, Wesley, being consulted by the Dean and Chapter of Gloucester as to the claims of candidates for that organistship then (1865) vacant, intimated that he would himself accept it, an offer which was naturally taken advantage of. This post brought him more prominently forward in the musical world, as conductor *ex officio*, once in three years, of the Three Choirs Festivals, and the change seemed for a time to reanimate energies and powers which had not received adequate public recognition. In Jan. 1873 he received a Civil List pension of £100 per annum.

But the best years had been spent of a life which, to a less sensitive nature, might have been happier and more eventful; and long-deferred hopes for restorations of founders' intentions, and for thorough reforms in Cathedral matters generally—reforms which, both with pen and voice, he warmly and constantly advocated—combined with other disappointments and cares, shortened his days, and after some ten years' tenure of his Gloucester post, he died there, his last words being: 'Let me see the sky'—words appropriate for one whose motto as a composer seemed always 'Excelsior.' According to his own wish he was buried at Exeter in the old cemetery by the side of an only daughter, who died in 1840. A tablet to his memory was placed on the north wall of the nave of the Cathedral, on which these words are inscribed:

'This monument has been placed here by friends as an expression of high esteem for his personal worth, and admiration of his great musical genius.'

There is also a window to his memory in Gloucester Cathedral. But a more lasting monument, of his own creation, exists in his works.³

As composer for the Church of England, Wesley may fairly be placed in the highest rank.

² See *Leeds Mercury* and *Leeds Intelligencer*, July 17, 1852, and *The Times*, July 16, for the report of the action which followed.

³ The centenary of Wesley's birth was celebrated in Westminster Abbey by a commemorative service (June 29, 1910) at which eight of his finest anthems were sung under the direction of Sir J. F. Bridge.

In his elaborate Service in E major, published, with an interesting and caustic preface, in 1845 whilst he was at Leeds, advantage is taken of modern resources of harmony and modulation, without departure from the lines of that true church school to which the composer had been so long habituated. (See ANTHEM and SERVICE.) And this judicious combination of ancient and modern is characteristic of his church music, in which he gives practical illustration of the reform which he was always urging. (See the pamphlet, etc., on church music named at the end of the list of his compositions.) His fame will chiefly rest on his volume of twelve anthems, published in 1853. Two of these, composed at Hereford, 'Blessed be the God and Father'¹ and 'The Wilderness,'² are now universally recognised as standard works of excellence. Later in life Wesley soared even higher—for instance, in his noble 'O Lord, Thou art my God,' for eight voices, in his 'Ascribe unto the Lord,' composed in the Winchester period, and also in the exquisite little anthem, 'Thou wilt keep him in perfect peace,' wherein knowledge and the dignity of the true church style are so conspicuous, and which is one of the brightest gems in a collection of choral jewels. It should not be forgotten, too, that popular hymnody was much enriched by his fine tunes which combined the dignity of the Church style with a vocal ease which made them attractive to the masses. That known as 'Aurelia' is the most famous.

As an organist, Wesley was for a considerable period acknowledged the first in this country. His touch was eminently *legato*, his style always noble and elevated. (See EXTEMPORISATION.) At Winchester he was heard to great advantage on Willis's fine organ. His extempore playing after the Psalms, before the Anthem, or after the Service, is a thing to be remembered, and various players after hearing him changed their style for the better, some of them catching a ray of the *afflatus divinus* which, as organist, may be fairly ascribed to him. His views, formed from early habit, on two important points in the construction of organs were curiously divergent from opinions widely held, for he was an advocate both of unequal temperament and of a 'G' or 'F' compass. But in supporting such exceptional views, he could give practical reasons for the belief that was in him.

Those well acquainted with Wesley could not fail, notwithstanding a manner at times reserved, retiring, or even eccentric, to appreciate his kindness and sympathy. To those he liked and trusted he could be an agreeable and interesting companion and friend, and these will not forget their pleasant intercourse with him,

even on occasions when music formed little or no part of conversation.³ That he felt deeply and aimed high is proved in the devotional and masterly works with which, at a period when our ecclesiastical music was at a low ebb, he enriched the choral repertory of the Church of England.

The following is a list of Dr. Wesley's published compositions.

ANTHEMS, ETC.	
Ascribe unto the Lord.	Introduction and Fugue, in C [♯]
All go unto one place. (Funeral).	Andante in G.
S.A.T.B.	" in A (posthumous).
Blessed be the Lord God of Israel.	" in E minor (do.).
(Christmas). 4 voices.	Another anthem, with variations.
Blessed be the God and Father.	An Air, varied, composed for
S.S.A.T.B.	Holworthy church bells
Cast me not away from thy presence.	(do.).
SS.A.T.T.B.	'Studio' for Organ.
Give the King Thy judgments.	Grave and Andante for <i>The Organist's Quarterly Journal</i> ,
S.A.T.T.B.	and some other contributions
Glory be to God on high. Full.	to collections.
4 voices.	
God be merciful unto us. (Marriage). 4 voices.	The Psalter, pointed for Chanting.
I am Thine. O save me. Full.	The European Psalmist. 1872.
5 voices.	Ode to Labour, for the opening
I will arise; and O remember not.	of an Industrial Exhibition,
Let us lift up our heart. 8 voices.	words by W. H. Bellamy.
Man that is born of a woman.	Agricultural Hall, Islington,
S.A.T.B.	Oct. 17, 1864.
O give thanks unto the Lord.	The praise of Music, for Gounod's
S.A.T.B.	Choir at Albert Hall, 1873.
O God, Whose nature and property.	Numerous Chants and Hymn
Full. 4 voices.	tunes.
O how amiable.	
O Lord, my God (Solomon's Prayer). S.A.T.B.	GLEES
O Lord, Thou art my God. 8	I wish to tune my qu'ring lyre.
voices.	A.T.T.B.
Praise the Lord, O my soul.	When fierce conflicting passions.
S.A.T.B.	Shall I tell you whom I love?
The Face of the Lord. 8 voices.	SONGS
The Lord is my shepherd.	Shall I tell you whom I love?
The Wilderness. S.A.T.B.	(with Violoncello ad lib.).
Thou wilt keep him in perfect	When from the great Creator's
peace. S.A.T.T.B.	hand (from the Ode).
Three Collects for the first three	Strong in heart and strong in
Sundays in Advent. Two for	hand (Ditto).
Treble, and one for Bass.	Silently, silently (from the Ode).
Wash me thoroughly. S.A.T.B.	There be none of beauty's
The Hundredth Psalm, arranged	daughters.
with various harmony for	Wert thou like me.
choirs. Foundation-stone of	The Butterfly.
Nesley Hospital, 1866.	Orphan house, the year is dead.
By the rivers of Babylon (Soprano solo).	Hoher Muth und sasse Minne
Ditto. (Alto solo.)	(with Violoncello ad lib.).
SERVICES, ETC.	
(In E.) T.D., J., K., S. and C.	FOR PF.
M. and N.D.	Air and variations in E.
(In F.) Chant Service. T.D.	March in C minor, and Rondo
and J., M. and N.D.	in C.

J., M. and N.D.	<i>the Church, with a plan of</i>
(In C.) Glory be to God on high.	<i>Reform.</i> (Rivingtons, 1849.)
(Early work.)	<i>Reply to the Inquiries of the</i>
	<i>Cathedral Commissioners relating</i>
	<i>to improvement in the</i>
	<i>Music of Divine worship in</i>
	<i>Cathedral. 1854.</i>
FOR ORGAN	
Six Pieces for a Chamber Organ	
(Set 1 and 2).	

A few MS. sketches are preserved at Leeds Church and elsewhere.

BIBL.—E. DANNEBERGER, *The Romantic Period* (Oxf. Hist. Mus. vol. vi.); E. WALKER, *History of Music in England* (These alike include finely critical estimates of both the Wesleys.)

H. S. O.; addns. from D.N.B., Mus. T., etc.

WESSEL, CHRISTIAN RUDOLPH (b. Bremen, 1797; d. Eastbourne, Mar. 15, 1885), came to England in 1825, and established, with an amateur named Stodart, at No. 1 Soho Square, the firm of music-publishers Wessel & Stodart, for the popularisation of foreign music in this country. In 1838 Stodart retired and Wessel continued the business until 1839, when he took in Stapleton as a partner, and removed to 67

³ Mus. T., 1900, pp. 297, 369 and 462; anecdotes, etc., in the same, 1899, pp. 463, 485; D.N.B., etc. Information from Herbert Thompson and others.

¹ See Mus. T., 1900, p. 522.

² See Mus. T., 1899, p. 164, and 1900, pp. 300, 301.

Frith Street, Soho. About this time the firm entered into a contract with Chopin for the exclusive right to publish his works in England, paying him £12 for each fresh composition. In 1845 Stapleton left the firm, and Wessel again carried on business by himself, from 1846 at 229 Regent Street, and from 1856 at 19 Hanover Square, until 1860, when he retired in favour of Edwin ASHDOWN and Henry John PARRY, both of them long in his employ. In 1882 Parry retired, and from that time it was in the hands of Ashdown alone. The business ultimately became the company known as 'Edwin Ashdown, Limited.'

Wessel was a great benefactor to the spread of music in England. Among composers whose works were introduced by him are Schubert, Schumann, Mendelssohn, Abt, Kücken, Gade, Schulhof, Heller, etc. Of the works of Heller, as of those of Chopin, Wessel and his successors held the exclusive copyright in England, though by a decision of the Court of Chancery in 1853, several important works were lost to them. (See BOOSEY & Co.) Since that period they have turned their attention to the publication of the works of resident composers. In 1867 they established a monthly musical magazine, *Hanover Square*. A. C.

WESSELY, BERNHARD (b. Berlin, Sept. 1, 1768; d. Potsdam, July 11, 1826). The house of his parents (a Jewish family) was a meeting-place for the great poets and philosophers of the time, and Lessing, Moses Mendelssohn, Ramler, etc., were frequent visitors. Wessely studied under J. A. P. Schulz, and in 1787 he went to Hamburg to conduct his coronation cantata. In 1788 he became music-director at the Royal National Theatre, Berlin. In 1796 Prince Henry engaged him as his Kapellmeister at Rheinsberg, and on the latter's death he abandoned his musical career, for family reasons, and became a government official at Potsdam, where he founded, with the secretary (Justiz Sekretär) Mödinger, the society for classical music, which in 1816, when he had been transferred to Magdeburg, prevailed upon the king to recall him. His compositions were very popular. Meyerbeer points him out as the real author of the famous lullaby, 'Schlafe mein Prinzchen,' attributed to Mozart. He composed 4 operas, incidental music to 3 plays, ballets, cantatas, songs, chamber music, etc. (Lederbur, *Mus. Lexikon*; Q.-L.).

WESSELY, HANS (b. Vienna, Dec. 23, 1862; d. Innsbruck, Sept. 1926), violinist, began to learn the violin when 9 years of age. He received his musical training at the Vienna Conservatorium, and completed his studies there with the leading professor of that institution, J. M. Grün. His first important appearance in public was made at the age of 21 years, when he gave two orchestral

concerts in his native city, and was subsequently engaged to play Spohr's 7th Concerto at the Philharmonic Society (of Vienna) under Richter. He subsequently visited various countries in Europe and eventually found his way to London, making his début at the Crystal Palace concerts under Manns on Apr. 7, 1888. In 1889 he became a professor at the R.A.M., and attained the position of leading violin professor in that institution. His repertory as a soloist included all the great violin concertos, but it was as a quartet leader that he was best known. The Quartet bearing his name gave a series of concerts annually in London until 1914. He had a good technique, much force, and a serious conception of the masterpieces of chamber music which he was mainly engaged in interpreting. He played on a Stradivari violin of the best period. W. V. C.

WEST, BENJAMIN (b. Northampton), an 18th-century organist-composer, who wrote 'Sacra concerto,' or the voice of melody, containing an introduction to the grounds of music; also 41 psalm tunes and 10 anthems (London, 1760; second ed., with 12 anthems, 1769). E. V. D. S.

WEST, JOHN EBENEZER (b. Hackney, London, Dec. 7, 1863), organist and composer, is specially noteworthy for his valuable publication, *Cathedral Organists*, much quoted in this Dictionary.

He studied at the R.A.M. under his uncle, Prout and others, held successively several organistships in London, resigning that of St. Augustine's, Queen's Gate, in 1902 in order to devote himself to composition and editorial work. He joined the staff of Novello & Co. in 1884 and became musical editor and adviser to that firm in 1897. His compositions include Cantatas (two short works were produced at the Gloucester festivals of 1904 and 1907), over 70 church anthems published and several services. *Cathedral Organists*, which gives the most comprehensive, and at the same time concise record of the holders of that office in all English Cathedrals and Collegiate Churches, first appeared in 1899, and was reissued in a new and enlarged edition in 1921 (Novello). Its information is remarkably accurate and clearly set forth. C.

WEST (WESTE), WILLIAM (d. 1643), a gentleman of the Chapel Royal from 1612 until his death (H. C. de Lafontaine, *The King's Musick*). He is presumably the West whose 'Sharp' Service (including T.D., K., C., M. and N.D.) and two anthems, 'Have mercy' and 'Save me, O God,' are included in Barnard's MS. collection (R.C.M. 1045-51). This supposition is supported by the fact that these works are included in this collection and not in Barnard's 'Selected Church Music,' published in 1641. The latter included only works by composers then dead, and the MS. collection contains the nucleus of

a second assembly by living composers, which Barnard intended to publish as a supplement to it. J. M^{rs}.

WESTBROOK, WILLIAM JOSEPH, Mus.D. (b. London, Jan. 1, 1831; d. Sydenham, Mar. 24, 1894). His instructor was R. Temple, a blind organist. In 1848 he became organist of St. Bartholomew's, Bethnal Green, which he exchanged in 1851 for St. Bartholomew's, Sydenham, where he remained until his death. He took his degree of B.Mus. at Cambridge in Feb. 1876, and his D.Mus. in May 1878, his exercise, 'Jesus, an oratoriette,' for solo voices, eight-part chorus, and orchestra, having been performed in the chapel of Queens' College, Cambridge. He was sub-organist at the Crystal Palace for some three years, and conductor for thirteen years of the South Norwood Musical Society. Westbrook published many organ-pieces, original or arranged; songs, partsongs, madrigals, canons; English text to many songs of Mozart, Schubert, Pесca, etc.; in part or entirely the English text of De Bériot's, Dancла's and Alard's Violin Schools; Organ Tutors; a large portion of the first 12 volumes of the 'Musical Standard.' G.

WESTENHOLZ, (1) KARL AUGUST FRIEDRICH (b. Lauenburg,¹ 1736; d. Schwerin-Mecklenburg, Jan. 24, 1789), pupil of J. A. Kunzen for theory, and Fr. Xav. Voczitka for violoncello. From c. 1756 he was tenor singer in the Schwerin court chapel, of which he became Kapellmeister in 1768, as Hertel's successor. In 1770 he married the singer Lucietta Affabili (d. 1776) and in 1777 Eleonora Sophia Maria Fritscher, an excellent singer, harpsichord and glass-harmonica player, and composer of sonatas, songs and harpsichord pieces. At the court concerts she often presided at the harpsichord, and E. W. Wolf dedicated to her 6 harpsichord sonatas. Karl Westenholtz composed concertos, sonatas and pieces for harpsichord, cantatas, psalms, chorales, birthday serenades, songs, etc. His son, (2) **FRIEDRICH** (d. Berlin, Mar. 12, 1840), was virtuoso on the oboe and chamber musician at the Berlin court; and composed concertantes for oboe and flute, and oboe and bassoon, with orchestra, duets for violin with various instruments, etc. (Mendel; Q.-L.)

WESTHOFF, JOHANN PAUL VON (b. Dresden, 1656; d. Weimar, Apr. 1705), son of a lutenist in the Dresden court chapel, who had been a captain in Gustav Adolph's army. He started his career as teacher of languages to the Saxon princes c. 1671, and ended it as professor of languages at Wittenberg University (after 1691), and, finally (1704), chamber secretary and chamber musician at Weimar. About 1674 he became chamber musician at Dresden, visited Sweden in 1679, and was induced to join the army in the Turkish cam-

paign in Hungary; but returned to Dresden in 1680. He toured as a violinist all over Europe, coming to England c. 1684-85, and returning to Dresden in the latter year. He was a remarkable virtuoso, and composed 6 violin sonatas with basso continuo (Dresden, 1694). G. Beckmann re-edited a sonata in D minor and a solo Suite in A major (1921), and the latter was also re-edited by K. Gerhartz (1921) (Schilling; Riemann).

WESTLAKE, FREDERICK (b. Romsey, Hants, Feb. 25, 1840; d. London, Feb. 12, 1898), pianist and composer. In 1855-59 he was a student at the R.A.M., of which institution in 1860 he was made sub-professor, then associate, and in 1863 professor. He played in public with success until the demands made on his time for teaching became too great. He re-appeared, Oct. 22, 1873, at W. H. Holmes's concert, and played, with his pupil Miss Agnes Channel, Chopin's Rondo for two Pianofortes, probably for the first time in England. He was a member of the Philharmonic Society and the Society of Musicians. His compositions include:

Mass in E^b; O Salutaris; Kyrie and Gloria (with orchestra); hymns included in 'Hymns Ancient and Modern'; Duo Concertante for FF. and v'cl.; Allegro con forza, nine 'Episodes,' and a Fugue in octaves for FF.; Songs and Part Songs, 'Lyra Studentium.'

He also completed Sterndale Bennett's edition of Bach's 48 Preludes and Fugues. A. C.

WESTMORLAND, JOHN FANE (b. Feb. 3, 1784; d. Oct. 16, 1859), ELEVENTH EARL (of the creation of 1624)—better known in the musical world by the courtesy title of LORD BURGHESHER, which he bore before his succession to the earldom. He entered the army and served in the various campaigns from 1805-15, and was subsequently envoy at Florence, and ambassador successively at Berlin and Vienna. His love for music manifested itself in early youth, and he became a good violinist. Whilst a student at Cambridge he obtained instruction from Dr. Hague, the University professor; he also studied under Zeidler at Berlin and Mayseder at Vienna. He essayed composition, and produced 6 Italian operas: 'Bajazet,' 'Il torneo,' 'Fedra,' 'L'eroe di Lancastro,' 'Il ratto di Proserpina,' and 'Lo scompiglio teatrale'; an English opera, 'Catherine'; a resetting of Cobb's 'Siege of Belgrade'; a Mass, a Service, a Magnificat, and two anthems, besides hymns, madrigals, songs, duets, etc. In 1817 he was one of the unsuccessful competitors for the prize offered for the best setting of William Linley's Ode on the death of Samuel Webbe.

His real claim to mention here, however, is not his musicianship, but the energy, perseverance and success with which he advocated, and ultimately succeeded in procuring, the establishment of an Academy of Music in London, and the zeal with which, as its President, he strove at all times to advance its interests. (See ROYAL ACADEMY OF MUSIC.) In 1832 he was

¹ Mendel says Lüneburg.

appointed a director of the Concert of Antient Music. He succeeded to the earldom on the death of his father, Dec. 15, 1844. W. H. H.

WESTPHAL, RUDOLF, GEORG HERMANN (b. Oberkirchen, Lippe-Schaumburg, July 3, 1826; d. Stadthagen, July 11, 1892), writer on music whose theories especially as regards the nature of GREEK MUSIO (*q.v.*) have occasioned considerable controversy.

Westphal studied classical philology at Marburg and from 1858-62 held a professorship at Breslau. In 1875 he held a similar post at Moscow in the Katkov Lycée (see MELGOUNOV), and returning to Germany in 1880, lived successively at Leipzig, Bäckeburg and Stadthagen. His special field of research was the metrical and rhythmical principles of ancient Greek music. He maintained for some time but ultimately abandoned the theory that polyphony was known to the Greeks.

His principal works relating to music are :

- Metrik der griechischen Dramatiker und Lyriker*, with Rossbach. 3 vols. 1854-65.
Theoria der musischen Künste der Hellenen, 3rd ed. of the above. *Die Fragmente und Lehrsätze der griechischen Rhythmiker*. 1861.
Geschichte der alten und mittelalterlichen Musik. 1864.
System der antiken Rhythmik. 1865.
Scriptores metrici Graeci. 1866.
Theoria der neuhochdeutschen Metrik. 1870.
Die Elemente des musikalischen Rhythmus mit Rücksicht auf unsere Opernmusik. 1872.
Allgemeine Theorie der musikalischen Rhythmik seit J. S. Bach. 1880.
Aristoxenos von Tarent.
Metrik und Rhythmik des klassischen Hellenentums. 2 vols. 1883-93.
Die Musik des griechischen Alterthums. 1883.
Die Aristoxenische Rhythmiklehre. 1891. (See Riemann.) C.

WESTROP, (1) HENRY (b. Lavenham, Suffolk, July 22, 1812; d. London, Sept. 23, 1879), is said to have made his first appearance at concerts in Norwich at 10 years old, and at 13 appeared at the Sudbury Theatre as pianist, violinist and singer. He afterwards became organist at St. Stephen's, Norwich; in 1831 at Little Stanmore; 1832, at Fitzroy Chapel, and Apr. 3, 1834, at St. Edmund, Lombard Street, which he held till his death. He was conductor of the Choral Harmonists' Society, and sub-conductor to Costa at the Sacred Harmonic; he led the second violins at the Royal Italian opera and the Philharmonic Society.¹ He was a member of the Society of British Musicians and of the Philharmonic Society. Westrop's abilities as a composer were greater than his reception by musicians and the public would imply. His compositions include a symphony performed by the Society of British Musicians, but accidentally destroyed afterwards; a considerable quantity of concerted chamber music; an opera, 'The Maid of Bremen,' libretto by Fitzball, written for the Pyne and Harrison company (but not performed owing to the collapse of the undertaking); another opera, 'The Mariners,' was unfinished at his death. His daughter,

(2) KATE (Mrs. Allender), a pianist, succeeded to his post of organist, and was an associate of the Philharmonic Society. His younger

brothers, (3) EAST JOHN (1804-56) and (4) THOMAS (1816-81) were also musicians.

A. C., addns.

WEYSE, CHRISTOPH ERNST FRIEDRICH (b. Altona, Mar. 5, 1774; d. Oct. 7, 1842), was sent in 1789 to Copenhagen to complete his musical instruction under J. A. P. Schulz. From 1792 to his death, he was settled at Copenhagen as organist and music-teacher. He is chiefly known as the composer of Danish operas and operettas, in which there is a considerable infusion of the spirit of national romanticism. Along with Friedrich Kuhlau Weyse indeed is credited as one of the first to introduce the element of romanticism into Danish artistic music. He occupied himself in collecting and harmonising old Danish folk-songs, a work which was continued and so far completed by his pupil A. P. Berggreen. Weyse also wrote several books of studies, sonatas, and Allegri di Bravura for the pianoforte. Moscheles considered some of his Books of Studies as giving Weyse a claim to rank among the best pianoforte writers of the time; and Schumann has also a very appreciative review of them in his *Gesammelte Schriften* of 1854, reprinted from the *Neue Zeitschrift* of 1836 and 1838. Some of these Books of Studies, and one of the sonatas have more recently been reprinted, edited by August Winding.

J. R. M.

WHEALE, see WEALE.

WHEATSTONE, a family of music-publishers, and instrument-makers, said to have been established in business in 1750. Of this family was (1) SIR CHARLES WHEATSTONE (b. Gloucester, Feb. 1802; d. Paris, Oct. 19, 1875), famous for his inventions in telegraphy. He was the son of a music-seller at Gloucester, came to London, evidently to relatives in the music trade, and professionally was a music instrument-maker, but soon turned his attention to scientific subjects, which included light optics, sound vibrations, and electricity. He invented the concertina, and the patent (June, 1829) was held by the Wheatstone firm for many years. He was knighted in 1868. His portrait is in the National Portrait Gallery.

The London music firms of Wheatstone were Charles Wheatstone and William Wheatstone, who, having separate businesses at first, appear to have amalgamated.

(2) CHARLES WHEATSTONE was a music-engraver, and was publishing sheet music about 1790 at 9 Whitehall. Other early addresses were 31 Newgate Street; 20 Pantion Street, Haymarket; 83 St. James Street; 14 Castle Street, Leicester Square; and 3 Bedford Court, Covent Garden. All these addresses were held at different times before 1806. After this date he was at 436 Strand, and from here most of his publications were issued down to about 1830. The firm was now a partnership,

¹ See C. E. Stephens in the *Musical World*, Oct. 11, 1879.

and was established at 20 Conduit Street. Besides a mass of sheet music, Wheatstone & Co. published many interesting collections of Glees, etc., one being 'The Harmonist' in 9 vols. (c. 1805-10). They have also been makers and dealers, extensively, in musical instruments.

(3) WILLIAM WHEATSTONE was a professor and manufacturer of German flutes, in the improvement of which he held patents. He was at 128 Pall Mall in 1821, and shortly after removed to Chester Street, St. James's, and about 1826 to 118 Jermyn Street. He published some books of airs for the flute, and possibly became a partner with the Charles Wheatstone above.

WHICHELLO (WICHELLO), ABIELL (*d. circa* 1745), a popular composer of songs in the early part of the 18th century. He was at one time deputy-organist to Philip Hart, and afterwards organist at St. Edmund the King. Hawkins refers to him as being a teacher of the harpsichord, and a performer at the concerts organised by Thomas BRITTON (*q.v.*). He published a set of 'Lessons for the Harpsichord, or Spinett,' 1710, a cantata named 'Apollo and Daphne,' *circa* 1730. Another named 'Vertumnus and Pomona,' and a large number of songs, many of which appear in such works as Watts's 'Musical Miscellany,' 1729-1731, Bickham's 'Musical Entertainer,' 1737, etc., also on single engraved half-sheets of about the same period. His song 'Contentment' ('No glory I covet') appears to have survived long after the rest of his compositions were forgotten. Hawkins states that he died about 1745.

F. K.

WHISTLE, the simplest form of flageolet, or flûte-à-bec. It may be made of wood, cane, or metal; modern whistles are sometimes of celluloid. The principle is that of a tube plugged, or otherwise arranged, at the mouth so that a narrow slit only remains. A short distance below is a notch having a portion of the tube cut slantingly away, or if of metal deflected inwards, upon which the breath impinges and so produces a shrill sound dependent on the length and width of the tube for its pitch and power.

The short whistle, of the dog-whistle type, is not open at the end, and only produces one note. The old parish clerk's pitch-pipe (made of wood) was merely a whistle plugged at the end by a movable stopper, which, pushed upwards to certain fixed places, gave the required notes as a pitch for singing. The ordinary musical whistle (the 'tin' or 'penny' whistle) has six vents which are stopped by the fingers of both hands, and the fingering follows the same rule as for the fife, or flute without keys. The bird whistle (directions for playing which were published by Walsh early in the 18th century) is very short, and as a consequence

shrill. The whistles of savage nations are generally of cane, and sometimes blown with the nose instead of the mouth.

F. K.

WHISTLING, KARL FRIEDRICH, a Leipzig publisher, initiated the useful *Handbuch*, with which his name and that of HOFMEISTER (*q.v.*) are associated. In 1817 Whistling brought out the first volume, under the title

'Handbuch der musikalischen Literatur, oder allgemeines systematisch geordnetes Verzeichniss gedruckter Musikalien, auch musikalischer Schriften und Abbildungen mit Anzeige des Verlegers und Preises, 8vo.'

This work was published anonymously by A. Meyssel, and contains a tolerably complete list of the music published in Germany, with some additions from neighbouring countries, between the years 1780 and 1817. In 1819 the publication was bought by the elder Hofmeister, but in 1825 it was resold to Whistling. The 1817 volume was followed by ten yearly supplements, carrying the work down to 1827. In 1828 the second volume (or rather a new edition of that of 1817) appeared. This work, to which Whistling's name appears, is an 8vo volume of 1158 pages; it is divided into three parts, and was followed by a supplement, containing a list of the works published while the book was in the press.

In 1829 Whistling sold his whole business to the Hofmeisters, who brought out two more supplements, carrying it down to 1833 and 1838. In 1844 a third edition appeared under the following title:

'C. F. Whistlings Handbuch der musikalischen Literatur, oder allgemeines systematisch-geordnetes Verzeichniss der in Deutschland und in den angrenzenden Ländern gedruckten Musikalien auch musikalischen Schriften und Abbildungen, mit Anzeige der Verleger und Preise. Dritte, bis zum Anfang des Jahres 1844 ergänzte Auflage. Bearbeitet und herausgegeben von A. Hofmeister.'

This edition (a 4to volume) was published by Friedrich Hofmeister. It consists of three parts with separate pagination (Part I. pp. 144; Part II. pp. 336; Part III. pp. 340); the third part is dated 1845, and is preceded by a list of the changes which had taken place in the various firms of music-publishers during the period covered by the volume. In 1852 another volume (382 pp.) of the 4to edition carried the collection on from Jan. 1844 until the end of 1851. In 1860 a second volume (470 pp.) carried it down to the end of 1859, in 1868 a third (561 pp.) down to the end of 1867, in 1876 a fourth (575 pp.) down to the end of 1873, and in 1881 a fifth (684 pp.) down to the end of 1879, since when this series has been discontinued.

W. B. S.

WHITAKER, JOHN (*b.* 1776; *d.* London, Dec. 4, 1847), was organist of St. Clement, East Cheap, and composer of the music of many popular dramatic pieces, amongst which were

'The Outside Passenger,' 1811; *'Orange Boven,'* 1813; *'A Chip of the Old Block,'* and *'My Spouse and I,'* 1815; *'The Broken Sword,'* 1816; *'A Friend in Need,'* 1817; *'Three Miles from Paris,'* 1818; *'A Figure of Fun,'* 1821; *'The Apprentice's Opera,'* *'The Rake's Progress,'* *'Sixes and Sevens.'*

He joined Reeve in composing music for *'Who's to have her?'* and contributed some

songs to 'Guy Mannering' (1816), amongst them the once popular 'Oh, slumber, my darling,' 'Dog Tray,' and 'O say not woman's heart is bought.' He also composed the music for several pantomimes, in one of which (produced at Sadler's Wells on Easter Monday, Apr. 12, 1819) occurred the famous Clown's song, 'Hot Codlins,' written for Grimaldi. His comic songs ('Darby Kelly,' 'Paddy Carey' and others adapted from Irish airs) were highly popular. He composed some anthems, music for English versions of the Odes of Anacreon and Æsop's Fables, The Seraph Collection of Sacred Music, 2 vols. (1818), and 12 Pedal Exercises for the Organ. He was a music publisher, being a partner in the firm of BUTTON & WHITAKER (*q.v.*). W. H. H.

WHITBROKE (WHYTBROKE), WILLIAM (1st half of 16th cent.), English ecclesiastic and composer of church music. He was at Cardinal College (now Christ Church), Oxford, in 1525, and was ordained priest in 1529. In 1530 he was commissioned by Higden, Dean of Cardinal College, to report on the musicianship of a certain John Benbow, who was a candidate for the post of master of the choristers there, in succession to TAVERNER (*q.v.*). On the suppression of Cardinal College, Whitbroke became sub-Dean of St. Pauls (June 29, 1531), a post usually held by a musical cleric (see PYGOTT and SAMPTON). He was also appointed to the vicarage of All Saints, Stanton, Suffolk, and possibly retired there in 1535 when he resigned from St. Paul's.¹ Ch. Ch. 979-83 contains a piece in 4 parts called 'Hugh Ashtons Maske,' in which Whitbroke's name is at the end of the contra-tenor part (see ASTON). He contributed to Day's 'Certaine Notes' (1560), a setting 'Let your light so shyne' (described as 'A thankesgeuyng for the poore'), for the first of the three Communion Services contained therein. In the 1565 edition (issued under a new title—see JOHN DAY) his name is also appended to the Magnificat of the second Evening Service. It is probable that he also wrote the Nunc Dimittis which follows, as 'Knyght' (see KNIGHT) is given as the composer of both canticles of an alternative Evening Service. There is no evidence to show that Whitbroke was alive at the time of Day's publication, but he was a contemporary of Shepherd, Redford and Ludford, and composed chiefly for the Latin liturgy. The Magnificat in the list below was published as No. 898 of Novello's 'Parish Choir Book.'

Mass 'Apon ye square' (i.e. in 4 pts.). B.M. Add. MSS. 17,802-5.

M. B.M. Add. MSS. 30,480-3.

Sancte Deus, a 5. PH.

* *Audi vi media nocte.* B.M. Add. MSS. 17,802-5. This setting is by Taverner, but the 'pars ad placitum' is by Whitbroke.

J. M^{re}.

WHITE, ALICE MARY MEADOWS, see SMITH, Alice Mary.

WHITE, HAROLD ROBERT (b. Dublin, Jan.

12, 1872), was a chorister in Christ Church Cathedral from 1881-87. As a boy he had a beautiful voice, and when it broke he was for a time a bass singer, being also successively organist of St. Andrew's and of St. Mary's, and musical critic. Owing to ill-health he went to Denver, Colorado (U.S.A.), in 1897, but returned within two years, and won prizes at the Feis Ceoil (1898), also a prize given by the Worshipful Company of Musicians (Fantasie Trio). He founded the Clef Club (1905), still flourishing, and composed much vocal and instrumental music. His chief work has been an Irish opera, 'Shaun the Post' (based on Boucicault's drama, *Arrah na pogue*), successfully produced by the Carl Rosa Company in August 1924 at the Theatre Royal, Dublin, and since included in the Company's repertory. W. H. G. F.

WHITE, JOHN (b. York, 1779; d. Leeds, Aug. 22, 1831), organist and composer, studied for the medical profession, but his performance on the violin, when a boy, showed that he had considerable musical ability, and medicine was therefore abandoned for music. As 'Master White' he played at concerts in York, Leeds and other Yorkshire towns. In 1794 he came under the patronage of the Earl of Harewood, who employed him as leader and director of his private concerts, and teacher to the family. Visiting London with the family, he took lessons on the pianoforte from Dussek, singing and the organ from John Ashley, violin from Raimondi, and the harp from Philip Meyer.

At some of the London concerts he played the violoncello in the absence of Lindley and Dahmen. He became organist of Harewood Church in 1804, and settled at Leeds in 1807 as organist of St. Paul's Church. He was leader of the Doncaster Meeting of 1812, and one of the assistant conductors of the great York Festivals of 1823, 1825 and 1828.

From 1793 to nearly the period of his death he was the main organiser and leader of concerts in the West Riding.

In 1821 he held, in addition to his Leeds appointment, the post of organist of Wakefield Parish Church. He was the writer of a few unimportant musical compositions, some of which were published by Muff of Leeds, and was probably the White who was in a partnership with the Knaptons of York as music-sellers there during the early twenties. His son was also in the musical profession, and in later years assisted his father. The wife of John White played the harp and published some compositions. F. K.

WHITE, LUKE (d. London, Feb. 25, 1824), a famous Dublin publisher and bookseller in the last quarter of the 18th century. In 1779 he issued, from 18 Crampton Court, the second English edition of Rousseau's *Dictionary of Music*, translated by William Waring. This

¹ See W. H. Grattan Flood, *Early Tudor Composers*, p. 91.

work has numerous musical illustrations, in addition to two large engraved plates. Six years later he published Dr. Burney's *Account of the Musical Performances in Westminster Abbey and the Pantheon*. However, his best-known musical work is the fine quarto edition of J. C. Walker's *Irish Bards*, issued from 86 Dame Street in 1786. In 1790 he gave up publishing and became a lottery-broker, at 42 Dawson Street. In 1791 he removed to 19 Dawson Street, and between his success as publisher and as a lottery-broker he was reputed a millionaire in 1810. He subsequently purchased a seat for Leitrim and, in 1823, got his son, Thomas, elected M.P. for Dublin City. He became the founder of the Annaly peerage.

W. H. G. F.

WHITE, MATTHEW, was gentleman of the Chapel Royal in 1603 (see Rimbault, *Old Cheque-book of the Chapel Royal*, 1872). In 1613, when he was admitted Gospeller in the place of Robert Stone, he is described as 'Minister, and a Basse (from Welles¹). He resigned his place in 1614. He is presumably the 'Matthew Wight of London,' who on July 18, 1619, received a share in a grant of the surveyorship of lands, etc., belonging to rectories, vicarages and rural prebends in England and Wales. On July 18, 1629, he accumulated the degrees of Bachelor and Doctor of Music at Oxford. Tudway calls him organist of Christ Church, Oxford, in 1611, and ascribes to him anthems really composed by Robert WHITE (q.v.). He has been assumed to be the 'Mr. White' whose catches are printed in Hilton's 'Catch that catch can,' and in Playford's 'Musical Companion,' 1667, but there is nothing to show that they are his. It is very questionable whether any of the anthems to which his name is attached is rightly assigned to him, unless perhaps the fragmentary full anthem 'Zache stood forth,' which bears his name in Barnard's MS. collection (R.C.M. Husk, 1642), is his and not Robert White's.

G. E. P. A.

WHITE, MAUDE VALÉRIE (b. Dieppe, June 23, 1855), of English parentage, a successful song-writer.

After acquiring the rudiments of harmony and composition from W. S. Rockstro and Oliver May, she entered the R.A.M. in Oct. 1876, and studied composition under Sir G. A. Macfarren. In Feb. 1879 she was elected to the Mendelssohn Scholarship, which she held for two years, studying the while under Macfarren and F. Davenport. In Apr. 1881 ill-health compelled her to give up the scholarship and reside for a time in South America. Previously, however, to her departure, a portion of a Mass of hers was performed at a R.A.M. students' orchestral concert. In the winter of 1883 she completed her musical studies in Vienna.

¹ On Jan. 30, 1611, he was admitted a perpetual Vicar-Choral of Wells.

W. H. G. F.

Among the most popular of her early lyrics are 'Absent yet present,' 'The devout lover,' 'Ye Cupids' and 'When passion's trance.' Her best songs are to words by Herrick and Shelley. For instance, for 'To Blossoms,' 'To Daffodils,' 'To Electra,' 'To Music, to becalm his fever' she has written pure, quaint and measured music in thorough accord with Herrick's delicate and somewhat archaic turns of thought and language. But a song of greater scope and merit than any of these is to Shelley's words, 'My soul is an enchanted boat,' from 'Prometheus Unbound.' Here she completely caught the spirit of Shelley's beautiful song, and proved herself to be an adequate interpreter of a most exquisite lyric. And worthy of all praise is her thorough appreciation of the importance of the words of songs, an appreciation attested alike by the excellence of the poetry she sets to music, and by her own careful attention to the metre and accents of the verse.

Of Miss White's German and French songs we may mention Heine's 'Wenn ich in deine Augen seh,' and 'Im wunderschönen Monat Mai,' Victor Hugo's 'Chantez, chantez, jeune inspirée,' and 'Heureux qui peut aimer,' also a fine setting of Schiller's 'Ich habe gelebt und geliebet,' for soprano and orchestra.

Among her later compositions may be mentioned a vocal quintet, 'Du bist wie eine Blume,' a setting of Browning's 'King Charles,' some songs on Sicilian themes, and a few piano pieces. An opera, 'Jocelyn,' was projected, but seems not to have been finished.

A. H. W.

WHITE, ROBERT (b. circa 1530; d. London, Nov. 1574), was, next to Tye and Tallis, the most important English composer of the mid-16th century. The date of his birth cannot be placed earlier than 1530. His father, also called Robert White, has been identified, with great probability, with an organ-builder 'Magister White,' whose name is known through payments having been made to him between 1531 and 1545 for work done to the organ at Magdalen College, Oxford.² A certain amount of support is given to this identification by some entries in the Churchwarden's Books of the Parish of St. Andrew's, Holborn,³ whence it appears that in the first year of Mary (1553-54) 'the parish gave young Whyte £5 for y^e great orgayne which his father gave to y^e church.' In 1572 'young Whyte' pulled down these organs without the leave of the parish, and sold them for £10: 10s. to Westminster Abbey 'wher they now stand and cannot be bought for any money so highly are they esteemed for their goodness.' Among the Westminster Abbey Muniments is a bond dated Dec. 29, 1572, which is connected with the sale of the St. Andrew's organs to 'Robert Whyte gentleman of Westminster,' and one John Thomas, yeoman.

² D.N.B.

³ Mus. T., Mar. 1905.

As Robert White the composer was then master of the choristers at Westminster Abbey, and his father had been living with him for some time before 1574, the last-named Robert White may perhaps be identified with either the father or the son. The whole transaction is difficult to understand, but it seems highly probable that 'young Whyte' of the St. Andrew's documents was the composer.

The first certain fact recorded about Robert White is that he took his degree of Mus.B. at Cambridge, Dec. 13, 1560. The Grace speaks of his ten years' study in music, and he was required under penalty of a 40s. fine, to compose a Communion Service, to be performed at St. Mary's Church on Commencement Day; 'omnia peregit' is added in the Grace-Book. Soon afterwards he was appointed master of the choristers at Ely Cathedral, in succession (as it seems) to Dr. Tye, who retired in the early part of 1561. The series of Treasurers' Rolls at Ely is incomplete, but that for Michaelmas, 1563 (in which is recorded the payment of White's yearly stipend of £10), proves that he had entered on his duties not later than Michaelmas, 1562. He remained at Ely till the beginning of 1566: for John Farrant had succeeded to his place of Magister Chorarum by Michaelmas, 1566; and that White was still at Ely on Dec. 23, 1565, is proved by the entry of the baptism of Margery, daughter of Robert White, in the registers of Trinity Church, Ely. His wife, Ellen Tye, was probably the daughter of Dr. Tye (q.v.).

There is evidence tending to show that White, on leaving Ely, went to Chester. In a copy of Morley's *Plaine and Easie Introduction*, 1597, which once belonged to Thomas Tomkins and is now in the library of Dr. A. H. Mann, King's College, Cambridge, against the name of White, in the list of English Practitioners, is written in Tomkins's hand 'First of West Chester & Westminster.' It had been known from the researches of Dr. J. C. Bridge, that a musician named White was Magister Chorarum at Chester at this date, but hitherto no evidence has been found (such as that supplied by the Tomkins *Morley*) to connect him with Robert White. It appears from the Chester Cathedral Treasurers' Accounts that 'Mr. White' (without any official title) was paid £4:3:4 in Mar. 1567, the Magister Chorarum then being Richard Saywell, with a salary of £1:13:4. In June 1567 White appears as Magister Chorarum, and contributes 13s. 4d. to Saywell's salary. In 1567 and 1568 'Mr. White' took part in the Chester Whitsun plays, and on each occasion received 4s. for his services, which was higher pay than any of the other musicians received. The evidence of the account books in fact is held to show that 'Whyte' was thought a person of importance. His name is not found at Chester later than

1568, but the exact date of his disappearance from Chester is unknown, as the series of Treasurers' Account Books is incomplete.¹

It would seem that Robert White was appointed master of the choristers at Westminster Abbey in 1570. The Abbey Muni-ments throw no light on the subject, but the entries in the registers of St. Margaret's, Westminster, record the baptism of 'Margaret Whyte daughter of Robert,' June 7, 1570.² 'Elizabeth daughter of Robert' was baptized Feb. 24, 1571; and 'Prudence daughter of Robert,' Aug. 23, 1573. All these children were buried in the end of 1574, when the plague was raging in Westminster, and nearly all the family was carried off. Robert White himself was buried at St. Margaret's, Nov. 11, 1574, and his widow died between the following Nov. 21 and Dec. 8. Only two daughters, Margery and Anne, survived their parents.

The will of Robert White, 'Bachelor of Musicke and Master of the Queristers of the Cathedrall Church of St. Peter in the Cittie of Westminster,' is dated Nov. 7, 1574. He desires to be buried at St. Margaret's, Westminster, 'near unto my childrin'; he leaves £3 to his father Robert White, 'and all such his household stufe and goodes w^{ch} he did bringe vnto me at or before his cominge to me': he makes bequests to his daughters Margery, Anne and Prudence, leaving to the first 'a mazer w^{ch} was her late graundmother's.' To his wife Ellen he leaves property called 'Swallowfelde and Wilsnowes' at Nuthurst, Sussex, and he makes her executrix; and gives 'to every of my skollers to eche of them iiijd.' Prudence White was buried Nov. 7, the day on which her father's will was made. The will of Ellen White, the widow, is dated Nov. 21, 1574. She wishes to be buried at St. Margaret's, 'nere unto my late husband and children.' Among a number of small bequests is one to her father-in-law, Robert White; to Richard Granwell, one of the Gentlemen of the Queen's Chapel, to whom she owed 20s.; to her aunt, Anne Dingley; her sisters, Susan Fulke and Mary Rowley, and her brother-in-law Thomas Hawkes, citizen and pewterer of London; and her mother Katherine Tye, who is to have charge of the daughters Margery and Anne; or if she die, then Henry Barnarde, and after him John Croste, neighbours to the testatrix, are to have charge of them. A list of debts owing to Ellen White and her late husband includes the sum of £6, owed by 'Gabriell Cawood, Citizen and Staeyoner of London': Edward Parston Esquier 'owed xxx^s. viij^d.', and she hathe in Pawne a Jewell of golde': Robert Kene and John White are also named.

¹ Information kindly contributed by Dr. J. C. Bridge: cf. also his paper on 'The Chester Miracle Plays,' *Chester Archaeological Society's Journal*, 1903.

² It does not follow that these daughters of Robert Whyte, a common name, were all children of the composer.

It has been suggested¹ with great probability that the large sum owing to White from Gabriel Cawood the printer was in payment for some of his musical compositions. An Edward Paston is known as the owner of 16th-century MSS., such as the Lute-Book in the R.C.M. (Husk, 1964). It is possible that White added to his income by copying music, and that Paston was among his employers.

White's contemporaries held him in the highest esteem. In the MS. Partbooks, dated 1581, now in Ch. Ch. (984-8), the copyist has written at the end of White's Lamentations:

'Non ita moesta sonant plangentis verba prophetæ
Quam sonat auctoris musica moesta mei.'

('Sad as the mourning Prophet's words fall on the ear
More sad to me the music's tones appear.')

Again, at the end of the Precamur, is written:

'Maxima musarum nostrarum gloria White
Tu peris, æternum sed tua musa manet.'

('Thou diest, White, chief splendour of our art,
But what thy art hath wrought shall nevermore depart.')

The Roy. Lib. B.M. contains a MS. written in 1591 by John Baldwine, 'singing man of Windsor,' who says, in recounting the principal composers of his age:

'I will beginne with White, Shepper, Tye, and Tallis,
Parsons, Gyles, Mundie, th'ould one of the queenes
pallis.'

Morley, 1597, quotes him among 'those famous English men, who have beene nothing inferiour in Art' to various foreign writers; and gives him, with Orlandus Lassus, as an authority, for beginning a composition 'upon the sixt.' His name, however, seems to have been forgotten by the end of the 17th century, when his works are nearly always assigned to Matthew White. It was not until he was discovered by Burney that his merit was fully recognised; but ever since Burney's time he has taken his proper place in English histories of music, though even now but little of his music has been printed. His printed compositions are 'Lord, who shall dwell' (Burney, *Hist.* iii. 67); 'The Lord bless us' (Barnard, 1641; and *Old English Edition*, No. xxi.); 'O how glorious art Thou' (*Old English Edition*, No. xxi.). The 8-part 'O praise God in His holiness' is printed in Burns's 'Anthems and Services,' 2nd series, c. 1847. The second half of the 4-part version of this anthem, beginning 'Praise Him in the cymbals,' is given in vol. ii. of the *Oxf. Hist. Mus.*

It is not easy to prepare an accurate list of White's MS. works, partly because early copyists have been free in supplying new words to his music, and partly because great confusion exists between Robert White and two 17th-century musicians named Matthew WHITE and William WHITE.

The following list of compositions is based on

¹ By W. B. S. in the Appendix to the first edition of this Dictionary.

that compiled by Dr. J. H. Mee for the first edition of this Dictionary.

I. LATIN MOTETS AND SERVICES

Ad Te levavi, c. 6. Ch. Ch., wanting tenor.
Appropinquet deprecatio, c. 5. Ch. Ch.
Cantate Domino, c. 8. R.C.M. (Husk, 1737), a piece without words (7 part of Ps. 96). It is identical with the opening of Exaudiat te.

Christe Qui Lux. B.M. Add. MSS. 18,936-9. A piece without words. Two lute arrangements, Add. MSS. 29,246.
Deus miseratur, c. 6. Ch. Ch., wanting tenor; MS. Bodl. Mus. Sch., E, 423, tenor only; Roy. Lib. B.M.

Domine non est exaltatum, c. 6. MS. Bodl. Mus. Sch., E, 1-5; Ch. Ch., wanting tenor; MS. Bodl. Mus. Sch., E, 423, tenor only. Extracts, c. 5. MS. Bodl. Mus. Sch., E, 1-5.

Domine quis habitabit. Three settings, Ch. Ch., wanting tenor. One of them is in MS. Bodl. Mus. Sch., E, 423, bassus only. Exaudiat te, c. 5. Ch. Ch.; Bodl. Mus. Sch., E, 1-5; B.M. Add. MSS. 18,936-9. Res 'Cantate' above.

Iustus, c. 5. MS. Bodl. Mus. Sch., E, 1-5.

Lentetur coeli. Roy. Lib. B.M., fragment? of 'Cantate.' Lamentations, c. 5. Heth, peccatum peccavit, etc. Ch. Ch. (twice); MS. Bodl. Mus. Sch., E, 1-5; B.M. Add. MSS. 17,792-6; MS. Bodl. Mus. Sch., E, 423, contra-tenor only. Fragments, 'De excelsis mihi,' Add. MSS. 18,936-9; wanting tenor. Ch. Ch.

Libera me, c. 4. B.M. Add. MSS. 17,802-5.
M. MS. Bodl. Mus. Sch., E, 423, tenor only, dated 1570 and ascribed to William Whyte. Tenbury MSS. Fragments, 'Quia fecit,' Ch. Ch.

Manus Tue, c. 5. Ch. Ch. (twice); MS. Bodl. Mus. Sch., E, 1-5; B.M. Add. MSS. 18,936-9. Lute arrangement, B.M. Add. MSS. 29,246; MS. Bodl. Mus. Sch., E, 423, contra-tenor only. Extracts in R.C.M., Husk, 1737 (twice); Roy. Lib. B.M.; and Ch. Ch. 46 (Veniant mihi).

Miserere mei, c. 5, with second part Con Mundum. MS. Bodl. Mus. Sch., E, 1-5; Ch. Ch.

Peccatum peccavit, c. 5 (not the same as the Lamentations above). Lute, B.M. Add. MSS. 29,246; and R.C.M., Husk, 1737 (twice), and without name; B.M. Add. MSS. 34,049 (cantus only).

Porcio mea, c. 5. Ch. Ch. (twice).

Precamur sancte Domine, c. 5. Ch. Ch. Four settings in Ch. Ch. MSS. 984-8 (Nos. 3, 4, 5 and 35); three settings in Ch. Ch. MSS. 979-83; and 3rd setting tenor. (The 2nd and 3rd settings in 984-8 are Nos. 78 and 76 in 979-83.) MS. Bodl. Mus. Sch., E, 423, contra-tenor only. An arrangement for lute, R.C.M. (Husk, 1964).

Regina coeli for men, c. 5. Ch. Ch., imperfect.

Tota pulchra, c. 5. Ch. Ch., wanting tenor.

II. ENGLISH ANTHEMS, ETC.

Behold now, praise the Lord. B.M. Add. MSS. 30,478-9; PH., ascribed to Matthew White.

If you love Me. B.M. Add. MSS. 29,289, alto only.

Lord, who shall dwell, c. 5. Ch. Ch. Printed by Burney.

O, how glorious art Thou, c. 5. Printed in *Old English Edition*. MS. Bodl. Mus. Sch., F, 11-16; B.M. Add. MSS. 30,478-9; PH., ascribed to Matthew White; Ch. Ch. (two organ scores).

O Lord, deliver me from mine enemies. Ch. Ch., wanting bass.

O Lord our governor. R.C.M. (Husk, 1642), by 'R. W., perhaps an adaptation from a Latin motet.

O praise God in His holiness, c. 4. The 2nd half is printed in the *Oxford Hist. of Mus.*, vol. II. B.M. Add. MSS. 30,480-4; Ch. Ch. organ score, differing somewhat from the last, and from the 8-part version.

O praise God in His holiness, c. 8. An enlarged version of the last: printed by Burns, E.C.L., Hawkins's score, tenor-book, and organ score; PH., ascribed to Matthew White; B.M. Add. MSS. 30,478-9; R.M. Harl. 7339 (Tudway), ascribed to Matthew White.

The Lord bless us, c. 5. Printed by Barnard, and in *Old English Edition*. Ch. Ch.; B.M. Harl. 7339 (Tudway), ascribed to Matthew White; E.C.L., Hawkins's score and organ-book (Matthew White); Fitzw.; R.C.M. (Husk, 1642); B.M. Add. MSS. 30,478-9 and 22,997.

To these, possibly, should be added (see above, under Matthew WHITE):

Zache stood forth. R.C.M. (Husk, 1642); Barnard's MSS., ascribed to Matthew White.

Doubtful anthems and adaptations are:

I will wash my hands. Ch. Ch. 1205. An adaptation (by Aldrich?) of 'O how glorious.'

Let Thy merciful ears. Ch. Ch., 1220-4. Cantus wanting and also in Fitzw., without the composer's name. Words in B.M. Harl. 4142. It is merely an adaptation of 'O how glorious.'

O God, the heathen are come, referred to as in 'York Catalogue,' in the article WHITE in the first edition of this Dictionary. Nothing is known of this York.

O Lord, rebuke me not. B.M. Harl. 7339 (Tudway), 'set to English words by the Rev. Dr. Aldrich,' also in Add. MSS. 17,842, as 'Husbands' from R. White. This is 'The Lord bless us,' with new words.

O sing unto the Lord, in Husk's Catalogue (R.C.M., 1642, Barnard MSS.), is apparently entered by mistake. There seems to be no such Anthem in the MS.

Praise the Lord, O my soul, R.C.M. (Husk, 1642), is an adaptation of 'Speret Israel,' from 'Domine non est.'

III. IN NOMINES, ETC.

In Nomine, c. 5. Ch. Ch.; MS. Bodl. Mus. Sch., D, 212-16; B.M. Add. MSS. 29,401-5; Lute Add. MSS. 29,246.

Three In Nomines, c. 4. MS. Bodl. Mus. Sch., D, 212-16. The first of these is in Lute MS. B.M. Add. MSS. 29,246. In Nomine for lute (different), B.M. Add. MSS. 29,246. 6 Fantasias for lute, B.M. Add. MSS. 29,246.

Utre mi fa sol la, for organ. Ch. Ch. 371.

Mr. Whyte his songs, c. 5. B.M. Add. MSS. 31,300. 'Bitts of 3 part songs in Partition with ditties 11 without ditties 16.' Burney, vol. III, p. 71. It is not known where this MS. is. G. E. P. A.

WHITE, WILLIAM (first half of 17th cent.), was the composer of fantasias, pavans, etc., for viols, of which many exist in MS. in the Bodleian Music School Collection (with the date 1641); in Christ Church and elsewhere. To him may be assigned the fantasias, etc., in B.M. Add. MSS. 17,792-6. A verse anthem, *a* 6, in two parts, 'Almighty Lord' and 'Bend down,' is in Myriell's collection, 1616 (B.M. Add. MSS. 29,372-7). Thomas Tomkins dedicated to him a five-part song in his set published in 1622. The name of William White with the date 1570 is attached to a Latin Magnificat in MS. Bodl. Mus. Sch., E, 423. This may be the work of an early William White, but the name is generally supposed to be a mistake for Robert White.

William White is named among the 'singing men' of Westminster, to whom mourning was granted for the funeral of Queen Elizabeth.¹

G. E. P. A.

WHITEHILL, CLARENCE (b. Marengi, Iowa, Nov. 5, 1871), distinguished dramatic bass. A pupil of H. D. Phelps in Chicago, he was in business in that city, and incidentally a church soloist, until 1896, when he went to Paris to study for the operatic stage under Giraudet and Sbriglia. His début was made at Brussels in 1899, as Friar Lawrence in Gounod's 'Romeo and Juliet,' and immediately afterwards he was the first American male singer to appear at the Paris Opéra-Comique. In 1900 he was the leading baritone with the Savage English Opera Company during its season in New York. After further study with Stockhausen at Frankfurt, he went to Bayreuth for study of the Wagnerian repertory with Frau Wagner—rôles in which he has won especial eminence.

In 1903-08 he sang principal parts at Cologne; in 1909-11 he was a member of the Metropolitan Opera Company in New York, and in 1911-15 of the Chicago Opera Company. Since 1916 he has again been with the Metropolitan forces. He has also sung Wagnerian rôles at Covent Garden during five seasons, and at Bayreuth and at Munich during three and two seasons respectively.

W. S. S.

WHITEHOUSE, WILLIAM EDWARD (b. London, May 20, 1859), violoncellist. After some early study of the violin, he took to the violoncello at the age of 13, studying for four years under Walter Pettitt. He entered the R.A.M. in 1877, receiving tuition from Piatti and Pezze, won the Bonamy Dobree prize in 1878, and joined the teaching staff in 1882. With a purity of style modelled on that of Piatti, his greatest successes were made in chamber music. He travelled in the provinces with Joachim, and was violoncellist to the Ludwig Quartet, the Bath Quartet Society (the oldest in England), and the 'London Trio'

¹ See C. H. Lafontaine, *The King's Music*, p. 44.

(Amina Goodwin, Simonetti, Whitehouse) with whom he toured in France and Italy. He resigned from the last of these organisations in 1925, being succeeded by Lebell. He holds the appointments of professor at the R.A.M., R.C.M. and Trinity College, and Examiner for the Associated Board, and has formed many distinguished pupils. The violoncello upon which he plays is a fine specimen of Francesco Ruggeri.

W. W. C.

WHITFIELD, CLARKE, see **CLARKE, John**.

WHITHORN (or **MAY-HORN**), a rustic oboe, the body constructed of green willow-bark twisted into a conical shape and fastened with hawthorn spines; the double reed is also made of soft willow rind pressed together. This primitive instrument used to be employed in Oxfordshire in connexion with a local Whit-Monday Hunt in the forest.

F. W. G.

WHITING, ARTHUR (b. Cambridge, Mass., June 20, 1861), American pianist and composer. He studied at the New England Conservatory with Sherwood and Chadwick and later at the Munich Conservatorium with Rheinberger, Buschmayer and Abel. In 1885-95 he lived in Boston, devoting himself chiefly to composition. Since 1895 he has lived in New York, and since 1907 he has been largely occupied with the giving of concerts of chamber music designed to be definitely educational. His 'Expositions' are a regular feature at Harvard, Yale and Princeton Universities. He has also become an authoritative exponent of music for harpsichord and clavichord.

With various American orchestras Whiting has played his pianoforte concerto, in D minor, and his Fantasy, B-flat minor. His other compositions include an overture, a suite for strings and horns, chamber music, vocal music and pianoforte pieces. He has also published valuable arrangements of classical harpsichord music for the piano.

W. S. S.

WHITING, GEORGE ELBRIDGE (b. Holliston, near Boston, U.S.A., Sept. 14, 1842; d. Cambridge, Mass., Oct. 14, 1923), an eminent American musician. At the age of 15 he succeeded Dudley Buck as organist of the North Congregational Church at Hartford, Conn. There he founded the Beethoven Musical Society for church practice. In 1862 he began his Boston career, playing at Dr. Kirk's church, and afterwards at Tremont Temple, and giving concerts on the Music Hall organ, and on many other large organs, and meanwhile studying with G. W. Morgan, organist in New York. In 1863 he visited England to study with W. T. Best, and while there often deputised for Best in church. Returning to America he became organist of St. Joseph's Church, Albany, where Emma Lajeunesse (see **ALBANI**) was a member of his choir. After three years he returned to Boston, where he was organist and director of

music at King's Chapel for five years, and at the Music Hall for one year. In 1874 he visited Berlin, and studied harmony with Haupt, and orchestration with Radecke. Returning to Boston again, he became principal organ-instructor in the New England Conservatory. He was also organist at the Cathedral of the Holy Cross, and conductor of the Foster Club, Boston. While Whiting was its director the club sang a number of his compositions, among others a setting of the prologue to Longfellow's 'Golden Legend,' and the first sketch of a cantata, 'The Tale of the Viking.' His compositions further included cantatas, church music and some symphonic works for orchestra. In 1879 he accepted a call from Theodore Thomas to take charge of the organ department in the College of Music at Cincinnati, of which Thomas was then director. In 1882 Whiting returned to Boston and the New England Conservatory. W. H. D., abridged.

WHITTAKER, WILLIAM GILLIES, Mus.D. (b. Newcastle-on-Tyne, July 23, 1876), has particularly devoted himself to choral conducting in Northumberland and obtained conspicuously fine musical results from the choirs under his control. These have included classes at Armstrong College, the Newcastle and Gateshead Choral Union and the Newcastle Bach Choir. The last-named, a small body of picked singers, was founded and trained by him for the purpose of giving Bach's cantatas in conditions approximating to those for which they were intended. Whittaker brought his Bach Choir to London for a three days' festival in 1922. He gave the first complete performance of Byrd's 'Great Service' at Newcastle and repeated it at St. Margaret's, Westminster, in 1924. He has published many choral arrangements of folk-songs (for list see *B.M.S. Ann.* 1920), as well as original choral pieces. A quintet for strings and PF, 'Among the Northumbrian Hills,' and 'A Lykewake Dirge' (choir and orch.) are published by the Carnegie Trust. Whittaker is editor of the series of Bach's cantatas with English texts by C. Sanford TERRY (*q.v.*) in process of publication by the Oxford University Press. C.

WHOLE-TONE SCALES. From the chromatic scale of twelve semitones can be extracted two scales, each consisting of six whole tones. The notation of them is quite arbitrary, and will normally depend on the context in which they are used.

Although they are symmetrical with respect to each other, these scales have

no note in common and have therefore no mutual harmonic relations. There is also no interval of a perfect fifth within them, and they have thus no unambiguous associations with the classical major-minor systems. They have, however, been used for melodic and harmonic expression within their prescribed limits, and still more frequently in contrast with traditional idioms. Some of the possible harmonic inferences of certain whole-tone chords are given in the article on HARMONY.

G. D.

WHYTE, ROBERT, see WHITE, Robert.

WHYTE, WILLIAM, an Edinburgh music-publisher, 'at the sign of the Organ,' 1 South St. Andrew Street (this number was changed to 17 and then to 12), where he remained until 1826. In this year he removed to 13 George Street, having entered into partnership. He published great quantities of half-sheet and whole-sheet Scots songs, but he is best known as having engaged Haydn to arrange two collections of Scots songs, in rivalry of George Thomson's similar publication; Thomson was much hurt at Haydn undertaking the work. The arrangements for Whyte were done in 1802-1803, and were sixty-five in number; they were issued in two folio volumes in 1806 and 1807, and for this Haydn received 500 florins.

F. K.

WHYTHORNE, THOMAS (b. 1528¹; d. after 1590), composer. He seems to have been an amateur musician and a man of sufficient means to sustain the cost of printing his compositions. In 1571 he published:

¹ Songs, for three, fower, and fve voyces composed and made by Thomas Whythorne, Gent. the which songes be of sundry sortes, that is to say, some long, some short, some hard, some easie to be songe, and some betwene both: also some solenne, and some pleasant or mery; so that according to the skill of the singers (not being Musicians) and disposition and delite of the hearers, they may here finde songes for their contentation and liking. Now newly published An. 1571. At London, Printed by John Daye, dwelling over Aldersgate.

The preface, printed only in the tenor partbook,² shows that Whythorne had travelled 'in sundry forein land' [*sic*] paying special attention to various kinds of music,

'But chiefly the Italian, among the which is one That called is Napolitane (a prety mery one).'

This volume has historical importance, for it is the only published set of secular vocal compositions in England between that of Wynkyn de Worde in 1530 and Byrd's 'Psalmes, Sonets and Songs' in 1588. Nor does the music deserve the severe censure that has been heaped upon it. Burney described both the words and music of this set as being 'truly barbarous,' and other writers have followed Burney's lead rather blindly. Whythorne can scarcely be called a great composer, but it must not be forgotten that secular vocal music in England in 1571 cannot fairly be compared with that of 25 years later. Nevertheless the 1571 book contains some really

¹ This date is calculated from the statement on his portrait.

² Four part-books (treble, medius, tenor, bassus) are at Ch. Ch. The Bodleian contains only tenor partbook, of which the title-page is missing.

excellent songs, designed on the plan of the Ayre of a generation later rather than that of the madrigal; the melody is in the top voice part, the lower voices being of subordinate interest. 'As thy shadow itself apply'th' has a splendid flowing melody, and this song alone is sufficient to confute those who have so greatly undervalued Whythorne's work. Philip Heseltine has edited and published this song together with eleven others selected from this same set, and he claims that several of them are worthy to rank with the best of the Ayres of the lutenists who flourished some thirty years later.¹ Heseltine also points out that Whythorne's 'Buy new broom' is the earliest printed example of an English solo-song with instrumental accompaniment; the accompanying instruments in this instance were viols. There are 76 compositions in this set. Most of them are moral songs, but the Venite and some other psalms are also included.

Whythorne's second publication is of less interest. It was entitled:

'Duos, or Songs for two voices, composed and made by Thomas Whythorne Gent. Of the which, some be playne and easie to be sung, or played on Musically Instruments, & be made for young beginners of both those sorts. And the rest of these Duos be made and set forth for those that be more perfect in singing or playing as aforesaid, all the which be deuicid into three parts. That is to say:

'The first, which doth begin at the first song, are made for a man and a child to sing, or otherwise for voices or Instruments of Musike, that be of the like compass or distance in sound.

'The second, which doth begin at the xxiii. song, are made for two children to sing. Also they be aptly made for two treble Cornets to play or sound: or otherwise for voices or Musical Instruments, that be of the lyke compass or distance in sound.

'And the third part which doth begin at the xxxvii. song (being all Canons of two parts in one) be of diuers compasses or distances, and therefore are to be used with voices or Instruments of Musike accordingly.

¹ Now newly published in An. Do. 1590. Imprinted at London by Thomas Este, the assigné of William Byrd. 1590.

This set was dedicated to the Earl of Huntingdon, and the composer's portrait at the age of 40 was printed at the end of each of the partbooks. The first twelve pieces are psalms, but the remaining 40 numbers have only the opening words printed with the music.

E. H. F.

WIDERSPÄNSTIGEN ZÄHMUNG, DER

—The Taming of the Shrew, opera in 4 acts; text adapted by J. V. Widmann from Shakespeare; music by Goetz; produced Mannheim Oct. 11, 1874; in English (Rev. J. Troutbeck), Carl Rosa Co., Her Majesty's Theatre, Jan. 20, 1880; New York, Metropolitan Opera House, 1916. G.

WIDMANN, ERASMUS (b. Hall, Württemberg, 1572; d. Rothenburg a./d. Tauber, Oct. 1634), cantor-preceptor at Graz c. 1590, Kapellmeister to Count Hohenlohe at Weickersheim in 1604; from c. 1614 preceptor and cantor at the school of Rothenburg a./d. Tauber. In 1629 he styles himself 'P. L. Caes.' (Imperial poet-laureate.) He was a prolific composer of psalms, motets, hymns and other church music, also secular songs and instrumental music (canzons, intradas, ballets and courants), also

a theoretical treatise, *Praecepta musicae latino-Germanica* (Nuremberg, 1615). (Schilling; Riemann, Q.-L.). R. v. d. S.

WIDOR, CHARLES MARIE JEAN ALBERT (b. Lyons, Feb. 22, 1845), organist and composer. He studied first under his father (organist of St. François, Lyons) afterwards going to Brussels, where he was a pupil of Lemmens for organ and Fétis for composition. In 1870 he became organist of St. Sulpice, Paris. He succeeded Franck as organ professor at the Paris Conservatoire, and later followed Dubois as professor of composition. He soon distinguished himself, not only as a player, but also as a writer (he was critic for the *Estafette*) and a prolific composer in many fields. He is Permanent Secretary to the Académie des Beaux-Arts. His works comprise many pianoforte pieces, songs, symphonies in F and A for orchestra, ten symphonies for organ and one for organ and orchestra, concertos for pianoforte, violin and violoncello, a pianoforte quintet and trio, sonata for pianoforte and violin, a suite for flute, six duets for pianoforte and organ, a Mass for two choirs and two organs, Ps. cxlii for chorus, orchestra and organ, a ballet in 2 acts, 'La Korrigane' (produced at the Opéra, Dec. 1, 1880), an opera in 3 acts and 4 tableaux, 'Maître Ambros' (Opéra-Comique, May 1886), a 4-act opera, 'Les Pêcheurs de Saint Jean' (Opéra-Comique, Dec. 1905), a lyric drama 'Nerto' (Opéra, Oct. 27, 1924), incidental music to 'Conte d'Avril' and 'Les Jacobites,' a symphonic poem, 'Une Nuit de Valpurgis' (performed in London at a Philharmonic concert on Apr. 19, 1888, under the composer's direction), etc.

He is best known in this country as an organ composer, certain movements from his symphonies for that instrument having achieved great popularity. These works are among the most important in the organ repertory, both in scope and in the influence they have had on organ technique, idiom and registration. They date from two periods of the composer's life, Nos. 1-4 being op. 13, Nos. 5-8, op. 42, 'Symphonie gothique,' op. 70, 'Symphonie romane,' op. 73, and 'Sinfonia sacra' (for organ and orchestra), op. 81. The title 'symphony,' however, is sometimes inappropriate, especially in the case of some of the earlier set, which, consisting as they do of six or seven movements, some rather slight and short, would be better termed suites. Justification is perhaps found in the treatment of the organ as a kind of self-contained orchestra. The range of style and mood is very wide, the movements comprising canons, fugues, toccatas, marches, scherzos, some highly-wrought adagios and (in No. 9) a very fine set of variations—really a free kind of passacaglia. All the later symphonies, and certain sections in the first four, make severe demands on the resources of both player and

¹ Thomas Whythorne. An unknown Elizabethan composer, by Peter Warlock. Oxford University Press.

instrument—so much so that only lately have many of the best movements begun to receive due recognition. Some recent performances (1924) by prominent recitalists in England and America, of the whole set of symphonies in their entirety, bear witness to the growing appreciation of this important side of Widor's output.

H. G.

WIECK, (1) FRIEDRICH (b. Pretsch, near Torgau, Saxony, Aug. 18, 1785; d. Dresden, Oct. 6, 1873), a remarkable pianoforte-teacher, and father of Clara SCHUMANN (q.v.), began life as a student of theology at Wittenberg, preacher and private tutor, and was for some time engaged in a piano factory and library at Leipzig.

His first wife was Marianne Tromlitz, and was the mother of Clara Josephine (2), his famous daughter, and of two sons, Alwyn (3) and Gustav. This union, however, was severed and the lady married Bargiel, father of Woldemar BARGIEL (q.v.). Wieck married again, July 31, 1828, Clementine Fechner, by whom he had three children, Cäcilie, Clemens (died young) and Marie (4). About 1844 he removed from Leipzig to Dresden, where he resided till his death, spending the summer at Löschwitz, and leading a very musical life, his house a rendezvous for artists. Mendelssohn endeavoured to secure him as professor of the piano in the Leipzig Conservatorium, but without success, and Moscheles was appointed instead.

Wieck began to teach the piano on Logier's system, but soon abandoned it for a method of his own, if that can be called a method which seems to have consisted of the application of the greatest care, sense and intelligence possible to the teaching of technique and expression. He embodied his views on the piano and singing in a pamphlet entitled *Clavier und Gesang* (1853, 2nd ed., Leipzig, 1875), translated into English by H. Krüger, of Aberdeen, with three portraits. Among Wieck's pupils may be mentioned Hans von Bülow, who, in a letter quoted in the translation just mentioned, speaks of him with respect and gratitude. But his daughter Clara was his best pupil, and his greatest glory.

An institution called the 'Wieck-Stiftung' was founded in Dresden on Aug. 18, 1871, his eighty-sixth birthday, partly by funds of his own. He continued to see his friends almost up to the end of his life, and an amusing account of a visit to him in 1872 is given by Miss Amy Fay (*Music Study in Germany*, London, 1886, p. 147). He published some studies and dances for the piano, exercises in singing, and a few pamphlets, *Verfall der Gesangkunst* (Decay of the Art of Singing), etc. He edited a number of classical pianoforte works which are published anonymously, but distinguished by the letters D.A.S. (Der alte Schulmeister).

(2) CLARA JOSEPHINE (b. Leipzig, Sept. 13, 1819; d. Frankfurt-on-Main, May 20, 1896), famous pianist, married Robert Schumann,

Sept. 12, 1840. Her career is traced under SCHUMANN.

BIBL.—B. LITTMANN, *Clara Schumann*, 3 vols., 1902-08; F. MAY, *The Girlhood of Clara Schumann*, 1912.

(3) ALWYN (b. Leipzig, Aug. 27, 1821; d. there, Oct. 21, 1885), studied the violin under David, was in the orchestra of the Italian Opera at St. Petersburg (1849-59), lived later in Dresden, and published (1875) *Materialien zu Fr. Wieck's Pianofortemethodik*. (See Riemann.)

(4) MARIE (b. Leipzig, Jan. 17, 1832; d. Dresden, Nov. 2, 1916), was educated by her father. She visited England in 1859 and 1864. She was much esteemed for many years in Dresden as a teacher both of the pianoforte and singing. She edited several of her father's works.

g., addns.

WIENIAWSKI (1), HENRI (b. Lublin, Poland, July 10, 1835; d. Moscow, Apr. 2, 1880), famous violinist, was the son of a medical man. His great musical talent showed itself so very early that his mother, a sister of the pianist Ed. Wolff, took him at the age of 8 to Paris, where he entered the Conservatoire, and was soon allowed to join Massart's class. As early as 1846, when only 11, he gained the first prize for violin-playing. He then made a tour through Poland and Russia, but returned to Paris to continue his studies, more especially in composition. In 1850 he began to travel with his brother Joseph (2), and appeared with great success in most of the principal towns of the Netherlands, France, England and Germany. In 1860 he was nominated solo-violinist to the Emperor of Russia, and for the next twelve years resided principally at St. Petersburg. In 1872 he started with Anton Rubinstein for a lengthened tour through the United States, and after Rubinstein's return to Europe, extended his travels as far as California. Returning to Europe (1874), he accepted the post of first professor of the violin at the Conservatoire of Brussels, as Vieuxtemps's successor; but after a few years quitted it again, and though his health was failing, resumed his old wandering life of travel. An incident connected with this last tour deserves record. During a concert which he gave at Berlin, he was suddenly seized by a spasm and compelled to stop in the middle of a concerto. Joachim, who happened to be among the audience, without much hesitation stepped on to the platform, took up Wieniawski's fiddle, and finished the programme amid the enthusiastic applause of an audience delighted by so spontaneous an act of good fellowship.

Struggling against his mortal disease, Wieniawski made for Russia, but broke down at Odessa, and was conveyed to Moscow, where he died.

Wieniawski was one of the most eminent violin-players; a great virtuoso, distinguished from the mass of clever players by a striking and peculiar individuality. Technical difficulties

did not exist for him—he mastered them in early childhood. Left hand and right arm were trained to perfection, and while the boldness of his execution astonished and excited his audience, the beauty and fascinating quality of his tone went straight to their hearts, and enlisted their sympathy from the first note. The impetuosity of his Slavonic temperament was probably the most prominent and most characteristic quality of his style, in which respect he much resembled his friend Rubinstein; but warm and tender feeling, as well as gracefulness and piquancy, were equally at his command. At the same time he was so thoroughly musical as to be an excellent quartet-player, though perhaps more in sympathy with the modern than with the older masters. Impetuous, warm-hearted, witty, an excellent story-teller—such was the man, and such were the qualities which shone through his performances. His fiery temperament led him sometimes to a certain exaggeration, especially in quick movements, or to such errors as the introduction of an enlarged cadenza in Mendelssohn's concerto; but who would not readily forgive such peccadilloes to so rare and genuine a talent?

His compositions—two concertos, a number of fantasias, pièces de salon, and some studies—are not of much importance, though much played. Among the most famous are:

Polonaise (op. 4); 'Souvenir de Moscou' (op. 6); Le Carnaval russe (op. 11); 'Légende' (op. 17); Fantasia on Gounod's 'Faust' (op. 20).

P. D.

(2) JOSEPH (b. Lublin, May 23, 1837; d. Brussels, Nov. 11, 1912), brother of the above, was an eminent pianist, trained at the Paris Conservatoire and with Liszt at Weimar. He toured much with his brother, held a professorship at the Moscow Conservatoire and later at the Brussels Conservatoire. He was the composer of some chamber music and pianoforte music.

BIBL.—L. DELCROIX, *Joseph Wieniawski*. 1908.

WIEPRECHT, WILHELM FRIEDRICH (b. Aschersleben, Aug. 8, 1802; d. Berlin, Aug. 4, 1872), was the inventor of several improvements in wind-instrument construction and reorganised the system of instrumentation of the Prussian military bands. He was made director of the music of the Prussian Guards. For an account of his innovations see WIND BAND.

WIETROWETZ, GABRIELE (b. Laibach, Jan. 13, 1866), violinist. In her 6th year she began to study the violin with her father, a military bandsman, who placed her, five years later, in the hands of Casper, director of a musical college in Styria. Here she distinguished herself, and after four years of study was assigned a stipend, which enabled her to go to Berlin, enter the Hochschule and take lessons of Joachim (in 1882). At the end of the first year she gained the Mendelssohn prize

(1500 marks), and achieved a similar success two years later. She spent three years in studying at the Hochschule, during which time she was engaged to play Bruch's 2nd concerto at the Berlin Philharmonic, and later gave a concert in which Joachim took part, playing with her Bach's double concerto and conducting the orchestra in concertos by Brahms and Spohr.

She made many concert tours in her own country (scoring a brilliant success at the St. Cecilia Festival in Münster in Brahms's Concerto), and in Switzerland, Norway, Sweden, etc. In 1892 she made her début in England at the Crystal Palace concerts, and led for the first time the Quartet of the Popular Concerts, revisiting London thirteen times in the course of the ensuing seven years. On the secession of Miss Emily Shinner (Mrs. Liddell) from the Quartet which bore her name, Fräulein Wietrowetz became the first violin. She became violin professor at the Hochschule at Berlin (1901–12), and upheld her position as a worthy representative of the Joachim school.

W. W. C.

WIGMORE HALL. This concert hall was built by the firm of BECHSTEIN (*q.v.*) as a part of their premises in Wigmore Street, and was originally known as Bechstein Hall. It was opened to the public on June 1, 1901, with a concert at which Ysaÿe, Busoni and Ben Davies took part, and has always been in great request for recitals and concerts of chamber music. The seating capacity is 600. For a short time during the war period, 1914–18, the hall was closed; it reopened in Jan. 1917 under the name it now bears. The hall is managed by W. J. K. Pearson, who has kindly supplied the above information. N. C. G.

WIGTHORPE, WILLIAM (late 16th and early 17th cent.), English composer. A student of New College, Oxford, he graduated Mus.B. in 1605, after having studied music for 10 years.¹ B.M. Add. MSS. 17,786–91 contains the following madrigals by Wigthorpe (although 'To plead my faith' is attributed to D. Batchelor in Robert Dowland's 'Musical Banquet,' 1610):

¹ Dowland's 'sorrow,' beginning 'Sorrow . . . come,' a 5; 'Come hither,' a dialogue a 6; 'Smithes are good fellows,' a 5; 'Were I made Jure,' a 5; 'To plead my faith,' a 5; 'I am not I of such beleefe,' a dialogue.

Two anthems by him, 'I musing stand' and 'O give thanks,' are included in the Batten Organ Book (see BATTEN), and the words of some others are given in Clifford's collection (1663).

WIHAN, HANUŠ, see BOHEMIAN STRING QUARTET.

WIHTOL, JOSEPH (b. Wolmar, Latvia, July 26, 1863), is the national exponent of Lettish music, a pupil of Johannsen and Rimsky-Korsakov at the Conservatory in St. Peters-

¹ C. F. Abdy Williams, *Degrees in Music*.

burg, where, in 1886, he was appointed professor of theory. The breakdown of the Russian Empire brought with it the formation of the little Baltic States, and since 1918 Wihtol has been the heart and soul of the Lettish musical movement in Riga, where he is the director of the National Opera and the Lettish Conservatory of Music. His works exhale the typically Lettish characteristic of a melancholy that is wholly apart in sentiment and quite different in mood from that of Russian music.

WORKS.—'Das Fest der Ligo' (a symphonic poem on a Lettish theme), op. 4; Lettish overture, 'Špridīda', op. 37; phantasy on Lettish folk-songs for v'cl. and orch., op. 42; dramatic overture, op. 21; a symphony in *MS.*; string quartet, op. 27; five sonatas, opp. 30, 32, 33, 41; many choral works and Lettish folk-songs.

K. D. H.

WILBYE, JOHN (b. Diss, 1574; d. Colchester, Sept. 1638), madrigal composer. He was baptized at Diss, co. Norfolk, on Mar. 7, 1573/4. He was the third son of Matthew Wilbye, a tanner, who was in a prosperous position as a landowner at Diss, and there can be no doubt that this was the composer's birthplace. While still a youth he attracted the notice of the Cornwallis family, seated at Brome Hall in the same neighbourhood. Elizabeth, daughter of Sir Thomas Cornwallis, married Sir Thomas Kytson, son of the Sir Thomas who built Hengrave Hall, near Bury St. Edmunds, and not far distant from Brome over the Suffolk border. Wilbye became resident musician at Hengrave about the year 1595, and had the advantage of living in surroundings where music was greatly encouraged. The younger Kytson did much to improve the magnificence of Hengrave, and also owned a town house in Austin Friars, where Wilbye accompanied the family on their visits.

In spite of changes in ownership, Hengrave Hall has undergone surprisingly little alteration during the three centuries that have elapsed since Wilbye lived there; the Kytson family portraits still hang on the walls, and many priceless documents have remained in the house. Among these are the very interesting inventories taken in 1602 and 1621; from these we learn exactly which room was occupied by Wilbye, and details as to the furniture of his apartment are recorded. There are also lists of the musical instruments, and books which would have been in his keeping. Among the papers belonging to this date are original letters of many notable people, including Sir Philip Sidney; and of special interest to musicians is a holograph letter of Wilbye dated from Hengrave, Sept. 1628, and addressed to his friend Mistress Camocke at the house of Lady Rivers at Colchester (*Hengrave Letter Book II.*, No. 131). This letter is reproduced in facsimile in *ENG. MADR. SCH.*, vol. vi.

Wilbye continued to live at Hengrave until the death of Lady Kytson, who in her widow-

hood kept up the establishment in great state. Her death took place in 1628. Wilbye then retired and spent the last ten years of his life at the house of Lady Rivers, the younger daughter of Sir Thomas Kytson, at Colchester. The house is described by Morant in his history of Colchester as 'the Great brick house' opposite Holy Trinity Church. The house is still (1927) standing, and it was there that Wilbye died in Sept. 1638. He was buried at Holy Trinity, but there is nothing to show the position of his grave. Wilbye was a man of some substance at the time of his death. Many years previously the Kytsons had granted him a lease of the best sheep-farm on their estate in reward for long and faithful services; and he owned land at Diss, Bury St. Edmunds and elsewhere. He died unmarried. His will (P.C.C. 145 Lee) was dated Sept. 10, 1638, and proved Nov. 13 in the same year; it is printed in full in the preface of *ENG. MADR. SCH.*, vol. vi. Two Latin motets 'Homo natus,' *a* 6, and 'Ne reminiscaris,' *a* 5, a treble solo with instrumental accompaniment, were edited by Arkwright, and printed in No. xxi. of his *OLD ENGLISH EDITION*.

Except for two contributions to Leighton's 'Teares or Lamentacions' (1614), Wilbye has left no English Church music, and only a fragment of a single instrumental piece by him is known. It is as a madrigal composer that he has won enduring fame, and in the opinion of many well-qualified judges he is considered the greatest of all madrigal writers, whether English or continental. For style and finish he is perhaps most nearly approached by Luca Marenzio, and certainly he stands as the greatest stylist of the English madrigalists.

It was in 1598 that Wilbye's first volume was published. It was entitled 'The First Set of English Madrigals to 3. 4. 5. and 6. voices.' The dedication was to Sir Charles Cavendish, who was a cousin of Michael CAVENDISH (*q.v.*), the lutenist and madrigalist. Sir Charles married Elizabeth, the elder daughter of Sir Thomas Kytson of Hengrave. The dedication is dated from Kytson's house in 'th' Augustine Fryers the xii of April 1598.' The set contains 30 madrigals, of which 6 are for 3 voices, 6 for 4, 10 for 5, and 8 for 6 voices. Among the best are 'What needeth all this travail' and 'Adieu, sweet Amaryllis,' 'Flora gave me fairest flowers' and the six-part version of 'Lady, when I behold.' Eleven years later he published 'The Second Set of Madrigales to 3. 4. 5. and 6. parts apt both for Voyals and Voyces,' 1609. This set was dedicated to Lady Arabella Stuart, whose mother, Lady Lennox, was Elizabeth Cavendish, sister of Sir Charles the patron of Wilbye's first set. This second set contains 34 madrigals, 8 each for 3, 4, and 6 voices, and 10 for 5. Wilbye's style in this second volume is decidedly more mature and

individual than in his earlier work; a large proportion of the madrigals in this set belong to the very highest class. 'Draw on, sweet night,' 'Stay, Corydon' and 'Softly, O softly drop,' which follow each other in the six-part section, are superb examples of madrigal writing. Almost equally fine are 'Happy, O happy he,' *a* 4, and 'Oft have I vowed,' *a* 5; the deservedly popular 'Sweet honey-sucking bees' is also in the very first rank with its splendidly contrasted sections, its varied grouping of the voices and its strong and compelling sense of rhythm. There is scarcely one weak number in the set.

Wilbye's contribution to 'The Triumphes of Oriana' was 'The Lady Oriana.' This six-part madrigal is characteristic of him in his brighter mood.

Of MS. music by Wilbye, there is an imperfect 'Oh, who shall ease me,' *a* 6, wanting the 2nd cantus and altus parts, in the Bodleian Library (MS. Mus. f, 20-24). The altus part of three Phantasias, *a* 4, is in B.M. Add. MSS. 29,427. A volume of Lessons for the Lute was sold in the library of the Rev. William Gostling of Canterbury in 1777, but it is not known whether it still exists.

Both Wilbye's sets of Madrigals were reprinted for the MUSICAL ANTIQUARIAN SOCIETY (*q.v.*); more recently they were printed as vols. vi. and vii. of *ENG. MADR. SCH.* The preface to vol. vi. gives many details concerning the life and family of Wilbye, including wills and other documents. For further information, see paper on Wilbye by Fellowes, *Mus. Ass. Proc.*, 1914, and Fellowes's *English Madrigal Composers*.

E. H. F.

WILD, FRANZ (*b.* Hollabrunn, Lower Austria, Dec. 31, 1791; *d.* Ober Döbling, near Vienna, 1860), tenor singer, as a boy entered the choir of the monastery at Klosterneuburg, near Vienna, and thence was promoted to the court chapel. His voice changed with extreme rapidity in his 16th year, the process only lasting two months, after which he became a chorus-singer, first at the Josefstadt, and then at the Leopoldstadt theatres. A happy accident brought him into notice. General excitement about the war prevailing at the time, some battle-songs by Collin (of Beethoven's 'Coriolan'), set to music by Weigl, were being sung at the theatre, when one night the solo-singer fell ill, and Wild, though unprepared, took his place, and sang so finely that he was received with acclamation. He was at once offered an engagement for the Kärnthnerthor theatre, to sing in the chorus and take subordinate parts. His powerful sonorous voice told with so much effect one night in the quartet in 'Uthal,' that Hummel recommended him to Prince Esterhazy (whose band at Eisenstadt Hummel was conducting), and he entered on an engagement for

six years from Oct. 11, 1810. Soon after, however, Count Ferdinand Palffy endeavoured to secure him for the theatre 'an der Wien,' but Prince Esterhazy declined to let him go. Wild pressed for his release, which was at last granted in Sept. 1811. In the meantime he had taken the law into his own hands, and was singing Ramiro in Isouard's 'Cendrillon' at the above theatre, first 'als Gast' (July 9), and then (Aug. 28) with a permanent engagement. His success was great, and when the theatre was united under one management with the Kärnthnerthor (1814) he removed thither, and as Jean de Paris (1815) excited universal admiration by the liquid tones of his voice. For two years he was acting there with those excellent singers FORTI and VOGL (*q.v.*), his last appearance being June 4, 1816, after which he started on a tour through Frankfort, Mainz, Leipzig, Berlin, Dresden, Hamburg and Prague. On Nov. 9, 1816, he appeared for the first time as Sargines at Darmstadt, having been made Kammersänger to the Grand Duke of Hesse. Here he remained till 1825. From Darmstadt he went to Paris, principally for the sake of further study with Rossini and Bordogni, and after this accepted an invitation to Cassel as Kammersänger. In July 1829 he went to Vienna, his engagement being made permanent on Nov. 1, 1830, and there he remained till 1845, except for occasional tours. One of these brought him to London in 1840, where he appeared with Staudigl and Sabine Heinefetter at the Princess's in 'Das Nachtlager,' 'Jes-sonda,' 'Iphigénie en Tauride,' and 'Der Freischütz.' His last appearance on the stage was at the Kärnthnerthor theatre, Mar. 24, 1845, his part being Abayaldos in 'Dom Sebastian.' After this he became régisseur. Latterly his voice had acquired so much the tone of a baritone that he sang such parts as Don Juan, Zampa and Sever with irresistible power and energy. High notes he never forced, but preserved the full power and freshness of his middle register, which told most effectively in declamation and recitative. As a concert-singer he was always well received, but perhaps his best singing of all was in church. Those privileged to hear him sing the Lamentations during Holy Week will never forget how the full round tones of his superb voice floated forth in perfect devotional feeling.

One of the happiest events of Wild's life was his meeting with Beethoven in 1815, at a festival-concert on the birthday of the Empress of Russia. The last number of the programme was the quartet in 'Fidelio,' 'Mir ist so wunderbar.' Through some curious chance Beethoven himself appeared, and extemporised for the last time in public, before an audience of monarchs and statesmen. Wild had arranged to substitute 'Adelaide' for an air of Stadler's: Beethoven was delighted, and at once offered to accompany

it. 'His pleasure at my performance,' continues Wild, 'was so great that he proposed to instrument the song for orchestra. This never came off, but he wrote for me the cantata¹ "An die Hoffnung" (to Tiedge's words), which I sang to his accompaniment at a very select *matinée*.' On Apr. 20 of the next year, Wild gave a little musical party at which he sang the same songs; Beethoven again accompanied him, and this was his farewell as an accompanist, as the other had been his farewell as a player.²

C. F. P.

WILDER, JÉRÔME ALBERT VICTOR VAN (b. Welteren, Belgium, Aug. 21, 1835; d. Paris, Sept. 8, 1892), lyric poet and musical critic. While studying for his doctor's degree in law and philosophy at the University of Ghent, he also frequented the Conservatoire. Having written for a time for the *Journal de Gand* he determined, like his countrymen Vaez and Gevaert, to push his way in Paris. He began by translating songs, and ended with adapting Wagner's works for the French stage. He wrote French words to Handel's 'Messiah' and adapted for the French stage Mozart's 'Oca di Cairo'; Schubert's 'Häusliche Kreig'; Paisiello's 'Barbiere di Siviglia'; Weber's 'Silvana'; and Wagner's 'Meistersinger'; 'Tristan und Isolde,' 'Ring der Nibelungen' ('Rheingold,' 'Walküre,' 'Siegfried' and 'Götterdämmerung'), and 'Parsifal.'

He wrote criticisms and *feuilletons* in *L'Événement*, *L'Opinion nationale*, *Le Parlement*, and *Le Gil Blas*; was a contributor to the *Ménestrel* from June 1871-84, and republished *Mozart: l'homme et l'artiste* (Paris, 1880, 8vo, and 1881, 12mo), and *Beethoven: sa vie et son œuvre* (Paris, 1883, 12mo). To him also we owe the publication of Mozart's ballet 'Les petits Riens.' G. C., addns.

WILDER, PHILIP VAN (or PHILIP DE WILDEROE), a composer of the early 16th century, whose MSS. in England, often assigned to 'Mr. Phillips,' have been much confused with those of Peter PHILLIPS (*q.v.*).

Van Wilder was appointed lutenist to King Henry VIII. in 1538, and in the inventory of goods (*Harl.* 1419) taken after the King's death he is described as keeper of the musical instruments at Westminster. In 1550 he appears as gentleman of the Privy Chamber to Edward VI., commissioned to collect children for the Chapel Royal. His identity with the earlier 'Mr. Phillips' is established by a MS. of Baldwin's at Christ Church, Oxford, in which is a motet, 'Aspice Domine,' by 'Mr. Phillips of the King's privy chamber.' The same motet occurs, ascribed to 'Phillips,' with the date 1568, in Sadler's MS. (Bodl. Mus. e. 1-5) and also in B.M. Add. MSS. 31,390. 'A booke of In nomine, and other

solfainge songs of v. vi. vii. and viii. parts for voyces and instruments,' which contains fifteen other pieces by the same composer. It is therefore safe to conclude that these, and the similar lute arrangements in the R.C.M. (Sac. Har. Cat. No. 1964), are all by Philip van Wilder. Music by him was printed in Antwerp and Paris collections of 1544, 1545, 1572 and 1597,³ but the style of all these is earlier than that of Peter Philips, and there can be but small doubt that nothing by the latter composer dates from much earlier than the Pavana of 1580 in the 'Fitzwilliam Virginal Book,' described by the writer of the MS. as 'the first one Philips made.' It may be mentioned that besides Philip van Wilder a Peter van Wilder was appointed minstrel to Henry VIII. in 1519; his name is found among the royal musicians until the reign of Mary. A Robert Philip was also a pupil of Cornysse in 1514; he was a singing-man at St. George's Chapel, Windsor, before 1550, and also a gentleman of Edward VI.'s Chapel Royal, but he is not known to have composed any music. W. B. S.

WILDERER, JOHANN HUGO, organist in 1696 of the Elector Palatine, afterwards his Kapellmeister at Düsseldorf, Mannheim and Heidelberg until 1723. He composed a number of operas, also *Modulationi sacre a 2, 3 e 4 voci e violini (Q.-L.)*.

WILHELM, CARL (b. Schmalkalden, Sept. 5, 1815; d. there, Aug. 16, 1873), was the composer of 'Die Wacht am Rhein' to the verse of Max Schneckenburger. He directed the Liedertafel at Crefeld from 1840-65, composed his famous song in 1854, and received an annual pension of £150 for it in 1871. G.

WILHELMJ, AUGUST DANIEL FERDINAND VICTOR (b. Usingen, duchy of Nassau, Sept. 21, 1845; d. London, Jan. 22, 1908), famous violinist and teacher (see VIOLIN-PLAYING).

His father, who was a doctor of laws and for some time Attorney-General of Prussia, owned considerable property in vineyards at Hattenheim. Wilhelmj's mother, née Charlotte Petry, was an excellent pianist, a pupil of André, Offenbach and Chopin. Wilhelmj's earliest instruction in violin-playing was given him in 1849, by Konrad Fischer, who was then the Duke of Nassau's Kapellmeister, at Wiesbaden. He developed into an able violinist at an early age, indeed his talent was so precocious that when Henriette Sontag heard him in 1852 she embraced the seven-year-old child warmly, exclaiming: 'You will be the German Paganini.' Her prediction was destined to bear fruit speedily, for on Jan. 8, 1854, Wilhelmj made his first public appearance at a charity concert given at Lumbourg-on-the-Lahn, when he created a great impression; later his playing at the

¹ Op. 94, composed in 1816, not to be confounded with an earlier setting of the same poem, op. 32, composed 1805.

² Thayer, *Beethoven*, iii. 327, 332 (first ed.); *Krehbiel*, ii. 305, 338.

³ See Eitner's *Sammelwerke*. Van der Straeten conjectures that there may have been two Philip Van Wilders, one in the Netherlands and one in England.

Court Theatre, Wiesbaden, is said to have 'astounded his audience.' Prince Emil von Wittgenstein sent Wilhelmj to Liszt, who was so enchanted with the child's playing of Spohr's 8th concerto and Ernst's 'Airs hongroises,' that he sent him to David at Leipzig with the words: 'Let me present to you the future Paganini! Look well to him!' This was in 1861. In the following year he played Ernst's 'Concerto pathétique' at a Conservatorium Concert, and on Nov. 24 of the same year he played Joachim's Hungarian concerto at a Gewandhaus concert with conspicuous and admitted success. He remained at the Conservatorium for three years, having Hauptmann and Richter to teach him harmony and composition. Then (in 1864) he went to Frankfurt for further study with Raff.

The following year (1865) saw Wilhelmj begin the wandering life of a virtuoso. He first went to Switzerland; then in 1866 to Holland, and in the summer—through Jenny Lind's influence—came to London, making his début, on Sept. 17, at one of Alfred Mellon's Promenade Concerts at Covent Garden, and receiving a rapturous ovation. He was equally successful in his first appearance at a Monday Popular Concert on Nov. 26 following, and likewise in his début at the Crystal Palace on Dec. 1. In 1867 Wilhelmj was in France and Italy. In Paris—through Joachim's introduction—he was first heard at Padeloup's concert, given at the Cirque Napoléon on Jan. 20. Then, in the autumn, he went to Florence, where he made his début on Dec. 15, 1867, at the Società del Quartetto. At the fourth concert of the Society, on Dec. 29, Wilhelmj was elected *Protettore della Società*. The 27th of Jan. 1868 saw the violinist's first appearance in St. Petersburg, whither, with Hector Berlioz, he had been invited by the Grand Duchess Helena Paulovna. The year 1869 was spent in revisiting France, Switzerland and Belgium; the following year in touring through England, Scotland and Ireland, with Santley. From the British Isles Wilhelmj went—in 1871—for a tour that extended through Holland, Denmark, Norway and Sweden. During these travels he was elected a member of the Royal Academy of Stockholm: made a knight of the order of Gustavus Vasa, and decorated with the grand medal of Arts and Sciences—also at Stockholm. His first appearance before a Berlin audience was on Oct. 22, 1872, at a Singakademie concert, and on Mar. 22, 1873, he made his first appearance in Vienna.

In 1875 Wilhelmj was in England again. He played at the Philharmonic Society's concert in memory of Sterndale Bennett, and occupied himself during the year in propagating the cult of Wagner in England. In 1876 Wilhelmj led the orchestra at Bayreuth, coming to England again in 1877. In the same year he induced

Wagner to journey to London and conduct the famous festival at the Albert Hall. Wilhelmj led the violins, and organised two extra concerts on a less lavish scale on May 28 and 29. After this, Wilhelmj suffered a serious illness. In 1878 he started on a tour round the world, which lasted until 1882, when he passed through London on his way to Germany, home to his villa at Mosbach-Biberich on the Rhine, after which he practically retired from public life for some time.

During his stay at Biberich, Wilhelmj founded a violin school in conjunction with R. Niemann, in the neighbouring Wiesbaden. In 1885 he was travelling again, and it was in this year that—at the invitation of the Sultan of Turkey—he had the unique experience of playing before the ladies of the Seraglio. Probably Wilhelmj was the only violinist to whom such a compliment had, until then, been paid. The Sultan decorated him with the order of the *Medjidie* of the second class, and also presented him with some fine diamonds. Blasewitz, near Dresden, became Wilhelmj's home from 1886–93, in which year he installed himself in London. In 1894 he was appointed principal violin professor at the G.S.M. He also taught privately, and although he never appeared at London concerts during the latter years of his life, Wilhelmj's massive, dignified figure, with its flowing grey hair, crowned with a wide-brimmed soft felt hat, was familiar to concert-goers as a member of the audience. He died after a short illness at his residence, 54 Priory Road, West Hampstead. He was twice married; (1) to the Baroness Liphardt—a niece of Ferdinand David—on May 29, 1866; (2) to Miss Mariella Mausch-Jerret, a distinguished Dresden pianist, in 1895.

His son ADOLF (b. Mar. 31, 1872) was appointed violin professor to the Belfast Conservatoire in 1895.

The qualities that combined to make Wilhelmj one of the greatest violinists of his day may be summed up in the force of his personality, the great certainty of his technique, his rich tone, cultured rendering and splendid poise. He stood for dignity and breadth. He believed that people wanted intellectual renderings, and he aimed at an exact balance of intellect and imagination, conveying a suggestion of reserve force that was essentially majestic.

In his later years he took an active interest in the technique of violin-making, and was a fervent patron and champion of more than one continental maker of the present day. He was convinced that the 'secret of the Cremona makers' lay in varnishing their violins whilst the backs and bellies were fixed only to the top and bottom blocks of the instruments, the final gluing taking place after the varnish was dry. His house in Avenue Road was (in 1894) a museum of modern-made violins, and he was

for ever encouraging amateur violin-makers to devote themselves to the art.

He composed several pieces for the violin, and was very successful in arranging Wagner's 'Preislied' and other notable themes for the violin. He also wrote a 'Modern Violin School' with James Brown, which was published by Novello & Co., in six parts.

E. H.-A.

WILHELM VON HIRSAU (*b.* Bavaria; *d.* monastery of St. Aurelius, Hirsau, June 4, 1091), writer of legends to Othlos of Würzburg, c. 1032. He was first a monk of St. Emmeran's, Ratisbon, but from 1068-91 abbot of the Benedictine monastery at Hirsau in the Württemberg part of the Black Forest, which was destroyed by the French. He was a man of great learning, who, apart from many philosophical and astronomical works, wrote the treatise published in Gerbert's *Scriptores* II. under the title *Musica S. Wilhelmi*, etc., in which he deals with the antique and mediæval tonal systems, and points out the errors of his predecessors, including Boëtius, whom even as much as to doubt was considered sacrilege during the whole of the Middle Ages. A second work, *De musica et tonis*, was contained in a 12th-century codex belonging to a Nuremberg antiquarian, von Murr, which has unfortunately been lost, and only a full description by von Murr, published at Nuremberg in 1801 under the title *Notitia duorum codicum*, dedicated to Haydn, is still in existence. From this it is apparent that the Guidonian hand existed long before GUIDO D' AREZZO (*q.v.*) (*Mendel*: Ambros).

WILHELMUS VAN NASSOUWE is the national anthem of Holland. The origin both of the words and the melody has given rise to much discussion.¹ It is still a point of controversy whether Marnix van St. Aldegonde wrote the words of the song, or whether, as Professor Enschedé surmises,² the words were originally written in French about 1568, and that Marnix translated them into Dutch in 1572. The melody has at length been conclusively proved to be of French origin, for the oldest version of the song, which appeared in the first edition of the *Geusenliedenboezcken* of 1681, bears the heading 'Naar de wijze van Chartres.' This is the tune of a song of derision, on the siege of Chartres, undertaken by Condé and his Huguenots in 1568, and entitled 'O la folle entreprise du Prince de Condé.'³

¹ In vol. v. of the *Tijdschrift der Vereeniging* the subject is discussed at full length by Loman, van Riemsdijk, Land, Enschedé, and van Duyse. Fifteen versions of the song are placed one under the other to show wherein they differ, and their various sources are stated.

In an undated 'Recueil de Chansons spirituelles' (1904), the three Chansons des Victoires qu'il a pleu à Dieu de donner à notre très-christien roy, Charles IX., par Christofle de Bordeaux, Paris (c. 1570) we find at No. 48, 'autre chanson de la ville du Chartres assiégee par le prince de Condé, sur un chant nouveau', beginning with the words 'O folle entreprise.' And in the collection of 1619 entitled 'La pieusse alouette avec son tire-lire' there is

And soldiers who were employed by Condé and afterwards by William of Orange evidently brought the melody from the North of France to the Netherlands, where it was adopted as a national song. The *Wilhelmssied* has undergone many changes, but the following version given by F. van Duyse in his *Oude Nederlandsche Lied*, ii. p. 1620, claims to be the best and oldest.⁴

WILHELMUS VAN NASSOUWE (1581)

Naar de wijze van Chartres.

The 'Nederlandsche Volksliederenboek' gives a version of greater rhythmic complication.⁵

A. H. W.

WILHEM, GUILLAUME LOUIS BOCQUILLON (*b.* Paris, Dec. 18, 1781; *d.* Apr. 26, 1842), a musician known chiefly by his efforts to promote the popular teaching of singing. In early youth he was in the army, but an irresistible passion for music made him take to it as the pursuit of his life. After passing through the Paris Conservatoire he became one of the professors in the Lycée Napoléon, and afterwards had a post in the Collège Henri IV. His original compositions were few—chiefly settings of Béranger's lyrics. It was about the year 1815 that he began to interest himself in the class-teaching of music in schools, and through Béranger's influence was put in charge of the musical part of the work of a society for promoting general education, and

a hymn in honour of the Virgin fitted to the same 'folle entreprise' melody. Finally, in 'La Clef des chansonniers, ou recueil des vaudevilles depuis cent ans et plus' (Ballard, Paris, 1717), a song occurs called 'Mon Dieu, la belle entrée,' the air of which is the old reading of the Chartres song. All this proves that the song survived for many years also in France.

4 Duyee thinks that in the beginning the Wilhelmus melody was a signal or trumpet-blast. With this Enschedé does not concur, although he admits it was essentially an army-song; and he quotes as the purest (though not the most beautiful) version the following German soldier song of 1607:

⁵ Much of the above information was supplied by Professor J. W. Enschedé.

afterwards, as his plans broadened out, he was made director-general of music in the municipal schools of Paris. He threw himself into this cause with an enthusiasm which soon produced striking results. Besides the school teaching, he had classes which gave instruction to thousands of pupils, mainly working people; and out of this presently grew the establishment of the ORPHÉON (*q.v.*), the vast organisation which has since covered France with singing-societies.

The speciality of Wilhem's system turned on the point of school organisation. The plan of 'Mutual Instruction,' as it was called, was then much in vogue in France as a way of economising teaching power, and the point of the Wilhem System was the application of this idea to the teaching of singing. His principal class-book, the *Manuel musical à l'usage des Collèges, des Institutions, des Écoles, et des Cours de Chant*, is an explanation of the ordinary written language of music, clefs, staves, signatures, time-symbols, etc., interspersed with a number of solfeggio exercises for class practice; the explanations are of the kind usually found in musical instruction books. His special way of arranging the classes is explained in his *Guide de la méthode* (4th edition, dated 1839).

R. B. L.

WILIS, LES, see GISELLE, OU LES WILIS; NIGHT DANCERS, THE; VILLI, LE.

WILKINSON (WYLKYNSON), ROBERT (15th and early 16th cent.), English composer of church music. All that remains to us of his work is in an early 16th-century MS. in the Eton College Library. The index to this MS. shows that it originally contained 97 compositions, and of the 43 which remain, 4 are by Wilkinson. These are 2 'settings of Salve Regina,' for 9 and 5 v., a 13-part 'Jesus autem transiens,' and an imperfect 'O virgo prudentissima.' The 13-part composition is in canon and is a setting of the Apostles' Creed prefixed by the words, 'Jesus autem transiens.' A part is assigned to each apostle, and their names are placed at the beginning of that part of the Creed which each is traditionally said to have written. A note in Latin gives the key to the Canon. A copy of this is in John BALDWIN's (*q.v.*) Commonplace Book. The 9-part 'Salve Regina' is similarly prefixed by a set of initials, each representing one of the 9 angelic hierarchies. As before, a voice is assigned to each. W. Barclay Squire (*Archæologia*, vol. lxi., from which most of these details are taken), refers to a man of this name who was a demy of Magdalen in 1502 and who took his bachelor's degree, Feb. 12, 1508; but there is a note in the Eton MS. ('Robert Wylkynson cu aleppiciet Dè') which seems to indicate that he was dead before the MS. was written, probably some time during the first few years of the century. J. M.

WILKINSON, SARAH¹ (*b. circa* 1768; *d.* Hammersmith, July 3, 1841), singer and actress, who in 1787 married the violinist, Joseph MOUNTAIN (*q.v.*). Her parents were circus performers engaged at Sadler's Wells. As a young girl she was handed over to Charles Dibdin who trained her as a singer, and employed her in a little burletta named 'Mount Parnassus' acted at his Royal Circus, where she made some success. Shortly afterwards, in 1782, she appeared at the Haymarket Theatre, and in 1784 went to Hull where she sought an engagement from Tate Wilkinson, who at first refused her. She obtained a public hearing at the benefit of one of his actors, and he then gave her a part in 'The Maid of the Mill.' She rapidly rose as a vocalist, and in 1786 was engaged at Covent Garden Theatre. Though her reception by the public while at Covent Garden was enthusiastic, yet for some reason the managers kept her considerably in the background, and she left the theatre to go to Dublin. In 1790 she again returned to the Haymarket Theatre, and Vauxhall. At this latter place she was a great acquisition, and her name figures as singer there from 1793-99. She again returned to Covent Garden, but left it in 1798, ultimately singing at the Haymarket and Drury Lane. In 1802, having had a monologue entertainment written for her, she went on tour. F. K.

WILKINSON, THOMAS (late 16th and early 17th cent.), English composer, chiefly of church music. As most of what remains of his work is in MS. (Durh.; and B.M. Add. MSS. 30,478-9, which contains the tenor cantoris volume of a set of partbooks made at Durham in 1664) it is possible that he was a singing man there. There is no record of him either as organist or choirmaster. B.M. Add. MSS. 29,366-8, which also contains a good deal of his music, is an early 17th-century MS. in the hand of Alfonso Ferrabosco the elder. Only the cantus, bassus and quintus partbooks of this set remain. The MS. also contains a madrigal, 'O Lovely, loveless sweet,' by him. Another 3-part one, 'Say, Galatea, since our comming hither,' is in B.M. Add. MSS. 18,936-9 and 34,800. The cantus, altus and tenor parts of three 5-part Pavans by him are in B.M. Add. MSS. 30,826-8.

J. M^c.

WILLAERT, ADRIAN (b. Flanders, c. 1480; d. Venice, Dec. 7, 1562), the founder of the Venetian school of musicians. His birthplace has been generally given as Bruges, a statement which, according to Fétis, rests on the authority of Willaert's own pupil Zarlino; but this reference appears to be an error: while on the other hand we have the express assertion of a contemporary, Jacques de Meyere (1531), that he was born at Roulers, or Rosselaere, near Courtrai.¹ Willaert was bred for the law and sent to Paris for the purpose of study; but his energies were soon turned into their natural channel, and he became the pupil² either of Jean Mouton or of Josquin des Prés—which, it is not certain—in the theory of music. Three compositions in MS. at Bologna are dated 1518. He returned to Flanders for a while, then went to Venice, Rome and Ferrara. It was during this visit to Rome, when Leo X. was Pope, that Willaert heard a motet of his own ('Verbum dulce et suave') performed as the work of Josquin. As soon, it is added, as the choir learned its real authorship, they refused to sing it again. Willaert's name evidently had not yet become that power which it was soon to be, under the naturalised form of 'Adriano,' among Italian musicians. From Ferrara he went northward, and became cantor to King Lewis of Bohemia and Hungary; and as on Dec. 12, 1527, he was appointed maestro di cappella of St. Mark's at Venice by the doge Andrea Gritti, it is presumed³ that he returned to Italy at the King's death in the previous year. In 1542 and 1556 he visited his native country. His career at Venice, where he lived until his death, is associated principally with the foundation of the singing-school which was soon to produce a whole dynasty of musicians of the highest eminence in their day. Among the first of these may be named Willaert's own pupils, Zarlino and Cyprian de Rore; the latter was Willaert's successor at St. Mark's.

Willaert's compositions are very numerous.⁴ Those published at Venice include five masses,

1536; three collections of motets, 1539-45 and 1561; two of madrigals, 1546 and 1563; a volume of 'Musica nova,' 1559, containing both motets and madrigals; several books of psalms (1550, 1555) and of hymns (1542), Canzone Villanesche, 1545; Fantasia e Ricercari, 1559. Besides these a variety of his works may be found in different musical collections published during his lifetime at Antwerp, Louvain, Nuremberg, Strassburg and other places. (See Q.-L. for lists.) Willaert holds a remarkable position among those Flemish masters whose supremacy in the musical world made the century from 1450 to 1550 distinctively 'the century of the Netherlands.'⁵ He did not merely take up the tradition of Josquin des Prés; he extended it in many directions. From the two organs and the two choirs of St. Mark's he was led to invent double choruses; and this form of composition he developed to a perfection which left little even for Palestrina to improve upon. His motets for 4, 5 and 6 voices are of the pure Belgian style, and written with singular clearness in the different parts. In one instance he advanced to the conception of an entire narrative, that of the history of Susannah, set for five voices.⁶ It would be absurd to describe such a work as an oratorio, yet the idea of it is not dissimilar. Indeed, in departing to some extent from the severity of his predecessors and creating for himself a richer style of his own, Willaert ventured to be more distinctively declamatory than any one before him. The complexion, therefore, of his writing, though it might appear 'dry' to Fétis, is markedly more modern than that of his masters. He is also of first-rate importance in the realm of the MADRIGAL (q.v.), and his compositions in this field are probably the best remembered of all he wrote. To contemporaries, however, if we may believe Zarlino, his church music appealed most strongly; his psalms, and in particular a Magnificat for three choirs, being peculiarly admired. A fine portrait of the musician is given by E. van der Straeten, *La Musique aux Pays-bas*, i. 258.

R. L. P.

WILLAN, HEALEY (b. Balham, 1880), organist and composer. After holding posts at St. John Baptist, Kensington, and other churches he went to Toronto, as head of the theory classes at the Conservatoire, and organist and choirmaster of St. Paul's. In 1914 he was appointed lecturer and examiner to the University of Toronto, and in 1919 became music director to the Hart House Players Club, in connexion with which he wrote incidental music for performances of classical plays. Since 1920 he has been Vice-Principal of Toronto Conservatoire. He has written much admirable church and organ music, among the latter being

⁵ Ambros, i. 3. See this writer's excellent criticism of Willaert, vol. iii. 503-9. ⁶ Compare Fétis, viii. 471.

¹ See the opposite views in Fétis, viii. 470 (2nd ed., 1867), and E. van der Straeten, *La Musique aux Pays-bas*, i. 248-57. Sweetius, *Athenae Belgicae*, p. 104 (Antwerp, 1628, folio), also describes Willaert as of Bruges. Very possibly the discrepancy is to be explained by supposing Bruges to have been the seat of Willaert's family, and Roulers that of his actual birth.

² See A. W. Ambros, *Geschichte der Musik*, iii. 502.

³ Fétis, viii. 471.

⁴ See the lists in Fétis Lc., and, for those published in the Netherlands, Goovaert's *Histoire et bibliographie de la typographie musicale dans les Pays-bas*, under the different years.

two fine preludes and fugues in C minor and B minor, an effective epilogue, and a broadly conceived introduction, passacaglia and fugue.

H. G.

WILLEMS, the surname of a family of Ghent violin-makers, consisting of Jooris, Hendrick—presumably his brother—and the latter's son, or nephew, Heyndrick. (1) JOORIS (worked 1634–42) was a cornett-player as well as a luthier, in which latter capacity he turned out very careful work. His model resembles that of the Amati School, but with stouter and more projecting edges. The varnish is brittle and pale in colour. A bass viol by Jooris is preserved in the Snoeck Collection, Berlin. His son (2) NICHOLAS was a viol-player in the Ghent Cathedral. (3) HENDRICK (1661–98) was the best maker of the trio. He followed the Stainer model, adhering to the high arch, sharp-edge and stiff sound-holes of the Brescian School. The work of this maker is excessively neat, and the wood of the table always well chosen, but the varnish is ordinary and roughly laid on. For the backs of his fiddles he employed maple wood, beech, lime and almond. Some of Hendrick Willems's work is preserved in the cathedral at Ghent, and in the Snoeck Collection in Berlin there is a Pochette of his dated 1679. He also made lutes. (4) HEYNDRICK (1717–1743), nephew or son of Hendrick (3), made fiddles and violoncellos on the Amati model. A certain J. B. Willems, who came to the fore as a maker of brass instruments in 1760, seems to have been a fiddle-maker also. The relationship is undefined.

E. H.-A.

WILLEMS, MISS, see ADDISON, John.

WILLIAM OF NEWARK (*d.* London (?) 1509), English composer, 'Master of the Song' (master of the children, Chapel Royal), William Cornysh being his successor. He is represented in the Fayrfax (Thoresby) MS. in the British Museum by 7 songs. A madrigal, 'Thus musing,' was republished by Novello in 1894 (Davey; Brown and Stratton).

WILLIAMS, AARON (*b.* London (?), 1731; *d.* there, 1776), music teacher and engraver, and clerk to the Scottish church in London Wall. He wrote 'A New Christmas Anthem for 1, 2, 3 and 4 voices,' and edited several collections of psalms, anthems and other church music. (See list in Brown and Stratton.)

WILLIAMS, ANNA (*b.* London, Aug. 6, 1845; *d.* there, Sept. 3, 1924), a distinguished concert-singer, was the daughter of William Smith Williams, reader to Smith, Elder & Co., to whose insight the publication of *Jane Eyre* was due. She was taught singing by H. C. Deacon and J. B. Welch, and on June 27, 1872, took the first soprano prize at the National Prize Meeting Festival at the Crystal Palace. She afterwards studied for fifteen months at

Naples with Domenico Scafati, and on Jan. 17, 1874, reappeared at the Crystal Palace. She obtained a very high position as an oratorio- and concert-singer at the principal festivals and Musical Societies of the United Kingdom. Special mention must be made of her singing at three successive Birmingham Festivals in three new oratorios: in 1885 in Stanford's 'Three Holy Children'; in 1888 in Parry's 'Judith'; and in 1891, at very short notice, in Stanford's 'Eden.' On the last occasion she received from the committee a handsome present in acknowledgment of her readiness in taking extra work on account of the illness of Mme. Albani (*Brit. Mus. Biog.*). She sang occasionally in opera in the provinces, but it is as a refined and accomplished concert-singer that she was best known. Her powerful soprano voice was of 2½ octaves in compass, and she used it like a true musician. On Oct. 13, 1897, while still in the plenitude of her powers, she made a farewell appearance, and devoted herself to teaching at the R.C.M. and elsewhere until 1904, when she resigned her appointment. She married Rodney John Fenessy in 1910. A. C.

WILLIAMS, CHARLES FRANCIS ARDY (*b.* Dawlish, S. Devon, July 16, 1855; *d.* Milford, Lymington, Feb. 27, 1923), was educated at Sherborne School, and subsequently under the Rev. F. A. Radcliffe, Rector of Milston, near Amesbury, whose influence contributed, in no small degree, to foster his love of music. In 1875 he entered Trinity Hall, Cambridge, where he took the degrees of B.A. in 1878, M.A. in 1882 and Mus.B. in 1891. He also took the Oxford Mus.B. degree in 1889. While at Cambridge he took an active part in the management of the Cambridge University Musical Society, and played the violin and viola at its concerts. On taking his degree he went for health to New Zealand, where he was organist for some years at a church in Auckland, playing in the orchestra of the Auckland Choral Society, and founding a Glee Club. Returning to England in 1879 he resumed his studies for the Church; but family opposition to the musical profession being overcome, he became organist and music-master at Dover College in 1881. In the following year he entered the Leipzig Conservatorium, and in 1885–91 was organist of St. Mary's, Boltons, S.W., where he did much to improve the standard of the music. He next devoted himself to the study of ancient Greek music, and especially plain-song, making tours for purposes of research in Italy, Belgium and France.

Articles and lectures by him on this subject led to his appointment, in 1895, as composer and director of the music of the Greek Theatre at Bradford College, of which institution he afterwards became the organist. For the Greek plays he made use of ancient modes and rhyth-

mical forms, besides reproducing, from ancient models, auloi and lyres, on which he taught the boys to play. In 1901, in consequence of ill-health, he retired, wrote many valuable books and did much to promote the revival of plain-song. He trained the body of priests of Capri in the Solesmes system in 1904, and directed the music of their Easter Mass; this led to the establishment of that system in the island, a work for which in 1907 he was received in private audience and thanked by the Pope.

His published compositions are few in number; they include a Magnificat and Nunc Dimittis in F, a Morning, Evening and Communion Service for alto, tenor and bass, the Choruses of the 'Antigone' of Sophocles in the Greek modes, as performed at Bradfield. Unpublished works are, a quartet in D minor, a violoncello sonata in F, and four canons for clarinet, violin and pianoforte, all performed at the Musical Artists' Society in 1887-88; the choruses of 'Alcestis' and 'Agamemnon' composed for Bradfield. His literary works are as follows: *A Historical Account of Musical Degrees at Oxford and Cambridge*, 1893; *The Music of the Greek Drama*, essay prefixed to the 'Antigone' choruses; *Lives of Bach and Handel*, in the Master Musicians series; *Notation, the Organ, and Organ Music*, in the Music Story series; *The Rhythm of Modern Music* (1909); *Aristoxenus's Theory of Musical Rhythm* (1913); contributions to the second edition of this Dictionary, to the *Classical Review* and to various musical periodicals, on Greek music, plain-song, etc., and kindred subjects. M.

WILLIAMS, CHARLES LEE (b. Winchester, May 1, 1853), organist and composer of church music, was fifth son of the late Rev. David Williams, fellow of New College, Oxford, and rector of Alton Barnes, Wilts.

He was a chorister of New College in 1862-65, and a pupil and assistant organist to Dr. Arnold at Winchester Cathedral in 1865-70. In 1872 he went to Ireland as tutor and organist of St. Columba's College, where he stayed till 1875. He took the Mus.B. degree at Oxford in 1876. In 1876-82 he was organist and choirmaster of Llandaff Cathedral, and in the latter year entered upon his chief official position, that of organist of Gloucester Cathedral—a position he occupied with much distinction until 1898, conducting, in that time, five Gloucester Festivals, and taking part in the other THREE CHOIRS FESTIVALS (q.v.). He composed a considerable amount of church music, and the sacred cantatas 'Bethany,' 'Gethsemane,' 'A Dedication,' 'A Harvest Song,' and 'A Festival Hymn,' all of which have been produced at Gloucester or Worcester Festivals. Owing to ill-health he retired from active work in 1898, but retained his interest in the Three Choirs Festivals as a steward, a member of committee, and ultimately as Chairman of the Executive at Gloucester.

He also edited (with H. G. Chance, M.A.) the continuation of the *History of the Three Choirs*, bringing the record up to the year 1922.

M., addns.

WILLIAMS, GEORGE EBENEZER (b. 1783; d. Apr. 17, 1819), was a chorister of St. Paul's Cathedral under Richard Bellamy. On quitting the choir (about 1799) he became deputy organist for Dr. Arnold at Westminster Abbey. In 1805 he was appointed organist of the Philanthropic Society's chapel, and in 1814 succeeded Robert Cooke as organist of Westminster Abbey. He composed, when a boy, some chants and settings of the Sanctus, printed in 'Sixty Chants . . . composed by the Choristers of St. Paul's Cathedral,' 1795, and was author of 'An Introduction to the Pianoforte,' 1810, and 'Exercises for the Pianoforte,' 1815. He was buried, Apr. 24, 1819, in the south cloister of Westminster Abbey. W. H. H.

WILLIAMS, JOHN GERARD (b. London, Dec. 10, 1888), composer, originally followed the profession of an architect, but devoted his spare time to music, joining choral societies and playing in orchestras as opportunities arose. When he first took to composition in 1911 he had had no other training than this, and that which he acquired from constantly reading music, but two years later he received some guidance from R. H. Walthew. In essentials, however, he is a self-taught musician. Most of his music is in the smaller forms and of an intimate character, with something of the art of the miniaturist. Much of his best work is in his numerous songs, which have great lyrical charm. He has also written two string quartets, of which the second is published, and has orchestrated a set of his own piano pieces, 'Pot Pourri.' His other piano works comprise 'Miniatures' (also orchestrated), Preludes, 'Side-shows,' etc. A comic operetta, 'The Story of the Willow Pattern Plate,' is for children. Since then he has written a ballad-opera, 'Kate, the Cabin Boy' (Kingsway Theatre, London, 1924), based on traditional tunes, and he has arranged and orchestrated a ballet from a Beethoven sonata for Mme. Lopokova. In 1922 he gave a first recital of his own works at the Æolian Hall, London. E. E.

WILLIAMS, MARIA JANE (b. Glamorganshire, Oct. 9, 1793; d. Nov. 10, 1873), a soprano singer of merit, who resided mostly in Glamorganshire. Her chief title to remembrance is her collection of traditional Welsh airs, which was offered in competition at an Eisteddfod held in Abergavenny in 1838. She published forty-three of the melodies, with Welsh words, in 1844, Llandovery (and D'Almaine's, London), but only a few copies seem to have been printed. The title runs:

'Ancient National Airs of Gwent, and Morganwg: being a collection of original Welsh Melodies, hitherto unpublished . . . by M. Jane Williams,' 1844, folio.

See WELSH MUSIC.

F. K.

WILLIAMS, RALPH VAUGHAN, see VAUGHAN WILLIAMS.

WILLIAMS, THOMAS. In 1780 he published 'Harmonia coelestis,' a collection of anthems by Purcell, Blow, Croft, etc. (London); in 1789 he published 'Psalmody Evangelica,' a collection of psalm and hymn tunes in 3 parts, preceded by a complete introduction and historical essay on Church Music, instructions in miniature for learning psalmody, etc.

E. v. d. s.

WILLIAMSON, T. G., a composer and music-publisher, at the end of the 18th century. About 1790 he had a music and 'fancy warehouse' at 20 Strand, from which he issued a number of sheet songs, and collections of music. He arranged two sets of 'Hindoostanee Airs,' 1797 and 1798, composed some vocal music, 'Six favourite sonatinas,' a set of marches and other music.

F. K.

WILLIAM TELL, see GUILLAUME TELL.

WILLING, CHRISTOPHER EDWIN (b. Feb. 28, 1830; d. Dec. 1, 1904), son of Christopher Willing, alto singer and assistant gentleman of the Chapel Royal (b. 1804; d. May 12, 1840), was admitted a chorister of Westminster Abbey under James Turle in 1839, and continued such until 1845, during which time he also sang in the chorus at the Concert of Ancient Music, the Sacred Harmonic Society, etc. Upon leaving the choir he was appointed organist of Blackheath Park Church, and assistant organist of Westminster Abbey. In 1847 he was engaged as organist at Her Majesty's Theatre, and held the post until the close of Lumley's management in 1858. In 1848 he was appointed organist to the Foundling Hospital, and shortly afterwards also director of the music. In 1857 he was invited to take the place of organist of St. Paul's, Covent Garden, which he held in conjunction with his appointment at the Foundling, but resigned it in 1860 to accept the post of organist and director of the music at All Saints', Margaret Street, which he held until 1868. In 1872 he was appointed organist, and afterwards also chorus-master, to the Sacred Harmonic Society. In the same year he was re-engaged as organist in the company of Her Majesty's Theatre (then performing at Drury Lane), and in 1868 was made in addition *maestro al piano*. In 1879 he resigned his appointment at the Foundling Hospital. For many years he was conductor of the St. Albans Choral Union, which held a triennial festival in St. Albans Abbey—now Cathedral.

W. H. H.

WILLIS, HENRY (b. Apr. 27, 1821; d. London, Feb. 11, 1901), a leading English organ-builder, was articled in 1835 to John GRAY. He was for some years organist of Christ Church, Hoxton, subsequently of Hampstead Parish Church, and Islington Chapel-of-Ease, which latter post he filled down to within a few years of his death.

In 1847, in which year he played the double-bass at the Gloucester Festival, he took the first step in his career by rebuilding the organ at Gloucester Cathedral, with the then unusual compass of twenty-nine notes in the pedals. In the Great Exhibition of 1851 he exhibited a large organ which was much noticed, and which led to his being selected to build that for St. George's Hall, Liverpool, which under the hands of Best became so widely known. The organ which he exhibited in the Exhibition of 1862 also procured him much fame, and became the nucleus of that at the Alexandra Palace, destroyed by fire on June 9, 1873, shortly after its completion. His next feat was the organ for the Royal Albert Hall (opened 1871), which in size, and for the efficiency of its pneumatic, mechanical and acoustic qualities, shared its high reputation with the second Alexandra Palace organ, which was constructed for the restoration of that building, and was opened in May 1875.

Willis supplied or renewed organs to nearly half the cathedrals of England and Scotland, viz. St. Paul's (1872), Canterbury (1886), Carlisle (1856), Durham (1877), Hereford (1879), Oxford (1884), Salisbury (1877), Wells (1857), Winchester (1853), Truro, St. David's (1881), Edinburgh (1879), Glasgow (1879), as well as many colleges, churches, halls, etc. He built the organ in Windsor Castle, with a double console, so that the instrument can be played from St. George's Hall or from the Private Chapel. The award of the Council Medal in 1851 specifies his application of an improved exhausting valve to the pneumatic lever, the application of pneumatic levers in a compound form, and the invention of a movement for facilitating the drawing of stops singly or in combination. In 1862 the Prize Medal was awarded to him for further improvements. In 1885 the Gold Medal was given him for 'excellence of tone, ingenuity of design and perfection of execution.' He took out seven patents between 1851 and 1868.

Willis was always a scientific organ-builder, and his organs are distinguished for their excellent engineering, clever contrivances and first-rate workmanship, as much as for their brilliance, force of tone and orchestral character. (See ORGAN, subsection 1851, EXHIBITION ORGANS, *et seq.*) (See *Mus. T.*, 1898, p. 297 ff. and 1901, p. 164.)

G.

The present (1926) head of the firm of Henry Willis and Sons is HENRY WILLIS (b. 1889), third of the name and grandson of the founder. His *chef d'œuvre* is the Liverpool Cathedral organ (168 speaking stops), and under him the firm maintains its high reputation. The firm publishes accounts of its achievements in a house periodical called *The Rotunda*.

C.

WILLIS, ISAAC, a Dublin music-publisher who, about 1815 or 1816, took over the

premises, 7 Westmorland Street, formerly held by Goulding & Knevet, to whom he acted as agent. His business became extensive, and he removed to London about 1825, the firm being then 'Willis & Co.,' and their shop in a room, or rooms of the Egyptian Hall, Piccadilly. In 1827 they removed to 55 St. James Street, and at a later date to 75 Lower Grosvenor Street, and finally, before 1850, to 119 New Bond Street. The Dublin business was retained until 1835-36, when it passed to Robinson, Bussell, & Robinson. The music they issued was principally of the 'drawing-room' type, and dance music. Their principal collections are Fitzsimon's 'Irish Minstrelsy,' bk. 2, 1816; T. H. Bayly's 'Miniature Lyrics,' 3 books, 1823-25; 'Tyrolean Melodies,' 1827. Isaac Willis may have had some interest in 'Willis's Rooms,' in St. James Street, though in 1850 the proprietors were Frederick and Charles Willis. F. K.

WILLMAN, THOMAS LINDSAY (b. London, c. 1783; d. Nov. 28, 1840), a famous clarinetist, was the son of a German who, in the latter half of the 18th century, came to England and became master of a military band. Father and son were in Ireland, 1804-18. After being a member of a military band and of various orchestras the latter became principal clarinetist in the Opera and other chief orchestras of London, and also master of the Coldstream Guards' band. His tone and execution were remarkably beautiful, and his concerto-playing admirable. His age was recorded in the register of deaths as 56, but, by comparison with his own statement made more than eight years before, when he joined the Royal Society of Musicians, it should have been 57.

W. H. H.

WILLMERS, HEINRICH RUDOLF (b. Berlin, Oct. 31, 1821; d. Vienna, Aug. 24, 1878), pianist, a pupil of Hummel and Fr. Schneider, was widely known both as a brilliant player and composer for the PF., and was teacher at Stern's school in Berlin from 1864-66. He then resided in Vienna, where he died insane. G.

WILLY, JOHN THOMAS (b. London, July 24, 1812; d. there, Aug. 8, 1885), violin-player. He was for some time a pupil of Spagnoletti, and became a member of the King's Theatre band. He played under Costa as a first violin, and later as principal second, during the whole of his career. He led the 'Elijah' at Birmingham in 1846, and was leader at various other festivals; at Jullien's and the London Wednesday Concerts, the new Philharmonic, the National Choral, the Society of British Musicians (of which he became a member in 1837), etc. etc. In 1849-50, and again in 1860, he gave classical chamber concerts at St. Martin's Hall, very much on the plan of the subsequent 'Popular Concerts.' Among the artists who appeared were Mesdames Goddard,

Louisa Pyne and Dolby; Sims Reeves, Sterndale Bennett, Ernst, Piatti, Pauer, etc. He retired from active work in 1880, owing to failing health. A. C.

WILM., NICOLAI VON (b. Riga, Mar. 4, 1834; d. Wiesbaden, Feb. 20, 1911), studied at the Leipzig Conservatorium in 1851-56, became in 1857 second conductor at the Stadttheater of Riga, and in 1860 teacher of pianoforte and theory in the Nikolai Institute at St. Petersburg. In 1875 he settled in Dresden, and in 1878 at Wiesbaden. His works are numerous, and some are important; a string sextet, op. 27; a quartet, op. 4; two violin sonatas, opp. 83 and 92; a violoncello sonata, op. 111; two suites for violin and piano, opp. 88, 95, are among the best of his compositions, which include very many pianoforte pieces of a popular kind, and partsongs and motets for chorus, as well as single songs. (Riemann.) M.

WILMS, JOHANN WILHELM (b. Witzhelden, near Solingen, Mar. 30, 1772; d. Amsterdam, July 19, 1847), studied with his father and brother, settled in Amsterdam as piano virtuoso and teacher in Aug. 1791, and continued his studies of composition under Hodermann. In 1808 he became a member of the institute of arts and science, and in 1824 organist of the Baptist church. As a composer his claim to posterity rests chiefly on the National Anthem, 'Wien Neerlands bloed,' but he also composed a symphony, a flute concerto, quartets, trios, sonatas, variations, etc. (Mendel; Q.-L.).

WILSON, JOHN (b. Apr. 5, 1595¹; d. Westminster, Feb. 22, 1673/4). Anthony Wood calls him a native of Faversham, but the Faversham registers do not go back to so early a date, and nothing is to be learnt there about his family; it would seem, however, that he was 'kinsman' to Walter Porter, the musician.² Wood's statement that he was 'naturally inclin'd in his youth to vocal and instrumental Musick' is corroborated by the fact that, before he was 20, he was employed to write music for

¹ The Maske of Flowers. Presented By the Gentlemen of Grales-Inne, at the Court of White-hall, in the Banqueting House, vpon Twelfe night, 1613 (i.e. 1614). Being the last of the Solemnities and Magnificences which were performed at the marriage of the right honourable the Earle of Somerset, and the Lady Francis daughter of the Earle of Suffolke, Lord Chamberlaine. London Printed by N. O. for Robert Wilson, and are to be sold at the Shop at Grales-Inne new gate. 1614.

The music to some of the songs is given with the description of the Masque; it has no composer's name, and it is often attributed to Coprario, but that it is by Wilson is proved by his having printed it as his, in a three-part arrangement, in his 'Cheerfull Ayres,' 1660. Possibly this is not the only stage-music written by Wilson in his youth; for he printed several songs from plays among his later publications, including settings of Shakespeare's 'Take, O take those lips away,' and 'Lawn as white as driven snow.' Rimbault³ indeed main-

² According to his tombstone. ³ Wood, Fasti, anno 1608,

³ Rimbault, Who was Jacko Wilson? 1846.

tained (what is very likely to be the fact) that Wilson was the stage singer who took the part of Balthazar, the character who sings 'Sigh no more, ladies,' in some performance of *Much Ado about Nothing*. In the first folio edition of Shakespeare's Plays, 1623, the stage direction has 'Enter the Prince, Leonato, Claudio and Jacke Wilson.' This Jacke Wilson was most likely the same 'Mr. Willson y^e singer,' who was among the friends of Alleyn the actor,¹ and dined with him on his wedding anniversary, Oct. 22, 1620²; and the same John Willson who was recommended to the Lord Mayor and Court of Aldermen by Henry Montague, Viscount Mandeville, as one of the 'Servants of the City for Music and voice,' Oct. 21, 1622.³ The 'John Willson Musitian' of the parish of St. Bartholomew the Less, whose wife Jone was buried at St. Giles's, Cripplegate, July 17, 1624, and whose son was buried there the following Sept. 3, 'from the house of George Sommerset, musitian,' was probably the same, though J. Payne Collier⁴ took him to be identical with an infant born 1585, son of one Nicholas Wilson, minstrel, of St. Giles's, Cripplegate. Except that the combination of names is a very common one, there seems to be no reason for doubting the identity of these Wilsons with the subject of this notice.

In 1635 John Wilson was made one of the King's Musicians. The Warrant for his Liveries is dated May 30, 1635, and a patent of £20 per annum 'to continue during life' bears the same date. His name recurs among the Musicians up to 1641, when he is fourteenth on the list of Musicians 'For Lutes, Violls and Voices,'⁵ and on the list of His Majesty's Servants of the Chamber in Ordinary, 1641, printed in *The Musician*, May 12, 1897.

Wilson seems to have been a favourite with Charles I., and

'giving his Majesty constant attendance, had oftentimes just opportunities to exercise his hand on the Lute (being the best at it in all England) before him to his great delight and wonder; who, while he played, did usually lean or lay his hand on his shoulder.'

Other evidence of the King's appreciation of his singing is found in the verses prefixed to the 'Cheerfull Ayres.' During the Civil War Wilson went with the court to Oxford, where on Nov. 29, 1644, he signed receipts on behalf of the musicians. On the following Mar. 10 he was made Doctor of Music by the University, being 'now the most noted Musitian of England.' After the surrender of the garrison at Oxford in 1646, 'he spent some years in the family of

¹ It is possible that he may have been intimate with Ben Jonson, who on a presentation copy of his collected *Works*, 1616 (sold by Messrs. Sotheby, Dec. 18, 1908), wrote the inscription, 'To his most worthy and learned friend, Mr. John Willson, Ben Jonson's Guit and testimony of his love.'

² Diary in Young's *Hist. of Dulwich Coll.*, 1889.

³ *Remembrancia*, p. 303.

⁴ *Principal Actors in the Plays of Shakespeare*, 1846.

⁵ Rev. H. C. de Lafontaine, *The King's Music*, pp. 91, 101, etc. In the first edition of this Dictionary his name is said to be found in a list dated Apr. 17, 1641, of 'Musicians for the Waytes' (sic), but it may be conjectured that the same appointment is meant.

Sir Will. Walter of Sarsden in the Parish of Churchill in Oxfordshire, who with his Lady, were great lovers of Musick.' While living there he contributed 'An Elegie to the memory of his Friend and Fellow, Mr. William Lawes,' to H. Lawes's 'Choice Psalmes,' 1648. It is probable that he devoted his time to composition during this period of retirement, for most of his published music appeared between 1648 and 1660. 'At length,' says Wood, 'upon the desire of Mr. Tho. Barlow of Qu. Coll. (then Lecturer at Churchill) made to his quondam Pupil Dr. Joh. Owen, Vicechancellor of this University, he was constituted Musick Professor thereof, an. 1656; which with other helps from some Royalists in these parts (he having then a Lodging in Ball. Coll.) found a comfortable subsistence.'

Wood mentions him among those who attended the weekly music meetings at Oxford in 1656 ('he sometimes play'd on the lute, but mostly presided the consort'); and describes the 'humoursome way' in which he showed his admiration of Baltzar's violin-playing in 1658. Wilson held the professorship until 1661. In 1657 he published:

Psalterium Carolinum. The Devotions of his Sacred Majestie in his Solitudes and Sufferings, Rendered in Verse. Set to Musick for 3 Voices and an Organ, or Theorbo, By John Wilson, Dr. and Musick Professor of Oxford. London, Printed for John Martin and James Allestre, and are to be sold at the Bell in St. Paul's Church-yard, 1657.

He speaks of this work as 'the last of his labours,' and Lawes in a commendatory poem urges him to call back his 'resolution of not composing more.' It may be, therefore, that his next publication was merely a collection of his early songs revised and rearranged. This was

'Cheerfull Ayres or Ballads First composed for one single Voice and since set for three Voices by John Wilson Dr in Musick Professor of the same in the University of Oxford. Oxford. Printed by W. Hall, for Ric Davia. Anno Dom. MDCLV.'

This is described as 'The first Essay (for ought we understand) of printing Musick that ever was in Oxford.'

At the Restoration Wilson returned to his place of Musician in Ordinary⁶; and on Oct. 22, 1662, was sworn as gentleman of the Chapel Royal in succession to Henry Lawes. Wood implies that he had been gentleman of the Chapel Royal at the beginning of his career, but there is no record of any such earlier appointment. Wood also says he was made 'one of the Choire at Westminster.' It was at Westminster Abbey that (on Jan. 31, 1670/71) he married Anne Penniall, widow of Matthew Penniall, who had been a gentleman of the Chapel Royal. In the marriage licence Wilson is described as 'of St. Margaret, Westminster, widower, about 66.'⁷ He died at his house at the Horseferry, Westminster, and was buried on Feb. 27, 1673/74, in the Little Cloister, Westminster Abbey. By his will, dated Apr. 30, 1671, and proved Mar. 18, 1673/74, he left all his property to his widow, with the exception of a bequest of 40s. to his daughter Rebecca Bowreman, 'to by her a Ring.'

⁶ See *The King's Music* for many references to him.

⁷ Foster's *London Marriage Licences*, 1887.

Besides the publications already mentioned, songs and snatches by Wilson appeared in his lifetime in Playford's 'Select Musically Ayres and Dialogues,' 1652 and 1653, 'Select Ayres and Dialogues,' 1659, and 'The Treasury of Musick,' 1669; in Hilton's 'Catch that catch can,' 2nd edition, corrected and enlarged by J. Playford, 1658; and in Playford's 'Catch that catch can: or the Musical Companion,' 1667. The words of an anthem, 'Hearken, O God,' are in both editions of Clifford's *Services and Anthems*, 1663 and 1664. Much MS. music by Wilson exists in the British Museum and elsewhere; in particular there is a large volume in the Bodleian Library (MS. Mus. b. 1), to which it was presented by the composer before the Restoration, on condition 'that no person should peruse it, till after his death.'

Wilson, according to Wood, 'was a great Humourist and a pretender to Buffoonry'; and Sir N. L'Estrange's MS. *Merry Passages and Jeasts* (B.M. Harl. 6395) gives an anecdote of how 'Willson,' who may be supposed to be John Wilson, provoked a drunken quarrel, in the company of the brothers Lawes. But Henry Lawes, who evidently was intimate with him, presents him in a pleasanter light:

'From long acquaintance and experience, I
Could tell the world thy known integrity
Unto thy friend; thy true and honest heart,
Ev'n mind, good nature, all but thy great art,
Which I but dully understand.'

Wilson's great reputation among his contemporaries was doubtless due chiefly to his skill as lutenist and singer, though Wood calls him 'the greatest and most curious Judge of Musick that ever was,' and Lawes praises him as a pioneer, in words which seem more appropriate to Lawes himself than to Wilson:

'For this I know, and must say't to thy praise,
That thou hast gone in Musick, unknown wayes,
Hast cut a path where there was none before,
Like Magellan traced an unknown shore.
Thou taught'st our Language, first, to speak in Tune,
Gav'st the right accents and proportion.'

His songs are pleasant and melodious, and one or two of them (such as 'In the merry month of May') are still met with in anthologies, but it is probably as an early composer of music to Shakespeare's words that he is now best known. His portrait is in the Bodl. Mus. Sch.

G. E. P. A.

WILSON, JOHN (b. Edinburgh, Dec. 25, 1800¹; d. Quebec, July 8, 1849), singer, famous for his Scottish 'table entertainments.' He was apprenticed to a printer, and afterwards became corrector of the press to Ballantyne & Co., in which capacity many of the Waverley novels passed through his hands. In 1816 he applied himself to the study of music. After officiating as precentor in a church, he became in 1824 a pupil of Finlay Dun, and soon after-

wards appeared at the Edinburgh concerts. In 1827 he began teaching singing. He studied under Crivelli, and in Mar. 1830 appeared at the Edinburgh theatre as Henry Bertram in 'Guy Mannering.' His success was so decided that he was straightway engaged for Covent Garden, where he came out Oct. 16, 1830, as Don Carlos in 'The Duenna.' He continued at that theatre until 1835, when he removed to Drury Lane, where he sang in Balfe's 'Siege of Rochelle' and other operas.

In 1838, in company with Miss Shirreff and Mr. and Mrs. E. Seguin, he visited America, where he was warmly welcomed. On his return to England he began giving those Scottish table entertainments with which his name subsequently became identified, and to which from May 1841 he exclusively devoted himself. He gave them throughout England and Scotland with the greatest success. Their titles were:

'A Nicht wi' Burns,' 'Anither Nicht wi' Burns,' 'Adventures of Prince Charlie,' 'Wandering Willie's Wallet,' 'Mary Queen of Scots,' 'Jacobite Relics,' 'The Jameses of Scotland,' 'The Wallace and the Bruce,' and 'A Haver wi' Jamie Hogg.'

Early in 1849 he revisited America. At Quebec he was attacked by cholera and died there. Wilson's voice was a pure, sweet-toned tenor, and he sang with great taste. W. H. H.

WILSON, MARY ANN (b. 1802; d. Goudhurst, Kent, Dec. 13, 1867), was taught singing by Thomas WELSH. Her first appearance in public at Drury Lane Theatre, Jan. 18, 1821, as Mandane in 'Artaxerxes,' caused an immediate furore, as much for her youth and looks as for her fresh voice and brilliant singing. She remained there until July 5, 'about 65 nights,' according to Geneste, 'wonderfully attractive.'² Her other parts were Rosetta ('Love in a Village'), Clara ('Duenna'), and Lady Gayland ('False Alarms'), etc. After an equally successful provincial tour she went the next year to Italy. The premature strain of her early exertions, however, soon ruined her health, and then destroyed her voice. But her short career was very lucrative, and in the year of her début she made the unprecedented sum of £10,000.³ On June 9, 1827, she married Welsh, and by him had an only daughter, who married PIATTI (q.v.). A. C.

WILSON, (1) MATILDA ELLEN (known as Hilda Wilson) (b. Monmouth, Apr. 7, 1860; d. Dec. 1, 1918), the daughter of James Wilson, a musician and bandmaster of the local Volunteer Corps. She studied music at an early age, and her parents having removed to Gloucester, she sang in the choir of St. Mildred's there. In 1874-75 she appeared as a soloist with the Gloucester Choral Society. Later she studied singing under Shakespeare at the R.A.M., and the pianoforte under Morton.

¹ According to the same authority, a 'novel mode of puffing was instituted by Elliston, by printing press notices on playbills in red ink—"called by the wags of the day—'Elliston's bushes.'"

² Her own statement to Ella, quoted by Fougny in his Supplement to *Fédis*.

³ The date of birth has been established by James Love, who has found an entry in the Canongate Records of Edinburgh, to the effect that the singer was the son of John Wilson, a coach-driver, and was born Dec. 25, 1800, and baptized Jan. 4, 1801.

From 1880-82 she was the Westmorland Scholar there, and in 1882 was the holder of the Parepa-Rosa Prize. In 1880 she sang at the Gloucester Festival with such success that she was engaged the two following years for Worcester and Hereford. Later she sang as principal contralto at the Norwich and Birmingham Festivals in addition to those above named, with engagements at the Sacred Harmonic, Royal Choral Society, Crystal Palace, Philharmonic, and at various concerts throughout the United Kingdom. She became a great favourite, on account of her fine voice, the perfection of her style and phrasing, and of her musicianly feeling. On July 16, 1904, she married Ashley Richard Hart of Clifton.

Her sister (2) AGNES (b. Gloucester, Oct. 8, 1864; d. Apr. 27, 1907) studied singing under Visetti. She sang in the Lincoln, Hovingham and Hereford Festivals, and later became a teacher at the Blackheath and West London Conservatoires of Music. Her brother, (3) HENRY LANE WILSON (b. 1871; d. Jan. 8, 1915), won success as a baritone singer, composer and arranger of songs. He was originally an organist and pianist. A. C.

WILSON, T[OMAS] (17th cent.), English organist and composer of church music. A singing man of this name at Ripon Minster was appointed to play on the organ there from 1670-77 in place of the regular organist, Wanless, who had become deaf (West, *Cath. Org.*). Q.-L. refers to him as organist of Peterhouse, where much of his music, detailed below, is preserved:

V. and T.D.; M. and N.D. (2 settings): Latin K., C. and S. ANTHEMS. 'Behold how good and joyful'; 'Behold now, praise the Lord'; 'Blessed is the man that feareth'; 'Christ rising'; 'Lord, Thou art become gracious'; 'Prevent us, O Lord'; 'Thy mercy, O Lord, incump.'; 'Turn thy face, incump.'; Settings of the Collects for the Feasts of the Circumcision, and St. John the Evangelist.

Single parts of the following are also at PH.: Latin Litany; Collects for 2nd and 4th Sundays in Lent. Another anthem, 'By the waters of Babylon,' is at Durh. J. M^s.

WILT, MARIE (née LIEBENTHALER) (b. Vienna, Jan. 30, 1833; d. Pest, Sept. 25, 1891), singer, was the daughter of poor parents, whom she lost in early life. She was adopted by a respectable couple named Tremier and was married to a civil engineer or architect, Franz Wilt. She first sang in concerts and made a notable success as Jemina in Schubert's 'Lazarus,' performed by the Vienna Singverein, under Herbeck. Advised by Mme. Artôt to adopt the operative stage, she received vocal instruction from Gänsbacher and Wolf, and in Dec. 1865 made her débuts at Graz, and at Berlin, in the following year, as Donna Anna.

On May 1, 1866, she made her début, under the name Vilda, at Covent Garden as Norma, with considerable success, and later as Lucrezia. She sang again in 1867 with less effect. Between these years she sang in Venice and Vienna, with

such success at the later as Leonora in 'Trovatore,' early in 1867, that she was permanently engaged there in the autumn. She became a great favourite both in dramatic and coloratura parts, though physically unfitted for the latter, on account of her corpulent person, to use the words of Dr. Hanslick.¹ On May 25, 1869, she sang, as Donna Elvira, at the opening of the new Opera-House. In 1874 she was the first Aida there, and in 1875 the original Sulamith in Goldmark's 'Königin von Saba.' She was a great favourite in concerts, and in 1873 sang with great success at the Rhenish Festival at Aix-la-Chapelle and the Schumann Festival at Bonn. According to Hanslick, she was unrivalled in 'Alexander's Feast,' the Ode to St. Cecilia's Day, and Brahms's 'Requiem.' On the stage,

'she was a well-played musical instrument; she delighted the ear; a deeper impression she rarely made upon me. Not a vestige of dramatic talent or education.'²

In 1874 and 1875 she was again at Covent Garden as Donna Anna, Semiramide, Valentine, Alice, etc., with somewhat better success than before. But in spite of her wonderful voice of great volume and compass she did not make the success that was expected. Probably she would have succeeded better here, as a concert-singer, for she had, according to Deacon,³ 'perfect production and style.' In 1878 she did not renew her engagement at Vienna for family reasons, but became engaged at Leipzig, where she added Brünnhilde to her repertory, later at Brünn and Pest, singing occasionally as a 'guest' on the stage of her native city, and taking up her residence there on her retirement. She committed suicide there by throwing herself out of a fourth-floor window. A. C.

WINCKWORTH, ARTHUR (b. Bath, 1866), started his musical career as a choir boy in Bath Abbey. He afterwards studied there as basso with Emilio Pieraccini and later went to Italy to study repertory with Bevilacqua. In 1894 he joined the Royal Carl Rosa Opera Co. as principal basso, and has appeared in about 60 operas with that company. He was also artistic director from 1916-21, and from that date on has been principal of the Carl Rosa School of Opera.

WIND-BAND. The history of the development of wind-instrument music is so closely interwoven with the political and social state of Europe in the Middle Ages, that it is almost impossible to sketch the one without touching upon the other. Before the 12th century music of a popular kind was almost entirely in the hands of the wandering or 'roving' musicians, who, associated with actors, acrobats,

¹ *Aus meinem Leben*, vol. ii. cap. 1.

² 'Kleine Spur von schauspielerischem Talent, schauspielerischer Bildung' (Hanslick).

³ H. C. Deacon, article on Singing in the first edition of this Dictionary.

loose women, etc., led an unsettled life. That their free and lawless existence offered great temptations to those of an unstable character may be inferred from the fact that their numbers increased so much that severe imperial and provincial edicts were enacted for their repression. 'Roving men' were considered 'shadows,' and as such out of the pale of law; they could not inherit landed property, recover debts, nor partake of any Christian sacrament.

Yet by the agency of these wandering vagabonds many of the ancient tunes or songs that we have were preserved. If a new melody grew up like a wild-flower, these fifers, fiddlers or minstrels took it up and made it known far and wide. Although a social outcast, it was no breach of etiquette to allow the musician in the houses of high or low degree, and learn from him the last ballad or the newest dance-tune. On all great occasions, fêtes or church festivals, large numbers of them flocked together for the exercise of their merry calling. But their associating together as a 'band' was a matter of mere momentary convenience, and their performances only consisted of playing the melodies of songs, vocal dance tunes, and marches. Bag-pipes being favourite instruments in these bands, we can form an idea of the quality of the 'music.' Trumpets and kettle-drums were strictly forbidden to ordinary minstrels, being reserved for the exclusive use of princes and men of high rank.

These instruments predominated in the bands which officially performed on state occasions, or at royal banquets. It is said that King Henry VIII.'s band consisted of fourteen trumpets, ten trombones and four drums, in conjunction with two viols, three rebecs, one bagpipe and four tambourines. Queen Elizabeth's band consisted (1587), besides a small number of other instruments, of ten trumpets and six trombones.¹ The Elector of Saxony had in 1680 twenty court-trumpeters and three kettle-drums, with apprentices trained for the performances of each instrument. Other courts had their trumpeter-corps, and their respective numbers were considered an indication of the importance, wealth or power of the court. In the German Empire they formed the guild of 'Royal Trumpeters and Army Kettle-drummers,' which enjoyed many privileges and were under the special protection and jurisdiction of the Grand Marshal of the Empire, the Elector of Saxony. No one could be admitted to this corporation without having previously served an apprenticeship of several years.

As early as the 13th century those 'pipers' who were settled in towns, and who felt the ignominious position of being classed with the wandering vagabonds, combined and formed

'Innungen,' or corporations for their mutual protection, in Germany, France and England. The first of these, the 'Brotherhood of St. Nicolas,' was instituted at Vienna, 1288, and elected as 'protector' Count Peter von Ebersdorff, a high imperial official. He organised a 'Court of Musicians,' obtained an imperial charter for its perpetuation, elaborated a set of laws for the guidance of the members, and presided over it for twenty-two years.² In Paris a 'King of Minstrels' was appointed and statutes enacted for the incorporation of the 'Brotherhood of St. Julian,' 1321.³ (See *ROX DES VIOLONS.*)

In England the appointment of 'Patron' of minstrels owed its origin to a curious circumstance. Randal, Earl of Chester, being suddenly besieged, 1212, in Rhrydland Castle by the Welsh at the time of Chester fair, Robert de Lacy, constable of Chester, assembled the pipers and minstrels, who had flocked to the fair in great numbers, and marching at their head towards the castle so terrified the Welsh that they instantly fled. In honour of the event the earls of Chester received the title of 'patrons of the minstrels.'⁴ This dignified title had, however, no influence whatever upon the progress of music, but merely perpetuated some useless public ceremonies once a year, down to the end of the 18th century.

The first guild at Vienna was imitated during the next two centuries by most of the large imperial towns, who established regular bands of 'townpipers,' or 'townmusicians,' under the leadership of the 'Stadtpeifer,' who had to provide all 'musics' at civic or private festivities. Wandering musicians were strictly prohibited from playing within the boundaries of the corporation. In some towns the number of musicians was regulated according to the importance of the occasion, or the rank of the family requiring a band. The 'full band' could only officiate on civic state occasions, or in connexion with religious festivals. An alderman could only employ a reduced number; and if at a citizen's wedding more than from four to six pipers were employed, both the Stadtpeifer and the offending citizen were mulcted in a fine. Kettle-drummers and trumpeters dared not perform except at a nobleman's requisition; the lowest rank of the social scale who could indulge in this luxury being a doctor-at-law. Although the town bands had as yet but poor instrumentation, consisting mostly of fifes, flutes, schalmey, bombard (a sort of tenor or bass oboe), zinken (or cornetti), bagpipes, viols and drums—yet they are the first germs from which modern bands originated.

⁴ Lavoix, *Histoire de l'instrumentation depuis le XVI siècle jusqu'à nos jours*.

In the year 1426 the Emperor Sigismund granted as 'an act of special grace' to the town of Augsburg the privilege of maintaining a corps of 'town trumpeters and kettle-drummers,' a grant extended during the next century to most other free towns; yet it does not seem that the results, in a musical sense, were of such importance as we might expect.

In the pieces written for a band, which date from about three centuries ago, we find a strange habit of keeping different classes of instruments separate. Flutes, reed instruments,

trumpets and hunting-horns, were mostly treated as forming distinct bands. Louis XIV. entrusted Lully with the organisation of certain regimental bands, which were to form a part of the regular army. Before that time the great officers commanding in the field engaged music, if they wanted it, at their own expense. These bands consisted at first of oboes (in four parts—treble, alto, tenor and bass, or bassoon) and regimental drums. The following march is one of the many written by Lully, the notation being that given by Kastner.¹

Premier Air de la Marche Française pour les Hautbois fait par M. de Lully.

A more ambitious composition is the next piece, evidently written for town bands. The cornetto is the CORNETT (*q.v.*) or zinke.

Till the 17th century the music played by the bands of trumpeters was learned by ear, and transmitted without notation, as something of a secret nature. When princes took command of

their armies in the field they were accompanied by their trumpeters, both for signalling (see MILITARY SOUNDS AND SIGNALS) and for enlivening the dreariness of the march or camp. As they served on horseback, the custom arose of looking upon trumpet-music as being specially appropriate to the cavalry service, and

„ IV. etc.

The denomination 'Trompano' in the above score is singular. The usual names for the four different parts of trumpet-music were—Clarino primo, Clarino secondo, Principale, and Toccato. In the example above, the fourth part is either for Trumpet (in which case the bars written $\text{F}\sharp$ are to be played in 'double tongue') or for kettle-drums, but probably for both combined.

The fact that all trumpet and horn music suffered from the absence of such important intervals as the third and seventh of the dominant chord, gave it a monotonous character. To obviate this the device was adopted of adding to the principal body of trumpets, in the key of the tonic, a few tuned in other keys. The adoption and extension of the custom of mixing in both trumpet- and horn-bands a variety of differently-tuned instruments made almost every harmonic progression possible, providing the band was numerous enough.

Although trombones were in frequent requisition they seem not to have been so often combined with either trumpet- or horn-bands as might have been expected. In a collection of Lutheran hymns by Johannes Krüger ('Psalmodia sacra,' publ. 1685) we meet with a fine

duties imposed upon town-bands—having not only to provide the music for all sorts of civic fêtes, but also on high church-festivals to take part in the musical portion of the sacred rites—necessarily led to an enlargement of the limits of ancient instrumentation. Trombones came into general use, and being combined with flutes, oboes, pommers, zinken (cornetti), and sometimes a couple of trumpets and kettle-drums, some very decent band-music emerged by slow degrees from the barbarous noise of former times. Instrumental music now began to be noted down, and we are enabled to trace its progress as we come nearer the 18th century. Bands separated more distinctly into three classes, each striving to perfect its own special mission—the full orchestra addressing itself to the cultivated musical intellect, whilst the military and brass bands appealed to the masses at large.

A new era begins with the invention and rapid improvement of the clarinet, which for wind-bands is as important as the violin is for the orchestra. Its brilliant tone, capable of every shade, from the softest to the loudest, and its large compass, extended by the introduction of the smaller clarinets as well as by tenor and bass clarinets, at once placed it in the rank of the leading instrument; thus the oboe was

¹ MSS, Mus. 3193, Königliche Hof- und Staatsbibliothek, Munich.

pushed into the second place. Two more instruments were so perfected in their construction as to become important additions to wind-bands, namely the bassoon and the French horn.

From 1763 military music assumed a definite form, and although still very rudimentary, we can trace in the instrumentation, as fixed by order of King Frederick II. of Prussia (Frederick the Great), the foundation upon which further development, in the shape of additions of other instruments, soon manifested itself. This first organisation comprised two oboes, two clarinets, two horns, and two bassoons, to which after a short time were added a flute, one or two trumpets and a contrafagotto. The French bands of the Republic (1795) consisted of one flute, six clarinets, three bassoons, two horns, one trumpet and one serpent, besides a number of side-drums. In the time of Napoleon military bands made rapid strides, both with regard to the augmentation of their numbers and to their executive capacity, and were admitted to be the best then in existence. It seems that between the years 1805 and 1808 the addition of bass-drum, cymbals and triangle was made; and also into the Prussian bands that most useless of toys, the crescent, found its way.

England having in no way contributed to improve or even influence the progress of wind instrumental music, we have of necessity to pursue its course on the continent, from whence any important advance was simply adopted. It is difficult to trace the introduction of military bands into the English service: In 1783 the Coldstream Guards had a band of eight musicians—two oboes, two clarinets, two horns and two bassoons. The Duke of York, wishing to improve the musical service, imported from Germany what probably was the first 'full band' of twenty-four men, who, besides the above-named instruments, brought flute, trumpets, trombones and serpent. To these were added three negroes with tambourines and crescent.¹

On the introduction of VALVES (*q.v.*) valve-trumpets were introduced here and there, but without creating a favourable impression. Thus it went on until two men came to the front—one as a reformer of military music, the other as the inventor of scientifically constructed brass instruments—WIEPRECHT and SAX (*q.v.*). The former had an anomalous position, for being a civilian his propositions for reforming a purely military establishment were received but coolly by the military authorities. However, persevering in his endeavours, he at last succeeded so far as to be allowed (at the expense of the commanding officer) to introduce his instrumentation in a

German cavalry brass-band. It consisted of two high trumpets in B \flat (cornettini), two key-bugles in B \flat , two alto-trumpets in E \flat (cornetti), eight trumpets in E \flat , two tenor-horns in B \flat , one bass-horn in B \flat , and three trombones in B \flat , the former all having two or three valves, the latter being slide-trombones. The great advantage of this innovation was so apparent that Wieprecht was requested to introduce it into the bands of the Prussian Life Guards, and he went so far as to give the members of these bands personal lessons, to be assured of a proper perception of his ideas. In 1838 he was appointed director of all the Guards' bands, and in this influential position he successfully dealt with the formation and style of playing of the military bands throughout Germany. The first grand effort of combining many bands for a monster performance, at which he officiated, was at a fête given at Berlin on May 12, 1838, to the Emperor Nicholas of Russia, who was on a visit to the King of Prussia, when Wieprecht conducted a performance of sixteen infantry and sixteen cavalry bands, consisting of 1000 wind-instruments, besides 200 side-drummers. He directed this great mass of musicians, all dressed in brilliant uniforms, in plain civilian garb, and it is said that the Emperor was so struck with the incongruity of the thing that Wieprecht was hurriedly put into uniform to conduct a second performance before the crowned heads four days after.²

Without following in detail the many results of his well-directed efforts, we will only give the instrumentation of the first military (reed) band, as reformed by him.

2 Flutes.	2 Soprano Cornetti in E \flat .
2 Oboes.	2 Alto-cornets in B \flat .
1 A \flat (High) Clarinet.	2 Tenor Horns in B \flat .
2 E \flat Clarinets.	1 Baritone Tuba (Euphonium).
8 B \flat Clarinets.	4 Bass Tubas (Bombardons).
2 Bassoons.	4 Trumpets.
2 Contrabassoons.	4 French Horns.
2 Tenor Trombones.	
2 Bass Trombones.	2 Side Drums, Bass Drum, Cymbals and Crescent.
	(47 men in all.)

For the cavalry he organised the bands thus (trumpet-bands):

Cavalry.	Artillery.
1 Cornettino in B \flat .	3 Cornetti in B \flat .
2 Cornettos in E \flat .	3 Cornetti in E \flat .
4 Cornets in B \flat .	6 Cornets in B \flat .
2 Tenor Horns.	6 Tenor Horns.
3 Trumpets.	3 Euphoniums.
1 Euphonium.	12 Trumpets.
3 Bombardons.	6 Tubas (Bombardons).
(21 men in all.)	(39 men in all.)

And for the light infantry (Jäger) the instrumentation was called 'horn-music,' consisting of—

1 Cornettino in B \flat .	4 French Horns.
2 Cornetti in E \flat .	3 Trumpets.
4 Cornets in B \flat .	2 Euphoniums.
2 Tenor Horns.	3 Bombardons.

The regulation instrumentation of the Aus-

trian bands at the same period differed from the above in so far that it regarded less the artistic completeness than the production of greater power or loudness. We find, therefore, no flute, oboes or bassoons. It consisted of—

Austrian Infantry Band,
1860.

- 1 Piccolo.
- 1 high A \flat Clarinet.
- 2 E \flat Clarinets.
- 4 E \flat Clarinets.
- 2 Cornettini (B \flat).
- 2 Cornetti (E \flat).
- 2 Cornets (B \flat).
- 2 Tenor Horns.
- 2 Euphoniums.
- 4 Bombardons.
- 4 Trumpets.
- 2 French Horns.
- 2 Tenor Trombones.
- 2 Bass Trombones.
- 1 Side and 1 Bass Drum and one pair of Cymbals. (35 men in all.)

The same, 1884.

- 1 Piccolo in E \flat .
- 1 Flute.
- 1 high A \flat Clarinet.
- 2 E \flat Clarinets.
- 8 B \flat Clarinets (in 4 parts).
- 4 Horns (E \flat).
- 2 First Flügel Horns.
- 2 Second ditto.
- 2 ditto. B \flat Bass (or Tenor Horns).
- 2 Euphoniums.
- 10 Trumpets E \flat (in 4 or 5 parts).
- 2 Bass Trumpets (B \flat).
- 3 Bombardons in F.
- 3 Tubas in E \flat , C, or Contra B \flat .
- 2 Side Drums and 1 Bass Drum and Cymbals. (47 men in all.)

This regulation number has, however, on nearly all occasions been overstepped, and there are frequently bands of from seventy to ninety performers.

Spontini recommended to the special commission for the reorganisation of the French military bands, at Paris, 1845, the following as the best instrumentation for bands of infantry regiments :

- 1 Piccolo.
- 2 Concert Flutes.
- 2 E \flat Clarinets.
- 8 or 10 First B \flat Clarinets.
- 8 or 10 Second ditto.
- 2 Alto Clarinets.
- 2 Bass ditto.
- 4 First Oboes.
- 4 Second ditto.
- 2 Bassethorns (Alt. Clarinet in F).
- 2 First Bassoons.
- 2 Second ditto.
- 2 high Saxhorns in E \flat (Cornettos).
- 4 Saxhorns in B \flat (Cornets)
- 4 Ditto (Althorns).
- 4 Bass Saxhorns in B \flat (Euphoniums).
- 4 Contrabass Saxhorns (Bombardons).
- 2 Horns without valves.
- 2 Ditto with 3 valves.
- 3 Trombones (slide—alt., tenor and bass).
- 3 Ditto, with valves (ditto).
- 1 Serpent (Ophicleide).
- 1 or 2 Contrafagotts.

But it was not adopted.

Like Wieprecht in Germany, Sax in France created a revolution in the instrumentation of the military bands ; but, whereas the former was prompted by purely artistic motives, the latter acted from scientific knowledge and for mercantile purposes. (See SAX.) He adapted the valve to all classes of brass instruments, and gave them the generic name of Saxhorns, Saxtromba, Saxtuba, etc., ignoring the fact that valve-trumpets, valve-horns and various other forms of valve-brass instruments were known, although not in general use, long before he adopted them for his 'inventions.' The bombardons (by him called Saxtubas) were designed by Wieprecht, and introduced into the Prussian army before 'Saxtubas' were heard of.³ However, by a unity of design and

a great number of ingenious improvements in the details of manufacture, he deservedly gained a great name as an instrument-maker. This, combined with influence at the court of Napoleon III., and the enthusiastic support of Berlioz, enabled him to bring about a complete reorganisation of the French military bands, he obtaining almost the monopoly of supplying the instruments. He designed a peculiar clarinet of metal, very wide in diameter and conical in shape, formidable-looking on account of a great number of keys, and called the SAXOPHONE (*q.v.*).

The following lists of French infantry bands show that the instrumentation, as fixed by the government of the time, has since been considerably departed from :

In 1860.

- 2 Flutes.
- 2 Piccolos.
- 4 Clarinets.
- 2 Oboes.
- 2 Saxophones soprano.
- 2 Do. alto.
- 2 Do. tenor.
- 2 Do. baritone.
- 2 Cornets à pistons.
- 2 Trumpets (cylinder).
- 3 Trombones.
- 2 Saxhorns, B \flat alto.
- 3 Saxtromba, E \flat .
- 2 Saxhorns, baritone B \flat .
- 3 Do. bass in B \flat (4 cylinders).
- 1 Saxhorn, contrabass in E \flat .
- 1 Saxhorn, contrabass in B \flat .
- Side and Bass Drums and Cymbals.²

In 1884.

- 2 Piccolos in E \flat .
- 1 Flute in D (concert).
- 2 Oboes.
- 1 E \flat Clarinet.
- 4 E \flat Clarinets.
- 1 Saxophone soprano.
- 1 Do. alto.
- 1 Do. tenor.
- 1 Do. baritone.
- 2 Bassoons.
- 1 Petit Bugle in E \flat .
- 2 Pistons in B \flat .
- 2 Bugles in B \flat .
- 2 Horns in B \flat .
- 2 Trumpets in E \flat .
- 3 Altos in B \flat .
- 2 Barytones in B \flat .
- 3 Trombones.
- Bass in B \flat (Euphonium).
- Contrabass in E \flat .
- Do. in B \flat .
- Drums and Cymbals.⁴

The bands of two more armies may be mentioned ; the first on account of a rather peculiar instrumentation, and the second as a curious illustration of the influence of European ideas upon a very distant people.

Spain.

- 1 Piccolo in E \flat (D \flat).
- 1 Flute in E \flat .
- 1 E \flat Clarinet.
- 10 B \flat Clarinets.
- 2 Saxophones sopr. in B \flat .
- 2 Do. alto in E \flat .
- 2 Do. tenor in B \flat .
- 2 Do. bass in C.
- 2 Flügelhorns in B \flat .
- 4 Cornets in B \flat .
- 3 Trumpets in E \flat .
- 2 French Horns.
- 4 Tenor Trombones in C.
- 1 Bass Trombone in F.
- 2 Euphoniums in B \flat .
- 2 Bombardons in E \flat .
- 2 Tubas in C.
- 1 Tuba (Contra F).
- 1 High (shallow) Side Drum.
- 1 Do. (long old pattern)
- 1 Bass Drum.
- 1 Cymbal.
- 1 Lyra Glockenspiel.
- (to which are added, for various instruments, 10 pupils under training.)

Japan.

- 2 Flutes.
- 1 Oboe.
- 2 E \flat Clarinets.
- 8 B \flat Clarinets.
- 4 Saxophones in B \flat .
- 4 Do. in E \flat .
- 2 Do. in B \flat (bass).
- 2 Baritones in B \flat .
- 3 Cornets in B \flat .
- 2 Trumpets in E \flat .
- 3 Trombones.
- 4 Euphoniums.
- 2 Bombardons in E \flat .
- 2 Contrabasses in B \flat .
- And 2 Drums, with Cymbals.⁵

⁵ *Ibid.*

In 1878 Gilmore brought the band of the 22nd Regiment of New York to Europe, giving concerts at Liverpool, Dublin, the Crystal Palace, Paris, etc. Although the band had a great reputation, its performances surpassed the expectation of even the most fastidious critics.

Their instrumentation was as follows :

2 piccolos, 2 flutes, 2 oboes, 1 A♭ piccolo clarinet, 3 E♭ clarinets, 8 first, 4 second, and 4 third B♭ clarinets, 1 alto and 1 bass clarinet, 1 soprano, 1 alto, 1 tenor and 1 bass saxophone, 2 bassoons, 1 contra-fagotto, 1 E♭ cornetto, 2 first and 2 second B♭ cornets, 2 trumpets, 2 flügelhorns, 4 French horns, 2 E♭ alto horns, 2 B♭ tenor horns, 2 euphoniums, 3 trombones, 5 bombardons, 3 drums and cymbals—66 in all.

Military (Reed) bands are now constructed on the same system in all countries.

The following is the instrumentation of an English Military Band as at present (1927) in use at the ROYAL MILITARY SCHOOL OF MUSIC (q.v.) (Kneller Hall), Twickenham.

1 Piccolo.	1 1st B♭ Cornet.
1 Flutes.	2 2nd B♭ do.
1 1st E♭ Clarinet.	1 1st B♭ Trumpet.
2 2nd E♭ do.	2 2nd B♭ do.
1 1st Oboe.	1 1st Tenor Trombone.
2 2nd do.	2 2nd do. do.
Solo B♭ Clarinets.	1 Bass Trombone.
1 1st B♭ do.	Euphonium.
2 2nd B♭ do.	E♭ and B♭ Bases (play
3 3rd B♭ do.	from the same part).
E♭ Alto Saxophone.	Tympani, Side drum.
B♭ Tenor do.	Bass drum and the
1 1st Bassoon.	usual percussion and
2 2nd do.	effects.
1 1st Horn (F or E♭).	
2 2nd do. do.	
3 3rd do. do.	
4 4th do. do.	

With this may be compared the following scheme as given for an Italian Military Band, as well as the specimens of recently (1925) published scores for such bands in France, Spain and Germany.

Instrumentation of the Italian Military Band.

Ottavino in Re bemolle.
Due Flauti in Do.
Due Clarinetti Piccolo in La bemolle e Mi bemolle.
Tre Clarinetti Soprani in Si bemolle.
Due Clarinetti Contralti in Mi bemolle.
Do. do. Bassi (Claroni) in Si bemolle.
Quattro Saxofoni.
Soprano in Si bemolle.
Contralto in Mi bemolle.
Tenore in Si bemolle.
Baritono in Mi bemolle.
Contrabasso.
Quattro Corni in Mi bemolle.
Due Cornette in Si bemolle.
Do. Trombe in Si bemolle.
Do. do. in Mi bemolle.
Do. Tromboni Tenori in Si bemolle.
Trombone Basso in Fa e Contrabasso in Si bemolle.
Flicorno Soprano (Pistonino) in Mi bemolle.
Due Flicorni Soprani in Si bemolle.
Do. do. Contralti (Genis) in Mi bemolle.
Do. do. Tenori in Si bemolle.
Flicorno Baritono (Bombardino) in Si bemolle.
Do. Basso (Eufonio) in Si bemolle.
Flicorni Bassi-Gravi in Fa e Mi bemolle.
Do. Contrabassi in Si bemolle.
Timpani.
Tamburo.
Gran Cassa e Piatti.

Instrumentation of Continental Military Bands.

French ('L'Apprenti Sorcier').

Petite Flute.	1er 2e 3e et 4e Trombones.
Grandes Flutes.	Petit Bugle.
1er et 2e Hautbois.	1er et 2e Bugle.
Petites Clarinettes.	1er et 2e Cors MI♭.
Clarinettes Soli.	1er 2e et 3e Altos.
1ers Clarinettes.	1er et 2e Barytons.
2e et 3e Clarinettes.	1re et 2e Basse SI♭.

Flauto piccolo.	Corno in F, I, II, III and
Do. grand.	IV.
Oboe I and II.	Alt Cornettin Es, I and II.
Clarinetto in Es, I and II.	Tenorhorn in B, I and II.
Clarinetto in B, I, II and	Baryton.
III.	Trombone Tenore, I and II.
Fagott I and II.	Do. Basso, I and II.
Cornett in B, I and II.	Tuba I and II.
Tromba in F, I, II, III	Tambour petit.
and IV.	Do. grand.
	Glockenspiel.

The assimilation of instrumentation in all countries has facilitated the publication of a large literature for wind-bands. Though the bulk of the best work still consists of arrangements from the orchestral repertory a few modern composers have produced original works for the wind-band, and English composers have been particularly encouraged in this direction in recent years by the more serious artistic attitude adopted by the ROYAL MILITARY SCHOOL OF MUSIC (q.v.).

J. A. K.; rev. C. with information from H. E. A.

WIND-CHEST; the box-like construction in an organ which receives the wind from the bellows, and supplies it to the pipes above, when the pallets in the wind-chest are opened and the sliders drawn. (See ORGAN, subsection 3, THE MODERN ORGAN.) T. E.

WINDSET, JOHN, a music and typographical printer, living in the reigns of Elizabeth and James I. His first address was at the White Bear in Adling Street. In 1594 he was at the 'Crosse Keyes' at Paul's Wharf. He printed several editions of Sternhold's Psalms, and many musical works. He held an assignment of printing rights from William Barley. His works include Greaves's 'Songs of Sundrie Kindes,' 1604; Hume's 'Ayres French, Polish, and others,' 1605; 'An Howres Recreation in

Musick,' by Rd. Alison, 1606; John Bartlet's 'Booke of Ayres'; Michael East's 'Second Set of Madrigales,' 1606; Robert Jones's 'First Set of Madrigals,' 1607, and some others of a similar kind.

F. K.

WIND GAUGE, see TELL-TALE.

WIND-HOLE, the hole in the boot or foot of an organ pipe for admission of the wind.

T. E.

WIND INSTRUMENTS. This designation is by common consent held to include all instruments supplied with air from the lungs of the player, and to exclude instruments, such as the organ, harmonium and concertina, which receive their wind-supply from bellows fed with natural air. Certain instruments of the bagpipe family which are blown by bellows must, however, be regarded as exceptions to the rule.

Disregarding forms used among peoples whose music is to us either in a barbaric stage or but little removed therefrom (see PIPES, EVOLUTION AND DISTRIBUTION OF MUSICAL), all modern wind instruments of artistic value may be classified in two different ways, under either of which they fall into three distinct groups. In every wind instrument it is the column of air itself which is virtually the instrument, and not the tube of wood or metal which fixes its proportions and dimensions, and the acoustical properties of such columns, therefore, afford the means of determining one of these systems of classification. As is explained in the article ACOUSTICS, a cylindrical tube open at both ends, when excited to musical speech, can give a fundamental note whose wave-length is twice that of the tube, and also upper notes following the lowest, or prime, in the harmonic series. If the tube be halved in length and closed at one end, the fundamental note remains the same, and also every alternate upper note, but the notes represented by the even numbers of the harmonic series are now absent. A conical tube complete to its apex is of the same pitch, and has the same series of natural tones as the cylindrical tube open at both ends. We have, therefore, the following results:

Harmonic series	1	2	3	4	5	6	7	8	9	10, etc.
Open cylindrical tube and cone of same length	c	c'	g'	c''	e''	g''	b \flat ''	c'''	a'''	e'''
Cylindrical tube closed at one end of half length of open tube	c		g'		e''		b \flat ''		a'''	

and the three divisions under which all wind instruments are grouped in this scheme may be held to be represented by the flute, the clarinet, and the horn. The stopped tube may be represented, however, by the pandean pipe instead of by the clarinet, and the cone may be represented by the bassoon instead of by the horn, and other variations might be instanced,

so that in practice it is found more convenient to classify instruments according to the manner in which the player's lips are applied for the production of the tone than by the three fundamental forms of resonating tubes, and we thus obtain the three great divisions of flute, reed and brass.

Of these primary divisions, the flute and reed in modern bands, both orchestral and military, are frequently grouped together as the 'wood wind,' leaving the 'brass wind' as a division by itself. The material, however, has but little significance, as the 'wood wind' may include flutes of silver, clarinets of ebonite or vulcanite and saxophones of brass, and the 'brass wind' includes, or until late years included, serpents, ophicleides, and other forms of brass horns blown with cup mouth-pieces, made sometimes of wood, and sometimes of metal.

The Table of Classification on p. 738 shows the grouping and relationship of the majority of our modern wind instruments and of a few of the early types with which their connexion is easily traced. For the special characteristics of individual instruments or of families, the reader is referred to articles under each name, but characteristics which are common to many families in the different divisions are more conveniently treated here.

The one fundamental fact common to all wind instruments is that the scale is based upon the harmonic series of sounds, in which the interval between any two consecutive notes is measured by the same number of vibrations. The means of altering the normal length of an instrument so as to obtain a change of wave-length with corresponding change of pitch of harmonics, lies at the root of development from elementary types.

The various means of altering lengths, thereby completing the scale, and the different methods of tone-production, are here set forth under the three different divisions adopted in the Table.

1. FLUTES.—The source of tone in every instrument in this division is a thin stream, blade, or reed of air issuing either directly from the lips, or from a chink or slit as in the common penny whistle. The passing of this stream across the end of a tube as in the pandean pipe, or across a side mouth-hole as in the modern flute, sets up in the tube alternate rarefactions and condensations, or stationary waves, the fundamental pitch of which depends almost entirely upon the length of the tube, but somewhat upon the size of mouth-hole and other details, and also upon the force of blowing. With an open tube, an increase of force in blowing first slightly raises the prime or fundamental note; the pitch then leaps to the octave or second note in the harmonic series, and subsequently to the twelfth or third harmonic. Higher notes can be obtained,

TABLE OF CLASSIFICATION OF WIND INSTRUMENTS

<i>Division.</i>	<i>Class.</i>		<i>Family.</i>	<i>Subdivisions of Families and Special Examples.</i>
FLUTE or Air-Reed.	Vertical or beaked (Flûte-à-bec).		Recorders or Flûtes-douces. Flageolets. Galoubets.	Soprano to Bass. Picco Pipe. Single, double, and triple. Tabor Pipe.
	Transverse (Flûte traversière).		Blown across open end {	Egyptian Nay (open pipe). Pandean Pipe (closed pipe).
			Blown across side mouth- hole (modern flutes).	Flutes, Fifes, and Piccolos (both cone and cylinder).
REED. In all these Instruments, except the Bagpipes and Cromornes, the reeds are under the direct control of the lips.	Single Reed.	With Cylindrical Tube.	Arghool. Chalumeau. Clarinet.	{ Soprano to Bass. Basset Horn.
		With Conical Tube.	Saxophone.	
	Double Reed.	With Cylindrical Tube.	Aulos or Greek Flute.	Racket or Cervelat. Sourdine.
			With enclosed reed.	Cromorne or Krummhorn.
		With Conical Tube.	Pommers, including Shawn or Schalmey.	Wait or Waight. Musette. Oboe. Cor Anglais. Dulcian. Bassoon.
	Single and Double Reeds enclosed and in com- bination.	Bagpipe (Cylindrical and Coni- cal tubes in com- bination).		Cornemusa. Highland Bagpipe. Bignou. Zampogna.
		Air-reservoir supplied from the lungs.	Musette. Northumbrian Bagpipe. Irish Bagpipe.	
BRASS. Lips acting as reeds against cap-shaped mouth-pieces.	Tubes of fixed length.		Short, i.e. Lower harmonics chiefly used.	Olipphant. Bugle. Post-Horn.
			Long, i.e. Upper harmonics freely used.	Trumpet. French Horn.
	Length varied by side- holes closed by fingers or keys.		Cornetts or Zinken (chiefly of wood).	Cornetto diretto, Cornetto curvo, and Cornetto torto. Serpent.
			Metal Horns.	Key Bugle. Ophicleide. Bass Horn or Bassoon Russe.
	Length varied by slide.			Trumpet. Trombone.
				Cornet. Trumpet. French Horn.
Length varied by valves.		Saxhorns {	Bugle type {	Flügel Horn.
			Wide bore {	Tenor and Baritone Althorns. Euphonium. Tuba or Bombardon.

but are of no practical importance in flute-playing.

The completion of the scale in these instru-

ments is obtained by the introduction of side holes, closed either by the fingers or by padded keys. By this means the speaking length of

the tube is gradually shortened as the scale ascends.

2. **REED.**—In this division the lips act by controlling the vibration of a single or double blade of cane (see **REED**), and although there is necessarily a slight opening between the singlereed and its mouth-piece, and between the two blades of a double reed, this opening is either almost or altogether periodically closed during vibration, so that the associated instrument behaves as a tube stopped at one end. In conical tubes, whether with single or double reed, the series of tones is as on the flute, but when the reeds are associated with cylindrical tubes the even numbered notes of the harmonic series are absent. In all instruments in this division, side holes are used in the same way as in the flutes.

3. **BRASS.**—In the majority of instruments in this division the upper harmonics play a much more important part than on those included in divisions 1 and 2, the lips having the power of covering the range of three octaves or more without altering the mouthpiece. On a very short horn such as a natural ox-horn, or the mediæval oliphants, only the fundamental note of the harmonic series with its octave, and sometimes its twelfth, can be sounded, but the ease of producing relatively higher notes increases with increase of length until in the ordinary field bugle the sixth harmonic becomes easy, and the eighth possible. Increasing the length of the instrument yet more, as by the addition of a small cylindrical tube, so as to lower the fundamental pitch by an octave, we obtain an approximation to the trumpet, on which the twelfth harmonic is easy, being in this case of the same actual pitch as the sixth harmonic on our original bugle. On the French horn the length is further increased, and harmonics up to the sixteenth are available.

Instruments of fixed length such as the horn and trumpet can therefore give in their upper octave certain successive notes of the diatonic scale which it is impossible to produce on short natural horns, but such short horns on which only the lower harmonics are possible may be regarded as typical of the old cornetts or zinken. In these the scale was completed by side finger-holes in the same manner as on the flute and reed instruments, and the system was further extended by key-work on the serpent, key-bugle and ophicleide.

It is evident that a new fundamental note can be obtained by lengthening a given tube, as well as by shortening it. This lengthening, carried out by means of telescopic slides, is the principle adopted in the trombone, and it is an excellent one both musically and mechanically. It is, however, necessarily limited to instruments having a large proportion of cylindrical tubing, and therefore of a certain tone-quality. Instruments having a continuous taper are

necessarily excluded from the slide action, and in these in early days the filling up of the scale was made possible by the introduction of side-holes as above described.

The disappearance of all lip-blown instruments with side-holes, the cornetts, serpents, ophicleides, etc., is undoubtedly the result of the introduction of the valve action in its various forms. A sketch of the development of the principle will be found under the article **VALVE** (*q.v.*) and of the chief instruments in which the valve is used under their respective names. It will be sufficient here to describe the action generally, and to note the grouping into which valve instruments naturally fall.

The idea on which the valve is based has more analogy to the slide than to any other contrivance, for the depression of a valve or valves opens air-ways into additional tubing, which virtually lengthens the instrument, so that the effect is similar to that produced by the extension of the trombone slide. The depression of a valve or valves flattens the pitch by one or more semitones, so that from each alteration of length a new harmonic series is obtained, and the chromatic scale in valve instruments is therefore built up of elements derived from many different harmonic scales. In an ordinary three-valve instrument there are, in addition to the harmonic scale proper to its natural length, six others due to the valves acting either singly or in combination, and the addition of a fourth valve gives six other harmonic scales subject to certain limitations noticed under the article **VALVE**.

The chief valve instruments may be grouped thus:

(a) **Cornet**: a hybrid instrument combining the qualities of a high-pitched trumpet and of the flügel-horn or bugle.

(b) **Saxhorns** of the bugle type, ranging in pitch from soprano to baritone.

(c) **Saxhorns** of wide bore, and consequently broad tone, and of bass and contrabass compass. These are known as euphoniums, tubas and bombardons, and take the place of the serpents, ophicleides and other bass horns formerly used.

(d) **Horns, trumpets and trombones**. The original proportions of these instruments are little changed by the introduction of the valve, but the quality of the trombone loses some distinctiveness, through a lessening of the force of the upper partials.

In group (c) owing chiefly to the large calibre, the pedal octave between the first and second notes of the harmonic series is available, whereas in all the other groups the pedal octave is practically unused. The instruments in group (c) have therefore a compass downwards of about one octave more than the other instruments.

In one respect wind instruments occupy a position midway between keyboard instruments

and the bowed-string class. On a keyboard instrument the performer has little or no power of regulating either intonation or quality; the violinist, on the other hand, has absolute control over intonation and great control of quality. Mouth-blown instruments are susceptible of some slight control over intonation by the player; he can correct a note that is slightly sharp or flat, and he can also modify tone-quality.

The comparatively recent development of our wind instruments, as contrasted with the permanence of model of the violin since the days of Stradivarius, is to be explained in large measure by the difficulty early makers had in overcoming the limitations imposed by the natural number and stretch of the fingers. Of the ten fingers, two at least are required for the support of an instrument, leaving only eight for the control of the ventages required for a chromatic scale extending in instruments of the clarinet type through the compass of a twelfth. As a consequence we find that the older instruments were designed on a diatonic, rather than on a chromatic basis, and it is only with the introduction of modern mechanism that good chromatic scales have become possible. (For a general sketch of the different schemes of treatment of side-holes, see FINGERING.)

D. J. B.

WINDSOR, or ETON TUNE. This famous psalm tune is first found complete (unless the assertion be true that its original form is in Nyland's 'Piae cantiones,' 1582) in Daman's music to the Psalms, 1591, harmonised in four parts, and set to Ps. cxvi. It is not in Daman's earlier work of 1579.¹ As no complete set of parts is known to exist, the melody only can be quoted:

This affords an example of Daman's method of prolonging a tune by repetition, of which Hawkins speaks.

In 1592 the tune appears in East's 'Whole Booke of Psalmes,' containing the Church Tunes and 'other short tunes usually sung in London, and most places of the Realme.' It is marked as being one of the latter, and must therefore have been in use for some little time previously.

¹ For an account of this extremely scarce work see Hawkins, *Hist. of Music*, chap. cxvii.; also vol. i. p. 664.

In East's Psalter it is harmonised by George Kirby, the melody in the tenor. Daman and Kirby merely harmonised the melody, but whoever was its composer, it is only an adaptation of the tune set by Tye (*q.v.*) to the third chapter of

¹ The Actes of the Apostles, translated into Englyshe Metre . . . with notes to echs Chapter, to syng and also to play upon the Lute, 1553.

Here we find the first, third and fourth strains of Windsor, and a fragment of the second. For the sake of comparison Dr. Tye's tune is subjoined, reduced into score in modern clefs.

In East's Psalter the tune has no distinctive name, but in 1615 it was inserted in the Scottish Psalter published by Andro Hart, as 'Dundie.' In Ravenscroft's Psalter, 1621, it is marked as an English Tune, and is doubly named 'Windsor

or Eaton.' The tune was popular in Scotland,¹ and this, coupled with the Scottish form of its earliest name, led to the belief that it was indigenous to that country.

In Hart's Psalter of 1615 the melody alone is given with slight variations, including the omission of the accidental leading note. This may have been done to assimilate its character to that of other tunes in the collection; but however this may be, the accidental was restored to the penultimate note of the last strain in Raban's Psalter, Aberdeen, 1633, and throughout the hymn in the harmonised Scottish Psalter of 1635.

G. A. C.

WIND-TRUNK, a large wooden or metal tube for conveying the wind of an organ from the bellows to the wind-chest.

T. E.

WINDWAY, the narrow slit or opening between the block or languid, and the cap or lower lip of a flue pipe of the organ.

T. E.

WINGHAM, THOMAS (b. London, Jan. 5, 1846; d. London, Mar. 24, 1893), became organist of St. Michael's Mission Church, Southwark, at the age of 10, and in 1863 entered the London Academy of Music. Four years afterwards he went to the R.A.M. and became pupil of Sterndale Bennett for composition, and of Harold Thomas for piano. In 1871 he was appointed a professor of the piano in the school, and was subsequently elected a fellow. As early as 1864 he was appointed organist of All Saints, Paddington, and in 1882 was given the post of musical director at the Brompton Oratory, an office which he filled with much distinction until his death.

His church compositions are marked by suavity rather than austerity, and it is rather as a pioneer of better things in the music of the Roman Church than as a composer that his name will be remembered. He raised the services at the Oratory to a very high standard. His Mass in D was composed for Antwerp Cathedral in 1876, and another Mass was written in the following year for the Oratory. A Te Deum, for voices, orchestra and organ, was brought out at the Oratory in 1884, and in the same year his fine motet, 'Amavit sapientiam' was written for the tercentenary of St. Charles Borromeo at the church of St. Mary of the Angels, Bayswater.

He left four symphonies (in D minor, R.A.M. 1869; in B flat, Crystal Palace, 1872; in E minor, with choral finale, 1873; and in D, 1883). His six concert-overtures are as follows: No. 1, in C, Jubilee of the R.A.M., 1872; No. 2, in E (Eros), Crystal Palace, 1875; No. 3, in D, choral, Alexandra Palace, 1877; No. 4, in F ('Fair laughs the morn'), Crystal Palace, 1878; No. 5, in A, Brighton Festival,

1879; No. 6 ('Mors janua vite'), Leeds Festival, 1880. An elegy on the death of Sterndale Bennett was performed at the Crystal Palace in 1875, and a serenade in E flat at the Philharmonic, 1885. A concert-capriccio for PF. and orch., two string quartets, a septet for piano and strings and wind, were completed, and an opera, 'Nala and Damayanti,' was left incomplete. (*Brit. Mus. Biog. etc.*) M.

WINKEL, DIETRICH NIKOLAUS (b. circa 1780; d. Amsterdam, Sept. 28, 1826), a mechanic who constructed several instruments for musical reproduction and was the inventor of the METRONOME (*q.v.*). (See also MAELZEL.)

WINKELMANN (1) HERMANN (b. Brunswick, Mar. 8, 1849; d. Vienna, Jan. 18, 1912), tenor singer. With the intention of becoming a pianoforte-maker he went to Paris for his training, but abandoned business for a vocal career. After lessons in singing from Koch at Hanover, he made his début in 1865 at Sondershausen. He sang successively at Altenburg, Darnstadt and Hamburg, where on Nov. 1, 1879, he made a great success as the hero on the production of Rubinstein's 'Nero.' On May 18, 1882, he made his début at Drury Lane, under Richter, as Lohengrin (in German), and attracted immediate attention on account of his fine tenor voice, manly presence and admirable acting. He sang also as Tannhäuser, and was the original Walther von Stolzing and Tristan in England; he was admired in all three parts. On June 20 he sang at a Richter Concert, St. James's Hall, with Frau Sucher in her husband's 'Waldräulein,' and on June 26 in the Choral Symphony. On July 26 he was the original Parsifal at Bayreuth. In 1883 he was engaged at Vienna, the result of successful 'Gastspiele' there before, in operas of Wagner, Meyerbeer, etc., and on Oct. 4 he and Materna were the first Tristan and Isolde in that city. He became a great favourite there. In operas new to Vienna he sang the tenor parts in Marschner's 'Vampyr,' Massenet's 'Cid,' Verdi's 'Otello,' Merlin, on production of Goldmark's opera of that name, Admetus in the revival of 'Alceste,' Rinaldo in the revival of 'Armida,' etc. On June 1, 1906, he retired on a pension.

A. G.

(2) HANS, his son, is also an esteemed 'Heldentenor,' who appeared first at the Vienna Opera and later at Prague and elsewhere (*Riemann*).

WINN, WILLIAM (b. Bramham, Yorks, May 8, 1828; d. Willesden, June 4, 1868), bass singer, was taught singing by Sir G. Smart and Schira and made his first appearance in London in 'St. Paul,' Oct. 24, 1855, at St. Martin's Hall. He became popular in oratorio and glee music. In 1864 he was elected a gentleman of Her Majesty's Chapels Royal, and in 1867 vicar choral of St. Paul's. He was a member of the Noblemen and Gentlemen's Catch Club, and

¹ Burns, in his 'Cottar's Saturday Night,' refers to this tune:

Perhaps Dundee's wild warbling measures rise,
Or plaintive Martyrs, worthy of the name.

Care must be taken not to confound it with the 'Dundee' of Ravenscroft, which is the 'French tune' of the Scottish Psalter.

Honorary Secretary of the Round, Catch and Canon Club. His song 'Nothing more,' and the prize glee, 'Go, Rose,' are well-known favourites. His elder daughter and pupil, FLORENCE (b. Nov. 1857), was a favourite contralto concert singer who made her début in 1881.

A. C.

WINNEBERGER, PAUL ANTON (b. Mergentheim a./d. Tauber, 1758; d. Hamburg, Feb. 8, 1821), violoncellist, organist and composer. He studied under Magister Heilig, Abbé Vogler and Holzbauer. At the age of 9 he was court altist at Mergentheim, at 14 organist at the Dominican church. He studied theology at Würzburg and Heidelberg Universities, and c. 1778 was teacher at the Music Seminary, organist at the Jesuit church and solo violoncello at the theatre, Mannheim. In 1780 he became solo violoncello and music director to Prince Wallerstein, and from 1783 teacher and violoncellist at the French Theatre, Hamburg. He composed an opera, violoncello concertos, quartets, trios, sonatas, etc. (*Mendel*; E. v. d. Straeten, *History of the Violoncello*; Q.-L.).

WINSULATE, RICHARD, organist at Winchester Cathedral, c. 1550. Of his compositions, only a piece for organ or virginal, 'Lucem Tuam,' has been found, contained in the Redford MS., B.M. Add. MSS. 29,996.

E. v. d. s.

WINTER, PETER VON (b. Mannheim, 1755¹; d. Munich, Oct. 17, 1825), an opera composer, much esteemed in his day.

At 11 years old he was a violinist in the Elector Karl Theodor's celebrated band. He had some instruction in composition from the Abbé Vogler, but really formed himself as a composer later in life. In 1776 he became musik-director of the court theatre, and in this post made acquaintance with Mozart, to whom he took a great dislike, and whom he damaged later in Vienna by spreading false reports about his private life.² When the court removed from Mannheim to Munich Winter followed; in 1794 he was made vice Kapellmeister, and in 1798 court Kapellmeister. This post he retained to his death, and was treated with the greatest consideration, receiving on more than one occasion leave of absence for two or three years. On one occasion he presumed too far on this leniency, and was thereby in disgrace for a time. He visited Vienna twice, first in 1781, when he produced three ballets, and again during the years between 1793 and 1797, when he had nine operas performed at the Burgtheater and Schikaneder's theatre, including 'Das unterbrochene Opferfest' (Burgtheater, June 14, 1796), and a cantata 'Timoteo o gli effetti della musica' (1796), by the Tonkünstler Societät. The intercourse he main-

tained with Salieri was important as inducing him to pay more attention to the vocal part of his compositions. This is perceptible in all the works written in Vienna. He also visited Italy (Naples and Venice, 1791 and 1793), Prague (1796), Paris (1802 and 1806), London (1803-05), and Italy again (Milan and Genoa, 1817-19). Besides a number of operas, of which the greatest and most lasting favourites were 'Maria von Montalban' (Munich, 1798) and the 'Das unterbrochene Opferfest,' popular on account of its catching melodies, Winter composed a quantity of church music, cantatas, lieder, partsongs and instrumental works (symphonies, overtures and concerted pieces for various instruments), most of which were printed, but have long since disappeared. His Singing Method (Schott, Mayence, with German, French and Italian words) is, however, still of value.

We append a list of his operas, classified according to the places where they were first produced:

MUNICH.—'Armida' (1778), 'Cora ed Alonzo' and 'Leonardo e Blandine' (1778), 'Helen and Paris' (German, 1780), 'Der Bettelstudent' (German opera, 1781), 'Bellerophon' (German, 1782), 'Scherz, List, und Rache' (opera, 1784), 'Circe' (1788), 'Jery und Bätely' (German, 1790), 'Psyche' and 'Der Sturm' (Shakespeare's 'Tempest,' 1793), 'Marie von Montalban' (German, 1798), 'Der Frauenbund' (German, 1805), 'Colmal' (1809), 'Die Blinden' (German, 1810).

NAPLES.—'Antigone' (1791).

VENICE.—'Catone in Utica' (1791), 'I Fratelli rivali' and 'Il Sacrificio di Creta' (1792).

VIENNA.—'Armida' and 'Rinaldo' (German melodrama with chorus and dances, 1793), 'I due vedovi' and 'Das unterbrochene Opferfest' (German, 1796), 'Babylons Pyramiden' (German, with Mederitsch, nicknamed Gallus, 1797), and 'Das Labyrinth' (sequel to the 'Zauberhütte,' German, 1798).³

PRAGUE.—'Ogus, il trionfo del bel sesso' (1796).

PARIS.—'Tamerlan' (1802), 'Castor e Pollux' (1805).

LONDON.—'Calypso' (1803), 'Proserpina' (1804), 'Zaire' (1805).

MILAN.—'I due Valdomiri' and 'Maometto' (1817), 'Etelinda' (1818), 'Sänger und Schneider,' written in Geneva but first produced in Munich (1820), his last work for the stage.

Besides the above, the following exist in various libraries (see Q.-L.):

'La Bella, ossia la fedeltà riconosciuta'; 'Elise, Gräfin von Hilburg' (1797); 'Heinrich IV.' (ballet); 'Ines de Castro' (ballet); 'La Mort d'Hector' (ballet); 'La Mort d'Orfeo ed Euridice' (ballet with songs); 'Salomons Urteil'; 'Wittwer und Wittwe.'

Of his church works there are in the Royal Chapel at Munich 26 masses, 2 Requiems, 3 Stabat Maters, and a quantity of graduales, offertories, vespers, etc. For the Protestant court chapel he wrote 7 cantatas, 2 oratorios, 'Der sterbende Jesus' and 'La Betulia liberata,' a German Stabat Mater, and smaller anthems. (See Q.-L. for detailed list.)

Winter's strong points were just declamation, agreeable melody, brilliant choral writing and rich instrumentation, which he never suffered to overpower the voices. His weakness was in counterpoint, which he had never found an opportunity of mastering thoroughly. As a whole his church music is preferable to his operas; which, though vocal and melodious, have neither originality, greatness, dramatic force, fire nor genius. His airs are specially weak, never seeming fully developed. Winter could amuse and entertain, but to seize the imagination, to touch, to agitate, was beyond

¹ The early dates have been fairly well established in Q.-L., which is here followed.

² Jahn's *Mozart*, 2nd ed. i. 363, 695.

³ These two were written for Schikaneder's theatre.

him. This is why even his best and most popular works disappeared from the stage soon after his death.

C. F. P.

WINTERFELD, KARL GEORG AUGUST VIVIGENS VON (b. Berlin, Jan. 28, 1784; d. there, Feb. 19, 1852), was educated for the law, which he studied at Halle. After holding a succession of official posts at Berlin and Breslau, he retired on a pension in 1847 and devoted himself to musical literature. He had made a large collection of materials in Italy, which he left at his death to the Berlin Library. His most important books are as follows:

Johannes Pierluigi von Palestrina (1832).
Johannes Gabrieli und sein Zeitalter (1834).
Der evangelische Kirchengesang und sein Verhältnis zur Kunst des Tonsetzes (1843-47).
Über K. Christian Friedrich Pasche geistliche Gesangswerke (1839).
Dr. Martin Luthers deutsche geistliche Lieder (1840).
Über Herstellung des Gemeinde- und Chorgesangs in der evangelischen Kirche (1848).
Zur Geschichte heiliger Tonkunst (1850-52).

(Riemann.)

M.

WIPPERN, LOUISE (HARRIERS-WIPPERN) (b. Hildesheim or Bückeburg,¹ 1835 or 1837; d. Görbersdorf, Silesia, Oct. 5, 1878), made her first appearance at Berlin on June 16, 1857, and played Agathe in 'Der Freischütz,' and Alice in 'Robert le Diable,' with such success as to obtain a permanent engagement in Berlin in September of the same year. She kept the post until her retirement, and was a great favourite both in dramatic and in the lighter parts, viz. Iphigenia, Jessonda, Pamina, Susanna, Fidelio, Inez ('L'Africaine'), the Princess of Navarre ('John of Paris'), Mrs. Ankerstrom ('Gustavus III.'), Gretchen ('Faust'), Elizabeth ('Tannhäuser'), Valentine, etc. In Dec. 1859 she married at Bückeburg an architect named Harriers. She sang for three seasons in London at Her Majesty's, appearing first, June 11, 1864, as Alice. Her parts in London were but few, viz. Pamina (July 6, 1865), Amelia ('Un Ballo'), Leonora ('Trovatore'), Zerlina ('Don Giovanni'); but several of her best parts were in the hands of Mlle. Tietjens, then in the zenith of her fame and powers, and Mme. Harriers-Wippern was placed at great disadvantage. In May 1868, while at Königsberg, she was seized with diphtheria, which compelled her to visit Italy. She reappeared at Berlin, Jan. 5, 1870, and sang there for a year or more, but her voice and strength were so much impaired that she was compelled to retire from regular work. She died from another throat disease at the Hydropathic Establishment at Görbersdorf, Silesia.

A. C.

WIRTH, EMANUEL (b. Luditz, near Karlsbad, Oct. 18, 1842; d. Berlin, Jan. 5, 1923), violinist, played viola in the JOACHIM QUARTET (q.v.).

After study under Mildner and Kittl at the Prague Conservatoire, he received his first engagement as leader of the orchestra at Baden Baden. In 1864 he was appointed leader of

the German Opera and 'Society' concerts at Rotterdam, and also undertook the duties of professor at the Conservatoire. In 1877 he accepted an invitation from Joachim to settle in Berlin as teacher at the Hochschule, and as viola in the Joachim Quartet. His popularity with Berlin audiences was shown on the occasion of his Jubilee in 1902. The 'Trio evenings,' which he founded in conjunction with Barth and Hausmann, were long a feature of Berlin musical life. In these he took the violin part, but it is as viola player in the Joachim Quartet that he will be best remembered. w. w. c.

WISE, MICHAEL (b. Wiltshire,² c. 1648; d. Salisbury, Aug. 24, 1687), was admitted a child of the Chapel Royal under Captain Cooke in 1660. In 1663 he became a lay-clerk of St. George's Chapel, Windsor. In 1668 he was appointed organist and master of the choristers of Salisbury Cathedral. On Jan. 6, 1675/76, he was admitted a gentleman of the Chapel Royal in the place of Raphael Courteville, deceased, being described in the cheque-book as 'a counter-tenor from Salisbury.' During the royal progresses of Charles II. Wise is said to have had the right to play the organ in any church visited by the King. At the time of the coronation of James II. (Apr. 23, 1685) he was suspended from his office, and Edward Morton officiated in his stead. The cause of such suspension is unknown. There is in the Bagford collection in the British Museum library a coarse political song, published in London in 1680, entitled 'The Wiltshire Ballad,'³ from which it appears that Wise was supposed to have been engaged with other Wiltshire men in getting up a petition for calling a Parliament. It is possible that this siding with those opposed to the court policy may have been made the pretext for his suspension. On Jan. 27, 1686/87, Wise was appointed almoner and master of the choristers of St. Paul's Cathedral. But he did not hold those offices long. On Aug. 24, 1687, being at Salisbury, he had a dispute with his wife, in the heat of which he rushed out into the street, and the hour being late, was challenged by a watchman, with whom he began a quarrel, and received a blow on the head from the man's bill which killed him. He was buried near the west door of the Cathedral.

Six of his anthems, 'Prepare ye the way,' 'Awake, put on,' 'The ways of Sion,' 'Thy beauty, O Israel,' 'Awake up, my glory,' and 'Blessed is he,' are printed in Boyce's 'Cathedral Music,' and an Evening Service in Elb in Rimbault's 'Cathedral Music.' Other anthems and services exist in MS. in the Tudway collection, the R.C.M., and the choir-books of many of the cathedrals. 'I charge you, O daughters,' is in Dering's 'Cantica sacra,'

² Probably at Salisbury.

³ Reprinted by the Ballad Society in *The Bagford Ballads*.

¹ *Neue Berliner Musikzeitung*.

1674; 'I will sing' is in Langdon's 'Divine Harmony,' 1774. See also *D.N.B.* and *Q.-L.* Some catches by him are included in 'The Musical Companion,' 1667, and his duet 'Old Chiron thus preached to his pupil Achilles,' has often been reprinted.

W. H. H.

WITKOWSKI, GEORGES MARTIN (b. Mostaganem, Algeria, Jan. 6, 1867), began life as an officer before becoming a composer. The Grand Théâtre at Nantes produced his 'Le Maître à chanter' (1 act) in 1891, but he felt the need for serious musical study, and worked with V. d'Indy at composition from 1894-97. Having left the army he settled at Lyons where he founded the Schola of Lyons (choral society) and the Société des Grands Concerts, which he conducts. He assumed also the direction of the Conservatoire at Lyons. His first important composition was a quintet (1897) unpublished; 2 symphonies (1900, 1910), a quartet (1902), a sonata (PF. and vln., 1907) followed. His 'Poème de la maison' was first performed at Lyons, Jan. 26, 1919. It is a vast composition in 5 parts for solo voices, chorus and orchestra, in the nature of a dramatic symphony or oratorio, largely designed and very characteristic. Another work, 'Mon Lac, prélude, variations et finale' (PF. and orch; 1st perf. Lyons, Nov. 20, 1921, by the pianist B. Selva), displays also the mark of a strong individuality. His most recent compositions are 'Quatre poèmes' (vln. and orch. op. 25; 1925).

BIBL.—*Revue musicale*, 1926, No. 5, M. BOUCHER, G. M. Witkowski (with bibl. and list of works).

M. L. F.

WITT, CHRISTIAN FRIEDRICH (b. Altenburg, 1660; d. there, Apr. 13, 1716), court Kapellmeister at Altenburg, and one of the best composers of his time. A passacaglia of his was published as the work of J. S. Bach. He composed a number of cantatas which appear to be lost. He also wrote: 'Psalmodia sacra' (1715, and a later undated edition), 3 French overtures, a 7-part sonata, 4 suites, organ and harpsichord pieces (*Riemann*; *Q.-L.*).

WITT, FRIEDRICH (b. Haltenbergstetten, Württemberg, 1771; d. Würzburg, 1837), was violinist at the court of Oettingen-Wallerstein, c. 1790, toured to bring out his compositions, and obtained in 1802, through the performance of one of his oratorios, the post of Kapellmeister at Würzburg. He wrote 2 operas, 2 oratorios, masses, cantatas, symphonies, concertos for various instruments, chamber music, pieces for military band, etc. (*Mendel*; *Q.-L.*).

WOELFL,¹ JOSEPH (b. Salzburg, c. 1772; d. Great Marylebone Street, London, May 21, 1812). His instruction in composition and pianoforte-playing was due to Leopold Mozart.²

¹ The uncertainties that envelop Woelfl extend even to the spelling of his name, which appears variously as Wölfl, Woelf, Woelfe, Wölfl, Woelf, Wölfl, Wulf, and Woelfl, the last of which, on the whole, seems most probably correct. The Parisians despaired of either pronouncing or spelling his name, and called him Wolf, as they spell Kreutzer *Kretschke*, and to this day persist in writing *Wolff*.

² In the Prospectus of 'The Harmonic Budget' Woelfl is stated to be 'a scholar of the great Mozart,' which seems most improbable.

and Michael Haydn. He was a chorister in Salzburg Cathedral in 1783-86. No mention of him occurs, however, in the correspondence of Leopold Mozart and his son. In 1790 he went to Vienna and was taken thence to Warsaw by Count Oginsky. Here, in 1792 or 1793, he began his public career and subsequently in Vienna, where he was received with favour, both as composer and performer. His first opera, 'Der Höllenberg,' was composed to a libretto by Schikaneder, and brought out at this theatre in 1795. This was followed by 'Das schöne Milchmädchen' for the National Theatre in 1797, and 'Der Kopf ohne Mann' at Schikaneder's in 1798. The value of these pieces does not appear to have been great, but they were successful at Vienna, and the last two were performed at Leipzig, and 'Der Kopf ohne Mann' at Prague also.³ To this period the curious combination-piece, 'Liebe macht kurzen Prozess,' may possibly belong. On the whole, Woelfl was not of much account as a composer for the stage. As a pianoforte virtuoso he stepped into the first rank, and was even able to contest the palm of supremacy with BEETHOVEN (*q.v.* Vol. I. p. 277). At Vienna the young composer married, in 1798, Therese Klemm, an actress at the National Theatre; and in the summer of the same year set out on an extended tour, whether with or without Madame Woelfl seems uncertain. He travelled through Brunn to Prague, Leipzig, Dresden, Berlin and Hamburg. He had intentions of going on to London,⁴ but seems to have left Hamburg at the beginning of December with Righini, probably for Berlin.⁵

The next clear mention of Woelfl is at a concert in Leipzig, Oct. 21, 1800.⁶ He arrived in Paris in Sept. 1801, and soon began to attract great attention. On the 5th Brumaire (Oct. 26) the *Journal de Paris* described him as 'l'un des hommes les plus étonnants de l'Europe sur le piano.' He speedily assumed a leading position, and in the next spring was reported to be writing an opera for the Théâtre-

³ *A.M.Z.* vol. i. p. 448 and *Intell. Blatt*, xi. vol. iv. p. 263; vol. v. p. 249.

⁴ *A.M.Z.* p. 31.

⁵ *Ibid.* p. 410. The statement here made differs from that of all other biographers. Schilling seems to suggest that Woelfl returned to Vienna, but all other writers assert that he went from Hamburg to London, and from London to Paris, reaching the French capital in 1801. The facts given in the text show that this account cannot be correct, and it seems improbable that Woelfl went to London at all at this time, though J. W. Davison, in the Preface to his edition of the 'Non Plus Ultra' sonata, declares, without giving any authority, that the Military Concerto (op. 43) was composed in London in 1800. On the other hand, the following circumstances seem, taken together, to make strongly against the London visit:

(1) Woelfl left Hamburg in Dec. 1799 with Righini (*A.M.Z.* vol. ii. p. 410). Now Righini almost certainly was going to Berlin to produce 'Tigrane' in the early part of 1800 (*A.M.Z.* vol. ii. p. 620).

(2) Woelfl's letter to Lodi (*A.M.Z.* vol. ii. *Intell. Blatt*, No. x.) is dated 'Auf der Reise, den 15. Decemb. 1799,' which suggests that he had left Hamburg and was on a journey in Germany. This is exactly the date at which he would be travelling to Berlin with Righini.

(3) A Berlin letter of Apr. 1800 (*A.M.Z.* vol. ii. p. 622) declares that Woelfl had been there three separate times since the preceding June; it is hardly likely that he went three times from Hamburg to Berlin and back again between June and December 1799.

(4) No trace of him in England at this time is forthcoming.

(5) The programme of the concert in London on May 27, 1805, at which he appeared, pointedly asserts that it was 'his first performance in England.' (*Morning Chronicle*, May 27, 1805).

⁶ Dörffel's *Geschichte*.

Feydeau.¹ This epoch may be regarded as the culminating point in his career. Henceforward he falls, in some strange way, under a cloud.

Whether this was the result of a *faux pas* cannot be exactly determined. Fétis's circumstantial story that Woelfl struck up a friendship at Paris with the bass-singer Ellmenreich, who was given to card-sharping, travelled to Brussels with him, got into trouble with the police and came to London in 1805, where Woelfl died in poverty, seems to be incorrect in almost every detail. That Woelfl was brought into relations with Ellmenreich by the project of the latter for establishing a German Opera in Paris is likely enough,² but Woelfl appears to have been in Paris throughout 1804,³ whereas Ellmenreich left Paris at the end of 1803, and was at Vienna at the beginning of 1805.⁴ Moreover, Woelfl had no reason to complain of his reception in England in 1805; he certainly did not die in obscurity, and it is not likely that he died in poverty.⁵

To return to certainties; the three years and a half (Sept. 1801–April 1805) during which Paris was the centre of Woelfl's life were, on the whole, years of success. In the early part of 1804 his opera, 'L'Amour romanesque,' was produced at the Théâtre-Feydeau with success. In the next year he made his most considerable venture with an heroic opera in three acts, called 'Fernando, ou Les Maures,' which was brought out anonymously at the Théâtre-Feydeau. It was produced in very unfavourable circumstances, and was more of a failure than it deserved to be.⁶ Perhaps this mischance led Woelfl to conceive a disgust for Paris. He certainly left the French capital within a month or two without any other apparent reason, and repaired to London,⁷ where he arrived about the beginning of May 1805. The first trace of him is in an advertisement on May 18 of a benefit concert by Mr. and Mrs. Ashe, which states that he had just arrived in England, and would perform a concerto at this concert on May 27—'his first performance in England.' Besides the

concerto (MS.), a grand symphony (MS.) by Woelfl was performed at the concert, and piano-forte concertos by him were played at other concerts on June 1 and June 5, on the former occasion by himself. He was received with the greatest applause,⁸ and everything shows that he retained his popularity throughout his seven years' residence in London. In 1806 his concerto known as 'The Calm' created a positive *furor*, being played at four concerts in about two months, and new compositions by him were almost annually put forward as attractions at the most important concerts.⁹ In 1810 the prospectus of 'The Harmonic Budget' presents him as the fashionable composer of the day, and a portrait is one of the allurements to subscribers. As a composer for the stage Woelfl did not make any greater mark in London than in Vienna or Paris. Still, two ballets by him were produced at the King's Theatre, 'La Surprise de Diane,' on Dec. 21, 1805, and 'Alzire' (founded on Voltaire's 'Alzire'), on Jan. 27, 1807. Both, especially the former, pleased. His abilities were fully appreciated by the artists and by the public, nor is any trace of a falling off in popular esteem discoverable. On May 16, 1812, a new concerto of his was played at Salomon's concert by Cudmore.¹⁰ A week later *The Morning Chronicle* of May 23 contained the announcement,

'Died, on Thursday morning' [i.e. May 21] 'after a short illness, at his lodgings in Great Mary-le-bone Street, Mr. Woelfl, the celebrated pianoforte player.'¹¹

It is impossible, therefore, to understand the uncertainty as to the circumstances of Woelfl's death. An anxious discussion was maintained in the *A.M.Z.* in 1815 and 1816¹² as to whether he was dead or not. It asserted that Woelfl had played at the Philharmonic Concerts, which did not begin till 1813, and the matter was only considered as settled by the marriage of Woelfl's widow to an oboist at Frankfurt.¹³

Woelfl possessed remarkable qualifications for making a success in society. His portrait, about a year before his death, represents a handsome man, rather tall, somewhat stout, and of commanding presence.¹⁴

As a musician, Woelfl exhibits all the excellences that flow from a sound training. Like other composers of that time he wrote much trivial music, but his sympathies were steadily

¹ *A.M.Z.* vol. iv. p. 604.

² Cp. *A.M.Z.* vol. iv. pp. 111 and 320.

³ *A.M.Z.* vol. vi. p. 478; vol. vii. p. 142.

⁴ *Ibid.* vol. vi. pp. 281, 469, 502.

⁵ It may be added that it is not easy to see when Woelfl and Ellmenreich could have been at Brussels together. At the beginning of 1803 both were in Paris. In the spring and summer Ellmenreich went to London (*A.M.Z.* vol. iv. pp. 823 and 781), but Woelfl stayed in Paris (*A.M.Z.* vol. iv. p. 604). However, in the autumn of 1802 Woelfl was at Amsterdam (*A.M.Z.* vol. v. p. 115), and was thought to be going to London, and it may have been about this time that the two got into trouble at Brussels. They are next heard of in Sept. 1803 (*A.M.Z.* vol. v. p. 565), and are then both in Paris. But Woelfl's position there seems just as good after this date as before it.

⁶ See on the whole affair, *A.M.Z.* vol. vii. p. 422.

⁷ One of the strangest of the romantic tales current about Woelfl must be mentioned here. Schilling asserts that he was named music-master to the Empress Josephine in 1804, and followed her after her divorce (i.e. of course, at the beginning of 1810) to Switzerland. Growing weary of the lonely mountain life, he went down the Rhine by boat, and so to England. This story seems to be a pure fiction. Woelfl may have been music-master to the Empress, but he went to London in 1805, and is to be found in London every year from that date to the time of his death. In 1810 he was engaged on a monthly publication, 'The Harmonic Budget,' which must have precluded long absence from London. Finally, the Empress Josephine did not go to Switzerland in 1810, or at any time after her divorce.

⁸ *A.M.Z.* vol. vii. p. 756.

⁹ Besides MS. works which may have been novelties, and sonatas, etc., we find the following 'first performances': Symphony (June 15, 1808, Ferrari's Concert); P.F. Concerto (Apr. 19, 1808, Ferrari's Concert); Symphony (Mar. 28, 1811, New Musical Fund Concert); P.F. Concerto (May 16, 1812, five days before his death, Salomon's Concert).

¹⁰ *Times*, May 16, 1812.

¹¹ A similar notice, giving the same date (May 21), appears in the *Gentleman's Magazine*.

¹² *A.M.Z.* vol. xvii. p. 311; vol. xviii. pp. 291 and 762.

¹³ Mme. Woelfl appears to have been established as a singer at Frankfurt since 1804 (*A.M.Z.* vol. vi. p. 402). Examination of the Philharmonic programme reveals no trace of Woelfl as a performer.

¹⁴ There was a portrait by Tielker. This, or another, engraved by Scheffner, was issued with the *A.M.Z.* for Feb. 19, 1806. The portrait in 'The Harmonic Budget' was drawn by Pyne and engraved by Mayer. The original water-colour sketch by Pyne is in the Hope collection of portraits at Oxford. Much of what is stated in the text is due to reminiscences of Potter's conversations, kindly communicated by his son, Dr. Potter, and by A. J. Hipkins.

on behalf of a more elevated style. Pupils who wished him to teach them how to play the showy variations that conclude his celebrated 'Non Plus Ultra' sonata always met with a rebuff, and were not allowed to go on to the variations till they had mastered the opening allegro. The ease with which he threw off trifles to catch the popular ear did not blind him to their trivial character or impair his respect for his art. Consequently, much of his work¹—sonatas, quartets, concertos and symphonies—is thoroughly solid, showing great instrumental effect and, especially, contrapuntal artifice.² The only pupil of Woelfl who attained much eminence was Cipriani POTTER (*q.v.*). J. H. M.

WOHLTEMPERIRTE CLAVIER, DAS—'The well-tempered Clavier'—better known in England as 'The 48 Preludes and Fugues'³ of Johann Sebastian Bach, is in two parts, each containing twenty-four preludes and twenty-four fugues. The first part was completed at Cöthen in 1722 when Bach was in his thirty-eighth year, and to this alone he gave the above name. Subsequently (1744) he finished twenty-four more preludes and fugues 'through all the major and minor keys'; and so like in design to the former series are these, that they have come to be regarded as the second part, the entire collection being now universally known under the one title.

His own full title, very like that of an earlier work on similar lines by Bernhard Christian WEBER (*q.v.*), is as follows:

Das wohl temperirte Clavier oder Praeludia und Fugen durch alle Töne und Semitönen, so wohl tertian minorum oder *Ut Re Mi* anlangend, als auch tertian minorum oder *Re Mi Fa* betreffend. Zum Nutzen und Gebrauch der Lehrbegierigen Musicalischen Jugend als auch derer in diesem *Studio* schon *habili* seyenden besondern Zeit Vertheil aufgesetzt und verfertigt von *Johann Sebastian Bach* p. t. Hochfürstl. Anhalt Cöthenischen Capell-Meistern und Directore derer Cammer-Musiquen. Anno 1722.⁴

It was Bach's intention by this work to test the system of equal temperament in tuning. To this end he furnishes a prelude and fugue in each key, the keys following one another not according to their relationship, but simply in the order of chromatic ascent.

A credible tradition says that most of the first part was written rapidly; in a place where Bach had no regular musical occupation, and where he was deprived of any musical instrument—probably when accompanying his prince. This tradition is supported by Gerber, whose father, Heinrich Gerber, was a pupil of Bach in Leipzig soon after 1722. Forkel, however, who probably possessed some general information on

the subject from Bach's sons, says that earlier compositions were used in compiling the first part. Many of the preludes had certainly already appeared as independent compositions. In rewriting these Bach often considerably lengthened them, the one in C \sharp to the extent of nearly forty bars. Eleven of them were given in a short form in the *Clavierbüchlein* (1720), written for his son Friedemann. When used for the later work, they were, however, more fully developed, especially those in C major, C minor, D minor and E minor. The A minor fugue, too, is without doubt an earlier composition. Spitta considers it belongs to 1707 or 1708. It is an open copy of one in the same key by Buxtehude, and judging from the pedal at its conclusion, it was not at first intended for the clavicord. Perhaps it is therefore somewhat out of keeping with the rest of the work—written so manifestly for this instrument. Witness for instance the beginning of the 16th bar of the E \flat minor fugue, where the upper part stops short on C \flat , evidently because D \flat was not available on most clavicords. Again, in the 30th bar of the A major fugue it is apparent that the imitation in the right hand is accommodated to a limited keyboard. In the second part of the work D \flat (C \sharp) above the line occurs but twice in the 25th bar of the fugue in C sharp, and in the 68th bar of the prelude in A flat. In compiling this, Bach again availed himself of earlier compositions, though not to such an extent as in the first part. The prelude in C is given, however, as a piece of 17 bars' length in a *Clavierbuch* of J. P. Kellner with the date '3 Juli 1726.' The fugue in C \sharp major exists also in C major, and the prelude in D minor exists in another version. (See B.-G. xxxvi. 224-6.) The fugue in G had twice before been associated with other preludes. (See B.-G. xxxvi. 114 ff. and 220.) The A \flat fugue first stood in F; it was shorter by more than one-half, and it had another prelude. (See B.-G. xxxvi. 113.) Other instances of a similar kind may be adduced.

Three or four original MSS. are existing of the first part of the work; not one (complete) exists of the second. Still, notwithstanding the many revisions Bach made of the first part, there is perhaps, as Carl von Bruyck says (*Technische und ästhetische Analysen*, p. 68), on the whole a richer and broader display of contrapuntal art in the fugues of the second part. (See also Sir Hubert Parry's *Johann Sebastian Bach*, chap. xiii.)

The three oldest printed editions appeared in 1800-01. One was issued by Nägeli of Zürich, another by Simrock of Bonn and Paris, and the third by Kühnel (now Peters) of Leipzig. The first was dedicated to the Paris Conservatoire de Musique, the matter being supplied by Schwencke. In it the second part is placed first: many of the older readings are

¹ Previous editions of this Dictionary contained an elaborate and carefully annotated list of Woelfl's compositions.

² See e.g. the Minuet of the G minor Symphony.

³ For a concise analysis of each number see *The '48,' Bach's Wohltemperirte Clavier* ('Musical Pilgrim'), 2 vols., by J. A. Fuller Maitland (Oxford Univ. Press, 1926).

⁴ The Well-tempered Clavier, or preludes and fugues in all the tones and semitones, both with the major third or *Ut, Re, Mi* and with the minor third or *Re, Mi, Fa*. For the use and practice of young musicians who desire to learn, as well as for those who are already skilled in this study, by way of amusement; made and composed by Johann Sebastian Bach, Kapellmeister to the Grand Duke of Anhalt-Cöthen and director of his chamber-music, 1722. The title is almost identical with that of the work by Bernhard Christian WEBER (*q.v.*).

given, and it has the long versions of the preludes which most editions since have copied. The third was revised by Forkel, and it is to that he refers in his well-known treatise. The first English edition was that edited by S. Wesley and C. Horn, and published 1810-13.¹ The B.-G. xiv. (1865), by Franz Kroll, with an appendix of various readings, was issued without reference to the British Museum autograph of Part II. (see below) Its readings were incorporated in a subsequent volume of the B.-G. edition, xlv. (i.) which also contains the readings of the Zürich autograph.

Editors have not been slow to make alterations in the text of Bach. One of the most glaring of these is the bar introduced by Schwencke in the middle of the first prelude. Yet this bar has been retained by Czerny, by Wesley and Horn, and by many others. It is even used by Gounod in his 'Meditation.' As an editorial curiosity it is worth preserving:

Bar 22.

SCHWENCKE.

Bar 23.

Of the First Part three autographs are known; one formerly belonging to Nägeli, now at Zürich, another formerly Prof. Wager's, now at Brussels, and a third in the State Library at Berlin.² Of the Second Part no complete autograph is known to exist. The authenticity of the autographs of certain numbers in the Berlin State (Royal) Library is examined by A. Dörfel in the preface to B.-G. xlv. For many years there remained in comparative obscurity original autographs, now in the British Museum, of nearly all³ the preludes and fugues of the Second Part. They were bought at Clementi's sale by Emett. During one of Mendelssohn's visits to England (June 1842) Emett showed them to him, and he at once recognised them as being in Bach's handwriting.⁴ Later on, in or about 1855, Sterndale Bennett saw them, and he too pronounced them to be in the handwriting of Bach. From Emett's daughter they passed to Eliza Wesley, who bequeathed them to the British Museum. F. W.; addns. M.; rev. C.

WOLDEMAR, MICHAEL (b. Orleans, Sept. 17, 1750; d. Clermont Ferrand, Jan. 1816), violinist and composer, who came of a well-to-do mercantile family. It is said that his real name was Michael, and that he assumed that of Woldemar, at the request of his god-

father, the Marshal Lowendahl. He received an excellent education, having Lolli—whom he closely resembled in character and disposition—to teach him the violin. Owing to reverses of fortune, Woldemar became the head of a wandering troop of artists, who eventually settled at Clermont Ferrand, where Woldemar died. Without being a member of the staff, Woldemar wrote several articles on music for the *Courrier des Spectacles*, a theatrical journal of the Revolutionary period. It was in this publication that his *Commandements du violon*, a facetious imitation of the Decalogue, was printed. He also composed a number of pieces and concertos for the violin, and a *Grande Méthode de violon* (Paris, Cochet)—which is to-day difficult to meet with—*Le Nouvel Art de l'archet* (ibid.), and *L'Étude Élémentaire de l'archet moderne*. Woldemar, like Lolli, attempted an extension of the compass of the violin by adding a lower fifth string (C in the

bass), and for this instrument, which he called a 'violin-alto,' he wrote a concerto with orchestra. Urhan Chrétien (b. Feb. 16, 1790) often played on this instrument of Woldemar's invention at the Paris Conservatoire concerts.

R. H.-A.

WOLF, THE. (1) A term applied to the harsh howling sound of certain chords on keyed instruments, particularly the organ, when tuned by any form of unequal temperament.

The form of unequal temperament most widely adopted was the mean-tone system. The rule of this system is that its fifths are all a quarter of a comma flat. The major thirds are perfect, and are divided into two equal whole tones, each of which is a mean between the major and minor tones of the diatonic scale; hence the name Mean-tone system.

The total error of the whole circle of twelve fifths, at a quarter of a comma each, amounts to three commas. Since the circle of twelve perfect fifths fails to meet by about one comma, the circle of mean-tone fifths fails to meet by about two commas, or roughly, nearly half a semitone. In the mean-tone system on the ordinary key-board there is always one-fifth out of tune to this extent, usually the fifth G♯-E♭. There are also four false thirds, which are sharp to about the same extent, usually B-E♭, F♯-B♭, C♯-F and G♯-C. All chords into which any of these intervals enter are intolerable. (See TEMPERAMENT; TUNING).

R. H. M. B.

¹ Dr. Cummings has shown (*Mus. T.* Mar. 1885, p. 131) that the edition projected by Kollmann in 1799 was never published.

² See Spitta's *Bach* (Novello), II. 665; B.-G. xiv. preface.

³ Nos 4, 5 and 12 are wanting. An analysis of the readings differing from those of Kroll (B.-G. xiv.) was made by the writer (F. W.) and published in the first edition of this Dictionary.

⁴ See Rockstro's *Life of Mendelssohn*, pp. 83, 84.

(2) In bowed instruments the Wolf occurs, owing to defective vibration of one or more notes of the scale. When it occurs, it is often found more or less in every octave and on every string. Different instruments have it in different places: it is most common at or near the fourth above the lowest note on the instrument, in the violin at C, in the violoncello at F. The more sonorous and brilliant the general tone, the more obtrusive it becomes; if the tone be forced, a disagreeable jar is produced. Hence it is idle to attempt to play the wolf down: the player must humour the troublesome note. It is commonly believed that there is a wolf somewhere in all fiddles, and it is certain that it exists in some of the finest. Probably, however, it is always due to some defect in the construction or adjustment. The cause of the wolf is obscure, and probably not uniform: it may result from some excess or defect in the thicknesses, from unequal elasticity in the wood, from bad proportion or imperfect adjustment of the fittings, or from some defect in the proportions of the air chamber. It has also been suggested with a still greater show of probability that the wolf occurs on the note to which the body of the instrument acts as a resonating box, and that the particles of wood, set in vibration by this note, are unable to maintain the stretched string quite evenly. It may be palliated by reducing some of the thicknesses so as to diminish the general vibration, and by careful adjustment of the bar, bridge and sound-post; but in the opinion of violin-makers where it is once established it cannot be radically cured.

E. J. P.

WOLF, ERNST WILHELM (*b.* Grossgehringen, near Gotha, 1735; *d.* Weimar, Dec. 7, 1792), Konzertmeister at Weimar, 1761, court Kapellmeister in 1768. He was a prolific composer in all branches of music, also author of a theoretical work, *Musikalischer Unterricht*, and *Auch eine Reise*, a musical journey. (List of works in *Q.-L.*)

WOLF, FERDINAND (*b.* Vienna, Dec. 8, 1796; *d.* there, Feb. 18, 1866), court librarian, wrote an important work for the study of mediæval monody, *Über die Lais, Sequenzen und Leiche*; also an essay on the music of the Arabs (*Mendel; Riemann*).

WOLF, GEORG FRIEDRICH (*b.* Hainrode, Schwarzburg, c. 1762; *d.* Werningerode, 1814), Kapellmeister at Stolberg in 1785, and in 1802 at Werningerode. He composed pianoforte sonatas, motets, songs, etc., and wrote instruction books for pianoforte and singing, which appeared in several editions; also a musical dictionary (*Mendel; Q.-L.*).

WOLF, HUGO (*b.* Windischgraz, south Styria, Mar. 13, 1860; *d.* Vienna, Feb. 22, 1903), the eminent song-writer, was the fourth son of a father of musical tastes, who was in a

family leather business, and who intended that the boy should eventually come into it too.

At an early age, however, Hugo showed that his real interests were in music and literature, and his conduct at the various schools through which he passed, disappointed his parents as much as his teachers. In 1875 the usual struggle over the question of his future career was fought, and ended in his father reluctantly consenting to let him enter the Vienna Conservatorium. One event in this year left a profound impression upon him. This was the visit of Wagner, who came to Vienna to conduct 'Tannhäuser' and 'Lohengrin.' He managed to see the great man for a moment, and although he got nothing for his pains but a more or less kindly snub, he became from this moment, and remained all his life, an ardent disciple. For the Conservatorium he had no more enthusiasm than he had for the schools, and he was expelled at the end of two years, which he had spent mainly in breaking the rules laid down for discipline and counterpoint. He was now thrown almost entirely on his own resources, for his father was able to do little for him, having had his business ruined by a fire. He eked out a living in his lodgings at Vienna by giving piano and violin lessons, but he could barely make enough to afford himself a meal a day, and the drudgery was so intolerable to him that he nearly emigrated to America. At this critical moment he was offered the post of second Kapellmeister at Salzburg, mainly through the influence of the composer Adalbert von Goldschmidt, who, with Motz and the two Schalks, was kind to him in these Vienna days, lending him music and helping him to obtain pupils. But though he took the post he was back again in Vienna in two months' time, composing songs and sketching out his symphonic poem 'Penthesilea.' Some of his early work, consisting of miscellaneous piano and orchestral music, as well as of songs, was found amongst his papers after his death, some of it he seems to have destroyed.

The twelve 'Lieder aus der Jugendzeit' were written in 1877-78, and the collection of six 'Lieder für eine Frauenstimme' also dates from this period. But in these early years most of his time was given to reading rather than composing music. Bach, Beethoven, Mozart, Gluck and the other classics he devoured eagerly; he worked hard at the songs of Schubert and Schumann, and for Berlioz and the French school he showed all his life such a predilection that he used to say in later years he must have had a few drops of Latin blood in his veins. He was able to make capital out of his strong musical tastes, for in 1886 he accepted the post of musical critic to the Vienna *Salonblatt*, and wrote for it for four years. He wrote, as well as felt, strongly, and while championing the cause of the older composers

and breaking lances on behalf of Wagner and Bruckner, he poured scorn upon Boito, Ponchielli, and the contemporary Italian operatic writers, he jeered mercilessly at the Philistines and the purveyors of conventional goods, and earned the undying hatred of Bülow as well as of the anti-Wagnerians by the outspoken terms in which he proclaimed his dislike of Brahms. But Wolf would never have attained the peculiar position he now holds amongst the great song-writers if he had given his attention solely to music. As a boy he was devoted to books, and his catholic taste, controlled by sound instinct, soon made him acquainted with the great writers of France and England, no less than with those of Germany. His favourite German poets were Goethe, Eichendorff, Kleist and Mörike, the popular Swabian pastor, who inspired Wolf to his first outburst of song-writing.

This was in 1888, the turning-point in his career. He had lost his father in the previous year (who died just too soon to see the publication of his son's first two volumes of songs), he had given up writing for the *Salonblatt* and had established himself in a friend's house at Perchtoldsdorf, a little village near Vienna. Suddenly the flood-gates were opened, and between Feb. and May of 1888 he wrote forty-three of his Mörike songs, and five months later finished the set in a single week, after composing a group of songs to words by Eichendorff. No sooner was the Mörike set completed than he turned to Goethe, and between October 1888 and February 1889 set fifty of his poems. After a break in the summer, during which he paid his third visit to Bayreuth (his first was in 1882 when he and Motz went together), he composed forty-four songs on end from the 'Spanisches Liederbuch' of Heyse and Geibel, a volume of translations which had already inspired Schumann, Brahms, Cornelius and others. These were completed at the end of Apr. 1890. In June he set the six 'Alte Weisen' from poems of Gottfried Keller, who had just celebrated his seventieth birthday, and in the autumn he set to work on Heyse's 'Italienisches Liederbuch.' Of these, twenty-two were written without a break, and then—after this almost uninterrupted period of activity, in which something like 200 songs were written—came a silence which remained unbroken for more than three years. For that was how he composed. He would sit down to a volume of poems and work at white heat, flinging off songs day after day, hardly stopping to eat or sleep until the fit of inspiration had passed, when he would relapse into a fit of despondency and lethargy that lasted until the next furious outburst.

Meantime his work was gradually gaining recognition. Humperdinck had introduced him, in 1890, to the firm of Schott, who now arranged to publish his songs. Wolf recitals

were given in Berlin, Stuttgart, Mannheim and other centres where there was less prejudice against the composer than in Vienna; and in the autumn of 1890 he was commissioned to write incidental music for Ibsen's play *Das Fest auf Solhaug*. This was an effort to him to write, for he soon lost interest in the play, and was hampered by the restrictions imposed on him by the theatre. What he wanted to write was not incidental music to a play he did not care for, but an opera set to a text of his own choosing. He had been searching for one ever since 1882. He had thought at one time of setting *A Midsummer Night's Dream* and *The Tempest*, but gave up the idea. Mérimée's *Colomba* he rejected, and instinct told him that his friends Grohe and Liliencron might have offered him better alternatives for a hero than Buddha and Buffalo Bill. Eventually he found what he was looking for in *Der Dreispitz*, a translation of a novel by the Spanish author Pedro de Alarcon, in an adaptation by Frau Mayreder, which he had read and rejected five years earlier. He set feverishly to work on it on Mar. 3, 1895, and on July 9 he announced that he had finished it. The scoring occupied him till December, and the opera was given at Mannheim, with the title 'Der Corregidor,' on June 6, 1896. It appears to have been well received, but owing to operatic conditions it could not be repeated that season, and it was performed only once in his lifetime. The fit of inspiration which carried him through this opera with such incredible speed enabled him to complete the 'Italienisches Liederbuch'; and in the spring of 1897 he set to work on a German translation of some of Michelangelo's sonnets, and on the libretto of a new opera, 'Manuel Venegas,' also drawn from a novel by Alarcon. Three of the sonnets were written and half the first act of the opera was completed when his brain suddenly gave way. The furious mental energy which had manifested itself throughout his life in spasmodic outbursts now broke through its bonds, and in Sept. 1897 it was found necessary to confine him. He came out of the establishment the next year, and it was hoped that he would recover, but his sanity lasted only for a brief interval, and in the autumn of 1898 he entered the asylum at Vienna a raving lunatic. Paralysis soon overtook him, but he lingered on until Feb. 22, 1903, when he died at the age of 43. He was buried in the cemetery not far from the graves of Beethoven and Schubert.

It is as a song-writer that Wolf lives. His instrumental works consist only of the early symphonic poem 'Pentheseilea'; a string-quartet which, though still earlier, shows more signs of originality and power; and a charming 'Italienische Serenade' for string-orchestra, which was a later version of an early string quartet. The choral works include six sacred

songs for unaccompanied voices to words by Eichendorff, written in 1881, and four compositions for chorus and orchestra: 'Christnacht,' 'Elfenlied' (with words taken from *A Midsummer Night's Dream*), 'Der Feuerreiter,' and 'Dem Vaterland,' of which the last two had been conceived originally as songs for a solo voice. The two operas and the incidental music to Ibsen's play complete the list of his works apart from the songs, and the operas themselves are less in the nature of operas than of collections of songs. The characterisation is wonderfully strong, and the writing is as rich and free and complex as it is in the most striking of his songs. 'Der Corregidor' is, in fact, a storehouse of beautiful things, but Wolf had little sense of the stage and not much capacity for adapting his methods to its requirements. His nature was entirely lyrical, and what stirred him to utterance was poetry, and poetry not spread over a situation but crystallised in a poem.

A song to him was poetry absorbed and recreated in terms of something which was neither melody by itself nor mere declamation but a fusion of the two. That is why each of his songs has a character of its own; each looks different on paper except in cases where a figure from one song is repeated in another with definite purpose, or where two songs, being cast in the same mould, are treated by similar methods. In the majority of cases, however, each of the poems and each group of poems has a distinctive character of its own, so that if one is familiar with Wolf's idiom it would hardly be possible to transfer a song from one group to another without making it look out of place. The music does not merely fit the words carefully; though Wolf does make it do that more carefully than any other composer has done or tried to do; his method is more fundamental than that. He makes one feel that he has composed the poetry as well as the music—that the poetry and music are the simultaneous product of one brain. That is, when he is at his best; for sometimes the strain under which he worked makes itself felt in the writing, more especially in the songs of his middle period (some of the settings of Goethe, for instance) where the continuously chromatic harmony, the persistent repetition of a figure through an endless series of keys and the indications of hypersensitive anxiety that the subtlest *nuances* should not be left unexpressed, combine to leave an impression of restlessness; the composer, one feels, has aimed at elaborating single, detached details too much, instead of trying to make all the details coalesce and illustrate the whole. But in the earlier songs set to Mörike's words or in the 'Italienisches Liederbuch,' where he tried to clarify his ideas and express himself simply in the manner of Mozart, his extraordinary capacity for hitting the right balance

between the words and the music has produced a number of songs of widely different character which may be ranked with the very highest of their kind. The 'Spanisches Liederbuch' is on the whole the most varied collection, and the Goethe songs show him in his most complex and subtle aspect, but whether he is simple or whether he is complex, he writes with the fullest understanding of the requirements of both singer and pianist. His habit of building up an accompaniment from a single rhythmic phrase and of repeating a single figure under various aspects does not involve the sacrifice of the singer; both singer and pianist are consulted, for both have parts which are free and independent of each other, but are at the same time mutually involved because both have been conceived together as a single entity in the composer's brain, instead of having been thought of separately and been subsequently put together. The key to Wolf's attitude towards those for whom he wrote is to be found on the title-pages of his volumes, which contain not 'songs' but 'songs for voice and piano.'

L. W. H.

BIBLIOGRAPHY

- E. DECRET: *Hugo Wolf*. 4 vols. 1903-06, in one vol. 1910. A complete biography.
 ERNEST NEWMAN: *Hugo Wolf*. London, 1907. The standard book for English readers contains a full list of published works. Several volumes of Wolf's letters, his collected essays and many studies of his works have been published in Germany.

WOLF, JOHANNES (b. Berlin, Apr. 17, 1869), distinguished as a research student, editor and writer on music, was a pupil of Spitta in Berlin. He graduated at Leipzig (1893) with the thesis *Ein anonymes Musiktraktat des 11. bis 12. Jahrhunderts*. Mediæval music and its notation has been his special study, and his research in this direction has led to the *Geschichte der Mensuralnotation von 1250-1460*, etc. (3 parts, 1905), and *Handbuch der Notationskunde* (Bd. i., 1913, Bd. 2, 1919). Wolf became a teacher in the University of Berlin in 1902 and professor in 1908. From 1899-1904 he edited with Oskar Fleischer the *Sammelbände* of the *Int. Mus. Ges.*, and was responsible for several volumes of the *D.D.T.* and *D.T.Ö.* (see *DENMÄLER*). In 1910 he published 'Deutsche Lieder des 15. Jahrhunderts,' and in 1915 became librarian and curator of the musical collection of the Prussian Staatsbibliothek. He has produced the collected edition of the works of Obrecht for the *VEREENIGING (q.v.)* and done other important work of the kind. (See *Riemann*.)

WOLFF, ALBERT LOUIS (b. Paris, Jan. 19, 1884), conductor. He was a pupil at the Paris Conservatoire and left it in 1906 with a first prize for pianoforte accompaniment. He became conductor of the Opéra-Comique (making his first appearance on Apr. 26, 1911, in Laparra's 'La Jota'), and of the Concerts Pasdeloup in 1925. Wolff is a chevalier of the Légion d'honneur.

J. G. F.

WOLFF, AUGUSTE DÉSIRÉ BERNARD (b. Paris, May 3, 1821; d. there, Feb. 3,¹ 1887), pianist and pianoforte-maker, was head of the firm of Pleyel-Wolff et Cie. At 14 he entered the Conservatoire, studied the piano with Zimmerman, and took a first prize in 1839. He was also a pupil of Leborne for counterpoint and Halévy for composition, and under these auspices composed several pianoforte pieces, published by Richault. At 21 he entered the staff of the Conservatoire as 'répétiteur'—teacher of pupils in dramatic singing—and kept it for five years, when he gave up teaching to become the pupil and partner of the well-known pianoforte-maker, Camille Pleyel, who, being old and infirm, was looking out for a dependable assistant. Wolff entered the business in 1850, became a member of the firm in 1852, and naturally succeeded to the headship of it on the death of Pleyel in 1855. From that time his exertions were unremitting; with the scientific assistance of his friend Lissajous the acoustician, he devoted all his attention to increasing the volume of tone without losing sweetness. His repeated experiments on the tension of strings, on the best possible spot for the hammer to strike the string so as to get the fullest tone and the best 'partials,' on the damper, etc., proved very fruitful, and led him to patent several ingenious contrivances. (See PLEYEL & Co.) A. J.

BIBL.—CONSTANT PIERRE, *Les Facteurs d'instruments de musique, les luthiers et la facture instrumentale*. (Paris, 1893).

WOLFF, MARTIN, an early 16th-century German composer, wrote motets and songs of great merit, published between 1513 and 1539 (Q.-L.).

WOLF-FERRARI, ERMANNO (b. Venice, Jan. 12, 1876), of a German father and Italian mother, has made his reputation primarily as a composer of Italian opera.

He showed at an early age great love and aptitude for music, but his father, who was a distinguished painter, wished the son to follow in his own footsteps, and to that end sent him to an art school in Rome. This decision was hastened by the impression produced on Ermanno by the Bayreuth performances of the operas of Wagner, which stirred him so deeply as to cause a severe illness. Thus the boy had no responsible tuition in music before he had reached his fifteenth year. Then, however, the signs of talent and his devotion became so evident that it was decided to place him under the guidance of Rheinberger in Munich. There he soon made his mark, and returning to Venice in 1899 he had no difficulty in persuading the Philharmonic Society to perform his oratorio 'La Sulamite' for soli, chorus and orchestra at the Teatro Rossini. The oratorio was favourably received, and its success paved the way for the production the following year at

the Teatro Fenice of an opera on the subject of Cinderella ('Cenerentola') on a book by Maria Pezzè Pascolato. Partly owing to the inadequate rendering the opera was unsuccessful. Wolf-Ferrari felt keenly the failure of his hopes and went back to Germany, where a revised version of 'Cenerentola' was given in Bremen under the title of 'Aschenbrödel' on Jan. 31, 1902, and favourably received. In less than twelve months another opera, 'Le donne curiose,' on a libretto by L. Susana was given at the court theatre, Munich, and a third opera 'I quattro Rusteghi' (libretto by Giuseppe Pizzolato on Goldoni's famous comedy) was produced in Munich in 1906. A cantata on Dante's *Vita Nuova* also belongs to this period, being performed in Munich for the first time in 1903.

After these successful operas, Wolf-Ferrari set to work on the one-act comedy by which he is best known in England. 'Il segreto di Susanna' (words by E. Golisciani and Max Kalbeck) was first performed in Munich in Dec. 1909, and the favourable verdict of that audience was soon confirmed by other European opera houses. Although the plot is simple to the point of barrenness, the charm of the music, the odd mixture of modern effects and a Mozartian framework has been found singularly effective and 'Susanna's Secret' is, so far, the most fortunate of all his operas. His next effort 'I gioielli della Madonna' on a libretto by E. Golisciani and C. Zangarini has also met with a fair measure of success. It was first given in Berlin on Dec. 23, 1911, and has since been frequently performed in England—at Covent Garden during the Italian season, and by the Carl Rosa Company in the provinces. But it may be doubted whether the composer is at his best in dealing with a subject which carries the 'realistic' tendencies of 'Cavalleria' to excessive length. The story is lurid in the extreme, and without a redeeming feature. The music is passionate and picturesque, but no beauty of melody can turn the sordid, revolting plot into a tolerable story. The orchestral intermezzo which precedes the third act has met with greater popular success than any other prelude of the kind since *Cavalleria*. Another opera, 'Amor medico,' was successfully performed at Dresden, Dec. 4, 1913. Wolf-Ferrari has also written chamber music: two sonatas for pianoforte and violin (opp. 1 and 10), a quintet for pianos and strings (op. 6), a trio for piano, violin and violoncello (op. 7), four 'Rispetti' for soprano voice and piano (op. 11), a 'chamber' symphony for strings, piano, wood wind instruments and horn, and a number of violoncello and organ pieces.

In all these works Wolf-Ferrari shows that he possesses a talent of a very unusual kind. While his technique on the one hand is essentially that of to-day, his melodies are often

¹ Fétis, *Supplément*, gives Feb. 9.

reminiscent in design of the art of the past. He gives the impression of a composer whose sense of beauty is so deeply rooted in the past that he is most individual when he can use the idiom of a bygone era. He evidently has a profound belief in the power of lyrical expression, and allows his lyrical vein to flow easily and unchecked. In his orchestral scores graceful touches are frequent, and in the comedies both harmony and orchestral colour often emphasise very effectively points of wit or humour.

In 1902 Wolf-Ferrari was appointed director of the Liceo Benedetto Marcello of his native city, a post which he held until 1912. F. B.

WOLKENSTEIN, DAVID (b. Breslau, Nov. 19, 1534; d. Strassburg, Sept. 11, 1592), mathematician at Strassburg, wrote 'Primum Musicum volumen scholarum Argentoratensium,' 4th edition in 1585; psalms for churches and schools, in 4 parts, 1583 (Psalmen für Kirchen und Schulen, etc.); *Harmonia Psalmorum Davidis*, 4 v. (1583). Henry Faber's *Compendium musicae*, Strassburg, 1596, gave Wolkenstein's psalm tunes as an addition (*Mendel*).

WOLKENSTEIN, OSWALD VON (b. Tyrol, c. 1377; d. Aug. 2, 1445), one of the last of the Minnesinger, descended from a knightly family long settled in the Tyrol, lived a very stirring and adventurous life, in the course of which he had travelled over the greater part of Europe, and had even visited some parts of Asia and Africa. In one of his poems he boasts of being able to converse in ten different languages. From 1415 he was for several years in the service of King (afterwards Emperor) Sigismund, sometimes one of his immediate train, at other times sent on various embassies to Spain and Portugal. On his return home, in his constant desire to extend his own domains at the expense of his neighbours, he was from 1421-27 involved in various strifes and lawsuits, in the course of which he was twice subjected to arrest and imprisonment. A worse fate might have befallen him at the hands of Duke Frederick of Austria, but for the intercession of powerful friends. The circumstances of the various disputes in which he was engaged even up to the day of his death afford a curious picture of the wild and lawless life of the German Knights of the times. Long before his death he had in 1408 erected for himself a monument, which still exists, in the Cathedral Church of Brixen, probably in connexion with some endowment for a pious purpose which he had there founded.

It is surprising that in so troubled and adventurous a life from beginning to end he should have been able to devote himself to the cultivation of poetry and music. Many of his poems are spring- and love-songs, and some are devoted to the glorification of Margaret Queen of Aragon. There is in all of them the strong

personal note, and it is mainly from his own poems that the details of his wandering and adventurous life are known. He invented the melodies to his poems, and these are no longer in the mere recitative style of his predecessors, but are real songs, many of them very fresh and pleasing, with a popular lilt about them. Oswald was not only an inventor of melodies, but was also skilled in all the intricacies of the mensural notation of his time, and set some of his songs in two and three-part counterpoint. There are occasionally slight canonic imitations, and a few pieces are expressly described as fugues, but the harmonies are very stiff and uncouth to modern ears, and the conduct of the parts generally, though it may be that one or other of the parts was only meant to be played on some instrument, and not sung, in which case the harmonies may not have been so disagreeable. There are two instances of apparently four-part writing, but they are meant to be sung or played in three parts, with one taken alternately with another. The most successful setting from a harmonic point of view is the three-part setting of the Latin words Ave Mater, O Maria, etc. The whole of Von Wolkenstein's compositions, both literary and musical, have now been edited with critical apparatus and various facsimiles in the *D.T.Ö.* ix.

J. E. M.

WOLLE, JOHN FREDERICK (b. Bethlehem, Pennsylvania, Apr. 4, 1863), is eminent for his enthusiasm in the propagation of Bach's choral music and his formation and direction of the important series of Bach festivals in Bethlehem.

Wolle studied music with Rheinberger at Munich (1884-85), and then becoming organist of the Moravian Church in his native place began his lifelong campaign for the advancement of Bach's music in America. The 'St. John Passion' was given complete for the first time in 1888; the 'St. Matthew' followed in 1892, the B minor Mass in 1900. During the period 1905-11 Wolle was in California as professor of the university, and there also he organised performances of the major works of Bach. On his return to Bethlehem the festivals were renewed. Their programmes have been expanded to include a large number of the church cantatas, the Brandenburg concertos played by the PHILADELPHIA ORCHESTRA (*q.v.*) and other important works.

BIBL.—WALTERS, *Bethlehem Bach Choir* (1918); *Amer. Supp.* articles on Bethlehem Bach Choir and Wolle.

C.

WOLLENHAUPT, HEINRICH¹ ADOLF (b. Schkeuditz, Sept. 27, 1827; d. New York, Sept. 18, 1865), studied at the Leipzig Conservatorium, and had a brilliant career as a pianist and a composer of drawing-room pieces of the lightest character. In 1845 he went to New York (*Riemann*).

M.

WOLLICK, NICOLAUS (b. Ancerville, near Bar-le-Duc), a 15th-16th-century writer on

¹ Baker gives Hermann.

Musica figurata, Gregorian chant, counterpoint, etc., in his works: *Opus aureum* (5 editions, Cologne, between 1501 and 1509); *Enchiridion musices* (appeared in Metz and Paris in 1508, and 2nd edition 1512). As a boy he was very poor, but was taken up and educated by Adam of Boppard, Regens of the College of Corneillian, near Air, Northern France. He became a master of philosophy, music and poetry, and lectured apparently at the universities of Paris, Metz and Cologne (Q.-L.).

WOLSTENHOLME, WILLIAM (b. Blackburn, Feb. 24, 1865), organist and composer. As an instance of musical precocity may be mentioned the fact that when 6 years old he used to improvise a melody on the piano, adding an accompaniment on a small harmonium at its side, playing the latter a half tone higher than the piano, owing to the instruments differing in pitch. He was trained at the College for the Blind, Worcester, and obtained the degree of Mus.B. at Oxford, being the only blind musician to take the Oxford degree since John Stanley. Elgar was much interested in him, and as visiting teacher at the College not only gave him violin lessons, but also helped him in preparing for his degree, acting as his amanuensis. On leaving the College, Wolstenholme returned to Blackburn, where for fifteen years he held the post of organist and choirmaster at St. Paul's. In 1902 he became organist at the King's Weigh House Church, going thence two years later to All Saints', Norfolk Square. At present (1926) he is organist at All Saints', St. John's Wood. In 1908 he made a successful tour of the United States. A brilliant pianist and organist, he is also among the most gifted of improvisers. His compositions include about twenty works for various chamber music combinations, seven for orchestra, one for military band, many vocal works, some church music, thirty pieces for pianoforte, and nearly a hundred for the organ. Naturally it is by the last named that he is best known: Worthy of special mention are the sonata in F, the sonata in D (in the style of Handel), the finale in B flat, the fantasia in E, and the prelude and fugue. But the general level through all this large output is high. There is a wealth of melodic invention, fresh and natural harmony, and, above all, a finished workmanship which is not too common in modern organ music. Wolstenholme no doubt owes much of his neatness in the technique of composition to his early training as a pianist and chamber musician. Perhaps to the piano may also be ascribed a less happy feature—his over-frequent use of octaves in the right hand. That, however, is but a trifling blemish on a large mass of organ music which has the unusual merit of appealing to the crowd by its tunefulness, and to the musician by its quality and skill. R. G.

WOLTZ, JOHANN. On May 1, 1617, he calls himself church administrator and organist for over forty years at Heilbronn on the Neckar. He wrote a book of organ tablature, containing motets, cançons and fugues by German and Italian masters (Basle, 1617; *Mendel*; Q.-L.).

WOLZOGEN, HANS PAUL, FREIHERR VON (b. Potsdam, Nov. 13, 1848), the son of K. A. A. von Wolzogen (1823-83, the Intendant of the court theatre at Schwerin, author of several pamphlets, etc., on Mozart), studied comparative philology at Berlin in 1868-71. He eagerly embraced Wagner's doctrines and wrote many books, large and small, about the time of the opening of the theatre at Bayreuth in 1876. The most valuable of these is no doubt his *Thematischer Leitfaden*, published in English as *Guide through Der Ring des Nibelungen*, translated into very curious English by his brother, Ernst von Wolzogen. In 1877 he was called to Bayreuth to edit *Bayreuther Blätter*, the organ by which the campaign was carried on between the festivals. Among the author's many contributions to Wagnerian literature, his book on *Tristan* which appeared in 1880 may be mentioned, as well as a treatise, *Was ist Stil? Was will Wagner?* He wrote the libretto for Hans Sommer's 'Schloss der Herzen' (*Riemann*). M.

WOOD, CHARLES (b. Armagh, June 15, 1866; d. Cambridge, July 12, 1926), composer, professor of music in the University of Cambridge and professor of composition, etc., at the R.C.M., was the son of Charles Wood, lay vicar of Armagh Cathedral.

He began his education in harmony and counterpoint in 1880-81 under Dr. T. O. Marks, the organist of Armagh Cathedral. From 1883-1887 he was at the R.C.M., where he won the Morley Scholarship for composition. He studied there under Stanford for composition, Bridge for counterpoint, and Franklin Taylor for pianoforte. In 1888 he was appointed teacher of harmony at the R.C.M., where later he became a member of the Board of Professors and of the Associated Board of the R.A.M. and R.C.M. As teacher and examiner he exercised an important influence through these posts.

In 1888 he took up his residence in Cambridge, conducting the Cambridge University Musical Society from that year until 1894. He entered Cambridge through Selwyn College, but migrated to Caius College on his appointment as organist-scholar of Gonville and Caius College, 1889-94. In the latter year he was made a Fellow. He was bandmaster of the University Volunteers, 1889-97. In 1897 he was made university lecturer in harmony and counterpoint, and was elected to the professorship on the death of Stanford in 1924. He examined for the universities of Cambridge, Oxford and London. He took the degrees of B.A. and Mus.B. at Cambridge in 1890, of M.A.

and Mus.D. in 1894, and was given an honorary LL.D. degree at Leeds in 1904.

Wood's talent as a composer, his fastidious taste and his fine scholarship, were shown in a number of short works for voices and orchestra which belong to his early years. These include 'Ode to the West Wind,' for solo, chorus and orchestra, 1890; a setting of Swinburne's 'Ode on Music' for the opening of the new building of the R.C.M., 1894; Milton's 'Ode on Time,' for chorus and orchestra, 1898. His 'Dirge for two Veterans' had a great success at the Leeds Festival of 1901 and was revived at that of 1925; his 'Song of the Tempest' for solo, chorus and orchestra, was performed at the Hovingham Festival of 1902, and his 'Ballad of Dundee' at the Leeds Festival of 1904. A set of Symphonic Variations on 'Patrick Sarsfield' was given at one of the Beecham Concerts in London in 1907.

He wrote music to the *Ion* of Euripides for Cambridge (1890) and to *Iphigenia in Tauris* (1894) (see GREEK PLAYS, MUSIC TO), and essayed dramatic composition of a very different kind in a scene from *The Pickwick Papers* taken as the basis of a one-act comic opera and performed by the students of the R.C.M. in 1922. His works of concerted chamber music include three string quartets (A minor, E flat and F) heard occasionally in London, and in 1925 he reappeared as a 'festival' composer, conducting at Gloucester an unaccompanied motet 'Glory and Honour' (8 voices). Among his smaller compositions may be mentioned a book of Irish Folk-songs published in 1897; some fine church music, many partsongs and solo songs, among the last being the very remarkable 'Ethiopia saluting the Colours' to words by Walt Whitman. m.; addns. c.

WOOD, Sir HENRY JOSEPH (b. London, Mar. 3, 1870), eminent orchestral conductor, came of musical parents, was taught at first by his mother, and at 10 years of age acted as deputy organist of St. Mary, Aldermanbury. At 13 he was deputy organist at St. Sepulchre's, Holborn. At 17 he had his first appointment as organist of St. John's, Fulham. Before this he had given organ recitals at the Fisheries and Inventions Exhibitions, in 1883 and 1885 respectively. He studied for six terms at the R.A.M., working with Prout and Garcia, and apparently aiming at the career of a composer. He wrote several theatrical and other pieces, which were consigned to oblivion as soon as the main object of his life was found to be conducting.

A four months' tour with the Arthur Rousbey Opera Company in 1889 gave him his first experience of responsible conducting, and in 1890 he was engaged by Sullivan and D'Oyly Carte to superintend the rehearsals of 'Ivanhoe.' He became assistant conductor at the Savoy Theatre for a short time, and conducted opera at the

Crystal Palace on at least two occasions. In 1891 he conducted 'Carmen' during Marie Roze's farewell tour with the Carl Rosa Company. In 1892 he conducted for an operatic enterprise of Mme. Georgina Burns and Leslie Crotty, and prepared an English version of Rossini's 'Cenerentola.' His next move was to the Olympic Theatre in London, where he conducted Lago's interesting but unfortunate season of Italian Opera. The engagement was most important for him, for it not only brought him under the notice of London musicians, but the first work performed, Tchaikovsky's 'Eugen Onegin,' was his first introduction to that Russian music with which he was afterwards to be so closely identified. After the collapse of the undertaking Wood taught singing, and formed operatic classes, etc., until in 1894 he came into contact with Mottl, and was appointed musical adviser for the Wagner Concerts organised by Schulz Curtius at the newly built QUEEN'S HALL (q.v.).

In 1895 he was engaged by Robert Newman to conduct a series of Promenade Concerts in the new hall, and from that moment began an association maintained unbroken till the death of Newman in 1926, which has had the most important effect on the musical life of London (see PROMENADE CONCERTS and NEW QUEEN'S HALL ORCHESTRA) and incidentally made Wood the most prominent personality in London music. In 1896 he conducted the run of Stanford's 'Shamus O'Brien' at the Opéra-Comique Theatre, but his career was now shaped in the direction of symphonic work, and not only that at Queen's Hall (including with the Promenades, the Symphony Concerts and Sunday Concerts from 1897 onwards), but many other opportunities which he found or made in provincial cities, absorbed his energies. In 1897 a Command performance of the Queen's Hall Orchestra was given before Queen Victoria; in the same year Wood was appointed director of the Nottingham Sacred Harmonic Society and he founded the Nottingham City Orchestra in 1899. He was made conductor of the Wolverhampton Festival Choral Society in 1900, of the Sheffield Festival (1902-11), and of the Norwich Festival in 1908. This last he was able to revive after the lapse of ten years in 1924. In 1926 he conducted the Handel Festival at the Crystal Palace, and himself scored the whole of the music for a three days' programme for an immense orchestra proportioned to the choir and the building.

He conducted symphony concerts at Birmingham in 1907, the festival there in 1912 and the Festival Choral Society from 1919-23. Other important provincial appointments have included the Westmorland Festivals (see WAKEFIELD, Mary), Cardiff Orchestral Concerts (1911-13), the Manchester 'Gentleman's Concerts' and Brand Lane Concerts, the Liver-

pool Philharmonic, and Societies at Sheffield, Leicester and Hull.

In 1898 Wood married Olga, daughter of Princess Sofie Ourousov (*née* Narishkin) (*d.* Dec. 20, 1909), a soprano singer whose charm of voice and style added distinction to many of her husband's earlier festival performances. She had been his pupil and became to a certain extent his teacher, for he owed much to her accomplishment and fine taste. She was no doubt partly responsible for the direction of Wood's attention to the great wealth of Russian orchestral music which was still practically unknown in England in the 'nineties. Another who contributed very definitely to the enlargement of Wood's musical horizon was ROSA NEWMARCH (*q.v.*) whose knowledge of the Russian and other Slavonic schools of composition has been constantly used to enrich the repertory of the Queen's Hall orchestra. These influences, together with the fact that after the production of Tchaikovsky's 'Pathetic' symphony the London public was ripe for the vivid colours and rich imagery of the Russians, contributed to found Wood's reputation as a conductor primarily on music of this kind. He was never, however, a specialist in the exclusive sense, and it may be hazarded that the conditions of his work as an English conductor have given him the widest repertory of any concert conductor in the world. As a musician his taste has constantly matured, so that while at 25 he attracted attention by sensational performances of Tchaikovsky, at 55 he is noted for finely tempered readings of the classics.

In 1911 Wood was knighted; in the same year (two years after his first wife's death) he married Muriel, daughter of Major Greatorex, by whom he has two daughters. The years immediately before the war were remarkable for the great number of important new works which were produced under his direction at Queen's Hall. Richard Strauss, Debussy, Reger, Scriabin, Schönberg were among the more famous continental composers who visited England either to conduct their works with his orchestra or to hear them under his direction. Elgar's second symphony was first given at the London Festival of 1911, and the works of native composers too numerous to record were produced by him both in London and the provinces. After the war, when the armistice made possible the re-establishment of international relations amongst artists, Wood was able to carry English music abroad. He conducted with Nikisch and Pierné at the international festival given at Zürich in 1921. He was invited to conduct English music at Wiesbaden in 1925, and in the same year visited California for the same purpose. Elgar, Delius, Ethel Smyth, Holst, Vaughan Williams, have been the principal composers represented in these programmes. In 1926 he received

the degree of Doctor of Music, *honoris causa*, from Oxford.

Wood has made a good many orchestral arrangements of works ranging from a suite of pieces by Purcell to Moussorgsky's 'Pictures at an Exhibition' and Debussy's 'La Cathédrale engloutie.' A fantasia on British sea songs by him was for many years popular at the Promenade Concerts. Since 1923 he has found time to undertake the training in orchestral playing and conducting at the R.A.M. He has always been a man of hobbies, amongst which painting in oils and carpentry are conspicuous. Alike in his hobbies and his life-work of music the quality of thoroughness underlies all his activity. He has never been known to conduct a score without knowing it, or to conduct without a score in order to show how well he knows it. He takes infinite pains at rehearsal, is a firm disciplinarian and has cultivated so direct and indicative a style of conducting that his requirements can never be in doubt for an instant. Consequently, while his great work has been the training of an orchestra to play constantly under his direction, he is extraordinarily ready in getting results from strange players.

BIBL.—ROSA NEWMARCH, *Henry J. Wood: Living Masters of Music*, 1904; *A Quarter of a Century of Promenade Concerts* (1919). (Contains lists of first productions at Queen's Hall Promenade Concerts, 1895–1919.)

C.; incorporating material from M.

WOOD, JOHN MUIR (*b.* Edinburgh, July 31, 1805; *d.* Annandale, Cove, June 25, 1892), head of a Scottish firm of music-publishers originally located in Edinburgh, but afterwards established in Glasgow, was the son of Andrew Wood, a music-publisher who named him after his partner, John Muir. John Muir Wood was closely associated with the musical life of Scotland, and took a keen interest in Scottish musical antiquities. He edited a new edition of Graham's 'Songs of Scotland,' 1884, in one volume (the original was issued by Wood & Co. of Edinburgh in 3 vols. 1848, etc.), and was the writer of the article 'Scottish Music' and some others in the first edition of this Dictionary.

Wood & Co., the above-mentioned firm of music-publishers, was started by James Muir at 16 George Street, Edinburgh, in May 1796. Difficulties having arisen, the business was taken over shortly after by his brother, John Muir, an ironmonger, who, advertising for a partner, associated himself with Andrew Wood and others. Muir, Wood & Co. were at 16 George Street in 1799, and were 'Musical instrument makers to His Majesty.' In 1804 they had removed to 7 Leith Street; in 1811 the number was changed to 13, and here they remained until 1818. They were very active publishers, and published quantities of sheet music and collections of airs mostly Scottish.

The survivors of the firm were Wood & Co. of 12 Waterloo Place, Edinburgh, and J. Muir

Wood & Co. of 42 Buchanan Street, Glasgow, who were intimately connected, and were issuing, in the 'forties and 'fifties, many important Scottish musical works, among which were Graham's 'Songs of Scotland,' Surennes' 'Dance Music of Scotland,' and some others, which in their subject may now claim to be classic.

F. K.

WOOD, MRS., see PATON, Mary Anne.

WOODCOCK, ROBERT, is described by Hawkins as a celebrated flute-player. Little is known regarding him save that he composed twelve concertos in eight parts for flutes and strings. These concertos seem to have had considerable popularity, as they are advertised in Randalls' list for 1776; they were published with the imprint of Walsh and Joseph Hare about 1728-30. Alfred Moffat arranged one of the slow movements (in D minor) of the concertos as a violin solo in Bk. ii. of 'Pieces by English Masters of the 17th and 18th Centuries' (Augener). The dates of his birth and death have not been ascertained.

Hawkins also refers to Thomas Woodcock, an excellent performer on the violin, who kept a coffee-house at Hereford, and who died about 1750.

F. K.

WOODHOUSE, CHARLES (b. London, 1879), an artist of singular versatility. He has gained experience by playing violin, viola, piano, orchestral and chamber music, composing and arranging, with occasional conducting, and is one of the Examiners of the Associated Board. Best known as an orchestral player of the first rank, he is leader of the New Queen's Hall Orchestra, and a pianist in a small orchestra directed by Frederick Cassano. He belongs to several well-known quartets.

W. W. C.

WOODS ('WODDS,' 'WOODES'), MICHAEL (?) (16th cent.), English organist and composer of church music. There are records of payments to a Michael Woods as 'organista' of Chichester Cathedral from 1567-69 (West, *Cath. Org.*). B.M. Add. MSS. 29,426-7 is a collection of 16th-century motets, chiefly by English composers such as Taverner, Tallis, Fayrfax and Shepherd, arranged in Italian tablature, and contains the following by Woods:

'Effunde quæso'; 'Exurge Domine'; 'Perfecti Illud'; 'Verbi tul.' All for 3 v.

The first of these is also in Tenb. 354-8, and a score of the second is in B.M. Add. MSS. 34,726/17 b. Copies of Nos. 2, 3 and 4 are in R.C.M. 2035, and also in the Commonplace Book of John BALDWIN (*q.v.*). The R.C.M. MS. also contains another motet by Woods: 'Igitur Jhesu,' a 3, and the Baldwin book still another, 'Esto Pater,' a 3.

J. M^x.

WOODSON, (1) LEONARD (b. Winchester; d. 1641), English organist and composer of church music, described in the Batten Organ Book (see BATTEN), as 'organist of Eaton

College, and one of ye quire of Winzor who was born at Winchester.' That he was a singing man at St. George's Chapel, Windsor, under Nathaniel Giles, who was organist and master of the children there from 1585-1633, is confirmed by the following entry in the Chapter Acts for Apr. 5, 1605:

'It is decreed, at the request of Nathanaell Giles, esquier, Master of the Choristers of this free Chapel, that Leonard Woodeson, one of the singing men of the same, shall have the teaching, keeping, dieting, ordering and lodging of the said choristers for so long time as it shall be thought meet by the Dean and Chapter. And whensoever the said Dean and Chapter shall mislike therewith then upon one quarters warning from them to be given to the said Nathanaell he shall take them again to his own ordering and government as before.'

It is probable that Woodson continued as deputy choirmaster until 1615, when he became organist of Eton College. He held this post until 1641 (West, *Cath. Org.*) and presumably died in this year, as a *Te Deum* by him is printed in Barnard's 'Selected Church Music,' declaredly a collection of music by composers dead at the time of publication (1641). An *In Nomine* by Woodson is at Oxford (Bodl. Mus. Sch.), a 3-part 'Ut re mi fa' is in the Commonplace Book of John BALDWIN (*q.v.*), and a treble solo, 'The mary Gould of golden hew,' is in Ch. Ch. 439.

(2) LEONARD, possibly a son of the above, was sworn a gentleman of the Chapel Royal, Aug. 15, 1681. He was appointed 'to the vocall musick' July 17, 1689, and still held this position in 1699 under Dr. John Blow as 'composer' (H. C. de Lafontaine, *The King's Musick*).

J. M^x.

WOODSON, THOMAS (late 16th and early 17th cent.), English composer, possibly the father of Leonard WOODSON (1). He was a gentleman of the Chapel Royal in 1581,¹ and continued as such, at any rate until 1603, when he was one of the gentlemen who had an 'allowance of mourning liverie given out to them on the funeral of Queen Elizabeth' (H. C. de Lafontaine, *The King's Musick*). B.M. Add. MSS. 29,996/184 b contains a composition for organ by him described as 'Forty wayes of 2 parts in one on the "Miserere." Only 20 'wayes' are given, but another copy is in Ch. Ch. 371.

J. M^x.

WOODWARD, RICHARD (b. Dublin, 1744; d. there, Nov. 22, 1777). His father (also Richard Woodward) was a vicar choral of Christ Church and St. Patrick's Cathedrals. He (the younger Woodward) was a chorister of Christ Church Cathedral, of which he was afterwards appointed organist in 1765. In 1768 he took the degree of Bachelor in Music at Trinity College, Dublin, and proceeded to the Doctor's degree in 1771. He was appointed a vicar choral of St. Patrick's Cathedral in 1772.

¹ G. E. P. Arkwright, *Catalogue of Mus., Ch. Ch.*

In 1771 he published (with Welcker of Gerrard Street, St. Anne's, Soho) a folio volume of his church music, with a dedication to Archbishop Smyth. It is entitled :

^{*} Cathedral music, consisting of one complete Service, Seven Anthems, several Chants, and Veni Creator Spiritus, in score; for one, two, three, four, five and six voices, composed by Richard Woodward, Mus.D., Organist of Christ Church Cathedral, Dublin. Opera Tertia.

At the present time his anthems are not often heard, although some of his chants (notably a double chant in D) are well known. He also published a collection of his songs, catches and canons. Woodward is buried at Christ Church Cathedral. On his monument in the Cathedral is engraved his Canon (4 in 2), 'Let the words of my mouth,' which had been awarded the gold medal of the Glee and Catch Club in 1764.

L. M^c. L. D.

WOODYATT, EMILY (b. 1814), daughter of a confectioner at Hereford, was taught singing by Sir G. Smart, and first attracted public attention in Jan. 1834, at a concert of the Vocal Association, and later at Hereford Festival the same year. She became a favourite singer of the second rank at the various festivals, oratorio and other concerts. In 1839 she became a member of the Female Society of Musicians, on its foundation, and in 1840 was elected an Associate of the Philharmonic Society at the instance of Sir G. Smart, Cramer, and Edward Loder (q.v.). On Oct. 27, 1841, she married William Loder the violoncellist (he died in 1851), and retired soon after her marriage.

A. C.

WOOLDRIDGE, HARRY ELLIS (b. 1845; d. London, Feb. 13, 1917) was Slade Professor of Fine Arts at Oxford, a man of practical ability in several arts, especially painting, and a profound scholar of the mediæval period of polyphonic music. He revised and edited Chappell's 'Popular Music of the Olden Time' (1893), and collaborated with G. E. P. Arkwright in his researches. But Wooldridge's chief contribution to historical knowledge was his work on the polyphonic period which forms the first two volumes of the *Oxford History of Music*, and traces the developments of such music from Organum to the end of the sixteenth century.

C.

WORCESTER FESTIVAL, see THREE CHOIRS FESTIVAL.

WORCESTER MUSIC FESTIVALS (U.S.A.). The music festivals given by the Worcester County Musical Association annually in the city of Worcester, Massachusetts, are the offspring of institutions called musical conventions, which did much to raise the character of church music and its performance in the United States, especially in New England, in the earlier decades of the 19th century.

At these conventions there were gatherings of singing teachers and choristers sometimes

to the number of several hundred, who, under the guidance of teachers of experience and better training than was the rule, went out from Boston and other large cities, studied singing from notes and some of the simpler principles of vocalisation, and made the acquaintance of selections from the oratorios, especially those of Handel and Haydn. After two or more days had been spent in study and discussion all the members of the Convention were wont to join in a concert, at which the new music that had been learned would be performed, with scanty and improvised instrumental accompaniments as a rule, but frequently with good effect, so far as the singing was concerned. Worcester had long been a centre of choral culture when the first of these conventions was held there in 1858. Indeed, inspired by the example of the Handel and Haydn Society of Boston (q.v.), singing societies were in existence, one of which, the Mozart Society, organised in 1850, had been founded for the express purpose of performing oratorios. But works of this kind were then associated in the public mind, as they still too widely are, with the notion of large numbers in the choir, and little was done in the way of oratorio until a union of choirs was effected in the conventions. At the first Musical Convention held in Worcester in 1858, hymns, glees, a cantata composed by the conductor (B. F. Baker, of Boston) and choruses from the 'Messiah' and the 'Creation' were sung, at the one public concert which was given. In 1860 there were two concerts, and by 1866 the meetings had taken on so much of the festival character that four concerts were not thought too many, and the new conductor, Carl ZERHAHN, ventured upon an entire oratorio, viz., Handel's 'Judas Maccabæus.' For four years the organisation which arranged the conventions was a loose one, but in 1863 the Worcester County Musical Convention was formally established with representatives from twenty cities, towns and villages.

In 1871 the name was changed to the Worcester County Musical Association, and it was formally declared that thereafter the conventions should be called festivals—an ambition to imitate the English festivals having found an expression at the meeting of 1863, when it had also been resolved to perform oratorios in their entirety. It was long before this pious resolution could be carried out, for even after the choir, then made up of singers from Worcester and vicinity (the choir is now almost wholly local), was able to master one of the works of Handel or Haydn, the instrumental company was lacking. At first the pianoforte alone was used, then, when in 1864 a fine organ was presented by popular subscription to the Mechanics' Association in whose hall the meetings were held, that was

also employed. When Zerrahn first brought forward 'Judas Maccabaeus' the orchestra consisted of six players—the Mendelssohn Quintet of Boston and a double-bass. The next year there was an orchestra of ten men, in 1868 of eighteen. Later the band consisted of between fifty and sixty members of the Boston Symphony Orchestra.

Zerrahn was conductor of the Worcester festivals from 1866-97 inclusive. After 1868 he had the help of different men to conduct the smaller works and the accompaniments to the miscellaneous solos. He was succeeded after his resignation in 1897 by George W. CHADWICK, who officiated 1898-1901. Wallace GOODRICH held the post in 1902-07, and was succeeded by Arthur MEES, who in turn was followed by Nelson P. COFFIN in 1919. Victor HERBERT was associate conductor from 1889-1891, and Franz KNEISEL from 1892-1908. Since 1866 a wide repertory of large choral works has been given, including most of the classics and many modern works, with those of native composers such as Horatio Parker, Chadwick, Converse and Hadley.

H. E. K., addns.

WORGAN, (1) JAMES (*d.* 1753), was organist of St. Botolph,¹ Aldgate, and St. Dunstan in the East. In 1737 he became organist of Vauxhall Gardens, which office he resigned about 1751.

(2) JOHN, Mus.D., his younger brother (*b.* 1724; *d.* London, Aug. 24, 1790), studied music under him and Thomas Roseingrave. He became organist of St. Andrew Undershaft with St. Mary Axe, about 1749, and of St. John's Chapel, Bedford Row (1760). He graduated as Mus.B. at Cambridge in 1748. In 1751 he succeeded his brother as organist at Vauxhall Gardens, and in 1753 also as organist of St. Botolph's, Aldgate. In 1753 he was appointed composer to Vauxhall Gardens, and continued so until 1761. In 1770 he was re-appointed to the office and held it until 1774, when he resigned both it and the organistship of the gardens. In 1775 he proceeded Mus.D. He died in his house in Gower Street, and was buried in St. Andrew Undershaft. He excelled as an organist, and whenever he played, crowds of professors and amateurs resorted to hear him. In a satirical song upon Joah Bates, written by Martin Madan and set by Samuel Wesley, he was placed upon an equality, as a player, with Handel:

'Let Handel or Worgan go thresh at the organ.'

His compositions include an Ode on the Rebellion in 1745, an anthem for a thanksgiving for victories, 1759; oratorios: 'The Chief of Maon,' 'Gioas' (incomplete); 'Hannah' (to words by Christopher Smart), produced at the Haymarket Theatre, 1764, and 'Manasseh,'

produced at the Lock Hospital Chapel, 1766; many books of songs composed for Vauxhall; psalm tunes, glees, organ music, and harpsichord lessons. He left a treatise on composition, unfinished. A full biography, with a minute and laudatory analysis of his works, will be found in the *Quarterly Musical Review*, vol. v. p. 113.

W. H. H.

Other members of the Worgan family, also musical, were:

(3) JOHN, son of Dr. Worgan (2), who composed marches for the pianoforte, and some songs, about the junction of the 18th and 19th centuries. He married, Sept. 1, 1753, Sarah Macklean, whom he divorced,² June 1768.

(4) THOMAS DANVERS, another son (*b.* London, 1774; *d.* 1832), was author of a musical game with cards, 1807; 'The Musical Reformer,' 1829; besides other works of a technical character. He also composed songs, 'Vocal Sonatinas,' 'The Hero's Welcome,' a motet.

(5) RICHARD, another son, published a set of sonnets in 1810.

(6) GEORGE (*b.* 1802; *d.* Wellington, N.Z., Apr. 2, 1888), a grandson of Dr. John Worgan, went to New Zealand. He composed psalm and hymn tunes, songs, etc., and issued in 1841, 'Gems of Sacred Melody.' (See an obituary notice in *Mus. T.*, 1888, p. 490.)

F. K.

WORMSER, ANDRÉ ALPHONSE TOUSSAINT (*b.* Paris, Nov. 1, 1851, *d.* Nov. 4, 1926), was a scholar of the Paris Conservatoire under Bazin and Marmontel, obtained the Prix de Rome in 1875 with his 'Clytemnestre,' and won success with many operas and other works ('Adèle de Ponthieu' was given at Aix-la-Chapelle in 1887, 'Rivoli' in Paris in 1896); but none has achieved the success of the pantomime or wordless play, 'L'Enfant prodigue,' produced in Paris in 1890 (at the Cercle Funambulesque, June 14, and at the Bouffes Parisiens, June 21). It was produced at the Prince of Wales's Theatre, London, Mar. 31, 1891 (see RONALD, Sir Landon), and at Dresden in 1903. 'Amour,' a poem for voice and orchestra, was performed at the Lamoureux concerts in 1921. An extract from it, 'Solitude,' was published in 1922.

M., with addns.

WORNUM. The name is intimately connected with the invention and development of the upright piano, since it is Robert Wornum's action, patented in 1826, though not completed until the 'tie' was added in 1828, that produced cottage or pianino action. (See PIANOFORTE, Vol. IV. p. 160.)

(1) ROBERT (*b.* 1742; *d.* 1815), the father of the inventor, was of a Berkshire family, originally Wornham. He succeeded to the business established by J. and G. VOGLER, in Glasshouse Street, and published many small

¹ Elected Dec. 22, 1738; was succeeded May 11, 1753, by Mrs. Mary Worgan, probably his widow (St. Dunstan's Vestry Books).

W. B. S.

² F. Plowden, *Criminal Court Blog* 1, 1890. W. B. S.

books of dances, and airs for flute or violin. He moved to 42 Wigmore Street in 1777, and according to the *Musical Directory* of 1794, was a maker of violins and violoncellos.

His son (2) ROBERT (b. 1780; d. 1852) was the inventor of diagonally and upright-strung low upright pianos in 1811 and 1813, which he named, respectively, the 'Unique' and the 'Harmonic.' He brought out his 'piccolo' piano in 1827, and finally perfected his crank action in 1829. He was intended for the Church, but the mechanical bias prevailed, and he went into partnership with George Wilkinson in a pianoforte business in Oxford Street in 1810. A fire in 1812 caused a dissolution of this partnership. He ultimately established a warehouse and concert room in Store Street. The subsequent head of the firm of Robert Wornum & Sons, A. N. Wornum, succeeded to his grandfather's inventive talent.

A. J. H.; addns. F. K.

WORZISCHEK, JOHANN HUGO (b. Wamberg, Bohemia, May 11, 1791; d. Vienna, Nov. 19, 1825), was first taught by his father, a schoolmaster. At the age of 8 he had attained to such remarkable facility in playing the organ, piano and violin that he was sent to Prague, where he had lessons from Tomaschek.

To attend lectures on philosophy and law and find the means of living, he had himself to give lessons before he had completed his musical studies. Worzischek went afterwards to Vienna (1813), and became intimate with Hummel, Meyerbeer and Moscheles; and he was recommended by Hummel as a teacher to all his friends, when the great pianist left Vienna. He made a name as a pianist and conductor of the *Gesellschaft der Musikfreunde*.

In 1822 he was appointed organist to the imperial chapel—but he died early.

Among his published works (which received unusual favour, and are still much liked by Viennese musicians) are a symphony, a duet for piano and violoncello, and a *divertissement* for two pianos; he left many sacred works in manuscript.

E. J. H^a.

WOTQUENNE, ALFRED (b. Lobbes, Henne-gau, Jan. 25, 1867), was a pupil of the Brussels Conservatoire, under Brassin for piano, Mailly for organ, Dupont and Gevaert for theory; he became in 1894 librarian of the institution, and under his care (till 1918) the library has become a model of organisation. It has constantly acquired works of importance, both original and MS. copies of rarities in other libraries; and in no institution of the kind is a warmer welcome or more generous assistance given to research students. He has also published the following bibliographical works, which are indispensable to all students of musical history:

Catalogue de la Bibliothèque du Conservatoire de Bruxelles. 3 vols. 1888-1908.
Étude bibliographique sur les œuvres de Baldassare Galuppi. 1900.

Catalogue des livrets d'opéras et d'oratorios italiens du XVII. siècle. 1902.

Catalogue thématique de l'œuvre de Gluck. 1905.

Catalogue thématique de l'œuvre de C. P. E. Bach. 1906.

Table alphabétique des morceaux mesurés contenus dans les œuvres

dramatiques de Zeno, Metastasio et Goldoni. 1906.

Étude bibliographique sur Luigi Rossi. 1909.

E. J. D.

WOTTON, (1) WILLIAM BALE (b. Torquay, Sept. 6, 1832; d. Deal, May 3, 1912), bassoon-player. His father was corporal-major in the 1st Life Guards, and he was thus brought up among the best regimental music. His fondness for the art showed itself very early; he learnt the flute and cornet, and at the age of 13 entered the band of the regiment. The bassoon he learned with John Hardy, an excellent player, under whom he laid the foundation of that artistic style and charm of tone which distinguished him. He studied orchestral playing at the R.A.M. under Charles Lucas. His first appearance as a soloist was at the Town Hall, Windsor, where he and the late William Crozier (a most admirable player, who died Dec. 20, 1870, after having been for many years first oboe at the Crystal Palace) played a duet for oboe and bassoon under the direction of Dr. George Elvey. On the death of Baumann he would have accepted engagements with Jullien for the Promenade Concerts, and with Alfred Mellon for the Orchestral Union, if Waddell, his bandmaster, had not peremptorily forbidden it. He was then transferred from the bassoon to the saxophone, of which he was the earliest player in England. About 1870, by special permission of the colonel of his regiment, he joined the orchestra of the Crystal Palace, in which he played first bassoon for nearly thirty years. He was also a member of the orchestras of the Philharmonic, Albert Hall, and many others, and was professor of the bassoon at the R.C.M. until his retirement in 1904.

(2) T. E. WOTTON (b. 1852), succeeded to the various posts held by his brother (1), with whom he was associated in the Crystal Palace band from 1879. W. B. Wotton's son, (3) L. V. WOTTON, was also a bassoon-player.

G.

WOTTON, WILLIAM, 'Orkyn maker,' in 1486 built a 'pair of organs' for Magdalen College, Oxford, for £28, and in 1487 agreed to make a similar instrument for Merton College, which was to be completed in 1489. v. de p.

WRANITZKY, (1) PAUL (b. Neureisch, Moravia, Dec. 30, 1756; d. Vienna, Sept. 26, 1808), conductor of the orchestra at the two court theatres at Vienna, and a popular composer of operas and instrumental music. He was educated at the monastery close by, and at Iglau and Olmütz, where he perfected himself, especially in violin-playing. In 1776 he went to Vienna to study theology at the Imperial Seminary, and at once obtained a post as conductor. He next studied composition with Kraus, a Swedish composer then living in

Vienna, and produced a number of new works which attracted notice. Towards the end of 1780 he became conductor of the court theatres, and remained so till his death. He was also for many years Kapellmeister to Prince Lobkowitz. His operas were great favourites, and became known nearly throughout Germany. The one which was oftenest and longest performed was 'Oberon' (May 23, 1791), a serio-comic fairy opera, libretto adapted by Giesecke from Wieland, which at one time ran the 'Zauberflöte' hard. Special mention should also be made of 'Die gute Mutter,' comic opera (1795); 'Der Schreiner,' Singspiel (1799); 'Mitgefühl,' Liederspiel (1804); all produced at the court theatre, as were also many ballets, including 'Die Weinlese,' 'Das Urtheil des Paris,' 'Der Sabinerraub,' all between 1794 and 1800. Gerber gives a detailed catalogue of Wranitzky's operas, ballets and instrumental music. Among his many works, mostly published by André in Paris and Vienna, may be specified: 12 symphonies; string-quintets, quartets and trios; 3 trios for 2 flutes and violoncello, op. 83; concertos for violoncello, op. 27, flute, op. 24; and sonatas for pianoforte, violin and violoncello. He also left much music in MS. His connexion with the Tonkünstler-Societät must not be passed over. He entered it in 1793, and having become secretary undertook, at Haydn's instigation, to reorganise its affairs, then in a very bad state. In 1797 he completely effaced the difficulties which existed in 1779, when Haydn had thought of entering. Haydn had a great respect for him, both as a man and an artist, and expressly desired that he might lead the strings at the first performances of the 'Creation' and the 'Seasons.'

His younger brother, (2) ANTON (b. Neu-reisch, 1761; d. Vienna, 1819), studied law at Brünn, where he began to compose. He went next to Vienna, where he was esteemed as a teacher. Prince von Lobkowitz made him his Kapellmeister in 1808. (See Dlabacz and Q.-L. for list of works of both brothers.)

C. F. P.

WRECKERS, THE (*Les Naufrageurs; Strandrecht*); opera in 3 acts; libretto by H. B. Leforestier (H. B. Brewster); music by Ethel Smyth. Produced Leipzig, Nov. 11, 1906; in English, His Majesty's Theatre, June 22, 1909.

WREST PLANK and WREST PINS. The wrest-plank or pin-block of a pianoforte is the carrier of the wrest- or tuning-pins. It is constructed of a number of layers of wood glued together so that the grain of any layer is at right angles to that of contiguous layers.

The plank so formed is rigidly fixed to the wooden framework of the piano, and the metal frame which carries the strings is placed over the plank.

The tuning-pins are in reality gripped by the wooden plank, the object of the cross-graining in which is to ensure sufficient friction to prevent the tuning-pins slackening off and so going out of tune.

Sometimes a space is provided in the metal frame to clear the tuning-pins. This is known as the 'Open Plank.' In general, the piano frame is continuous, and has holes drilled in it for the tuning-pins to pass through, these holes being generally bushed with wood, the object being to take some of the thrust set up by the string tension on the pins.

This method of gripping the tuning-pins in a wooden plank, although of considerable antiquity, is generally considered to be the most satisfactory of all methods.

Mechanical or worm-gearred pins as used on such instruments as guitars or mandolines have been tried, but are unsatisfactory owing to the large forces to which they are subjected; moreover, on account of the inevitable backlash between the worm and the worm-wheel, the process of tuning with such contrivances is exceedingly difficult to carry out. See under PIANOFORTE, the section on the modern frame.

L. A. B.

WRIGHT, DANIEL, father and son with the same Christian name, London music-publishers during the early part of the 18th century. Hawkins sums up the character of the elder Wright as a man 'who never printed anything that he did not steal' (*Hist. Music*, Novello ed., p. 884). However this may be, the two Wrights published many now very interesting musical works.

Daniel Wright, the elder, was established by, or before, 1709 at the corner of Brook Street, next the Sun Tavern in Holborn, his sign being 'The Golden Bass Violin.' He died or gave up business about 1734. His son, Daniel Wright, junior, had a business on the north side of St. Paul's Churchyard, under the sign 'The Golden Bass,' and may have succeeded J. Clarke and John Hare, earlier publishers, who, in partnership, had a shop here also on the north side with the sign the 'Golden Viol.' Wright, junior, in due course changed his sign to that of the 'Violin and Flute.' He probably gave up trade about 1740, and there seems some likelihood that John JOHNSON of Cheapside founded his extensive business upon that of the younger Wright, though not on the same premises. For some years before the elder Wright's death, or retirement, both names appear on some of the imprints; the elder at least claimed to be a musical instrument maker. Wright, senior, published Lully's 'Lessons for the Harpsichord or Spinnet,' ob. folio, c. 1710; the 'Songs in Hurlothrumbo,' c. 1729, folio; John Humphries' 'Six Solos for a Violin,' 1726; some half-sheet songs, and many curious books of dances and airs for the flute or violin. His

son followed much on the same lines. The elder Wright was also notorious for publishing musical works under the same title as, and in similar style to, those issued by Walsh. For instance, he published a 'British Musical Miscellany' (1733), a 'Merry Musician,' and a 'Monthly Mask of Vocal Musick' (1718), the latter with a rudely engraved pictorial title-page copied from Walsh. Hawkins speaks of the elder Wright impudently publishing a set of lessons for the harpsichord by Greene, without permission of the composer.

Besides the two Daniel Wrights, senior and junior, there was a music-seller named Thomas Wright—'At the Golden Harp and Violin, on London Bridge,' who published half-sheet engraved songs about 1730–35. Another early music-seller with the same surname was E. Wright, who, according to an elaborately engraved trade card, c. 1740, 'At her music shop under St. Dunstan's Church, Fleet Street, makes and sells all sorts of musical instruments.'

F. K.

WRIGHT, THOMAS (*b.* Stockton-on-Tees, Sept. 18, 1763; *d.* Wycliffe Rectory, near Barnard Castle, Nov. 24, 1829), organist and composer, was the son of Robert Wright (a pupil of Avison of Newcastle), who was organist in Stockton Church from 1766–97, the date of his death. Robert was the son of Thomas Wright, the elder, the first organist of Stockton, about 1758–60.

Thomas Wright, the younger, was instructed by his father, and at 11 years of age went to John Garth, at Sedgfield (nine miles from Stockton) as organ pupil; he succeeded Garth at the organ, 1784–85. Previous to his appointment as full organist, he had been apprenticed to Thomas Ebdon at Durham Cathedral. Wright soon became famous for his extempore voluntaries, and in high repute as a teacher for the pianoforte, violin and organ. He succeeded his father at Stockton in 1797, and resigned the appointment and left Stockton in 1817. After a period of residence and an organ appointment at Kirkleatham, near Redcar, he returned to Stockton and resumed teaching. It was while on a professional engagement that a sudden seizure caused his death, at Wycliffe Rectory, near Barnard Castle. He had married in 1794 Elizabeth Foxton, a lady of some literary attainments who survived him.

Besides the hymn tune 'Stockton,' he composed 'A Concerto for the harpsichord or pianoforte . . . dedicated to the Hon. Miss Dundas,' 1795; 'An Anthem for thanksgiving for Peace' (of Amiens, 1802); 'Overtures and Songs in a musical piece called Rusticity,' 1800 (written by his wife); 'A Musical Primer' and 'Supplement,' etc. The 'Concerto' is remarkable for being (so far as the present writer can ascertain) the first music to contain metronome marks, indicating speed value. In the preface

attached, Wright explains his system, and claims that for simplicity and effectiveness it is superior to the *chronomètres* of Loulié, and of Sauveur (see *METRONOME*), and to the metronomes of later invention.

A simple pocket metronome consisting of a weighted string swinging across a wooden arc marked from zero in tens, was of his invention or adaptation. One bearing his name and the date 1795 is still in existence. Each movement of the concerto is marked with a speed mark; and he explains that '28 = P ' indicates that the vibration of a weighted string measured over twenty-eight keys of the harpsichord, goes to a minim. Wright also invented an organ attachment to a square pianoforte, which plays a set of organ pipes at will, without impairing its use as a pianoforte. This invention does not appear ever to have been made public; his own instrument is in the possession of Miss Edith Wright,¹ of Wakefield, his granddaughter. He built for himself in 1789 a chamber organ, constructed two orreries for illustrating and calculating eclipses, and sent to the Society of Arts a model of a machine for raising coal, for which they had offered a premium. F. K.

WRIGHT & CO., music-sellers and publishers who, after Elizabeth Randall, succeeded to the business of Walsh about 1782–84, at 13 Catherine Street. The senior partner was Hermond or Herman Wright, and the firm is notable for the reissue of Handel's works from the Walsh plates. About 1800 they removed to 386 Strand, and in 1802 the business was broken up, Preston buying the Handel plates; some of these descended to J. A. Novello, who republished certain of the oratorios from the original or early plates. F. K.

WRIGHTEN, MRS. (*b.* Feb. 1751; *d.* America, Aug. 11, 1796), a favourite vocalist at Vauxhall, from about 1776–88/89. She was much appreciated for her singing of ballads, and was the first to sing in public the popular 'Within a mile of Edinburgh town'; this was in the season of 1780. She was also famous in the hunting songs of the period, whose extended range, and heavy instrumental accompaniments, demanded great voice power. F. K.

She made her debut in 'The Recruiting Officer,' 1770. Her first husband was a prompter at one of the London theatres. She went to America, where in 1792 she joined John Henry's New York Company and married A. M. Pownall. W. H. G. F.

WÜERST, RICHARD FERDINAND (*b.* Berlin, Feb. 22, 1824; *d.* Oct. 9, 1881), composer and critic, was a pupil of Rungenhagen at the Berlin Academy, of Hubert, Ries and David in violin, and of Mendelssohn in composition. After touring for a couple of years, he settled

¹ Much of the above information was kindly supplied by Miss Edith Wright.

at his native place and became in 1856 music director, in 1874 professor, and 1877 member, of the Academy of Arts. He was for many years teacher of composition in Kullak's Conservatorium. He contributed to the *Berliner Fremdenblatt*, and in 1874-75 edited the *Neue Berliner Musikzeitung*. His works comprise seven symphonies, overtures, quartets, etc. G.

WÜLLNER, (1) FRANZ (b. Münster, Jan. 28, 1832; d. Braunsels, on the Lahn, Sept. 7, 1902), pianist, conductor and composer, was the son of a distinguished philologist, director of the Gymnasium at Düsseldorf. Franz attended the Gymnasium of Münster till 1848, and passed the final examination; studying the piano and composition with Carl Arnold up to 1846, and afterwards with Schindler. In 1848 Wüllner followed Schindler to Frankfurt, and continued his studies with him and F. Kessler till 1852. The winter of 1852-53 he passed in Brussels, frequently playing in public, and enjoying the society of Fétis, Kufferath, and other musicians. As a pianist he confined himself almost entirely to Beethoven's concertos and sonatas, especially the later ones. He then made a concert-tour through Bonn, Cologne, Bremen, Münster, etc., and spent some little time in Hanover and Leipzig. In Mar. 1854 he arrived in Munich, and on Jan. 1, 1856, became pianoforte professor at the Conservatorium there. In 1858 he became music-director of the town of Aix-la-Chapelle, being elected unanimously out of fifty-four candidates. Here he conducted the subscription concerts, and the vocal and orchestral unions. He turned his attention mainly to the orchestra and chorus, and introduced for the first time many of the great works to the concert-hall of Aix. In 1861 he received the title of Musikdirector to the King of Prussia, and in 1864 was joint-conductor with Rietz of the 41st Lower Rhine Festival.

In the autumn of 1864 Wüllner returned to Munich as court Kapellmeister to the King. His duty was to conduct the services at the court church, and while there he reorganised the choir, and added to the repertory many fine church works, especially of the early Italian school. He also organised concerts for the choir, the programmes of which included old Italian, old German and modern music, sacred and secular. In the autumn of 1867 he took the organisation and direction of the vocal classes in the king's new school of music, and on Bülow's resignation the whole production department came into his hands, with the title of 'Inspector of the School of Music,' and in 1875 of 'Professor Royal.' During this time he wrote his admirable 'Chorübungen der Münchener Musikschule,' an English edition of which, by A. Spengel, has been published.

When Wüllner succeeded Bülow at the court theatre in 1869, he found himself plunged into personal difficulties of all kinds connected with

the production of Wagner's 'Rheingold'; but his tact and ability surmounted all, and the result was an unqualified success. The 'Rheingold' was followed by the 'Walküre,' one of the most brilliant achievements of the Munich stage, and in 1870 Wüllner was appointed court Kapellmeister in chief. He also succeeded Bülow as conductor of the concerts of the Academy of Music, and carried them on alone till Levi was associated with him in 1872. In 1877 he left Munich,¹ in order to succeed Rietz at Dresden as Kapellmeister of the court theatre, and artist director of the Conservatorium; but after five years he was deprived of his post at the opera, without any reason given; in 1882 he conducted the Lower Rhine Festival at Aix-la-Chapelle, and in 1883-84 the Philharmonic Orchestra in Berlin. On Oct. 1, 1884, he was appointed to succeed Hiller as head of the Cologne Conservatorium and conductor of the Gürzenich concerts there. He was succeeded by Steinbach.

Wüllner's works include — 'Heinrich der Finkler,' cantata for voice and orchestra—first prize at the competition of the Aix-la-Chapelle Liedertafel in 1864; PF. pieces for 2 and 4 hands, and chamber-music; several books of Lieder for single voice; important choral compositions, with and without orchestra, such as masses, motets, Lieder for mixed chorus, a Stabat Mater, a Miserere for double chorus, op. 26; Psalm cxxv. for chorus and orchestra, op. 40, etc.; a new arrangement of Weber's 'Oberon,' the additional recitatives being compiled from materials in the opera (the libretto by F. Grandaur of Munich). In this form 'Oberon' has been put on the stage at several of the great German theatres. His editions of six of Haydn's symphonies (Rieter-Biedermann) must not be overlooked.

His son, (2) LUDWIG (b. Münster, Aug. 19, 1858), studied philology, etc., at Munich, Berlin, and Strassburg, took the Doctor's degree, and became a teacher in the Münster Academy, 1884-87. After two years' study at the Cologne Conservatorium he went on the stage at Meiningen in 1889. In 1895 he adopted the career of a reciter, and in 1896 that of a singer; notwithstanding his many vocal shortcomings, his performances called forth great admiration for their dramatic intensity.

M. F.

WULFSTAN, monk and precentor of St. Swithin's, Winchester, c. 1000. William of Malmesbury ascribes to him a treatise, *De tonorum harmonia*, which has not been rediscovered so far.

E. v. d. s.

WURM, MARIE (b. Southampton, May 18, 1860), the daughter of a musician of that town, who died in 1892. Marie Wurm studied the piano and composition at the Stuttgart Conservatorium, with Franklin Taylor, Mme. Schumann, Joachim Raff and others. She appeared in Schumann's concerto at the Crystal

¹ The University conferred on him the honorary degree of Doctor.

Palace in 1882, and at the Popular Concerts in 1884, in which year she gained the Mendelssohn Scholarship. She gave successful pianoforte recitals in London and in Germany, which country has been her residence for a good many years past. On one of her later visits to England she gave a concert entirely consisting of music extemporised on themes given by the audience. She has composed a piano concerto and an orchestral overture; a string quartet, a violoncello sonata, many pianoforte pieces, etc.

For her two younger sisters see VERNE. M.

WYDOW, ROBERT, Mus.B. (WEDOW, WIDOWS, WYDEWE, etc., and latinised into VIDUUS) (*d.* Oct. 4, 1505). According to Leland he was born at Thaxted, in Essex. He was educated by his stepfather, the master and proprietor of a school at Thaxted, who ultimately sent him to Oxford to complete his studies. While there he distinguished himself in literature and the arts, especially in poetry and music, finally taking the degree of Bachelor of Music. His is the first recorded degree of the kind at Oxford; he was incorporated at Cambridge in the same degree in 1502. After his stepfather's death Robert Wydow succeeded him as master of the school, and is said to have turned out several illustrious pupils. Among his patrons, Wydow numbered Edward IV., who appointed him to one of the two chantries in the low chapel under le Croft in Christ Church, Canterbury, on Jan. 12, 1474.¹ As Edward had some connexion with Thaxted, being lord of a third of the manor, it is not unreasonable to suppose that it was owing to that monarch's good offices that he obtained the presentation to the vicarage of Thaxted on Dec. 22, 1481. This living, which was then worth about £28, Wydow resigned on Oct. 1, 1489. It was probably at this period that he travelled in France and Italy for the purposes of study, and added to those stores of learning which gained him the appellation of 'Grammaticus'; and it was perhaps on his return from the Continent that he was made 'Penitentiarius' in St. Paul's Cathedral, if, as is generally believed, he really held that post. On Nov. 19, 1493, he was collated rector of Chalfont St. Giles, in Buckinghamshire, a place afterwards associated with the more illustrious names of John Milton and William Penn. After enjoying that living for rather more than three years, he was installed by proxy Canon and Confrater of Comba II., in Wells Cathedral, on Mar. 27, 1497; and a few months later (Sept. 10) was appointed Succentor in the place of Henry ABERNODON. On Sept. 21, 1499, he obtained the vicarage of Chew Magna, in Somerset, which he held till his death. In 1499-1500 he was made one of the residentiary canons, and on May 25 in the latter year was installed Sub-Dean and Prebendary of Hol-

combe Burnell, in Devonshire. About the same time Robert Wydow was made deputy for the transaction of affairs between the Pope and the Cathedral and Chapter of Wells; he was also granted the advowson of Wookey, in Somerset, the rectory and vicarage of which were together worth about £15. He also held about this time the offices of 'Scrutator Domorum' and Librarian in the Chapter House. On Sept. 21, 1502, Wydow was made Seneschal, and shortly after Auditor, of the Chapter House. On Oct. 1, 1503, he was presented to the perpetual vicarage of Buckland Newton, in Dorset, which is the last event recorded in his life. He was a man of some wealth, if we may judge from his benefactions to the Carthusian Priory of Henton, near Bath, which were so considerable that a Requiem was ordered to be sung for his soul in every house of the Order throughout the kingdom. Edward Lee, Archbishop of York, who in his younger days had met Wydow, called him 'facile princeps' among the poets of his day. Holinshed speaks of him as an 'excellent poet,' and classes him among the celebrities of Henry VII.'s reign. Wydow's chief poetical work was a rhythmical life of Edward the Black Prince, to which Leland refers in these words:

'Contulit Hectoris arguta voce triumphis
Eduerdum Viduus doctissimus ille Nigellum
Et facti pretium tulit immortale poeta.'

This work is said to have been written by Wydow at the instigation of his royal patron. He also wrote a book of epigrams. No musical composition by this author is extant. А. Н. Н.

WYLDE, HENRY (*b.* Bushey, Herts, May 22, 1822; *d.* London, Mar. 13, 1890), conductor and composer. Though intended for Holy Orders he had so strong a bent for music that he became organist of Whitchurch, was placed at 16 under Moscheles, and in 1843 became a student, under Cipriani Potter, at the R.A.M., of which he afterwards was appointed one of the professors of harmony. He was organist of St. Anne's, Aldersgate Street, and St. Agnes, Gresham Street, 1844-47, and in 1851 he accumulated the degrees of Mus.B. and Mus.D. at Cambridge. He acted as Juror in the Musical Instrument Section in the International Exhibitions of 1851 and 1862, and in 1863 was elected professor of music at Gresham College, London. In 1852 the NEW PHILHARMONIC SOCIETY (*q.v.*) was founded by Sir Charles Fox, and others, on the advice of Dr. Wylde. In 1858 he assumed the sole responsibility of the undertaking, and conducted its annual series of concerts till 1879. In 1861 Dr. Wylde founded the LONDON ACADEMY OF MUSIC (at first at St. James's Hall) and built St. George's Hall, Langham Place, for its purposes, which was opened in the summer of 1867. Dr. Wylde's musical compositions include a cantata on Milton's 'Paradise Lost' for soli, chorus and

¹ Patent Rolls, 13 Edw. IV. M. 17. Communicated by W. H. G. F.

orchestra, performed by the New Philharmonic Society, May 11, 1853, and May 1, 1854; and a cantata, 'Prayer and Praise,' for the same; selection performed, June 9, 1852; pianoforte concerto in F minor, performed Apr. 14, 1852; pianoforte sonatas; a 'Rhapsodie for piano' (op. 2); 'Fantasia sur un air favori' (op. 6); English songs from Goethe and Schiller; English songs, 'The Sea Nymphs,' vocal duet, etc. Dr. Wyld was also the author of *The Science of Music* (1865); *Music in its Art Mysteries* (1867); *Modern Counterpoint* (1873); *Occult Principles of Music* (1881); *Music as an Educator* (1882); *Evolution of the Beautiful in Sound* (1887). He died in London and was buried in Kensal Green Cemetery. (*Brit. Mus. Biog.*, etc.) A. C.

WYNGAERDE (VINEA), ANTONIUS, of Utrecht (d. Antwerp, 1499), a composer living at Antwerp, mentioned by Glarean, who reproduces his *Ego dormio*, 4 v., which appears also in Tschudi's MS., No. 463 in the library of St. Gall (Q.-L.).

WYNKYND DE WORDE (London, 15th-16th cent.), the first English music-printer. See PRINTING OF MUSIC.

WYNNE, JOHN, a musician and a music-seller, living at Cambridge at the middle of the 18th century. His address was in Regent's Walk, and his name is found on London imprints as selling particular musical works. His compositions comprise 'Ten English songs set to music,' published by John Johnson, and dated 1754, before which, circa 1740-45, had been an earlier set of 'Twelve English Songs' issued by John Simpson. F. K.

WYNNE, (1) SARAH EDITH (called Eos Cymru — 'the Welsh Nightingale') (b. Holywell, Flintshire, Mar. 11, 1842; d. London, Jan. 24, 1897), was taught singing by Mrs. Scarisbrick of Liverpool, and by Pinsuti, at the R.A.M., where she was Westmorland Scholar, 1863-64.

She was subsequently taught by Romani and Vannuccini at Florence. She first sang in the provinces, and made her début in London (St. James's Hall) at John Thomas's Welsh concert, July 4, 1862. She sang with great success in the following year at Henry Leslie's Welsh concert, Feb. 4; at the Crystal Palace, Apr. 25; at Thomas's concert in his cantata 'Llewellyn,' June 29; and as the heroine on the production of Macfarren's 'Jessy Lea,' at the Gallery of Illustration, Nov. 2. She played Lady Mortimer at Drury Lane on the revival of *King Henry IV.* in 1864. She played a few times in English opera at the Crystal Palace in 1869-71 as Arline, Maritana, Lady Edith (in Randegger's 'Rival Beauties'); but she was chiefly noted for her singing of songs and ballads and especially in her own Welsh songs; she was remarkable alike for her passionate expression and the simplicity of her pathos. She sang in the United States with the Pateys, Cummings and Santley, in 1871-72, and at the Boston Festival of 1874. After her marriage with Aviet Agabeg, at the Savoy Chapel, Nov. 16, 1875, she sang less frequently in public, and devoted herself to teaching. Her last appearances were at John Thomas's concert in 1894, and at Aberystwith in 1896.

Her sister (2) KATE (called Llinos Cwynedd — 'the Welsh Linnet') was a favourite contralto singer. She retired in 1877, on her marriage with Harry Matthison of Birmingham. Their daughter is the well-known actress Edith Wynne-Matthison (Mrs. Charles Rann Kennedy). A. C.

WYSSENBACH, RUDOLF, of Zürich, a 16th-century type-cutter (*Formschneider*), music printer and publisher, the compiler of a lute-book in tablature, 1550. Another edition, printed and published by Gessner, appeared at Zürich in 1563. Wyssensbach is mentioned only in the preface of this edition (Q.-L.).

X

XYLOPHONE (Fr. *xylophon*, *claquebois*; Ger. *Strohfiedel* or *Holzharmonika*; Ital. *zilarfona*, *gigelira* or *sticcato*), i.e. Strawfiddle (also known as *Ligneum Psalterium*) is described by Mendel in his *Lexicon* as a very ancient and widespread instrument, found principally among the Russians, Poles and Tartars, consisting of a range of flat pieces of deal or glass,¹ of no settled number, tuned to the scale, arranged on belts of straw, and struck with two small hammers (cf. *STICCADO PASTROLE*). (*PLATE XXIV*. No. 8.)

Its sound was sweet and bell-like, but weak. Mendelssohn wrote, à propos of GUSIKOW's performance upon it:

'With a few sticks, lying on straw and struck with other sticks, he does what is possible only on the most perfect instrument. How from such materials even the small tone produced—more like a Papageno-

fife than anything else—can be obtained, is a mystery to me.'²

Gusikow's Strohfiedel, however, seems to have been an improved kind. It was strong enough to bear the accompaniment of two violins and a violoncello. The Strohfiedel was introduced into the orchestra in Lumbye's 'Traumbildern.'

In its modern form, usually with a compass

from  to  the tone-quality

has changed, being weird and sombre, suggesting the rattle of dry bones (see Saint-Saëns's 'Danse Macabre'), rather than the cheerfulness of bells and chimes. The bars are made of rosewood supported by resonators and are struck with beaters of willow or boxwood. The part is written on one stave in the treble clef and usually at the actual pitch required.

G.; addns. D. J. B. and N. C. G.

² Mendelssohn Family, 1836, Feb. 12.

¹ Burney (*Present State (Ger.)*, vol. II. p. 71) found it at Dresden, and, under the name of *Stroff*, describes it as made with glass, and played on with sticks, 'like the *sticcato*.'

YANIEWICZ, FELIX, see JANIEWICZ.

YANKEE DOODLE. With an obsolete text, 'Yankee Doodle' can hardly be called a national song, but it is still one of the current national airs of the United States. Its vitality has not been impaired by criticism of its musical merits, and will not be as long as there is room in patriotic folk-music for humorous, indeed, burlesque utterances.

As 'Yankee Doodle' the air seems first to have been printed in the first volume of James Aird's 'Selection of Scotch, English, Irish and Foreign Airs,' Glasgow (1782), as Frank Kidson pointed out in his 'Old English Country Dances' (1890). Aird gives this form¹:

Slightly different it appeared as 'Yankee Doodle' in Arnold's opera 'Two to One' (1784), and was sung there by John Edwin in the character of Dicky Ditto to the words 'Adzooks, old Crusty, why so rusty?' Again slightly different is the version in Charles Dibdin's 'Musical Tour' (1788), to the words 'I sing Ulysses and those chiefs,' and entitled 'The return of Ulysses to Ithaca.' This burlesque song Dibdin is said to have first introduced in his 'Reasonable Animals' (1780).

The question of the earliest American appearance in print of 'Yankee Doodle' is still open. In Moore's 'Songs and Ballads of the American Revolution' (1855), it is claimed that 'The Recess' appeared with this air as a music-sheet in 1779, but no such musical broadside has been found; and the history of music-printing in America renders it doubtful if the air found its way into print here before forming an ingredient to Benjamin Carr's medley, 'Federal Overture,' composed 1794 and published 1795. The earliest printed American version extant is that published by G. Willig, Philadelphia (1798), together with the President's March ('Hail, Columbia') in the following form, to the words 'Columbians all the present hour'.

After this, 'Yankee Doodle' became frequent in print, but, curiously enough, for decades nearly all versions differed slightly, and they differ also more or less from two early American MS. versions, the one dated 1790 (in private

hands, the other, possibly written as early as 1775, at the Boston Public Library. The form now used officially is the one given in Sousa's 'National . . . Airs' (1890), and the smaller notes in the above example illustrate the differences from the Willig version. O. G. S.

YATES, WILLIAM, an 18th-century English composer, appeared in London at a concert given by himself in 1764. In Lent 1765, his masque, 'The Choice of Apollo,' was performed. He wrote a number of songs for Vauxhall and Marylebone Gardens, a collection of moral songs or hymns, 6 easy sonatas for the harpsichord, op. 3, etc. (Q.-L.).

YEOMEN OF THE GUARD, THE: or, **THE MERRYMAN AND HIS MAID**, opera in 2 acts; words by W. S. Gilbert; music by Sullivan. Produced Savoy Theatre, Oct. 3, 1888. M.

YON, PIETRO (b. Settimo-Vittone, Italy, Aug. 6, 1886), Italian organist and composer. He studied at the Conservatoires of Milan and Turin; in 1904 he entered the Academy of St. Cecilia, where he studied organ with Renzi, piano with Sgambati and composition with de Sanctis. For two years he served as substitute organist at the Vatican and the Royal Church in Rome. Since 1907 he has been organist and choirmaster of the Church of St. Francis Xavier in New York, and he has won a wide reputation as concert-organist. In 1921 he was made honorary organist of the Basilica of St. Peter, Vatican, Rome. His compositions include a 'Concerto Gregoriano' for organ and orchestra; masses; choral music; many organ pieces, pianoforte pieces and songs. W. S. S.

YONGE (YOUNG, YONG), NICHOLAS, (b. Lewes, Sussex; d. Cornhill, London, Oct. 1619), the compiler of *MUSICA TRANSALPINA*, is probably identical with a Nicholas Young who was a singing-man at St. Paul's Cathedral in the time of Elizabeth. Burney, misled by a passage in the Dedication to the first book of 'Musica Transalpina,' a collection of 57 madrigals, translated and published in 1588, says that he was an Italian merchant, whereas all that Yonge says is:

'Since I first began to keepe house in this citie, a great number of Gentlemen and Merchants of good accompt (as well of this realme as of forreine nations) have taken in good part such entertainment of

¹ A full discussion of all possible sources of this song and summary of the bibliography relating thereto appeared in the second edition of this Dictionary. The reader is referred to *Report on 'The Star-spangled Banner,' 'Hail, Columbia,' 'America,' 'Yankee Doodle,'* by O. G. Sonneck (Library of Congress Publication, Washington, 1909).

pleasure, as my poore abilitie was able to afford them, both by the exercise of Musicke daily used in my house, and by furnishing them with Bookes of that kind yeerely sent me out of Italy and other places.

Yonge's mother's maiden name was Bray. During the greater part of his life he lived in the parish of St. Michael, Cornhill: he had nine children, most of whom survived him and settled in the same parish, where his descendants remained until the 18th century, when some of them are found in that of St. James, Clerkenwell. His wife's name was Jane, and he was probably married about 1584. The title-page of the first Book of *MUSICA TRANSALPINA* (*q.v.*) has been already given under that heading, that of the second Book of 24 songs (1597) runs as follows:

Musica Transalpina. The Second Booke of Madrigalles, to 5 and 6 Voices: translated out of sundrie Italian Authors, and newly published by Nicholas Yonge. At London Printed by Thomas Este. 1597.

Lists of the contents of both volumes are printed (with many mistakes) in Rimbault's *Bibliotheca Madrigaliana* (1847). Both books (copies of which are in the B.M., R.C.M. and Huth Collections) seem to have been very successful. 'A. B.' printed the words of three of the madrigals in *England's Helicon* (1600), and Dr. Heather, in his portrait in the Bodl. Mus. Sch., is represented holding a volume lettered 'Musica Transalpina.' G. W. Budd began a complete reissue of the collection, but issued only six of the 81 pieces (1843). (*D.N.B.*) The text of the first book was issued in Arber's *English Garner*, vol. iii. Yonge's will (which was proved by his wife on Nov. 12) is dated Oct. 19, 1619, and he was buried at St. Michael's, Cornhill, on the 23rd of the same month.¹

W. B. S.

YORKE TROTTER, THOMAS HENRY, (*b.* Nov. 6, 1854) M.A., D.Mus. Oxon, is principal of the London Academy of Music (Incorporated). He has devised a successful system for the practical education of children in the elements of music (see *EXTEMPOREISATION*). Teachers of this system are trained at Dr. Yorke Trotter's Academy. His principles are embodied in the following publications:

Constructive Harmony; Rhythmic Gradus; Ear Training and Sight Reading; The Making of Musicians (1922); *Music and Mind* (1924).

C.

YORK MUSICAL FESTIVAL (1791-1835). The first festival was in 1791, and they were continued annually till 1803. After that no other festival took place until 1823,² when the performance was revived for the benefit of the York County Hospital, and the Infirmary at Leeds, Sheffield and Hull. The scheme consisted of four sacred concerts, including the 'Messiah' in its entirety, held in the Cathedral on the mornings of Sept. 23 to 25, three secular evening

¹ The information contained in this article is chiefly derived from the Registers of St. Michael's, Cornhill, and the Visitation of London, both published by the Barleian Society.

² See *Description of the Great Musical Festival held in York during Sept. 1823*, by the editor of the 'York Courant', York, 1823.

concerts, and two balls given in the Assembly Rooms. The vocalists were Mme. Catalani (who usurped 'Comfort ye,' 'Every valley,' and introduced 'Non più andrai'), Mrs. Salmon, Misses Stephens, D. Travis and Goodall, sopranos; Knyvett and Buggins, altos; Bellamy, Sherwood and Placci, bass. The band and chorus contained 180 instrumentalists and 285 vocalists; in the former were Cramer and Mori, leaders; Griesbach, Ella, Lindley, Dragonetti, Puzzi, Harper, etc., Greatorex was conductor, Matthew CAMIDGE (who had officiated in 1791) and his son John, Knapton and White, organists. The festival was rendered noteworthy from the receipts being larger than those at any previous meeting, viz. £16,174:16:8. The sum of £7200 was divided among the charities. A long and voluminous account is given of the above in a 4to volume by John Crosse, F.S.A., York, 1825, to which we are indebted for the above information.³

A second festival was held in Sept. 1825, on a similar plan and for the same charities. The band and chorus were increased to 600, and among the vocalists who appeared for the first time were Madame Caradori-Allan, Madame Malibran (then Miss Garcia), Braham, Phillips and De Begnis. The receipts were still larger, viz. £20,876:10s.; but owing to the cost of a concert-hall for the evening concerts, the profits were not in proportion, £1900 only being divided among the charities.

A third festival was held in Sept. 1828. Catalani reappeared, and Miss Paton, Madame Stockhausen and Edward Taylor sang for the first time. Beethoven's symphony in F was a novelty to the audience, and not so successful as the C minor in 1823. It was described in the *Harmonicon* as 'eccentric and very difficult,' and was coldly received. The receipts diminished to £16,769:11:6, and £1400 only was obtained for the charities. Another festival was given in 1835.

A. C.

YOST (JOST), MICHEL (*b.* Paris, c. 1754; *d.* ? there, July 5, 1786), a famous clarinettist, studied under Beer. He appeared regularly as soloist at the Concert Spirituel. He composed a number of concertos, trios, duos and solos, which he simply signed Michel; nearly all remained in MS. (*Q.-L.*).

YOULL, HENRY (*f.* 1608), composer. Nothing is known of the personal history of this musician except what can be gathered from the dedication of his set of Canzonets to the four sons of Edward Bacon, who seems to have been his patron. On the title-page he is called a 'Practitioner in the Art of Musicke.' This volume of 'Canzonets to three voyces' was published in 1608. It is reprinted in *ENG. MADR. SCH.*, vol. xxviii. Copies are extremely scarce; one is in the British Museum, one in

³ A satire on his somewhat bombastic style was published in London the same year, by an anonymous writer 'Outis.'

the Cambridge University Library, and the bass partbook is in the Bodleian Library. It contains some very attractive pieces, notably 'Pipe, shepherds, pipe,' a setting of Ben Jonson's 'Slow, slow, fresh fount,' and Sidney's 'Only joy, now here you are.' There are six ballets at the end of the book which are as good as anything of the kind for three voices.

E. H. F.

YOUNG, a family of musicians. (1) ANTHONY was organist of St. Clement Danes in 1707, and at another period of St. Catherine Cree, near the Tower. According to de Lafontaine's *The King's Musick*, two boys, named Anthony Young and John Reading, left the Chapel Royal, on the breaking of their voices, at Michaelmas 1700; one of these is evidently the above Anthony Young. It is even possible that he may have been the son of William YOUNG who was a violinist in the King's private band.

Anthony Young composed songs, one being an excellent setting of 'Send home my long-strayed eyes,' which, along with Leveridge's tune, was published as half-sheet music about 1720.

He has been foolishly credited with being the composer of 'God save the King.'¹ He was probably the father of (2) CHARLES, organist of All Hallows, Barking, and (according to Dr. Burney) was father of the Misses Young, three singers in great repute about 1735-40. Hawkins, probably incorrectly, names Charles Young as their father.

They were (3) CECILIA (b. 1711; d. Oct. 6, 1789), the eldest, who married Dr. Arne in 1736. The second daughter, (4) ISABELLA, became the wife of J. F. Lampe, and (5) ESTHER married — Jones, probably John Jones, organist of the Temple Church in 1749. (6) MARY (b. circa 1745; d. Sept. 20, 1799) may have been of the family. She married, in 1766, F. H. Barthélemon, and was a soprano vocalist, who appeared in opera at Drury Lane and Covent Garden.

F. K.

YOUNG, (1) JOHN, a music-publisher and a 'musical instrument seller' at the sign of the 'Dolphin and Crown,' at the west end of St. Paul's Church Yard. The earliest notice the present writer has found regarding him is an advertisement in the *London Gazette* of 1698, of 'The Compleat Tutor to the Violin, . . . by John Bannister, published by J. Young, at the Dolphin and Crown.'

He also published 'A Choice Collection of Ayres,' by Blow, Piggot, Clarke, Barrett and Croft, 1700 (B.M.). 'The Flute Master Compleat; Improved, or the Gentleman's Diversion,' 1706 (Bodl.). Later works are mostly issued with the names of Walsh & Hare, as well as Young on the imprint, as Jer. Clarke's 'Choice Lessons for the Harpsichord or

Spinett,' 1711, Simpson's 'Compendium,' 'The Third Volume of the Dancing Master,' c. 1728, etc. etc.; also many half-sheet songs. It is probable that he gave up business or died shortly after 1730. He had a son, (2) TALBOT, who helped, with Greene and others, to establish a musical society, at first held at his father's house and afterwards at the Queen Head Tavern, and then at the Castle Tavern, both in Paternoster Row. He was a clever performer on the violin, and a witty catch was made upon father and son: it is printed in Henry Playford's 'Second Book of the Pleasant Musical Companion,' 1701, as follows:

'A CATCH UPON MR. YOUNG AND HIS SON.'—*Dr. Cæsar*.
 'You scrapers that want a good fiddle well strung,
 You should go to the man that is old while he's Young.
 But if this same fiddle you fain would play hold,
 You must go to his son, who'll be Young when he's old.
 There's old Young and young Young, both men of renown.
 Old sells, and young plays the best fiddle in town.
 Young and old live together and may they live long,
 Young to play an old fiddle, Old to sell a new song.'

In de Lafontaine's *The King's Musick*, is a record of a John Young being appointed musician in ordinary to the King, for the viola da gamba, on May 23, 1673, in place of one, Paul Bridges. It is quite probable that John Young, the music-seller, may be this same person.

F. K.

YOUNG, NICHOLAS, see YONGE.

YOUNG, THOMAS (b. Canterbury, 1809; d. Walworth, Aug. 12, 1872), received his musical education there, and from 1831-36 was first principal alto singer at the cathedral. In 1836 he became deputy and afterwards lay vicar at Westminster Abbey, and Mar. 3, 1848, first also at the Temple. This last post he held until his death, with the exception of a year's interval, when he married the widow of a Canterbury alderman and went into business without success. Young was an excellent solo singer, and was successor in public favour to Knyvett and Machin, being the last male alto soloist of eminence. As such he was frequently heard at the Ancient and Sacred Harmonic Concerts. With the latter Society he sang for a period of ten years; he first appeared Nov. 14, 1837, in the Dettingen Te Deum and Mozart's 'Twelfth Mass,' etc. He took the parts of Hamor and Joad on the respective revivals of 'Jephthah' and 'Athaliah.' He also sang in the revival of Purcell's *Jubilate* and in various anthems and services.

A. C.

YOUNG, WILLIAM (d. 1672), a skilled performer on the viol and violin; flourishing in the middle of the 17th century. He is said to have been in the service as domestic musician of the Count of Innsbruck. While there he composed and published a set of twenty-one sonatas for three violins, viola and bass. The title of the work is 'Sonate (21) a 3, 4, 5 voci con allemande, corrante, etc., a 3. Innspruck,

¹ See R. Clark's *Account of the National Anthem*, 1822, and Dr. Cummings's work on the same subject, 1902.

1653,' folio, dedicated to the Archduke Ferdinand and Karl. A copy of this rare work is stated to be in the library of the University of Upsala, and is cited by Walther. Other detached pieces by William Young occur in Playford's 'Musical Banquet,' 1651, 'Musick's Recreation on the Lyra Viol,' 1652, and elsewhere in the Playford publications. Also there are some pieces in manuscript in the Music School collection at the Bodleian. On Playford's 'Treasury of Musick,' 1669, is advertised 'Mr. Will Young, his Fantazies for viols, of three parts.' This may be either a reprint of, or the original Innsbruck sonatas.

It is probable that Young returned to England about 1660, for in that year a William Young entered the King's private band as a flute-player.¹ In 1661 he was, in addition, appointed to the violin. In this early stage of his royal appointments he appears to have roused some ill feeling, for Nicholas Lanier, the master of His Majesty's Musick, was ordered to allow him and other musicians to use the practice chamber from which he had been excluded.

He was among the best players of the band, and on some occasions was selected to attend His Majesty, with certain violinists. In 1664 he was allowed, with others of the band, to attend at the theatre when Mr. Killigrew desired it. On his death Nicholas Staggins obtained his place.

He may have been the father of John Young, the music-publisher, and of Anthony Young. F. K.

YOUNG PEOPLE'S SYMPHONY CONCERTS, see NEW YORK.

YRADIER, SEBASTIAN (*d.* Vittoria, Nov. 1865), a successful composer of Spanish songs, some of which it is known were in the hands of Bizet when he composed 'Carmen.' A collection of twenty-five of his most popular songs ('25 Chants avec paroles françaises') was issued in Paris shortly after his death (*Baker*). M.

YRIARTE, DON TOMAS DE (*b.* Teneriffe, Sept. 18, 1750; *d.* Santa Maria, near Cadiz, Sept. 17, 1791), was secretary of the archives in Madrid. He wrote poems under the anagram Tirso Imareta, and composed symphonies, quartets, songs and a 'monodrama,' 'Guzman el bueno.' His chief work is *La Musica*, a Spanish poem on music published in 1779. It is in irregular metre, and is divided into five cantos. The first two deal with elements such as the notes, scales and ornaments, and with musical expression in its various branches. In the third, which treats of church music, the writer distinguishes three principal species—(1) the Gregorian, having no measure of time in its five varieties; (2) the Mixed or Florid, measured by common or triple time, admitting of various cadences and ornaments; and (3)

the Organic, to some extent a combination of the two former, in which both voices and instruments were employed. Here the writer takes occasion to praise the Spanish composers Patiño, Roldan, Garcia, Viana, Guerrero, Victoria, Ruiz, Morales, Duron, Lites, San Juan and Nebra. The canto closes with a description of the examinations for admission to the Royal Chapel, from which it appears that candidates were required to show proficiency on the organ, violin, flute and hautboy, and to play sonatas at sight. The fourth canto treats of theatrical music: the shade of Jommelli appears, and after assigning to Spain the palm for pure vocal music, to Germany and Bohemia for instrumental, to France for science, and to Italy for the opera, gives a lengthened description of the orchestra, of recitative, 'greater than declamation, less than song,' which he limits to the compass of an octave, and of the aria with its various graces, the rondeau, cavatina, duos, trios, quartets, etc. Among dramatic authors the palm is assigned to Gluck, whose rivalry with Sacchini and Piccini was distracting the musical world. The fifth and last canto, which treats of chamber music, contains a long eulogy of Haydn, who is said to have enjoyed special appreciation in Madrid, where prizes were given for the best interpretations of his compositions. The poem concludes with a wish for the establishment of an academy of music. It was translated into French, German and Italian; and an English version by John Belfour, who acknowledges the assistance of Dr. Burney, Dr. Calcott, and S. Wesley, was published in 1807. E. J. P.

YSAÏE, (1) EUGÈNE (*b.* Liège, July 16, 1858), famous violinist and conductor.

Ysaÿe's early lessons were given him by his father, Nicolas Ysaÿe, at the age of five. He then joined the Conservatoire of his native town and studied under Rodolphe Massart (violin) and Michel Dupuis (harmony), gaining a second prize with Ovide Musin in 1867. Two years earlier he had already made his first public appearance at a small concert given at Montegnée, near Liège, but it cannot be said that his performances as a youth attracted much attention. Then came two pieces of good fortune—the one in 1873 when he had the opportunity of studying under Wieniawski, the other in 1876 when Vieuxtemps, after hearing him play one of his concertos at Antwerp, and being much impressed by the talent displayed, used his influence to obtain a special subsidy from the Government which enabled him to study for another three years. During that period he received many private lessons from Vieuxtemps himself, who held Ysaÿe at all times in the highest esteem. This was evidenced in many ways, especially in his later days, when, being in Algiers and seeking to recuperate after serious illness, he expressed the desire (impossible

¹ De Lafontaine, *The King's Musick*.

of realisation) that Ysaÿe should be sent for to play some of his compositions to him, and was frequently heard to say that he was 'haunted by the *chanterelle* of Ysaÿe.'¹

In 1879 Ysaÿe played at the concerts given by Pauline Lucca at Cologne and Aix-la-Chapelle, and made the acquaintance of Ferdinand Hiller, who introduced him to Joachim, before whom he played *Vieuxtemps's* fourth concerto to Hiller's accompaniment. Joachim listened in silence, but said, just before leaving, 'I never heard the violin played like that before.' The remark was ambiguous, but whether tinged with praise or blame, it serves to illustrate what was the salient feature of the art of Ysaÿe—viz. his originality in technique and in the conception and treatment of music.

Hiller took great interest in the young artist, and after obtaining for him an engagement in Oct. 1879, to play Mendelssohn's concerto at a festival of the Gürzenich concerts at Cologne, advised him to go to Frankfurt, where he enjoyed some fruitful intercourse with Joachim Raff, and played, with Madame Schumann, Beethoven's C minor sonata. In 1880 he was appointed leader of Bille's orchestra in Berlin, an engagement which lasted a year, in the course of which he gained his first experiences as a conductor, after which (in 1881) he toured in Norway with Ole Bull's son as manager, and (in 1883) played at a concert of the Paris Conservatoire under Colonne. In 1886 he accepted the post of violin professor at the Brussels Conservatoire, holding the appointment till 1898. It was at this period that he founded the 'Ysaÿe Orchestral Concerts' at Brussels, of which he was not only the conductor but also entrepreneur and manager, achieving success, both artistic and financial, in spite of the absence of either guarantee fund or subscription list.

His subsequent tours were very numerous, some in early days, of an adventurous nature. He met with enemies as well as friends—that was inevitable with his original style of playing—and the musical world only gradually awakened to an appreciation of his merits. He first succeeded in impressing the Berlin critics, in Mar. 1899, by a striking performance of Bach's concerto in E at a Philharmonic concert conducted by Nikisch. His free reading of Bach was recognised as containing elements of beauty which attracted even audiences accustomed to the more austere rendering of German artists. The same may be said of his moving interpretation of Beethoven's great concerto in D, which has won him admirers in every musical centre in Europe.

He first visited America in 1894 and toured there subsequently with great success, declining an invitation, however, to succeed Seidl as conductor of the New York Philharmonic in

1898. In England his first appearance was in 1889 (in Beethoven's concerto) at a Philharmonic concert. In the autumn of that year he appeared at the Popular Concerts for the first time, and in 1896 gave three concerts of his own (one orchestral), and another in 1899, etc. In Feb. 1900 he led quartets at the Popular Concerts (with Inwards, Gibson and Ludwig), and the same year played trios in Queen's Hall (with Busoni and Becker). In 1901 he brought from Brussels his own quartet (Marchot, Van Hout, and J. Jacob) and introduced several modern chamber works to London audiences. Though the virtuoso element in his playing tended to undue prominence of the first violin part in quartets, his readings of the greater works of the chamber music repertory never failed to reveal a musical personality of remarkable interest. Subsequently he gave many series of recitals and sonata concerts at Queen's Hall with Pugno and others.

In Paris, where he had an enthusiastic following, he found an audience for modern sonatas, mostly written by composers of the French and Belgian school. César Franck's only sonata, which was composed for and dedicated to him, he may be said to have popularised, and he also won acceptance for the sonata written by his compatriot, Guillaume Lekeu. His repertory was therefore very wide in range, though including less of the compositions of the neo-Russian school than that of most modern violinists. A late addition to his achievements was his performance of the concerto of Brahms in Oct. 1909, of which he gave a strongly individual interpretation. An appreciation of his style would be incomplete without mention of his considerable use of tempo rubato; and it should be also mentioned that, though in the main fiery and impulsive, his playing at its best was kept well under control, as evidenced by his treatment of the vibrato, of which he made constant use, yet would play occasionally passages entirely without it, producing what he himself has called a 'white tone.'

Until 1914, when the war made Ysaÿe an exile, Brussels remained his headquarters, where he was the centre of a devoted circle of admirers and carried on his work, teaching and conducting (see VIOLIN-PLAYING). He subsequently went to America and accepted (1918) the conductorship of the Cincinnati Orchestra.

He has played successively upon a J. B. Guadagnini violin, a Stradivari of large dimensions and late date, and an exceptionally fine J. Guarneri del Gesù, which has been for some years past his solo instrument, the Stradivari being kept in reserve for contingencies. The latter, unfortunately, he no longer possesses, as it was stolen from the artists' room of a concert hall in St. Petersburg in 1908. He is the owner,

¹ Radoux's *Life of Vieuxtemps*.

it may be added, of a fine collection of French violins.

He has composed many concertos for violin, which remain in MS., and has published some smaller pieces for violin solo, including 3 mazurkas, op. 11, and a 'Poème élégiaque.'

Ysaÿe has received many orders and decorations, including that of the Légion d'honneur.

W. W. C.

His brother, (2) THÉOPHILE (b. Verviers, 1865; d. Nice, Mar. 24, 1918), studied at the Conservatoire of Liège, at Berlin under Kullak, and in Paris with César Franck. He attained considerable skill as a pianist, and made a successful first appearance in London at a concert of his brother's in the spring of 1896. At later dates he appeared here in sonata programmes with his brother. His compositions include a 'Suite Wallonne,' a concerto for piano, a symphonic poem, a fantasia, etc., and a symphony (No. 1) in F minor, first performed at Brussels in Nov. 1904, was played in London at one of the concerts organised in June 1905 for the Ostend Kursaal band.

M.

YSORE (ISORE), G., an early 16th-century composer, probably French. He wrote chansons, of which 5 were published in a collection by Attaignant, 1529, and later editions; one in Gardano's collection, 1559; and one in Arcadelt's 'Madrigali,' 3 v., 1542 (Q.-L.).

YSSANDON, JEAN (b. Lesart, Ariège, 16th cent.), lived at Avignon in the palace of Cardinal d'Armagnac. He wrote *Traité de la musique pratique, divisé en deux parties*, etc., 1582; Le Roy et Rob. Ballard (Q.-L.).

YUSUPOV, NICOLAI BORISOVICH (PRINCE), (also YOUSOUPOFF, JUSUPOF, JOUSSOUPOW, etc.) (b. St. Petersburg, 1827; d. Baden-Baden, Aug. 3, 1891), a Russian musical dilettante. He studied the violin with Vieuxtemps, and maintained an orchestra in his palace. He was the author of the monograph on the violin entitled *Luthomonographie historique et raisonnée* (first edition, Frankfurt-on-Main, 1856 (printed at Munich); fifth edition, Paris, Bonhoure, n.d.), a well-meaning, but faulty essay, dedicated to de Bériot, illustrated with full-sized drawings of instruments, which are, perhaps, the most valuable part of the work. He also projected a work entitled *Histoire de la musique et de son avenir en Russie*, of which the first part, *Musique sacrée suivi d'un choix de morceaux de chant d'Eglise* (Paris, 1862), alone appeared. He composed a violin concerto, and a programme symphony with a violin solo entitled 'Gonzalvo de Cordova.' In 1863 he published a systematic catalogue of the books contained in the Imperial Library, St. Petersburg. His *Analyse comparée des compositions des violinistes contemporains*, announced for publication in 1856, never appeared. De Bériot wrote a set of six violin duets on motifs taken from Prince Yusupov's *Ballet d'Espagne*. The title-page of the later editions of his *Luthomonographie* announces him as Maître compositeur de la Société Philharmonique de Bologne, et Membre honoraire de l'Académie Philharmonique de St. Cécile à Rome. (Riemann; Fétis, *Biog. des Mus.*)

E. H.-A.

ZACCONI, LUDOVICO (*b.* Pesaro, June 11, 1555; *d.* Mar. 23, 1627), one of the most learned musical theorists of the early Italian school. He spent the greater part of his life at Venice, where he was admitted to the priesthood, received the tonsure as a monk of the Order of S. Augustine, and officiated as maestro di cappella in the great church belonging to the Order. In 1592 he was in the service of Wilhelm, Duke of Bavaria, as 'musico,' and in 1593 he was invited to Vienna by the Archduke Charles, who made him his Kapellmeister some years later. In 1619 he returned to Venice, and devoted himself to the completion of his great theoretical work, the first portion of which was published before his departure to Vienna.

The work on which Zacconi's fame is based is entitled *Prattica di musica utile et necessaria si al compositore . . . si anco al cantore*, and is dedicated to Guglielmo Conte Palatino del Reno, Duca dell' alta e bassa Baviera, etc. The first part was published at Venice in 1592, and reprinted in 1596. The second part, also printed at Venice, first appeared in 1619. The contents of the work are divided into four books, wherein the treatment of consonant and dissonant progressions, the complications of mode, time and prolation, the laws of *cantus fictus*, with many like mysteries, are explained with a degree of lucidity for which we seek in vain in the works of other theoretical writers of the polyphonic period—the *Dodecachordon* of Glareanus and the *Musicae activae Micrologus* of Ornithoparcus alone excepted. It may, indeed, be confidently asserted that we are indebted to these two works, in conjunction with the *Prattica di musica*, for the most valuable information we possess on these subjects—information, in the absence of which Josquin's 'Missa didadi' and portions even of Palestrina's 'Missa l'homme armé,' to say nothing of the enigmatical canons of the earlier Flemish schools, would be quite undecipherable.

Lib. I. of the *Prattica di musica* is subdivided into 80 chapters, 23 of which are occupied with dissertations on the origin and history of music, interspersed with definitions, and other introductory matter, of no great practical utility. Cap. xxiv. treats of the 'Harmonic Hand'; Cap. xxv. of the figures used in notation; Cap. xxvi. of the stave of five lines; and Cap. xxvii. of the clefs, of which several forms are given. Caps. xxviii.-xxxiii. treat of measure, time and various forms of rhythmic division (*misura, tatto, e battuta*). Caps. xxxiv.-xxxv. describe the time table, beginning with the *Maxima*, and ending with the *Semicroma*. Caps. xxxvi.-xxxvii. describe the time-signatures (*Segni del Tatto*). Caps.

xxxviii.-xl. treat of solmisation. Caps. xli.-xlii. describe the office of points generally, and especially that of the point of augmentation. Caps. xliii.-xlvi. furnish some very valuable information concerning the ligatures in common use towards the close of the 16th century. Cap. xlvii. treats of rests; xlviii.-xlix. of the B molle and B quadro; l.-li. of the diesis; and lii. of syncope. Caps. liii.-lv. are devoted to the consideration of certain difficulties connected with the matters previously discussed. Caps. lvi.-lvii. treat of canon, and the different ways of singing it. Caps. lviii.-lxvi. contain the rules to be observed by singers, illustrated by many examples and exercises, and throw great light upon the laws of *cantus fictus*, the management of complicated rhythmic combinations and other mysteries. Caps. lxvii.-lxxi. treat of the duties of the maestro di cappella and singers. Caps. lxxii.-lxxiii. describe the villanella and canzonetta, while Caps. lxxiv.-lxxx. state the mutual qualifications of singers and composers.

Lib. II. is divided into 58 chapters, of which the first 5 treat of the different species of mood, time and prolation. Caps. vi.-vii. describe the points of division, alteration and perfection. Cap. viii. corrects some prevalent errors in the matter of perfect time. Caps. ix.-xxxvii. treat of the mutual adaptation of mood, time and prolation, and the different kinds of proportion. In illustration of this subject, Cap. xxxviii. gives, as examples, the Kyrie, Christe, second Kyrie, the beginning of the Gloria, the Osanna and the Agnus Dei, of Palestrina's 'Missa l'homme armé,' with full directions as to the mode of their performance. Aided by Zacconi's explanations, Dr. Burney was able to score them.¹ Caps. xxxix.-lviii. bring the second book to an end, with the continuation of the same subject.

Lib. III. consists of 77 chapters, treating of the different kinds of proportion.

Lib. IV. is divided into 56 chapters, of which the first 37 treat of the twelve modes. Of these Zacconi, in common with all the great theoretical writers of the polyphonic school, admits the use of 6 Authentic and 6 Plagal forms, and no more; and, not content with expunging the names of the Locrian and Hypo-locrian modes from his list, he expunges even their numbers, describing the Ionian mode as Tuono XI., and the Hypoionian as Tuono XII.² Caps. xxxviii.-xlvi. treat of instrumental music, as practised during the latter half of the 16th century, and are especially valuable as describing the compass and manner of using the various orchestral instruments as played by

¹ See Dr. Burney's 'Extracts,' B.M. Add. MSS. 11,581.

² See Vol. III. p. 482.

Peri, Monteverdi and their immediate successors, in their early essays in opera and oratorio. Caps. xlvii.-lv. treat of the tuning of musical instruments; and the concluding chapter, lvi., furnishes us with a table, exhibiting on a great staff of eleven lines, the compass of the instruments most commonly used at the time the book was written. We subjoin the compass of each instrument, on an ordinary staff, and translated into modern notation :

Cornetti Bianchi e Negri. Violini.¹ Pifari.

The foregoing synopsis gives but a slight indication of the value of the *Prattica di musica*, which supplies information on every important subject connected with the music of the 16th century, information in many cases obtainable from no other source. The work is now extremely scarce and costly; complete copies will, however, be found in the British Museum and the R.C.M. (For continental copies see Q.-L.)

W. S. R.

BIBL.—F. VATELLI, *Un musicista pesarese nel secolo XVI* (1905); idem, *Notizie su la vita e le opere di L. Zaccari* (1912); H. KRETZSCHMAR, *L. Zaccari's Leben auf Grund seiner Autobiographie* (1910).

ZACHARIA (ZACCARIA), CESARE DE, of Cremona, lived c. 1590 at Munich. In 1594 he signs from 'Schera' (Scheer) on the Danube, when he was probably at the court of Prince Henry of Fürstenberg. He composed canzonette, 4 v. (1590); patrocium musices,

hymns, psalms, etc., 1594; hymns, 5 v., 1594; and fauxbourdons, litanies, etc., in collective volumes (Q.-L.).

ZACHAU⁵ (ZACHOW), FRIEDRICH WILHELM (b. Leipzig, Nov. 19, 1663; d. Halle, Aug. 14, 1712), Handel's master. His father was *Stadtmusikus* in Leipzig. Under his direction Zachau learned to play on all the instruments then in general use, including violin, hautboy, harpsichord and organ, devoting his chief attention to the last two, on which he attained great proficiency. When about 10 years old the family removed to Eilenburg, between Halle and Leipzig, where he continued his studies. In 1684 he was elected organist of Liebfrauenkirche in Halle.

Here it was, if Mainwaring's account is to be trusted, that Handel was first taken to Zachau for instruction in music 'while he was yet under 7 years of age'; that is to say, some time before the end of 1692 (Chrysander places the event a little later). The circumstances which led to Handel's being placed under Zachau have already been narrated in detail and are too well known to need repetition (see HANDEL). There can be no doubt that Zachau took great interest in his pupil, who, Mainwaring tells us, 'pleased him so much that he never thought he could do enough for him.' That the child was placed under an excellent and thoroughly conscientious teacher is indeed conclusively proved, both by Mainwaring and Coxe.⁶ The former says :

'Zachau had a large collection of Italian as well as German music. He showed his pupil the different styles of different nations; the excellences and defects of each particular author; and, that he might equally advance in the practical part he frequently gave him subjects to work, and made him copy, and play, and compose in his stead. And Zachau was glad of an assistant who, by his uncommon talents, was capable of supplying his place whenever he was inclined to be absent. It may seem strange to talk of an assistant at seven years of age. But it will appear much stranger that by the time he was nine he began to compose the Church Service for voices and instruments, and from that time actually did compose a service every week for three years successively.'

And in confirmation of this account, Coxe describes a volume, formerly in the possession of Lady Rivers, dated 1698, signed G. F. H., and filled with transcripts, in Handel's handwriting, of airs, fugues, choruses and other works, by Zachau, Froberger, Krieger, Kerl, Heinrich Albert, Ebner, Adam Strungk and other composers of the 17th century. (See *Leichtentritt*, p. 28.)

Handel always spoke of his old master with the deepest respect; visited him at Halle for the last time in 1710; and after his death sent 'frequent remittances' to his widow. These tokens of esteem did not, however, preserve the

¹ It will be seen that the violin is here treated in the First position only.

² This note is omitted in the B.M. copy.

³ The tuning of the tenor and bass viols differs materially from the usual form.

⁴ The viola clef is wanting in the original.

⁵ Mainwaring has Zackaw; Schoelcher, Sackau.

⁶ *Anecdotes of George Frederic Handel and John Christopher Smith*, by the Rev. W. Coxe. (London, 1799.)

memory of Zachau from a cruel aspersion, which originated in this wise. A certain Johann Christoph LEPORIN (*q.v.*), organist of the Domkirche zur Moritzburg at Halle, was dismissed from his office in 1702 on account of his dissolute life and neglect of duty. Handel, then 17 years of age, was chosen to supply his place. After Handel's death his biographers attributed Leporin's misdeeds to Zachau, accusing him of irregularities of which he was wholly innocent. Chrysander traces the libel to its source and proves it to be unfounded.

The Berlin Library possesses a large collection of Zachau's compositions, consisting principally of MS. church cantatas and pieces for the organ. Some fragments were printed by Chrysander and v. Winterfeld. They are not works of genius, but their style is thoroughly musician-like, and is marked both by good taste and earnestness of purpose. A complete edition of the works of Zachau was brought out in vols. xxi. and xxii. of the *D.D.T.*, edited by Max Seiffert. An interesting Mass, on the theme 'Christ lag in Todesbanden,' is assigned to 'Nikolaus Zachau' in the copy in the Berlin Library. It is accepted as F. W. Zachau's by Seiffert, but its authorship is doubted in *Q.-L.*

W. S. R.; rev. S. G.

ZACHEREWITSCH, MICHAEL (*b.* Ostroff, Russia, Aug. 26, 1879), violinist.

At the age of 15 he made an extraordinarily successful début at Odessa with Tchaikovsky, who conducted his own concerto. As a consequence the composer got up a subscription to send Zacherewitsch to Prague, where he studied for nine years under Ševčík. He had also the advantage of a few lessons from Ysaÿe. In 1893 he played at Amsterdam under Mengelberg, and in 1903 gave his first recital in London, after which he toured the English provinces. He returned in 1909 and frequently later, and played with success, displaying considerable breadth of style.

W. W. C.

ZAÏDE, operetta in 2 acts; text by Schachtner, probably from the French; music by Mozart, 1779 or 1780. It does not appear to have been produced till given at Frankfort in 1866. G.

ZAIRE, opera in 3 acts; words by Romani; music by Bellini. Produced Parma, May 16, 1829. G.

ZAJAL, see **SONG**, subsection **SPAIN**; **VILLANCO**.

ŽAK, see **SHACK**.

ZAMBRA, an ancient dance of the Spanish Moors, danced with clasped hands to music of scabebas (Moorish flutes) and dulzainas (a name given to so many different instruments that its application here is doubtful), but probably a kind of oboe is meant.

H. V. H.

ZAMPA, OU LA FIANCÉE DE MARBRE (The Marble Bride), opéra-comique in 3 acts; libretto by Melesville, music by Hérold. Produced Opéra-Comique, Paris, May 3, 1831; in

Italian, King's Theatre (with a new finale to the third act, by Hummel),¹ Apr. 19, 1833; in French, St. James's, Jan. 16, 1850; in English, Covent Garden, Apr. 19, 1833. G.

ZAMPOGNA (CALABRIAN BAGPIPE), see **BAGPIPE**.

ZAMR, an Arab pipe with a conical tube, spreading bell and double reed. In most Mohammedan countries it is found under somewhat similar names: it is the prototype of the shawm and oboe. (*PLATE LXXV*, No. 10. See **PIPES**, **EVOLUTION OF**; subsection **DOUBLE REED**.) F. W. G.

ZANDONAI, RICCARDO (*b.* Sacco, Trentino, May 28, 1833), Italian composer, studied at first with Gianferrari at Roveredo. In 1899 he went to Pesaro to complete his musical education at the Liceo, which had then Mascagni as its director. Zandonai was given the diploma of composition in 1902. Boito, who met him in Milan, was struck by his early compositions and introduced him to the publisher Ricordi, who commissioned an opera. Zandonai wrote then his first work for the theatre, 'Il grillo sul farolare' (The Cricket on the Hearth), which was produced successfully at Turin in 1908 and later at Genoa and Nice. More clamorous was the success of his second opera, 'Conchita,' first produced at the Dal Verme Theatre in Milan in 1911. 'Melenis,' a tragic opera (1912), and 'La via della Finestra' a comic opera (1919), have not had equal good fortune; but 'Francesca da Rimini' (on the tragedy of D'Annunzio), first given in 1914, holds a foremost place in the modern Italian repertory, and 'Giulietta e Romeo' (Rome, Feb. 14, 1921) has been received with conspicuous favour by Italian audiences. 'I cavalieri di Ekebu' (La Scala, Milan, Mar. 7, 1925) had also a favourable reception.

A prolific composer, Zandonai has written also a Requiem Mass for voices (Rome, 1916); an album of melodies; a 'Serenade' for violoncello and small orchestra (1912); 'Our Father,' for chorus, organ and orchestra (1912); 'Ave Maria,' for voices and small orchestra; and other works. A 'concerto romantico' for violin and orchestra was performed at Rome (1921); a string quartet belongs to his early compositions. In 1919 Zandonai was made an Associate of the Royal Academy of St. Cecilia of Rome.

The best operas of Zandonai show that characteristic flair for the theatre and for a dramatic situation which is so important a qualification for the operatic composer. He possesses, however, a rare skill in writing for the orchestra, and, like most modern Italians, he devotes the utmost care to the relations between word and music, with the result that the effect of the musical phrase is enhanced by the combination. These are qualities the

¹ *Harmonicon*, 1833, p. 115.

nature of which in the theatre cannot be over-estimated. F. B.

ZANDT, MARIE VAN (b. New York, Oct. 8, 1861; d. Cannes, 1920), operatic soprano. Her mother, Mme. Vanzini, a well-known member of the Carl Rosa Company in its early days, was her first vocal teacher, and she also studied with Lamperti. Her début took place at Turin in Jan. 1879, when her Zerlina in 'Don Giovanni' made a highly favourable impression. She was immediately engaged for Her Majesty's, and made her appearance there in May of the same year as Amina in 'La Sonnambula,' being then barely eighteen. Her voice, however, was already well developed and of a pretty quality, if of no great power; while her execution was singularly neat and sure and her acting enhanced in charm by her youth and grace. These were the gifts that made for the success which she won as Mignon at the Opéra-Comique in Mar. 1880, and for the popularity that she enjoyed in Paris during the next five years. So enthusiastic were the French critics over her Mignon, her Rosina, her Dinorah and her Cherubino, that Delibes decided to entrust her with the creation of the heroine in his 'Lakmé,' which she sang for the first time on Apr. 14, 1883. That part she made her own, and her rendering of it has not been surpassed. Her voice did not stand the strain of constant work, and her long stay at the Opéra-Comique was brought to a close in Mar. 1885. She nevertheless continued for several years to tour in concerts and appear as 'guest' at various opera-houses, until her marriage with Prof. Tcherinov in Moscow. H. K.

BIRL.—H. DE CURZON, *Croquis d'artistes* (Paris, 1898).

ZANETTA, OU IL NE FAUT PAS JOUER AVEC LE FEU, opéra-comique in 3 acts; libretto by Scribe and St. Georges; music by Auber. Produced Opéra-Comique, Paris, May 18, 1840; St. James's Theatre, Feb. 12, 1849. G.

ZANETTI (ZANNETTI), FRANCESCO (b. Volterra, 1740; d. London, 1790¹), singer and composer. In 1770 he was maestro di cappella at Perugia Cathedral, but lost his post on account of his connexion with the stage. He married a singer, and both toured together as operatic singers. According to Fétis he was in London in 1790. As, however, his 6 string quintets, op. 2, 5 books of sonatas for 2 violins and bass, 6 sonatas for harpsichord, 6 solos for flute and 4 solos for violin were all published in London between 1770-75, it appears that he paid an earlier visit there soon after leaving Perugia. In 1783 he was at Alexandrie de la Paille for the performance of his opera, 'Le Cognate in contesa.' Besides several operas he wrote also church music and songs (Q.-L.).

and G. Menasci; music by Mascagni. Produced Liceo Musicale, Pesaro, Mar. 2, 1896; given privately 7 Chesterfield Gardens, London, June 23, 1896.

ZANGIUS, NICOLAUS (d. Berlin (?), 1618 or 1619), Kapellmeister at Brunswick, 1597; deputy organist at S. Mary's, Danzig, 1602, 1603, 1605; 'Aulicus' (flautist) at the Imperial court at Prague, 1609; from 1612 Kapellmeister at the court of Berlin. He was a prolific composer of motets, and of sacred and secular songs, some books of which appeared in several editions. A number of his motets, 5-20 v., a 7-part Mass and sacred songs remained in MS. (Q.-L.).

ZANOTTI (JOANNOTTI), CAMILLO, of Cesena, from Aug. 1, 1586, till after 1591 he was vice-Kapellmeister to the German Emperor Rudolph II. He composed masses, a 5 v., 1588; sacrae symphoniae, 8 v.; motets for double chorus, Nuremberg, 1562; 3 books of madrigals, 5 v., 1587-89; 1 book madrigals, 6 v., 1589; madrigalia tam italica quam latina . . . , 5, 6 and 12 v., 1590 (Mendel; Q.-L.).

ZAPPA, FRANCESCO, of Milan, late 18th-century eminent violoncellist, for some time in the service of the Duke of York, composer of symphonies, quartets, trios, sonata and duo for violoncello, vocal romances, etc. (E. van der Straeten, *History of the Violoncello*; Q.-L.).

ZAPPASORGO, GIOVANNI, of Treviso, wrote 2 books of 'Neapolitane,' 3 v., which appeared in several editions between 1571 and 1588 (Q.-L.).

ZARLINO, GIOSEFFE (b. Chioggia, Mar. 22, 1517; d. Venice, Feb. 14, 1590), one of the most learned musical theorists of the 16th century. Chioggia being the Clodia of the Romans, he was generally known as Zarlinus Clodiensis.

By the wish of his father, Giovanni Zarlino, he spent his youth in studying for the Church; was admitted to the Minor Orders in 1539, and ordained Deacon in 1541. In that year he came to reside in Venice, where his proficiency as a theologian, aided by his intimate acquaintance with the Greek and Hebrew languages, and his attainments in philosophy, mathematics, astronomy and chemistry, soon gained him an honourable position. But his love for music, for which, as he himself tells us in the dedication prefixed to his *Istitutioni armoniche*, 'he had felt a natural inclination from his tenderest years,' tempted him to forsake all other studies for his favourite pursuit; and he was at once accepted as a pupil by Adriano Willaert, under whom he studied, in company with Cipriano di Rore and other promising neophytes.

On the removal of Cipriano di Rore to Parma, Zarlino was elected, in 1565, first maestro di cappella at S. Mark's. The duties connected with this appointment were not confined to the

Offices sung in the Cathedral. After the Battle of Lepanto, Oct. 7, 1571, Zarlino was commissioned to celebrate the victory with music worthy of the occasion. When Henri III. visited Venice, on his return to France from Poland in 1574, he was greeted, on board the Bucentaur, by a composition, the Latin verses for which were furnished by Rocco Benedetti and Cornelio Frangipani, and the music by Zarlino, who also composed the music sung in the Cathedral, and a dramatic piece, called 'Orfeo,'¹ which was performed with great splendour in the Sala del Gran Consiglio. Again, in 1577, when the Church of S. Maria della Salute was founded in memory of the plague, Zarlino was commissioned to compose a Mass for the solemn occasion. None of these works have been preserved, and we can only judge of their merits by the immense reputation the composer enjoyed.

But Zarlino did not neglect the duties of his ecclesiastical status. On the contrary, in 1582 he was elected a Canon of Chioggia; and, on the death of Marco de' Medici, Bishop of Chioggia, in 1583, he was chosen to fill the vacant See. This proceeding was, however, so strongly opposed by the Doge, Niccolò da Ponte, and the Senate, that Zarlino consented to retain his appointment at S. Mark's in preference to the proffered mitre; and he continued to perform the duties of maestro di cappella until his death. He was buried in the church of San Lorenzo. No inscription now marks the spot, but his bust has been placed in a corridor of the Doge's Palace; and during his lifetime a medal was struck in his honour, bearing his effigy, and, on the reverse, an organ, with the legend, *Laudate eum in chordis*.

Few compositions by Zarlino have been preserved to us, besides the examples given in his theoretical works; they include a MS. Mass for 4 voices, in the library of the Liceo filarmonico at Bologna, and a printed volume of 'Modulationes sex vocum' (Venice, 1566). Torchi ('Arte musicale in Italia') has printed two motets (5 v.). His chief fame, however, rests upon three treatises, entitled: *Istituzioni armoniche* (Venice, 1558, reprinted 1562, and again, 1573, etc.); *Dimostrazioni armoniche* (Venice, 1571, reprinted 1578); and *Sopplimenti musicali* (Venice, 1588). The best edition is the complete one, entitled *Tutte l'opere del R. M. Gioseffo Zarlino da Chioggia* (Venice, 1589).

The *Istituzioni* comprise 448 pp. fol.; and are divided into four sections.

Lib. I. contains 69 Chapters, chiefly devoted to a dissertation on the excellence of music; a mystical elucidation of the transcendental properties of the number six; and a description of the different forms of arithmetical, geometrical and harmonical proportion.

In Lib. II., comprising 51 chapters, Zarlino demonstrates the superiority of the system

known as the 'Syntonous, or Intense Diatonic,' of Ptolomy, above all other systems whatsoever. In this system the tetrachord is divided into a greater tone, a lesser tone, and a greater hemitone—the diatonic semitone of modern music—as represented by the fractions $\frac{9}{8}$, $\frac{16}{15}$, $\frac{1}{2}$. The system was not a new one, and Zarlino, naturally enough, made no attempt to claim the honour of its invention. The constitution of the lesser tone had been demonstrated, by Didymus, as early as the 60th year of the Christian era. The misfortune was, that Didymus placed the lesser below the greater; an error which was corrected about the year 130, by Claudius Ptolomy, who gave his name to the system. The merit of Zarlino lay in his clear recognition of the correctness of this division of the tetrachord, which, in Lib. II. Cap. xxxix. p. 147 of the complete edition, he illustrates as in Fig. 1.²

By following the curves in Fig. 1 we may

FIG. 1.

ascertain the exact proportions, in just intonation, of the diatonic semitone, the greater and lesser tone, the major and minor third, the perfect fourth, and the perfect fifth, in different parts of the octave. Like Pietro Aron (*Toscanello della musica*, Venice, 1523), Ludovico Fogliano (*Musica theoretica*, Venice, 1529), and other theoretical writers of the 16th century, Zarlino was fond of illustrating his theses by diagrams of this kind: and it was, no doubt, the practical utility of the custom that tempted Des Cartes to illustrate this self-same system by the 'Canonical Circle' (Fig. 2), which later theorists extended, so as to include the proportions, in commas,³ of every possible diatonic interval within the limits of the octave (Fig. 3).

It needs but a very slight examination of the accompanying diagrams to prove that the

² Want of space compels us to omit one or two unimportant details of the Diagram, as given in the edition of 1589.

³ A comma is the ninth part of a Greater Tone.

¹ Caffi calls it an 'opera.'

'Syntonous Diatonic' of Ptolemy coincided, to the minutest particular, with the system advocated by Kepler (*Harmonices mundi*, Lib. III.,

FIG. 2.

Cap. 7). Mersenne (*Harm. univers.* Lib. II.), Des Cartes (*Compendium musicae*), and all the most learned theoretical writers of later date, who, notwithstanding our acceptance of equal

FIG. 3.

temperament as a practical necessity, entertain but one opinion as to the true division of the scale in just intonation—the opinion defended by Zarlino.

Lib. III. of the *Istitutioni* treats of the laws of counterpoint, which, it must be confessed, are not always set forth here with the clearness for which Zaccani is so justly remarkable. In the examples with which this part of the work is illustrated an interesting use is made of the well-known *canto fermo* which forms so conspicuous a feature in 'Non nobis Domine,' and so many other works of the 16th and 17th centuries.

FIG. 4.

Lib IV. treats of the modes, more especially in the later forms introduced by the Early

Christians, and systematised by S. Ambrose and S. Gregory. In common with Glareanus, and all the great theorists of the polyphonic school, Zarlino insists upon the recognition of 12 modes, and 12 only; rejecting the Lorian and Hypolorian forms as inadmissible, by reason of the false fifth inseparable from the one, and the tritonus which forms an integral part of the other. But, though thus entirely at one with the author of the *Dodecachordon* on the main facts, he arranges the modes in a different order of succession¹ (see MODES, ECCLESIASTICAL). Instead of beginning his series with the Dorian mode, he begins with the Ionian, arranging his series thus:

Authentic Modes.	Plagal Modes.
I. Ionian. Final, C.	II. Hypoionian. Final, C
III. Dorian. Final, D.	IV. Hypodorian. Final, D.
V. Phrygian. Final, E.	VI. Hypophrygian. Final, E.
VII. Lydian. Final, F.	VIII. Hypolydian. Final, F.
IX. Mixolydian. Final, G.	X. Hypomixolydian. Final, G.
XI. Æolian. Final, A.	XII. Hypoæolian. Final, A.

This arrangement—which no other great theorist of the century has followed—would almost seem to have been dictated by a prophetic anticipation of the change which was to lead to the abandonment of the modes, in favour of a newer tonality: for the series here begins with a form which corresponds exactly with our modern major mode, and ends with the prototype of the descending minor scale of modern music.

In the course of the work Zarlino introduces some very valuable memoranda, and occasionally records as facts some very curious superstitions. In one place he tells us that the human pulse is the measure of the beats in music—a statement fortunately corroborated by other early writers, and furnishing us with a comparative estimate of the duration of the two beats which are included in the normal semibreve. In another he asserts that Josquin treated the fourth as a consonance. In a third he records his observation that untaught singers always sing the third and sixth major—which is in all probability true. Occasionally, too, he diverges into the region of romance, and assures us that deer are so delighted with music that hunters use it as a means of capturing them.

The *Dimostrazioni armoniche*, occupying 312 folio pages, is disposed in the form of five dialogues, carried on by Adriano Willaert, Claudio Merulo and Francesco Viola, maestro di cappella of Alfonso d'Este, Duke of Ferrara. Zarlino tells us that in the year 1562 the friends met at the house of Willaert, who was then laid up with the gout; and that their

¹ See Lib. IV. cap. x. p. 399, in edition of 1589.

conversation is faithfully reported in the five *Ragionamenti* of the *Dimostrazioni*. The first of these treats chiefly of the proportions of intervals; the second and third, of the ratios of the consonances, and lesser intervals; the fourth, of the division of the monochord; and the fifth, of the Authentic and Plagal modes.

Not long after the publication of these works Vincenzo GALILEI (*q.v.*)—who had formerly been Zarlino's pupil—printed at Florence a tract entitled *Discorso intorno alle opere di messer Gioseffe Zarlino di Chioggia*, in which he violently attacked his former master's principles; and in 1581 he followed up the subject in his famous *Dialogo della musica antica et della moderna*, in the second edition of which (Firenze, 1602), the title-page bore the words, 'in sua difesa contra Joseffo Zarlino.' Galilei attacked, in very uncourteous terms, the division of the scale advocated by Zarlino; and proposed to substitute for it the Ditonic Diatonic Tetrachord, consisting of two greater tones and a Limma¹; as set forth by Pythagoras—a division which all modern theorists agree in rejecting. While accusing Zarlino of innovation, he inconsistently complained that the Syntonous Diatonic was advocated by Lodovico Fogliano half a century before his time. This is perfectly true²: and in all probability it was this division of the scale that the Aristoxenians unconsciously sang by ear. But Galilei was not satisfied with an empirical scale; and his admiration for the Greeks blinded him to the fact that his theory, reduced to practice, would have been intolerable. His favourite instrument, the lute, required some reasonable power of temperament: and Zarlino, who was in every respect in advance of his age, actually proposed that for the lute the octave should be divided into 12 equal semitones—that is to say, he advocated in the 16th century the practice that we have only seen universally adopted within the 19th. That he extended the system to the organ is sufficiently proved by the fact that his organ at S. Mark's remained in the condition in which it was left by Monteverdi.³ It is evident, therefore, that he advocated equal temperament for keyed instruments, and just intonation for unaccompanied vocal music and instruments of the violin tribe.

In defence of his principles, and in answer to Galilei's caustic diatribes, Zarlino published in 1588 his *Sopplimenti musicali*, containing 330 pages of valuable and interesting matter, much of which is devoted to the reinforcement of the principles laid down in the *Istitutioni* and the *Dimostrazioni*. The system of equal temperament, as applied to the lute, is set forth in detail in Lib. IV. Cap. xxvii. *et seq.* In Lib.

VI. the author recapitulates much of what he has previously said concerning the modes; and in Lib. VIII. he concludes the volume with a dissertation on the organ, illustrating his subject at p. 291 by an engraving of the sound-board of a very early organ removed from a church at Grado; and giving many particulars concerning organs of very early date.

In 1589 Zarlino reprinted the *Sopplimenti*, preceded by the *Istitutioni* and the *Dimostrazioni*, in the complete edition of his works already mentioned, together with a fourth volume, containing a *Trattato della pazienza*, a *Discourse on the true Date of the Crucifixion of Our Lord*, a treatise on *The Origin of the Capuchins*, and the *Resolution of some Doubts concerning the correctness of the Julian Calendar*. He survived the issue of the 4 volumes but a very short time; but his death in 1590 was far from terminating the controversy concerning his opinions; for Galilei published the second edition of his *Dialogo* as late as 1602; and in 1704 Giovanni Maria Artusi published an equally bitter attack at Bologna, entitled *Impresa del R. P. Gio. Zarlino di Chioggia*, etc.

The works of Zarlino are now scarce and costly, though copies⁴ exist in a number of continental libraries. (See *Q.-L.*) In England copies will be found at the British Museum, the R.C.M., and the Leeds Public Library.

W. S. R.

ZARZUELA (Spanish), is practically an *opéra bouffe*, often in one act (when it belongs to the so-called *genero chico*), with any number of scenes and tableaux, lasting about an hour. Three or four of these are given in an evening. Generally the plot is of a comic nature, and customs, fashions, operas, plays, novels, political situations and, not least, the tauromachic mania, are reproduced, satirised and travestied in a manner that gives scope for the peculiarly Spanish wit. Sometimes plots of a tragic nature are written, sometimes melodramatic, sometimes fantastic; but it would be quite an exception if one were produced without its element of humour. Scarcely any successful play, opera or novel is not somehow or other burlesqued in the form of a zarzuela.

The best performances of zarzuelas take place in Madrid, in the theatre which is now invariably called the Teatro de la Zarzuela. It was built at the instigation of the composers Barbieri and Gaztambide, the singer Salas and the poet Olona, and was opened on Oct. 10, 1857, in the presence of Doña Isabel; her consort, Don Francisco, and their court. On that occasion the performance consisted of a symphony on

¹ The Limma or remaining portion of a perfect fourth, after two greater tones have been subtracted from it, is less than a diatonic semitone by one comma.

² See Fogliano's *Musica teorica* (Venice, 1529), Sect. II. De utilitate toni majoris et minoris.

³ Bontempi, *Hist. Mus.* Partie Ima, Coroll. IV

⁴ The only existing translations of Zarlino's *Istitutioni armoniche* are two French ones, both MSS. in the National Library, Paris: fr. 1591 attributed to Claude Hardy, fr. 19101 by Jehan Le Fort (Michel Brenet, *Deux traductions françaises inédites de Zarlino. L'Année musicale*, 1911). On the erroneous attribution to Sweelinck of the Dutch translation, consult: Max Seiffert, *Sweelinck und seine direkten Schüler* (Vierteljahrsschrift für Musikwissenschaft, vii. 1891). Of the German translation by Johann Caspar Trost there seems to be no trace.

themes from zarzuelas for orchestra and military band composed by Barbieri; a cantata by Arrieta to words by Olona and Hurtado; a zarzuela in one act, 'El Sonámbulo,' by Hurtado and Arrieta, and an allegory in one act, 'La Zarzuela,' text by Hurtado and Olona, with music by Gaztambide, Barbieri, Arrieta and Rossini. Another theatre where good performances are given is the Apolo, built on the site of a convent, and for that reason formerly avoided from religious feeling by many Madridileños.

Zarzuelas are sometimes in two or more acts; and such works as 'La Fille de Mme Angot,' 'H.M.S. Pinafore,' etc., have been produced and announced as zarzuelas, but the piece in one act is by far the most frequent and popular. The music is almost always of vivid Spanish colouring, sparkling and bright; 'Flamenco,' Aragonese, Basque or whatever the occasion demands, but always restless, somewhat lacking in the elegance that characterises the music of the more successful operettas of other countries, a little blatant in orchestration and apt to be vague in form when the national dance and folksong forms are avoided. There is, in fact, a discontent and want of repose apparent in this phase of art in Spain, as in almost everything in the country.

The libretti are sometimes written in verse, but more frequently not, and the author often depends on the actors' own invention and ingenuity for presenting the public with a good character, and the custom of 'gagging' and improvising 'encore' verses to a song is so freely indulged in that the actors themselves, as well as the audience, are constantly in roars of laughter during the early stages of the run of a new piece. The acting is less conventional and more unstudied and natural than in other forms of dramatic performance. The intimacy between actors and audience is so close and informal that a course of repartee between one of the former and members of the latter is at times started and kept up for quite a long time.

The best-known authors and composers in Spain have contributed to the zarzuela, and among the most successful composers may be mentioned Arrieta, Gaztambide, Barbieri, Oudrid, Margués, Caballero, Chapi, Chueca, Torregosa, Barrera and the Valverdes, father and son. Perhaps the most successful zarzuela has been that called 'Gigantes y Cabezudos,' written in verse by the illustrious and venerated Miguel Echegaray, with music by Caballero. It deals with a subject dear to every Spanish heart, that of the fiestas of the Virgin of Saragossa, Santa Maria del Pilar. It has had many a long run on many a stage, and is constantly revived, and sometimes for a special occasion or a gala performance it is given a place in the programme at the Royal Opera-House in

Madrid. Of its kind it is a gem, and, as the name of its author would suggest, has none of the extravagance, the vulgarity or the morbidity of many popular zarzuelas. Another favourite, 'La gran via,' has overrun the theatres of Italy, and been given in various other European countries, besides being produced in London a few years ago in a distorted and elongated form. H. V. H., abridged.

ZARZYCKI, ALEXANDER (b. Lemberg, Feb. 21, 1834; d. Warsaw, Oct. 13, 1895), for some years director of the conservatorium of Warsaw. He is favourably known by his violin pieces, notably a mazurka that has won great success, and he also wrote a piano concerto and many pieces of a more or less slight kind (*Riemann*).

M.

ZAUBERFLÖTE, DIE (II flauto magico, La Flûte enchantée, The Magic Flute), opera by Mozart in 2 acts; the text by Schikaneder.¹ Produced Theater-auf-der-Wieden, Vienna, Sept. 30, 1791; Paris, as 'Les Mystères d'Isis,' Aug. 20, 1801 (see LACHNITH); in Italian, King's Theatre, June 6, 1811; in English, New York, Park Theatre, Apr. 17, 1833; in German, Covent Garden, May 27, 1833; in English, Drury Lane, Mar. 10, 1838. G.

ZAVERTAL, the original Bohemian name (Zavrtal) of a musical family, several members of which became prominent both in Germany and England. (1) JOSEPH RUDOLF (b. Polep, Leitmeritz, Bohemia, Nov. 5, 1819), horn-player, was educated at the Prague Conservatorium. He entered the Austrian army as bandmaster in 1840. In 1846 he established the Pension Society for bandmasters of the Austrian army. After several promotions, in 1864 he became director of military music to Maximilian, Emperor of Mexico. Shortly after this he left Austria for England, and in 1868 was made bandmaster of the 4th King's Own Regiment, and in 1871 was placed at the head of the band (wind and string) of the Royal Engineers. (2) WENCESLAS HUGO (b. Polep, Aug. 31, 1821), clarinettist and composer, brother of the foregoing. Among various important posts in Austria and Italy, he held those of director of the Conservatorio of Treviso and principal of the School of Music at Modena. In 1866 he quitted the service, and in 1874 came to Great Britain, where he resided at Helensburgh, near Glasgow, much esteemed as a teacher of music, and where his compositions were much relished. In 1847 he married Carlotta Maironi Nobile da Poule (d. 1873), an eminent musician. His son (3) LADISLAUS (b. Milan, Sept. 29, 1849) was taught music by his parents, and first appeared at Milan in 1864. Four years later he produced an opera at Treviso. Next year he was made conductor and composer to the theatre at Milan. In 1871 he removed to Glasgow, where

¹ As to Gliesecke's claim to authorship, see Dent, *Mozart's Operas*, p. 355 et seq.

he remained teaching and conducting for ten years. In 1881 he succeeded James Smythe as master of the band (wind and string) of the Royal Artillery at Woolwich. He initiated the Sunday Concerts in the Albert Hall and conducted them for 10 years, and by introducing many new works to English audiences, and maintaining a high standard of artistic excellence, raised the Artillery Band to the high position it now holds. He filled the post with distinction and much artistic success until Dec. 1906. At the last concert of the Artillery Band conducted by him, his second symphony was performed. An opera of his, 'Una notte a Firenze,' was successfully produced at Prague in 1886, and another, 'Myrrha,' at the same city, Nov. 7, 1886. An operetta, 'Love's Magic,' was performed at Woolwich in Feb. 1890. He was made a Commendatore of the Order of the Crown of Italy, and received the Ernestine Order for Art and Science from the late Duke of Coburg. (See *Memoirs of the Royal Artillery Band*.)

ZECKWER, RICHARD (b. Stendal, Apr. 30, 1850; d. Philadelphia, 1922), educated at Leipzig, migrated to America and settled in Philadelphia as pianist and teacher. He joined the staff (1876) of the newly opened Musical Academy and later became its director, resigning this post in 1917. His son,

(2) CAMILLE (b. Philadelphia, June 26, 1875; d. there, Aug. 7, 1924), pianist and composer, studied with Dvořák in New York (1893-95) and with P. Scharwenka in Berlin. He settled as a teacher in his native city and became director of the Musical Academy in conjunction with F. E. Hahn. He was the composer of several symphonic works played by the Philadelphia Orchestra; his symphonic poem 'Jade Butterflies' won a Chicago prize and was played by the Chicago Orchestra; he also wrote chamber music and an opera, 'Jane and Janetta' (*Amer. Supp.*).

ZEISLER, FANNIE BLOOMFIELD (b. Bielitz, Austria, July 16, 1863), an American pianist who was taken to the United States in 1868 by her parents, who settled in Chicago. She studied there under Bernhard Ziehn and Carl Wolfsohn; and in 1878 went to Leschetizky in Vienna, with whom she studied for five years. She returned to the United States in 1883, and at once made a name as a public pianist. In 1893 she undertook a concert tour in Germany and repeated it the next year. She appeared in London in 1898, and in that year also in the Lower Rhine Music Festival in Cologne, and has made European tours in subsequent years. She married Siegmund Zeisler, a lawyer of Chicago, in 1885. She is a cousin of Moriz Rosenthal, the pianist.

Mme. Bloomfield-Zeisler's style is one of individuality, fiery intensity, and incisiveness; that of a nervously high-strung artist. R. A.

ZELENKA, JOHANN DISMAS (b. Launowicz, Bohemia, 1681¹; d. Dresden, Dec. 22-3, 1745), composer.

He was educated at the Jesuit College in Prague, was in the service of Freiherr Joseph Ludwig von Hartig as musician there in 1690, entered the band of the Dresden Hofkapelle as double-bass player in 1710, and obtained leave of absence in 1716 in order to study composition with J. J. Fux at Vienna. In the same year he was taken in the suite of the Prince Elector to Italy, and became a pupil of Lotti, but returned to Vienna in 1717, and to Dresden in 1719. In 1723, for the coronation of Karl VI. at Prague, he wrote music to a Latin comedy, 'Melodrama de Sancto Wenceslao.' He succeeded Heinichen (whose coadjutor he had been since 1719) as director of church music in 1729, and received the title of court composer in 1733. He was a voluminous composer, leaving no fewer than 21 masses, 108 psalms, motets, etc. Three Italian oratorios, 'I penitenti al sepolcro,' 'Il serpente di bronzo,' 'Giesu al Calvario,' three cantatas, 'Immisit Dominus,' 'Deus dux,' and 'Attendite et videte,' besides a serenata and the 'melodrama' above mentioned, with other compositions in his autograph, were kept in a special cupboard in the Catholic Church at Dresden, and the State Library there has the largest collection of his manuscript compositions. Hardly any of them appear to have been published (*Q.-L.*). M.

ZELENKA, LADISLAV (b. Mar. 11, 1881), a Czech violoncellist, professor at the Prague Conservatoire, and, since 1913, a member of the CZECH (BOHEMIAN) STRING QUARTET (*q.v.*).

R. N.

ZELMIRA, opera in 2 acts; words by Tottola, music by Rossini. Produced Naples, Feb. 16, 1822.

G.

ZELTER, CARL FRIEDRICH (b. Berlin, Dec. 11, 1758; d. May 15, 1832), director of the Berlin Singakademie, and founder of the Liedertafeln now so general throughout Germany.

He was the son of a mason. He has recorded the first indelible impression that he received on hearing Graun's opera 'Phaeton,' to which his parents treated him in the Carnival of 1770.

'The grand powerful masses of tone riveted my attention far more than the melody and construction of the airs. . . . I thought the orchestra a riddle as wonderful as it was beautiful. I was seated amongst the musicians . . . I swam in a sea of delight.'

Of the opera itself he says little, except that the sweet unknown Italian words added to the magic of the whole, so that he afterwards agreed with the Great Frederick as to the profanity of allowing Art to speak in the vulgar tongue, and sympathised heartily with the royal dislike of the German opera. When nearly 14, his father sent him to the Gymnasium, but here, though the lessons got on tolerably well, his relations with his fellow-students were so stormy that

¹ According to Diabacz; Riemann gives Oct. 16, 1679.

the place became too hot to hold him; he was next handed over to the organist of the Gymnasium, who had a school of his own. This was only a temporary expedient, for Zelter returned to the Gymnasium, where some of the masters were well disposed towards him, notwithstanding his taste for practical jokes. At the age of 17, after another course of the organist's teaching, he left school, and now his real education began. Though apprenticed to his father's trade, he was but a half-hearted mason. He made friends with any one who happened to have musical proclivities, and amongst others with the town musician, George, an original even in those days. In his household Zelter was always a welcome guest; George appreciated his musical skill and enthusiasm, and gave him free access to all his musical instruments. Meantime Zelter was ripening into a capable musician.

In 1777 his apprenticeship was declared over, and a great longing seized him to join his friend Hackert, the artist, in a journey to Italy, a longing which often returned upon him through his life, though he never fulfilled it. Hackert went without him, and he remained at home to do a good deal of love-making. His love affairs, described minutely in his autobiography, are of little interest, except perhaps his flirtation with an artistic Jewess, at whose father's house Moses Mendelssohn and other scholars used to meet. The lady and her lover quarrelled over the theory of suicide, and parted company because they differed about Goethe's treatment of Werther, who, in Zelter's opinion, ought to have shot Albrecht instead of himself. The episode is worth recording, as it marks the first connexion of the names of Goethe and Mendelssohn with that of Zelter. In spite of such distractions, Zelter passed his examination easily and successfully, and was made a master mason in consequence. When he was 18, his first cantata was performed in St. George's Church, and Marpurg the theorist thought so highly of it that Zelter applied to Kirnberger and Fasch for further instruction in musical science. In gratitude for his old master's teaching, he ultimately became the biographer of Karl Friedrich Christian Fasch,¹ the original founder of the Berlin Singakademie. From 1792-1800, Zelter acted as accompanist to that institution, and at the death of Fasch he succeeded to the directorship. In 1806 he was appointed assessor to the Akademie, and in 1807 he established a 'Ripienschule' for orchestral practice. A few years previously, Zelter's music to some of Goethe's songs had so attracted the poet, that a correspondence began which shows that Goethe was capable of a real affection for at least one of his blindest worshippers.²

There are frequent allusions in these letters to the progress of the Singakademie, over which in his later years Zelter reigned as a musical dictator from whose decision there was no appeal: The Akademie consisted originally of only 30 members, who met weekly at different private houses, and during Fasch's life they practised little except his compositions. It was reserved for Zelter to enlarge the area of selection, and under him some of the greatest works of the time were added to the repertory. The Liedertafel, which was definitely founded in 1809, at first consisted of 25 men, singers, poets and composers. The society met once a month for supper and music, the songs were the compositions of the guests themselves, and the gatherings are amusingly described in Zelter's letters to Goethe. In the same year he received the professorial title, and was made a member of the Akademie. In 1819 he founded the Königl. Institut für Kirchenmusik, and conducted it until his death.

As the teacher and friend of Felix Mendelssohn, Zelter is entitled to lasting gratitude, for though his judgment of contemporary art was at times mistaken, his faith in his pupil never waned. For his share in the revival of the choral music of J. S. Bach see BACH GESELLSCHAFT. The joint enthusiasm of Mendelssohn and Devrient for Bach's music had been kindled by the study of the score of the 'Passion,' which Zelter had bought years before. Zelter rashly ventured on simplifying some of the recitatives and choral parts, after the method of Graun. The purity of the work was saved by Felix Mendelssohn's grandmother, who prevailed on the fortunate possessor of the score to present the treasure to her grandson. Not only was the work well bestowed and rescued from sacrilege, but its publication and performance inaugurated a fresh era in the art of music. The expediency of printing the work was discussed at a dinner party given by Schlesinger, the publisher. Marx was appealed to for an opinion. 'All I can say is, that it is the greatest thing I know in church music,' was his reply, whereupon old Schlesinger struck the table with his fist, and called out, 'I will publish it, should it cost me three thousand thalers. I will do it for the honour of the house.'

The zeal of Mendelssohn and Devrient, in league to prevail on Zelter to allow a public performance, eventually triumphed over every obstacle. Their old teacher was at first incredulous; it may well have been that he was conscious of the original sin of tampering with the score, and felt that the 'lynx eyes' of Felix had silently convicted him. The concession was wrung from him with difficulty, but once given he put the forces of the Akademie at his pupil's disposal. The first and ever-memorable performance of the 'Passion' music was given Mar. 11, 1829, under Mendelssohn's baton, his

¹ Karl Friedrich Christian Fasch, von Karl Friedrich Zelter, 4to, Berlin, 1801, with a portrait (drawn by Schadow).

² Briefwechsel zwischen Goethe und Zelter, 6 vols. Berlin, 1833-34. Translated by A. D. Coleridge, 1837.

friend Edward Devrient singing the part of Christ.

Zelter composed songs and quartets for the Liedertafel of Berlin, and set many of Goethe's songs to music. These songs were interpreted in their day by Mara and other great singers. Amongst his numerous works, now forgotten, was a cantata on the death of Frederick the Great, which seems, by the account of it in a journal of 1786, to have been thought worthy of the occasion. He also wrote an oratorio called 'The Ascension,' a Requiem, a Te Deum and several other works which were never published. A list of these is to be found in *A Sketch of the Life of Carl Friedrich Zelter, arranged from Autobiographical MSS.*, by Rintel (Janke, Berlin, 1861). (See also *Q.-L.*)

A. D. C., rev. with addns.

ZÉMIRE ET AZOR, a fairy comedy in 4 acts; words by Marmontel; music by Grétry. Produced Fontainebleau, Nov. 9, 1771, and Les Italiens, Paris, Dec. 16; revived, the libretto reduced by Scribe to 2 acts, and the score reinforced by Adam, Feb. 21, 1832; again revived, in 4 acts, June 29, 1846.

The story is that of 'Beauty and the Beast,' and has been set to music under the above title by Baumgarten (1775), Neefe (Beethoven's teacher) (1778), Tozzi (1792), Seyfried (1818) and Spohr (Apr. 4, 1819). The last, under the name of 'Azor and Zemira, or the Magic Rose,' was produced at Covent Garden Theatre, Apr. 5, 1831. g.

ZEMLINSKY, ALEXANDER VON (b. Vienna, Oct. 4, 1872), studied at the Vienna Conservatorium and became conductor first at the Volksoper (1906), then at the Hofoper (1908). After holding a similar position at Mannheim, Zemlinsky settled at Prague as conductor at the German Opera House, where he has done distinguished work. The German Opera under him has maintained a high level, and he still (1927) directs it (see PRAGUE). Zemlinsky has composed several stage works which have been given at VIENNA (*q.v.*) and elsewhere with success. 'Sarema' (Luitpold prize) was produced at Munich in 1897; 'Es war einmal' (1900) and 'Kleider machen Leute' (Volksoper 1910) were produced in Vienna, and 'Der Zwerg' (1921) at Frankfurt. c.

ZENATELLO, GIOVANNI (b. Verona, Feb. 22, 1878 or 1879),¹ operatic tenor. He was trained as a baritone and made his début as such at the Teatro Mercadante, Naples. Two months later he exchanged the part of Silvio in 'Pagliacci' for that of Canio, and astonished the Neapolitan critics by proving himself a genuine robust tenor, in which capacity he appeared in various opera-houses in Southern Italy for three years. Then only did he begin serious vocal study at Milan, and fit himself for the worthy employment of a magnificent organ.

¹ Baker.

After a highly successful reappearance at Mantua as Andrea Chénier, he went to South America and entered upon the most brilliant part of his career, being engaged on his return for La Scala, Milan, where he sang regularly from 1903-07. In the latter year he sang for Hammerstein at the Manhattan Opera House, New York, following up there the successes which he had won at Covent Garden in 1905-06. He made a good impression here, both by his acting and singing, on his début in 'Un ballo in maschera' (100th performance at Covent Garden, Oct. 6, 1905); but achieved a more marked triumph three years later when he sang Otello with Melba and Scotti as Desdemona and Jago. He was also very fine that season as Radamès with Destinn as Aida, and these two Verdi rôles were considered his best in a repertory of some fifty characters. He was for many years a member of the Boston Opera Company, and whilst in America married (1913) the well-known Spanish prima donna, Maria Gay. He supports a conservatory in Verona for the free tuition of talented students.

BILL.—*International Who's Who in Music*; NORTHCOTT, *Covent Garden and the Royal Opera*. H. K.

ZERETEIEV, see LAWROWSKA.

ZERLINE, OU LA CORBEILLE D'ORANGES (The Basket of Oranges), opera in 3 acts; libretto by Scribe; music by Auber. Produced Académie Nationale, May 16, 1851; in Italian, Her Majesty's Theatre, July 22, 1851. g.

ZERR, ANNA (b. Baden-Baden, July 26, 1822; d. Winterbach, near Oberkirch, Baden, June 14, 1881), singer.

She was taught by Bordogni, and first appeared in opera at Karlsruhe, in 1839, where she remained until 1846, and was subsequently engaged at Vienna. In 1851 she obtained leave of absence, and made her first appearance in England on May 19, at Catherine Hayes' Concert, at the Hanover Square Rooms, and sang with great success there and at other concerts, including one given for the benefit of the Hungarian Refugees. On this account, on her return to Vienna, she was deprived of her diploma of court chamber singer, and was not permitted to sing again at the opera during the remainder of her engagement. On July 10 she made her début with great effect at the Royal Italian Opera as Astrifiamante on the production of 'Zauberflöte.' She reappeared in 1852 in the same part, and in that of Lucia; on July 15 as Rosa on the revival of Spohr's 'Faust'; on Aug. 17 as Catherine on the production of 'Pietro il Grande' (Jullien). She afterwards sang at the Birmingham Festival, at Jullien's concerts, went to America, and retired from public life in 1857. A. C.

ZERRAHN, CARL (b. Malchow, Mecklenburg-Schwerin, July 28, 1826; d. Milton, Mass., U.S.A., Dec. 29, 1909). As conductor of important choral societies in New England he

executed a powerful influence on the spread of music in the country of his adoption (see WORCESTER MUSIC FESTIVALS, U.S.A.).

He came to the United States in 1848 as a member of the Germania Orchestra, playing the flute. He was elected conductor of the Handel and Haydn Society in 1854, and conducted the concerts of this choral society for 42 years. He conducted the concerts of the Worcester, Mass. Musical Festivals for 30 years (1866-97) and the Harvard Symphony Concerts during the entire period of their existence. He was also the conductor of many Musical Festivals in the States. He retired in 1898. H. E. K.

ZEUGHEER, JAKOB (known also as J. Z. HERRMANN) (b. Zürich, 1805; d. Liverpool, June 15, 1865), violinist.

He learned the violin first from Wassermann in his native town, and in 1818 was placed at Munich under Ferdinand Fränzel, for the violin, and Gratz for composition and musical science. A visit to Vienna in 1823 confirmed his enthusiasm for chamber-music and Beethoven, who remained through life the object of his highest veneration. The example of SCHUPPANZIGH (*q.v.*), and of the four brothers Moralt, suggested to Zeugheer the idea of attempting the same with his friends in Munich, as 'das Quartett Gebrüder Herrmann.' Zeugheer was leader; Joseph Wex of Immenstadt, second violin; Carl Baader, viola; and Joseph Lidel (grandson of Andreas Lidl, the eminent performer on the BARYTON), violoncello. They started Aug. 24, 1824, for the south, and gave performances at the towns of south Germany and Switzerland, and along the Rhine to Holland and Belgium. In the spring of 1826 they played in Paris, before Cherubini and Baillet, and gave a public performance assisted by Mlle. Sontag and M. Boucher. They first performed in Paris Spohr's double quartet in D minor, the second quartet being played by Boucher and his three sons. From Boulogne they crossed the Channel; in England they seem to have been successful, at Dover, Ramsgate, and especially at Brighton, where they resided for five months. They gave concerts throughout the South and West of England, and in Ireland from Cork to Dublin, where they arrived in Nov. 1827. Early in 1828 they proceeded by Belfast to Glasgow, Edinburgh and London. In London they had only a few engagements in private houses; Wex retired ill, and the quartet was broken up till a new violinist was found in Anton Popp of Würzburg. The concerts began again with a series of six at Liverpool in the summer of 1829, and were continued through the northern counties. But in the spring of 1830 the 'brothers' had had enough of a roving life. Zeugheer and Baader settled at Liverpool, Lidel and Popp at Dublin. Zeugheer resided in Liverpool till his death, Baader till his retirement in 1869.

In 1831 Zeugheer took the conductorship of the Gentlemen's Concerts at Manchester, which he retained till 1838. The Liverpool Philharmonic Society, originally a private society, began in Jan. 1840 to give public concerts with an orchestra, and in 1843 appointed Zeugheer director. He conducted their concerts from that date to Mar. 28, 1865, shortly before his death. But the great work of his life at Liverpool was tuition.

Zeugheer's playing was very pure in tone and refined in expression, though the work of his career was not favourable to original composition. He wrote 2 symphonies, 2 overtures, a cantata, 2 sets of entr'actes, a violin concerto, op. 28, a potpourri for violin and orchestra, op. 6, an instrumental quartet, an andante and rondo for piano and violin, op. 21, and a polacca for 4 voices, few of them published. In Liverpool he wrote an opera, 'Angela of Venice,' to Chorley's words, but it was neither produced nor published, owing to the badness of the libretto. He published 2 sets of waltzes, a vocal duet, 'Come, lovely May,' and other songs and glees. R. M.

ZIANI, (1) MARC ANTONIO (b. Venice, c. 1653; d. Vienna, Jan. 22, 1715), maestro di cappella at S. Barbara, and at the theatre of Mantua whence he was dismissed Sept. 28, 1686. He became vice-Kapellmeister at the Viennese court, Apr. 1, 1700, and first Kapellmeister Jan. 1, 1712. He composed oratorios, masses, motets and other church music as well as 45 operas, serenades and cantatas (*Riemann; Q.-L.*).

(2) PIETRO ANDREA (b. Venice, early 17th cent.), uncle of the preceding. He was organist at S. Salvatore, Venice, 1640; from May 1657 till 1659 or 1660 he was maestro di cappella of San Maria Maggiore, Bergamo; from Dec. 20, 1666 to Jan. 20, 1667, he conducted some of his church works at the wedding of the hereditary Prince of Saxony at Dresden. In 1669 he succeeded Cavalli as second organist of S. Mark's, Venice, and when he was not appointed first organist, on the death of the former in 1676, he went to Naples. From that time reliable data are not obtainable; those given by various biographers are not substantiated. He composed 23 operas, 3 oratorios, masses, psalms, instrumental sonatas of 3 to 6 parts, overtures, organ pieces (*Riemann; Q.-L.*).

ZICH, OTAKAR (b. Kralové Městec, 1879), a Czech composer who began life as a secondary schoolmaster, proceeded to the University of Brno (Brünn), took the degree of Ph.D., and was appointed professor of æsthetics at that institution. He has collected and published the folk-songs of the Chods (inhabitants of E. Bohemia) and other districts. His realistic opera 'Vina' (The Sin), a setting of Jaroslav Hilbert's remarkable episode from modern life, was produced at the National Theatre, Prague,

1922, and awakened considerable controversy. He has also composed two works for chorus and orchestra, 'Osudná svatba' (The ill-fated Marriage) and 'Polka jedé' (Polka Rides); an earlier opera, 'Malířský nápad' (The Painter's Downfall); and vocal settings of poems by Jan Neruda.

R. N.

ZIEGLER, JOSEPH, an 18th-century violinist-composer; in Vienna, c. 1750. He was the master of Dittersdorf. Of his compositions are still in existence 5 motets, 4 masses, 2 litanies, 1 Salve Regina, 1 violin concerto with string accompaniment, and a violin sonata with basso continuo (Q.-L.).

ZIEHN, BERNHARD (b. Erfurt, Germany, Jan. 20, 1845; d. Chicago, U.S.A., Sept. 8, 1912), German-American musical theorist. In 1868-70 he taught higher mathematics, German, and music-theory at the German Lutheran School in Chicago.

After 1871 Ziehn occupied himself with the theory of music, the technique of composition and of piano-playing, and with writing concerning it. Busoni said of him: 'He is a theoretician who points to the possibilities of undiscovered lands—a prophet through logic. As a master of harmony he stands alone.' Besides his master-work, *Harmonie und Modulationslehre* (1888), his books include: *System der Übungen für Klavierspieler* (1881); *Lehrgang für den ersten Klavierunterricht* (1881); *Five- and Six-Part Harmonies, How to use Them* (1911); and *Canonical Studies, a New Technique of Composition* (1912).

W. S. S.

ZILCHER, HERMANN (b. Frankfort-on-Main, Aug. 18, 1881), son of the composer Paul Zilcher who gave him his first musical training. He went later to the Hoch Conservatorium (Kwast, Scholz, Knorr). In 1901 he gained the 'Mozart Prize for Composition.' He toured Europe and America with Vecsey and Petschnikof, etc. In 1905 he was appointed teacher at the Hoch Conservatorium and in 1908 was called to the Academy in Munich as professor for PF. and composition. He has been Director of the Conservatorium of Music in Würzburg since 1920. In his compositions he is at his best in the numerous song cycles which reveal a profound study of Brahms allied to a strong influence of the Neo-Romantic and Impressionistic School.

Song cycles (opp. 10, 12, 13, 14, 25, 28, 29, 30, 31, 35a, 35b, 36, 37, 40, 41); c. German Folk-song Play (for solo, quartet, PF.); 'Aus dem Hohelied Salomons' (for alto, baritone, str. quartet and PF.); PF. pieces (opp. 5, 6, 8, 26, 34); vln. sonata; PF. quintet; symphonietta; suite (for orch.); symphony in A maj.; symphony in F min.; double concerto for two vlns.; vln. concerto; suite (for two vlns. and orch.); vcl. concerto; 'Klage' (for vlns. and orch.); PF. concerto; 'Night and Morning' (for two PFs, orch. and kettle-drum); 'Reinbart', chor. work; 'The Love Mass, (chor. work); 'Filzbutze' (Dream Play), (Mannheim, 1903); incidental music to 'As You Like It', 'A Winter's Tale,' and 'Dr. Eisenbart' (Mannheim, 1922).

K. D. H.

ZIMBALIST, EFREM (b. Rostoff on the Don, Russia, May 7, 1889), violinist.

After receiving some lessons from his father, an orchestral leader, he entered in 1901 the St. Petersburg Conservatorium, where he studied

continuously for 6 years under Leopold Auer, and gained a gold medal and a scholarship of 1200 roubles. After 1907, when he left the Conservatorium, he toured in Germany, England (his first appearance in London was in Dec. 1907), and Belgium with considerable success, playing most of the great concertos with a purity of style and freedom from extravagance remarkable in one so young. He went to America in 1911, playing on Oct. 27 Glazounov's concerto in A minor with the Boston Symphony Orchestra. He ultimately settled there and married (1914) Alma Gluck, a soprano singer. He plays on a Stradivari violin of the best period. W. W. C., addns.

ZIMBALON, see **DULCIMER**.

ZIMMERMAN, PIERRE JOSEPH GUILLAUME (b. Paris, Mar. 17, 1785; d. there, Oct. 29, 1853), distinguished pianist and teacher.

The son of a pianoforte-maker, he entered the Conservatoire in 1798, studied the piano with Boieldieu, and harmony with Rey and Catel. In 1800 he carried off first prize for piano, Kalkbrenner taking the second. His musical education was completed by a course of advanced composition under Cherubini. In 1811 he was appointed 'répétiteur,' or under-master of the pianoforte at the Conservatoire, became joint-professor in 1817, and professor in chief in 1820. This post he held till 1848, when he retired with the title of honorary inspector of pianoforte classes. During this long period he fulfilled his duties with indefatigable zeal and entire devotion, so much so, indeed, that for the sake of his constantly increasing pupils he entirely gave up appearing in public, and found little time for composition. He did, however, produce at the Opéra-Comique in 1830 'L'Enlèvement,' in 3 acts, libretto by Saint-Victor, Scribe and d'Épagny, wholly forgotten, and composed 'Nausicaa,' a grand opera, which was never performed. He also wrote a number of pianoforte pieces of various kinds, but his most important work is the *Encyclopédie du pianiste*, which comprises a complete method of pianoforte-playing, and a treatise on harmony and counterpoint. In 1811 Zimmerman won the post of professor of fugue and counterpoint thrown open to competition on the death of Eler, but satisfied with the honour of victory decided to retain his favourite piano class. A daughter of his became Mme. Charles Gounod.

A. J.

ZIMMERMANN, AGNES MARIE JACOBINA (b. Cologne, July 5, 1847; d. London, Nov. 14, 1925), pianist and composer, came to England very early, and at 9 became a student at the R.A.M., under Cipriani Potter and Steggall. Later she learnt from Pauer and Sir George Macfarren.

Her works were often heard at the R.A.M. Students' concerts. In 1860 and 1862 she obtained the King's Scholarship, and on Dec. 5,

1863, made her first public appearance at the Crystal Palace in two movements of Beethoven's *E♭* concerto. In 1864 she followed this up by playing at the Gewandhaus, Leipzig, and elsewhere in Germany. Though occasionally travelling abroad (as in 1879–80 and 1882–83), and always with success, she made England her home, where her name became for many years a household word for purity of interpretation and excellent musicianship. In playing she always devoted herself to the classical school, once or twice in a very interesting manner. Thus it was she who performed (for the first and only time in England) Beethoven's transcription of his violin concerto for the pianoforte at the Crystal Palace, Dec. 7, 1872. Her compositions are also chiefly in the classical form and style, and include 3 sonatas for piano and violin (opp. 16, 21 and 23), a sonata for piano, violin and violoncello (op. 19), a sonata for piano solo (op. 22), a mazurka (op. 11), and *Presto alla Tarantella* (op. 15); also several songs, duets and 4-part songs, and various arrangements of instrumental works, etc.

She edited the sonatas of Mozart and Beethoven and the complete pianoforte works of Schumann for Novello. G.

ZINCK, (1) BENEDIKT FRIEDRICH (b. Husum, Holstein, May 23, 1743; d. Ludwigslust, Mecklenburg, June 23, 1801). At first organist at Schleswig; in Aug. 1783 he signs himself Court Musician at Ludwigslust. He composed a considerable number of symphonies, mostly for full orchestra, the 103d Psalm for voices and orchestra, harpsichord sonatas, duets for various instruments, etc. He was also the inventor of the 'Coelestina,' a clavier or organ-harmonika (*Mendel*; *Q.-L.*).

(2) HARNACK OTTO CONRAD (b. Husum, July 2, 1746; d. Copenhagen, Feb. 15, 1832), a brother of the former. He was a singer at Hamburg, 1768; flautist and chamber-musician at Ludwigslust, Mecklenburg-Schwerin; went to Copenhagen in 1787 as singing-master at the Royal Theatre; was organist at St. Saviour's church 1789–1801; and music master at the Blaagard Seminary 1791–1811. He published the authorised Danish Hymn-book; composed oratorios, cantatas, songs, clavier-sonatas, trio-sonatas, divertiments for violin and harpsichord, etc.; and wrote *Die nordische Harfe*, an essay on Scandinavian music (*Mendel*; *Q.-L.*).

ZINGARA, LA, an Italian version of Balfe's BOHEMIAN GIRL (*q.v.*). G.

ZINGARELLI, NICCOLÒ ANTONIO (b. Naples, Apr. 4, 1752; d. Torre del Greco, May 5, 1837), eldest son of Riccardo Tota Zingarelli, a tenor singer and teacher of singing.

In 1759 his father died, leaving his mother with four children and very poor. The eldest boy was chief clerk in the Musical College of S. Maria di Loreto, and Niccolò was at once admitted there as a resident pupil. Here he

and Cimarosa learnt composition under Fedele Fenaroli. By the rules of his College he was bound to study an instrument, and he selected the violin, on which he soon became very proficient. Among his teachers was Speranza, a learned contrapuntist and the best pupil of Durante. Before leaving his College, Zingarelli produced his first opera, or rather intermezzo — 'I quattro pazzi' — which was performed by the pupils in the Conservatorio in 1768.

Soon after his departure from the Conservatorio in 1769 we find him teaching the violin in the Gargano family at Torre Annunziata, near Naples. Later on he gave lessons to the Duchess of Castelpagano, under whose patronage he produced his first work at the San Carlo in 1779, the cantata 'Pigmalione,' which met with some success. On Aug. 13, 1781, his first opera, 'Montesuma,' was represented at the same house. It shows a style of the greatest simplicity and purity; and when afterwards performed in Vienna, Haydn praised it greatly, and foretold a career of success to its composer. Strongly recommended to the Archduchess Beatrice of Austria, he went to Milan, and was well received at the vice-regal court. Milan was to be henceforth the scene of Zingarelli's many triumphs, and for La Scala he wrote most of his serious and all his comic operas. He began there with 'Alsinda' in 1785, which greatly pleased the Milanese public, though composed in seven days and in ill-health, if we are to believe Carpani, who wrote most of Zingarelli's libretti, and asserts that he was an ocular witness, not only of the above feat, but also of the composition of the whole of 'Giulietta e Romeo' in forty hours less than ten days. This really astounding facility was the result of Speranza's method of obliging his pupils to write the same composition many times over, with change of time and signature, but without any change in its fundamental poetical ideas. 'Alsinda' was soon followed by 'Armida,' 'Annibale,' 'Ifigenia in Aulide,' and 'Ricimero,' all given at La Scala during the two following years with enormous success.

Whilst thus satisfying the theatrical public, Zingarelli did not neglect his more congenial work of writing sacred music, and in 1787 he composed an oratorio of 'The Passion,' given at the church of S. Celso in Milan. From 1786 to 1788 he wrote 9 cantatas, 'Alceste,' 'Hero,' 'Sappho,' 'Nice d' Elpino,' 'L'amor filiale,' 'Alcide al bivio,' 'Telemaco,' 'Oreste' and 'Il trionfo di David'; all in Milan, except the last, which was given at San Carlo, Naples.

In 1789 Zingarelli was called to Paris to compose an opera for the Académie Royale de Musique. He arrived in the thick of the fight between the Piccinnists and Gluckists. Marmontel wrote for him the book of 'L'Antigone,' which was represented on Apr. 30, 1790. This opera was performed in Paris only 3 times con-

secutively. Zingarelli, as both a conservative and a religious man, soon fled from revolutionary Paris, and returned to Milan through Switzerland at the beginning of 1791. There he produced at La Scala 'La morte di Cesare,' and in the following year 'L'oracolosannita' and 'Pirro.'

In 1792 there was an open competition in Milan for the place of maestro di cappella of the Duomo, the subject being a canon for 8 voices, and Zingarelli was appointed. Among his many pupils of this time we may mention F. Pollini, to whom he dedicated his 'Partimenti' and his 'Solfeggi,' which soon became recognised text-books.

With 'La secchia rapita' in 1793, Zingarelli began a series of comic operas, which made his name popular, not only in Italy but throughout Germany, where they were widely performed. 'Il mercato di Monfregoso' soon followed, and is reputed his best opera buffa. In 1794 he composed 'Artaserse' for Milan, the 'Orazi e Curiazi' for the Teatro Reale of Turin, and 'Apelle e Campaspe' for the theatre La Fenice of Venice, in which opera Crescentini made his debut. The 'Conte di Saldagna' was unsuccessfully produced in 1795 at the same theatre in Venice; but this failure was grandly retrieved the following year by the performance of his greatest work, 'Giulietta e Romeo,' at La Scala. Its beauty and popularity are shown by the fact that it was played all over the continent for the greater part of a century.

Zingarelli was appointed in 1794 maestro di cappella at Loreto, which place he held for 10 years. Here he wrote many operas, of which we may mention 'Clitennestra,' written expressly for Catalani, and 'Inez de Castro,' for Silva. His principal work, however, during these ten years was sacred music, to which he was inclined by his nature and by the duties of his office. In the archives of the Santa Casa of Loreto is accumulated an immense quantity of manuscript music, known by the name of 'Annuale di Loreto.' To this great collection Zingarelli contributed the astounding number of 541 works, inclusive of 28 masses, which are still sung in that church. As it is forbidden to copy the music of the 'Annuale,' the outside world must remain ignorant of its merits. Zingarelli's masses, to those who heard them, have a spontaneity of expression, an easy facility of style, a simplicity, and, above all, a most entrancing melody.

In 1804 Zingarelli succeeded Guglielmi as maestro di cappella of the Sistine Chapel in Rome. Here he set to music passages from the great Italian poets. Tancredi's Lamento, from the twelfth Canto of Tasso's *Gerusalemme Liberata*, was performed in Naples in 1805, in the Palace of the Prince di Pantelleria, where Zingarelli met Mme. de Staël, whom he had previously known in Paris as Mlle. Necker. The same year he gave in Rome 'La distru-

zione di Gerusalemme' at the Valle theatre, where it kept the boards for 5 consecutive years. He produced, 7 years after, in Florence, 'La Riedificazione di Gerusalemme,' one of his very few failures. His opera 'Baldovino' was given in 1810 at the Argentina theatre, and the following year 'Berenice' at the Valle theatre, both in Rome. 'Berenice' was Zingarelli's last opera, and had a run of over a hundred consecutive representations; a thing unheard of in the thinly populated towns of Italy. But it was not his last work, as he continued writing to the last day of his life. 'Berenice' was composed after leaving Rome for Cività Vecchia on his forced journey to Paris; and one of its finest numbers, the finale of the first act, 'Già sparir vedo la sponda,' was written on board ship.

We have now arrived at a memorable epoch of Zingarelli's life, when his already well-known name became illustrious among those of Italian patriots. When Napoleon, in the zenith of his imperial power, gave his son the title of 'King of Rome,' he ordered rejoicings throughout all his dominions. A Te Deum was therefore arranged to be sung at St. Peter's in Rome; but when the authorities, both French and Italian, were assembled for the performance, it was found to their consternation that the maestro di cappella refused to have anything to do with it, and that nothing could induce him to acknowledge the rule of the Corsican usurper. He was arrested and, by Napoleon's orders, taken to Paris, where he was immediately set free and granted a pension. This he owed to the fact that Napoleon was fond, above all other, of Zingarelli's music, which he had heard at Loreto in 1796, in Vienna in 1805 and in Paris in 1809. On the last occasion, when Crescentini sang the part of Romeo, Napoleon, much affected, sent him from his own breast the star of the order of the Iron Crown. He also ordered Zingarelli to compose for his imperial chapel a Mass that should not last more than 20 minutes, had it rehearsed in his presence, and was so pleased with it as to give the composer 6000 francs. During his stay in Paris, Zingarelli was replaced at Rome by Fioravanti. In Feb. 1813 he was appointed director of the Real Collegio di Musica in Naples. In 1816 he succeeded Paisiello as maestro di cappella of the Neapolitan cathedral; and held both these places until his death.

For the Birmingham Festival of 1829 Zingarelli wrote a cantata on the 12th chapter of Isaiah. As he could not take it to England himself he entrusted his pupil, Costa (*q.v.*), with the mission, and this was the occasion of Costa's introduction to the English public. Zingarelli's next composition was a Hymn to commemorate the inauguration of the Philharmonic Society of Naples in Jan. 1835. His oratorio, 'The Flight into Egypt,' was written and performed only a few weeks before his death in 1837.

Of his very numerous masses, without reckoning the 28 in the 'Annuaire di Loreto,' the best are: that of Novara; that of Dresden (commissioned by the King of Saxony, and performed in 1835 under the direction of Morlacchi, one of his pupils); a Requiem for the Neapolitan minister Medici; and another Requiem, composed for his own funeral.

Although in his 'Mercato di Monfregoso' and in his 'Secchia rapita' Zingarelli gives many proofs of a comic musical vein, he shone more in serious operas, and most of all in his numberless sacred compositions. The adaptation of profane music to religious services, so common in Italian churches, he strenuously combated.

The following is a list of Zingarelli's operas and oratorios. (See also *Q.-L.*)

OPERAS

Date.	Name.	First Performed.
1771	I quattro pazzi	Conservatorio, Naples.
1781	Montesuma	S. Carlo, Naples.
1788	Alcina	Scala, Milan.
1786	Armida	Do.
1787	Annibale	Do.
"	Ingelina in Antide . . .	Do.
"	Richiero	Do.
1790	Antigone	Opera, Paris.
1791	Morte di Cesare	Scala, Milan.
1792	L' oracolo Sannita . . .	Do.
"	Pirro	Do.
1793	La secchia rapita	Do.
"	Il mercato di Monfregoso .	Do.
1794	Artaserse	Do.
"	Apelle e Campaspe . . .	Venice, Venloe.
"	Orati e Curiaci	Reale, Turin.
1795	Conte di Saldaña	Venice, Venice.
1796	Giulietta e Romeo	Scala, Milan.
"	La Danaide	Do.
"	Melagro	Do.
"	Mitridate	Venice, Venice.
1798	Carolina e Menzicoff . . .	Do.
1799	Edipo a Colona	Do.
"	Il ritratto	Scala, Milan.
1800	Il ratto delle Sabine . . .	Do.
1801	Clitennestra	Do.
1803	Il bevitore fortunato . . .	Do.
"	Le nozze di Dorina	Do.
"	Inez di Castro	Do.
1810	Valdevino	Torre Argentina, Rome.
1811	Berenice	Valle, Rome.

ORATORIOS AND CANTATAS

Date.	Name.	First Performed.
1779	Pigmalione	S. Carlo, Naples.
1786	Alceste	Milan.
"	Hero	Do.
"	Sappho	Do.
1787	The Passion	S. Celso, Milan.
"	Nice d' Elipno	Do.
"	L' amor filiale	Do.
"	Alcide al bivio	Do.
"	Telemaco	Do.
1788	Oreste	Do.
"	Il trionfo di David	S. Carlo, Naples.
1804	Francesca da Rimini . . .	Rome.
1805	Tancredi al sepolcro di Clorinda	Naples.
"	La distruzione di Gerusalemme	Valle, Rome
1809	Conte Ugolino	Paris.
1812	La redificazione di Gerusalemme	Florence.
1829	Isaiah	Birmingham.
1833	Saul	S. Michael, Rome.
1835	Hymn of Inauguration . .	Philharmonic Soc., Naples.
1837	The Flight into Egypt . . .	Naples.

Also 541 MS. works in the 'Annuaire di Loreto,' a detailed and complete list of which, obtained from and certified by the maestro di cappella at Loreto, is in the R.C.M. L. R.

ZINKE, CORNETTO, CORNET à Bouquin, see CORNETT.

ZIPOLI, DOMENICO (*b.* Nola, Naples, *c.* 1675) studied at the conservatorio dei Turchini, Naples; went to Rome in 1696, where he became organist at the Jesuit church. He composed 'Sonate d' intavolatura per organo e cimbalo,' 2 parts, the 2nd part dance suites; six suites of Italian lessons for the harpsichord, etc. (Walsh, 1725 ?) a third collection of toccatas, voluntaries and fugues for the organ or harpsichord (Walsh, 1715 ?). His organ-pieces were held in great esteem (*Mendel; Q.-L.*).

ZIRYÁB, 'ALÍ IBN NÁFI (*b.* Baghdád, *c.* 800; *d.* Córdoba), a celebrated Persian singer and composer, who was a pupil of Ishaq and eventually removed to Spain (821), became the idol of 'Abd-ar-Rahmán II. (822-852) of Córdoba. His fertility of composition was attributed to the jinn, who visited him in his sleep and whispered melodies in his ear. On waking he called his two slave musicians and taught them the song; then he wrote the words and went back to bed. As a teacher of singing Zirýáb divided his instruction into three courses: rhythm, melody and ornamentation. The pupil had first to pass certain tests, one of which was to sing a prolonged *ah* on all degrees of the scale. Then he began by learning the words and metre; he spoke the words while he beat time with a tambourine, marking the strong and the weak accents and the pace of the different movements. Then he was taught the melody in its simplest form with no ornaments, and only when he could sing it perfectly was he allowed to study the shakes, vocalises, scale-passages and appoggiaturas with which the master embellished the song, and the nuances he introduced to give it expression and charm. Zirýáb's method gives some indication of what the music of his time was like—how it appeared to his pupils and how it was appraised by his admirers. His life is related by al-Maqqari, ABU'L FARAJ and other writers.

J. B. T.

ZÍTEK, OTA (*b.* Prague, 1892), Czech writer on music and composer. He pursued his studies at the Universities and Conservatoires of Prague and Vienna, and afterwards specialised in questions concerning the staging of drama and opera, on which subject he contributed many articles to Czech periodicals, and wrote a book, *Modern Opera*. His works are mostly published by Hudební Matice, Prague.

Operas: 'Vznešené srdce' (The Heart-a-flame), 1918; 'Pád Petra Králence' (The Downfall of Peter Krallence), 1921; song cycles. R. N.

ZITHER, a modern member of the great family of stringed instruments plucked with a plectrum, which are undoubtedly among the most ancient of musical instruments. It is unnecessary in this place to trace the development of the modern zither from the CITHER of two centuries ago, or from the Greek *κιθάρα*, but it is remarkable that the method of exciting

the vibrations of the strings is practically identical in all the instruments similarly named at various dates, though the bare finger is used, as in the GUITAR, and in the modern zither a kind of open thumb-ring with a pointed end is worn. This plectrum is the main distinction between the real zither, or 'Schlagzither' as it is sometimes called, and the 'Streichzither' which can be played with a bow, and is a more or less hybrid invention of recent times.

The zither may be called the national instrument of Bavaria, Styria and Tyrol, for it is played by all classes, and no inn is without one. It consists of a flat box which lies on the table, strung with 5 metal strings passing over frets, and from 27 to 40 strings of various kinds played as open strings plucked with the fingers, to form the accompaniment to the melody which is played with the plectrum, on the strings nearest the performer. There are many slight varieties in the make of the instrument, and every professor has his own preferences; the form most commonly seen is that shown on *PLATE I.* No. 5. The 'Concert-Zither' is rather longer, more powerful in tone, and has from 36 to 42 strings; a yet longer variety of the instrument is the 'Elegy-Zither,' which is tuned a third or fourth lower than the others. The tuning of the melody-strings is as follows, the two highest being nearest to the player:

the theatre and cathedral orchestras in Milan, and successively became conductor of the Philharmonic Society of Ferrara, and member of the Philharmonic Academy of Bologna. He advanced the art of violin-playing considerably in Italy, doing much to reform the art of bowing in that country.

E. H.-A.

ZOELLER, CARL (*b.* Berlin, Mar. 28, 1840; *d.* London, July 13, 1889), bandmaster, composer and performer on the *viole d'amore*.

His musical studies were pursued entirely at the Berlin Conservatorium, where Hubert Ries, W. Gärlich and Grell were his masters for violin, harmony and counterpoint respectively. He travelled for some time in Germany, with an Italian opera-troupe, settling eventually in London, in 1873. In 1879 Zoeller became bandmaster of the 7th (Queen's Own) Hussars; in 1884 he was elected a member of the Accademia di Sta. Cecilia, of Rome; and in 1885 a similar honour was conferred on him by the Istituto Musicale di Firenze. Zoeller wrote a comic operetta, 'The Missing Heir'; a lyrical drama, 'Mary Stuart of Fotheringay'; a scena for soprano and orchestra, 'The Rhine King's Daughter'; four overtures and other orchestral pieces, also a concerto for violin and orchestra, a string quartet and quintet, several songs, church music, etc. He did much towards reviving the cult of the *viole d'amore*, which he himself played, and for which he wrote a scholarly Method, preceded by an erudite and concise history of the instrument and its origin entitled *The Viole d'Amour, Its Origin and History, and Art of Playing it*. In Mar. 1889 he wrote an admirable lecture on the *viole d'amore*, which was read at a meeting of the original Cremona Society, illustrated by many instruments and accessories and works relating to the instrument, of which a catalogue was published by the Society. He was at this time bandmaster of the 2nd Life Guards, and editor of the *United Services Military Band Journal*. (See VIOL.) He died as the result of an accident which befell him at the Military Tournament at Islington in the month of July of the same year.

E. H.-A.

ZOILLO, ANNIBALE (*b.* Rome, mid. 16th cent.) maestro di cappella at S. Giovanni di Lateran (according to Fétis from 1561-70). In 1563 he calls himself maestro di cappella at S. Luigi. On July 5, 1570, he entered the Papal Chapel as singer, in which he remained until 1581-82. From that time onward he devoted himself entirely to composition, but only a few masses, his second book of madrigals and a number of songs and madrigals in collective volumes are still in existence (*Q.-L.*).

ZOILLO, CESARE, an early 17th-century Roman composer who wrote madrigals a 5 v., Venice 1620 (several editions); motets in collective volumes (*Q.-L.*).

ZOLOTARIEV, VASSILY ANDREIEVICH

(*b.* Taganrog (Govt. of the Don Cossacks), Feb. 23-Mar. 7, 1873), composer. He entered the school of the court chapel, St. Petersburg, as chorister, studied the violin, but had to give it up because of an injury to his hand. He worked at composition under Liadov and Balakirev; also under Rimsky-Korsakov, at the St. Petersburg Conservatoire, from 1898-1900. In 1900 he won the Rubinstein Memorial Prize with his cantata 'Paradise and the Peri.' He was a professor at the Moscow Conservatoire, but now (1925) lives in the Caucasus. His chief works are:

Symphony, op. 8; Overture, 'A Rustic Festival' (*Fête villageoise*), Promenade Concerts, Oct. 2, 1917 (condr. Sir Henry J. Wood); String quintet, D min., op. 19; String quartets, D maj., op. 5; A maj., op. 6; D maj., op. 25; B flat min., op. 33; FF. quartet, D maj., op. 13; FF. trio, E min., op. 33; FF. sonata, G maj., op. 10; FF. pieces and songs.

R. N.

ZOPF, *i.e.* 'pigtail,' a German term for an old-fashioned obsolete style in music.

The word is generally used of a particularly conventional style, which was very common through the 18th century, especially in its latter part.¹ The tendency, which may be perceived in composers like Durante, Vinci, Jommelli, Graun, and many others, to substitute a mechanical kind of expression for the utterances of genuine emotion, found a very common outlet in the trick of writing for two soprano voices usually following one another about in thirds, over a bass a long way below them. This was not done as a result of poverty of ideas, for it occurs side by side with music that is earnest and workmanlike. It seems to have been demanded by the fashionable people of the day, and to have been just such a guarantee of respectability as a wig or a pigtail at the same date. Much the same lack of originality gave rise to Wagner's term of 'Kapellmeistermusik.'

M.

ZOPFF, HERMANN (*b.* Glogau, Silesia, June 1, 1826; *d.* Leipzig, July 12, 1883), was composer and critic and editor of the *Neue Zeitschrift für Musik* after Brendel.

Though he had received a complete university education, his father wished him to be a farmer; but his own predilections inclined him to music. At length the successful performance of an overture composed by him removed his father's opposition, and from the age of 24 he devoted himself exclusively to music. He placed himself under the tuition of A. B. Marx and Kullak, and was soon engaged to fill an important post on the teaching staff of their new Conservatorium at Berlin. He had also other appointments in the musical circles of that city; but his ambition drew him in 1864 towards Leipzig, and he gladly accepted an offer from Brendel to edit the *Neue Zeitschrift für Musik*, which necessitated his removal thither. There he toiled until within a short time of his death, as editor, critic, conductor, composer, and professor of singing and

¹ See the *Oxf. Hist. Mus.* vol. iv. pp. 62, 63, etc.

composition. The character and tone which had been imparted to the *Neue Zeitschrift* by Brendel were continued by Zopff, for both editors were strenuous advocates of the new German school. But Zopff was no narrow partisan; he was ready to do full justice to every musician of high aims.

Zopff's compositions cover a wide range of form, from the simplest pianoforte pieces or songs to the largest polyphonic or dramatic works, and all bear the mark of a thorough, scientific musician. But for a certain want of spontaneity and grace, they would probably have been much better known and oftener performed. Among his numerous choral works with orchestral or pianoforte accompaniment, we may mention his 'Brauthymne,' 'Frühlingshymne,' and 'Triumph der Liebe.' Of his larger works, approaching the oratorio form, we may cite 'Anbetung Gottes,' 'Evangelium der That,' and 'Alexandera.' It is clear from his operas, 'Carloman,' 'Muhammad,' 'Judas Makkabeus' and 'Constantin,' that his strength was especially concentrated on dramatic forms; but as regards popularity his symphonic poem 'Tell,' the 'Idyllen für kleines Orchester,' and the 'Traum am Rhein' have been most fortunate. Zopff was a careful and prolific writer of critical, theoretical and didactic essays; his *Theorie der Oper* is a good illustration of the industry with which he collected and utilised valuable information.

A. H. W.

ZOPPA, ALLA, *i.e.* halting or limping, a term applied to a rhythm in which the second quaver in a bar of 2-4 time is accentuated, as in certain Hungarian pieces, or the modern American 'rag-time.' (See MAGYAR.) G.

ZORTZIKO (ZORZIKO), see SONG, subsection SPAIN (5).

ZUFFOLO, a more or less generic name for a whistle, pipe or flageolet; in the scores of Keiser's 'Croesus' (1710), and 'Jodelet' (1726), the instrument is used, and seems to have been some kind of shrill oboe. In Grassineau's dictionary (1740) it is given as the name of a small flute or flageolet, used for teaching birds to whistle. M.

ZULEHNER, CARL (c. 1770-c. 1830), is notorious for the share he took in compiling and foisting on the public several masses which he ascribed to MOZART (*q.v.*) (subsection SPURIOUS AND DOUBTFUL WORKS.) M.

ZUMPE, HERMANN (b. Taubenheim, Saxony, Apr. 9, 1850; d. Munich, Sept. 4, 1903), was educated at the teachers' Seminary at Bautzen, was a schoolmaster at Weigsdorf in 1870-71, from thence going to Leipzig, and playing the triangle in the Stadttheater there; he was one of those who helped Wagner in the preparation of the 'Ring' at Bayreuth in the years 1873-1876, and after this he conducted in the theatres of Salzburg, Würzburg, Magdeburg,

Frankfort and Hamburg (in 1884-86). In 1891 he went to Stuttgart as Court Kapellmeister, taking over the conductorship of the Society for Classical Church Music, in lieu of Faisst who was ill. In 1895 he became conductor of the Kaim Concerts in Munich, and was made court Kapellmeister at Schwerin in 1897. He visited London to conduct the Wagner performances at Covent Garden in 1898. In 1900 he received the most important appointment of his career, that of court Kapellmeister at Munich. Here he was especially active in directing the famous Wagner performances at the Prinz Regenten Theater up to 1903, when he died suddenly. Among his compositions the most important are: a fairy opera 'Anhana' (Berlin, 1880), 'Die verwünschte Prinzessin,' operettas 'Farinelli' (Hamburg, 1886), 'Karin' (Hamburg, 1888), and 'Polnische Wirtschaft' (Berlin, 1891). At his death the score of another opera, 'Sawitri,' was found incomplete, and was scored by Gustav von Rosseler, and produced at Schwerin. (Riemann.) M.

ZUMPE, JOHANNES, a German in the employ of the London harpsichord maker, Shudi, who about the year 1760 began the manufacture of square pianos. If he was not actually the inventor of the type, it was he who popularised it as a domestic instrument. (See PIANOFORTE, subsection THE SQUARE PIANO.)

ZUMSTEEG, JOHANN RUDOLF (b. Sachsenflur, Mosbach district of Baden, Jan. 10, 1760; d. Stuttgart, Jan. 27, 1802).

His father being a valet to Duke Carl of Württemberg, he was admitted into the Carlsschule, at 'The Solitude,' near Stuttgart, where he received a good general education, and formed a close friendship with Schiller, also a pupil there. He was originally intended for a sculptor, but the love of music proved too strong, and he studied first the violoncello, and then composition with Poli, whom he succeeded in 1792 as Kapellmeister, and director of the Opera. His chief claim to a place in the history of music is that he was the pioneer of the ballad, a form afterwards carried to perfection by Reichardt, Zelter and, pre-eminently, Löwe. Zumsteeg's best, and in his day widest-known, ballads were—'Leonore,' 'Des Pfarrers Tochter von Taubenhayn,' 'Kolma,' 'Die Büssende,' 'Ritter Toggenburg,' 'Elwina' and 'Die Entführung.' Of his operas the following were frequently performed: 'Die Geisterinsel,' 'Das Pfauenfest' and 'Ebondokani, the Calif of Bagdad.' 'Der Betrug aus Liebe,' 'Die Frühlingsfeier' (an ode by Klopstock for recitative with orchestra) and 'Zalsor' were other pieces of his, and many ballads and odes were published separately from the seven books of his 'Balladen und Lieder' published by Breitkopf & Härtel. Other works deserving

mention are—Choruses for Schiller's *Räuber*, 18 church cantatas, a concerto and duet for violoncello.¹

C. F. P., addns.

ZUR MÜHLEN, RAIMUND VON (b. Livonia, Nov. 10, 1854), singer.

He was born on the property of his father and received his education in Germany. In his 21st year he began to learn singing at the Hochschule, Berlin, and continued the study under Stockhausen at Frankfort, and Bussine in Paris. He made a speciality of the German Lied, particularly the songs of Schubert and Schumann, the latter of which he studied with Madame Schumann. His voice had a peculiar and sympathetic quality; but what gave Zur Mühlen's singing its chief charm was the remarkable clearness of his pronunciation, and the way in which he contrived to identify the feeling of the words with the music. He sang in London first in 1882, and was a frequent visitor later.

G.

ZVONAR, JOSEF LEOPOLD (b. Kublov, near Prague, 1824; d. Prague, 1865), Czech musical pedagogue and composer, director of the Organ School, Prague, and one of the founders of the famous choral society Hlahol (1861) and the Umělecká Beseda (Society of Arts). He composed songs, masses, two

Requiems and several humorous choruses, but is more highly valued as a theorist. His chief books were educational. A valuable publication is *Monuments of Early Czech Music* (1860-1864), which drew attention to the old contrapuntal school of Bohemian composers. R. N.

ZWEERS, BERNARD (b. Amsterdam, May 18, 1854; d. Dec. 9, 1924), composer. He was at first self-taught, but finished his studies, 1881, with Jadassohn in Leipzig. He then returned to Amsterdam, where he worked first as a choral conductor, and later chiefly as a teacher of theory and composition. Zweers, who was much influenced by Wagner's music, has written, amongst other works, three symphonies, music to Vondel's 'Gysbrecht van Amstel,' and many choral works. His third symphony, for a large orchestra, 'To my Fatherland' (1890), gave him a distinctive place amongst Dutch composers.

R. M.^g.

ZWISCHENSPIEL—something played between. The German term for INTERLUDE (*q.v.*). That the term had sometimes a wider meaning than Interlude is evident from a notice in the *Wiener Zeitung* for Apr. 1, 1795, referring to Beethoven's concerto in B \flat :

'In the interval (*zum Zwischenspiel*), on the first evening, the famous Herr Beethoven won the unanimous applause of the public by an entirely new Pianoforte Concerto of his own.'

G.

¹ Haydn had a high esteem for Zumsteeg. Griesinger wrote to Hartel: 'Haydn is much distressed at Zumsteeg's death; he had plenty of imagination, and a fine sense of form.'

THE END
